ROCKET LAUNCHING AREA IN THE CRETAN SEA

The Secretariat has recently been informed that a permanent rocket launching controlled area has been established in the Cretan Sea.

A Notice to Mariners containing details of the area has been issued by the Greek Ministry of Merchant Marine.  
... The Notice (a copy of which is attached hereto) is circulated to IMCO Member Governments for their information at the request of the Royal Hellenic Government.

exist northward of Kriti Island at Kretan Sea area.  
b. Page 5 and after the addition of Notice 4/1967 add:  
( )

Two areas for Rocket launching against guided target drones are existent at Kretan Sea area, from Peninsula Akrotiri extending eastwardly. The first area, being the bigger, is called «FULL RANGE AREA» and is enclosed between Peninsula Akrotiri, a point in the middle of the distance between Yanisadhes islets and Kamifonisi, and the eastern end of Anafi island. The second area, called «REDUCED RANGE AREA» is enclosed between Peninsula Akrotiri and positions extending 40 miles eastwardly on the one hand, and 40 miles Northeastwardly, on the other hand.

Sailing of ships through the above areas on days and hours as fixed by the issue of a Hellenicwarn is dangerous.

3 --A diagram showing the above firing areas is attached herewith.
