The United States Coast Guard Navigation Information Service (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <http://www.navcen.uscg.gov/gps/status/default.htm>.

In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, Email: webmaster@smtp.navcen.uscg.mil, or on the World Wide Web at: <http://www.navcen.uscg.gov>

SAFETY MARINE INFORMATION BROADCAST (SMIB): FLORIDA MANATEES

The Captain of the Port advises all mariners operating in Florida's waters that the Florida Manatee is a protected marine mammal under State

and Federal Law. These protected species are known to inhabit the Lower St Johns River between the months of March and December.

The Captain of the Port advises that all vessels crews be aware of the existence of the Florida Manatee during river transits. Vessel crews post adequate lookouts for these protected mammals when maneuvering near berths and in shallow areas. Should an incident occur, notify Florida Fish and Wildlife Conservation Commission (FWCC), Law Enforcement Division.

CODE OF FEDERAL REGULATIONS -TITLE 33 PART 70 - INTERFERENCE WITH OR DAMAGE TO AIDS TO NAVIGATION

No person, shall take possession of or make use of for any purpose, or build upon, alter, deface, destroy, move, injure, obstruct by fastening vessels thereto or otherwise, or in any manner whatever impair the usefulness of any aid to navigation established and maintained by the United States.

Recently several offshore NOAA data buoys parted their moorings and became adrift due to excessive strain on the mooring. These navigational data buoys collect valuable on scene weather data for all mariners. These buoys are anchored to the seabed, and some have a watch circle radius of over 1 nautical mile. Once the mooring is parted and the buoy is adrift only certain Coast Guard resources can reset the aid back on its intended station. Coordinating of resources to retrieve the buoy, and place it back on station is time consuming and sometimes take weeks, thus valuable weather information cannot be obtained and relayed to mariners in need of it.

Mariners are advised not to interfere with these aids to navigation and report any sightings of vessels tied off to them to the U.S. Coast Guard. Interference with or intentional damage to Aids to Navigation is a misdemeanor and shall be subject to a fine not exceeding the sum of \$500 for each offense (33 CFR 70.0).

LORAN-C OPERATIONS, LORAN DATA CHANNEL (LDC) RESEARCH

(A.) LORAN Stations Jupiter, Florida (7980-Y), Las Cruces, New Mexico (9610-X), and Middletown, California (9940-X) will be on air testing the Loran Data Channel (LDC) uninterrupted until further notice.

(B.) LORAN Stations Seneca, New York (8970-X), Gillette, Wyoming (8290-X), and Grangeville, Louisiana (7980-Y) will be on air testing LDC between 0800 and 1500 local time Monday through Friday.

(C.) LORAN Stations Dana, Indiana (9960-Z) and George, Washington (5990-Y) are expected to begin testing LDC in the near further.

(D.) The test broadcast will use pulse position modulation of a ninth pulse added one thousand microseconds after the standard pulse group. Throughout the test period the signal will meet all service performance parameters published in the 1994 specification of the LORAN-C signal. User should not experience any tracking errors or service interference from this test broadcast. Users will be notified of any changes to the test schedule and when the testing is complete.

(E.) LORAN users are encouraged to report any LORAN service degradation or outages that may experience via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN web sites report a LORAN problem worksheet at www.navcen.uscg.gov. Additional information on the LORAN data channel and the 1994 LORAN-C signal specification may also be found at this website.

(F.) Address inquiries to the chain operations control officer CWO S. McDonald of the northeast and Great Lakes U.S. LORAN-C Chains at (703) 313-5880 or LT. Boyd for the Southeast and South Central U.S. Chains at (703) 313-5873.

(G.) Current LORAN-C status is available 24 hours per day through internet address www.navcen.uscg.gov.

The GPS Navigational Signal maybe unreliable from October 24, 2008 to April 24, 2010, due to interference testing on GPS frequencies used in shipboard navigation and handheld systems. GPS systems that rely on GPS, such as E-911, AIS and DSC, may be effected within a close proximity of position 28-28-10.5N 080-34-44W. During this period GPS users are encouraged to report any GPS service outages that they may experience during this testing via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN's web-site's "GPS a problem worksheet" at www.navcen.uscg.gov.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

| Chart Number | Chart Edition | Edition Date | Last Local Notice to Mariners | Horizontal Datum Reference | Source of Correction | Current Local Notice to Mariners |

SEACOAST-FLORIDA-WEST PALM BEACH TO MIAMI: Offshore Safety, Savage and Recovery Operations.

Lockheed Martin will be conducting offshore testing with support vessels from Sea Tow of Palm Beach, between the Lake Worth and Boynton Inlets, one (1) to five (5) miles offshore on or about April 15, 2009, with completion date on or about May 15, 2009.

First phase testing on or about April 15, 2009, will consist of helicopter operations conducting drop tests and these tests will be considered a hazard to navigation. Divers and RHIB boats will be conducting safety, savage and recovery operations.

During the second half of April and the beginning of May, testing will include anchored float balls with strobe lights, which will be monitored 24/7 by Lockheed Martin. The M/V Richard Becker and Sea Tow of Palm Beach will be the support vessels on scene for this event. During the evening hours the float balls will present a hazard to navigation due to reduced visibility and any heavy sea states.

In order to minimize the risk of collision with deep draft vessels and improve the safe transit of shallow draft vessels within the Tampa Bay and its approaches, the Coast Guard Captain of Port Tampa, Florida issues the following advisory: A NOAA survey number H-11344 conducted in July, 2004 reported that a water depth of 10 feet extends approximately 500 feet outward from both sides of the main ship channel in the waters west of the Sunshine Skyway Bridge adjacent to Egmont Channel, Mullet Key Channel, and Tampa Bay Cut "A" except in the vicinity of the Sunshine Skyway Bridge where existing security zones prohibit navigation closer than 100 feet around all bridge supports, dolphins, and rocky outcroppings from piers 88 to 135. Continuing east of the Sunshine Skyway Bridge, the advisory includes the waters adjacent to Point Pinellas Channel, Tampa Bay Cuts -A-, "B", "C", "D", "E", "F", "G", "J", "J-2", West of "K" Cut, Gadsen Point Cut, and Hillsborough Bay Cuts "A", and "C". All vessels drafting less than 10 feet may consider utilizing waters that have been identified by the 2004 NOAA survey parallel to, and within 500 feet of, the main ship channel when identifying the safest navigational course for transiting Tampa Bay and its approaches.

OPERATION "ON GUARD"

U. S. Coast Guard Marine Safety Office Miami announces Operation "ON GUARD". This operation is designed to employ Coast Guard - active duty, reserve and auxiliary, Federal Bureau of Investigation, US Customs Service, US Immigration and Naturalization Service and the Florida Department of Law Enforcement personnel in response to suspected terrorist activity at the waterfront facilities of the United States. South Florida is extremely vulnerable because it is the terminus of illegal alien and narcotics smuggling routes from the Bahamas, the Caribbean and South America. These routes are well established and are readily available for use by terrorist organizations. An urgent need existed to make the American Public equal partners in the fight on terrorism. Operation "ON GUARD" creates an effective deterrent measure that employs the eyes and ears of the marine industry and the boating public, people that know every inch of the coastline because it is where they work and play. Potential terrorists are put on notice that their activities will be seen and reported.

Operation "ON GUARD" takes a two pronged approach consisting of face to face visits by Coast Guard, FBI, USCS, INS and FDLE personnel combined with a coordinated joint agency media campaign to reach Marina Operators, Marine Dealers, Bridge Tenders, Commercial Fishermen, and the Boating Public. This operation relies on Coast Guard Auxiliary programs already in place like the "Clean Marina" program, Vessel Safety Checks, Marine Dealer Visits and the Commercial Fishing Vessel Safety Program to reach their normal customers, the waterfront users. The public is provided with the toll free number (1.800.424.8802) for reporting suspected terrorist activity to the National Response Center and the 1.800.BE ALERT number for US Customs along with a list of reporting criteria.

Report:

- Suspicious persons conducting unusual activities
- Individuals establishing businesses or roadside food stands in proximity to marina or bridge
- Unknown persons photographing or creating diagrams
- Unknown or suspicious persons loitering for extended periods of time
- Unknown or suspicious persons renting watercraft
- Suspicious vendors attempting to sell/deliver merchandise or drop off packages
