SUPPLEMENTAL PUBLIC NOTICE 5-1342(a)

TO WHOM IT MAY CONCERN:

The Coast Guard is extending the period for public comment concerning the application from Virginia Department of Transportation (VDOT) for the proposed construction of a replacement bridge to be constructed across a navigable waterway of the United States. The purpose of this supplemental public notice will provide an opportunity to make additional comments due to mailing issues with Public Notice 5-1342 dated July 24, 2014.

WATERWAY AND LOCATION: Across Fox Creek, at Gloucester, VA

CHARACTER OF WORK: VDOT proposes to build a replacement bridge located on Route 662, 1.3 miles south of the intersection between Route 662 and Route 606; 24 miles above the mouth of the York River. VDOT is also requesting a waiver of a bridge permit under Title 33 Code of Federal Regulations, Section 115.70, Advance approval for bridges. Advance approval waterways are those that are navigable in law, but not actually navigated other than by logs, log rafts, rowboats, canoes, and small motorboats. The Commandant of the Coast Guard has given advance approval to the construction or repair of bridges across such waterways

MINIMUM NAVIGATIONAL CLEARANCES:

EXISTING

Vertical clearance: 3 feet above Mean High Water (MHW).

Horizontal Clearance: 28 feet between the bents

PROPOSED

Vertical clearance: 2.7 feet above MHW

Horizontal clearance: 32 feet between the bents

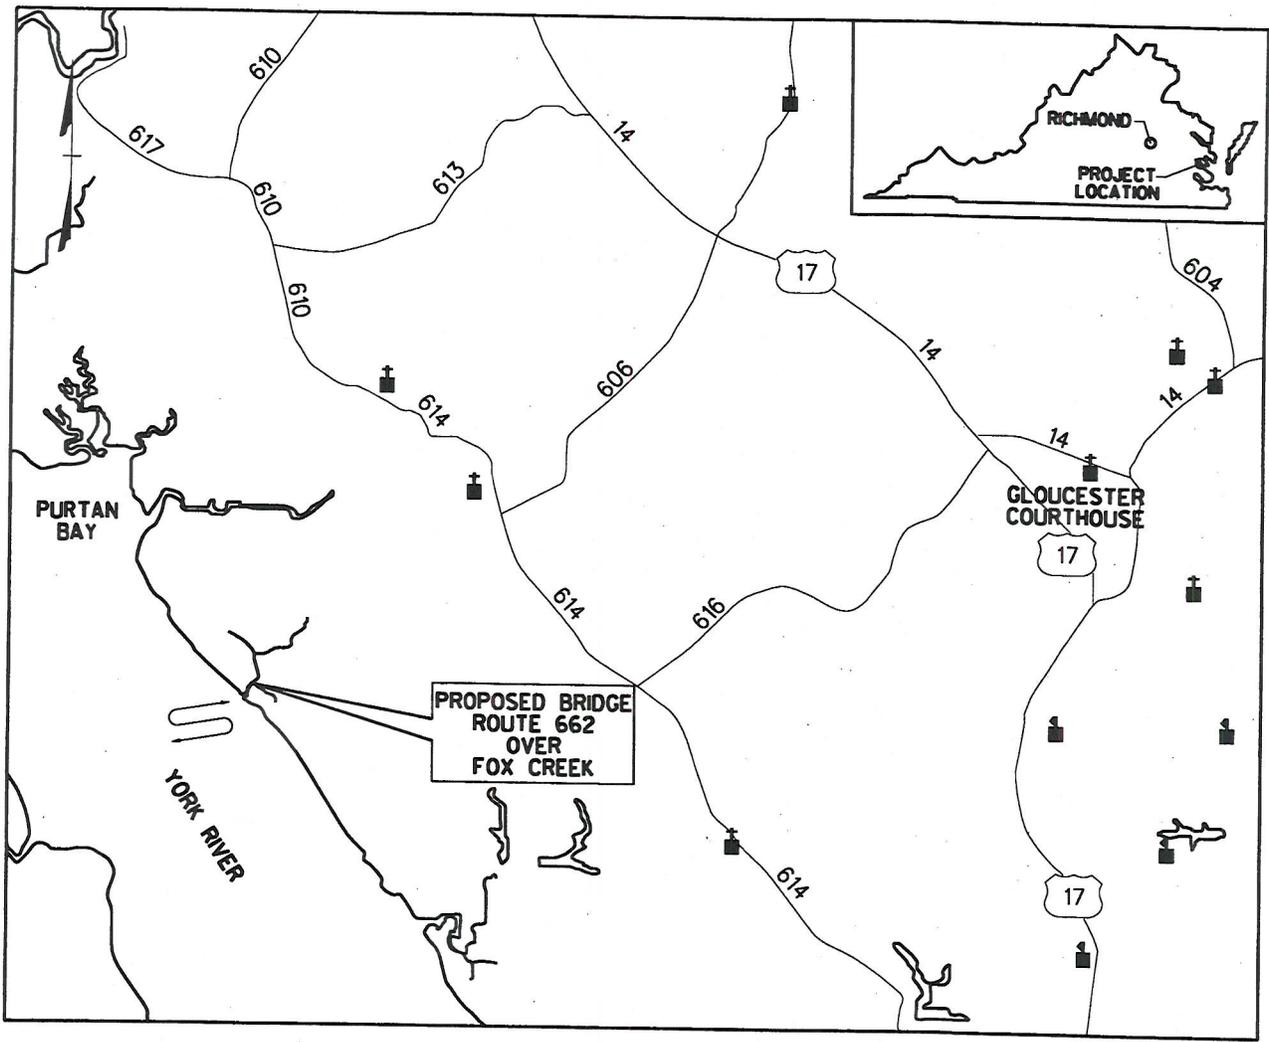

SOLICITATION OF COMMENTS: It is further requested that mariners and adjacent property owners express their views from a navigational standpoint, in writing, on the proposed project giving sufficient detail to establish a clear understanding of their reasons for support of or opposition to this project. Comments will be received for the record at the office of Commander (dpb), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, VA 23704-5004 through **27 SEP 2014.**
