SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jttfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: DPW

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-second characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

LNM: DPW/PRIV AIDS

GPS TESTING

Commencing March 14-17, 2016, March 21-24, 2016, and again on March 28-31, 2016, from 1300Z until 1900Z, each day, GPS testing will be conducted centered in approximate position 30-34-45.1N 086-40-45.3W, Eglin Air Force Base, Florida. The impact radius is approximately 214 nautical miles. This testing should NOT affect civilian GPS users. During these periods, GPS users are encouraged to report any GPS service outages that they may experience during the testing, via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website's GPS report a problem worksheet at www.navcen.uscg.gov.

LNM: 08-16

GPS TESTING

Continuing until February 26, 2016, and again on February 29, 2016, from 1400Z until 2000Z, each day, GPS testing will be conducted centered in approximate position 30-34-45.1N 086-40-45.3W, Eglin Air Force Base, Florida. The impact radius is approximately 214 nautical miles. This testing should NOT affect civilian GPS users. During these periods, GPS users are encouraged to report any GPS service outages that they may experience during the testing, via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website's GPS report a problem worksheet at www.navcen.uscg.gov.

LA - Lower Mississippi River - Temporary Anchorages

In accordance with 33 CFR 110.195 (b), the following temporary anchorages are being established for use during High Water Conditions and only as emergency anchorages due to fog and predicted fog conditions. No vessel shall occupy this anchorage unless expressly authorized by VTS New Orleans. No vessel may anchor in this anchorage exceeding 24 hours without the authorization of the COTP New Orleans.

Point Michel Anchorage:

An area, 1.4 miles long and 500 feet wide along the RDB of the Lower Mississippi River extending from Mile 40.8 to Mile 42.2, AHOP. The inner boundary of the anchorage is a line parallel to the nearest bank 325 feet from the water's edge into the river as measured from the Low Water Reference Plane. The outer boundary of the anchorage is a line parallel to the nearest bank 825 feet from the water's edge into the river as measured from the Low Water Reference Plane.

Plaquemines Point Anchorage:

An area, 0.5 miles in length along the RDB of the Lower Mississippi River extending from Mile 203.9 to Mile 204.4, AHOP. The width of the anchorage is 500 feet. The inner boundary of the anchorage is a line parallel to the nearest bank 400 feet from the water's edge into the river as measured from the Low Water Reference Plane. The outer boundary of the anchorage is a line parallel to the nearest bank 900 feet from the water's edge into the river as measured from the Low Water Reference Plane.

LNM: 03-16

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR					CGD01	
(Temp) ADD	NATIONAL DOCK CHANNEL BUOY 3				at 40-41-09.001N	074-02-48.001W
	Green can					
Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		

Advance Notice(s)

FL – ST. ANDREW BAY – Old East Pass Harbor Channel

The following changes will be made the week of March 28, 2016.
 Change Old East Harbor Channel Buoy 8 (LLNR-4610) to Old East Harbor Channel Lighted Buoy 8 (LLNR-4610) in approximate position 30-23-30.097N/086-30-22.394W. Showing FL R 4s, Nominal Range 3NM, Red nun.
 Chart 11385

LNM: 08-16-01D

TX – GALVESTON BAY – Galveston-Freeport

The following changes will be made the week of March 21, 2016.
 Change Galveston-Freeport Channel Buoy 3 (LLNR-36110) to Galveston-Freeport Channel Light 3 (LLNR-36110) in approximate position 29-18-32.681N/094-50-16.238W, showing FL G 2.5s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 4 (LLNR-36115) to Galveston-Freeport Channel Light 4 (LLNR-36115) in approximate position 29-18-35.916N/094-50-16.117W, showing FL R 2.5s, Focal Height 17FT, Nominal Range 3NM, TR-TY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 5 (LLNR-36120) to Galveston-Freeport Channel Light 5 (LLNR-36120) in approximate position 29-18-27.045N/094-50-47.957W, showing FL G 4s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 6 (LLNR-36125) to Galveston-Freeport Channel Light 6 (LLNR-36125) in approximate position 29-18-29.943N/094-50-48.871W, showing FL R 4s, Focal Height 17FT, Nominal Range 3NM, TR-TY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 9 (LLNR-36150) to Galveston-Freeport Channel Light 9 (LLNR-36150) in approximate position 29-18-26.265N/094-51-21.148W, showing FL G 6s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 10 (LLNR-36155) to Galveston-Freeport Channel Light 10 (LLNR-36155) in approximate position 29-18-29.350N/094-51-20.570W, showing FL R 6s, Focal Height 17FT, Nominal Range 3NM, TR-TY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 14 (LLNR-36265) to Galveston-Freeport Channel Light 14 (LLNR-36265) in approximate position 29-18-31.309N/094-52.00.477W, showing FL R 4s, Focal Height 17FT, Nominal Range 3NM, TG-TY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 15 (LLNR-36270) to Galveston-Freeport Channel Light 15 (LLNR-36270) in approximate position 29-18-29.190N/094-52-13.485W, showing FL Q, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.
 Change Galveston-Freeport Channel Buoy 17 (LLNR-36275) to Galveston-Freeport Channel Light 17 (LLNR-36275) in approximate position 29-18-28.994N/094-52-22.864W, showing FL G 2.5s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.

Change Galveston-Freeport Channel Buoy 19 (LLNR-36280) to Galveston-Freeport Channel Light 19 (LLNR-36280) in approximate position 29-18-26.561N/094-52-32.489W, showing FL G 4s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.

Change Galveston-Freeport Channel Buoy 21 (LLNR-36285) to Galveston-Freeport Channel Light 21 (LLNR-36285) in approximate position 29-18-22.076N/094-52-39.642W, showing FL G 6s, Focal Height 17FT, Nominal Range 3NM, SG-SY on pile, Ra ref.

Chart 11324

LNM: 08-16-03D

FL – WEST BAY TO SANTA ROSA SOUND – Choctawhatchee Bay

The following change will be made the week of March 21, 2016.

Change Choctawhatchee Bay Entrance DBN 5A (LLNR-4560) to Choctawhatchee Bay Entrance Buoy 5A (LLNR-4560) in approximate position 30-22-14.568N/086-30-55.952W, showing a Green can.

Chart 11385

LNM: 08-16-04D

TX – MATAGORDA BAY – Matagorda Ship Channel

The following change will be made the week of March 21, 2016.

Establish Matagorda Ship Channel Light 21 (LLNR-27212) in approximate position 28-27-12.960N/096-21-52.441W, FL G 4s, Focal Height 17FT, Nominal Range 3NM, SG on pile, Ra ref.

Establish Matagorda Ship Channel Light 22 (LLNR-27213) in approximate position 28-27-16.800N/096-21-48.000W, FL R 4s, Focal Height 17FT, Nominal Range 3NM, TR on pile, Ra ref.

Chart 11317

LNM: 08-16-05D

FL – APALACHICOLA BAY TO LAKE WIMICO – ST. George Island

The following changes will be made the week of March 28, 2016.

Change St. George Island Daybeacon 3 (LLNR-2840) to St. George Island Lighted Buoy 3 (LLNR-2840) in approximate position 29-37-17.483N/084-57-49.263W, FL G 2.5s, Nominal Range 3NM, showing a Green can.

Change St. George Island Daybeacon 4 (LLNR-2845) to St. George Island Lighted Buoy 4 (LLNR-2845) in approximate position 29-37-18.775N/084-57-45.672W, FL R 2.5s, Nominal Range 3NM, showing a Red nun.

Establish St. George Island Lighted Buoy 5 (LLNR-2842) in approximate position 29-37-23.090N/084-57-51.730W, FL G 4s, Nominal Range 3NM, showing a Green can.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

FL - GULF OF MEXICO - PANAMA CITY - U.S. Navy Testing

Commencing on approximately March 20, 2016 and continuing until approximately March 28, 2016, the U.S. Navy will conduct inert underwater mine test operations. A survey will be conducted of a 1 mile square area, inert mine shapes will be deployed, surveyed and recovered. The center point of test field is in approximate position 29-44-57N 085-38-25W. Mariners are requested to remain clear a minimum 2 nautical mile radius of test area while operations are being conducted. U.S. Navy test support vessels will monitor VHF-FM Channel 16. Mariners may contact the U.S. Coast Guard Sector Mobile at (251) 441-5976, for additional information.

LNM: 08-16

FL - GULF OF MEXICO - PANAMA CITY - ST. ANDREW BAY - U.S. Navy Testing

The U.S. Navy will be conducting manned dry submersible test operations in St. Andrew's Bay and the Gulf of Mexico through December 31, 2016. The manned dry submersible will operate on the surface, submerged, under tow on the surface and include dive operations. All U.S. Navy support vessels will monitor VHF-FM Channel 16. Mariners are requested to maintain 1 nautical mile distance from all U.S. Navy test operations. For further information mariners may contact the U.S. Coast Guard at (251) 441-5976.

Charts: 11360 11389 11392

LNM: 01-16

FL - GULF OF MEXICO - Scientific Instrument Deployment

Continuing until approximately April 15, 2016, the University of Florida will deploy scientific instruments on the sea floor of the Gulf of Mexico, between Destin Inlet and Cape San Blas, Florida. The instruments are approximately 2.5 feet in height from the sea floor and will be placed in water depths greater than 15 feet. For additional information, mariners may contact the U.S. Coast Guard via VHF-FM Channel 16 or the COTP Mobile at (251) 441-5976.

FL - FIVE MILE (CINCO) BAYOU - Bridge Rehabilitation - UPDATE

The SR 85 Bridge across Five Mile Bayou (Cinco) Bayou, mile 0.7, near Fort Walton in Okaloosa County, Florida, bridge rehabilitation work continues, Monday through Saturday, from 7:00 a.m. until 5:00 p.m. The work consists of replacing steel bridge bearings and spall repairs to concrete beams, with a small amount of cathodic protection work on a couple of concrete piles. The navigation channel is located between Bent 9 and Bent 11 as indicated by the navigation lights for the safe passage of motor vessels. The work has started on the south side moving in a northerly direction, with the bridge having a total of 17 bents. Three barges will be placed on each side of the bents (totaling six) with a seventh barge on the end on the east side of the bent. Each bent will take approximately 10 days. The work continues on Bents 7, 11 and 12. The barges will be properly lit according to "Inland Navigational Rule of 1980." Mariners should avoid the area, travel through the navigation spans and urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16. The project's estimated completion date of March 2016.

FL - CHOCTAWHATCHEE BAY - New Northbound Bridge Construction - Public Notification - UPDATE

This is an update on the construction of the new fixed span northbound bridge crossing the Choctawhatchee Bay (GIWW, Mile 250.3, EHL), U.S. 331, State Road 83, near City of Freeport, Walton County, Florida. For reference purposes, Pier 17 is immediately north of the main channel span and Pier 16 is immediately south of the main channel span. All construction is east of the existing Clyde B. Wells Bridge and the Choctawhatchee Bay Relief Bridge immediately adjacent to the existing bridge. The permanent navigational lighting still needs to be installed on both sides of the new extended fendering systems. Mariners are requested to use slowest safe speed while transiting the construction site of the bridge. The

FL - CHOCTAWHATCHEE BAY - New Northbound Bridge Construction - Public Notification - UPDATE

girders have all been placed and the barges may obstruct the channel to erect formwork and support the deck construction activities. While intermittent blockage occurs in the channel, the contractor can move from the channel with a 2-hour notice by calling the listed numbers. The M/V CAPTAIN BILL and M/V ALBERT PIKE will be monitoring VHF-FM Channel 16. An emergency contact number is (757) 284-0778. This bridge construction continues until approximately August 2016.

FL - GARNIERS BAYOU - Bridge Rehabilitation

The SR 85 Bridge across Garniers Bayou, mile 1.0, near Fort Walton in Okaloosa County, Florida is presently rehabilitating the bridge, working Monday through Saturday, from 7:00 a.m. until 5:00 p.m. The work consists of replacing steel bridge bearings and spall repairs to concrete beams, with a small amount of cathodic protection work on a couple of concrete piles. The navigation channel is located between Bent 13 and 14, as indicated by the navigation lights for the safe passage of motor vessels. Work continues on Bent 12 and should be completed by February 27, 2016. Mariners should avoid the area, travel through the navigation spans and are urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16. The project has an estimated completion date of March 2016.

FL - GRANDE BAYOU - Bridge Demolition and New Bridge Construction - UPDATE

Demolition plan of Phase I has begun on the existing CR 292A (Sunset Ave.) for the replacement bridge crossing Grande Bayou, mile 0.9, in Warrington (near Pensacola), Escambia County, Florida. Spans 1 and 2 have been removed. Substructure rebar work has are started on Bent #1, #2 and #3. The template for Bent #4 continues. A barge 80 feet by 80 feet has been placed to assist in the demolition of the old bridge, moving in a westerly direction and at 50% complete. There will be two lattice boom crawler crane barges used for the project, measuring (1) 60 feet by 60 feet and (2) 80 feet by 70 feet. Onsite Tug Boat "MISS AMORY" and Tug Boat #9027 will be secured using hydraulically operated spuds with the proper lighting prescribed by the "Inland Navigational Rules of 1980". The tugs will be monitoring VHF-FM Channel 16, during working hours. The project manager can be reached at (334)-319-7006. Mariners should use the marked navigation channel under Span #12, for transit at their slowest safe speed. This channel has a horizontal measurement of 34.5 feet and a vertical clearance of 7.4 feet. Phase I will continue until March 2016.

Chart 11383

LA - GULF OF MEXICO - Drilling Operations - UPDATE

Continuing until further notice, the M/V STENA FORTH will be conducting drilling operations at Tubular Bell, in the Mississippi Canyon Area, Block 725, in approximate position 28-14-36.0N 088-55-36.0W. Work will be conducted 24-hours a day, 7-days a week. The M/V STENA FORTH will be monitoring VHF-FM Channels 6 or 16. Mariners are urged to keep a wide berth and maintain a minimum CPA of 2 nautical miles.

Charts: 1115A 11360

LNM: 08-16

LA - GULF OF MEXICO - Naval Testing

Commencing approximately March 17, 2016 and continuing until March 27, 2016, the Naval Research Laboratory plans to deploy a total of 3 moorings (2 bottom mounted sub-surface moorings and 1 sub-surface line mooring) on the Mississippi shelf. The current planned locations of the moorings are in approximate positions:

29-16-58.87N 88-37-44.40W (in approximate water depth: 64 meters)

29-16-54.73N 88-30-25.20W (in approximate water depth: 69 meters)

29-02-44.16N 88-33-55.80W (in approximate water depth: 365 meters)

Moorings positions will be updated once the moorings are established. Moorings (1) and (2) will be BOPPERS (Bio-Optical Physical Pop-Up Environmental Reconnaissance System). These moorings will measure current velocities as well as bio-optical properties of the water column. The weighted trawl-resistant dome housing for these moorings rests at the seafloor; it is 2.2 meters in diameter and only 0.7 meters tall when not profiling. Naval Research Laboratory will be planning on profiling once every 3 hours (or 8 profiles per day) for the duration of the deployment. When not profiling, there is no surface or water-column expression; all instrumentation is winched back and stowed in the low-profile, trawl-resistant base. The profiler will be sent to the surface once per profile for satellite communications and the only surface expression is during the short (less than 5 minute) data transmission period. Mooring (3), which is offshore of (1) and (2) will be a line mooring that will consist of a sub-surface float 10 meters from the surface and will be weighed down by 2-3 railroad wheels at the sea-floor. Naval Research Laboratory are planning on deploying instruments along the length of this mooring with 3 ECO Pucks at 12, 28 and 50 meters below the surface, and these sensors will measure bio-optical properties. In addition, the Naval Research Laboratory will be attaching 10 SeaBird microcats at 10 meter intervals on the line mooring between 12 and 150 meters depth. These sensors will measure temperature, salinity and water pressure. This is not a profiling mooring and so the line will be continuously present in the water column, extending from the bottom to 10 meters below the surface. There will be no surface expression of this mooring at any time. Mariners transiting the area are urged to use caution.

LNM: 05-16

LA - GULF OF MEXICO - Dredge Operation

Continuing until approximately December 15, 2016, Great Lakes Dredge & Dock Company will be conducting dredging operations and the placement of marsh fill and beach fill on the barrier island of Chenier Ronquille in the Gulf of Mexico for the Chenier Ronquille Barrier Island Restoration Project (BA-76). Sand and marsh fill will be dredged from a distance of one to four nautical miles offshore in designated borrow areas and will be hydraulically placed with a hydraulic dredge via pipeline. The Project is comprised of offshore borrow areas and the existing barrier island of Chenier Ronquille, in approximate positions:

29-20-00.30N 089-48-14.87W

29-19-55.93N 089-46-43.13W

29-16-49.46N 089-47-02.89W

29-17-03.85N 089-52-09.44W and

29-18-52.82N 089-50-44.58W

Small craft and survey vessels will be performing sporadic work in the Project Location beginning the second week of February 2016 and continuing through project completion. Mobilization of land-based equipment for primary dike construction will take place in April 2016 and will involve tug boats, followed by primary dike construction within the bounds of the Chenier Ronquille barrier island. Mobilization of dredge equipment and pipelines will begin in May of 2016 and will continue up to

the start of dredging and will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge fill activities will begin in the Summer of 2016 and will take approximately four to five months to complete; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge equipment demobilization will occur after dredging has finished and is expected to take two months; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. For up-to-date information, mariners can contact Mr. Michael Greenwood, at (630) 928-4315 or MGreenwood@gldd.com.

LA - NEW ORLEANS - INNER HARBOR NAVIGATION CANAL - Temporary Deviation - Bridge Closure

The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation in 33 CFR 117.458(c), governing the operation of the Senator Ted Hickey bascule span bridge on Leon C. Simon Boulevard across the Inner Harbor Navigation Canal, Mile 4.6, at New Orleans, Orleans Parish, Louisiana. This deviation allows the Louisiana Department of Transportation and Development to close the bridge to navigation from 7:00 a.m. until 2:00 p.m. continuously on Sunday, April 3, 2016. The deviation will allow the draw of the bridge to remain in the closed-to-navigation position, 7:00 a.m. through 2:00 p.m., for the Endurance Festival event.

The vertical clearance of the bridge in the closed-to-navigation position is 46 feet above MHW. Vessels requiring less than 46 feet of clearance may transit beneath the bridge during operations but are urged to exercise caution when doing so. The draw will not be able to open for emergencies during this event. There is an alternate route available via the Rigolets Pass to vessel traffic. Mariners may wish to consider using alternate routes during this closure.

Charts: 11367 11368 11369

LNM: 07-16

LA - CHEF MENTEUR PASS - Drawbridge Operating Regulation - Temporary Deviation - Bridge Closure

The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation in 33 CFR 117.458(c) and 33 CFR 117.436, governing the operation of the Seabrook Highway/ Sen. Ted Hickey Bridge across Inner Harbor Navigation Canal, mile 4.6, in New Orleans, Orleans Parish, Louisiana, and the bridge at Chef Pass over Lake Catherine at Mile 2.8 respectively. These deviations allow the Louisiana Department of Transportation and Development to close the bridges to navigation on April 17, 2016, from 7:00 a.m. through 1:00 p.m. for the Chef Menteur Bridge and from 8:00 a.m. through 5:00 p.m. for the Ted Hickey Bridge. These closures are to facilitate the Ochsner Ironman 70.3 New Orleans Race event.

The vertical clearance of the bridge in the closed-to-navigation position is 46 feet above MHW. Vessels requiring less than 46 feet of clearance may transit beneath the bridge during operations but are urged to exercise caution when doing so. The vertical clearance of the US 90 swing-span bridge at Chef Menteur Pass over Lake Catherine is 11 feet above mean high water. The draw will not be able to open for emergencies. There is an alternate route available via the Rigolets Pass to vessel traffic. Mariners may wish to consider using alternate routes during this closure.

Chart 11370

LNM: 05-16

LA - MISSISSIPPI RIVER - Mile 95.7, AHOP - NEW ORLEANS HARBOR - Sandblasting/Painting

Until further notice, the new US 90 (Crescent City Connection/GNO) eastbound Bridge across the Mississippi River, Mile 95.7, AHOP, in Orleans and Jefferson Parishes, Louisiana will undergo sandblasting and painting to the underside of the bridge. Presently, work has begun and the containment system for the portions of the bridge outside of the navigation span on the right descending bank has been placed below the bridge. On or about February 22, 2016, the contractor will begin sandblasting within the main channel span, beginning from the right descending bank pier and moving towards the left descending bank pier. The contractor has divided the work into five (5) 300-foot sections within the navigable span and for the purposes of the project will be described as sections A, B, C, D, and E. During the project, the containment system throughout the project will reduce the vertical clearance by one foot at all times and by up to three feet in the lettered section that the contractor will be working within. The contractor will begin in Section A and will work for approximately two weeks before moving into Section B. While working within a section, the containment system may further reduce the published vertical clearance by a total of three feet. If a mariner needs the containment system raised to only the one foot reduction, they may do so with four hours notice by contacting the Vessel Traffic Service at (504) 365-2514.

The work schedule provided indicates that each section should take approximately two weeks to complete and the entire section within the main channel span should be completed by early May, weather permitting. The schedule will be updated as necessary. The published vertical clearance of the bridge is 150 feet above mean high water, elevation 20 feet (or 170 feet minus the Carrolton Gauge). The most accurate and up to date vertical clearance information for the bridge can be found on the NOAA website at: <https://tidesandcurrents.noaa.gov/ports/ports.html?id=8761847&mode=airgap>.

YOU ARE REMINDED that this number has NOT BEEN adjusted to reflect the vertical clearance reduction caused by the containment system.

The information provided will be updated as new information becomes available. Mariners are advised to use extreme caution when traversing the project area. Mariners with questions should contact the Eighth Coast Guard Bridge Administration Branch at (504) 671-2128. Additional information may be provided as necessary by the contractor, Mr. Yianni Koullios, (330) 272-1806 with INTEC (contractor POC), or the New Orleans VTS (Algiers Point traffic control) (504) 365-2514.

LA - Houma Navigation Canal - SR 661 Bridge - Additional Work

The Louisiana Department of Transportation and Development (LDOTD) will be performing work on the SR 661 swing bridge across the Houma Navigation Canal, Mile 36.0, at Houma, Terrebonne Parish, LA. The bridge will be operating on a normal schedule, except from the hours of 6:00 a.m. until 6:00 p.m., from February 22, 2016 through February 28, 2016. There may be up to four hours of delay due to installations of permanent vertical angle stiffeners and mods on the pivot girder, with proper notice, the bridge can be opened for marine traffic. At night, the bridge will be in the open to marine traffic position. During construction, the contractor will make every effort to pass marine traffic when possible.

As soon as construction is complete, the bridge will be required to return to normal operations. Mariners are urged to use extreme caution and proceed at the slowest safe speed when traversing the area.

MARINE SAFETY INFORMATION BULLETIN

MSIB 006-16

Date: Feb 10, 2016

Atchafalaya River Navigation Restrictions **Captain of the Port Zone Morgan City, LA**

The Coast Guard's primary mission is safety of life. If you see persons or mariners in distress on the waterways contact Sector New Orleans Command Center at 504-365-2544.

At 9:00 AM today the Atchafalaya River stage at Morgan City was 5.5 feet and the current was 1.9 knots. The minor flooding has receded and the river stage is forecasted to fall through the coming weeks. The Emergency Vessel Movement Controls are hereby cancelled.

The following Temporary Emergency Vessel Movement Controls are now in place:

- Westbound tows turning into the Gulf Intercoastal Waterway at mile 98.5 West Harvey Lock will be limited to a maximum tow length of 600 feet. East bound tows transiting mile marker 99 are exempt from the Temporary Emergency Vessel Movement Controls.
- Southbound tows transiting the Morgan City Triple Bridge Complex will be limited to maximum tow length of 600 feet. Tows requiring "wired in horsepower" shall have at least 75% of the required horsepower —wired in day or night when transiting the bridges.
- Unless otherwise directed, northbound tows transiting thru the Berwick Bay Triple Bridge Spans are exempt from the Temporary Emergency Vessel Movement Controls.

Mariners and facilities are encouraged to take appropriate precautions and frequently check the National Weather Service website <http://www.nws.noaa.gov/> for updated flood information. River Gauge information may be found at the USGS website at <http://waterwatch.usgs.gov/new/index.php?m=real&r=la&w=map> .

For questions or comments, please contact LTJG Vanessa Taylor, Chief, Waterways Management, at 985- 380-5334.
