ABBREVIATIONS

A through H

ADRIFT - Buoy Adrift
AICW - Atlantic Intracoastal Waterway
AI - Alternating
B - Buoy
BKW - Breakwater
bl - Blast
BNM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK/Daymk - Daymark
DBN/Dbn - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - eclipse
EST - Established Aid
ev - every

I through O

I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
ISL - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LNM - Local Notice to Mariners
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal

P through Z

PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RRL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal

EVAL - Evaluation
EXT - Extinguished
F - Fixed
fl - flash
Fl - Flashing
G - Green
GIWW - Gulf Intracoastal Waterway
HAZ - Hazard to Navigation
HBR - Harbor
HOR - Horizontal Clearance
HT - Height

MSLD - Misleading
N/C - Not Charted
NGA - National Geospatial-Intelligence Agency
NO/NUM - Number
NOS - National Ocean Service
NW - Notice Writer
OBSCU - Obscured
OBST - Obstruction
OBSTR - Obstruction
Oc - Occulting
ODAS - Anchored Oceanographic Data Buoy

STA - Station
STRUCT - Structure
St M - Statute Mile
TEMP - Temporary Aid Change
TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition:

AHOP Above Head of Passes
BHOP Below Head of Passes
HSC Houston Ship Channel
MRGO Mississippi River - Gulf Outlet
HWY Highway
IHNC Inner Harbor Navigation Canal
F/V Fishing Vessel
AP Assigned Position

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jttfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: DPW

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-second characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

LNM: DPW/PRIV AIDS

GPS TESTING

Continuing until March 17, 2016, March 21-24, 2016, and again on March 28-31, 2016, from 1300Z until 1900Z, each day, GPS testing will be conducted centered in approximate position 30-34-45.1N 086-40-45.3W, Eglin Air Force Base, Florida. The impact radius is approximately 214 nautical miles. This testing should NOT affect civilian GPS users. During these periods, GPS users are encouraged to report any GPS service outages that they may experience during the testing, via the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website's GPS report a problem worksheet at www.navcen.uscg.gov.

LNM: 11-16

GULF OF MEXICO - Operation Phoenix - Marine Event

Attached as an enclosure to this LNM is information and scheduling concerning a paddle board event starting at Corpus Christi TX, on March 5, 2016 and ending at New York City Harbor, NY., on July 23, 2016. The event will consist of 2 paddleboards approximately 14 feet in length, 1 Sea Doo and 1 safety boat approximately 24 feet in length. The safety boat will monitor VHF-FM Channel 16. For additional information, mariners can contact Tonia Collins at (910) 633-9578.

LNM: 09-16

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only.

It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR					CGD01	
(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			at 40-41-09.001N	074-02-48.001W
		Green can				
Corrective Action		Object of Corrective Action			Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

FL - GULF OF MEXICO - PANAMA CITY - U.S. Navy Testing

Commencing on approximately March 20, 2016 and continuing until approximately March 28, 2016, the U.S. Navy will conduct inert underwater mine test operations. A survey will be conducted of a 1 mile square area, inert mine shapes will be deployed, surveyed and recovered. The center point of test field is in approximate position 29-44-57N 085-38-25W. Mariners are requested to remain clear a minimum 2 nautical mile radius of test area while operations are being conducted. U.S. Navy test support vessels will monitor VHF-FM Channel 16. Mariners may contact the U.S. Coast Guard Sector Mobile at (251) 441-5976, for additional information.

Charts: 1115A 11360

LNM: 08-16

FL - GULF OF MEXICO - U.S. Navy Testing

Continuing until approximately March 28, 2016, the U.S. Navy will be conducting test operations in an area generally located with the center point of test field 12 miles southwest of the Panama City Pass, approximately 5 miles offshore in approximate position 30-08-02.4N 085-57-54.0W. There are 21 marker buoys that surround the hazard area. Additionally it is requested that all vessels remain 3 nautical miles away from this position at all times as U.S. Navy equipment has been deployed in the area and will remain in the area until recovery is possible. Support vessels will monitor VHF-FM Channel 16. For further information, mariners may contact U.S. Coast Guard Sector Mobile at (251) 441-5976.

Charts: 1115A 11360

LNM: 11-16

FL - GULF OF MEXICO - U.S. Air Force Munitions Testing

Continuing until approximately March 17, 2016, from 8:00 a.m. until 12:30 p.m., each day, the U.S. Air Force will be conducting air-to-ground munitions releases approximately 20 miles south of Destin, Florida. The hazard area is bounded by the following approximate positions:

30-18-24N 086-40-06W,
30-18-24N 086-26-06W,
30-12-30N 086-18-30W,
29-57-00N 086-18-30W,
29-52-24N 086-26-06W,
29-52-24N 086-40-06W,
29-57-00N 086-47-42W and
30-12-30N 086-47-42W.

Mariners are required to remain clear of this hazard area during mission periods. Hot range advisories will be broadcast via VHF-FM 16 and via 2182 KHz by the Eglin Joint Test and Training Operations Control Center, call sign "Wolf Call". Points of contact are Eglin Joint Test and Training Operation Control Center (JTTOCC) at (850) 882-5800 or Billy Childress, 96 TW/SEU, at (850) 882-7343.

LNM: 10-16

FL - GULF OF MEXICO - PANAMA CITY - ST. ANDREW BAY - U.S. Navy Testing

The U.S. Navy will be conducting manned dry submersible test operations in St. Andrew's Bay and the Gulf of Mexico through December 31, 2016. The manned dry submersible will operate on the surface, submerged, under tow on the surface and include dive operations. All U.S. Navy support vessels will monitor VHF-FM Channel 16. Mariners are requested to maintain 1 nautical mile distance from all U.S. Navy test operations. For further information mariners may contact the U.S. Coast Guard at (251) 441-5976.

FL - GULF OF MEXICO - Scientific Instrument Deployment

Continuing until approximately April 15, 2016, the University of Florida will deploy scientific instruments on the sea floor of the Gulf of Mexico, between Destin Inlet and Cape San Blas, Florida. The instruments are approximately 2.5 feet in height from the sea floor and will be placed in water depths greater than 15 feet. For additional information, mariners may contact the U.S. Coast Guard via VHF-FM Channel 16 or the COTP Mobile at (251) 441-5976.

FL - ST. ANDREW BAY - Boat Parade

Panama City Marina will be conducting its annual Blessing of the Fleet in St. Andrew Bay. This event is published in 33 Code of Federal Regulations part 100.801 (Table 7, Sector Mobile #6) as a special local regulation and will take place on April 9, 2016, from 11:00 a.m. until 1:00 p.m. The regulated area for this event is St. Andrew Bay, all waters extending 100 yards out from the Panama City Marina seawall. Vessels desiring to transit the regulated area may do so only with prior approval of the Patrol Commander and when so directed by that officer and will be operated at a no wake speed in a manner which will not endanger participants in the event or any other craft. The Patrol Commander can be contacted on VHF-FM Channel 16, call sign "PATCOM". For up-to-date information, mariners can contact the U.S. Coast Guard Sector Mobile at (251) 441-5976.

FL - CHOCTAWHATCHEE BAY - SANTA ROSA SOUND – Surface Craft Formation Operations

The U.S. Air Force will be conducting coordinated surface craft formation operations in either Choctawhatchee Bay, between the Destin Mid-Bay Bridge (State HWY 293) and the State HWY 331 Bridge or between 3-15 miles due south of the Destin Pass. This operation will include a large number of surface craft in formation traveling between the two bridges. The surface craft will be firing multiple distress signal flares as part of the operation. The mission is scheduled for March 14-17, 2016, between the hours of 2:00 p.m. and 5:00 p.m., each day. All mariners are requested to be aware of the noted operation. Hot range advisories will be broadcast via VHF-FM 16 and via 2182 KHz by the Eglin Joint Test and Training Operations Control Center, call sign "Wolf Call". Points of contact are Eglin Joint Test and Training Operation Control Center (JTTOCC) at (850) 882-5800 or Josh Newton, 96TW/SEU, at (850) 882-7325.

FL - FIVE MILE (CINCO) BAYOU - Bridge Rehabilitation

The SR 85 Bridge across Five Mile Bayou (Cinco) Bayou, mile 0.7, near Fort Walton in Okaloosa County, Florida, bridge rehabilitation work continues, Monday through Saturday, from 7:00 a.m. until 5:00 p.m. The work consists of replacing steel bridge bearings and spall repairs to concrete beams, with a small amount of cathodic protection work on a couple of concrete piles. The navigation channel is located between Bent 9 and Bent 11 as indicated by the navigation lights for the safe passage of motor vessels. The work has started on the south side moving in a northerly direction, with the bridge having a total of 17 bents. Three barges will be placed on each side of the bents (totaling six) with a seventh barge on the end on the east side of the bent. Each bent will take approximately 10 days. The work is finishing on Bent 6. The work continues on Bents 7, 11, 14 and 15. Mariners should use caution while traveling the channel at Bent 11 as there will be reduction within the channel. The barges will be properly lit according to "Inland Navigational Rule of 1980." Mariners should avoid the area, travel through the navigation spans and urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16. The project's estimated completion date of March 2016.

FL - CHOCTAWHATCHEE BAY - New Northbound Bridge Construction - Public Notification

This is an update on the construction of the new fixed span northbound bridge crossing the Choctawhatchee Bay (GIWW, Mile 250.3, EHL), U.S. 331, State Road 83, near City of Freeport, Walton County, Florida. For reference purposes, Pier 17 is immediately north of the main channel span and Pier 16 is immediately south of the main channel span. All construction is east of the existing Clyde B. Wells Bridge and the Choctawhatchee Bay Relief Bridge immediately adjacent to the existing bridge. The permanent navigational lighting still needs to be installed on both sides of the new extended fendering systems. Mariners are requested to use slowest safe speed while transiting the construction site of the bridge. The girders have all been placed and the barges may obstruct the channel to erect formwork and support the deck construction activities. There may be times when 75 feet of the channel may be blocked and the intermittent blockage can be removed with a 1-hour notice by calling the listed number. The M/V CAPTAIN BILL and M/V ALBERT PIKE will be monitoring VHF-FM Channel 16. An emergency contact number is (757) 284-0778. This bridge construction continues until approximately August 2016.

FL - GARNIERS BAYOU - Bridge Rehabilitation

The SR 85 Bridge across Garniers Bayou, mile 1.0, near Fort Walton in Okaloosa County, Florida is presently rehabilitating the bridge, working Monday through Saturday, from 7:00 a.m. until 5:00 p.m. The work consists of replacing steel bridge bearings and spall repairs to concrete beams, with a small amount of cathodic protection work on a couple of concrete piles. The navigation channel is located between Bent 13 and 14, as indicated by the navigation lights for the safe passage of motor vessels. Work continues on Bent 12 and should be completed by February 27, 2016. Mariners should avoid the area, travel through the navigation spans and are urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16. The project has an estimated completion date of March 2016.

FL - GRANDE BAYOU - Bridge Demolition and New Bridge Construction

Demolition continues and the replacement of the new bridge construction has begun on the CR 292A (Sunset Ave.) crossing Grande Bayou, mile 0.9, in Warrington (near Pensacola), Escambia County, Florida. Spans 1 and 2 girder erection will occur through March 18, 2016. Work continues on Bents #3 and #4. A barge 80 feet by 80 feet has been placed to assist in the demolition of the old bridge moving in a westerly direction and at 50% complete. The crane barges are being used to set the girders, therefore, there are two lattice boom crawler crane barges used for the project, measuring (1) 60 feet by 60 feet and (2) 80 feet by 70 feet. Onsite Tug Boat "MISS AMORY" and Tug Boat #9027 will be secured using hydraulically operated spuds with the proper lighting prescribed by the "Inland Navigational Rules of 1980". The tugs will be monitoring VHF-FM Channel 16, during working hours. The project manager can be reached at (334)-319-7006. Mariners should use the marked navigation channel under Span #12, for transit at their slowest safe speed. This channel has a horizontal measurement of 34.5 feet and a vertical clearance of 7.4 feet. Phase I will continue until March 2016

MS - RHODES BAYOU - MILE 0.10 - Bridge Removal and Replacement - Construction

Removal and replacement of the Dantzler St. Bridge over Rhodes Bayou, mile 0.10, Moss Point, Jackson County, Mississippi, will commence on November 9, 2015. The construction will proceed until completion on or around April 29, 2016. This removal and replacement will allow for safer roadway use and greater waterway use when completed. During construction, mariners are urged to use extreme caution in transiting the area.

LA - GULF OF MEXICO - Drilling Operations

Continuing until further notice, the M/V STENA FORTH will be conducting drilling operations at Tubular Bell, in the Mississippi Canyon Area, Block 725, in approximate position 28-14-42.4N 088-55-38.3W. Work will be conducted 24-hours a day, 7-days a week. The M/V STENA FORTH will be monitoring VHF-FM Channels 6 or 16. Mariners are urged to keep a wide berth and maintain a minimum CPA of 2 nautical miles.

Charts: 1115A 11360

LNM: 09-16

LA - GULF OF MEXICO - Naval Testing - UPDATE

Commencing approximately March 17, 2016 and continuing until March 27, 2016, the Naval Research Laboratory plans to deploy a total of 2 moorings (1 bottom mounted sub-surface moorings and 1 sub-surface line mooring) on the Mississippi Shelf. The current planned locations of the moorings are in approximate positions:

29-17-33.00N 088-28-36.48W (in approximate water depth: 68 meters)

28-58-46.20N 088-33-26.28W (in approximate water depth: 537 meters)

Moorings (1) will be BOPPERS (Bio-Optical Physical Pop-Up Environmental Reconnaissance System). This mooring will measure current velocities as well as bio-optical properties of the water column. The weighted trawl-resistant dome housing for these moorings rests at the seafloor; it is 2.2 meters in diameter and only 0.7 meters tall when not profiling. Naval Research Laboratory will be planning on profiling once every 3 hours (or 8 profiles per day) for the duration of the deployment. When not profiling, there is no surface or water-column expression; all instrumentation is winched back and stowed in the low-profile, trawl-resistant base. The profiler will be sent to the surface once per profile for satellite communications and the only surface expression is during the short (less than 5 minute) data transmission period. Mooring (2), which is offshore of (1) will be a line mooring that will consist of a sub-surface float 10 meters from the surface and will be weighed down by 2-3 railroad wheels at the sea-floor. Naval Research Laboratory are planning on deploying instruments along the length of this mooring with 3 ECO Pucks at 12, 28 and 50 meters below the surface, and these sensors will measure bio-optical properties. In addition, the Naval Research Laboratory will be attaching 10 SeaBird microcats at 10 meter intervals on the line mooring between 15 and 150 meters depth. These sensors will measure temperature, salinity and water pressure; and 10 VEMCO temperature sensors at 15 meter intervals between 12 and 145 meters in depth. This is not a profiling mooring and so the line will be continuously present in the water column, extending from the bottom to 10 meters below the surface. There will be no surface expression of this mooring at any time. Mariners transiting the area are urged to use caution.

LNM: 11-16

LA - GULF OF MEXICO - Dredge Operation

Continuing until approximately December 15, 2016, Great Lakes Dredge & Dock Company will be conducting dredging operations and the placement of marsh fill and beach fill on the barrier island of Chenier Ronquille in the Gulf of Mexico for the Chenier Ronquille Barrier Island Restoration Project (BA-76). Sand and marsh fill will be dredged from a distance of one to four nautical miles offshore in designated borrow areas and will be hydraulically placed with a hydraulic dredge via pipeline. The Project is comprised of offshore borrow areas and the existing barrier island of Chenier Ronquille, in approximate positions:

29-20-00.30N 089-48-14.87W

29-19-55.93N 089-46-43.13W

29-16-49.46N 089-47-02.89W

29-17-03.85N 089-52-09.44W and

29-18-52.82N 089-50-44.58W

Small craft and survey vessels will be performing sporadic work in the Project Location beginning the second week of February 2016 and continuing through project completion. Mobilization of land-based equipment for primary dike construction will take place in April 2016 and will involve tug boats, followed by primary dike construction within the bounds of the Chenier Ronquille barrier island. Mobilization of dredge equipment and pipelines will begin in May of 2016 and will continue up to

the start of dredging and will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge fill activities will begin in the Summer of 2016 and will take approximately four to five months to complete; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge equipment demobilization will occur after dredging has finished and is expected to take two months; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. For up-to-date information, mariners can contact Mr. Michael Greenwood, at (630) 928-4315 or MGreenwood@gldd.com.

LA - NEW ORLEANS - INNER HARBOR NAVIGATION CANAL - Temporary Deviation - Bridge Closure

The Commander, Eighth Coast Guard District has issued a temporary deviation from the regulation in 33 CFR 117.458(c), governing the operation of the Senator Ted Hickey bascule span bridge on Leon C. Simon Boulevard across the Inner Harbor Navigation Canal, Mile 4.6, at New Orleans, Orleans Parish, Louisiana. This deviation allows the Louisiana Department of Transportation and Development to close the bridge to navigation from 7:00 a.m. until 2:00 p.m. continuously on Sunday, April 3, 2016. The deviation will allow the draw of the bridge to remain in the closed-to-navigation position, 7:00 a.m. through 2:00 p.m., for the Endurance Festival event.

The vertical clearance of the bridge in the closed-to-navigation position is 46 feet above MHW. Vessels requiring less than 46 feet of clearance may transit beneath the bridge during operations but are urged to exercise caution when doing so. The draw will not be able to open for emergencies during this event. There is an alternate route available via the Rigolets Pass to vessel traffic. Mariners may wish to consider using alternate routes during this closure.

Chart 11370

LNM: 05-16

LA - MISSISSIPPI RIVER - Mile 95.7, AHOP - NEW ORLEANS HARBOR - Sandblasting/Painting

LA - MISSISSIPPI RIVER - Mile 95.7, AHOP - NEW ORLEANS HARBOR - Sandblasting/Painting

Until further notice, the new US 90 (Crescent City Connection/GNO) eastbound Bridge across the Mississippi River, Mile 95.7, AHOP, in Orleans and Jefferson Parishes, Louisiana will undergo sandblasting and painting to the underside of the bridge. Presently, work has begun and the containment system for the portions of the bridge outside of the navigation span on the right descending bank has been placed below the bridge. On or about February 22, 2016, the contractor will begin sandblasting within the main channel span, beginning from the right descending bank pier and moving towards the left descending bank pier. The contractor has divided the work into five (5) 300-foot sections within the navigable span and for the purposes of the project will be described as sections A, B, C, D, and E. During the project, the containment system throughout the project will reduce the vertical clearance by one foot at all times and by up to three feet in the lettered section that the contractor will be working within. The contractor will begin in Section A and will work for approximately two weeks before moving into Section B. While working within a section, the containment system may further reduce the published vertical clearance by a total of three feet. If a mariner needs the containment system raised to only the one foot reduction, they may do so with four hours notice by contacting the Vessel Traffic Service at (504) 365-2514.

The work schedule provided indicates that each section should take approximately two weeks to complete and the entire section within the main channel span should be completed by early May, weather permitting. The schedule will be updated as necessary. The published vertical clearance of the bridge is 150 feet above mean high water, elevation 20 feet (or 170 feet minus the Carrollton Gauge). The most accurate and up to date vertical clearance information for the bridge can be found on the NOAA website at:
<https://tidesandcurrents.noaa.gov/ports/ports.html?id=8761847&mode=airgap>.

YOU ARE REMINDED that this number has NOT BEEN adjusted to reflect the vertical clearance reduction caused by the containment system.

The information provided will be updated as new information becomes available. Mariners are advised to use extreme caution when traversing the project area. Mariners with questions should contact the Eighth Coast Guard Bridge Administration Branch at (504) 671-2128. Additional information may be provided as necessary by the contractor, Mr. Yianni Koullios, (330) 272-1806 with INTEC (contractor POC), or the New Orleans VTS (Algiers Point traffic control) (504) 365-2514.

TX - VICTORIA BARGE CANAL - Final Rule regarding Drawbridge Operating Regulations - Remote Operation

The Commander, Eighth Coast Guard District has issued a Final Rule for the regulation in 33 CFR 117 governing the operation of the Union Pacific Railroad vertical lift span bridge across the Victoria Barge Canal, mile 29.4 near Bloomington, Texas. Mariners will notice no change, as the Final Rule is the same as the Interim Rule previously published. This rule was effective as of March 4, 2016. This Final Rule as published in the Federal Register on March 4, 2016, [81 FR 43,] modifies the existing rules and will allow the draw of the bridge to open as follows: The bridge owner has posted signage regarding the operation of the bridge at two miles, at one mile, and at one-half mile from the bridge in each direction. To facilitate the continued smooth operation of the bridge, mariners should exchange opening requests using the following method:

1. When a vessel with AIS equipment onboard approaches the two-mile post, the vessel may continue to transit the waterway but must tune their radiotelephone to VHF-FM Channel 13 and receive passing instructions from the railroad dispatcher. The dispatcher must contact the vessel promptly to provide passing instruction to insure the continued safe transit of the vessel. Vessels without AIS equipment or vessels with AIS who would prefer to call via telephone, may call the railroad dispatcher at (800) 262-4691 to arrange passing instructions.
2. When any vessel approaches the one-mile post, the railroad dispatcher should have either cleared the vessel through the bridge or given an indication that a train is in the block and the vessel will be cleared as soon as practicable. If the vessel has not yet spoken with the railroad dispatcher, the vessel should immediately call the railroad dispatcher via telephone at (800) 262-4691.
3. When any vessel reaches the one-half mile post and has not communicated with the railroad dispatcher nor been cleared to proceed, the vessel should stop and contact either the railroad dispatcher at (800)-262-4691 or the Port of Victoria emergency contact at (361) 570-8855. This rule was effective March 4, 2016.

Continuing until approximately April 30, 2016, the Dredge DILIGENCE will be conducting dredging operations in the Tule Lake Turning Basin, Corpus Christi Ship Channel area. Dredging will be on the north shoreline of the Tule Lake Turning Basin, for the construction of Oil Dock 14. Work will be conducted 24-hours a day, 7-days a week. The Dredge DILIGENCE will monitor VHF-FM Channel 65. For up-to-date information, mariners can contact the Project manager, Mr. David Guillot, at (361) 648-0811. Mariners are urged to transit the area at their slowest safe speed to minimize their wake.

TX - CORPUS CHRISTI HARBOR - TULE LAKE CHANNEL - Terminal Construction

Continuing until approximately November 7, 2016, Orion Construction will conduct pile driving and construction operations in the Port of Corpus Christi. The project site is at the old American Smelting Refining Company, approximately 0.6 miles west of the old lift bridge on the south bank of Tule Lake Channel. The contractors floating plant will consist of the Crane Barges STAR 303 and GEORGE JOHNSON. Work will be conducted 10-hours a day, 5-days a week. The crane and dive crews will install a new ship terminal as well as 4 breasting dolphins and 6 mooring dolphins. The construction crew will monitor VHF-FM Channels 16 or 69. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made.

TX - BROWNSVILLE SHIP CHANNEL - Dismantle and Disposal of Navy Aircraft Carriers

Commencing April 1, 2016 and continuing until March 31, 2017, the International Shipbreaking Limited, LLC. Brownsville will be dismantling and disposing of 2 U.S. Navy aircraft carriers in Brownsville, TX. The west boundary will be in approximate position 25-57-50.80N 097 21- 50.0W and the east boundary will be in approximate position 25-57-57.80N 097-21-27.0W. All commercial vessels, tour vessels, and pleasure/fishing craft

TX - BROWNSVILLE SHIP CHANNEL - Dismantle and Disposal of Navy Aircraft Carriers

are required to remain within the channel while passing the International Shipbreaking facilities. There will be overhead industrial work in progress which can pose a hazard to vessels in the vicinity of the facility. For additional information mariners can contact Arnie Tyler, Facility Security Officer, ISL at (956) 371-6228 , email at Arnie.tyler@internationalshipbreaking.com or Dan Richardson, U.S. Navy On-Site Representative (OSR) at (207) 751-2906, email Daniel.Richardson@supshipba.navy.mil.
