### MISSOURI RIVER - CHANNEL CONDITION/COTP ADVISORY

A no wake zone has been established from Mile 226.0 to Mile 0.0.

The following areas are in the extreme high water action phase IAW the Western Rivers WAP Annex:

Kansas City Reach (Mile 400.0 – Mile 300.0), Brunswick Reach (Mile 300.0 – Mile 200.0) and Jefferson Reach (Mile 200.0 – Mile 100.0):

The following areas are in the high water recovery phase IAW the Western Rivers WAP Annex:

Omaha Reach (Mile 630.0 – Mile 500.0) and St. Joseph Reach (Mile 500.0 – Mile 400.0)

Recreational traffic is strongly discouraged due to debris and swift currents. Towboat operators should use caution and minimize wake where possible and be experienced in high water operations. Towboat operators are prohibited from laying up on levees and favor the center of the channel. Mariners should remain vigilant to an increase in debris in the water and maneuver appropriately. Be aware that a buildup of debris in fleeting areas may have occurred and take appropriate action to prevent any breakaways from occurring. Exercise caution in all passing and meeting situations. Navigational buoys may have been dragged off station, so remain cautious while transiting these areas.

LNM: 22-16

### UPPER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY

The following area is in the high water action phase IAW the Western Rivers WAP Annex:

Zone 28 (Mile 185.4 – Mile 109.9).

Towboat operators should exercise caution and minimize wake where possible and be experienced in high water operations. Down-streaming operations are not recommended unless the vessel is 75 feet or more in length and has a minimum of 1,800 horsepower. Mariners are

requested to identify layup areas and assess bridge clearances prior to transiting the zone. Mariners should remain vigilant to an increase in debris and maneuver appropriately, be aware of the buildup of debris in fleeting areas and take appropriate action to prevent any breakaways from occurring. Use caution in all passing and meeting situations. Navigational buoys may have been dragged off station, so remain cautious while transiting.

LNM: 22-16

**ILLINOIS WATERWAY - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE**

The following zone is in the high water recovery phase in accordance with the Western Rivers Waterways Action Plan:  
Illinois Waterway:

Zones 4 (Mile 101.9 – Mile 80.3). Mariners should exercise caution and minimize their wake, avoid laying up on saturated levees and pay particular attention between Miles 138.0 and 136.0. Avoid down-streaming operations and be experienced in high water operations. Mariners should remain vigilant to an increase in debris and maneuver appropriately, be aware of the buildup of debris in fleeting areas and take appropriate action to prevent any breakaways from occurring. Mariners are to use caution in all meeting and overtaking situations. Navigation buoys may have been dragged off station, so remain cautious while transiting the area.
