**SECTION I - SPECIAL NOTICES**

This section contains information of special concern to the Mariner.

---

**DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY**

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, [http://www.fbi.gov/about-us/investigate/terrorism/terrorism\\_jtjtf](http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtjtf), or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the [www.AmericasWaterwayWatch.org](http://www.AmericasWaterwayWatch.org), the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: DPW

**NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS**

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

LNM: DPW/PRIV AIDS

**SPECIAL NOTICE - HURRICANE SEASON**

The hurricane season is considered to extend from June 1, 2016 through November 30, 2016. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.
- (f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM weather channels for National Weather Service Broadcasts.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved, due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation system marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in Iala Region B and follow the traditional 3R rule of red, right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation is generally considered as moving

westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest Coast Guard unit.

During the hurricane season, drawbridges along the coast may deviate from normal operating procedures. Some bridges may be unable to open because of high winds. Others may be authorized extended closed periods to facilitate evacuation of land traffic. Mariners should anticipate bridge closures by listening to the National Weather Service and Coast Guard Broadcasts on hurricane conditions. Because of the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

Locks and Navigation Structures are operated to pass navigation until such time, that water levels and wind conditions warrant operations unsafe. The structures are then closed in accordance with hurricane preparation procedures. Mariners will be given as much notice as possible when structures are to be closed. However, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

LNM: 21-16

#### **SPECIAL NOTICE - HURRICANE SEASON**

Mariners are advised that the Hurricane Season extends from June 1, 2016 to November 30, 2016.

Locks and Navigation Structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe.

The structures are then closed in accordance with Hurricane procedures. Be advised that this includes the Harvey Canal Floodgate, located in the Harvey Canal immediately south of the Lapalco Bridge at mile marker 2.8 of the Gulf Intracoastal Waterway (GIWW) West of Harvey Lock (WHL).

Mariners will be given as much notice as possible when structures are to be closed. However, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

General information for the New Orleans District can be found at:  
<http://www.mvn.usace.army.mil>

Mariners using the following structures should consult the respective agency listed below for updates:

- \* GIWW Sector Gate (on the Inner Harbor Navigation Canal Surge Barrier) - Orleans Levee District
- \* Bayou Bienvenue Floodgate - Orleans Levee District
- \* Bayou Bienvenue Lift Gate - Orleans Levee District
- \* Seabrook Sector Gate - Orleans Levee District
- \* Bayou Dupre Floodgate - Lake Borgne Levee District
- \* GIWW West Closure Complex (WCC) - West Jefferson Levee District
- \* Bayou Segnette Barge Gate - West Jefferson Levee District
- \* Bayou Verret Floodgate (also known as the Sellers Canal Floodgate) - St. Charles Parish
- \* Hero Canal Stoplog Gate - Plaquemines Parish
- \* Empire Lock - Plaquemines Parish
- \* Ostrica Lock - Plaquemines Parish
- \* Empire Floodgate - Plaquemines Parish
- \* Larose Floodgate - Lafourche Parish
- \* Leon Theriot Floodgate (Golden Meadow) - Lafourche Parish.

**SECTION II - DISCREPANCIES**

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

**DISCREPANCIES (FEDERAL AIDS)**

### SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

#### TEMPORARY CHANGES

## SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only.

It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR					CGD01	
(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			at 40-41-09.001N	074-02-48.001W
		Green can				
	Corrective Action	Object of Corrective Action			Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

#### Advance Notice(s)

##### **TX – STOVER POINT TO BROWNSVILLE – Port Isabel Small Boat Harbor**

The following changes will be made the week of June 20, 2016.  
 Change Port Isabel Small Boat Channel DBN 5 (LLNR-42820) to Port Isabel Small Boat Channel Buoy 5 (LLNR-42820) in approximate position 26-05-08.165N/097-12-43.782W, showing a Green can  
 Change Port Isabel Small Boat Channel LT 10 (LLNR-42830) to Port Isabel Small Boat Channel LB 10 (LLNR - 42830) in approximate position 26-04-58.947N/097-13-06.546W, Q R, Nominal Range 3NM, showing a Red nun.  
 Change Port Isabel Small Boat Channel DBN 14 (LLNR-42840) to Port Isabel Small Boat Channel Buoy 14 (LLNR-42840) in approximate position 26-04-51.376N/097-13-11.318W, showing a Red nun.  
 Chart 11302

LNM: 08-16-11D

##### **TX – CORPUS CHRISTI BAY – La Quinta Channel**

The following change will be made the week of June 20, 2016.  
 Discontinue La Quinta Channel Light 22 (LLNR - 29101.01) in approximate position 27-52-44.421N/097-16-08.867W.  
 Charts: 11309 11314

LNM: 08-16-15D

##### **TX – UPPER GALVESTON BAY – Trinity River Channel**

The following changes will be made the week of June 20, 2016.  
 Discontinue Trinity River Channel Buoy 4 (LLNR-24145.01) in approximate position 29-32-18.540N/094-48-09.449W.  
 Discontinue Trinity River Channel Buoy 5 (LLNR-24150.01) in approximate position 29-32-37.027N/094-47-46.894W.  
 Chart 11326

LNM: 08-16-16D

##### **TX - MATAGORDA BAY – Matagorda Ship Channel**

The following change will be made the week of June 20, 2016.  
 Relocate Matagorda Ship Channel B RF LT (LLNR-27170) to approximate position 28-25-39.7977N/096-19-36.0944W.  
 Charts: 11300 11317 11319

LNM: 08-16-22D

##### **LA – MISSISSIPPI SOUND APPROACHES DAUPHIN ISLAND TO CAT ISLAND – Breton/Chandeleur ICW Alternate Route Temporary Channel**

The following changes will be made the week of June 13, 2016.  
 Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 1 (LLNR-9572.25) in approximate position 30-10-10.090N/088-59-24.151W, Q G, Nominal Range 3NM, showing a Green can with yellow square.  
 Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 2 (LLNR-9572.24) in approximate position 30-10-10.192N/088-59-26.426W, Q R, Nominal Range 3NM, showing a Red nun with yellow triangle.  
 Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 3 (LLNR-9572.23) in approximate position 30-09-10.770N/088-59-27.662W.  
 Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 4 (LLNR-9572.22) in approximate position 30-09-10.872N/088-59-29.937W, FL R 2.5s, Nominal Range 3NM, showing a Red nun with yellow triangle.  
 Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 5 (LLNR-9572.21) in approximate position 30-08-11.362N/088-59-31.177W, FL G 4s,

Nominal Range 3NM, showing a Green can with yellow square.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 6 (LLNR-9572.20) in approximate position 30-08-11.464N/088-59-33.452W.  
Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 7 (LLNR-9572.19) in approximate position 30-07-12.141N/088-59-34.680W, FL G 2.5s, Nominal Range 3NM, showing a Green can with yellow square.  
Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 8 (LLNR-9572.18) in approximate position 30-07-12.243N/088-59-36.954W, FL R 2.5s, Nominal Range 3NM, showing a Red nun with yellow triangle.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 9 (LLNR-9572.17) in approximate position 30-06-12.899N/088-59-38.183W.  
Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 10 (LLNR-9572.16) in approximate position 30-06-13.001N/088-59-40.457W, FL R 4s, Nominal Range 3NM, showing a Red nun with yellow triangle.  
Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 11 (LLNR-9572.15) in approximate position 30-05-13.501N/088-59-41.694W, FL G 6s, Nominal Range 3NM, showing a Green can with yellow square.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 12 (LLNR-9572.14) in approximate position 30-05-13.603N/088-59-43.967W.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 13 (LLNR-9572.13) in approximate position 30-04-14.191N/088-59-45.198W.  
Establish Breton/Chandeleur ICW Alternate Route Lighted Buoy 14 (LLNR-9572.12) in approximate position 30-04-14.293N/088-59-47.472W, FL R 6s, Nominal Range 3NM, showing a Red nun with yellow triangle.  
Establish Breton/Chandeleur ICW Alternate Route Light 15 (LLNR-9572.11) in approximate position 30-03-14.871N/088-59-48.702W, showing FL G 2.5s, Focal Height 17FT, Nominal Range 4NM, SG-SY on pile, Ra ref.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 16 (LLNR-9572.10) in approximate position 30-03-14.973N/088-59-50.975W.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 17 (LLNR-9572.09) in approximate position 30-02-15.579N/088-59-52.204W.  
Establish Breton/Chandeleur ICW Alternate Route Buoy 18 (LLNR-9572.08) in approximate position 30-02-15.680N/088-59-54.476W, showing a Red nun with yellow triangle.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 19 (LLNR-9572.07) in approximate position 30-01-16.241N/088-59-55.707W.  
Establish Breton/Chandeleur ICW Alternate Route Light 20 (LLNR-9572.06) in approximate position 30-01-16.343N/088-59-57.979W, showing FL R 2.5s, Focal Height 17FT, Nominal Range 4NM, TR-TY on pile, Ra ref.  
Establish Breton/Chandeleur ICW Alternate Route Buoy 21 (LLNR-9572.05) in approximate position 30-00-16.921N/088-59-59.207W, showing a Green can with yellow square.  
Establish Breton/Chandeleur ICW Alternate Route Virtual Aid 22 (LLNR-9572.04) in approximate position 30-00-17.023N/089-00-01.479W.

**SECTION VI - PROPOSED CHANGES**

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

### FL - GULF OF MEXICO - U.S. Navy Testing

Continuing until approximately December 31, 2016, the U.S. Navy will be conducting inert Airborne Mine Neutralization System (AMNS) underwater mine destructor testing in the Gulf of Mexico. The inert AMNS mine destructors are silver and orange, 3 feet long, 6 inches in diameter, weighs approximately 2 pounds in water and 35 pounds in air. Inert mine surrogate bottom and tethered shapes, along with inert AMNS mine destructors will be deployed, operated and tested in the below test area during this period. It is requested that all vessels maintain 1 nautical mile from closest point of approach (CPA) of all vessels while operations are in progress. All U.S. Navy/U.S. Navy contracted AMNS support vessels will be monitoring VHF-FM Channel 16. The corners of the test areas are bound by the following approximate positions:

AMNS TANGO Circle 100-foot Shallow Target Field:

29-56-25.2N 085-54-36W,  
29-58-55.2N 085-54-36W,  
29-58-55.2N 085-51-42.6W and  
29-56-25.2N 085-51-42.6W.

HARP 8, 325-foot Target Field:

29-45-25.2N 086-21-49.8W,  
29-47-01.2N 086-21-49.8W,  
29-47-01.2N 086-19-52.8W and  
29-45-25.2N 085-19-52.8W.

**FL - FIVE MILE (CINCO) BAYOU - Bridge Rehabilitation - UPDATE**

The SR 85 Bridge across Five Mile Bayou (Cinco) Bayou, mile 0.7, near Fort Walton in Okaloosa County, Florida, bridge rehabilitation work continues, Monday through Saturday, from 7:00 a.m. until 5:00 p.m. The work consists of replacing steel bridge bearings and spall repairs to concrete beams, with a small amount of cathodic protection work on a couple of concrete piles. The navigation channel is located between Bent 9 and Bent 11 as indicated by the navigation lights for the safe passage of motor vessels. The bridge has a total of 17 bents. Three barges will be placed on each side of the bents (totaling six) with a seventh barge on the end on the east side of the bent. Each bent will take approximately 10 days. Mariners should use caution while traveling the channel at Bent 9 for the next two weeks as there will be a reduction within the channel and work has been extended to be completed by June 30, 2016. The work has begun on Bent 8 and will continue until mid June 2016. The barges will be properly lit according to "Inland Navigational Rule of 1980." Mariners should avoid the area, travel through the navigation spans and urged to proceed at slowest safe speed with extreme caution. Anyone needing assistance should call these contact numbers (850) 377-2219 or (850) 408-1242. Superior Construction will be monitoring VHF-FM Channel 16.

**FL - GIWW - WEST BAY - Bridge Rehabilitation**

A below deck container platform will be extending between Piers 15, 16, 17, and 18 approximately four feet reduction to perform rehabilitation work which includes removing and recoating of the existing steel girders (Spans 10, 11, and 12). The work will begin on May 26, 2016 on the southbound SR 79 West Bay Bridge, crossing the GIWW, Mile 271.80, EHL, in Bay County, Florida. The work will be done outside of the fender system, between Pier 15 and 16 (Span 10); and Pier 17 and 18, (Span 12) will have a reduction of 4 feet. There will be a reduction of

**FL - GIWW - WEST BAY - Bridge Rehabilitation**

approximately two feet in the main channel while work is being done on Span 10 and 12. When work begins on June 30, 2016, the main channel located between Pier 16 and 17 (Span 11) has a vertical clearance is 65.4 feet above Mean High Water, elevation 1.38, NAVD29. The project will take approximately three months to complete. Contractors will work 7 days a week from 7:00 a.m. until 7:00 p.m., by Southern Road & Transportation. In an emergency, mariners can contact (727) 224-3545 or (504) 460-0360. Mariners are requested to exercise caution when transiting the area.

**FL - CHOCTAWHATCHEE BAY - New Northbound Bridge Construction - Public Notification**

This is an update on the construction of the new fixed span northbound bridge crossing the Choctawhatchee Bay (GIWW, Mile 250.3, EHL), U.S. 331, State Road 83, near City of Freeport, Walton County, Florida. For reference purposes, Pier 17 is immediately north of the main channel span and Pier 16 is immediately south of the main channel span. All construction is east of the existing Clyde B. Wells Bridge and the Choctawhatchee Bay Relief Bridge immediately adjacent to the existing bridge. The permanent navigational lighting still needs to be installed on both sides of the new extended fendering systems. Mariners are requested to use slowest safe speed while transiting the construction site of the bridge. The girders have all been placed and the barges may obstruct the channel to erect formwork and support the deck construction activities. There may be times when 75 feet of the channel may be blocked and the intermittent blockage can be removed with a 1-hour notice by calling the listed number. The M/V CAPTAIN BILL and M/V ALBERT PIKE will be monitoring VHF-FM Channel 16. An emergency contact number is (757) 284-0778. This bridge construction continues until approximately August 2016.

**FL - GIWW - THE NARROWS - Bridge Painting Operations**

Continuing until further notice a contractor will be cleaning and painting the SR 292 fixed bridge across the Gulf Intracoastal Waterway, Mile 171.9, EHL, near Gulf Beach, Escambia County, Florida, and the work will continue through November 2016. A containment system/platform will be placed across the entire bridge. However, across the areas outside of the navigable span, the vertical clearance of the bridge will be reduced by 5 feet. Across the navigable span of the bridge, vertical clearance will be reduced by 4 feet, allowing for 69 feet of vertical clearance. However, the contractor will raise the containment system over half of the navigable span to a height that reduces vertical clearance by 2 feet, allowing for 71 feet of vertical clearance, when not working on that half of the navigable span. At no time will there be a 4-foot reduction across the entire center of navigable span (over the fender system).

When the work is completed in one half of the navigable span, the side that has the 4-foot reduction will be raised to a 2-foot reduction in clearance until all work is completed and the platform is removed. Navigation lighting will be maintained throughout the work. Mariners should be alert for VERTICAL CLEARANCE REDUCTIONS FOR THE ENTIRE DURATION OF THIS PROJECT and pass with extreme caution at slowest safe speed to minimize wake. If mariners need the containment system raised to a height that allows for more vertical clearance than described above, they may do so with six hours notice by contacting the Nick Parianos at (850) 445-3870, or in the alternative, Theo Skoutelis at (727) 946-1761.

**FL - GRANDE BAYOU - Bridge Demolition and New Bridge Construction - UPDATE**

Demolition continues and the replacement of the new bridge construction has begun on the CR 292A (Sunset Ave.) crossing Grande Bayou, mile 0.9, in Warrington (near Pensacola), Escambia County, Florida. Completed remaining demo work and working on Bent #6. Beginning overhang on Spans 1 and 2. A barge 80 feet by 80 feet has been placed to assist in the demolition of the old bridge moving in a westerly direction and at 50% complete. The crane barges are being used to set the girders, therefore, there are two lattice boom crawler crane barges used for the project, measuring (1) 60 feet by 60 feet and (2) 80 feet by 70 feet. Onsite Tug Boat "MISS AMORY" and Tug Boat #9027 will be secured using hydraulically operated spuds with the proper lighting prescribed by the "Inland Navigational Rules of 1980". The tugs will be monitoring VHF-FM Channel 16, during working hours. The project manager can be reached at (334) 319-7006. Mariners should use the marked temporary navigation channel between Pier #2 and #3, for transit at their slowest safe speed. This channel has a horizontal measurement of 34.5 feet and a vertical clearance of 7.4 feet. Construction of new bridge continues through the end of July 2016.

**LA - GULF OF MEXICO - Dredge Operation**

Continuing until approximately December 15, 2016, Great Lakes Dredge & Dock Company will be conducting dredging operations and the placement of marsh fill and beach fill on the barrier island of Chenier Ronquille in the Gulf of Mexico for the Chenier Ronquille Barrier Island Restoration Project (BA-76). Sand and marsh fill will be dredged from a distance of one to four nautical miles offshore in designated borrow areas and will be hydraulically placed with a hydraulic dredge via pipeline. The Project is comprised of offshore borrow areas and the existing barrier island of Chenier Ronquille, in approximate positions:

29-20-00.30N 089-48-14.87W

29-19-55.93N 089-46-43.13W

29-16-49.46N 089-47-02.89W

29-17-03.85N 089-52-09.44W and

29-18-52.82N 089-50-44.58W

Small craft and survey vessels will be performing sporadic work in the Project Location beginning the second week of February 2016 and continuing through project completion. Mobilization of land-based equipment for primary dike construction will take place in April 2016 and will involve tug boats, followed by primary dike construction within the bounds of the Chenier Ronquille barrier island. Mobilization of dredge equipment and pipelines will begin in May of 2016 and will continue up to

the start of dredging and will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge fill activities will begin in the Summer of 2016 and will take approximately four to five months to complete; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. Dredge equipment demobilization will occur after dredging has finished and is expected to take two months; equipment will include tug boats, derrick barges, survey vessels, and various dredge support equipment. For up-to-date information, mariners can contact Mr. Michael Greenwood, at (630) 928-4315 or MGreenwood@gldd.com.

**LA - GIWW - NEW ORLEANS - INNER HARBOR NAVIGATION CANAL LOCK - Lock Information**

Due to the limited mooring space between the Florida Avenue Bridge and the Inner Harbor Navigation Canal Lock, it is required that all tows contact the Lock on VHF-FM Channel 14 for locking information prior to navigating through the Florida Avenue Bridge. Towboat Captains are reminded that if a tow has to be broken for locking operations, this shall be done prior to coming through the Florida Avenue Bridge and the barges shall not be left unattended in the canal for any reason. Towboat Captains must use the mooring buoys and tend the wheelhouse at all times. To prevent bank erosion, Tow Captains are also reminded not to push the head of their tow into the banks on the river or canal end of the lock for any reason while waiting for their locking. The lock master Mr. Richard McKinzie, can be reached at (504) 945-2157, for additional information. The point of contact with the New Orleans District USACE is Mr. Victor Landry at (504) 862-2407.

**LA - MISSISSIPPI RIVER - Mile 95.7, AHOP - NEW ORLEANS HARBOR - Sandblasting/Painting**

Until further notice, the new US 90 (Crescent City Connection/GNO) eastbound Bridge across the Mississippi River, Mile 95.7, AHOP, in Orleans and Jefferson Parishes, Louisiana will undergo sandblasting and painting to the underside of the bridge. Presently, work has begun and the containment system for the portions of the bridge outside of the navigation span on the right descending bank has been placed below the bridge. On or about February 22, 2016, the contractor will begin sandblasting within the main channel span, beginning from the right descending bank pier and moving towards the left descending bank pier. The contractor has divided the work into five (5) 300-foot sections within the navigable span and for the purposes of the project will be described as sections A, B, C, D, and E. During the project, the containment system throughout the project will reduce the vertical clearance by one foot at all times and by up to three feet in the lettered section that the contractor will be working within. The contractor will begin in Section A and will work for approximately two weeks before moving into Section B. While working within a section, the containment system may further reduce the published vertical clearance by a total of three feet. If a mariner needs the containment system raised to only the one foot reduction, they may do so with four hours notice by contacting the Vessel Traffic Service at (504) 365-2514.

The work schedule provided indicates that each section should take approximately two weeks to complete and the entire section within the main channel span should be completed by early May, weather permitting. The schedule will be updated as necessary. The published vertical clearance of the bridge is 150 feet above mean high water, elevation 20 feet (or 170 feet minus the Carrollton Gauge). The most accurate and up to date vertical clearance information for the bridge can be found on the NOAA website at: <https://tidesandcurrents.noaa.gov/ports/ports.html?id=8761847&mode=airgap>.

YOU ARE REMINDED that this number has NOT BEEN adjusted to reflect the vertical clearance reduction caused by the containment system.

The information provided will be updated as new information becomes available. Mariners are advised to use extreme caution when traversing the project area. Mariners with questions should contact the Eighth Coast Guard Bridge Administration Branch at (504) 671-2128. Additional information may be provided as necessary by the contractor, Mr. Yianni Koullios, (330) 272-1806 with INTEC (contractor POC), or the New Orleans VTS (Algiers Point traffic control) (504) 365-2514.

LNM: 50-15

**LA - BASTIAN BAY SHELL ISLAND - Dredge Operation**

Continuing until approximately January 2017, the Great Lakes Dredge & Dock Company, LLC will be conducting dredging operations. Seven pieces of submerged pipeline of about 5,600 feet in length have been laid from the West side of Bastian Bay toward the East side of Shell Island. The pipe is laid across a relatively shallow water sand bar on the west side of Bastian bay with depths ranging from 3 feet to 14 feet, where the deeper water is on the eastern side. All tending tugs and equipment have been demobilized from the site. The submerged pipe will remain in place indefinitely for the project duration. The submerged pipeline is clearly marked with "Danger Submerged pipeline" buoys will be lit in accordance with U.S. Coast Guard regulations.

Submerged pipeline planned start position: 29-17-40.61N 089-39-55.55W. Submerged pipeline planned end position: 29-17-38.71N 089-38-52.39W. The project engineer: is Eugene Corey and can be contacted at (630) 418-8276, ECorey@gldd.com . The site manager: is Keith Pearse and can be contacted at (904) 616-7290, KPearse@gldd.com .

**LA - GIWW - MORGAN CITY-PORT ALLEN ALTERNATE ROUTE - Channel Condition**

The U.S. Coast Guard has received several complaints in the past from local property owners in the Bayou Sorrel area on the GIWW from Mile 37.0 to Mile 45.0, WHL, Morgan City to Port Allen Alternate Route. Property owners are reporting land erosion and bulkhead damage caused by wakes and propeller wash from passing tows. Property owners may seek legal action against vessel owners for causing wake related damage. Mariners are urged to transit at their slowest safe speed to minimize wake. Mariners can contact the USACE New Orleans District Vic Landry, at (504) 862-2407.

Charts: 11352 11354

LNM: 23-16

**LA - PORT ALLEN LOCK - Channel Condition**

Mariners are advised that vessels entering Port Allen Lock from the Mississippi River have at times experienced a hazardous eddy current when making the approach into the lock forebay. Navigation interests should take notice that this eddy current is still present at times and may have changed significantly so that it affects vessels further out into the river. Mariners should therefore be on alert, and ready to take action sooner and/or in a different manner to avoid collisions with the floating guidewall that is located in the lock forebay. Port Allen Lockmaster, Adam McFarlain, can be reached at (225) 343-3752 for up-to-date information. The point of contact with the New Orleans District is Victor Landry, at (504) 862-2407.

**LA - GIWW - MORGAN CITY TO PORT ALLEN - Temporary Emergency Vessel Movement Controls - UPDATE**

The COTP Morgan City anticipates the Atchafalaya River Gauge may reach 5.0 feet on or about June 7, 2016. The COTP Morgan City directs the following temporary emergency vessel movement controls for Berwick Bay when the Morgan City River Gauge reads 5.0 feet or higher. South bound tows transiting the Morgan City bridges and west bound tows turning into the GIWW at Mile 98.5, WHL, will be limited to a maximum length of 600 feet. Towing vessels equipped with a properly operating bow steering unit and north bound tows through Morgan City bridges are exempt from temporary emergency vessel traffic movement controls. Additional deviations may be granted by Vessel Traffic Service Berwick on a case by case basis to any single towing vessel with 3,000 or more horsepower and tows with all empty barges. All tows remain subject to the Vessel Traffic Service Berwick Bay high water towing limitations. Mariners can contact U.S. Coast Guard MSU Morgan City at (985) 380-5374, for additional information.

29-21-28.2N 094-46-41.9W and

29-21-32.4N 094-46-40.2W.

The Dredge TEXAS CUTTER will monitor VHF-FM Channels 13, 23 and 72. Mariners are urged to transit the area at their slowest safe speed to minimize their wake after passing arrangements have been made.

Chart 11331

LNM: 22-16

**TX - HOUSTON SHIP CHANNEL/BARBOURS CUT - Marsh Creation and Dredge Operation**

Continuing until approximately July 15, 2016, Weeks Marine will place submerged pipeline from approximately Houston Ship Channel Light 93 (LLNR-24755), going west in Barboours Cut to Enterprise Dock 8. Continuing until approximately July 5, 2016, the Dredge E.W. ELLEFSEN, Bucket Dredge "WEEKS 6401" and attendant plant will remove material from the turning basin and the Houston Ship Channel. This work will be bound by the following coordinates:

29-41-34.33N 094-59-07.30W

29-41-01.72N 094-58-40.00W

29-40-45.20N 095-00-32.53W and

29-41-10.04N 095-00-38.28W

Submerged pipeline will be placed from the Houston ship Channel, in the vicinity of Houston Ship Channel Light 121 (LLNR-25445), northward to the Upland Staging Area on the west bank of the Houston Ship Channel. This work will be bound by the following coordinates:

29-44-22.86N 095-03-21.62W

29-44-23.21N 095-03-56.12W

29-45-08.02N 095-04-08.20W and

29-45-08.38N 095-03-47.37W

Once underway, operations will continue 24-hours a day, 7-days a week. The Weeks Marine will be monitoring VHF-FM Channels 13 or 16.

Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

**TX - BUFFALO BAYOU - Joint Public Notice - U.S. Coast Guard Bridge Permit**

All interested parties are notified that an application from Texas Department of Transportation, has been received by the Commander Eighth Coast Guard District for a U.S. Coast Guard Bridge Permit for approval to replace a fixed span bridge with a new fixed span bridge that meets

**TX - BUFFALO BAYOU - Joint Public Notice - U.S. Coast Guard Bridge Permit**

current design standards and safety on the Elysian Street Bridge and Viaduct across Buffalo Bayou at mile 4.9, from Commerce Street to Brooks Street, in Houston, Harris County, Texas. Public Notice (02-16) dated May 18, 2016, pertaining to this proposed bridge permit action, contains a detailed description of the proposed bridge project and includes location maps and bridge drawings with navigational clearances. Interested parties may view the public notice at the following web site: [http://www.navcen.uscg.gov/pdf/bridges/publicNotices/D08gPN02-16\\_Elysian%20Street%20Bridge%20and%20Viaduct\\_Buffalo%20Bayou.pdf](http://www.navcen.uscg.gov/pdf/bridges/publicNotices/D08gPN02-16_Elysian%20Street%20Bridge%20and%20Viaduct_Buffalo%20Bayou.pdf). The public notice may also be obtained by calling the Eighth Coast Guard District Bridge Administration Branch, at (504) 671-2128, by writing to Commander (dpb), Eighth Coast Guard District, 500 Poydras Street, Room 1313, New Orleans, LA 70130, by email request at D8dpball@uscg.mil or by facsimile request at (504) 671-2133. Comments from mariners or other interested parties regarding this proposed bridge project will be received for the record at the address given in the public notice through June 21, 2016.

LNM: 20-16

**TX - SAN JACINTO RIVER MILE 2.5 - Bridge Maintenance**

The I-10 Bridge across the San Jacinto River, mile 2.5, near Channelview, Harris County, Texas has reported bridge fender damage RDB, reducing the horizontal clearance. Due to high water, the repair of the navigational lighting and fender will not be completed until approximately June 30, 2016. Mariners are urged to use extreme caution while transiting through the fender system, as there are some protruding parts located near the center of the two spans on the west side, reducing the horizontal clearance. After repairs, the horizontal clearance will return to the published 165 feet.

Chart 11329

LNM: 23-16

**TX - GIWW - COLORADO RIVER LOCKS - Lock Closure**

Continuing until June 30, 2016, J&S Contractors will be working at the Colorado River Locks repairing the guidewalls on the east and west locks. This work may require closures during designated periods of work, Monday through Friday, from 7:00 a.m. until 5:00 p.m. Gate closures are not expected to be in effect during weekends and federal holidays. For up-to-date information, mariners are urged to contact the lockmaster at (979) 863-7842, to confirm the closure time so as to minimize their delay. The lockmaster will be knowledgeable of the exact closure time's 24-hours in advance of closure. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution when transiting the area.

Chart 11319

LNM: 19-16

**TX - ARROYO COLORADO - Rio Hondo Bridge Rehabilitation**

The FM 106 Vertical Lift Bridge across the Arroyo-Colorado River, mile 22.2, at Rio Hondo Bridge, will begin rehabilitation this month until November of 2018. The proposed work includes maintenance and rehabilitation to the mechanical/structural components of the bridge, the removing of paint and repainting, and construction of a retaining wall to stabilize the embankment around a backup generator pad. Updates will be provided concerning channel as provided. Project contactor is PCL Civil Constructors Inc., at (772) 201-3754. Mariners should exercise extreme caution when transiting the area.

Chart 11303

LNM: 19-16

**TX - LAVACA BAY - Bridge Rehabilitation**

Work has begun on rehabilitating the SH 35 bridge across Lavaca Bay, mile 8.2, at Port Lavaca, Calhoun County, Texas. Work will start during daylight hours from 7:00 a.m. to 8:00 p.m., on the west end of the bridge moving in an easterly direction as there are 194 spans. The work consists of repairing spalled concrete columns, replacing web walls and damaged caps, and repainting of the bridge. Flex floats measuring approximately 40 feet x 8 feet in multiple configurations could obstruct an entire area between bents; but most commonly two units joined laterally may be combined in a work area with spuds placed near the piers. Barges will be properly lighted as required by the "Inland Navigation Rules of 1980" and accompanied by a 26-foot push boat, the BARBARA ANN monitoring VHF-FM Channel 16, or onsite Project Manager, at (281) 831-7864. The main channel is located between Bents 116 and 117 with a horizontal clearance of 75 feet and a vertical clearance of 45 feet. Updates will be provided when main channel work is started. Estimated completion date of August 2017.

Chart 11317

LNM: 19-16

**TX - COPANO BAY - New Bridge Replacement and Demolition of Old Bridge**

Scheduled demolition continues from 6:00 a.m. until 6:00 p.m., in an easterly direction. Span #70 and #71, located at the navigation channel on the SH 35 Bridge crossing Copano Bay, mile 0.0, located near Rockport, Aransas County, Texas. Installation of the new fender system to begin immediately, pending weather conditions. This will require being in the channel occasionally but not consecutively. Barges will be traveling from the removal site on a daily basis carrying removed spans, caps, columns, and tie beams. Removal of caps, columns and tie beams continue in a northerly direction. Divers will be present to retrieve any falling debris. Substructure concrete is beginning at Bent #40 and moving north toward Bent #86. Presently, driving 54 inch cylinder piles at Bent #40 thru #86 moving towards the channel. Lead Tug will be monitoring VHF-FM Channel 69 or (631) 557-1359. Project contact is William Brothers Construction Inc., at (228) 243-0493 or (409) 739-9590. New construction has started on the northbound bridge extending until 2018. Mariners should exercise extreme caution when transiting the area.

Charts: 11313 11314

LNM: 18-16

**TX - CORPUS CHRISTI HARBOR - TULE LAKE CHANNEL - Terminal Construction**

Continuing until approximately November 7, 2016, Orion Construction will conduct pile driving and construction operations in the Port of Corpus Christi. The project site is at the old American Smelting Refining Company, approximately 0.6 miles west of the old lift bridge on the south bank of Tule Lake Channel. The contractors floating plant will consist of the Crane Barges STAR 303 and GEORGE JOHNSON. Work will be conducted 10-hours a day, 5-days a week. The crane and dive crews will install a new ship terminal as well as 4 breasting dolphins and 6 mooring dolphins. The construction crew will monitor VHF-FM Channels 16 or 69. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made.

Chart 11311

LNM: 41-15

**TX - CORPUS CHRISTI BAY TO PORT ISABEL - Regatta**

The Surfin Safari Regatta will be held in Corpus Christi Bay, TX, on June 11, 2016 and again on June 12, 2016 from 10:00 a.m. until 5:00 p.m., each day. The regatta will consist of approximately 15 sailboats, 24 feet in length. Also, 1 powerboat will be on scene for safety purposes. The safety boats will monitor VHF-FM Channel 16. For up-to-date information, mariners can contact Todd Hunter, at (361) 944-8930. Mariners are urged to exercise caution in the area during the event period.

Chart 11309

LNM: 23-16

**TX - LOWER LAGUNA MADRE - Unlit Anchored Platform**

A 20-foot by 50-foot platform has been reported anchored with one anchor and unlit in Laguna Madre in approximate position 26-07-48.05N 097-11-09.17W. Mariners are advised position may change due to swing radius. Mariners are urged to transit the area with extreme caution.

Chart 11302

LNM: 20-16

**TX - SOUTH PADRE ISLAND - Fireworks Display**

The Fireworks Over the Bay will be held near South Padre Island, Texas, continuing through September 5, 2016, from 9:15 p.m. until 9:45 p.m. Specific dates will be announced by Broadcast Notice to Mariners. The fireworks will be launched from a barge about 1-mile north of the Queen Isabella Causeway Bridge and 1,000 feet west of 2305 Laguna Drive, Louie's Backyard Barbeque. A distance of 1,400 feet will be secured as the fallout zone by the fireworks display company. For up-to-date information, mariners can contact Janet Shears, at (956) 455-5527.

Chart 11300

LNM: 19-16

**TX - SOUTH PADRE ISLAND - 4-Leg Race**

The Great Texas Catamaran Race will take place on June 15-18, 2016, from 10:00 a.m. until 5:00 p.m., (each day). This event is a 4-day, 4 leg race up the Texas coast from South Padre Island, Texas to Galveston, Texas. The regatta will involve approximately 8 catamarans varying in length from 18-22 feet. The race will start on the beach at the Hilton Garden Inn beach on South Padre Island, approximate position 26-08-10.68N 097-10-06.06W. The first leg will finish at Mustang Island State Park, approximate position 27-38-34.08N 097-10-40.02W. The second leg will start from the previous finish and will end at Matagorda Island, approximate position 28-36-18.00N 095-57-24.00W. The third leg will start from the previous day finish and sail to Surfside Beach, approximate position 28-58-41.58N 095-15-06.09W. The final leg will be from Surfside Beach to East Beach on Galveston Island, approximate position 29-19-29.4N 094-44-16.2W. The race participants will monitor VHF-FM Channel 16. Mariners are urged to transit the areas with extreme caution. For additional information mariners can contact Trey Garrison, at (832) 746-5678.

Chart 11300

LNM: 23-16

**TX - BROWNSVILLE SHIP CHANNEL - Dismantle and Disposal of Navy Aircraft Carriers**

Continuing until March 31, 2017, the International Shipbreaking Limited, LLC. Brownsville will be dismantling and disposing of 2 U.S. Navy aircraft carriers in Brownsville, TX. The west boundary will be in approximate position 25-57-50.80N 097 21- 50.0W and the east boundary will be in approximate position 25-57-57.80N 097-21-27.0W. All commercial vessels, tour vessels, and pleasure/fishing craft are required to remain within the channel while passing the International Shipbreaking facilities. There will be overhead industrial work in progress which can pose a hazard to vessels in the vicinity of the facility. For additional information mariners can contact Arnie Tyler, Facility Security Officer, ISL at (956) 371-6228 , email at Arnie.tyler@internationalshipbreaking.com or Dan Richardson, U.S. Navy On-Site Representative (OSR) at (207) 751-2906, email Daniel.Richardson@supshipba.navy.mil.

# MARINE SAFETY INFORMATION BULLETIN

MSIB 009-16

Date: May 9, 2016

## 2016 HURRICANE SEASONAL ALERT

### Hurricane Port Condition Requirements

This MSIB clarifies USCG mandated Hurricane procedures and defines Hurricane Port Conditions for Port Fourchon, Louisiana Offshore Oil Port, Houma, Port of Morgan City, Port of Iberia, Intracoastal City, and all terminals, facilities, and waterways in the Captain of the Port (COTP) Morgan City area of responsibility.

### **General Vessel and Barge Mooring Requirements for Heavy Weather**

To promote safe navigation and protect vital infrastructure the Coast Guard will enforce the following regulations found in 33 CFR 803:

No person may secure a vessel or barge to trees or to other vegetation.

No person may allow a vessel or barge to be moored with unraveled or frayed lines or other defective or worn mooring.

No person may moor barges side to side unless they are secured to each other from fittings as close to each corner of abutting sides as practicable.

No person may moor barges end to end unless they are secured to each other from fittings as close to each corner of abutting ends as practicable.

**Barge Moorings:** Barge-to-barge; barge-to-vessel; barge-to-wharf or pier. The person in charge shall ensure that a barge moored to another barge, a mooring or spar barge, a vessel, a wharf, or a pier, is secured as near as practicable to each abutting corner of the barge being moored by:

(1) Three parts of wire rope of at least 7/8 inch diameter with an eye at each end of the rope passed around the timberhead, caval, or button;

(2) A mooring of natural or synthetic fiber rope that has at least 75 percent of the breaking strength of three parts of 7/8 inch diameter wire rope; or

(3) Fixed rigging that is at least equivalent to three parts of 7/8 inch diameter wire rope.

For further information regarding the severe weather and high water moorings, the U.S. Committee on the Marine Transportation System's recommends the Best Practices for Preventing and Managing Breakaway Vessels found at:

[http://www.cmts.gov/downloads/Best\\_Practices\\_for\\_Preventing\\_and\\_Managing\\_Breakaway\\_Vessels.pdf](http://www.cmts.gov/downloads/Best_Practices_for_Preventing_and_Managing_Breakaway_Vessels.pdf).

In addition to setting port conditions, the COTP will take the following actions commensurate with each Port Condition:

**Port Condition Whiskey** (gale force winds within 72 hours):

Port Status: Open to all commercial traffic.

- Initiate Port Coordination Team conference calls to identify and address concerns over port status, activities and emergency preparations.
- The COTP will issue an MSIB requiring the following information to be submitted to Vessel Traffic Service, Berwick Bay:
  - (a) All self-propelled oceangoing vessels over 500 GT and all oceangoing barges and their supporting tugs remaining in port will complete and submit to the COTP within 24 hours for approval, a REMAINING IN PORT CHECKLIST FOR 500 GT (GRT) VESSELS (Annex A). Each vessel intending to remain in port must request permission from the waterfront facility where mooring and forward that information to the COTP.
- The Coast Guard will have increased harbor patrols and will advise vessel and facility operators of any conditions that require immediate action or correction.
- The Coast Guard will advise vessel operators of anticipated times of floodgate and bridge closures affecting their ability to seek safe refuge and will provide best points of contact information to obtain accurate updates.
- Advise port stakeholders of intentions for setting next condition.

**Port Condition X-Ray** (gale force winds within 48 hours):

Port Status: Open to all commercial traffic.

- The Coast Guard will continue to contact waterfront facilities to determine their intentions and any vessels moored thereto. Individually assess vessels desiring to remain in port, and issue COTP Orders as appropriate.
- Contact deep draft vessels at anchor and determine their intentions.
- Inspect wharf and pier areas with waterfront facility representatives during harbor patrols.
- Spot check mariners and waterways to determine the status of hurricane preparations.
- Advise port stakeholders of intentions for setting next Port Condition.

**Port Condition YANKEE** (Gale force winds expected within 24 hours):

Port Status: Vessel traffic control measures in effect.

- The COTP may close portions of the port in response to forecasted weather and actual damage, impact, or threat in different geographic areas within the port.
- Establish a Safety Zone controlling vessel movements and activities as appropriate, including:
  - (a) Close ports, where necessary, to all commercial vessel traffic except as specifically allowed by the COTP. Port closure will not apply to vessels that are capable of completing the cargo

load/discharge cycle in less than 12 hours. The area affected by this order includes all Navigable Waters of the United States within 12 nautical miles of shoreline.

- Issue COTP Orders, as appropriate, for any vessels or facilities not complying with Port Condition requirements:
  - (a) Each self-propelled vessel over 500 GT without COTP approval to stay in port will be directed out of port.
  - (b) The COTP will approve or direct, as necessary, final mooring arrangements for vessels remaining in port.
- Advise port stakeholders of intentions for setting next Port Condition.
- Establish safety zone preventing red flagged barges from mooring along shore in the Houma central business district.

**Port Condition Zulu** (gale force winds expected within 12 hours):

Port Status: Vessel traffic control measures in effect. The default for ZULU is closure of the port and facility operations.

- The COTP may deviate from this default and keep ports open with restrictions and close only portions of the port in response to forecasted weather, actual damage, impact, or threat in different geographic ports within the COTP Zone.
- Establish a Safety Zone controlling vessel movements and activities as appropriate, including:
  - (a) Close ports, where necessary, to all commercial vessel traffic (including vessel transits within the port). This prohibition will not apply to vessels that have requested and received approval from the COTP to transit the port. The approval of the COTP will only be granted if the transit can be made safely and mooring or anchorage space has been identified; or if the vessel is departing to sea, only if the vessel can reach safe water prior to encountering hurricane conditions.
- Suspend cargo operations involving bulk liquid dangerous cargoes (including bunkering and lightering operations), unless permission is requested to continue operations and approval is granted. Approval will be given on a case-by-case basis. This approval provision does not apply to operations involving Cargoes of Particular Hazard or Certain Dangerous Cargoes, which in every case must be suspended.

**Post-Hurricane Conditions**

As soon as practicable following the passage of the storm, the COTP will:

- Assess whether to close ports and waterways, maintain closure, or open with or without restrictions.
- Assess whether to maintain a Safety Zone restricting vessel movements until the navigation channels can be surveyed and declared safe for passage.
- Coordinate completion of channel surveys as needed.
- Conduct maritime damage and risk assessments with emphasis on channels, bridges, anchorages, piers, and wharves.

- Initiate a post-hurricane Port Coordination Team conference call to assess, outline, and prioritize the recovery effort for the COTP Zone.

All hurricane informational documents will be posted to Homeport under the "Safety and Security" section for Morgan City, and may be accessed via the following link:

<http://homeport.uscg.mil/morgancity>

If you have any questions, please contact Marine Safety Unit Morgan City's Planning staff at (985) 380-5318 or the Waterways Management staff at (985)380-5334.

## Marine Safety Information Bulletin

06-16

May 27, 2016

### **HURRICANE SEASON BEGINS JUNE 1<sup>st</sup>**

All facilities, vessels, service companies, and organizations in the Port Arthur Captain of the Port Zone should have their hurricane plans completed prior to the beginning of hurricane season.

If deep draft vessels expect to remain in port during a hurricane, a Heavy Weather Plan and *Remaining in Port Checklist* must be completed and submitted to MSU Port Arthur at least 72 hours prior to the arrival of gale force winds.

Hurricane Planning Information, including the *Remaining in Port Checklist* for ships and tug/barges, is available at <http://www.uscg.mil/d8/vtportarthur/hurricanes.asp> and [http://homeport.uscg.mil/contingency plans/local contingency plan](http://homeport.uscg.mil/contingency%20plans/local%20contingency%20plan).

From our experience with previous storms, the following recommendations are offered:

- Deep draft vessels should depart the port for sea, when at all possible, well in advance of approaching tropical weather systems.
- Commercial boat and barge tows that normally transit the Intracoastal Waterway should depart the area or move as far inland as possible on our rivers and bayous in order to establish secure moorings.
- Facilities with storage tanks should take preventative action to secure their tanks by any appropriate means, including pressing up, flooding, or cutting holes.
- Commercial fishing vessels that cannot leave port should find shelter as far north on our rivers and bayous as possible to increase their chances of surviving a tropical weather system. When Hurricane RITA, a Category Two storm, made landfall in 2005, not one of the approximately 80 commercial fishing vessels that were moored in the Sabine River south of Texaco Island survived. However, fishing vessels that sought shelter on the upper Neches River during Hurricane IKE in 2008 suffered little or no damage.

In order to ensure continuity of Coast Guard operations during a significant storm, MSU Port Arthur personnel will relocate to a secure area and establish a remote Command Post prior to arrival of the tropical weather system. Communications from the Command Post will be facilitated by all available means, including radios, mobile telephones, email, and Web site postings.

This notice will be posted on the HOMEPORT website at <http://homeport.uscg.mil>. If you have any questions, please contact MSU Port Arthur at (409) 723-6500.

Captain, U.S. Coast Guard  
Captain of the Port

MARINE SAFETY INFORMATION BULLETIN

Volume XV Issue: 068

Time: 0930

Date: JUN 01 2016

**Hurricane Season 2016**

The 2016 Hurricane Season commences June 1<sup>st</sup> and continues through November 30<sup>th</sup>. You are strongly encouraged to review your existing hurricane plan or develop a plan if you do not have one. It is extremely important to decide in advance how to minimize your risk and be prepared to evacuate, if necessary.

The Captain of the Port (COTP) will be setting hurricane port conditions in accordance with the Maritime Hurricane Contingency Port Plan (MHCPP). The MHCPP is available at Coast Guard Homeport at <http://homeport.uscg.mil/nola>. You are encouraged to review this plan. It describes what actions the COTP will take in anticipation of a hurricane or tropical weather conditions. This plan outlines the requirements of each port condition and includes information regarding vessel movements and mooring requirements during anticipated landfall.

Furthermore, the COTP would like to emphasize the importance of properly maintaining and securing your equipment during hurricane season.

Important hurricane-related information will be provided to the maritime community, as needed, through Marine Safety Information Bulletins (MSIB) and Broadcast Notice to Mariners (BNM).

**Hurricane Regulated Navigation Area (RNA) Annual Operation Plans**

The Coast Guard published the newly revised Hurricane Final RNA in April of 2014. In order to comply with the new requirements of the RNA, you are strongly encouraged to thoroughly review the Regulation in 33 CFR 165.838. According to the RNA, all floating vessels are prohibited from entering or remaining in the IHNC, Harvey Canal, and Algiers Canal, while the RNA is enforced; however, the COTP may review Annual Hurricane Operation Plans, including mooring systems certified by Professional Engineers, which ensure compliance with the newly promulgated RNA Final Rule. Plans should be submitted as soon as possible, as this RNA will be enforced in its entirety for the 2016 Hurricane Season. The official Federal Register citation for this rule is 79 FR 21129. The Code of Federal Regulations (CFR) citation for this rule is 33 CFR 165.838.

**Major Operation Plan requirements for vessels that intend on remaining within the RNA:**

- **West Side:** Certification by a professional engineer that mooring arrangements will withstand winds of up to 140 mph, surge water level of 11 ft, current of 4 mph, and wave height of 3 feet in the RNA.
- **East Side:** Certification by a professional engineer that mooring arrangements will withstand winds of up to 140 mph, surge water level of 8 ft, current of 4 mph, and wave height of 2.5 feet in the RNA.
- Description of the maximum number of vessels intended to be moored at a facility's location.
- Detailed plans for any vessels which will be sunken or grounded in place in the event of RNA enforcement.
- Diagram of the facility and fleeting area.
- Vessel name, call sign, official number, and operational status of machinery onboard

MARINE SAFETY INFORMATION BULLETIN

Volume XV Issue: 068

Time: 0930

Date: JUN 01 2016

**Hurricane Season 2016**

- Vessel characteristics.
- 24-hour emergency contacts for qualified individuals.

**In addition to the professional engineer certification, facility owners shall comply with or complete the following:**

- Provide full insurance disclosure to the COTP. Vessels moored to a facility shall provide insurance information to the facility.
- Complete weekly inspections during hurricane season.
- Maintain facility records of inspections.
- Meet on-scene tug boat requirements during an approaching tropical event.

Once again, detailed requirements mentioned above can be found in the actual Final Rule at the Federal Register, or in 33 CFR 165.838.

## MARINE SAFETY INFORMATION BULLETIN

MSIB 010-16

Date: May 14, 2016

### **GREEN CANYON BLOCK 248 OIL SPILL RESPONSE**

The Coast Guard is responding to an estimated 88,000 gallon oil spill originating from a subsea flow line in Green Canyon Block 248, approximately 95 miles south of Timbalier Island, LA. The source of the spill has been secured and recovery efforts are ongoing. NOAA trajectories and aerial observations indicate surface oil is projected to continue to travel in a westerly direction with no shoreline impact expected.

Vessels transiting in the vicinity of the following blocks may potentially encounter visible surface oil:

-Green Canyon Blocks 145 through 150, and south to Green Canyon Blocks 629 through 634. The affected area may include all blocks within this range.

As recovery efforts and natural dispersion continue over the next several days, the likelihood of encountering significant surface oil will diminish. Mariners are urged, however, to maintain a sharp lookout for surface oil and remain clear of recovery vessels.

If you have any questions, please contact the Incident Command Post via the following website:
