UPPER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

The following areas are in the extreme high water recovery phase IAW the Western Rivers WAP Annex:

Zone 3 (Mile 815.1 – Mile 796.1), Zones 17 and 18 (Mile 482.8 – Mile 437.1), Zones 20 through 22 (Mile 364.1 – Mile 301.2); Zone 24 (Mile 301.1 – Mile 273.4) and Zone 28 (Mile 185.4 – Mile 109.9).

In all high water phases, towboat operators should exercise caution and minimize wake where possible and be experienced in high water operations. Mariners should remain vigilant to an increase in debris in the water and maneuver appropriately. Be aware that a buildup of debris in fleeting areas may have occurred and take appropriate action to prevent any breakaways from occurring. Exercise caution in all passing and meeting situations and be mindful of all charted bridge clearances. Navigational buoys may have been dragged off station, so remain cautious while transiting these areas.

In Zone 28 (Mile 185.4 – Mile 109.9), Down-streaming operations are not recommended unless the vessel is 75 feet or more in length and has a minimum of 1,800 horsepower.

LNM: 41-16
