LOCAL NOTICE TO MARINERS

District: 11

Week: 15/16

CORRESPONDENCE TO:
COMMANDER
DISTRICT ELEVEN (DPW)
COAST GUARD ISLAND BUILDING 50-2
ALAMEDA, CA 94501-5100

REFERENCES: COMDTPUB P16502.6, Light List Volume VI, 2016 Edition, U.S. Chart No.1 12th Edition, and Coast Pilot Volume 7 46th Edition. These publications, along with corrections, are available at: <http://www.nauticalcharts.noaa.gov/nsd/cpdownload.htm>.

BROADCAST NOTICE TO MARINERS - Information concerning aids to navigation and waterway management promulgated through BNM HB-0008-16, SF-0066-16, LA-0066-16, and SD-0049-16 have been incorporated in this notice, or will continue if still significant.

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

SUBMITTING INFORMATION FOR PUBLICATION IN THE LOCAL NOTICE TO MARINERS

A complete set of guidelines with examples and contact information can be found at <http://www.uscg.mil/D11/DP/LnmRequest.asp> or call BM1 Alfred Albert at 510-437-2980 or e-mail D11LNM@uscg.mil. Please provide all Local Notice to Mariners submissions 14 days prior to the start of operations.

SUBMITTING REGULATORY AND CONCURRENT PROJECT INFORMATION

Information or requests regarding regulatory items or concurrent projects should be directed to the U.S. Coast Guard Eleventh District Waterways Management Branch at D11waterways@uscg.mil.

LNM: 11/15

BRIDGE INFORMATION-DISCREPANCIES AND CORRECTIONS

For all bridge related issues, including lighting, operation, obstructions, construction, demolition, etc. contact the Eleventh Coast Guard District Bridge Administrator 24 hour cell phone at 510-219-4366. Flotsam may accumulate on and near bridge piers and abutments. Mariners should approach all bridges with caution. A vessel delay at a drawbridge may be reported to the District Bridge Administrator by telephone, or by using the DelayRept0207.pdf included in the Enclosures section of this Local Notice to Mariners.

CALIFORNIA-SEACOAST FISHING FLEET

The commercial salmon fishery from Horse Mountain to Point Arena California will not open April 16 – 30 as scheduled. This area will remain closed to commercial salmon fishing until further notice. For more details visit, <https://www.wildlife.ca.gov/Fishing/Ocean/Regulations/Salmon>.

LNM: 11/16

MARINE SAFETY AND SECURITY BULLETIN

Mariners operating in the vicinity of the entrance to San Diego Bay, specifically adjacent to the Zuniga Jetty, are reminded of the inherent hazards that exist along the semi-submerged break-wall. Follow all navigation charts for safe operating distance around the jetty, associated shoal waters, and rock hazards. Do not navigate across or within any submerged portion of the Coast Guard navigation marked jetty. For additional information see MSSB 005-14 Safety Advisory.pdf in the enclosure section. For more details or comments contact Coast Guard Sector San Diego Waterways Management Division at 619-278-7656 or by email at D11-DG-M-SectorSD-Prevention-WaterwaysManagement2@uscg.mil.

LNM: 49/15

MARINE SAFETY INFORMATION BULLETIN

Some vessel operators are choosing to depart the Traffic Separation Scheme (TSS) established in the Santa Barbara Channel and transit through an area to the south of San Miguel, Santa Rosa, and Santa Cruz Islands (referenced herein as "south of the Channel Islands"). As such, the Los Angeles / Long Beach Harbor Safety Committee has published voluntary western traffic lanes for vessels approaching and

departing the Ports of Los Angeles and Long Beach. Mariners transiting through the western and northern approaches to and from the Ports of Los Angeles and Long Beach (LA/LB) are advised that the established TSS through the Santa Barbara Channel as shown on NOAA and Admiralty charts is the only International Maritime Organization (IMO) approved routing measure in this area. An IMO approved TSS reduces the risk of collision by providing for the separation of arriving and departing traffic and minimizing potentially hazardous crossing situations. Mariners, who have traditionally used this approved TSS, are encouraged to continue to do so. For additional information please see MSIB Voluntary Traffic Lane 11-09.pdf in the Enclosures Section.

LNM: 43/09

MARINE SAFETY INFORMATION BULLETIN

The Harbor Safety Committee of the San Francisco Bay Region adopted a proposal to establish anchorage berthing schemes in general anchorages 7, 8, and 8A. These berthing schemes will provide more efficient use and greater predictability of the available space in these anchorages. All existing regulations governing the use of these anchorages remain in effect. Vessels using these anchorages should strive to let go their anchor in the center of the drop bucket. For more details or comments contact Sean Kelley, Sector San Francisco VTS Director at 415-399-7402. For additional information see MSIB 15-07.pdf in the enclosure section.

LNM: 47/15

SANTA BARBARA CHANNEL TO PORT HUENEME-WATERWAY ANALYSIS MANAGEMENT SYSTEM ANNOUNCEMENT

The U. S. Coast Guard is conducting a Waterways Analysis Management System (WAMS) study of the Santa Barbara Channel to Port Hueneme to include all local Harbors and Marinas. The WAMS Survey will be active until 08 Jun 16 and can be found by using the following link: <https://www.surveymonkey.com/r/SANTABARBTOPTHUE>. This questionnaire seeks to obtain data on the effectiveness of the system of Aids to Navigation in Santa Barbara Harbor, Ventura Harbor, Channel Islands Harbor, Port Hueneme Harbor, as well as other waterway safety concerns. This Coast Guard will use this information to ensure that the aids are serving their intended purpose. The Coast Guard also uses the concerns of waterways users to assist with other or future waterway management decisions. Any interested company or individual wishing to provide recommendations on existing or additional aids to navigation in this area are welcome to participate by submitting a user survey. To receive further information contact Sector LA/LB Waterways Department at 310-521-3860 or D11-DG-SectorLALB-WWM@uscg.mil.

LNM: 10/16

SANTA CRUZ CHANNEL TO SANTA BARBARA CHANNEL-WATERWAY ANALYSIS MANAGEMENT SYSTEM ANNOUNCEMENT

The U. S. Coast Guard is conducting a Waterways Analysis Management System (WAMS) study of the Santa Cruz Channel to Santa Barbara Channel. The WAMS Survey will be active until 08 Jun 16 and can be found by using the following link: <https://www.surveymonkey.com/r/SANTACRUZTOSANTABARB>. This questionnaire seeks to obtain data on the effectiveness of the system of Aids to Navigation in the Santa Cruz and Santa Barbara Channels, as well as other waterway safety concerns. The Coast Guard will use this information to ensure that the aids are serving their intended purpose. The Coast Guard also uses the concerns of waterways users to assist with other or future waterway management decisions. Any interested company or individual wishing to provide recommendations on existing or additional aids to navigation in this area are welcome to participate by submitting a user survey. To receive further information contact Sector LA/LB Waterways Department at 310-521-3860 or D11-DG-SectorLALB-WWM@uscg.mil.

LNM: 10/16

USCG NATION-WIDE AUTOMATIC IDENTIFICATION SYSTEM (NAIS) NETWORK TESTING

On August 10, 2015, the U.S. Coast Guard began AIS Application Specific Message (AIS-ASM) testing. The test transmissions occur between 0001-2359Z, 7 days/week. The test messages can be identified by their Maritime Mobile Service (MMSI) number: 300669139 or 00366613 and by the words "USCG TEST" within the contents of the message. Mariners are requested to contact the USCG Navigation Center at 1-703-313-5900 or TIS-PF-NISWS@uscg.mil with any questions, comments, or to report any safety and/or operational impacts caused by this testing.

Application Specific Messages to be tested include: messages 6, 8, 25, and 26, DAC=367, FI's=22, 29, 33, 35; AIS Safety Related Text (SRM) messages: 8 (DAC=001, FI=0) and 14. The messages will be of various lengths, using repetitions of the text "USCG TEST". For further information on AIS messages, DACs, and FI's visit <http://www.navcen.uscg.gov/?pageName=AIMessages>

LNM: 31/15

USE OF ELECTRONIC CHARTS AND PUBLICATIONS IN LIEU OF PAPER CHARTS, MAPS, AND PUBLICATIONS

The U.S. Coast Guard has issued Navigation and Vessel Inspection Circular (NVIC) No. 01-16 which contains guidance on the use of electronic charts and publications in lieu of paper charts, maps, and publications. This guidance applies to U.S. flagged vessels subject to U.S. domestic chart, map, and publication carriage requirements contained in Titles 33 and 46 of the Code of Federal Regulations. The NVIC can be viewed at <https://www.uscg.mil/hq/cg5/nvic/default.asp> or <https://cgportal2.uscg.mil/library/directives/SitePages/Home.aspx>.

LNM: 06/16

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

DISCREPANCIES (FEDERAL AIDS)

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		

Advance Notice(s)

LA/LB-LED CONVERSION

The U.S. Coast Guard is planning to permanently change Point Vicente Light (LLNR 170) to an LED with a 14nm range. Advanced notice of implementation will be provided once scheduled. Direct any questions to LTJG Leslie Stenkamp at 510-437-3801 or Leslie.A.Stenkamp@uscg.mil.
Charts: 18020 18022 18740 18746 LNM: 34/15

SACRAMENTO RIVER-ATON DISCONTINUANCE

The U.S. Coast Guard is planning to discontinue Sacramento River Deep Water Ship Channel Light 67 (LLNR 7510). Advanced notice of implementation will be provided once scheduled. Direct any questions to LTJG Leslie Stenkamp at 510-437-3801 or Leslie.A.Stenkamp@uscg.mil.
Chart 18662 LNM: 33/14

SAN FRANCISCO BAY-AIS UPGRADE

The U.S. Coast Guard is planning to add a Physical AIS (Automatic Identification System) to the following aids:

Shouthampton Shoal Channel Lighted Buoy 1 (LLNR 5640)
Shouthampton Shoal Channel Lighted Buoy 2 (LLNR 5645)

A Physical AIS will be added onto the existing physical aid to navigation. Vessels with AIS capable systems will be able to see the symbology and other information on their displays. For more information about AIS, Mariners can go to the U.S. Coast Guard Navigation Center website page <http://www.navcen.uscg.gov/?pageName=AISmain>.

Charts: 18649 18652 18653 LNM: 40/15

SAN FRANCISCO BAY-CARQUINEZ STRAIGHT-ATON DISCONTINUANCE

The U.S. Coast Guard is planning to discontinue Carquinez Light 22 (LLNR 6235). Advanced notice of implementation will be provided once scheduled. Direct any questions to LTJG Leslie Stenkamp at 510-437-3801 or Leslie.A.Stenkamp@uscg.mil.

Charts: 18652 18656 18657 LNM: 09/15

SAN JOAQUIN RIVER-AID ESTABLISHMENT

The U.S. Coast Guard is planning to permanently establish a lighted buoy on the east side of San Joaquin River across from San Joaquin River Light 56 (LLNR 6890). This aid will be established at approximate position: 38-04-07.54N 121-33-31.76W. Direct any questions to LTJG Leslie Stenkamp at 510-437-3801 or Leslie.A.Stenkamp@uscg.mil.

Charts: 18660 18661 LNM: 16/15

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT

<u>Proposed Project(s)</u>	<u>Closing</u>	<u>Docket No.</u>	<u>Ref. LNM</u>
None			

Proposed Change Notice(s)
None

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

ALAMITOS BAY-MARINE CONSTRUCTION

Manson Construction Co. will conduct the rehabilitation of Alamitos Bay Marina Basin 3 from 0730-1700 Mon-Fri from 18 Apr 16 through 20 May 16. Pile driving operations with the DB NORSEMAN will take place through 19 Apr 16. A high visibility turbidity curtain surrounding the construction boundary will be in place along with derrick barge anchors which will be marked with 4ft diameter white crown cans that are lighted at night with continuous white lights. All participating vessels and equipment will monitor VHF-FM Chan. 13, 16, and 67. Mariners are requested to transit the area with caution after making passing arrangements, and minimize wake in the vicinity of the construction site. For more details or comments contact Project Manager Eric Faria at 562-762-5396.

Chart 18751

LNM: 15/16

ANAHEIM BAY-BRIDGE

Trinidad Lane Bridge-The west side center green light and the northwest and southeast red pier lights are extinguished. Estimated time of repair is unknown.

Charts: 18746 18749

LNM: 10/16

CALIFORNIA COAST-WHALES

NOAA is asking for the public's help in tracking whales. If you see whales, record the date and location, number of whales, species (if known) and a description of the animals. Please email the information to whales@noaa.gov.

Please report collisions with whales, any observed injured whales, or dead whales to NOAA at 877-SOS-WHALE (877-767-9425) or to the U.S. Coast Guard on VHF-FM Chan. 16.

Whales are federally protected under the Endangered Species Act (16 U.S.C. 1538 et seq.), the Marine Mammal Protection Act (16 U.S.C. 1361 et seq.), and the National Marine Sanctuaries Act (16 U.S.C. 1431 et seq.).

Charts: 18007 18022

LNM: 49/14

CATALINA ISLAND-MARINE CONSTRUCTION

Associated Pacific Constructors, Inc. will be conducting marine construction in Avalon Harbor, Catalina Island until 01 May 16 at the north end of Avalon Harbor at 33-21-00N 118-19-00W. Multiple barges, steel floats, and pennant buoys (all unlit) will be located in the vicinity of the old fuel dock. Mariners are advised to transit the area with caution. Work will be conducted Mon - Fri during daylight hours only. Derrick barge JC FREESE NO.3, tug BALANA, and tug TUFFY II will be at the work site and monitoring VHF-FM Chan. 10 and 16. For more details or comments contact Mike Marchitto at 805-234-2841 or Cameron Simms at 805-258-4410.

Chart 18757

LNM: 03/16

DANA POINT-UNDERWATER TESTING

The Boeing Autonomous Underwater Vessel (AUV) ECHO RANGER will be conducting an underwater navigation testing off of Dana Point until 22 Apr 16. Operations will be conducted in the vicinity of the following coordinates:

33-26-13N 117-41-53W

33-25-34N 117-43-55W

33-19-56N 117-38-31W

33-21-05N 117-36-43W

Sport Fisher AHI NUI will be on site monitoring VHF-FM Chan 16. Mariners are requested to transit the area with caution and maintain a minimum CPA of .5NM. For more details or comments contact Ross Peterson at 714-262-1580.

Chart 18774

LNM: 14/16

DELTA & RIVERS-DISCOVERY BAY-WERNER DREDGER CUT-BRIDGE

ORWOOD RD BRIDGE REPLACEMENT- A temporary orange boom has been placed on the south side of the existing bridge to the north side of the EBMUD pipeline bridge. The piers of the pipeline bridge and the piers of the existing Orwood Rd Bridge will be lighted at night with fixed red lights (see Orwood_Lighting_Diagram.pdf in enclosure section). A 17ft wide navigation channel has been established on the eastern portion of the project site for the transit of vessels. For more details or comments contact the Coast Guard Project Manager at 510-437-3515.

Chart 18661

LNM: 25/15

DELTA & RIVERS-SACRAMENTO RIVER-BRIDGE

TOWER DRAWBRIDGE- The drawspan will be secured in the closed-to-navigation position from 0900-1100 on 30 Apr 16 to allow community participation in the March of Dimes Walk. In the event of an emergency, the drawspan can be operated normally. The bridge provides 30ft vertical clearance above Mean High Water when closed. Vessels that can transit the bridge while in the closed position may continue to do so at any time. For more details or comments contact the Coast Guard Project Manager at 510-437-3461.

Chart 18662

LNM: 15/16

DELTA & RIVERS-SACRAMENTO-FISH TRAPPING OPERATIONS

Pacific States Marine Fisheries Commission employees will be deploying fish traps from the west levee of the Sacramento River along South River Road into the Sacramento River until 31 May 16. Seven traps will be deployed between the upstream confluence of the Deep Water Channel and the Sacramento River, West Sacramento, CA, and the Freeport Bridge, Freeport, CA. Traps are fished within 45ft of the water/levee interface and so are not in the main navigation area of the river channel. The trap sites will be marked with two can buoys labeled danger and marked with reflective tape within 100ft of the trap location. The traps will be marked with a pair of crab trap buoys anchored to the trap itself to help mariners identify and avoid the specific trap location. CDFW Research vessels 22ft North River skiff and a 23ft Sea Ark skiff will be monitoring VHF-FM Chan. 16. Mariners are requested to transit the area with caution. For further comments or details contact Brian Poxon at 916-372-1600 or Jonathan Nelson at 916-445-4506 or 916-708-2333.

Chart 18661

DELTA & RIVERS-SACRAMENTO-FISH TRAPPING OPERATIONS

LNM: 44/15

DELTA & RIVERS-SAN JOAQUIN RIVER-THREE MILE SLOUGH-BRIDGE(UPDATE:TIME EXTENSION)

STATE ROUTE 160 DRAWBRIDGE- The drawspan is secured in the closed-to-navigation position until 30 Apr 16, due to a painting project. A containment system installed on the underside of the drawbridge reduces vertical clearance by 4ft and is lighted with red lights (Three Mile Bridge Containment.pdf). A line of white buoys is placed on both sides of the bridge indicating 5mph when approaching the bridge. A drawbridge operator is at the bridge site to communicate with mariners. For more details or comments contact the Coast Guard Project Manager at 510-437-3461.

Chart 18661

LNM: 44/15

HUMBOLDT BAY-HOOKTON CHANNEL-SUNKEN VESSEL

A sunken 96.6ft sailing vessel has sunk in the vicinity of Hookton channel at 40-43-54N 124-13-09W. The vessel's mast is out of the water at low tide and is marked by a quick flashing green light. Mariners are requested to transit the area with caution.

Chart 18622

LNM: 09/16

HUMBOLDT BAY-SHOALING

Due to shoaling at the South Jetty Tip of Humboldt Bay Bar, swells in excess of 8ft may have an adverse affect in the main shipping channel. Mariners are requested to transit the area with caution and contact U. S. Coast Guard Sector Humboldt Bay on VHF-FM Chan. 16 for assistance. For more details or comments contact U.S. Coast Guard Sector Humboldt Bay at 707-839-6113.

Chart 18622

LNM: 08/16

LONG BEACH-ANAHEIM BAY-DREDGING

Curtin Maritime Corp will conduct dredging operations in Anaheim Bay within Huntington Harbour and Seal Beach until 01 Jun 16. Dredging will take place Mon-Sat 12 hours per day. Dredged material will be transported to one of three disposal locations; LA-2 off shore disposal, Sunset Beach Near Shore, or pumped upland onto the Seal Beach National Wildlife Refuge (SBNWR). Material pumped upland onto the SBNWR will utilize a suction dredge with pipe floating outside of the navigational channel to the east side at approximately 33-43-43N 118-04-49W. A temporary mooring will be in use for the moorage of tugs and scows at 33-43-45N 118-05-48W. All dredging operations will be enclosed with turbidity curtains attached to orange Norwegian buoys to aid mariners in visibly identifying the turbidity controls. Clamshell dredge DB 185-3, cutter head dredge CUTTER 1; scows LONG PT and ARROW PT; along with tugs BERNARDINE C, TAURUS, and BOB will monitor VHF-FM Chan. 13, 14, and 01. Mariners are requested to transit the area with caution, minimize wake, and make arrangements with dredge vessels prior to passing. For more details or comments contact Sam Bice at 206-550-3916 or Steve Chew at 562-666-6971.

Chart 18749

LNM: 51/15

LONG BEACH-ANAHEIM BAY-TEMPORARY BUOY

The U.S. Coast Guard has established a temporary lighted buoy at 33-43-33.809N 118-06-02.318W to mark the end of the damaged Anaheim Bay East Jetty. The buoy displays a Fl Red 2.5s characteristic. It will be discontinued when Anaheim Bay East Jetty Light 6 (LLNR 2805) is reestablished. Direct any questions to LTJG Leslie Stenkamp at 510-437-3801 or Leslie.A.Stenkamp@uscg.mil.

MONTEREY BAY-MOSS LANDING-ROV OPERATIONS

The Monterey Bay Aquarium Research Institute (MBARI) will conduct continuous, unmanned maritime vehicle data collection operations off of Moss Landing between 36-41.27N 122-58-35W and 35-07-13N 122-58-35W until 27 May 16. The Wave Glider is designed to conduct scientific data collection operations. It carries no fuel, lubricants, or hydrocarbons. It is wave powered, remotely attended from our Wave Glider Operations Center (WGOC), moves at speeds of around 1kt, and designed to give way or part if encountered by a vessel. The vehicle is approximately 6.5ft x 2ft (surfboard size), yellow in color, with a contact plaque and mast extending 1 meter above the water surface supporting a flag. Mariners are requested to transit the area with caution. For more details or comments contact MBARI at 831-775-1700 wavglider@listserver.mbari.org or Liquid Robotics 24/7 WGOC Operations Center at 888-574-4574 / 408-636-4205.

Chart 18685

SAN CLEMENTE ISLAND-SAFETY ZONES

Mariners operating in the vicinity of San Clemente Island are reminded of the restricted waterway access surrounding San Clemente Island (33 CFR 165.1131; 33CFR 165.1141). Since the inception of the regulations, numerous safety zone violations have been processed by Coast Guard Sector San Diego. Safety Zone Incursions put the public at risk and cause costly and unnecessary training delays, as well as range cancellations. Violators of the San Clemente Island Safety and Security Zones are subject to monetary penalties. Criminal penalties may also be issued for repeated Safety and/or Security Zone violations. Failure to comply with the federal regulations could result in civil penalties of up to \$40,000.00. Furthermore, if a mariner holds a Merchant Mariner Credential, suspension or revocation action may be pursued against the mariner's credential. For more details see MSSB 04-15 SCI Safety Zone.pdf in the enclosure section.

SAN FRANCISCO BAY-BRIDGE

SAN MATEO-HAYWARD BRIDGE - Caltrans' contractor, Liberty Maintenance, will be conducting maintenance during daylight hours, Monday through Saturday. A work platform will be installed below low steel of the bridge deck from piers 2 to 18 and from piers 21 to 38, reducing vertical clearance in those spans by approximately 5 ft. The upstream and downstream low steel of the platform will be lighted at night with red lights placed every 75 ft. A 160ft X 50ft equipment barge and a 110ft X 30ft service barge will be moored, via spuds, at various locations on the north side of the bridge, each corner lighted at night with red lights. (See San Mateo Lighting Plan in the enclosure section). The main navigation span of the bridge, between piers 19 and 20 will remain clear at this time. For details at the work site, mariners can contact Caltrans at 408-592-3785, or Liberty Maintenance at 330-272-4667, 516-369-8535, 330-509-4535, or 917-709-0742. For more details or comments contact the Coast Guard Project Manager at 510-437-3515.

SAN FRANCISCO BAY-CARQUINEZ STRAIT-BRIDGE

I-80 UPSTREAM BRIDGE- Permanent 25ft wide maintenance travelers will be located at various positions (see Carquinez Strait Bridge.pdf in the enclosure section), at night, during April 2016, for routine maintenance; and stored at the piers during the day. Travelers reduce vertical clearance in the bridge by no more than 6 feet and are lighted at night with red lights. Mariners should expedite notifying USCG Vessel Traffic Service to report discrepancies.

LNM: 23/15

SAN FRANCISCO BAY-MARINE EVENT

Corinthian Yacht Club will sponsor a boat parade involving 500 participants boating in the Racoon Straits from 0900-1300 on 24 Apr 16. A Regulated Area will be in effect during this time and all participants shall follow the parade route established by the sponsor. Mariners are requested to transit the area with caution. For more details or comments contact LTJG Christina Ramirez at 415-399-3585 or John Nicholai at 415-435-4771.

Chart 18649

LNM: 08/16

SAN FRANCISCO BAY-MARINE EVENT

The Pacific Inter-Club Yacht Association will sponsor a boat parade involving 140 participants boating in the vicinity of the San Francisco Waterfront from Crissy Field to Pier 39 from 1200-1500 on 24 Apr 16. A Regulated Area will be in effect during this time and all participants shall follow the parade route established by the sponsor while maintaining an approximate speed of 6 knots. Mariners are requested to transit the area with caution. For more details or comments contact LTJG Christina Ramirez at 415-399-3585.

SAN FRANCISCO BAY-OAKLAND HARBOR-DREDGING

SAN FRANCISCO BAY-OAKLAND HARBOR-DREDGING

Camenzind Dredging Inc. will be conducting dredging operations in Oakland Middle Harbor Enhancement Area at 37-48-10N 122-20-00W until 15 Jul 16. A submerged pipeline operated by dredge PAUL VINCENT will be marked with yellow floats and anchors with white buoys. The Operations will remain continuous for the duration of the project. Dredge PAUL VINCENT, work boat FESTER and barge Fred will monitor VHF-FM Chan. 16 and 67. Mariners are requested. For more details or comments contact Project Manager Kurt Camenzind at 650-424-0367.

Charts: 18650 18652

LNM: 06/16

SAN FRANCISCO BAY-OAKLAND INNER HARBOR-SHOALING

Shoaling has been reported on the south side of the Oakland Inner Harbor South Channel in the east passage through the Fruitvale Ave. Bridge. Mariners are requested to transit the area with caution and report any observed changes in shoaling conditions to the San Francisco VTS on VHF-FM Chan. 14. For more details or comments contact U.S. Coast Guard Sector San Francisco Waterways Management at 415-399-7443.

Chart 18652

LNM: 16/15

SAN FRANCISCO BAY-OAKLAND-SUNKEN VESSEL

A sunken 56ft vessel has been reported in the vicinity of 5th Ave. Marina, Oakland at 37-47-18.91N 122-15-51.60W. Approximately 2ft to 4ft of the vessel's mast is out of the water and also marked by a quick flashing green light. Mariners are requested to transit the area with caution.

Chart 18652

LNM: 39/15

SAN FRANCISCO BAY-PARADISE CAY HARBOR-DREDGING

Salt River Construction will conduct dredging operations in the Paradise Cay Homeowners Channel at 37-54-53N 122-28-32W until 30 Nov 16. The dredge/dump barges DB1 and DB2, along with tug IRENE LAURITZEN will monitor VHF-FM Chan. 13, 14, and 77. Mariners are requested to transit the area with caution. For more details or comments contact Rick Moseley at 415-435-1024.

Chart 18653

LNM: 13/16

SAN FRANCISCO BAY-RESEARCH BUOY DEPLOYMENT

The Coastal Oceanography Group at UC Davis Bodega Marine Laboratory deployed two research buoys in the vicinity of South Bay and Rocky Point at 37-46-29.3N 122-21-56.1W and 37-52-26.4N 122-37-37.2W. The buoys will remain at these locations until 31 Jul 16. The buoys are marked at the surface with a yellow 14ft trawl float and 12ft spar buoy with radar reflector, flag and amber light. For more details or comments contact David Dann at 707-875-1931.

Chart 18649

SAN FRANCISCO BAY-SAN FRANCISCO FERRY TERMINAL-CONSTRUCTION

Manson Construction will be installing a marine barrier in the vicinity of San Francisco Ferry Plaza at 37-47-49N 122-23-21W until 30 Aug 16. Mariners are requested to transit the area with caution. For more details or comments contact LTJG Christina Ramirez at 415-399-3585.

Chart 18650

LNM: 37/15

SAN FRANCISCO BAY-SAN FRANCISCO MARINA-SHOALING

Shoaling has been reported extending from the south side of the North Jetty at the entrance to San Francisco Marina. An unlighted white buoy has been established at 37-48-30N 122-26-23W in 9ft of water to mark the shifting shoal. The northern entrance is subject to rapid shoaling and should be avoided due to unknown depths. It is recommended that vessels transiting the marina enter and exit from the south side of the floating wave attenuator. Mariners are requested to transit the area with caution. For more details or comments contact Lawrence O'Donnell at 415-831-6322.

Chart 18649

LNM: 11/15

SAN FRANCISCO BAY-SUISUN BAY-MARINE CONSTRUCTION

Cherne Contracting Corporation will be conducting marine construction operations on the Tesoro Avon Wharf in Suisun Bay at 38-02-56N 122-05-27W until July 2016. The work will include the construction of a new Berth 1A and replacement of the existing trestle between the wharf and land. Two temporary mooring buoys have been established at 38-03-5.76N 122-06-29.5W and 38-03-51.4N 122-06-32.6W. Derrick barges VANCOUVER and GENERAL; along with multiple flat barges will be on site monitoring VHF-FM Chan. 13 and 16. Mariners are requested to transit the area with caution and minimize wake in the vicinity of the construction site. For more details or comments contact Glenn Olson at 253-377-4078.

Chart 18656

LNM: 28/15

SAN FRANCISCO BAY-VALLEJO-MARE ISLAND STRAIT-MARINE CONSTRUCTION

Dutra Construction Company will conduct marine construction at the Mare Island Ferry Terminal at 38-06-06N 122-16-08W until 01 Jun 16. Project work will consist of pile driving and floating dock installation. Crane barge MORTY or KELSO will be on site monitoring VHF-FM Chan. 16. Mariners are requested to transit the area with caution and minimize wake when transiting near the construction site. For more details or comments contact Stephen Hutchison at 415-254-4410.

Chart 18655

LNM: 29/15

SAN FRANCISCO-OAKLAND BAY BRIDGE (EAST OF YBI)

SAN FRANCISCO-OAKLAND BAY BRIDGE (EAST OF YBI)

SAN FRANCISCO/OAKLAND BAY BRIDGE-EAST OF YBI -A Safety Zone has been established from 1000 feet west of pier "I" and extends east to the Oakland shoreline. (see 2015-2017_East_SFOBB_Safety Zone.pdf in enclosure section) This safety zone has been established to protect mariners from the dangers associated with removal operations of the SFOBB. All vessels passing through the bridge east of YBI should use the "T1-E2" span of the Replacement SFOBB Eastern Span until demolition of the replaced bridge is complete. Unauthorized persons or vessels will be prohibited from entering into, transiting through, or remaining in the safety zone without permission of the Captain of the Port or their designated representative.

Work is in progress in removing the spans between piers I-N. Typical in-water equipment to be utilized are two 250' X 72' X 15' barges, two 99' X 99' crane barges, and a 133' X 46' material barge, spudded and anchored beneath the structure. Typical anchor lines will extend from each corner of the barges out 1500 feet. Each corner of the anchored barges shall be lighted at night with an all-round red light. Red lights will mark the upstream and downstream portion of the pier bases until their removal. (see Barge-504Removal.pdf in enclosure section)

For details at the work site, mariners may contact Caltrans at 650-222-7242 or the Contractor at 510-774-1204. For more details or comments contact the Coast Guard Project Manager at 510-437-3515.

Chart 18650

LNM: 43/08

SAN FRANCISCO-SUISUN BAY-MONTEZUMA SLOUGH-SUISUN MARSH-LOCK OPERATIONS

The California Department of Water Resources is operating the boat lock from 0700-1700 daily until 31 May 16, and will monitor VHF-FM Chan. 13 during operating hours at the Suisun Marsh Salinity Control Structure maintenance channel at 38-05-36N 121-53-07W. All vessels requiring passage in either direction must use the boat lock. The boat lock signal is a standard traffic light. Whistle signals to request opening are two prolonged blasts followed by two short blasts. Full instructions on passage including an emergency phone number are posted on site. The boat lock is located on the east side of the channel and provides the following clearances: 16ft horizontally; 9ft over the sill at MLLW; 70ft in length between sector gates; and no vertical impairment. The piers will be marked by fixed red lights, and other parts of the structure will be marked by fixed yellow lights.

Mariners should be aware a shoal area exists along the east bank on both sides of the structure extending approximately 50ft out from the existing levee. Marker buoys have been placed to identify the area. Mariners are also advised that the Salinity Control Structure operations can, at times, create currents at the site greater than currents in other areas of Montezuma Slough. Mariners are requested to transit the area with caution. For more details or comments contact Dan Yamanaka at 916-574-0456.

Chart 18656

LNM: 34/15

SANTA BARBARA CHANNEL-GEOPHYSICAL SURVEY

The USGS Pacific Coastal and Marine Geology Science Center (PCMGSC) will be conducting a near shore geophysical survey from Goleta to Palos Verdes until 31 May 16. The operations will be a bathymetric survey using a 200 kHz single beam echo sounder mounted two personal watercraft (jet ski). See enclosure (Geophysical Survey Operations) for chartlet and positions for survey. For more details or comments contact Jenny White at 831-460-7485.

Chart 18685

LNM: 46/15

SANTA BARBARA HARBOR-SHOALING

There has been a report of shoaling in Santa Barbara Harbor with a depth of 11ft MLW between buoys 10 and 11. Mariners are requested to transit the area with caution.

Chart 18725

U.S. Coast Guard
Chief Waterways Management Branch

U. S. Coast Guard Sector Los Angeles – Long Beach

MARINE SAFETY INFORMATION BULLETIN 11-09

Los Angeles / Long Beach Harbor Safety Committee Voluntary Western Traffic Lanes

There has been a recent trend in traffic patterns where some vessel operators are choosing to depart the Traffic Separation Scheme (TSS) established in the Santa Barbara Channel and transit through an area to the south of San Miguel, Santa Rosa and Santa Cruz Islands (referenced herein as “south of the Channel Islands”). As such, the Los Angeles / Long Beach Harbor Safety Committee has published voluntary western traffic lanes for vessels approaching and departing the Ports of Los Angeles and Long Beach.

Mariners transiting through the western and northern approaches to and from the Ports of Los Angeles and Long Beach (LA/LB) are advised the established TSS through the Santa Barbara Channel as shown on NOAA and Admiralty charts is the only International Maritime Organization (IMO) approved routing measure in this area. An IMO approved TSS reduces the risk of collision by providing for the separation of arriving and departing traffic and minimizing potentially hazardous crossing situations. Mariners, who have traditionally used this approved TSS, are encouraged to continue to do so.

Voluntary Western Traffic Lanes

To address the safety concerns created by increased traffic south of the Channel Islands, on October 6, 2009, the Los Angeles/Long Beach Harbor Safety Committee (LA/LB HSC) endorsed voluntary traffic lanes in the area south of the Channel Islands (referenced herein as “voluntary western traffic lanes.”). The new voluntary western traffic lanes are not approved by the IMO, nor are they approved by any U.S. federal authority, including the U.S. Coast Guard. The LA/LB HSC developed these lanes as a voluntary measure to promote vessel safety. The Coast Guard is taking separate action to study the increased traffic in this area.

The geographical coordinates for the voluntary western traffic lanes are published by the LA/LB HSC secretary at <http://www.mxsocal.org/Blogs/24/Voluntary-Routing-Zones.aspx>.

Pacific Missile Test Range, Point Magu

Departing the IMO approved TSS and transiting south of the Channel Islands may result in delays and diversions, as this transit will take vessels through the Pacific Missile Test Range, Point Mugu, California. **The U.S. Navy advises that hazardous operations may take place within the test range.** The test range extends for 180 miles in a South West direction from Point Mugu and is up to 210 miles wide. The specific hazardous areas within the range are broadcast by the Navy daily Monday through Friday at 0900 and 1200 on 2638 kHz and 2738 kHz. When notified by the Navy, the Coast Guard also broadcasts this information on VHF-FM channel 16.

When transiting south of the Channel Islands (inbound or outbound to the Ports of Los Angeles and Long Beach), all mariners should communicate with Navy PLEAD CONTROL in a timely manner so that early decisions can be made regarding safe routing. Every effort should be made to comply fully with any instructions received from the Navy. For information regarding the status of current hazardous operations contact “PLEAD CONTROL” on VHF Marine channel 11 or 16, or at (805) 989-8841/8843 from 0600-1800, and at (805) 816-0792 after 1800. If you are unable to contact “PLEAD CONTROL”, contact “SAN PEDRO TRAFFIC” on VHF-FM channel 14 or (310) 832 6411 for the most recent information regarding hazardous military operations.

The Navy requests all vessels transiting the range to submit a notification to PLEAD CONTROL indicating the vessel name, destination, and estimated time of entry into, and departure from, the test range. Notifications can be faxed to (805) 989-0102.

Whales

Mariners are further reminded that large whales, including Blue, Grey, Humpback, and Fin whales, as well as other marine mammals, have been sighted in and around the Santa Barbara Channel, both within the TSS as well as to the south of the Channel Islands. These whales are all protected under federal law and some are listed as endangered species. Please report any collisions with whales or any observed live, injured, or dead whales, including time and position, to the National Oceanographic and Atmospheric Administration (NOAA) at 877-SOS-WHALE (877-767-9425) or the Coast Guard.

Recreational and Fishing Vessels

The area to the south of the Channel Islands is also used by both commercial fishing vessels and recreational vessels, whose operators may not be aware of the new voluntary western traffic lanes or that ship traffic has recently increased in this area. Since the new voluntary western traffic lanes are not an IMO approved traffic separation scheme, the International Regulations for Avoiding Collisions at Sea (COLREGS) Rule 10 does not apply.

Questions

Questions relating to the voluntary western traffic lanes should be directed to the LA/LB HSC Secretary at (310) 832-6411.

SAN CLEMENTE ISLAND LIMITED ACCESS ADVISORY

Mariners operating in the vicinity of San Clemente Island are reminded of the **restricted** waterway access surrounding San Clemente Island (33 CFR 165.1131; 33 CFR 165.1141).

Since the inception of the regulations, numerous safety zone violations have been processed by Coast Guard Sector San Diego. Safety Zone incursions put the public at risk and cause costly and unnecessary training delays, as well as range cancelations. Violators of the San Clemente Island Safety and Security Zones are subject to monetary penalties. Criminal penalties may also be issued for repeated Safety and/or Security Zone violations. Failure to comply with the federal regulations could result in civil penalties of up to \$40,000.00. Furthermore, if a mariner holds a Merchant Mariner Credential, suspension or revocation action may be pursued against the mariner's credential.

<https://www.scisland.org/>

San Clemente Island is a top strategic Department of Defense military training facility. Dangerous naval activities occur weekly to ensure deployable military forces are trained for worldwide missions (e.g. small arms training, ground and air explosive ordnance training). Mariners conducting operations around San Clemente Island must abide by Federal regulations that apply to the three NM radius around the island. Eight zones comprise the Safety and Security Zones. Restriction times are based on U.S. Navy live fire exercises. Wilson Cove Security Zone and Safety Zone G are permanently closed. Mariners wishing to transit through Zone G must get preapproval from the U.S. Navy. The U.S. Navy makes every effort to maintain a schedule in advance and minimize public access restrictions. Periods of enforcement can be found at <https://www.scisland.org>. Restricted access areas and times are highlighted in red and listed in the associated website chart. If a Safety Zone section is green, mariners may access the waters. Mariners are advised to contact San Clemente Island via call sign "KRAKEN" on VHF CH 82A, or call Coast Guard Sector San Diego Joint Harbor Operations Center on VHF CH16 or at (619) 278-7033 to verify real-time status of the restricted waters.

If you would like more information about the Security and Safety zones surrounding San Clemente Island, please contact the Coast Guard Sector San Diego Waterways Management Division at 619-278-7656 or by email at D11-DG-M-SectorSD-Prevention-WaterwaysManagement2@uscg.mil.

Establishment of Anchorage Berths in General Anchorages 7, 8 and 8A*

On September 10, 2015 the Harbor Safety Committee of the San Francisco Bay Region adopted a proposal to establish anchorage berthing schemes in general anchorages 7, 8 and 8A*. These berthing schemes will provide more efficient use and greater predictability of the available space in these anchorages. Specific berth information is contained in the tables below.

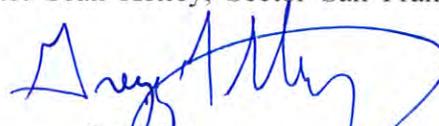

ANCHORAGE 7 BERTH COORDINATES		
COORDINATES INDICATE CENTER OF .05NM (100YD) DIAMETER DROP BUCKET		
Berth	Latitude	Longitude
7N	37° 49.617'N	122° 23.403'W
7S	37° 49.178'N	122° 22.967'W

ANCHORAGE 8 BERTH COORDINATES		
COORDINATES INDICATE CENTER OF .05NM (100YD) DIAMETER DROP BUCKET		
Berth	Latitude	Longitude
8N	37° 47.575'N	122° 21.485'W
8C	37° 47.395'N	122° 20.890'W
8S	37° 46.910'N	122° 21.050'W
8E1	37° 47.835'N	122° 21.000'W
8E2	37° 46.905'N	122° 20.480'W

ANCHORAGE 8A* BERTH COORDINATES		
COORDINATES INDICATE CENTER OF .05NM (100YD) DIAMETER DROP BUCKET		
Berth	Latitude	Longitude
8A	37° 47.050'N	122° 21.725'W

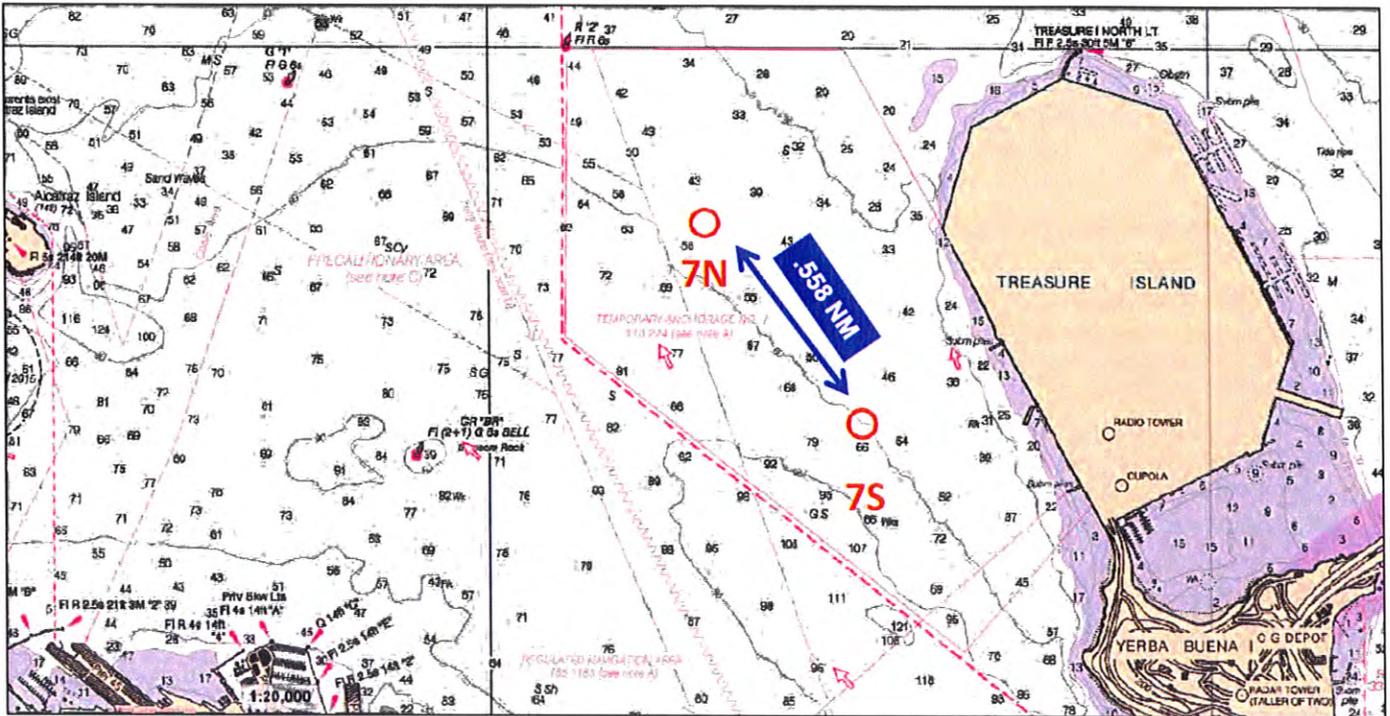

*Anchorage 8A exists only when activated by VTS.

All existing regulations governing the use of these anchorages remain in effect. Vessels using these anchorages should strive to let go their anchor in the center of the drop bucket. For additional information please contact Sean Kelley, Sector San Francisco VTS Director (415) 399-7402.

 G. G. Stump
 Captain, U.S. Coast Guard
 Captain of the Port

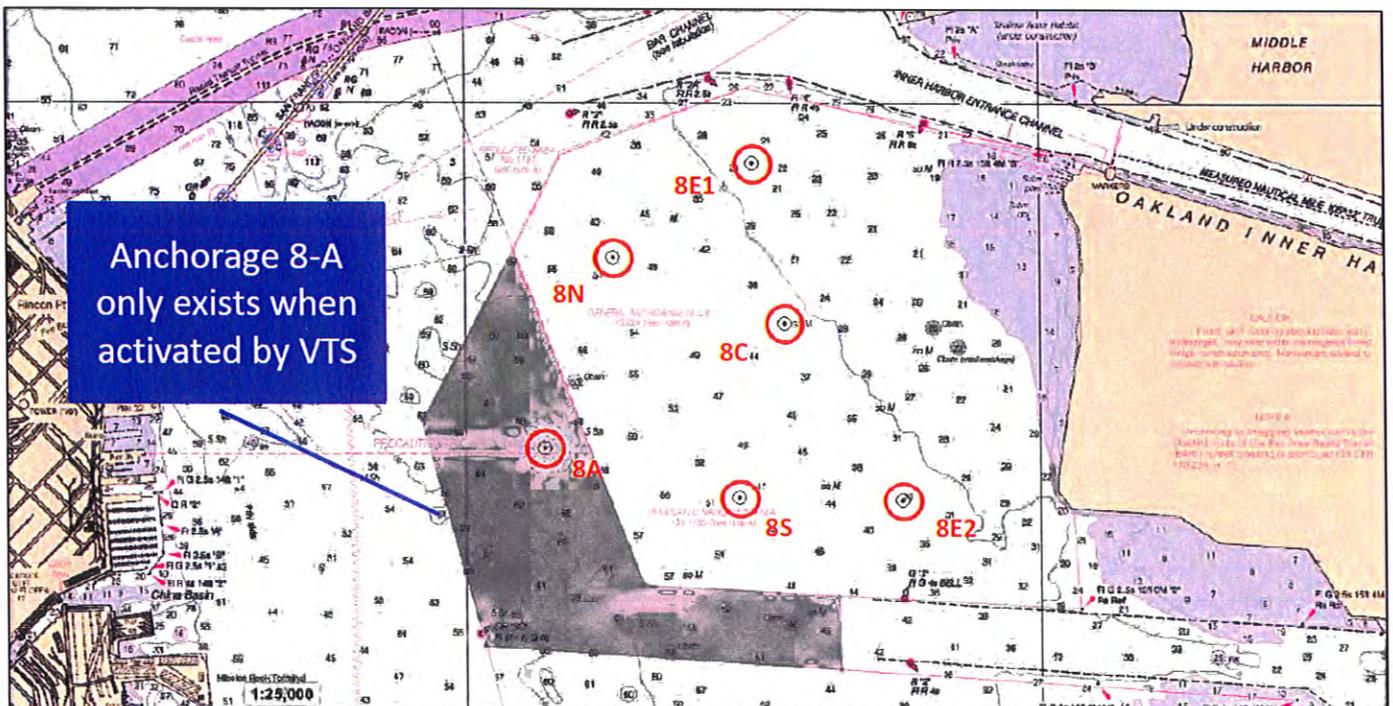

General Anchorage 7 berths

SAN DIEGO BAY ZUNIGA JETTY SAFETY ADVISORY

Mariners operating in the vicinity of the entrance to San Diego Bay, specifically adjacent to the Zuniga Jetty, are reminded of the inherent hazards that exist along the semi-submerged break-wall. Follow all navigation charts for safe operating distance around the Jetty, associated shoal waters, and rock hazards. Do not navigate across or within any submerged portion of the Coast Guard navigation marked Jetty. Unfortunately, vessel accidents and injuries continue to occur due to vessel traffic crossing the submerged portions of the Jetty.

Zuniga Jetty, located just to the east of Point Loma and the federal entrance channel at the mouth of San Diego Bay, is a 7,500-foot north/south running breakwater that for over one hundred years has played an important role in stabilizing the entrance to San Diego harbor by blocking sediment flow into San Diego Bay. At high tide, up to two-thirds of the jetty may be submerged, and at low tide, the outer third of the jetty cannot easily be seen by approaching boaters. Submerged sections of various depths between existing navigation lights are hazardous to cross at any time.

Zuniga Jetty is marked with five "Danger Submerged Jetty" signs and five flashing white lights, marked in the Coast Guard Light List and on navigation charts as V through Z. At the southernmost end of the Zuniga Jetty, Light Z is marked with a Flashing White Light every 2.5 seconds and a continuous fog horn with a one-second blast every 10 seconds. Always consult your navigation charts when unfamiliar with the waterway. Printable PDF charts are available free of charge, at <http://www.nauticalcharts.noaa.gov>,

For more information about the role of the historic Zuniga Jetty, please contact the Coast Guard Sector San Diego Waterways Management Division at 619-278-7656 or by email at D11-DG-M-SectorSD-Prevention-WaterwaysManagement2@uscg.mil.

Safety Zone

Grand Canal, Newport Beach

The Captain of the Port has established a temporary safety zone (area highlighted in red below) in support of navigation safety during the Park Ave Bridge Replacement at Newport Beach Grand Canal on Balboa Island from 04 Apr 2016 through 31 Jan 2017.

Persons and vessels are prohibited from entering into, departing from, transiting through, or anchoring within the designated area unless authorized by the Captain of the Port Los Angeles-Long Beach or her designated representatives.

Commander
11th Coast Guard District, Building 50-2
Coast Guard Island
Alameda, Ca 94501-5100

Subject: Notice to Mariners for Ventura Harbor Maintenance Dredging.

1. Name of Contractor **Manson Construction Co.**
340 Golden Shore, Suite 310
Long Beach CA 90802
Phone No. 562.983.2340

2. Contractor sponsor: U.S. Army Corps of Engineers, L.A District, Contract #W912PL-16-C-0005

3. Type of Operation: Hydraulic Maintenance dredging of Ventura Harbor and sand trap using the cutter suction dredge HR Morris.

4. Location/Position Information: Ventura Harbor, entrance channel and sand trap
34° 14' 52.99" N, 119° 15' 58.61" W

5. Start and End Dates: Mobilization of the pipeline and support equipment will commence on or around January 25, 2016. Dredging operations will begin on or about February 8, 2016 and continue for 23 days. Operations will run 24 hrs. a day 7 days a week.

6. Vessel (s) involved:

Vessel Name	Company	Call Sign	Phone
Dredge HR Morris	Manson Construction Co.	WCZ5434	562.762.5449
DB Freya	Manson Construction Co.	WDA9951	
Dredge Tender Pup	Manson Construction Co.	WAB4086	
Dredge Tender Cub	Manson Construction Co.	WCZ5656	
Survey Boat Renegade	Manson Construction Co.	WAB4086	

7. Radio: Yes No VHF – FM FREQ'S Monitored: 16 and 67

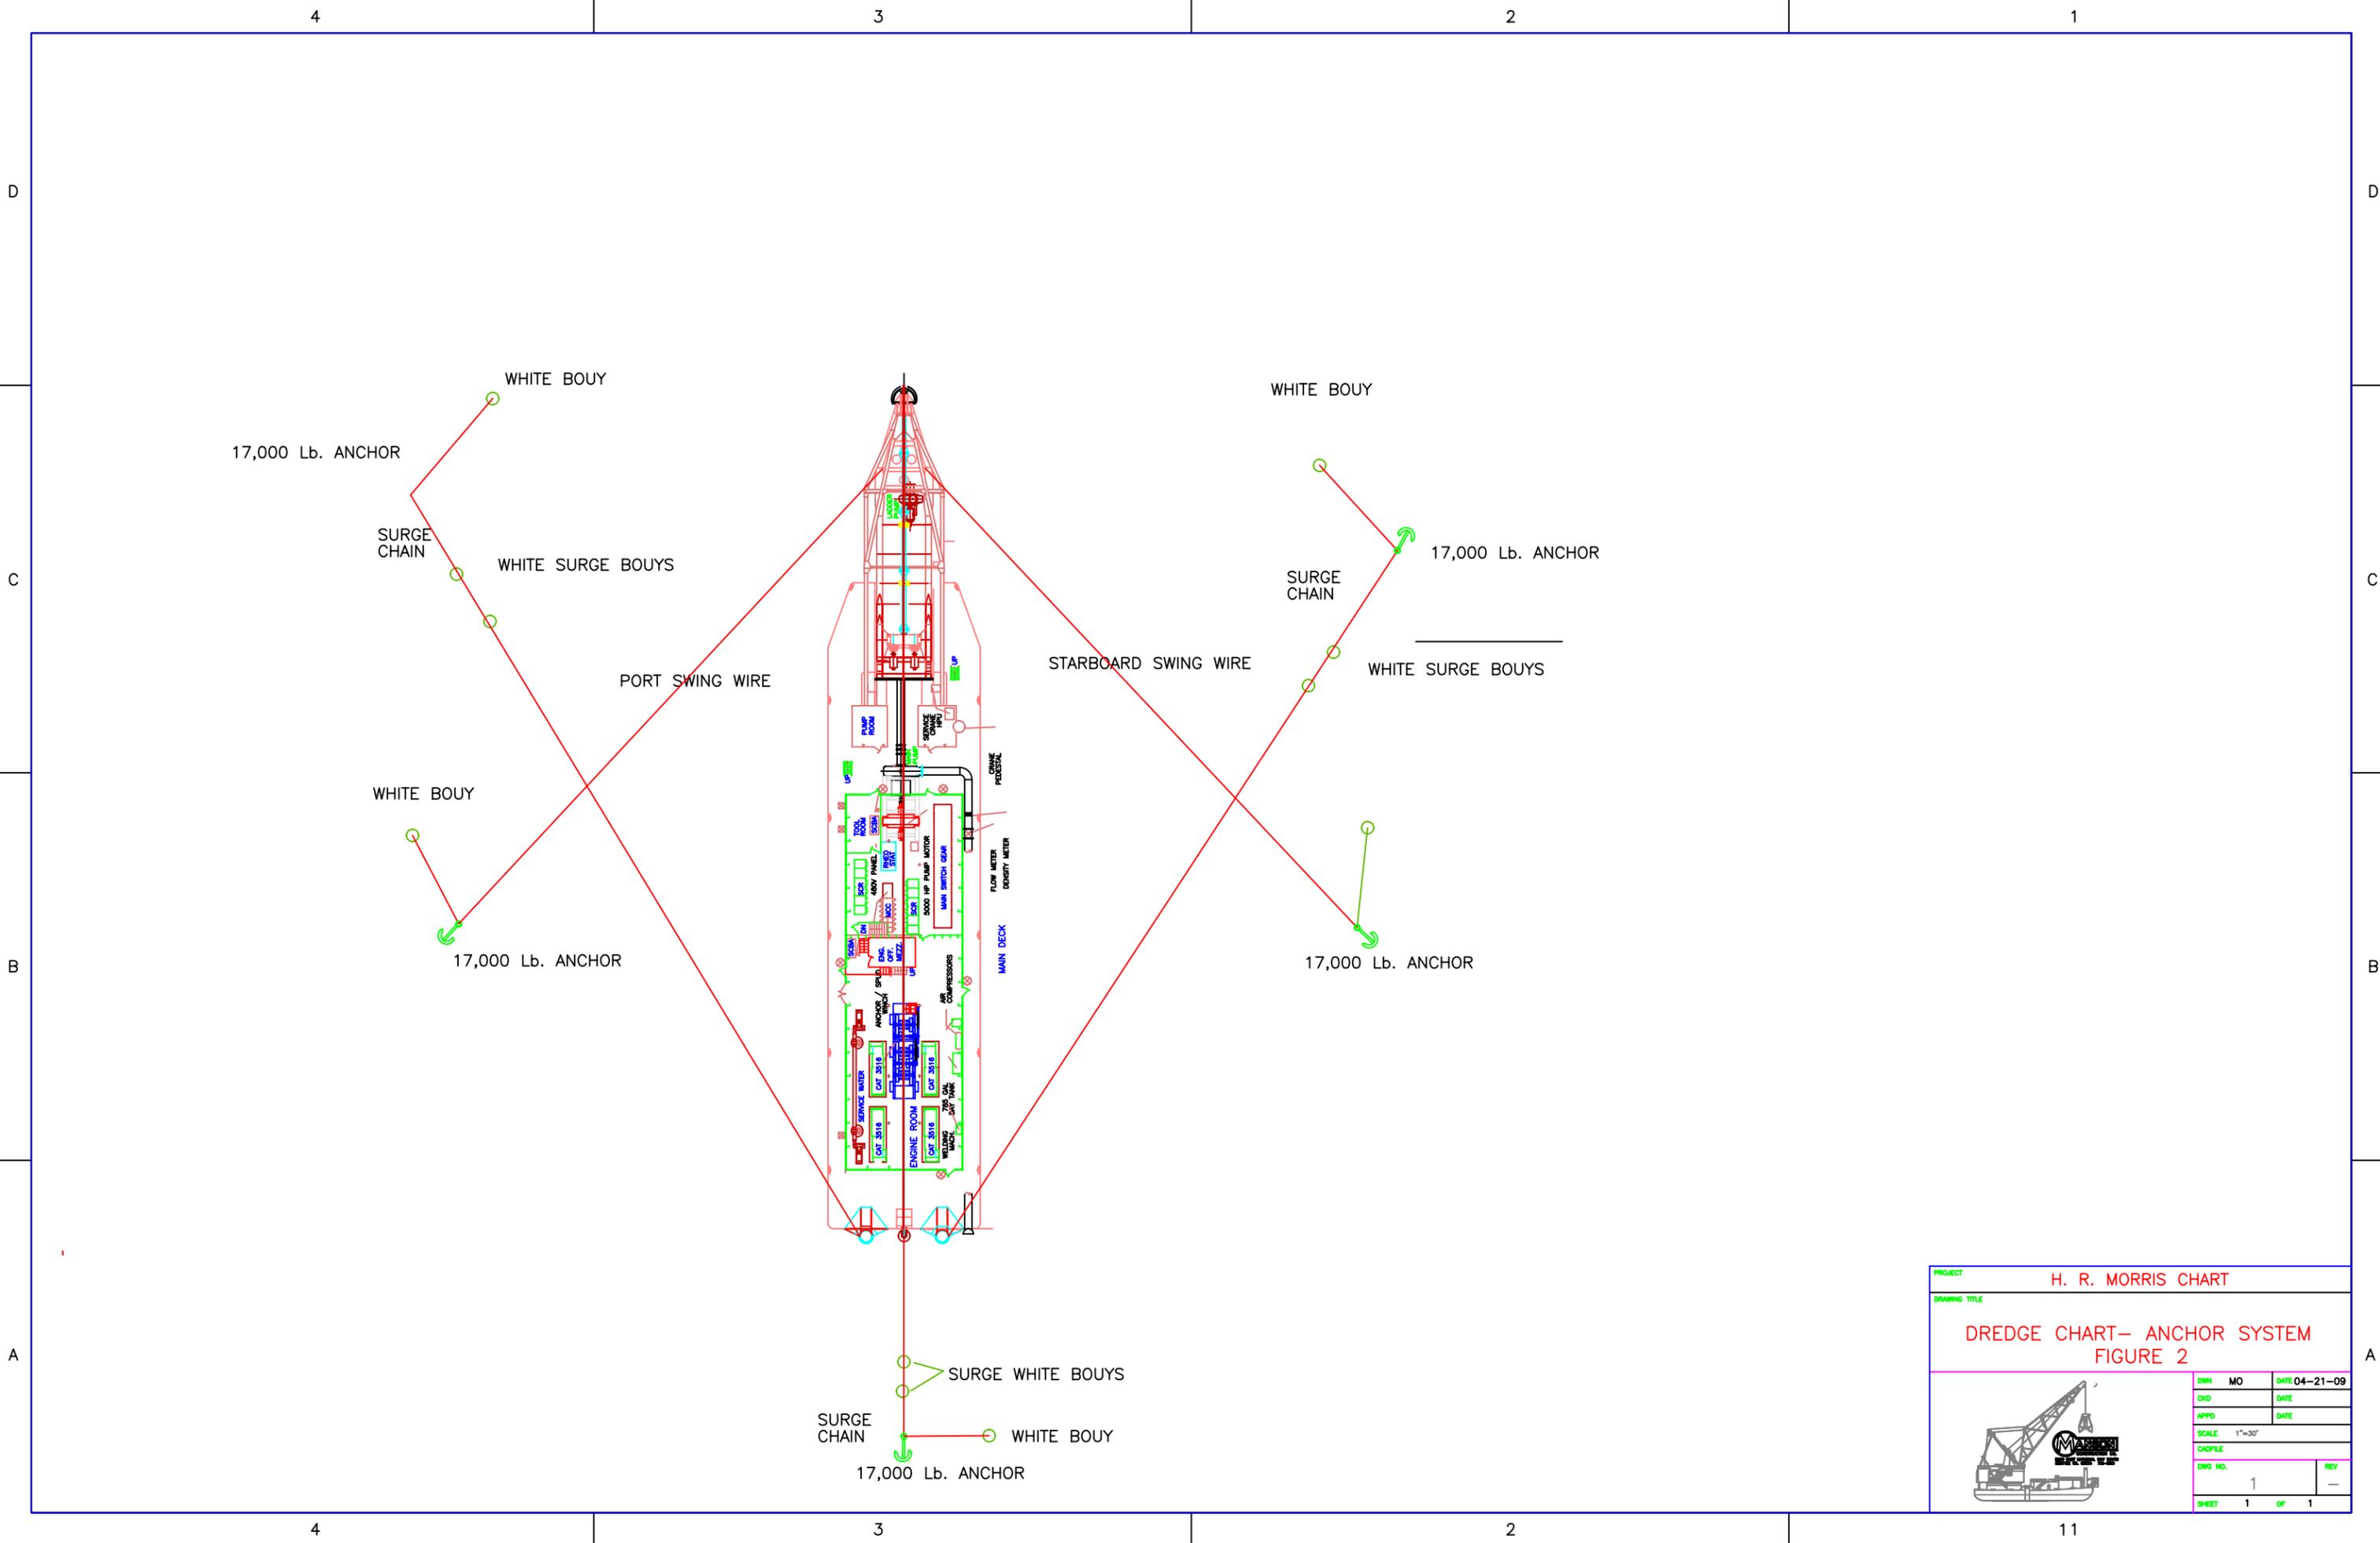

8. Any other Pertinent Info:

Material will be transported through floating pipeline, submerged pipeline, and shore pipeline to the disposal area.

EXTREME CAUTION AND RADIO CONTACT: is requested when passing the dredge HR Morris.

9. POC Name & Telephone Numbers:

NOAA Chart 18650

Typical Barge Configuration - Eastern Span SFOBB, mile 8.9, San Francisco Bay

Two 250' X 72' barges, two 99' X 99' crane barges and a 133' X 46' material barge will be anchored and spudded underneath spans "I"- "J" (E4-E5), "J"- "K" (E5-E6), "K"- "L" (E6-E7), "L"- "M" (E7-E8), and "M"- "N" (E8-E9) at various times to facilitate removal of the spans. The barges will be lighted at night with steady burning red lights. A Coast Guard Captain of the Port Safety Zone is in effect in this work area. Mariners must receive permission from the COTP to enter the Safety Zone. Once the spans and its corresponding towers are removed, each corner of the exposed in-water remaining piers will be lighted at night with steady burning red lights.
