

MMSI ship station blocks allocated in the US

To find the organization responsible for registering and maintaining the MMSI you were assigned, check your assigned MMSI against the allotment list below. Since MMSIs are used to identify vessels in distress, it is essential that MMSI registration information be kept up to date.

MMSI	Registering Organization
MID 303:	
303000000 – 303819990	FCC
303820000 – 303999999	NTIA

MMSI ship station blocks allocated in the US

Note:

- All MMSIs issued by the Federal Communications Commission (FCC) end in zero.
- MMSIs issued by Boat US, US Power Squadron, SeaTow and Shine Micro end in a digit other than zero. MMSIs ending in zero from these blocks are issued by the FCC.
- MMSIs assigned by Sea Tow, while still valid, are no longer being maintained. The USCG and FCC are looking into the possibility of transferring assignments to another provider.
- MMSIs assigned by MariTEL are no longer being maintained, but were possibly reassigned to MariTEL.
- National Telecommunications and Information Administration (NTIA) issues MMSIs to federal vessels.
- Maritime Identification Digits (MID) indicate the first three digits of an MMSI and are allotted to countries by the International Telecommunications Union (ITU).
- MMSIs allotted to COMSAT and Stratos (now Inmarsat) were for the purpose of commissioning legacy Inmarsat terminals and should be returned to the FCC when no longer in use.
