LOCAL NOTICE TO MARINERS

District: 5

Week: 08/21

COASTAL WATERS FROM SHREWSBURY RIVER, NEW JERSEY TO LITTLE RIVER, SOUTH CAROLINA

The Local Notice to Mariners contains all information relevant to the waterways within the Fifth Coast Guard District and is updated each Tuesday on the U.S. Coast Guard Navigation Center website at <https://www.navcen.uscg.gov/>.

If you have questions about the Fifth Coast Guard District Local Notice to Mariners (LNM), please contact:

COMMANDER
FIFTH COAST GUARD DISTRICT (dpw)
431 Crawford Street
Portsmouth, Virginia 23704

or for correspondence and article requests:
gregory.c.goetz2@uscg.mil, (757) 398-6220 and CGD5Waterways@uscg.mil

All bearings are in degrees TRUE - All times are in Local Time unless otherwise noted.

AIDS TO NAVIGATION DISCREPANCY REPORTING

To report any Aids to Navigation discrepancies (missing, damaged, extinguished lights, off station), shoaling or hazards to navigation, discrepancies to bridge lighting, please contact the following 24 hour numbers:

1. For PA, NJ, DE waters, coastal and tributaries contact COGARD SECTOR DELAWARE BAY at (215) 271-4940.
2. For MD, DE in the Upper Chesapeake Bay and tributaries contact COGARD SECTOR MARYLAND - NATIONAL CAPITAL REGION at (410) 576-2525.
3. For VA in Lower Chesapeake Bay below Smith Point Light and tributaries and VA, MD Eastern Shore Bay and coastal contact COGARD SECTOR VIRGINIA at (757) 483-8567.
4. For NC waters, coastal and tributaries contact COGARD SECTOR NORTH CAROLINA at (910) 343-3882.

ABBREVIATIONS

A through H

ADRIFT - Buoy Adrift
AICW - Atlantic Intracoastal Waterway
AI - Alternating
B - Buoy
BKW - Breakwater
bl - Blast
BNM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK/Daymk - Daymark
DBN/Dbn - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - eclipse
EST - Established Aid
ev - every
EVAL - Evaluation
EXT - Extinguished
F - Fixed
fl - flash
Fl - Flashing
G - Green
GIWW - Gulf Intracoastal Waterway
HAZ - Hazard to Navigation
HBR - Harbor
HOR - Horizontal Clearance
HT - Height

I through O

I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
ISL - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LNM - Local Notice to Mariners
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal
MSLD - Misleading
N/C - Not Charted
NGA - National Geospatial-Intelligence Agency
NO/NUM - Number
NOS - National Ocean Service
NW - Notice Writer
OBSCU - Obscured
OBST - Obstruction
OBSTR - Obstruction
Oc - Occulting
ODAS - Anchored Oceanographic Data Buoy

P through Z

PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RRL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal
STA - Station
STRUCT - Structure
St M - Statute Mile
TEMP - Temporary Aid Change
TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition:

MD-NCR - Maryland-National Capital Region
LIB - Lighted Ice Buoy

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

******NEW OR UPDATED INFORMATION IN THE LOCAL NOTICE TO MARINERS ******

New, updated or very important information in the Local Notice to Mariners (LNM) will be preceded and followed by four asterisks.

NC – VA – MD – DE – NJ - ATLANTIC OCEAN - OFFSHORE STRUCTURE PATON MARKING GUIDANCE

For Private Aids to Navigation (PATON) applicants requesting Coast Guard permits to provide navigational markings on offshore structures in Fifth Coast Guard District waters, the following structure identification, lighting, sound signal, and Automated Identification System (AIS) capabilities are strongly recommended. Applicants should plan to apply for one Private Aid Permit per structure (to include all label, light(s), sound signals and AIS signals). Private AtoN Permit applications should be submitted no sooner than 60 days prior to the need to activate a structure's final markings. Additional specific recommendations include:

Tower Identification:

- Uniquely lettered and numbered in an organized pattern as near to rows and columns as possible
- Letters and numbers labelled to as near to 3 meters high as possible
- Visible above any servicing platforms
- Visible throughout a 360-degree arc from the water's surface
- Visible at night through use of retro-reflective paint and lettering/numbering materials
- If feasible, also labelled below the servicing platform

Lighting:

- Located on all structures, preferably on the servicing platform, visible throughout a 360-degree arc from the water's surface
- Corner Towers/Significant Peripheral Structures (SPSs): Quick flashing yellow (QY) energized at a five nautical mile range
- Outer Boundary Towers: Yellow 2.5 sec (FL Y 2.5s) energized at three nautical mile range

- Interior Towers: Yellow 6 sec or yellow 10 sec (FL Y 6/FL Y 10) energized at a two nautical mile range
- All lights should be synchronized by their structure location within the field of structures

Note: All temporary base, tower and construction components preceding the final structure completion must be marked with Quick Yellow (QY) obstruction lights visible throughout 360 degrees at a distance of 5NM. These do not require permits, only Coast Guard notification for appropriate marine notices and broadcasts until the final structure marking is established.

Sound Signals:

- Should be located on all structures located at corners/SPSs
- Sound every 30 seconds (4s Blast, 26s off)
- Set to project at a range of 2NM
- Should not exceed 3NM spacing between perimeter structures
- Must be Mariner Radio Activated Sound Signal (MRASS) activated by keying VHF Radio frequency 83A five times within ten seconds
- Timed to energize for 45 minutes from last VHF activation

Automated Information System (AIS) Transponder Signals:

- Must be transmitted superimposed at all corner structures/SPSs
- Should be capable of transmitting signals to mark all locations of all structures throughout an established field
- Must be approved at the Coast Guard Headquarters level (CG-NAV) based on the Fifth Coast Guard District's recommendation

PATON Application can be requested through email to: D05-SMB-CGD5Waterways@uscg.mil

Please forward questions or feedback in an e-mail to:

Jerry.R.Barnes@uscg.mil and Matthew.K.Creelman2@uscg.mil

******NOVEL CORONAVIRUS – MARINERS AND MARITIME COMMERCE - PART 1******

UPDATED. An outbreak of respiratory illness caused by a novel COVID-19 continues to affect mariners and maritime commerce. Vessel arriving to or traveling between any U.S. port or place must follow reporting and infection control measures to maintain the safety of personnel onboard vessels as well as within the port.

Vessel Reporting Requirements:

Illness of a person onboard any vessel that may adversely affect the safety of a vessel or port facility is a hazardous condition per 33 CFR 160.216 and must be reported immediately to the U.S. Coast Guard Captain of the Port (COTP). Cases of persons who exhibit symptoms consistent with COVID-19 must be reported to the COTP. This requirement is separate and additional to any other required Coast Guard or Center for Disease Control and Prevention (CDC) reporting, and applies to vessels departing from or arriving to any port or place in the U.S., includes internal waters, the territorial seas, and deep water ports. In addition to Coast Guard reporting requirements, 42 CFR 71.21 requires vessels destined for a U.S. port to report to the Center for Disease Control and Prevention (CDC) any sick or deceased crew/passengers during 15 days prior to arrival at the U.S. port. Guidance to vessels to report deaths and illnesses to the CDC can be found at: Cargo vessels and Cruise ships. U.S. flagged commercial vessels are also advised to report ill crewmembers in accordance with the requirements of each foreign port called upon. Further, 42 CFR 70.4 states the master of any vessel or person in charge of any conveyance engaged in interstate traffic, on which a case or suspected case of a communicable disease develops shall, as soon as practicable, notify the local health authority at the next port of call, station, or stop, and shall take such measures to prevent the spread of the disease as the local health authority directs. See Headquarters MSIB 06-20, (or Sector Virginia MSIB 20-063) "Vessel Reporting Requirements for Illness or Death", for further information.

******NOVEL CORONAVIRUS – MARINERS AND MARITIME COMMERCE – PART 2******

Vessel Control Actions:

Presidential Proclamations have placed entry restrictions from persons arriving from or through the following countries: Iran, China (excluding Hong Kong and Macau), the European states within the Schengen Area (Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland), United Kingdom and Republic of Ireland.

Non-passenger Commercial Vessels: Non-passenger commercial vessels that have been to the countries noted above or embarked crewmembers from the countries noted above within the last 14 days, with no sick crewmembers, will be permitted to enter the U.S. and conduct normal operations, provided that crewmembers remain aboard the vessel except to conduct specific activities directly related to vessel cargo or provisioning operations. U.S. citizens or any other persons listed in Section 2 of Presidential Proclamation "Suspension of Entry as Immigrants and Nonimmigrants of Certain Additional Persons Who Pose a Risk of Transmitting 2019 Novel Coronavirus", for example crewmembers with a transit and/or crewmember visa, may be permitted to disembark the vessel to conduct vessel operations pier side or for the immediate and continuous transit through the U.S. to another country. When entering the U.S. all persons must be cleared by Customs and Border Protection (CBP) and, if applicable, CDC. Crewmembers without the appropriate visas will generally be required to remain onboard unless otherwise cleared for entry by CBP and, if applicable, CDC. Non-passenger commercial vessels that have been to the countries noted above or embarked crewmembers from the countries noted above within the last 14 days, and do have sick crewmembers should expect delays and need to work with local health and port officials prior to entry.

Passenger Vessels: On April 15, 2020, the CDC updated their existing No Sail Order. This Order will remain in effect until the Secretary of Health and Human Services' declaration that COVID-19 constitutes a public health emergency, the CDC Director rescinds or modifies the order based on specific public health or other considerations, or 100 days from the date publication in the Federal Register. This renewed order requires all cruise

ship operators to provide "an appropriate, actionable and robust plan to prevent, mitigate, and respond to the spread of COVID-19 on board cruise ships" prior to operating in waters subject to U.S. jurisdiction. In addition to the plan, there are further restrictions.

LNM: 17/20

******US - ATLANTIC SEACOAST - ENDANGERED NORTH ATLANTIC RIGHT WHALES WARNING******

US - Atlantic Seacoast - Critically endangered right whales may be encountered in offshore and coastal waters. Right whales are slow moving and at risk of serious injury or death due to collisions with vessels. U.S. law (50 CFR 224.105) prohibits operating vessels 65 feet (19.8 m) or greater in excess of 10 knots in specific managed locations along the U.S. East Coast during times when right whales are likely to be present. See link to compliance guide for specific times, areas, and exceptions to this law.

<https://www.fisheries.noaa.gov/national/endangered-species-conservation/reducing-ship-strikes-north-atlantic-right-whales>

Approaching or remaining within 500 yards of right whales is prohibited and is a violation of U.S. law. A minimum distance of 500 yards must be maintained from a sighted whale unless hazardous to the vessel or its occupants. The National Oceanic and Atmospheric Administration (NOAA) recommends that operators assume that any whale sighted is a right whale unless confirmed otherwise. NOAA also recommends speeds of 10 knots or less in areas used by right whales and outside of seasonally managed areas when consistent with safety of navigation. In the northeast, please report all right whale sightings, collisions, or entanglements to 866-755-NOAA, or to the Coast Guard via VHF-FM Channel 16.

WHALESNORTH Mandatory Ship Reporting Area is active year-round. For more information, consult the U.S. Coast Pilot. MSR arrival reports can be sent via TELEX number 48156090 or email to rightwhale.msr@noaa.gov.

POC. Ms. Katie Moore, LANTAREA Living Marine Resources Program Manager,
LANT-35LE, katie.s.moore@uscg.mil, (757) 398-6504.

LNM: 44/20

NC - HAZARDS OF NORTH CAROLINA COASTAL INLETS

Hazardous inlets. To heighten public awareness about the hazards that exist in and around the North Carolina, this information is provide to mariners. Shoaling conditions exist at following North Carolina coastal inlets:

Oregon Inlet Hatteras Inlet

Ocracoke Inlet Barden Inlet

Beaufort Inlet Bogue Inlet

New River Inlet Topsail Inlet

Masonboro Inlet Carolina Beach Inlet

Lockwoods Folly Inlet Shallotte Inlet

Shoaling conditions increase the potential for groundings. These inlets are subject to continual and sometimes rapid environmental changes.

Mariners are highly encouraged to obtain the most recent U.S. Army Corps of Engineers Wilmington, North Carolina District hydrographic survey information, centerline waypoints and controlling depth at:

<http://www.saw.usace.army.mil/Missions/Navigation/HydrographicSurveys.aspx>

Mariners should use caution when navigating in these areas and passage through the inlets is not recommended without local knowledge of the area. The aids to navigation in these inlets may not be charted and may not be marking best water due to continually shifting shoals. Consult Local Notice to Mariners, 5th Coast Guard District for the latest positions and status of aids to navigation:

<https://www.navcen.uscg.gov/?pageName=InmDistrict®ion=5>

To report any aids to navigation discrepancies (missing, damaged, off station, extinguished lights), shoaling, hazards to navigation, or discrepancies on bridge lighting, please contact Sector North Carolina Command Center (910) 343-2200.

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

INTERFERENCE WITH AIDS TO NAVIGATION

14 USC 543. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, wilfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 541 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 542 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights

maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense.

U.S. COAST GUARD AUXILIARY – PUBLIC EDUCATION CLASSES – FIND BY ZIPCODE

The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.
http://www.cgaux.org/boatinged/class_finder/index.php

**WESTERN ATLANTIC AND U.S. COASTAL WATERS - NORTH CAROLINA – SUNKEN MILITARY CRAFT ACT (SMCA)
–PROHIBITION ON DISTURBING, REMOVING ARTIFACTS OR DAMAGING SUNKEN CRAFT**

Special protections are provided to sunken military craft by the "Sunken Military Craft Act" (SMCA) (Public Law 108-375). Along the U.S. East Coast, and particularly off North Carolina, there are many sunken U.S. and foreign military craft. Sunken military craft may be the final resting places of military personnel who died in service to their country and are also important historical resources. One very notable example is the wreck of the USS MONITOR, off the NC Coast, also protected by the National Marine Sanctuaries Act. Under international and U.S. law, sunken foreign military craft, including those located in U.S. waters, remain the property of their respective country's government. Sovereign immune vessels, such as military crafts, are afforded protections under U.S. and international law. Included among these vessels are at least three known sunken German submarines (U-boats) located in waters off the NC coast. These U-boats remain the property of the Federal Republic of Germany. In accordance with the SMCA, no person shall engage in or attempt to engage in any activity directed at a sunken military craft that disturbs, removes, or injures the sunken craft or the associated contents of the craft. This includes, but is not limited to, the equipment, cargo, contents of the vessel, and the remains and personal effects of the crew and passengers. Mariners are urged to exercise due care when operating in the vicinity of military wrecks, as they can be damaged by both purposeful or inadvertent activities including anchoring, fishing, diving, and other marine activities. Special dangers, such as unexploded ordnance, may also be associated with sunken military craft, and should be considered when operating in these areas. Violations of the SMCA may subject individuals to penalties of up to \$100,000 and to liability for damages. Mariners who witness theft of material from, disturbance of, or damage to a sunken military craft are asked to report it to the nearest Coast Guard unit.

SAFETY NOTICE - NAVIGATIONAL RANGE STRUCTURES ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

The U.S. Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information on GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via e-mail subscription through the USCG Navigation Center website (<https://www.navcen.uscg.gov/gps/status/default.htm>). In addition, the NIS investigates all reports of degradation or loss of GPS and DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: 703-313-5900, webmaster@navcen.uscg.mil or <https://www.navcen.uscg.gov>.

BROADCAST NOTICES TO MARINERS

Broadcast Notices to Mariners (BNMs) that are still in effect at the date of this publication.

CCGD5 (D5) - 076, 084, 092, 095, 097, 098, 099, 100-21.

Sector Delaware Bay (DB) - 041, 044, 045, 049, 050 thru 055-21.

Sector Maryland-National Capital Region (MD-NCR) - 017, 020, 022, 023-21.

Sector Virginia (VA) - 041-21.

Sector North Carolina (NC) - BNM 212, 250, 364-20, 050, 052, 053, 056, 057, 059, 060, 061, 062, 063, 064, 065, 067, 068, 069, 070-21.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

DISCREPANCIES (FEDERAL AIDS)

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR						
(Temp) ADD	NATIONAL DOCK CHANNEL BUOY 3				CGD01	at 40-41-09.001N 074-02-48.001W
Corrective Action	Green can	Object of Corrective Action			Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

12238	43rd Ed.	01-DEC-17	Last LNM: 01/21	NAD 83		08/21

Advance Notice(s)

NJ – DE - SEACOAST - CAPE MAY TO FENWICK ISLAND – FIVE FATHOM BANK LIGHTED BUOY F – DELAWARE LIGHTED BUOY D – CHANGE RACON TO AIS

On or about the second week in March 2021 the Coast Guard Fifth District will discontinue the RACON at Five Fathom Bank Lighted Buoy F (LLNR 120) and Delaware Lighted Buoy D (LLNR 165) and replace them with an AIS Signal.

Charts: 12200 12214 13003

LNM: 02/21

DE – DELAWARE BAY – PORT MAHON LIGHT – CHANGE

On or about the second week in March 2021 the Coast Guard Fifth District will change Port Mahon Directional Light (LLNR 2345) to Port Mahon Light (LLNR 2345).

Chart 12304

LNM: 02/21

******MD – EASTERN BAY AND SOUTH RIVER – CRAB ALLEY – LITTLE CREEK******

On or about March 16, 2021 the Coast Guard will make the following changed to the aids to navigation marking Crab Alley-Little Creek: Convert: Daybeacon 2 (LLNR 26315) to Lighted Buoy 2 with a flashing 2.5 second red light and maintained from April 1 to December 1. Convert: Daybeacon 6 (LLNR 26325) to Buoy 6 and maintained from April 1 to December 1. Discontinue: Daybeacon 8 (LLNR 26330).

Chart 12270

LNM: 08/21

NC – CAPE HENRY TO PAMLICO SOUND – CURRITUCK SOUND - AIDS TO NAVIGATION CHANGE

On or about the last week in March 2021 the Coast Guard Fifth District will discontinue Lone Oak Channel Light 1 (LLNR 31225) and Wells Creek Light 1 (LLNR 31230). The Coast Guard will no longer discontinue Whale Head Bay Light 1 (LLNR 31170) as proposed. Whale Head Bay Light 1 (LLNR 31170) will be converted to Whale Head Lighted Buoy 1 (LLNR 31170).

Charts: 12204 12205

LNM: 05/21

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

COAST GUARD POLICY ON NOTIFICATION OF PROPOSED CHANGES

The Coast Guard is evaluating changes in aids to navigation as noted in the below articles. Users may provide feedback on the Fifth Coast Guard District Waterway Proposals Data/Feedback Form:

https://www.navcen.uscg.gov/pdf/Inms/D05_Proposal_Feedback_Form.pdf

This section also includes Public Notices for proposed changes to the bridges within the Fifth Coast Guard District with a request for comments as indicated.

LNM: 04/20

NJ – INTRACOASTAL WATERWAY – NJICW - CHANGES IN AID TYPE

The Coast Guard is proposing the following changes to the aids to navigation marking the New Jersey Intracoastal Waterway (NJICW). This action is due to the age and extensive deterioration of the aid's steel piles, the necessity to prevent future hazards to navigation and the inaccessibility to the aids by Coast Guard assets.

The proposed aids are:

Change NJICW Daybeacon 14 (LLNR 35025) to NJICW Buoy 14 (LLNR 35025) Red Nun with yellow triangle ICW mark. Removed when endangered by Ice.

Change NJICW Light 27 (LLNR 35070) to NJICW Lighted Buoy 27 (LLNR 35070) Flashing Green 4 second Light, Green Can with yellow square ICW mark. Removed when endangered by Ice.

Change NJICW Light 47 (LLNR 35170) to NJICW Lighted Buoy 47 (LLNR 35170) Flashing Green 4 second Light, Green Can with yellow square ICW mark. Removed when endangered by Ice.

Change NJICW Light 48 (LLNR 35175) to NJICW Lighted Buoy 48 (LLNR 35175) Flashing Red 2.5 second Light, Red Nun with yellow triangle ICW mark. Removed when endangered by Ice.

Change NJICW Light 52 (LLNR 35195) to NJICW Lighted Buoy 52 (LLNR 35195) Flashing Red 4 second Light, Red Nun with yellow triangle ICW mark. Removed when endangered by Ice.

Change NJICW Light 86 (LLNR 35335) to NJICW Lighted Buoy 86 (LLNR 35335) Flashing Red 4 second Light, Red Nun with yellow triangle ICW mark. Removed when endangered by Ice.

Change NJICW Light 299 (LLNR 36130) to NJICW Lighted Buoy 299 (LLNR 36130) Flashing Green 4 second Light, Green Can with yellow square ICW mark. Removed when endangered by Ice.

Change NJICW Daybeacon 308 (LLNR 36155) to NJICW Buoy 308 (36155) Red Nun with yellow triangle ICW mark. Removed when endangered

by Ice.

Change NJICW Light 463 (LLNR 36670) to NJICW Lighted Buoy 463 (LLNR 36670) Flashing Green 4 second Light, Green Can with yellow square ICW mark. Removed when endangered by Ice.

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at https://www.navcen.uscg.gov/pdf/Inms/D05_LNM_2015_Special_Notice_Waterway_Proposal_Feedback_Form.pdf

Or you may email comments to CGD5Waterways@uscg.mil, or mail comments to:

U.S. Coast Guard Fifth District

LNM: 04/21

******MD – TANGIER SOUND – DAUGHERTY CREEK - CHANGE TO AIDS TO NAVIGATION PROPOSAL******

Due to shoaled conditions in Daugherty Creek, the local coast guard construction tender has been unable to access this waterway to remove the wreckage at Daugherty Light 5 (LL 23370) which has marked with a lighted wreck buoy. On or about May 10, 2021 an alternate Coast Guard entity will attempt to remove this wreckage. Upon successful removal, the Coast Guard is proposing the following changes to the aids to navigation marking Daugherty Creek:

Discontinue:

Daugherty Creek Daybeacon 3 (LLNR 23365)

Daugherty Creek Lighted Wreck Buoy WR 5 (LLNR 23370)

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at https://www.navcen.uscg.gov/pdf/Inms/D05_LNM_2015_Special_Notice_Waterway_Proposal_Feedback_Form.pdf

MD - UPPER CHESAPEAKE CHANNEL- BUSH RIVER – CHANGE TO AIDS TO NAVIGATION

The Coast Guard is proposing making the following changes to the aids to navigation marking the Upper Chesapeake Channel and Bush River.

Upper Chesapeake Channel:

Discontinue: Shad battery Shoal Buoy 1A (LL 8850)

Discontinue: Taylor Island Shoal Buoy 1 (LL 8855)

Bush River:

Discontinue: Approach River Junction Buoy (LL 27305)

Change: Approach Buoy 2 (LL 27310) to Lighted 2B in approximate position: 39 20 03.616N-76 13 46.160W with a 4nm nominal range flashing

2.5s red light, optic height of 15' and TR dayboards on multi-pile structure.

Change: Approach lighted Buoy 3 (LL 27315) to Light 3 in approximate position: 39 21 02.740N-76 15 06.570W with an optic height of 15' and SG dayboards.

Change: Buoy 4 (LL 27320) to Daybeacon 4 in approximate position: 39 21 23.813N-76 15 15.564 with TR dayboards.

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. ******MD- CHESAPEAKE BAY-SEVERN AND MAGOTHY RIVERS-SEVERN RIVER******

AVAILABILITY OF PRELIMINARY PUBLIC NOTICE D05PPN-12-2021

All interested parties are notified that the Commander, Fifth Coast Guard District has received a proposal from the Anne Arundel Department of Public Works with plans for modification of an existing highway, fixed bridge over a navigable waterway of the United States.

WATERWAY AND LOCATION: Magothy River, mile 7.0, at Severna Park, MD

CHARACTER OF WORK: The proposed project is to rehabilitate the bridge and work will consist of replacing the superstructure and widening the existing three span steel beam bridge. The purpose of the project is to improve the structural integrity of the existing bridge to provide travel safety and traffic operations on Magothy Bridge Road.

The existing fixed bridge has a horizontal clearance of 50 feet and a vertical clearance of 11 feet above mean high. The replacement bridge will be a fixed bridge with a horizontal clearance of 50 feet and a vertical clearance of 11 feet above mean high water.

A copy of Preliminary Public Notice D05PPN-12-2021, which describes the proposal in detail, can be obtained by calling (757) 398-6227 or by viewing at <https://www.navcen.uscg.gov/?pageName=pnBridges>. Comments on this proposal should be forwarded to the address in the notice no later than 12 March 2021.

Chart 12282

LNM: 08/21

VA – CHINCOTEAGUE INLET – VIRGINIA INSIDE PASSAGE– CAT CREEK

All interested parties are notified that the Commander, Fifth Coast Guard District has received a proposal from the National Aeronautics and Space Administration with plans for the replacement of an existing highway fixed bridge with a new fixed bridge over a navigable waterway of the United States.

WATERWAY AND LOCATION: Cat Creek, mile 1.0, at Accomack, VA.

CHARACTER OF WORK: The proposed project is to replace the existing Wallops Island Causeway highway fixed bridge with a fixed bridge. The purpose of the project is to maintain the safety of the travelling public and replace a bridge design that is no longer considered acceptable, eliminating the need for increasingly costly bridge repairs.

The existing fixed bridge has a horizontal clearance of 60 feet and a vertical clearance of 40 feet above mean high water. The new fixed bridge will have a horizontal clearance of 60 feet and a vertical clearance of 12.8 feet above mean high water.

A copy of Public Notice D05PPN-01-2021, which describes the proposal in detail, can be obtained by calling (757) 398-6587 or by viewing at <https://www.navcen.uscg.gov/?pageName=pnBridges>. Comments on this proposal should be forwarded to the address in the notice no later than March 19, 2021.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

VA - ATLANTIC OCEAN - WALLOPS ISLAND ROCKET LAUNCHES

Rocket launches are regularly scheduled in the vicinity of Wallops Island, VA, Danger Zone 334.130. Prior to these launches, visual signals will be displayed consisting of either a large orange-colored, "blimp-shaped" balloon by day or a rotating alternately red and white beacon by night. The balloon will be flown from a position at 37-50-38N, 75-28-47W and the beacon will be displayed approximately 200 feet above mean high water in position 37-50-16N, 75-29-07W. While the warning signal is displayed, all persons and vessels in the Danger Zone, except vessels entering or departing Chincoteague Inlet, shall leave the zone promptly by the shortest possible route and remain outside the zone until allowed by a patrol boat to enter or the danger signal has been discontinued. Vessels entering or departing Chincoteague Inlet must take the shortest route possible upon display of the danger signal. The Danger Zone is depicted on navigational charts 12210 and 12211 with corner points starting in the vicinity of Assawoman Inlet and proceeding southerly to position 37-43-20N, 075-29-41W; thence northeasterly to a point in the vicinity of Chincoteague Shoals; thence westerly back to Wallops Island shoreline.

****VA – CHESAPEAKE BAY – CAPE CHARLES TO NORFOLK HARBOR - JOINT EXPEDITIONARY BASE LITTLE CREEK FORT STORY – LIVE FIRING****

Live firing is conducted continuously off Joint Expeditionary Base Little Creek in Danger Zone 334.370, the area west of the south end of the Chesapeake Bay Bridge Tunnel, bounded by the following positions: 36-55-24N 76-08-43W, 36-55-50N 76-08-37W, 36-57-16N 76-08-14W, 36-57-16N 76-08-14W, 36-56-58.5N 76-07-11W, 36-57-07N 76-07-44W. Firing is conducted Monday through Friday from 7:00 am to 8:00 pm. For questions contact Range Operations and Training Area, Mr. Assaf or Ms. Lawrence at 757-422-7103/7101.

Charts: 12222 12254

VA - WILLOUGHBY BAY - THIMBLE SHOAL CHANNEL - HELICOPTER AIRBORNE MINE COUNTERMEASURES OPERATIONS

Helicopter Mine Countermeasures Squadron Fourteen (HM-14) routinely conducts airborne mine countermeasures (AMCM) operations utilizing the MH-53E helicopter at low altitudes over the following inland and coastal waterways:

- Willoughby Bay
- Thimble Shoal Channel from the Naval Station Norfolk piers to the Chesapeake Bay Bridge Tunnel.
- An area of the Chesapeake Bay, adjacent to the Thimble Shoal Channel from Thimble Shoal to the Chesapeake Bay bridge tunnel extending to the

VA - WILLOUGHBY BAY - THIMBLE SHOAL CHANNEL - HELICOPTER AIRBORNE MINE COUNTERMEASURES OPERATIONS

north four miles to form a four by seven mile rectangle. During these operations, the aircraft will be operating at altitudes as low as seventy-five feet and will produce localized winds in excess of 125 miles per hour. Rotor wash produced winds pose a considerable hazard to vessels, especially sailing vessels. The devices the helicopters tow range in size and appearance from a large orange and white sled approximately the size of a pick up truck to slightly submerged steel pipes thirty feet in length, both of which have submerged cable extending well beyond the visible portion of the towed device. The Aircraft Commanders have been directed to exercise every effort to conflict and avoid surface vessels. All mariners are requested to remain well clear of the helicopters, the towed devices, and the area extending directly behind the aircraft for four hundred yards. Do not approach or cross the area directly behind the towed device as a submerged hazard exists regardless of whether the device is in motion or stationary. These operations involve large naval helicopters at flight altitudes of 100 feet or less, towing surface and sub-surface devices at speeds up to 25 knots. Helicopters may be identified by a rotating amber position light on centerline of main hull flashing 90 times per minute. An area of hurricane-force winds exists within a 250-foot radius around these helicopters, sufficient to blow people and objects from exposed decks and capsize small craft. The towed devices may be completely invisible and include large cables on or just below the surface streaming up to 1200 feet behind the aircraft. AMCM helicopters will transit to and from the area described above in the following manner: Outboard from the seaplane ramp at the Norfolk Naval Air Station across Willoughby Bay to the main shipping channel, then easterly along the main channel to Buoy 21. From Buoy 21 either East, SE or SSE to the operating area. The return flight will follow the same path as the outbound flight. To minimize the potential for mishap, vessels are requested to remain well clear of these danger zones when AMCM operations are encountered. Charts: 12200 12205 12221 12222 12245 12254

VA -YORK RIVER – U.S. NAVAL WEAPONS STATION - CHEATHAM ANNEX - SMALL ARMS LIVE FIRE DANGER ZONE

A Danger zone has been established within an area beginning at Mean High Water on the shore at the U.S. Naval Weapons Station, Cheatham Annex facility on the York River, located at 37° 17' 33.10"N, 076° 36' 19.06" W; then northeast to a point on the York River at 37° 18' 36.650"N, 076° 34' 39.010"W, thence south, southeast to 37° 17' 59.37"N, 076° 34' 13.65"W; then southwest to a point on the shore located at 37° 17' 26.750"N, 076° 36' 14.890"W. Vessels may transit this area at anytime; however, no vessel shall anchor, fish or conduct any waterborne activities within the Danger Zone established in accordance with this regulation any time live firing exercises are being conducted. Any time live firing is being conducted a red flag will be displayed in a conspicuous location along the shore to signify the range is active. At night, red lights will be displayed. Chart 12241 LNM: 37/20

VA - VIRGINIA CAPES OPERATING AREA (VCOA) - PERMANENT MINE WARFARE TRAINING FIELDS

The U.S. Navy has established four permanent mine warfare training fields within the Virginia Capes Operating Areas. The bounding coordinates for each field are as follow: AREA A: 37-09.0N 075-31.0W, 37-09.0N 075-34.7W, 37-12.0N 075-31.0W, 37-12.0N 075-34.7W. AREA B: 36-29.0N 075-31.8W, 36-29.0N 075-35.5W, 36-26.0N 075-35.5W, 36-26.0N 075-31.8W. AREA C: 36-29.0N 075-20.8W, 36-29.0N 075-24.5W, 36-26.0N 075-24.5W, 36-29.0N 075-20.8W. AREA D: 36-46.5N 075-47.8W, 36-46.5N 075-46.5W, 36-47.5N 075-46.5W, 36-47.5N 075-47.8W. Each area contains inert bottom and moored training mines that pose a potential hazard to dredging operations and trawler nets. All moored mines are placed at a minimum of 40 feet depth (MLLW) to preclude them as hazards to navigation. Chart 12200

VA - COASTAL - STATE MILITARY RESERVATION, CAMP PENDLETON, VIRGINIA BEACH - SMALL ARMS LIVE FIRE SCHEDULE

The Camp Pendleton State Military Reservation Live Fire Small Arms Range described as "all of the waters seaward of the mean high water shore line within a sector between radial lines extending 13,500 yards seaward and bearing 090 degrees true and 150 degrees true, respectively, from a point on shore at 36° 49' 09"N, 075° 58' 45"W". All vessel operators are reminded to review Navigation Regulations as described in paragraph 334.380 of Chapter 2, of U.S. Coast Pilot 4, Atlantic Coast: Cape Henry to Key West (42nd) Edition when operating south of the entrance to the Chesapeake Bay. Firing will take place only during daylight hours and red flags will be displayed at conspicuous locations on the beach at the facility. Vessels shall proceed through the area with caution and shall remain in the area no longer than necessary for transit. Charts: 12205 12207 12221

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted twenty-four (24) hours a day seven (7) days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

******NJ - NC - RIGHT WHALE SLOW ZONE******

NOAA Fisheries announces a voluntary vessel speed restriction zone under the right whale slow zone program. Acoustic detections occurred on February 18, southeast of Atlantic City, NJ where an aggregation of right whales were detected. The southeast of Atlantic City, NJ slow zone is in effect through March 8, 2021. Mariners are requested to route around this zone or transit through at ten knots or less. Information about voluntary vessel speed restrictions can also be found at www.nmfs.noaa.gov/pr/shipstrike <<http://www.nmfs.noaa.gov/pr/shipstrike>> . Two slow zones are currently in effect: The Atlantic City slow zone is bounded by: 39 degrees 25 minutes north Latitude 38 degrees 44 minutes north latitude, 073 degrees 44 minutes west Longitude, 074 degrees 36 minutes west longitude. The Southeast of Atlantic City, NJ Slow Zone is bounded by: 38 degrees 59 minutes North latitude, 38 degrees 19 minutes North latitude, 074 degrees 34 minutes West longitude, 073 degrees 26 minutes West longitude. See Enclosure 8. Chart 12200 LNM: 06/21

NJ – NJICW - MANASQUAN RIVER TO CAPE MAY CANAL, POINT PLEASANT CANAL – BRIDGE MAINTENANCE

NJ – NJICW - MANASQUAN RIVER TO CAPE MAY CANAL, POINT PLEASANT CANAL – BRIDGE MAINTENANCE

Mariners are advised that the New Jersey Department of Transportation has requested a temporary deviation to perform maintenance on the State Route 88 Bridge across the Point Pleasant Canal, NJICW mile 3.0, at West Point Pleasant, NJ. To facilitate maintenance, the above bridge will be maintained in the closed-to-navigation position from 7:00 a.m. on February 1, 2021, to 5 p.m. on March 5, 2021. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies. The bridge has a vertical clearance of 31 feet above mean high water in the closed-to-navigation position. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.5. Mariners should use extreme caution when transiting the area.

Chart 12324

******NJ - LITTLE EGG HARBOR TO CAPE MAY - BEACH THOROFARE – BRIDGE MAINTENANCE******

Mariners are advised that an engineering firm, on behalf of New Jersey Department of Transportation, will be performing maintenance at US 30 (Absecon Boulevard) bridge, over New Jersey Intracoastal Waterway (NJICW), Beach Thorofare, at mile 67.2, in Atlantic City, NJ. The maintenance that began in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through March 5, 2021. Work will consist of repair and rehabilitation of the bridge fender system. A material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 30 feet due to work floats located inside the navigational channel for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge, if at least a 2-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel upon request. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners should use extreme caution when transiting the area.

******NJ - LITTLE EGG HARBOR TO CAPE MAY - BEACH THOROFARE – BRIDGE MAINTENANCE******

Mariners are advised that an engineering firm, on behalf of New Jersey Department of Transportation, will be performing maintenance at Atlantic City Highway Bridge, over New Jersey Intracoastal Waterway (NJICW), Beach Thorofare, at mile 69.0, at Atlantic City, NJ. The maintenance will be conducted from 5 a.m. to 6 p.m.; Monday-Saturday; from February 22, 2021, through May 10, 2021. Work will consist of repair and rehabilitation of the bridge fender system. A flex-float barge, a work vessel, and dive boat be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 40 feet due to a flexi-float barge located inside the navigational channel for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge, if at least two hours notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel upon request. Work vessels and barges may be reached on VHF-FM channel 13. Mariners should use extreme caution when transiting the area.

PA/NJ – PHILADELPHIA AND CAMDEN WATERFRONT – SCHUYLKILL RIVER - BRIDGE MAINTENANCE

Mariners are advised that an engineering firm, on behalf of Pennsylvania Department of Transportation, will be performing maintenance on the SR 3021 (Grays Ferry Avenue) Bridge, across the Schuylkill River, mile 5.5, at Philadelphia, PA. The maintenance which began October 2020, will continue to be conducted from 7 a.m. to 3:30 p.m., Monday-Friday, through May 31, 2021. A 30-foot crane barge, 26-foot work boat and divers will be located in and around the vicinity of the bridge. During bridge maintenance, one navigation span will be occupied and not available for navigation and the other navigation span will be open for vessels to transit. The west navigation span provides 75 feet of horizontal clearance and the east navigation span provides 65 feet of horizontal clearance. Vessels may transit the open navigation span with caution, due to potential opposing vessel traffic. The crane barge and work vessel may be reached on VHF-FM channel 13. The project foreman may be reached at (609) 313-0597 or (609) 209-2029. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway.

******VA-MD – CHESAPEAKE BAY – HYDROGRAPHIC SURVEY******

Commencing on or about March 11, 2021 and continuing through June 2021 the R/V Oyster Bay II will be conducting hydrographic survey operations in the waters of Southern and Central Chesapeake Bay, VA. Survey operations in the waters of Southern Chesapeake Bay, VA will be conducted in the waters east of Mobjack Bay, VA and eastward of Horn Harbor, VA bounded from approximately 37° 27' 29"N / 076° 09' 08"W to the northeast and 37° 15' 07"N / 076° 19' 35"W to the southwest. Additionally hydrographic survey operations will be conducted in the waters of Central Chesapeake Bay bounded from approximately 38° 41' 24"N / 076° 02' 57"W to the northeast and 38° 25' 57"N / 076° 32' 01"W to the southwest. Survey operations include the Choptank River eastward to the Choptank River Bridge.

The R/V Oyster Bay II is a 30', Aluminum hulled survey vessel. The vessel is equipped over the side sonar mounts and sonars. The vessel will primarily be conducting operations between 0500 hours and 2000 hours. The R/V Oyster Bay II will maintain watch on VHF channels 13 and 16. There may be occasional unmanned aerial aircraft (Drone) activities conducting photogrammetry within the survey area. Leidos requests that all vessels give the R/V Oyster Bay a wide berth in order to avoid interfering with surveying operations. Please direct any questions you may have to Paul L. Donaldson at 401-848-4757.

VA – OFFSHORE – COASTAL VIRGINIA OFFSHORE WIND AREA – SURVEYS

Coastal Virginia Offshore Wind Commercial (CVOV Commercial) Project will continue geotechnical operations within Lease OCS-0483 and the cable route corridor for Jan 16th to Apr 01st. The vessels R/V Minerva Uno, MV Go Discovery, and the MV Kommandor Stuart will be conducting high resolution geophysical data collection across the lease area in support of the project. The survey vessels will be mapping the seabed with hull-mounted sensors as well as towed sensors. The vessels will be restricted/limited maneuverability with equipment in tow up to 1000 feet to the stern of the vessels. The masters requests a CPA of 0.5 – 1.0 mile to accommodate operations. All vessels will be monitoring VHF 16 & 13. Operating concurrently, the vessels Geoquip Speer, Dina Polaris, and Geoquip Saentis will be operating within lease area and the cable route corridor conducting soil samples, cone penetration testing and PS logging form now to May 31, 2021. Vessel will be showing restricted maneuverability lights during hours of darkness and identified on AIS and All vessels will operate in DP2. All vessels will be monitoring VHF 16 & 13. See Enclosure 7.

VA - OYSTER CREEK CHANNEL – DREDGING

Dredgit Corporation will begin dredging Oyster Creek Channel, in Oyster VA, beginning on 15FEB2021, to be completed by 12APR2021. Operations will be 24 hours per day, 7 days per week and will start in vicinity of Oyster Boat Ramp working eastward to 37-17-23.83N, 075-54-33.73W. equipment will consist of a 12" Cutter Suction Dredge "Lady Diana", 25' Tender boat, 22' Carolina Skiff, approx. 4200' of 12" floating HDPE pipeline with lights/markers. All vessels will be monitoring VHF Channel 68 (working); 13 and 16 (emergency).

Vessels need to exercise extreme caution when navigating near and around the dredge. All Mariners should consider the dredge area a NO WAKE ZONE. Mariners are urged to use extreme caution and transit the dredge area at their slowest safe speed to create minimum wake. The dredge typically allows passage on the dredge's starboard side, but this may not always occur during some movements. Mariners are encouraged to utilize the vessels navigational aids, navigational lights and day shapes to determine safest passage. The dredge pipeline will be clearly marked with floats and amber blinking lights. For more information, contact Chris Kahn at 337-519-6032.

******VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION - HAZARD******

Construction on the North Island of the Hampton Roads Bridge Tunnel has begun and 27 steel poles will be installed around the North Island that are 6 inches in diameter and extending vertically out of the water 3 to 8 feet. The steel poles will be marked with flashing white lights and retroreflective tape. Mariners shall use caution when transiting in vicinity of the North Island of the HRBT. For more information or question, contact the Hampton Roads Connector Partners at 757-373-4799.

******VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION******

The Hampton Roads Connector Partners has begun construction on the west side of the project corridor running parallel with the Hampton Roads Bridge Tunnels starting at the north side at the Hampton land side extending to the south side at the Willoughby land side. There will be at any given time several crane barges along with several material barges as well as the tugs Uncle Mike, Robert T, Angelina Autumn, Miss Morgan and the Seaward 8, Seaward 9 and the Seaward 12. The following crew boats will be on site Seaward 10, Seaward 5, and the Brittany Lynn along with several outboard motor type safety vessels. All job site vessels will be standing by on VHF channels 13 & 16. All barges will be lighted at night by solid white lights on their four corners. All floating mooring buoys shall be lighted with flashing white lights. All mooring piles will be lighted at night with solid white lights on each pile. All mariners when in the vicinity of the job site and approaching or leaving the area of operations, should remain a safe distance away from all buoys and or mooring piles. Safe distances shall also be maintained from the mooring zones in Willoughby Bay and Hampton Flats. This notice to mariners will be updated as needed as the project proceeds. For more information or questions contact Shannon Gresham 757-685-3392, Kareem Myers 757-256-9715

VA – ELIZABETH RIVER SOUTHERN BRANCH – MONKEY POINT – DREDGING

Mariners are advised that beginning March 8, 2021, ARGOS US will be conducting Dredging operations in the vicinity of Money Point, VA on the Elizabeth River. Operations will be on going 24 hours per day, 7 days per week through April 5, 2021. Vessels involved include: tug CAPT. WOODY, call sign WDG-2789; tug EMMY LOU, call sign WDK-9403; dredge MOBRO 112, call sign WDL-3073. All Mainers should consider the dredge area a NO WAKE ZONE and are urged to use extreme caution and transit the dredge area at their slowest safe speed to create minimum wake. The dredge typically allows passage on the dredge's starboard side, but this may not always occur during some movements. Mariners are encouraged to utilize the vessels navigational aids, navigational lights and day shapes to determine safest passage. Any dredge pipeline will be clearly marked with floats and amber blinking lights. Concerned Traffic may contact tugs monitoring VHF-FM Channel 18 (working); 13 and 16 (emergency).

VA – CHESAPEAKE – ALBEMARLE AND CHESAPEAKE CANAL - BRIDGE CONSTRUCTION

W. F. Magann Corporation, on behalf of the City of Chesapeake, will begin the repair of the Centerville Turnpike Bridge located on the Atlantic Coast Intracoastal Waterway – Albemarle and Chesapeake Canal (mile marker 15.2, 36° 43.417'N, 076° 11.183'W. Work is expected to be completed September 1, 2021. Work may be conducted 7 days a week from 5 a.m. to 12 a.m. during the scheduled rehabilitation, a crane barge, material barge, tugboat, work boats and divers will be near the bridge. During certain phases of the rehabilitation, the tugs, barges, work vessels and divers will reduce the horizontal clearance in the navigation span. Vessels that require the tugs, barges and work vessels to clear the navigation span should notify the project supervisor no less than one hour prior to navigation through the bridge. During dive operations within the navigational span, navigation will be on demand and vessels should notify the project foreman no less than one hour prior to navigation through the bridge. Work vessels and supervisor can be reached on VHF-FM channel 13 or (757) 353-7480. In the event of an emergency, please contact Nick Scribner (757) 342-9510. Mariners are reminded to maintain a safe distance from the working vessels and barges and are asked to use extreme caution while navigating through the area.

******NC – OREGON INLET – BONNER BRIDGE – NAVIGATION SPAN – CONSTRUCTION******

Demolition crews are continuing working near Bonner Bridge in Oregon Inlet, NC. Workers and equipment will be present in, around bent 37, and between bents 24-25 of the Bonner Bridge demolition project. Oregon Inlet has significant shoaling in between Oregon Inlet Lighted Buoy 6 (LLNR 28003) and Oregon Inlet Buoy 7 (LLNR 28005). Mariners should follow the aids to navigation closely and stay clear of demolition Work areas. Mariners are requested to transit at no wake speeds and use extreme caution in this area during work hours. Crane barges will be secured in place with four anchors connected by anchor wires to the corners of the barge. The anchor locations will be marked with yellow crown buoys within an approximate 500-ft radius of the crane barge. Mariners should be aware that anchor wires may be at or just above/below the water surface between the barges and crown buoys; therefore vessels should stay on the outboard side of the crown buoys. The NCDOT Resident Engineer may be contacted at (252) 473-3637 and PCL Civil Constructors may be contacted at (252) 423-3093. Project information may be found at <http://www.ncdot.gov/projects/bonnerbridgereplace/>.

******NC – OREGON INLET – BONNER BRIDGE – SAFETY ZONE******

33CFR165.T05-1065 Safety Zone; Oregon Inlet, Dare County, NC.

(a) Location. The following area is a safety zone: all navigable waters of Oregon Inlet, within 100 yards of active demolition work and demolition equipment, along the old Herbert C. Bonner Bridge, which follows a line beginning at approximate position 35°46'47"- N, 75°32'41"- W, then southeast to 35°46'37"- N, 75°32'33"- W, then southeast to 35°46'09"- N, 75°31'59"- W, then southeast to 35°46'03"- N, 75°31'51"- W, then southeast to 35°46'01"- N, 75°31'40"- W (NAD 1983) in Dare County, NC.

(b) Definitions. As used in this section- Designated representative means a Coast Guard Patrol Commander, including a Coast Guard commissioned, warrant, or petty officer designated by the Captain of the Port North Carolina (COTP) for the enforcement of the safety zone. Captain of the Port means the Commander, Sector North Carolina. Demolition crews means persons and vessels involved in support of demolition.

(c) Regulations. (1) The general regulations governing safety zones in §165.23 apply to the area described in paragraph (a) of this section.

(2) With the exception of demolition crews, entry into or remaining in this safety zone is prohibited.

(3) All vessels within this safety zone when this section becomes effective must depart the zone immediately.

(4) The Captain of the Port, North Carolina can be reached through the Coast Guard Sector North Carolina Command Duty Officer, Wilmington, North Carolina at telephone number 910-343-3882.

(5) The Coast Guard and designated security vessels enforcing the safety zone can be contacted on VHF-FM marine band radio channel 13 (165.65 MHz) and channel 16 (156.8 MHz).

******NC – OREGON INLET – BONNER BRIDGE – SAFETY ZONE******

- (d) Enforcement. The U.S. Coast Guard may be assisted in the patrol and enforcement of the safety zone by Federal, State, and local agencies.
- (e) Enforcement period. This regulation will be enforced from March 4, 2019, through March 30, 2020.
- (f) Public notification. The Coast Guard will notify the public of the active enforcement times at least 48 hours in advance by transmitting Broadcast Notice to Mariners via VHF-FM marine channel 16.

Chart 12205

******NC – NEW RIVER – CAMP LEJEUNE – POSSIBLE HAZARDS TO NAVIGATION******

Mariners traveling on the western side of the New River between Stone Bay and Farnell Bay should be aware that there are numerous sign poles without working lights and are leaning or submerged as a result of Hurricane Florence and present hazards to navigation. These poles once had signs denoting areas of caution around the Stone Bay Rifle Range and Verona Loop Firing Ranges. Signs are located along the Stone Bay, Grey Point and Farnell Bay sectors of the New River. Marine Corps Base Camp Lejeune is working to replace these signs.

Charts: 11542 11543

NC – CAPE FEAR RIVER – OBSTRUCTION

There is an underwater obstruction in the Cape Fear River in Wilmington, NC. The object is on the east side of the navigable channel, north of the battleship, in approximate position 34°14'31.3"N 077°57'12.3"W. Mariners are advised to use caution while navigating in this area.

Chart 11537

LNM: 40/20

NC - CAPE FEAR RIVER - CAPE FEAR MEMORIAL BRIDGE – BRIDGE MAINTENANCE

Mariners are advised that the highway drawbridge – Cape Fear Memorial Bridge over the Cape Fear Rive, mile 26.8, at Wilmington, NC, will be maintained in the closed-to-navigation position and will require a two hour advance notice to open from 8 a.m. to 3 p.m. from March 2, 2021, through March 3, 2021, with an alternative work date from 8 a.m. to 3 p.m. on March 4, 2021. There is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The bridge provides a vertical clearance of 65 feet above mean high water in the closed position. Vessels able to pass through the bridge in the closed position during these closure periods may do so at any time. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.822. Mariners should adjust their transits accordingly and should use caution when transiting the area.

Chart 11541

NC – INTRACOASTAL WATERWAY – BROWNS INLET – SHOALING

Shoaling exists in the Atlantic Intracoastal Waterway near Browns Inlet Crossing between Bogue Sound - New River Buoy 60 (LLNR 39217) and Bogue Sound - New River Buoy 61A (LLNR 39223), to less than one foot at MLW. Mariners are advised to use extreme caution. NC BNM 372-20
Charts 11541

NC – NEUSE RIVER TO MYRTLE GROVE SOUND - NEW RIVER – NEW RIVER INLET CROSSING

Shoaling in New River Inlet Crossing near Bogue Sound - New River Buoy 72A (LLNR 39300) to a depth of 3 feet MLW. NC BNM 011-19
Chart 11542

NC NEW RIVER – CAPE FEAR RIVER – MASON INLET CROSSING – SHOALING

Mariners are advised that shoaling exists in the Intracoastal Waterway in the vicinity of Masons Inlet Crossing between New River – Cape Fear River Buoys 121 (LLNR 39597) and New River – Cape Fear River Buoys 122A (LLNR 39601), to a depth of less than two feet at mean low water. Mariners are advised to use extreme caution while navigating this area. NC BNM 026-21.
Chart 11541

NC – BANKS CHANNEL – SHOALING

USACE Surveys revealed significant shoaling in Banks Channel to a depth of 1 ft MLW. Banks Channel Light 1 (LLNR 30050) to Banks Channel Daybeacon 3 (LLNR 30065), Daybeacon 9 (LLNR 30085) to Banks Channel Daybeacon 9A (LLNR 30090), Banks Channel Light 11 (LLNR 30095) to Banks Channel Daybeacon 12 (LLNR 30100) and Banks Channel Daybeacon 21 (LLNR 30135) to Banks Channel Buoy 22 (LLNR 30137).
Chart 11541

NC - SNOWS CUT - SHOALING

Shoaling exists in Snows Cut to a depth of 4 feet at mean low water in various locations between New River – Cape Fear River Buoy 162 (LLNR 39757) and New River - Cape Fear River Lighted Buoy 163 (LLNR 39825). Mariners are advised to use caution while navigating this area. NC BNM 293-19
Chart 11534

NC - SNOWS CUT - SHOALING

Shoaling has been observed near New River - Cape Fear River LT 168 (LLNR 39857) depths as low as 3FT MLW encroach from the northern edge of the channel extending into the channel. SEC NC BNM 375-20
Chart 11534

NC – LOCKWOODS FOLLY INLET – SHOALING

Significant shoaling exists in Lockwoods Folly Inlet to a depth of less than 2 feet at mean low water between Cape Fear River - Little River Buoy 47A (LLNR 40230) and Cape Fear River - Little River Buoy 47 (LLNR 40225). Multiple aids to navigation are unreliable and not marking good water. Mariners are advised to use extreme caution while navigating this area. SEC NC BNM 033-21
Chart 11534

NC – NEW RIVER - CAPE FEAR RIVER – SHOALING

Shoaling found near New River - Cape Fear River Buoy 99 (LLNR 39547) and New River - Cape Fear River Buoy 99A (LLNR 39548). Depths as low as 4 feet at MLW were observed. SEC NC BNM 140-20
Chart 11541

NC – INTRACOASTAL WATERWAY – CAPE FEAR RIVER – LITTLE RIVER – SHALLOTTE INLET CROSSING – SHOALING

Shoaling has been observed between Cape Fear River – Little River Buoy 80A (LLNR 40337) and Cape Fear River – Little River Buoy 82 (LLNR 40345) to 4 feet MLW encroaching from the southeast edge of the channel extending into the Intracoastal Waterway. NC BNM 408-20

SUMMARY OF BRIDGE PERMITS, REGULATIONS AND CONSTRUCTION IN THE FIFTH COAST GUARD DISTRICT

(Yellow indicates new item)

CURRENT PROJECTS

Permits:

SECTOR DELAWARE BAY

- **Delaware**
Christina River – Christina River Bridge – Permit (1-17-5) signed April 7, 2017, for a fixed bridge across the Christina River, mile 3.8, City of Wilmington, New Castle County, DE. The bridge will provide a minimum vertical clearance of 14 feet above mean high water and a horizontal clearance of 150 feet centered on the axis of the navigable channel. (KB)
- **New Jersey (Central & Southern)**
Oldmans Creek – US Route 130 Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 15, 2018; vertical clearance of 5 feet above mean high water and a horizontal clearance of 75 feet. (HP)
Raccoon Creek – US 130 (fixed) Bridge - new fixed bridge structure to replace (lift) bridge. Permit (2-15-5) signed December 9, 2015. (KB)
Glimmer Glass - W9 (Brielle Road) Drawbridge – Fixed bridge replacement and drawbridge replacement Preliminary Navigation Clearance Determination (PNCD) issued on October 22, 2019. A fixed bridge replacement will provide a horizontal clearance of 31.9 feet and a vertical clearance of 60 feet above mean high water and a drawbridge replacement will provide a vertical clearance of 9 feet above mean high water in the closed position, unlimited vertical clearance in the open position and a horizontal clearance of 31.9 feet. (MS)
Atlantic Intracoastal Waterway, Middle Thorofare - Ocean Drive Causeway Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 10, 2019; vertical clearance of 80 feet above mean high water and a horizontal clearance of 80 feet. (MB)

- **Pennsylvania**
Schuylkill River – Grays Ferry Pedestrian Bridge – Permit (3-17-5) signed November 27, 2017, for a swing drawbridge replacement with a vertical clearance of 26 feet above mean high water (closed position), unlimited vertical clearance in the open position, and a horizontal clearance of 75 feet in the west navigation span and 65 feet in the east navigation span. (MT)
Darby Creek – S.R. 420 (Wanamaker Avenue) - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 13, 2018; vertical clearance of 11 feet above mean high water and a horizontal clearance of 78 feet. (MT)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland** –
Potomac River – Governor Harry Nice Memorial Bridge – Permit (1a-20-5) signed June 25, 2020, for a fixed replacement bridge with a vertical clearance of 135 feet above mean high water and a horizontal clearance of 250 feet. The center of the main navigation span of the new bridge will be shifted approximately 115 feet to the west of the center of the current navigation span. (KB)
Neale Sound – MD-254 (Cobb Island Road) Bridge – Permit (1-18-5) signed May 2, 2018, for a fixed replacement bridge with a vertical clearance of 20 feet above mean high water and a horizontal clearance of 55 feet. (HP)
- **Washington DC** –
Anacostia River – Frederick Douglass Memorial Bridge - Permit (2-17-5) signed December 4, 2017, for a fixed bridge replacement with a vertical clearance of 42 feet above mean high water and a horizontal clearance of 150 feet. (MB)

- **Virginia (Northern)** – None.

SECTOR VIRGINIA

- **Virginia (Southern)**
Western Branch of the Elizabeth River – Churchland Bridge - Permit Amendment (53b-73-5) signed May 1, 2019, for a fixed bridge replacement of the northbound structure of the bridge with a structure providing a vertical clearance of 36.63 feet above mean high water and a horizontal clearance of 80 feet. (MS)
Hampton Roads – Permit (5-20-5) signed November 16, 2020, for a fixed bridge replacement of I-64/US 60 (Hampton Roads Beltway) north and south approach bridges for the Hampton Roads Bridge Tunnel (HRBT). North Approach bridge – vertical clearance of 16 feet above mean high water and horizontal clearance of 80 feet; south approach bridge – vertical clearance of 16 feet above mean high water and horizontal clearance of 100 feet. (MT)
Willoughby Bay – Permit (148b-68-5) signed December 22, 2020, for I-64/US 60 (Hampton Roads Beltway/Willoughby Bay) Bridge - fixed bridge modification; vertical clearance of 25 feet above mean high water, horizontal clearance of 50 feet, and width of 168.84 feet (MT)
Blackwater River - Permit (4-20-5) signed July 29, 2020, for a fixed bridge replacement providing a vertical clearance of 35 feet above mean high water and a horizontal clearance of 60 feet. (MS)

Schuylkill River -

All interested parties are notified that an application dated October 8, 2020, has been received from the City of Philadelphia by the Commander, Fifth Coast Guard District, for approval of the location and plans for construction of a new pedestrian fixed bridge over a navigable waterway of the United States.

WATERWAY & LOCATION: Schuylkill River, between mile 6.3 & 6.4, at Philadelphia, PA.

CHARACTER OF WORK: The proposed project is to construct a 3,380-foot long multi-use recreational trail along the eastern bank of the Schuylkill River between Christian Street and University Avenue (2,730 feet along the river and 700 feet connection to the neighborhood). The northern and southern limits of the proposed trail extension will be constructed on the land along the bank of the river, while the middle section of the proposed trail will be a new bridge built over water. The pedestrian bridge (at span 11) will be constructed over the Veolia Peltz Street dock on an alignment that positions the bridge landward of the face of the dock. The proposed construction is an extension of the existing multi-use Schuylkill River Trail. The purpose of the project is to provide the public a safe and efficient recreational facility along the Schuylkill River waterfront within the City of Philadelphia.

There is no existing bridge. The new bridge will be a fixed bridge with a horizontal clearance of 268.9 feet in span 8 and a vertical clearance of 14 feet above mean high water in span 8. Note: This bridge has no navigation span (s), given it lies along the east bank of the river and does not cross the navigable waterway. Span 8 provides clearances for vessels to navigate shoreward of the bridge.

A copy of **Public Notice D05PN-11-2020**, which describes the proposal in detail, can be obtained by calling (757) 398-6222 or by viewing at <https://www.navcen.uscg.gov/?pageName=pnBridges>. Comments on this proposal should be forwarded to the address in the notice no later than **November 24, 2020**. (HP)

SECTOR NORTH CAROLINA

- **North Carolina**

Atlantic Intracoastal Waterway – NC 210/50 Bridge, Surf City, NC - new fixed bridge structure to replace (swing) bridge. Permit (2-16-5) signed September 27, 2016. (KB)

The Straits – Harkers Island Bridge – Fixed replacement bridge - Permit (2-20-5) dated September 30, 2020, vertical clearance of 45 feet above mean high water and a horizontal clearance of 125 feet. (HP)

Pamlico Sound – Bridge No. 71 (Rodanthe) Bridge – new fixed bridge carrying NC 12 on the mainland side of the outer bank along the northeastern shore of Pamlico Sound from a position approximately 1.8 miles north of the southern boundary of the Pea Island National Wildlife Refuge to a position north of the Chicamacomico Channel and the emergency ferry terminal in Rodanthe, Dare County, NC. Permit (1-19-5) signed on February 20, 2019. (HP)

Perquimans River – Bridge No. 8 (US17 BUS/NC37) Bridge, Hertford, Perquimans County, NC - new drawbridge to replace existing drawbridge. Permit (6-19-5) signed December 31, 2019. (HP)

Currituck Sound - Preliminary Public Notice D05PPN-04-2020 - Comments closed on **March 24, 2020**. (MS)

Regulations:

SECTOR DELAWARE BAY

- *Delaware* – None
- *New Jersey (Central & Southern)* - None
- *Pennsylvania* – None

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- *Washington, DC & Virginia (Northern)* – None
- *Maryland* – None

SECTOR VIRGINIA

- *Virginia (Southern)* - None

SECTOR NORTH CAROLINA

- *North Carolina* - None

Construction, et al:

SECTOR DELAWARE BAY

- **Delaware**

Christina River - I-95 Bridge - Bridge maintenance will be conducted between Thursday, July 2, 2020, and Monday, March 1, 2021; Mon-Thurs; from 7 a.m. to 5 p.m. The maintenance will require one 30 x 40 foot barge to be anchored parallel to each pier while that pier has maintenance performed. Each span is 80 feet wide, which will leave approximately a 49-foot opening for vessels to pass alongside the barge. All additional spans will retain their 80-foot horizontal openings. The project superintendent may be reached at 484-318-0713. Mariners should use caution when transiting the area. (MB)

Mispillion River - Route 1/ Rehoboth Blvd Bascule Bridge – To facilitate bridge maintenance the bridge will be maintained in the closed-to-navigation position from 7 a.m. on February 15, 2021, to 7 p.m. on February 26, 2021. During bridge closure, no vessel may transit under the bridge in the closed position at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.822. Mariners should adjust their transits accordingly and should use caution when transiting the area. (CT)

New Jersey (Central & Southern)

Delaware River – Commodore Barry (fixed) Bridge – Repainting of the main (cantilever) truss span, signal gantries, steel barriers along the entire bridge, and water tower will continue through 2023. Work platforms will be installed, reducing the available vertical clearance by 3 feet, reducing the clearance from 190 feet to 187 feet above mean high water. Mariners should exercise caution when transiting the area. (KB)

New Jersey Intracoastal Waterway (NJICW), Inside Thorofare - US40-322 (N Albany Ave) Bridge – Bridge maintenance that begun in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through June 30, 2021. Work will consist of repair and rehabilitation of the bridge fender system. A crane barge, a material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 25 feet due to work floats located inside the navigational channel throughout for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge between 11:30 a.m. and 12:30 p.m., if at least a 24-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel to facilitate the safe transit through the bridge of vessels that cannot safely transit the bridge with a reduced horizontal clearance. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners should use extreme caution when transiting the area. (MT)

New Jersey Intracoastal Water (NJICW), Ingram Thorofare - CR 601 (Avalon Blvd) Bridge – Bridge construction will be conducted from September 1, 2019, to May 25, 2021. To facilitate the work, scaffolding will be installed underneath the bridge and will reduce the vertical clearance to 33ft above mean high water. The Project Foreman may be reached on VHF/FM Channel 13. Mariners should use caution when transiting the area. (MS)

Delaware River - Benjamin Franklin Bridge – Bridge maintenance will be performed from July 27, 2020, through December 31, 2024. For the duration of the project, the preferred navigation channel and bridge navigational lighting normally situated over the 410-foot Federal project channel, will be shifted to the east approximately 205 feet. The Federal Project channel will remain fully open to traffic, however the vertical clearance of the channel has temporarily decreased based on the planned scaffolding system (work platform) to be installed. The scaffolding system will be installed over the entire length of the bridge, as detailed below.

Preferred Navigation Channel: A 410-foot scaffolding (work platform) system, with five 82-foot independent work zones, will be installed extending below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet). When in use, a single 82-foot work zone portion of the 410-foot scaffolding (work platform) system will be extended below the bridge approximately 18.5 inches (1.54 feet), thereby reducing the vertical clearance of the bridge within the work zone by approximately 18.5 inches (1.54 feet). The single 82-foot work zone portion of the 410-foot scaffolding (work platform) system in use will be lifted to extend below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet), if at least 48 hours notice is given to Eric.Dovak@Skanska.com.

Outside the Preferred Navigation Channel: Scaffolding will extend below the bridge approximately two feet from the west boundary of the Federal project channel to the center of the Federal project channel (west boundary of preferred navigation channel) and from the east boundary of the preferred navigation channel toward the east abutment approximately 385 feet. West of the west boundary of the Federal project and east of the position approximately 385 feet east of the east boundary of the preferred navigation channel, scaffolding will extend below the bridge approximately three feet.

A safety boat will be in the vicinity of the bridge during bridge maintenance, which may be reached via VHF FM channel 13. Mr. Eric Dovak, contractor's representative, may be reached at Eric.Dovak@Skanska.com or (347) 860-2399. Mariners are advised to exercise caution when transiting the area. (HP)

New Jersey Intracoastal Waterway (NJICW), Beach Thorofare - Route 30 (Absecon Boulevard) Bridge – Bridge maintenance that began in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through February 28, 2021. Work will consist of repair and rehabilitation of the bridge fender system. A material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 30 feet due to work floats located inside the navigational channel for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge, if at least a 2-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel upon request. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners should use extreme caution when transiting the area. (MT)

New Jersey Intracoastal Waterway (NJICW), Middle Thorofare - Two-Mile (CR 621/Ocean Drive) Bridge – Bridge maintenance work hours are from 7 p.m. to 6 a.m., Monday through Saturday, from December 14, 2020, through January 22, 2021, and from 6 a.m. to 6 p.m., Monday through Saturday, from January 23, 2021, through March 14, 2021. From 7 p.m. to 6 a.m., Monday through Saturday, from December 14, 2020, through January 22, 2021, several barges will be placed in the navigation span. The barges will re-locate from the navigation span for the transit of emergency vessels, if at least a two-hour notice is given. From 6 a.m. to noon and 1 p.m. to 6 p.m., Monday through Saturday, from January 23, 2021, through March 14, 2021, the bridge will be maintained in the closed-to-navigation position. During the closure period, a work platform will be installed in the navigation span beneath the bridge and a barge will be placed in the navigation span, which will reduce the vertical clearance of the bridge in the closed position to approximately 20 feet above mean high water and the horizontal clearance to approximately 25 feet. Vessels that are able to safely transit through the bridge in the closed position, with the reduced vertical and horizontal clearances, may do so at any time. Emergency vessels as defined in 33 CFR 117.31 may transit the bridge upon signal, if at least a two-hour notice is given. At all other time the bridge will operate in accordance with 33 CFR 117.733(j).

Work vessels may be reached on VHF-FM channel 13. The bridge tender may be reached at 609-522-2815 and/or VHF-FM channel 13. The project foreman may be reached at 609-579-9253 or 609-820-2983. Mariners should use extreme caution when transiting through the area. (HP)

New Jersey Intracoastal Waterway, Point Pleasant Canal - State Route 88 Bridge - To facilitate maintenance, the above bridge will be maintained in the closed-to-navigation position from 7:00 a.m. on February 1, 2021, to 5 p.m. on March 5, 2021. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies. The bridge has a vertical clearance of 31 feet above mean high water in the closed-to-navigation position. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.5. Mariners should use extreme caution when transiting the area. (MS)

Pennsylvania –

Schuylkill River - Grays Ferry Railroad Bridge - Modification activities that began June 2018, are expected to finish on September 30, 2021.

Work will be performed from 6 a.m. to 5 p.m.; M-F. During this bridge modification project, one navigation span will be occupied; the other navigation span will be open for vessels to transit. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway. The new bridge will have a vertical clearance of 26 feet above mean high water in the closed-to-navigation position, an unlimited vertical clearance in the open position, a horizontal clearance of 75 feet in the western navigation span, and 65 feet in the eastern navigation span. Detailed project information and information concerning the waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins. (MT)

Schuylkill River - SR 3021 (Grays Ferry Avenue) Bridge – Bridge maintenance will be conducted from 7 a.m. to 3:30 p.m., Monday-Friday, from October 26, 2020, through May 31, 2021. A 30-foot crane barge, 26-foot work boat and divers will be located in and around the vicinity of the bridge. During bridge maintenance, one navigation span will be occupied and not available for navigation and the other navigation span will be open for vessels to transit. The west navigation span provides 75 feet of horizontal clearance and the east navigation span provides 65 feet of horizontal clearance. Vessels may transit the open navigation span with caution, due to potential opposing vessel traffic. The crane barge and work vessel may be reached on VHF-FM channel 13. The project foreman may be reached at (609) 313-0597 or (609) 209-2029. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway. (MT)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland**

Severn River - US 50/US 301/SR 2 (John Hanson Highway/Severn River) Bridge - Bridge maintenance will be conducted from 7 a.m. to 3:30 p.m., Monday-Friday, from 7 a.m. on April 16, 2020, through 3:30 p.m. on April 30, 2021. During the maintenance period a work platform will be located beneath the bridge which will reduce the vertical clearance of the bridge to approximately 70 feet above mean high water. The project foreman may be reached at (410) 984-1807 or (443) 506-3756 or (443) 458-8620. Mariners should use caution navigating through the area. (MT)

Lower Potomac River - Harry W. Nice/Thomas "Mac" Middleton (US 301) Bridge – Construction will commence in May 2020, with completion estimated in November 2024. Work is scheduled from 7:00 a.m. to 7:00 p.m., Monday through Saturday, with limited work outside these hours for special operations. To facilitate bridge construction, a barge loading facility will be constructed on the Maryland shore and work trestles will

be located north of the existing bridge extending outward from the Virginia shore to approximately 320 feet and from the Maryland shore to approximately 200 feet. Dredging will occur from the end of the Virginia work trestle until the water depth reaches 6 feet at mean lower low water. A vertical clearance of 135 feet above mean high water and horizontal clearance of 250 feet will be maintained throughout construction. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners and broadcast notice to mariners. Mariners are urged to use caution when transiting the area. (KB)

- **Washington DC**

Anacostia River - Frederick Douglass Memorial (South Capitol Street) Bridge – Bridge construction commenced in the Anacostia River in Washington, DC on April 19, 2018, and will continue into 2022. The work is being conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., with intermittent night work and currently consists of: (1) The temporary West Trestle, which extends from the western shoreline eastward to the center of the federal navigation channel and includes new Bridge Pier 1 and the western portion of the new bridge superstructure. The western half of the federal navigation channel, approximately 150 feet, is currently restricted to navigation. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" that are placed approximately 85 yards (250 feet) upstream of the bridge. (2) The temporary East Trestle, which extends from the eastern shoreline westward to the eastern limit of the federal navigation channel and includes new Bridge Pier 2 and the eastern portion of the new bridge structure. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" with the standard 'Exclusion' diamond symbol that are placed approximately 85 yards (250 feet) upstream of the bridge. The federal navigation channel east of the center pier (eastern half), approximately 150 feet wide, remains available for navigation. To support active construction operations, a vessel/barge may be intermittently positioned within the navigable channel. Mariners intending to transit this area are urged to contact the vessels MS. BECKY or CLAIRE MARIE for passing arrangements. Marine equipment on site includes a crew boat, a push boat, and multiple deck barges. All equipment will be marked and lighted as required by U. S. Coast Guard regulations. Mariners are urged to use extreme caution when transiting the area, and to operate at minimum speed necessary to maintain safe course that minimizes wake near the work site. Interested mariners can contact the vessel MS. BECKY or vessel CLAIRE MARIE via VHF-FM channels 16 and 13 when actively working on the river. (MB)(RH)

- **Virginia (Northern) - None**

SECTOR VIRGINIA

- **Virginia (Southern)**

Lafayette River - US 460 (Granby Street) Bridge – Bridge maintenance which began in September 2020, will continue to be conducted from 7 a.m. to 5:30 p.m.; 7 days a week; through October 8, 2022. A 20-foot safety vessel and work a platform will be in and around the vicinity of the bridge. The work platform will be located underneath the bridge, positioned adjacent to the bridge pier behind the bridge fender system as to not impede the navigational channel. Maintenance vessels will relocate from the navigable channel, upon request. The work vessel may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (757) 920-6454 or (804) 229-1669. Mariners should use caution navigating through the area. (MT)

SECTOR NORTH CAROLINA

- **North Carolina**

Oregon Inlet - Herbert C. Bonner Bridge – Demolition of the old bridge is anticipated to be completed by April 30, 2021. During demolition of the old bridge, the designation of navigation spans and placement of bridge lighting will be changed several times, as reflected below, and provided via updated local notice to mariners and broadcast notice to mariners. Phase 2 (Effective April 24, 2019): The navigation spans are between bridge bents 173 and 176 (old bridge, with no superstructure between bridge bents) and bridge bents 20 and 21 (span 21) on the new bridge. The approximate limiting navigation clearances are 70 feet above mean high water (new bridge, span 21) and 169 feet between bridge bents (old bridge, between bridge bents 173 and 176). Temporary bridge lighting has been placed between bridge bents 173 and 176 of the old bridge and between bridge bents 20 and 21 (span 21) of the new bridge. Phase 3 (to be announced): The navigation span will be between bridge bents 22 and 23 (span 23) of the new bridge. The adjacent spans of the old bridge will have been removed. The limiting navigation clearances (approximate) will be 70 feet above mean high water and 275 feet between bridge bents. Permanent bridge lighting will be placed between bridge bents 21 and 22 (span 22) of the new bridge. Mariners are advised to use extreme caution when transiting through the bridge, follow the aids to navigation closely and remain at least 500 feet clear of all construction vessels and equipment. Submerged concrete pilings are just below the surface of the water near construction activities. (HP)

The Straits - Harkers Island Bridge (SR 1332) - Bridge will remain in the closed-to-navigation position to facilitate bridge repairs due to damage caused by Hurricane Florence. The repairs require the bridge to remain in the closed-to-navigation position. The bridge is a swing bridge with a vertical clearance in the closed-to-navigation position of 14 feet above mean high water. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open in case of an emergency and there is an alternate route for vessels to pass. Mariners should use caution when transiting the area. (MB)

Northeast Cape Fear River - US 74/SR 133 (Isabel S. Holmes) Bridge – Bridge maintenance which began in September 2019, will continue to maintain the bridge in the closed position 24 hours a day, 7 days a week, through 12:01 a.m. on June 30, 2021. The bridge will open on signal for daily scheduled openings at 6 a.m., 10 a.m., 2 p.m. and 7 p.m., if at least a 24-hour notice is given; except for scheduled bridge closures for events per 33 CFR 117.829 (a) (4). The bridge will open on signal for vessels unable to safely transit the bridge during a scheduled opening, due to the vessel's draft, if at least a 24-hour notice is given; except for scheduled bridge closures for events per 33 CFR 117.829 (a) (4). During the maintenance period, a work platform will be located underneath the bridge, which will reduce the vertical clearance of the bridge to approximately 34 feet above mean high water in the closed position. Vessels that can safely transit through the bridge in the closed position with the reduced vertical clearance may do so, if at least a 30-minute notice is given, to allow for navigation safety. The bridge will not be able to open for emergencies. Work vessels and barges may be reached on VHF-FM channel 13 and the project foreman may be reached at (910) 251-5774 or 561-232-9773. Mariners should adjust their transits accordingly and should use caution when transiting the area. (MT)

Runyon Creek - Carolina Coastal Railway Bridge - Bridge work will be conducted from November 6, 2020, to March 1, 2021, from 7 a.m. to 6 p.m. To facilitate work, a 20ft work barge, a 17ft workboat and 25ft pontoon will be in and around the vicinity of the navigational channel. Mariners are advised to use caution when transiting the area. (MS)

Atlantic Intracoastal Waterway (AIWW), Bogue Sound - SR 1184 (Atlantic Beach Bridge) – Bridge maintenance, which began September 2020, will continue to be conducted from 7 a.m. to 7 p.m.; 7 days a week; through March 15, 2022. The maintenance will be performed in two phases. The first phase, which began in September 2020, will continue through March 15, 2021. The second phase will be performed from September 13, 2021, through March 15, 2022. During these maintenance periods, two 20-foot work vessels, work floats, and a snooper truck will be located in and around the vicinity of the bridge. During work hours, the snooper truck will be located in and around the navigational channel of the bridge. The snooper truck will extend below low steel of the bridge approximately ten feet, reducing the vertical clearance in the navigation span to approximately 55 feet above mean high water. Maintenance personnel, equipment and the vehicle will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 598-1847. Mariners should notify the work foreman no less than 30 minutes prior to transiting through the bridge. Mariners should use caution navigating through the area. (MT)

Atlantic Intracoastal Waterway (AIWW), Boque Sound - SR 58 (Emerald Drive) Bridge – Bridge maintenance, which began September 2020, will continue to be conducted from 7 a.m. to 7 p.m.; 7 days a week; through March 15, 2022. The maintenance will be performed in two phases. The first phase, which began in September 2020, will continue through March 15, 2021. The second phase will be performed from September 13, 2021, through March 15, 2022. During these maintenance periods, two 20-foot work vessels, work floats, and a snooper truck will be located in and around the vicinity of the bridge. During work hours, the snooper truck will be located in and around the navigational channel of the bridge. The snooper truck will extend below low steel of the bridge approximately ten feet, reducing the vertical clearance in the navigation span to approximately 55 feet above mean high water. Maintenance personnel, equipment and the vehicle will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 598-1847. Mariners should notify the work foreman no less than 30 minutes prior to transiting through the bridge. Mariners should use caution navigating through the area. (MT)

Cape Fear River - Cape Fear Memorial Bridge – To facilitate bridge inspections the bridge will be maintained in the closed-to-navigation position and will require a two-hour advance notice to open from 8 a.m. to 3 p.m. from March 2, 2021, through March 3, 2021, with an alternative work date from 8 a.m. to 3 p.m. on March 4, 2021. There is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The bridge provides a vertical clearance of 65 feet above mean high water in the closed position. Vessels able to pass through the bridge in the closed position during these closure periods may do so at any time. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.822. Mariners should adjust their transits accordingly and should use caution when transiting the area. (CT)

Permits/Construction:

SECTOR DELAWARE BAY

- *Delaware* – None
- *New Jersey (Central & Southern)* - None
- *Pennsylvania* – None

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- *Maryland*
Potomac River - Theodore Roosevelt (fixed) Bridge - DDOT is conducting an investigation and assessment of the bridge. Will assess structural condition, needs for extended life cycle, and safety compliance improvements. Then will do a design analysis of alternatives with construction in the future (no date given).
- *Washington, DC* –
Anacostia River – 11th Street Bridge Park – Proposed fixed pedestrian bridge park to be built on retained substructure of old 11th Street Bridge. (HP)

SECTOR VIRGINIA

- *Virginia (Northern)* – None

SECTOR NORTH CAROLINA

- Mid-Currituck Sound (fixed) Bridge – Proposed new fixed structure. (MB)
- Alligator River – US 64 (fixed) Bridge Proposed new fixed bridge structure to replace (swing) bridge in final review of the design and environmental package.
- Cape Fear River – Wilmington bypass south (fixed) Bridge Proposed new fixed bridge structure in review of the design and environmental package. (MT)

SUMMARY OF DREDGING/MARINE CONSTRUCTION PROJECTS CURRENTLY IN PROGRESS

NEW OR UPDATED INFORMATION

New, updated or very important information in this enclosure will be highlighted in yellow.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted 24 hours a day, 7 days a week. All fishnets, crab pots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

****NJ - ABSECON INLET TO GREAT EGG HARBOR INLET - DREDGING - BEACHFILL OPERATIONS****

Updated Dates -Great Lakes Dredge & Dock Company will be conducting dredging and beachfill operations in Margate, Ventnor and Longport NJ. Material will be dredged from offshore between Absecon Inlet and Great Egg Harbor Inlet and pumped to the shoreline using submerged pipelines. The following vessels, in addition to others will be in the area, the Dredge LIBERTY ISLAND, Tug BOBBIE ANN, Tug BAYOU BRAVE, Tug MONICA LYNN, Tug POPS, and Tug VOLUNTEER STATE and may be contacted on VHF-FM channels 13 and 16. Dredge will be complete on **23FEB2021**. Equipment and pipeline removal will continue until **31March 2021**. For more information, contact Stuart Hilgendorf at 443-831-0785 or SHilgendorf@gldd.com.
Chart 12316, 12318

****NJ - LITTLE EGG HARBOR TO CAPE MAY - BEACH THOROFARE - BRIDGE MAINTENANCE****

Mariners are advised that an engineering firm, on behalf of New Jersey Department of Transportation, will be performing maintenance at US 30 (Absecon Boulevard) bridge, over New Jersey Intracoastal Waterway (NJICW), Beach Thorofare, at mile 67.2, in Atlantic City, NJ. The maintenance that began in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through **March 5, 2021**. Work will consist of repair and rehabilitation of the bridge fender system. A material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 30 feet due to work floats located inside the navigational channel for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge, if at least a 2-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel upon request. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners should use extreme caution when transiting the area.
Chart 12316

****NJ - LITTLE EGG HARBOR TO CAPE MAY - BEACH THOROFARE - BRIDGE MAINTENANCE****

Mariners are advised that an engineering firm, on behalf of New Jersey Department of Transportation, will be performing maintenance at Atlantic City Highway Bridge, over New Jersey Intracoastal Waterway (NJICW), Beach Thorofare, at mile 69.0, at Atlantic City, NJ. The maintenance will be conducted from 5 a.m. to 6 p.m.; Monday-Saturday; from **February 22, 2021**, through **May 10, 2021**. Work will consist of repair and rehabilitation of the bridge fender system. A flex-float barge, a work vessel, and dive boat be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 40 feet due to a flexi-float barge located inside the navigational channel for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge, if at least two hours notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel upon request. Work vessels and barges may be reached on VHF-FM channel 13. Mariners should use extreme caution when transiting the area.
Chart 12316

NJ - GREAT EGG HARBOR BAY - BEESLEYS POINT - TRANSITION TOWER CONSTRUCTION

In mid-August 2019, South State Contractors will begin construction of new transition towers in Great Egg Harbor Bay west of the Garden State Parkway Great Egg Harbor. The new towers will be located approximately 500' to the west of the existing towers. All barges and work boats involved will be monitoring VHF channel 13. Project work will be conducted 7 days a week between the hours of 5:00 a.m. and 8:00 p.m. and expected to last till **Aug 2021**. A floating dock consisting of Shugart barges will be staged outside of navigable channel near the old Route 9 bridge.
Chart 12316

NJ - HEREFORD INLET - SEAWALL REPAIR

Continuing until **Feb 25, 2021** a Crane Barge along with an attendant plant will be operating at various locations in and around the Hereford Inlet. Materials will be delivered to this Crane Barge via tug and barge. The Crane Barge will not be in the federally marked navigation channel at any time. The crew will be working Monday through Friday during day light hours. The Crane and attendant plant will both monitor VHF-FM Channel 16. Mariners are urged to use extreme caution and transit the area at a safe speed. For questions or additional information, contact Agate Construction at cyurick@agateconstruction.net or (609) 780-5175.
Chart 12316, 12318

NJ - ATLANTIC CITY - BEACH - OUTFALL CONSTRUCTION

Northeast Remsco Construction will be constructing a Storm Water Outfall in to the Atlantic Ocean off Leaming Ave, Wildwood NJ from 10 Nov 2020 to **30 May 2021**. It will extend 300 feet out from the high tide line in approximate position N38°58'36" W74°49'05". The installation will be completed inside of a cofferdam. The cofferdam will be marked with flashing amber lights. No vessels will be on site. For more information, contact Joseph Bonner at 732-557-6100.
Chart 12316

NJ – PA – DELAWARE RIVER – OLDMANS CREEK – DREDGING AND MARINE CONSTRUCTION

R.E. Pierson Construction Company will be conducting dredging operations in the Delaware River in the area of Oldmans Creek and in Oldmans Creek to facilitate access to install a sheet pile bulkhead along Oldmans Creek. Work will be conducted from 7 Dec 2020 to **31 Mar 2021**. The floating dredge ELLICOT will be on scene with a variety of other vessels and equipment and may be contacted on VHF-FM channels 10 and 11. For more information or questions, contact Charles Elwell at 609-517-7364.
Chart 12312

PA – NJ - DELAWARE RIVER – CHRISTINA RIVER – DREDGING

Norfolk Dredging Company with the assistance of the Tug JOKER will commence dredging (pipeline placing) operations in the Delaware River on or about January 1, 2021. Crews will be handling dredge pipe in the vicinity of Marcus Hook, Bellevue and Cherry Island Ranges. A submerged pipeline will be placed from the Pedricktown Disposal area in New Jersey, across the Cherry Island Range channel to The Port of Wilmington, DE. Once the pipeline is placed, the dredge ESSEX will commence dredging in Wilmington Harbor. The project will continue until approximately **February 5, 2021** at which point the pipeline will be moved to Marcus Hook Range for dredging there. The Dredge Operator will standby on channels #13 and #16 VHF-FM. Traffic should call 30 minutes prior to expected time of passage. For more information or questions, contact Norfolk Dredging Company at 757-547-9391.
Chart 12311

PA/NJ – PHILADELPHIA AND CAMDEN WATERFRONT – SCHUYLKILL RIVER - BRIDGE MODIFICATION

Mariners are advised that a construction firm, on behalf of the City of Philadelphia, will be modifying the existing Grays Ferry Railroad Bridge, over Schuylkill River, mile 5.5, at Philadelphia, PA. Modification activities which began June, 2018, are expected to finish on **September 30, 2021**. Work will be performed from 6 a.m. to 5 p.m.; M-F. During this bridge modification project, one navigation span will be occupied; the other navigation span will be open for vessels to transit. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway. The new bridge will have a vertical clearance of 26 feet above mean high water in the closed-to-navigation position, an unlimited vertical clearance in the open position, a horizontal clearance of 75 feet in the western navigation span, and 65 feet in the eastern navigation span. Detailed project information and information concerning the waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins.

Crane barges, material barges, and support vessels will be operating or stationed in the vicinity of the existing bridge. A.P. Construction Inc.'s vessels are monitoring VHF-FM channels 13 and 16 when working or vessels are operating. The City of Philadelphia construction manager may be contacted at 215-275-8066 and A.P. Construction, Inc.'s project supervisor may be contacted at 215-651-6278 or 215-421-2880. Mariners should use extreme caution when transiting the area.
Chart 12313

*****PA – PHILADELPHIA AND CAMDEN WATERFRONT – SCHUYLKILL RIVER – CSX B&O BRIDGE MAINTENANCE*****

Atlantic Subsea, Inc. will begin working on Fender Repairs to Piers 1 and 2 of the CSX B&O Swing Bridge starting on Feb 25, 2021. Work will commence between 0700 and 15:30, Monday – Friday. Work will be completed from Crane Barge Tioga and will be spudded down on the northwest side of bridge. During work hours, barge will partially block channel and require 2 hours notice to stop work operations and move the barge out of the way. Project manager Keith Robertson and be reached on VHF Channel 13 and 16 or via cell phone (preferred method) at 609-432-1077. Repairs will not affect operation of bridge. Work is anticipated to be complete around **April 30, 2021**.
Chart 12313.

PA/NJ – PHILADELPHIA AND CAMDEN WATERFRONT – SCHUYLKILL RIVER - BRIDGE MAINTENANCE

Mariners are advised that an engineering firm, on behalf of Pennsylvania Department of Transportation, will be performing maintenance on the SR 3021 (Grays Ferry Avenue) Bridge, across the Schuylkill River, mile 5.5, at Philadelphia, PA. The maintenance which began October 2020, will continue to be conducted from 7 a.m. to 3:30 p.m., Monday-Friday, through **May 31, 2021**. A 30-foot crane barge, 26-foot work boat and divers will be located in and around the vicinity of the bridge. During bridge maintenance, one navigation span will be occupied and not available for navigation and the other navigation span will be open for vessels to transit. The west navigation span provides 75 feet of horizontal clearance and the east navigation span provides 65 feet of horizontal clearance. Vessels may transit the open navigation span with caution, due to potential opposing vessel traffic. The crane barge and work vessel may be reached on VHF-FM channel 13. The project foreman may be reached at (609) 313-0597 or (609) 209-2029. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway.
Chart 12313

DE - DELAWARE BAY - MISPELLION RIVER – ROUTE 1/REHOBOTH BLVD BASCULE BRIDGE –BRIDGE MAINTENANCE

Mariners are advised that the highway drawbridge – Route 1/ Rehoboth Blvd Bascule Bridge over the Mispillion River, mile 11.0, at Milford, DE, will be maintained in the closed-to-navigation position from 7 a.m. on **February 15, 2021**, to 7 p.m. on **February 26, 2021**. During bridge closure, no vessel may transit under the bridge in the closed position at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.822. Mariners should adjust their transits accordingly and should use caution when transiting the area.
Chart 12304

PA - NJ – DELAWARE RIVER – PORT OF PAULSBORO – MARINE CONSTRUCTION

The Paulsboro Marine Terminal will be conducting construction activities along the existing marine wharf. The multi-phase project will involve creation of a new berth on the downriver side of the existing pier. The project will continue through **Oct 2021**. During construction, there will be multiple tugs, work vessels, material and crane barges in the vicinity of the pier and Mantua Creek. For questions, contact Coast Guard Sector Delaware Bay Waterways.
Chart 12312

DE – BETHANY BEACH – DREDGING

Continuing until approximately **14 FEB 2021**, the hopper dredge R.N. WEEKS and support equipment will be operating three (3) nautical miles offshore of South Bethany Beach placement site. Dredge pipeline will be prepared in the staging area and then relocated offshore of Bethany Beach placement areas and submerged into two different pipeline corridors, bound by the following approximate positions:

38°32'45.68"N, 75° 3'16.95"W, 38°32'45.46"N, 75° 2'9.25"W, 38°30'12.51"N, 75° 2'10.73"W, 38°30'14.44"N, 75° 3'8.83"W

Dredged material will be transported from the Borrow Area to the discharge station and then pumped out through a combination of floating and submerged line reaching between 2,500 feet to 4,500 feet offshore from the beach placement.

Borrow Area will be the perimeter bound by the following approximate positions: 38°31'20.56"N, 75° 1'18.04"W, 38°31'23.75"N, 74°59'30.80"W, 38°30'0.92"N, 74°59'29.48"W, 38°29'58.80"N, 75° 1'16.00"W

Once underway, dredging operations will continue on a twenty-four (24) hours per day, seven days per week. The dredge will monitor VHF-FM channels 13 and 16. For questions or more information, contact Doug Nelson at 985-237-9667 or denelson@weeksmarine.com
Chart 12214, 12216

DE – CHESAPEAKE AND DELAWARE CANAL – BRIDGE MAINTENANCE

Mariners are advised that an engineering firm on behalf of the US Army Corps of Engineers will be performing maintenance at the Conrail Bridge, across Chesapeake and Delaware Canal, at mile 7.7, at New Castle County, Middletown, DE. The maintenance will be conducted from 5 p.m. on **February 12, 2021** to 12:00 p.m. on **February 15, 2021**, from 5 p.m. on **February 19, 2021** to 12:00 p.m. on February 22, 2021, and 5 p.m. on **February 26, 2021**, to 12:00 p.m. on **March 1, 2021**. Repair and rehabilitation of the bridge consist of replacing railroad timber ties. All work will be performed above deck.

Equipment and personnel can be removed for bridge openings with a 20 min notice. All Marine Traffic Controllers will help direct traffic under the northern half of the bridge to avoid any concerns. The skiff may be reached on VHF-FM channel 13. Mariners should use caution when transiting the area.

Charts 12277, 12311

MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT – SAUNDERS POINT – SHORE LINE STABILIZATION

Central Marine will be working on the Beverly Triton Shoreline Stabilization Project near Saunders Point in the Chesapeake Bay. Work will be from 15 Sep 2020 to **30 Mar 2021** and conducted each day during daylight hours. Barges and small vessels will be in the area and a blue and white mooring buoy will be established in approximate position 38.87N, 76.48W. For any questions or additional information, contact Charlie Young at 410-320-7030.
Chart 12263

MD – CHESAPEAKE BAY – POPLAR ISLAND – ON GOING WORK

Greener Construction Services and Clean Harbors Environmental Service will be conducting dewatering operations on Poplar Island from Nov 2020 to **Jun 2021**. Personnel will be shuttled to Poplar Island from Tilghman Island on a daily basis by the vessel Brooks Hooks. For more information or questions, contact Todd Fry at 201-241-1295.

Chart 12270

******MD – SEVERN AND MAGOTHY RIVERS – MAGOTHY RIVER******

Central Marine will be starting the Cape St Claire Shoreline Stabilization Project March 1, 2021 with an approximate completion date of May 30, 2021.

Approximate location of activity: 39.047519N, 76.429958W. Work will be conducted 7 days a week from dawn till dusk. Vessels/Marine equipment located on site: 25' x 14' Truckable Push boat (Pusherman), 3 - 24' x 60' x 4' Spud Barges, 110' x 32' Navy barge, 24' crew boat, Vulcan Materials Barge 260' X 40' All equipment is marked and lighted in accordance with USCG Regulations. 24-hour point of contact for the project's duration is.

Charlie Young, Central Marine Construction at 410-320-7030.

Chart 12282

MD – CHESAPEAKE BAY – BALTIMORE HARBOR – BEAR CREEK- TRANSMISSION TOWER FOUNDATION REPAIR

Marine Solutions, Inc. (Marine Solutions) has been contracted by BG&E to complete the foundation repair on two transmission towers located in Bear Creek in Baltimore MD. Work will be conducted from 2 Nov 2020 to **1 Mar 2021**. The two towers are located just to the south of I-695 over Bear Creek. All work will take place outside of the navigation channel and no channel closures are anticipated. Diving operations will be conducted from two barges and two work vessels that will be tied-off to the barges. The barges will be moored adjacent to the towers. For more information or questions, contact Jeff Brown 302-250-6073.

Chart 12281

******MD- APPROACHES TO BALTIMORE HARBOR- BEAR CREEK – BRIDGE MAINTENANCE******

Mariners are advised that an engineering firm, on behalf of Maryland State Highway Administration, will be performing maintenance on the highway drawbridge – SR 157 (Peninsula Expressway) Bridge over Bear Creek, mile 2.1, near Dundalk, MD. The maintenance will be conducted from 9 a.m. to 4 p.m.; 7 days a week; from March 10, 2021, through March 19, 2021. A work vessel and under-the-bridge inspection vehicle will be located in and around the vicinity of the bridge. Inspection personnel, equipment, vessel and vehicle will relocate from the moveable span and navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13 and 16. The project supervisor can be reached at (443)-838-5164. Mariners should notify the project supervisor no less than 5 minutes prior to transiting through the bridge. Mariners should use caution navigating through the area

Chart 12278

VA – MD – POTOMAC RIVER – LOWER CEDAR POINT TO MATTAWOMAN CREEK – BRIDGE CONSTRUCTION

Steel pile driving operations are scheduled to occur adjacent to the Federal Navigation Channel at the New Harry W. Nice / Thomas "Mac" Middleton (US 301) Bridge on the Potomac River in Newburg, MD during **February 15, 2021 – March 12, 2021**. Bridge construction will occur 7 days per week, from 7 a.m. to 9 p.m. Large vessels in transit that require use of the Federal Navigation Channel during the work period described, must provide at least 24 hours advanced notice to either Mr. Mike Baker at (443) 286-1780 or Mr. Brent Hunt at (757) 544-3964. All mariners are to operate at the minimum speed necessary to maintain safe course that produce no wake when transiting near the work platforms and barges.

Chart 12288.

MD – CHESAPEAKE BAY – APPROACHES TO BALTIMORE HARBOR – PATAPSCO RIVER – AERIAL TRANSMISSION LINE CONSTRUCTION

Marine construction operations in support of the installation of aerial electric power transmission lines will occur on the Patapsco River, between Hawkins Point and Sollers Point north and adjacent to the Francis Scott Key Memorial (I-695/Baltimore Beltway) Bridge until **Oct 7, 2022**. The work will occur 24 hours per day, 7 days per week, in approximate positions: (1) 39°12'46.8737" N, 076°32'14.0536 W; (2) 39°12'58.5610 N, 076°31'58.7405 W; (3) 39°13'13.7886 N, 076°31'38.7851 W; (4) 39°13'26.6084 N, 076°31'21.9825 W; and (5) 39°13'39.4271 N, 076°31'05.1787 W. McLean Contracting Company marine equipment spudded on site will include: (1) a sectional barge (120'x120'x7') with Manitowoc Crane, (2) the Whirley Crane Baltimore barge (140'x70'x12.5'); (3) the Whirley Crane Hampton Roads barge (108'x 46'x8'); (4) a Whirley Crane Newport News barge (110'x43'x8'); and (5) a deck barge. Mariners are urged to use caution when transiting the area, and to operate at minimum wake speed necessary to maintain safe course near the work site. Interested mariners can contact the attending vessels on site, including "WB29", "MEGALADON", "RISING SUN", "CAPTAIN STEVE", crewboat and jackboats on marine band radio VHF-FM channels 16 and 13. Throughout the construction project, the Baltimore Gas and Electric Company will regularly provide updates at website: <https://www.bge.com/SmartEnergy/InnovationTechnology/Pages/Construction-Updates.aspx>. Chart 12281

MD – BALTIMORE HARBOR – SEAGRIT AND DUNDALK MARINE TERMINALS – DREDGING

Dredging operations on behalf of Maryland Environmental Service will commence on or about January 1, 2021 in the Dundalk West Access Channel and Seagirt-Dunda1k Connecting Channel, in the vicinity of 39°14'50" N, 076°32'40" W. Loaded scows will be towed from this location to the Unloader #3 located at the Masonville Dredge Containment Facility 39°15'10" N, 076°35'20" W for offloading on a daily basis. A 16" submerged HDPE pipeline will be placed on the sea bottom from the Unloading Barge into the placement Facility, located in the vicinity of 39°15'15" N, 076°35'30" W. The Dredge KOKO VI will be dredging the area with the assistance of a Tender Tug, two Towing Tugs, and four scows. Temporary emergency anchors will be placed near the Unloader #3, in the vicinity of 39°15'40" N, 076° 35'00" W and near Seagirt in the vicinity of 39°15'00" N, 076° 33'00" W to assist with operations. All vessels and crew will monitor VHF-FM Channels 13 and 7. Dredging and unloading operations will continue daily until the estimated completion date of **April 12, 2021**. For any questions or more information, contact Adam Dondero at 443-695-3788 or adondero@cormanconstruction.com. Chart 12281

MD – HEAD OF CHESAPEAKE BAY – BUSH RIVER – DREDGING

Cianelli Construction, Inc will be conducting dredging operations in the Bush River north of the Railroad Bridge near the mouth of Otter Point Creek. Work will be conducted until **1 Mar 2021**. The vessel MISS ROSE and Dredge WOLVERINE will be on scene and may be contacted on VHF-FM channel 16. For more information or questions, contact Phil Cianelli at 443-807-9110. Chart 12274

MD - UPPER CHESAPEAKE CHANNEL & BUSH RIVER – DIVE OPERATIONS

Marine Technologies will be conducting Dive operations on the Bush River, in approximate location of: 39-26.146 N 076-14.55 W, between the Amtrak railroad draw bridge and the BGE over head power lines, 50 yards north of BGE tower structure number 11. Diving Operations will be conducted on the Harford water and sewer main, Monday-Friday from 6am to 6pm till approximately **March 5, 2021**. The Dive Supervisor, Tim Blob, can be contacted on VHF channel 16 or by cell phone at: (410) 971-0799. Chart: 12274

MD – UPPER POTOMAC RIVER – INDIAN HEAD, MD – STONE SILL CONSTRUCTION

Coastal Design & Construction, Inc. will be constructing a Stone sill along the Town of Indian Head's boardwalk to create living shoreline starting on **February 08, 2021 to April 30, 2021**. Four temporary moorings will be established near Sycamore Point for support barges. Mooring positions: 38° 37.152'N, 77° 10.554'W - 38° 37.213'N, 77° 10.346'W - 38° 37.048'N, 77° 10.440'W - 38° 37.111'N, 77° 10.261'W. The blue and white moorings buoys will be lighted with slow flash white lights and barges will have constant white lights in accordance with Coast Guard regulations. Tugs Emelie B and KAT II will be monitoring VHF Channel 13. For more information or questions, contact J. Richard Mattingly, Superintendent, at 301-643-4323. Chart 12288

MD – PATAPSCO RIVER – APPROACHES TO BALTIMORE HARBOR

McLean Contracting Company will start Construction on a new bulkhead for Domino Sugar Refinery on the Patapsco River of Baltimore Harbor, 39-27.4440, -76-59.6792, Baltimore MD. Construction will start on **02FEB2021** and work will be conducted 24hrs a day, 7 days a week until **30APR2021**. A 110'x 50' Inland Deck Barge w/ Self Pulling Spuds, Preston will be marked in accordance with Coast Guard regulations, and will monitor VHF-10, VHF-74. For more information or questions, contact Mr. Scott Huchenski, Superintendent, 570-357-7894, or Mr. Tony Lenzi, Safety Coordinator, 724-422-2712. Chart 12278

MD-BALTIMORE HARBOR – SEAGIRT MARINE TERMINAL – DIVE OPERATIONS

Marine Technology's will be conducting DIVE Operations and underwater pile repair at SEAGIRT Marine Terminal BERTH # 3 starting **February 8, 2021**. Dives will be conducted, Monday- Friday from 6am to 5pm from now to **December 1, 2021**. Dive Supervisor Steve Grob will be monitoring vhf channel 16 and can be reached at 433-829-7322. Chart 12281

DC – POTOMAC RIVER – MATTAWOMAN CREEK TO GEORGETOWN – ANACOSTIA RIVER – MARINE CONSTRUCTION OPERATIONS

Construction of the new Frederick Douglass Memorial (South Capitol Street) Bridge across the Anacostia River in Washington, DC continues into **2022**. Work is conducted Monday through Saturday, 7 am to 7 pm, with intermittent night work and currently consists of: 1. The temporary West Trestle, which extends from the shoreline eastward to the center of the federal navigation channel and includes new Bridge Pier 1 and the western portion of the new bridge superstructure. The western half of the federal navigation channel, approximately 150 feet, is currently restricted to navigation. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" that are placed approximately 85 yards upstream of the bridge. 2. The temporary East Trestle, which extends from the shoreline westward to the eastern limit of the navigation channel and includes new Bridge Pier 2 and the eastern portion of the new bridge structure. This area is marked with two orange and white information and regulatory buoys labeled "Danger" with the standard 'Exclusion' diamond symbol that are placed approx 85 yards upstream of the bridge. The federal navigation channel east of the center pier (eastern half), approximately 150 feet wide, remains available for navigation. A vessel/barge may be intermittently positioned within the channel. Mariners intending to transit this area should contact the vessels MS. BECKY or CLAIRE MARIE for passing arrangements. Chart 12289

******DC- POTOMAC RIVER-DISTRICT OF COLUMBIA-ANACOSTIA RIVER – BRIDGE INSPECTION******

Mariners are advised that an engineering firm, on behalf of District Department of Transportation, will be performing inspections at the 11th Street (Martin Luther King Jr. Avenue SE) Bridge, mile 2.1, the South Capital mile 1.2 and I-695 over Anacostia River. The main channel will not be obstructed. Inspection personnel, equipment and the vessel will relocate from the navigable channel, upon request. The vessel may be reached on VHF-FM channel 13. The inspection will be conducted between **March 1, 2021** through **March 8, 2021**; M-F; from 8 a.m. to 5 p.m. A 30' pontoon boat with 65' bucket lift will be used for this project. Mariners are requested to notify the project foreman at least 20 minutes prior to navigation through the bridge and should use caution when transiting the area.

Chart: 12285

******VA-MD-WASHINGTON DC-POTOMAC RIVER – BRIDGE INSPECTION******

Mariners are advised that the District Department of Transportation will be performing an inspection at the Theodore Roosevelt Bridge, at mile 111.4, across the Potomac River, between Washington, DC and Arlington, VA. The inspection will be performed using a bucket boat beginning March 1, 2021 to March 8, 2021 from 8 a.m. to 5 p.m. Mariners should use extreme caution when transiting the area

Chart 12288

VA – CHINCOTEAGUE INLET TO GREAT MACHIPONGO INLET – WALLOPS ISLAND – DREDGING AND BREAKWATER CONSTRUCTION

Continental Heavy Civil Corp will be conducting a Breakwater and Beach Nourishment project at Wallops Island in Accomack County VA. Operations will begin on 25 Mar 2020 and continue until **Feb 2021**. The vessels CAPTAIN BEAU and HEIDI will be on scene. The beach nourishment project will be along the beach front inside the NASA base. The construction of six off shore stone breakwaters will be directly in-front on the newly placed sand. The project will include, barging material from Cape Charles Terminal to Wallops Island for the installation of the stone breakwaters. Project Coordinates are 37°51'10.06"N, 75°27'41.12"W. Contact Francisco J. Juelle for more information at 787-238-3243 or fjuelle@chcivil.com. LNM 1120

Chart 12210

VA - OYSTER CREEK CHANNEL – DREDGING

Dredgit Corporation will begin dredging Oyster Creek Channel, in Oyster VA, beginning on **15FEB2021**, to be completed by **12APR2021**. Operations will be 24 hours per day, 7 days per week and will start in vicinity of Oyster Boat Ramp working eastward to 37-17-23.83N, 075-54-33.73W. equipment will consist of a 12" Cutter Suction Dredge "Lady Diana", 25' Tender boat, 22' Carolina Skiff, approx. 4200' of 12" floating HDPE pipeline with lights/markers. All vessels will be monitoring VFH Channel 68 (working); 13 and 16 (emergency).

Vessels need to exercise extreme caution when navigating near and around the dredge. All Mainers should consider the dredge area a NO WAKE ZONE. Mariners are urged to use extreme caution and transit the dredge area at their slowest safe speed to create minimum wake. The dredge typically allows passage on the dredge's starboard side, but this may not always occur during some movements. Mariners are encouraged to utilize the vessels navigational aids, navigational lights and day shapes to determine safest passage. The dredge pipeline will be clearly marked with floats and amber blinking lights. For more information, contact Chris Kahn at 337-519-6032.

Chart 12221

VA – CHESAPEAKE BAY ENTRANCE – CHESAPEAKE BAY BRIDGE TUNNEL – MARINE OPERATIONS

Chesapeake Tunnel Joint Venture will continue Tug, Crane and Barge operations near the existing tunnel protection berms for Islands 1 and 2. Work will not impede the navigational channel. A crane barge may be held in place by way of spuds, a six point anchoring system or made fast to several steel mooring piles. Buoys will be attached to the anchors so that they may be moved as the crane barge advances. Buoys will be illuminated at night by one second flashing white lights and the barges will be illuminated by steady white lights on all corners. The steel piles will be illuminated at night by white lights. The steel piles and trestle will be positioned west of Island #1 approximately 125 feet and extending north of the fishing pier approximately 1000 feet. The ROBERT T and ANGELINA AUTUMN be on VHF-FM 13 and 16.

Charts 12222

VA – CHESAPEAKE BAY – THIMBLE SHOAL CHANNEL – DREDGING

Continuing until approximately **30 June 2021**, Weeks Marine Hopper Dredge "MAGDALEN" and support equipment will be operating between Thimble Lighted Bell Buoy 9 (LLNR 9255) and Thimble Shoal Lighted Buoy 7 (LLNR 9235) stopping west of Chesapeake Bay Bridge-Tunnel. All dredged material will be transported to the Dam Neck Ocean Disposal Site – Cells 5, 6 & 7. Dredging operations will continue twenty-four (24) hours per day, seven days per week basis. The dredge will monitor VHF-FM channels 13 and 16. For questions, contact Matt Henry at 985-237-5050.

Chart 12256

VA – CHESAPEAKE BAY – THIMBLE SHOALS CHANNEL – DREDGING

Beginning 2nd of **Jan 2021**, the Dutra Clamshell Dredge DB Paula Lee, Tug "Colonel", Dump Scow ES-15, Dump Scow CIG7, and Work boat "Trojan" will be operating between Thimble Shoals Lighted Buoy 11 (LLNR 9265) and Lighted Buoy 7 (LLNR 9235) stopping west of Chesapeake Bay Bridge-Tunnel. The clamshell dredge will start dredging approximately 2,600 feet west of Thimble Shoals Lighted Bell Buoy 9 (LLNR 9255) at station 997+00 (36°58' 48.9"N, 076°08' 26. 11"W) moving east. All dredge material will be towed to the approved Dam Neck Ocean Disposal Site - Cells 5, 6,& 7.

Work limits for the Thimble Shoal Channel will be bound by the following approximate positions:

36°59' 07.05"N, 076°09' 36.49"W, 36°58' 28.30",N, 076°07' 06.34"W, 36°59' 16.53"N, 076°09' 32.75"W, 36°58' 37.78"N, 076°07' 02.59"W. Limits of Dredged Material Placement Area will be bound by the following approximate positions: 36°51' 41.07"N, 075°55' 41.74"W, 36°51'45.15"N, 075°51' 16.40"W, 36°45' 47. 19"N, 075°50' 54.07"W, 36°45' 45.72"N, 075°55' 33.04"W. Once underway, dredging operations will continue twenty-four hours a day, seven days a week until **March 31, 2021**. The dredge will monitor marine VHF channels 13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

Chart 12254, 12256

VA – LYNNHAVEN BAY – LINKHORN BAY – BRIDGE CONSTRUCTION

Allan Myers is conducting road widening and bridge replacement on Laskin Road in Virginia Beach, VA until **Oct 2022**. Bridge passes over Great Neck Creek. A cofferdam and turbidity curtains are installed at the site. For more information contact Pat Robinson at 610-960-3139.

Chart 12222

******VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION******

The Hampton Roads Connector Partners has begun construction on the west side of the project corridor running parallel with the Hampton Roads Bridge Tunnels starting at the north side at the Hampton land side extending to the south side at the Willoughby land side. There will be at any given time several crane barges along with several material barges as well as the tugs Uncle Mike, Robert T, Angelina Autumn, Miss Morgan and the Seaward 8, Seaward 9 and the Seaward 12. The following crew boats will be on site Seaward 10, Seaward 5, and the Brittany Lynn along with several outboard motor type safety vessels. All job site vessels will be standing by on VHF channels 13 & 16. All barges will be lighted at night by solid white lights on their four corners. All floating mooring buoys shall be lighted with flashing white lights. All mooring piles will be lighted at night with solid white lights on each pile. All mariners when in the vicinity of the job site and approaching or leaving the area of operations, should remain a safe distance away from all buoys and or mooring piles. Safe distances shall also be maintained from the mooring zones in Willoughby Bay and Hampton Flats. This notice to mariners will be updated as needed as the project proceeds. For more information or questions contact Shannon Gresham 757-685-3392, Kareem Myers 757-256-9715.
Chart 12245

VA – ELIZABETH RIVER – WESTERN BRANCH – BRIDGE CONSTRUCTION

Until **Mar 2023**, McLean Contracting will be conducting bridge demolition, and replacement of the Churchland Bridge on the Western Branch of the Elizabeth River. Signs have been installed on both sides of the bridge worded "OVERHEAD BRIDGE CONSTRUCTION 500 FEET AHEAD". A temporary pile crane trestle will be extending approximately 600ft from either shoreline on the North side of the bridge. Barges and tugs will be on scene throughout the project and may be contacted on VHF-FM Channels 03, 13 and 16. For information, contact Scott White at 757-641-2132. LNM 2320
Chart 12253

VA – ELIZABETH RIVER – PORTSMOUTH WATERFRONT – NORTH STREET FERRY LANDING TO TIDWATER YACHT MARINA – SEAWALL CONSTRUCTION

Crofton Construction will be conducting repairs to the seawall located in the Elizabeth River at the following locations: N36° 50'20" and W76 °17'45" and N36° 50'25" and W76 °17'46". Beginning November 09, 2020 and continuing until **January 31, 2021** or until complete. Construction operations will include, barge and crane operations, in conjunction with general marine construction. Barges and vessels will be moored on site with employees working over the side on small floats at times along with crew boats. The construction equipment will be confined to the barges, with small crew boats, working in the vicinity. Vessels are requested to proceed in this area with caution and causing no wake. Crews will be monitoring VHF-FM Channels 13 & 16. For more information or questions, contact Olga Mileyko at 757-397-1131.
Chart 12253

VA – HAMPTON ROADS – ELIZABETH RIVER – NORFOLK INTERNATIONAL TERMINALS – DREDGING

Cottrell Contracting Corporation of Chesapeake, Virginia Dredge LEXINGTON will be performing dredging operations in Norfolk Harbor. Dredging will be conducted between Norfolk International Terminal South, Channel Daybeacon 10S (LLNR 9572) and Elizabeth River Channel Lighted Buoy 13 (LLNR 9535) up to Norfolk International Terminals South Container Terminal, Pier 1, Pier 2, and the Ro/Ro berth. Dredging operations will also be conducted east of Elizabeth River Channel Lighted Buoy 11 (LLNR 9525) on either side of Norfolk International Terminals Pier 3. Period of work will be from November 20, 2020 to **May 01, 2021**.
Chart 12245

VA - NORFOLK HARBOR AND ELIZABETH RIVER - SOUTHERN BRANCH OF ELIZABETH RIVER – I-64 HIGH RISE BRIDGE

An engineering firm, on behalf of Virginia Department of Transportation are performing bridge construction at I-64 High Rise Bridge over Elizabeth River Southern Branch, mile 7.1, in Chesapeake, VA. Mariners should expect construction activity and related equipment in the vicinity of the bridge 24 hours a day; 7 days a week. A crane barge is currently being used within the navigation channel to complete the final stages of bridge fender system work and is removed from the channel at the end of each shift. Work vessels may be reached on VHF-FM channel 13. The project manager can be reached at (757) 579-8400. Mariners should use caution and proceed at a safe speed to minimize wake for work vessels when transiting the area. For questions or concerns regarding this matter, contact Coast Guard Sector Virginia Waterways Management Division at 757-668-5580 or virginiawaterways@uscg.mil.
Chart 12253

VA – ELIZABETH RIVER SOUTHERN BRANCH – MONKEY POINT – DREDGING

Mariners are advised that beginning **March 8, 2021**, ARGOS US will be conducting Dredging operations in the vicinity of Money Point, VA on the Elizabeth River. Operations will be on going 24 hours per day, 7 days per week through **April 5, 2021**. Vessels involved include: tug CAPT. WOODY, call sign WDG-2789; tug EMMY LOU, call sign WDK-9403; dredge MOBRO 112, call sign WDL-3073. All Mainers should consider the dredge area a NO WAKE ZONE and are urged to use extreme caution and transit the dredge area at their slowest safe speed to create minimum wake. The dredge typically allows passage on the dredge's starboard side, but this may not always occur during some movements. Mariners are encouraged to utilize the vessels navigational aids, navigational lights and day shapes to determine safest passage. Any dredge pipeline will be clearly marked with floats and amber blinking lights. Concerned Traffic may contact tugs monitoring VHF-FM Channel 18 (working); 13 and 16 (emergency).
Chart 12253

VA – CHESAPEAKE – ALBERMARLE AND CHESAPEAKE CANAL

W. F. Magann Corporation, on behalf of the City of Chesapeake, will begin the repair of the Centerville Turnpike Bridge located on the Atlantic Coast Intracoastal Waterway – Albemarle and Chesapeake Canal (mile marker 15.2, 36° 43.417'N, 076° 11.183'W. Work is expected to be completed **September 1, 2021**. Work may be conducted 7 days a week from 5 a.m. to 12 a.m. during the scheduled rehabilitation, a crane barge, material barge, tugboat, work boats and divers will be near the bridge. During certain phases of the rehabilitation, the tugs, barges, work vessels and divers will reduce the horizontal clearance in the navigation span. Vessels that require the tugs, barges and work vessels to clear the navigation span should notify the project supervisor no less than one hour prior to navigation through the bridge. During dive operations within the navigational span, navigation will be on demand and vessels should notify the project foreman no less than one hour prior to navigation through the bridge. Work vessels and supervisor can be reached on VHF-FM channel 13 or (757) 353-7480. In the event of an emergency, please contact Nick Scribner (757) 342-9510. Mariners are reminded to maintain a safe distance from the working vessels and barges and are asked to use extreme caution while navigating through the area.

VA – RAPPAHANNOCK RIVER – CABLE CROSSING INSTALLATION

Construction activities by Croman Construction for the for Dominion Energy Virginia Rappahannock River Cable Crossing will continue until **December of 2021**, east of the VA Route 3 Rappahannock River Bridge in the vicinity of 37 37 01.655N, 076 25 44.9693W (South Platform) and, 37 37 55.1326N, 076 24 52.724W (North Platform). The Crane Barges Xavier and CKCC 495 will be performing the construction activities supported by a Tender Tug, a Towing Tug, and material barges. All vessels and crew will monitor VHF channels 13 and 7. For more information, contact James Matters 410-320-7534.

Chart 12237

VA – LYNNHAVEN RIVER BASIN – ECOSYSTEM RESTORATION PROJECT

Seaward Marine Corporation located in Norfolk, VA advises that beginning **February 18, 2021** through **August 17, 2021** in conjunction with the Army Corp of Engineers will be installing as many as 28,000 reef structures approximately 18 inches square on the south side of the Lynnhaven Bridge and extending as far south as 1.5 miles.

All Mariners are requested to maintain a slow bell and adhere to the no wake zone when transiting north and south bound in said area and remain a safe distance away from the crane barge working at the job site. Any vessels working with the construction crews and the job Superintendent will be monitoring channels #13 and #16 VHF radio.

Owners of crab pots and other structures that may be in the vicinity and that may hinder the free navigation of the attending vessels and equipment must remove these from the area where barges and other attendant equipment will be working. The work at this location may at time to time be working on a 24 hour schedule.

For further information please contact: Walter McKenna Project Manager 757-272-5646 Or Clint Robertson Superintendent 757-705-6615.

NC-INTRACOASTAL WATERWAY-MOREHEAD CITY HARBOR-BRIDGE MAINTENANCE

Mariners are advised that an engineering firm, on behalf of North Carolina Department of Transportation, will be performing maintenance on the SR 1184 (Atlantic Beach Bridge) Bridge, over the Atlantic Intracoastal Waterway (AIWW), Bogue Sound, at mile 206.7, between Morehead City, NC and Atlantic Beach, NC. The maintenance, which began September 2020, will continue to be conducted from 7 a.m. to 7 p.m.; 7 days a week; through March 15, 2022. The maintenance will be performed in two phases. The first phase, which began in September 2020, will continue through March 15, 2021. The second phase will be performed from September 13, 2021, through March 15, 2022. During these maintenance periods, two 20-foot work vessels, work floats, and a snoopier truck will be located in and around the vicinity of the bridge. During work hours, the snoopier truck will be located in and around the navigational channel of the bridge. The snoopier truck will extend below low steel of the bridge approximately ten feet, reducing the vertical clearance in the navigation span to approximately 55 feet above mean high water. Maintenance personnel, equipment and the vehicle will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 598-1847. Mariners should notify the work foreman no less than 30 minutes prior to transiting through the bridge. Mariners should use caution navigating through the area.

Chart 11547

NC – BEAUFORT INLET – MOORHEAD CITY CHANNEL – AIDS TO NAVIGATION CONSTRUCTION

Starting on February 22, 2021, Precon Marine will begin rebuilding the Morehead City Channel Range Lights. Work will be conducted outside the channel in approximate position 34°41'30"N 76°39'56"W. Tug Betty Jo and barges will be on scene and monitoring VHF 13/16. Work will be conducted 24 hours a day, 7 days a week until approximately April 30, 2021. Project POCs are Randy Ainsley (757) 449-8391 ransley@preconmarine.com and Zulfikhar Ahmed (757) 335-1624 zahmed@preconmarine.com. On site, POC is Randy Ainsley, 757-449-8391.

NC - INTRACOASTAL WATERWAY-NEUSE RIVER TO MYRTLE GROVE SOUND - BRIDGE MAINTENANCE

Mariners are advised that an engineering firm, on behalf of North Carolina Department of Transportation, will be performing maintenance on the SR 58 (Emerald Drive) Bridge, over the Atlantic Intracoastal Waterway (AIWW), Bogue Sound, at mile 266, at Emerald Isle, NC. The maintenance, which began September 2020, will continue to be conducted from 7 a.m. to 7 p.m.; 7 days a week; through **March 15, 2022**. The maintenance will be performed in two phases. The first phase, which began in September 2020, will continue through **March 15, 2021**. The second phase will be performed from September 13, 2021, through March 15, 2022. During these maintenance periods, two 20-foot work vessels, work floats, and a snoopier truck will be located in and around the vicinity of the bridge. During work hours, the snoopier truck will be located in and around the navigational channel of the bridge. The snoopier truck will extend below low steel of the bridge approximately ten feet, reducing the vertical clearance in the navigation span to approximately 55 feet above mean high water. Maintenance personnel, equipment and the vehicle will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 598-1847. Mariners should notify the work foreman no less than 30 minutes prior to transiting through the bridge. Mariners should use caution navigating through the area.

Chart 11547

NC – INTRACOASTAL WATERWAY – NEUSE RIVER TO MYRTLE GROVE SOUND – DREDGING

Continuing until 10 March 2021, Weeks Marine dredge BORINQUEN will be operating in the Topsail Creek Cut Through and Banks Channel near Topsail Beach, NC. Demobilization will occur until approximately **25 March 2021**

Work limits for borrow area at "Topsail Creek/ Cut Through" will be bound by the following approximate positions:

34°21'12.91"N, 77°41'5.75"W, 34°21'46.85"N, 77°40'9.63"W, 34°20'6.02"N, 77°38'54.23"W, 34°19'36.46"N, 77°39'41.87"W Work limits for borrow area at "Banks Channel" will be bound by the following approximate positions:

34°20'59.32"N, 77°39'44.49"W, 34°20'37.83"N, 77°39'25.11"W, 34°23'7.26"N, 77°36'17.18"W, 34°23'16.50"N, 77°36'27.01"W

Work limits for placement area will be bound by the following approximate positions:

34°20'39.81"N, 77°38'45.39"W, 34°20'53.02"N, 77°39'1.49"W, 34°23'25.93"N, 77°35'21.57"W, 34°23'37.47"N, 77°35'34.35"W

Dredging operations will continue on a twenty-four hour per day, seven days per week basis. The dredge will monitor VHF-FM channels 13 and 16. If you have any question or require additional information, (985) 875-2564 or macruz@weeksmarine.com

NC – INTRACOASTAL WATERWAY – CORE CREEK RANGES R AND S – DREDGING

From **09 Feb** to **31 Mar 2021**, Southwind Construction Corp will be conducting dredging operations in the Intracoastal Waterway, Core Creek Ranges R & S, Carteret County North Carolina with fill placement at Brandt Island Upland Disposal Area. Submerged and floating pipeline associated with dredging operation will be in the area. Mariners are urged to transit at the slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made. Pipeline and vessels will be visibly lighted and marked pursuant to Coast Guard regulations. Submerged pipeline will be positioned parallel and adjacent to the federal channel traversing southerly to the upland placement area. Dredge, Andi Rae, Workboats, Proud Mary and Miss Leanne will monitor VHF –_FM Channels: 13 & 16 (All Vessels) and working Channel 79. For questions or more information, contact Darrell Stewart at 812-868-7006.

Charts 11541

NC – INTRACOASTAL WATERWAY – NEW RIVER INLET – DREDGING

Goodloe Marine will be dredging in the North Carolina AIWW waterway at New River Inlet crossing. The hydraulic dredge "BETTIE G II" will begin pumping material from the navigation channel to North Topsail Beach. After dredging the New River Inlet crossing the dredge will move to Jacksonville on or about **Jan 1, 2021**. Dredging operations are expected to be complete by the end of **Mar, 2021**. The Dredge can be contacted on Channel 16 and 65. Point of contact is Ben Goodloe at 813-355-7494.

Charts 11541

NC – INTRACOASTAL WATERWAY – CAROLINA BEACH INLET CROSSING – DREDGING

Goodloe Marine will begin dredging operations in the North Carolina AIWW at Carolina Beach Inlet crossing on or about Nov 15, 2020. The hydraulic cutter dredge EXCEL will be pumping oal material from the navigation channel on to the beach at Masonboro Island. After dredging Tangent 1 dredging will proceed to Tangents 4,4A, and 5 east of Hwy 421. Tangent 3 will also be dredged which is west of hwy 421 on Snows Cut. Mariners are cautioned to proceed at a slow speed in the area since pipelines, anchors, buoys and other equipment will be in and out of the channel limits. Work is expected to be completed near the end of **Mar 2021**. The dredge can be contacted on channel 16 and 65. Contact for project is Ben Goodloe at 813-355-7494.

Chart 11534

NC – CAPE FEAR RIVER – DREDGING

Great Lakes Dredge and Dock Company will be conducting dredging operations in the Cape Fear River from 17 Nov 2020 to **28 Feb 2021**. Dredging will be conducted in Smith Island Range and Bald Head Shoal Reach One and Two. All dredge material will be pumped to Bald Head Island via a submerged pipeline. The dredge OHIO will be on scene and may be contacted on VHF-FM Channels 13 and 16. Operations will be conducted 24 hours a day, seven days a week. Mariners are urged to use extreme caution in these areas, around dredging equipment, transit the area of dredging at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For questions or more information contact Steven Lawrence at (630) 240-8393.

Chart 11537

NC – CAPE FEAR RIVER – DREDGING

Southern Dredging Company dredge BRUNSWICK will be working in the Cape Fear River Channel between the Cape Fear Memorial Bridge and the Upper and Lower Brunswick Ranges in the vicinity of Cape Fear River Channel Lighted Buoy 58 (LLNR 30840). The Dredge will operate on a 24 hour per day, 7 day per week basis until approximately **31 Jan 2021**. Dredged material will be transported by pipeline to the Eagle Island disposal site on the West side of the river. To ensure safe passage, boaters should establish contact with the dredge on VHF-FM channels 13 and 16. For more information or questions, contact Neil Rodgers 843-729-1269 or Michael Kitchell 843-830-1015.

Chart 11537

NC - CAPE FEAR RIVER - CAPE FEAR MEMORIAL BRIDGE – BRIDGE MAINTENANCE

Mariners are advised that the highway drawbridge – Cape Fear Memorial Bridge over the Cape Fear Rive, mile 26.8, at Wilmington, NC, will be maintained in the closed-to-navigation position and will require a two hour advance notice to open from 8 a.m. to 3 p.m. from March 2, 2021, through March 3, 2021, with an alternative work date from 8 a.m. to 3 p.m. on March 4, 2021. There is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The bridge provides a vertical clearance of 65 feet above mean high water in the closed position. Vessels able to pass through the bridge in the closed position during these closure periods may do so at any time. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.822. Mariners should adjust their transits accordingly and should use caution when transiting the area.

Chart 11537

NC – OAK ISLAND BEACH – BEACH RE-NOURISHMENT

Great Lakes Dredge & Dock Company, LLC (GLDD) will be conducting beach re-nourishment using the hydraulic cutterhead, Dredge *Ohio*. 800,000 cubic yards of material will be removed from Jay Bird Shoals which is located approximately one mile offshore of Caswell Beach. All dredged material will be placed on the beach at Oak Island via a submerged dredge pipeline. A jack-up booster pump barge will also be install just offshore of Oak Island. Dredging operations will take place 24 hours per day and 7 days per week.

Material will be removed from Zone 1,

33 52.679580N, -78 3.470179W,

33 52.665851N, -78 3.454029W,
