LOCAL NOTICE TO MARINERS

District: 5

Week: 20/17

COASTAL WATERS FROM SHREWSBURY RIVER, NEW JERSEY TO LITTLE RIVER, SOUTH CAROLINA

The Local Notice to Mariners contains all information relevant to the waterways within the Fifth Coast Guard District and is updated each Tuesday on the U.S. Coast Guard Navigation Center website at <https://www.navcen.uscg.gov/?pageName=lnmDistrict®ion=5>.

If you have questions about the Fifth Coast Guard District Local Notice to Mariners (LNM), please contact:

COMMANDER
FIFTH COAST GUARD DISTRICT (dpw)
431 Crawford Street
Portsmouth, Virginia 23704

or for correspondence and article requests:

ward.b.posey@uscg.mil, (757) 398-6229 or matthew.e.kearney@uscg.mil, at (757) 398-6552 or CGD5Waterways@uscg.mil

All bearings are in degrees TRUE - All times are in Local Time unless otherwise noted.

AIDS TO NAVIGATION DISCREPANCY REPORTING

To report any Aids to Navigation discrepancies (missing, damaged, extinguished lights, off station), shoaling or hazards to navigation, discrepancies to bridge lighting, please contact the following 24 hour numbers:

1. For PA, NJ, DE waters, coastal and tributaries contact COGARD SECTOR DELAWARE BAY at (215) 271-4940.
2. For MD, DE in the Upper Chesapeake Bay and tributaries contact COGARD SECTOR MARYLAND NATIONAL CAPITAL REGION at (410) 576-2525.
3. For VA in Lower Chesapeake Bay below Smith Point Light and tributaries and VA, MD Eastern Shore Bay and coastal contact COGARD SECTOR HAMPTON ROADS at (757) 483-8567.
4. For NC waters, coastal and tributaries contact COGARD SECTOR NORTH CAROLINA at (910) 343-3882.

 Y - Yellow

Additional Abbreviations Specific to this LNM Edition: None

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

****** NEW OR UPDATED INFORMATION IN THE LOCAL NOTICE TO MARINERS ******

In an effort to bring attention to new or updated information in the Local Notice to Mariners (LNM) new and changed entries will be preceded and followed by four asterisks.

LNM: 25/16

******MD – CHESAPEAKE BAY – SEVERN RIVER – BLUE ANGELS AIR SHOW - TEMPORARY ACCESS CHANNEL******

In support of the annual U. S. Naval Academy Blue Angels Air Show practice and performance demonstrations over the Severn River at Annapolis, MD during May 23-24, 2017, a marked channel will be temporarily established in the Severn River near Horn Point on May 22, 2017. Eight green can buoys and eight red nun buoys will be located between Spa Creek Entrance Buoy 1SC (LLNR 19905) and Annapolis Harbor Channel LB 5 (LLNR 19730). The channel is intended to allow vessels to transit into and out of Annapolis Harbor during the two-day event. Vessels operating in this area do so at their own discretion. The following buoys will be deployed, listed with approximate positions:

Buoy	Latitude	Longitude	Buoy	Latitude	Longitude
------	----------	-----------	------	----------	-----------

BA01 38°58'16.74" N 076°27'46.32" W BA02 38°58'19.92" N 076°27'48.72" W
BA03 38°58'18.48" N 076°27'51.00" W BA04 38°58'22.14" N 076°27'53.64" W
BA05 38°58'20.64" N 076°27'57.06" W BA06 38°58'24.12" N 076°28'00.00" W
BA07 38°58'22.98" N 076°28'03.30" W BA08 38°58'25.62" N 076°28'04.98" W
BA09 38°58'25.44" N 076°28'11.16" W BA10 38°58'29.70" N 076°28'15.96" W
BA11 38°58'27.54" N 076°28'17.28" W BA12 38°58'33.54" N 076°28'25.68" W
BA13 38°58'29.16" N 076°28'22.62" W BA14 38°58'31.86" N 076°28'22.26" W
BA15 38°58'31.80" N 076°28'31.32" W BA16 38°58'34.86" N 076°28'30.30" W

At no time while the regulated area is being enforced will event spectators be permitted to obstruct either the temporary access channel, or the federal navigation channel outside of the regulated area. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region at (410) 576-2674 or (410) 576-2693.

LNM: 19/17

NC - HAZARDS OF NORTH CAROLINA COASTAL INLETS

This notice is to notify mariners about accessing hazardous inlets, to heighten public awareness about the hazards that exist in and around the inlets, and to provide the mariner with available information. Mariners are advised that shoaling conditions exist at following North Carolina coastal inlets:

Oregon Inlet Hatteras Inlet
Ocracoke Inlet Barden Inlet
Beaufort Inlet Bogue Inlet
New River Inlet Topsail Inlet
Masonboro Inlet Carolina Beach Inlet
Lockwoods Folly Inlet Shallotte Inlet

Shoaling conditions increase the potential for groundings. These inlets are subject to continual and sometimes rapid environmental changes. Mariners are highly encouraged to obtain the most recent U.S. Army Corps of Engineers Wilmington, North Carolina District hydrographic survey information, centerline waypoints and controlling depth at:

<http://www.saw.usace.army.mil/Missions/Navigation/HydrographicSurveys.aspx>

Mariners should use caution when navigating in these areas and passage through the inlets is not recommended without local knowledge of the area. The aids to navigation in these inlets may not be charted and may not be marking best water due to continually shifting shoals. Consult Local Notice to Mariners, 5th Coast Guard District for the latest positions and status of aids to navigation:

<https://www.navcen.uscg.gov/?pageName=InmDistrict®ion=5>

To report any aids to navigation discrepancies (missing, damaged, off station, extinguished lights), shoaling, hazards to navigation, or discrepancies on bridge lighting, please contact Sector North Carolina Command Center (910) 343-2200.

LNM: 17/16

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

LNM: 13/16

INTERFERENCE WITH AIDS TO NAVIGATION

U. S. Code, Title 14, Part I, Chapter 5, § 84

It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 81 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 83 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense.

U. S. Code, Title 14, Part I, Chapter 5, § 84

LNM: 13/16

COAST PILOT 3 - NEW EDITION

National Oceanic Atmospheric Administration (NOAA) – U.S. Coast Pilot 3, Atlantic Coast: Sandy Hook, NJ to Cape Henry, VA, 50th Edition, 2017, has been issued and is ready for free download and weekly updates at:

<http://nauticalcharts.noaa.gov/nsd/cpdownload.htm>.

Only Print-on-Demand (POD) bound copies are available for purchase; see <http://www.nauticalcharts.noaa.gov/staff/charts.htm#POD>.

The 2017 Edition cancels the preceding 2016 Edition, and incorporates all previous corrections.

LNM: 05/17

U.S. COAST GUARD AUXILIARY – PUBLIC EDUCATION CLASSES – FIND BY ZIPCODE

The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.

http://www.cgaux.org/boating/class_finder/index.php

LNM: 20/14

WESTERN ATLANTIC AND U.S. COASTAL WATERS - NORTH CAROLINA – SUNKEN MILITARY CRAFT ACT (SMCA) –PROHIBITION ON DISTURBING, REMOVING ARTIFACTS OR DAMAGING SUNKEN CRAFT

All mariners are advised of the special protections provided to sunken military craft by the "Sunken Military Craft Act" (SMCA) (Public Law 108-375). Along the U.S. East Coast, and particularly off North Carolina, there are many sunken U.S. and foreign military craft. Sunken military craft may be the final resting places of military personnel who died in service to their country and are also important historical resources. One very notable example is the wreck of the USS MONITOR, off the NC Coast, also protected by the National Marine Sanctuaries Act. Under international and U.S. law, sunken foreign military craft, including those located in U.S. waters, remain the property of their respective country's government. Sovereign immune vessels, such as military crafts, are afforded protections under U.S. and international law. Included among these vessels are at least three known sunken German submarines (commonly called U-boats) located in waters off the North Carolina coast. These U-boats remain the property of the Federal Republic of Germany. In accordance with the SMCA, no person shall engage in or attempt to engage in any activity directed at a sunken military craft that disturbs, removes, or injures the sunken craft or the associated contents of the craft except as authorized by law. This includes, but is not limited to, the equipment, cargo, contents of the vessel, and the remains and personal effects of the crew and passengers. Mariners are urged to exercise due care when operating in the vicinity of military wrecks, as they can be damaged by both purposeful or inadvertent activities including anchoring, fishing, diving, and other marine activities. Special dangers, such as unexploded ordnance, may also be associated with sunken military craft, and should be considered when operating in these areas. Violations of the SMCA may subject individuals to penalties of up to \$100,000 and to liability for damages. Mariners who witness theft of material from, disturbance of, or damage to a sunken military craft are asked to report it to the nearest U.S. Coast Guard unit.

LNM: 45/09

SAFETY NOTICE - NAVIGATIONAL RANGE STRUCTURES ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

LNM: 04/11

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

The United States Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information on GPS, DGPS, and LORAN-C. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via-e-mail subscription through the USCG Navigation Center website (<https://www.navcen.uscg.gov/gps/status/default.htm>). In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or LORAN service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: 703-313-5900, Email: webmaster@navcen.uscg.mil or on the World Wide Web at <https://www.navcen.uscg.gov>.

BROADCAST NOTICES TO MARINERS

Navigation information having been of immediate concern to the Mariner and promulgated by the following Broadcast Notices to Mariners (BNMs) have been incorporated in this notice when still significant at the date of this publication.

CCGD5 (D5) - 313, 317, 320, 322, 323, 324, 326, 328, 329, 330, 332, 334 THRU 343-17.

Sector Delaware Bay (DB) - 107, 108, 109, 111, 113, 115, 116, 118, 126, 127, 128, 129 AND 130-17.

Sector Maryland National Capital Region (MD) - 135, 134, 133, 132, 130, 127, 123, 122, 121, 120, 119, 118, 117, 116, 114, 113, 112-17.

Sector Hampton Roads (HR) - 142-17, 141-17, 140-17, 139-17, 137-17, 136-17, 135

-17, 134-17.

Sector North Carolina (NC) - 203-17, 202-17, 200-17, 195-17 AND 192-17, 222-17, 221-17, 220-17, 219-17, 218-17, 217-17, 216-17, 214-17, 207-17, 206-17 AND 205-17.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR					CGD01	
(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			at 40-41-09.001N	074-02-48.001W
		Green can				
	Corrective Action	Object of Corrective Action			Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS**Approved Project(s)****Project Date****Ref. LNM**

None

Advance Notice(s)******DE – NJ – DEAWARE RIVER – BELLEVUE RANGE – AIDS TO NAVIGATION CHANGES******

On or about June 1, 2017, the Coast Guard will make the following changes to the Aids to Navigation in Bellevue Range.

Bellevue Range Buoy 1B (LLNR 3095) – Discontinue Aid.

Bellevue Range Buoy 4B (LLNR 3105) – Discontinue Aid.

Bellevue Range Lighted Buoy 6B (LLNR 3110) – Relocate to approximate position 39° 45' 29.71"N, 075° 28' 50.79"W, rename to Delaware River Lighted Buoy 38.

Bellevue Range Buoy 3B (LLNR 3100) – Relocate to approximate position 39° 45' 50.02"N, 075° 28' 48.24"W and rename to Delaware River Buoy 39.

Bellevue Range Buoy 8B (LLNR 3120) – Add light, FIR 2.5s, 4NM and replaced by LIB of reduced intensity when endangered by ice. Rename to Delaware River Lighted Buoy 40.

Bellevue Range Buoy 5B (LLNR 3115) – Add light, FL G 4s, at 4NM and replace by can when endangered by ice. Relocate to approximate position 39° 47' 01.72"N, 075° 27' 40.74"W and rename to Delaware River Lighted Buoy 41.

Charts: 12311 12312

LNM: 18/17

******DE – NJ – PA - DELAWARE RIVER - MARCUS HOOK RANGE – AIDS TO NAVIGATION CHANGES******

On or about June 8, 2017, the Coast Guard will make the following changes to the Aids to Navigation in Marcus Hook Range.

Marcus Hook Range Lighted Buoy 2M (LLNR 3130) – Relocate to approximate position 39° 47' 04.608"N, 075° 27' 13.603"W and rename to Delaware River Lighted Buoy 42

Marcus Hook Range Buoy 2MA (LLNR 3145) – Discontinue Aid

Marcus Hook Range Lighted Buoy 1M (LLNR 3150) – Rename to Delaware River Lighted Buoy 43.

Marcus Hook Range Buoy 4M (LLNR 3155) – Rename to Delaware River Buoy 44

Marcus Hook Range Lighted Buoy 6M (LLNR 3160) – Rename to Delaware River Lighted Buoy 46.

Marcus Hook Range Lighted Buoy 9M (LLNR 3210) – Rename to Delaware River Lighted Buoy 47, decrease nominal range to 5NM.

Chart 12312

LNM: 18/17

******NJ – PA - DELAWARE RIVER - CHESTER AND EDDYSTONE RANGES – CHANGES TO AIDS TO NAVIGATION******

On or about June 15, 2017, the Coast Guard will make the following changes to Aids to Navigation in Chester and Eddystone ranges.

Chester Range Buoy 2C (LLNR 3240) – Rename to Delaware River Buoy 48.

Chester Range Lighted Gong Buoy 1C (LLNR 3215) – Rename to Delaware River Lighted Buoy 49, decrease nominal range to 5NM.

Chester Range Lighted Buoy 4C (LLNR 3245) – Rename to Delaware River Lighted Buoy 50, decrease nominal range to 5NM.

Chester Range Lighted Buoy 6C (LLNR 3255) – Rename to Delaware River Lighted Buoy 52.

Eddystone Range Lighted Buoy 1E (LLNR 3260) – Rename to Delaware River Lighted Buoy 53, decrease nominal range to 4NM.

Chart 12312

LNM: 18/17

******NJ – PA - DELAWARE RIVER - TINICUM RANGE – CHANGES TO AIDS TO NAVIGATION******

On or about June 22, 2017, the Coast Guard will make the following changes to the Aids to Navigation in Tincum Range.

Tincum Island Range Lighted Buoy 2T (LLNR 3270) – Rename to Delaware River Lighted Buoy 54.

Tincum Island Spit Buoy TS (LLNR 3295) – Add light, FI G 2.5s, 4NM and replace by can when endangered by ice. Relocate to approximate position 39° 51' 02.12"N, 075° 19' 24.33"W and rename to Delaware River Lighted Buoy 55.

Tincum Island Spit Buoy 4T (LLNR 3300) – Relocate to approximate position 39° 50' 51.82"N, 075° 18' 47.59"W and rename to Delaware River Buoy 56.

Tincum Island Range Buoy 3T (LLNR 3310) – Rename to Delaware River Buoy 57.

Tincum Island Range Lighted Buoy 5T (LLNR 3315) – Rename to Delaware River Lighted Buoy 59.

******VA – ELIZABETH RIVER - TEMPORARY CHANGES TO AIDS TO NAVIGATION IN SUPPORT OF 2017 HARBORFEST******

The following temporary changes will be made to aids to navigation within the Elizabeth River Channel to enhance boater safety during the upcoming Harborfest celebration to be held June 9 through June 11, 2017. Upon completion of the Harborfest celebrations these temporary changes will be removed and the Elizabeth River Channel aids to navigation system returned to its published characteristics.

A. Temporarily establish six yellow unlighted buoys in the following positions to mark the outer navigational limits of the spectator anchorage area as published in 33 CFR 110.72aa(a)1:

1. Elizabeth River Anchorage Buoy "A" at 36 50 49.693N, 076 18 07.650W.
2. Elizabeth River Anchorage Buoy "B" at 36 50 48.908N, 076 18 00.792W.
3. Elizabeth River Anchorage Buoy "C" at 36 50 46.691N, 076 17-56.652W.
4. Elizabeth River Anchorage Buoy "D" at 36 50 42.842N, 076 17 54.460W.
5. Elizabeth River Anchorage Buoy "E" at 36 50 37.064N, 076 17 51.576W.
6. Elizabeth River Anchorage Buoy "F" at 36 50 33.964N, 076 17 57.544W.

B. Temporarily change Elizabeth River Channel Buoy 31 (LLNR 9835) to Elizabeth River Channel Lighted Buoy 31 showing a Q G characteristic.

C. Establish three additional buoys.

1. Elizabeth River Channel Lighted Buoy 29A in approximate position 36 52 08.917N, 076 19 37.841W showing Q G characteristic.
2. Elizabeth River Channel Lighted Buoy 29B in approximate position 36 52 01.702N, 076 19 27.437W showing Q G characteristic.
3. Elizabeth River Channel Lighted Buoy 34A in approximate position 36 50 58.432N, 076 18 10.390W showing Q R characteristic.

Chart 12253

LNM: 20/17

******VA – MD – POTOMAC RIVER – ST GEORGE CREEK – AIDS TO NAVIGATION CHANGES******

The following aids to navigation changes will take place in St George Creek on or about 6 Jun 2017.

St. George Creek Junction Light A (LLNR 16665) will change to St. George Creek Junction Daybeacon A (LLNR 16665).

St. George Creek Light 2 (LLNR 16735) flash characteristic will change to Q R.

St. George Creek Light 7 (LLNR 16755) will change to St. George Creek Daybeacon 7 (LLNR 16755).

Chart 12233

LNM: 20/17

******VA – JAMESTOWN ISLAND TO JORDAN POINT – JAMES RIVER – JAMESTOWN LIGHTED DATA BUOY J - RELOCATION******

On or about June 5, 2017, the National Oceanic and Atmospheric Administration will be relocating Jamestown Lighted Data Buoy J (LLNR 12113) approximately 1300 yards NW (upriver), to a position approximately 300 yards SW of the Colonial Parkway bridge at the mouth of Sandy Bay.

Jamestown Lighted Data Buoy J from 37-12-15.000N, 076-46-39.000W to approximate position 37-12-44.960N, 076-47-07.700W.

Chart 12210

LNM: 18/17

******VA – YORK RIVER – TIMBERNECK CREEK – CEDARBUSH CREEK - DISCONTINUE AIDS TO NAVIGATION******

On or about April 25, 2017 the Coast Guard will discontinue and remove the following non-lateral aids to navigation.

Timberneck Creek Warning Daybeacon A (LLNR 13765).

Timberneck Creek Warning Daybeacon B (LLNR 13770).

Cedarbush Creek Warning Daybeacon A (LLNR 13870).

Charts: 12238 12241

LNM: 17/17

******VA – YORK RIVER - QUEEN CREEK - CHANGES TO THE AIDS TO NAVIGATION******

On or about May 9, 2017 The Coast Guard will make following changes to the aids to navigation marking Queen Creek:

Rename Queen Creek Entrance Daybeacon 3 (LLNR 13790) to Queen Creek Daybeacon 3 (LLNR 13790).

Change Queen Creek Entrance Daybeacon 4 (LLNR 13795) to Queen Creek Buoy 4 (LL 13795).

Change Queen Creek Daybeacon 7 (LLNR 13810) to Queen Creek Buoy 7 (LLNR 1381).

Change Queen Creek Daybeacon 11 (LLNR 13825) to Queen Creek Buoy 11 (LLNR 13825).

Change Queen Creek Daybeacon 13 (LLNR 13835) to Queen Creek Buoy 13 (LLNR 13835).

Change Queen Creek Daybeacon 20 (LLNR 13865) to Queen Creek Buoy 20 (LLNR 13865).

Chart 12243

LNM: 18/17

******NC – NEUSE RIVER TO MYRTLE GROVE SOUND – BOGUE INLET – TEMPORARILY DISCONTINUE AIDS TO NAVIGATION******

The Coast Guard is scheduled to temporarily discontinue 12 aids to navigation in Bogue Inlet during the next several weeks due to extensive shoaling that is causing navigational safety issues. Heavy shoaling in the vicinity of Bogue Inlet Buoy 6A (LLNR 29525) and Bogue Inlet Buoy 15 (LLNR 29560) has progressed over the past few months making the waterway inaccessible to vessels with a draft greater than three feet. The markers are misleading to mariners, which can be more dangerous than having no aids to navigation. Under current condition, the aids to navigation system can no longer be configured to safely mark a passable channel in the inlet on the western passage. The Coast Guard will evaluate and mark the Eastern passages of the Inlet currently mark with Emerald Isle Cut named aids and will rename these aids to Bogue Inlet aids

at a later date. It is anticipated that US Army Corps will be returning to Bogue Inlet to complete dredging in early June 2017 at which time the Coast Guard will then go back and officially mark the Eastern Passage. Mariners transiting through either east or west passages at Bogue Inlet do so at their own risk. Mariners are advised to check current US Army Corps survey at <http://www.saw.usace.army.mil/Missions/Navigation/Hydrographic-Surveys/Inlets-Crossings/> before making their transit through Bogue Inlet.

Aid to be temporarily discontinued:

Bogue Inlet Buoy 6A (LLNR 29525)

Bogue Inlet Buoy 7 (LLNR 29530)

Bogue Inlet Lighted Buoy 8 (LLNR 29535)

Bogue Inlet Lighted Buoy 10 (LLNR 29540)

Bogue Inlet Buoy 11 (LLNR 29550)

Bogue Inlet Buoy 12 (LLNR 29555)

Bogue Inlet Buoy 13 (LLNR 29557)

Bogue Inlet Lighted Buoy 14 (LLNR 29559)

Bogue Inlet Buoy 15 (LLNR 29560)

Bogue Inlet Lighted Buoy 16 (LLNR 29563)

Bogue Inlet Buoy 17 (LLNR 29565)

Swansboro Coast Guard Channel Junction Buoy CG (LLNR 29600)

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts to navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at

http://www.navcen.uscg.gov/pdf/Inms/D05%20LNM%202015%20Special%20Notice_Waterway_Proposal%20Feedback%20Form.pdf .

NC – SEACOAST – CURRITUCK BEACH LIGHT TO LITTLE RIVER — ARTIFICIAL REEF MARKER BUOYS

The State of North Carolina, Division of Marine Fisheries will be discontinuing all buoys marking the state's artificial reefs in the Atlantic Ocean. Artificial reef buoys are not required for safe navigation in the ocean, the state no longer has equipment capable of servicing them, and contracting for this service would be cost prohibitive. The Division of Marine Fisheries began this effort in late 2014 when it removed 11 buoys from artificial reefs. An additional 25 buoys were slated for removal once GPS coordinates were verified for navigational charts. These verifications have been made, and state and federal permitting agencies have given authorization to proceed. The division plans to continue maintaining all 42 ocean artificial reefs, periodically adding material and monitoring their status. GPS coordinates, site maps and other information about the artificial reefs can be found on the Artificial Reef Program's website: <http://portal.ncdenr.org/web/mf/artificial-reefs-program> or in the recently published paper-bound Artificial Reef Guide which is also available electronically from the website. For more information, contact Jason Peters with the division's Artificial Reef Program at 252-808-8063 or Jason.Peters@ncdenr.gov.

******NC – SEACOAST – CAPE HATTERAS TO LITTLE RIVER INLET - CAPE LOOKOUT LIGHT – CHANGE TO NOMINAL RANGE******

On or about 1 Oct 2017, unless required earlier because of submarine cable failure, the Coast Guard will change the nominal range of Cape Lookout Light (LLNR 640) from 24 nautical miles to 14 nautical miles. The light will maintain the current advertised light characteristic of FL W 15s and be visible all around. The change in nominal range is required due to the installation of LED optics and solar power to improve reliability of the light as aging optics and power systems are replaced. This 14 nautical mile nominal range extends approximately four nautical miles beyond Cape Lookout Shoals which is marked with four large lighted steel buoys.

LNM: 20/17

******NC – NEUSE RIVER TO MYRTLE GROVE SOUND – INTRACOASTAL WATERWAY - NEW RIVER –CAPE FEAR RIVER – AIDS TO NAVIGATION CHANGES******

The Coast Guard will discontinue the 5 aids to navigation listed below during the next few weeks. These aids were originally established as a temporary measure to mark extensive shoaling in the AIWW at Howards Creek Crossing. USACE dredging was conducted in December 2016 and the channel has remained stable since. New River - Cape Fear River Buoy 99A (LLNR 39548) will remain at the mouth of Howards Creek. Mariners are advised to check current US Army Corps survey at <http://www.saw.usace.army.mil/Missions/Navigation/Hydrographic-Surveys/Inlets-Crossings/> before making their transit through AIWW near Howards Creek Crossing.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

COAST GUARD POLICY ON NOTIFICATION OF PROPOSED CHANGES

Periodically, the Coast Guard, evaluates the system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing the aid is considered. In this regard, the Coast Guard is evaluating changes in aids to navigation as noted in the below articles. Users can provide feedback by filling out the District 5 Waterway Proposals data/feedback form, located at the NAVCEN D5 LNM website:

https://www.navcen.uscg.gov/pdf/Inms/D05%20LNM%202015%20Special%20Notice_Waterway_Proposal%20Feedback%20Form.pdf

This section also includes Public Notices for proposed changes to the bridges within the Fifth Coast Guard with a request for comments as indicated.

LNM: 41/11

******DE – MUDERKILL RIVER - ROOSEVELT INLET – PROPOSED MODIFICATIONS TO THE SEASONAL RELIEF SCHEDULE******

The Coast Guard is proposing the following modifications to the seasonal relief schedule for the following aids in Muderkill River & Roosevelt Inlet. All aids will be removed 10 December through 01 May annually, to assist local fishing tournaments with safe navigation and to establish an effective and correct timeframe for current ice conditions during winter season.

Roosevelt Inlet Buoy 4 (LLNR 2073)

Murderkill River Buoy 2 (LLNR 2315)

Murderkill River Buoy 3 (LLNR 2320)

Murderkill River Buoy 4 (LLNR 2330)

Murderkill River Buoy 5 (LLNR 2335)

Murderkill River Buoy 6 (LLNR 2337)

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at

******NJ – PA - DELAWARE RIVER - MIFFLIN AND EAGLE POINT RANGES – PROPOSED CHANGES******

As part of the Coast Guards proposals to change the naming convention and numbering of the lateral Aids to Navigation (buoys and lights) marking the Delaware River Main Channel, and changes to Aids to Navigation to support the 45ft deepening projects, the below listed changes are proposed. The new naming conventions and numbering will eliminate letter suffixes associated with reaches and ranges, as the aids will be numbered sequentially for the entire length of the Delaware River Channel, similar to the naming conventions for the Lower Delaware Bay Aids and Upper Delaware River Aids.

Mifflin Range Lighted Buoy 1F (LLNR 3380) – Rename Delaware River Lighted Buoy 61.

Mifflin Range Buoy 3F (LLNR 3385) – Rename Delaware River Buoy 63.

Elbow Lighted Bell Buoy 44 (LLNR 3405) – Remove bell and rename Delaware River Lighted Buoy 64.

Eagle Point Lighted Buoy 44A (LLNR 3490) – Rename Delaware River Lighted Buoy 66.

Eagle Point Buoy 46 (LLNR 3505) – Add light FIR 4s 4NM to aid and rename Delaware River Lighted Buoy 68.

Horseshoe Lower Lighted Buoy 33 (LLNR 3509) – Rename Delaware River Lighted Buoy 69.

Eagle Point Lighted Buoy 46A (LLNR 3515) – Rename Delaware River Lighted Buoy 70.

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at http://www.navcen.uscg.gov/pdf/Inms/D05%20LNM%202015%20Special%20Notice_Waterway_Proposal%20Feedback%20Form.pdf .

******VA - JAMES RIVER - JORDAN POINT TO RICHMOND – PROPOSAL TO DISCONTINUE STURGEON SPAWNING GROUND**

BUOYS****

In 2013, the James River Association constructed an artificial reef to support sturgeon spawning habitat on the James River outside, south, of the navigation channel downriver of the I-295 Bridge and upriver of Jones Neck Cut. They marked the channel ward corners of the reef with yellow buoys James River Lighted Data Buoy A (LLNR 12692) and James River Lighted Data Buoy B (LLNR 12692.1). Since then, ice and high water events have moved the buoys off station three times. Because of this, James River Association is proposing to discontinue the buoys. Interested mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigation safety. You may provide feedback using the US Coast Guard Fifth District Waterway Data Sheet, available online at:

https://www.navcen.uscg.gov/pdf/Inms/D05%20LNM%202015%20Special%20Notice_Waterway_Proposal%20Feedback%20Form.pdf
All comments will be carefully considered and are requested prior to May 30, 2017 to be considered in the analysis. Please reference LLNR 12692 and LLNR 12692.1.

******VA – CHESAPEAKE BAY - MOBJACK BAY AND YORK RIVER ENTRANCE – GOODWIN THOROFARE – BACK CREEK –MOBJACK BAY – AID CHANGES******

The Coast Guard is proposing the following changes to the aids to navigation marking Back Creek to ensure alignment with a charts and marked waterways.

Rename: Goodwin Thorofare Channel Light 2GT (LLNR 13310) to Back Creek Entrance Light 2BC (13310).

Rename: Goodwin Thorofare Channel Light 3 (LLNR 13315) to Back Creek Entrance Light 3 (LLNR 13315) and change the flash characteristic to FI G 2.5s.

Rename and change aid type: Goodwin Thorofare Channel Light 4 (LLNR 13320) to Back Creek Entrance Daybeacon 4 (LLNR 13320).

Rename and change aid type: Goodwin Thorofare Channel Daybeacon 5 (LLNR 13325) to Back Creek Entrance Light 5 (LLNR 13325); with FI G 4s flash characteristic.

Rename: Goodwin Thorofare Channel Daybeacon 7 (LLNR 13330) to Back Creek Entrance Daybeacon 7 (LLNR 13330).

Rename: Back Creek-Mobjack Bay Light 1BC (LLNR 13370) to Back Creek Light 1BC (LLNR 13370) and change the flash characteristic to FI G 2.5s.

Rename: Back Creek-Mobjack Bay Daybeacon 2 (LLNR 13372) to Back Creek Daybeacon 2 (LLNR 13372).

Rename: Back Creek-Mobjack Bay Daybeacon 3 (LLNR 13375) to Back Creek Daybeacon 3 (LLNR 13375).

Rename: Back Creek-Mobjack Bay Daybeacon 4 (LLNR 13380) to Back Creek Daybeacon 4 (LLNR 13380).

Rename: Back Creek-Mobjack Bay Daybeacon 5 (LLNR 13383) to Back Creek Daybeacon 5 (LLNR 13383).

Rename: Back Creek-Mobjack Bay Daybeacon 6 (LLNR 13385) to Back Creek Daybeacon 6 (LLNR 13385).

Remane: Back Creek-Mobjack Bay Daybeacon 7 (LLNR 13390) to Back Creek Daybeacon 7 (LLNR 13390).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

VA - ATLANTIC OCEAN - WALLOPS ISLAND ROCKET LAUNCHES

Rocket launches are regularly scheduled in the vicinity of Wallops Island, VA. Prior to these launches, visual signals will be displayed consisting of either a large orange-colored, "blimp-shaped" balloon by day or a signal rotating alternately red and white beacon by night. The balloon will be flown from a position at 37°50'38-N / 75°28'47-W and the beacon will be displayed approximately 200 feet above mean high water in position 37°50'16-N / 75°29'07-W. While the warning signal is displayed, all persons and vessels in the danger zone, except vessels entering or departing Chincoteague Inlet, shall leave the zone promptly by the shortest possible route and remain outside the zone until allowed by a patrol boat to enter or the danger signal has been discontinued. Vessels entering or departing Chincoteague Inlet must take the shortest route possible upon display of the danger signal. The danger zone is depicted on navigational charts 12210 and 12211 with corner points starting in the vicinity of Assawoman Inlet and proceeding southerly to position 37-43-20N / 075-29-41W; thence northeasterly to a point in the vicinity of Chincoteague Shoals; thence westerly back to Wallops Island shoreline.

LNM: 04/17

VA – CHESAPEAKE BAY – CAPE CHARLES TO NORFOLK HARBOR - JOINT EXPEDITIONARY BASE LITTLE CREEK FORT STORY – LIVE FIRING

Live firing is conducted continuously in Danger Zone 334.370, the area west of the south end of the Chesapeake Bay Bridge Tunnel, bounded by the following positions 36-55-24N 76-08-43W, 36-55-50N 76-08-37W, 36-57-16N 76-08-14W, 36-57-16N 76-08-14W, 36-56-58.5N 76-07-11W, 36-57-07N 76-07-44W. Firing is conducted Monday through Friday from 7:00 am to 8:00 pm. For questions or concerns about these operations you may contact Range Operations and Training Area, Mr. Assaf or Ms. Lawrence at 757-422-7103/7101.

Charts: 12222 12254

LNM: 19/16

VA - WILLOUGHBY BAY - THIMBLE SHOAL CHANNEL - HELICOPTER AIRBORNE MINE COUNTERMEASURES OPERATIONS

Helicopter Mine Countermeasures Squadron Fourteen (HM-14) routinely conducts airborne mine countermeasures (AMCM) operations utilizing the MH-53E helicopter at low altitudes over the following inland and coastal waterways:

- Willoughby Bay

- Thimble Shoal Channel from the Naval Station Norfolk piers to the Chesapeake Bay Bridge Tunnel.

- An area of the Chesapeake Bay, adjacent to the Thimble Shoal Channel from Thimble Shoal to the Chesapeake Bay bridge tunnel extending to the north four miles to form a four by seven mile rectangle.

During these operations, the aircraft will be operating at altitudes as low as seventy-five feet and will produce localized winds in excess of 125 miles per hour. Rotor wash produced winds pose a considerable hazard to vessels, especially sailing vessels. The devices the helicopters tow range in size and appearance from a large orange and white sled approximately the size of a pickup truck to slightly submerged steel pipes thirty feet in length, both of which have submerged cable extending well beyond the visible portion of the towed device. The Aircraft Commanders have been directed to exercise every effort to conflict and avoid surface vessels.

All mariners are requested to remain well clear of the helicopters, the towed devices, and the area extending directly behind the aircraft for four hundred yards. Do not approach or cross the area directly behind the towed device as a submerged hazard exists regardless of whether the device is in motion or stationary.

These operations involve large naval helicopters at flight altitudes of 100 feet or less, towing surface and sub-surface devices at speeds up to 25 knots. Helicopters may be identified by a rotating amber position light on centerline of main hull flashing 90 times per minute. An area of hurricane-force winds exists within a 250-foot radius around these helicopters, sufficient to blow people and objects from exposed decks and capsize small craft. The towed devices may be completely invisible and include large cables on or just below the surface streaming up to 1200 feet behind the aircraft. AMCM helicopters will transit to and from the area described above in the following manner: Outboard from the seaplane ramp at the Norfolk Naval Air Station across Willoughby Bay to the main shipping channel, then easterly along the main channel to Buoy 21. From Buoy 21 either East, SE or SSE to the operating area. The return flight will follow the same path as the outbound flight. To minimize the potential for mishap, vessels are requested to remain well clear of these danger zones when AMCM operations are encountered.

LNM: 01/16

VA - VIRGINIA CAPES OPERATING AREA (VCOA) - PERMANENT MINE WARFARE TRAINING FIELDS

VA - VIRGINIA CAPES OPERATING AREA (VCOA) - PERMANENT MINE WARFARE TRAINING FIELDS

The U.S. Navy has established four permanent mine warfare training fields within the Virginia Capes Operating Areas. The bounding coordinates for each field are as follow:

- AREA A: 37-09.0N 075-31.0W, 37-09.0N 075-34.7W, 37-12.0N 075-31.0W, 37-12.0N 075-34.7W.
- AREA B: 36-29.0N 075-31.8W, 36-29.0N 075-35.5W, 36-26.0N 075-35.5W, 36-26.0N 075-31.8W.
- AREA C: 36-29.0N 075-20.8W, 36-29.0N 075-24.5W, 36-26.0N 075-24.5W, 36-29.0N 075-20.8W.
- AREA D: 36-46.5N 075-47.8W, 36-46.5N 075-46.5W, 36-47.5N 075-46.5W, 36-47.5N 075-47.8W.

Each area contains inert bottom and moored training mines that pose a potential hazard to dredging operations and trawler nets. All moored mines are placed at a minimum of 40 feet depth (MLLW) to preclude them as hazards to navigation.

Chart 12200

LNM: 01/16

VA - COASTAL - STATE MILITARY RESERVATION, CAMP PENDLETON, VIRGINIA BEACH - SMALL ARMS LIVE FIRE SCHEDULE

The Camp Pendleton State Military Reservation Live Fire Small Arms Range described as "all of the waters seaward of the mean high water shore line within a sector between radial lines extending 13,500 yards seaward and bearing 090 degrees true and 150 degrees true, respectively, from a point on shore at 36° 49' 09"N, 075° 58' 45"W". All vessel operators are reminded to review Navigation Regulations as described in paragraph 334.380 of Chapter 2, of U.S. Coast Pilot 4, Atlantic Coast: Cape Henry to Key West (42nd) Edition when operating south of the entrance to the Chesapeake Bay. Firing will take place only during daylight hours and red flags will be displayed at conspicuous locations on the beach at the facility.

Scheduled Firing:

Vessels shall proceed through the area with caution and shall remain in the area no longer than necessary for transit.

LNM: 13/16

******NC - NEW RIVER - FIRING EXERCISES******

From the Commanding General, Marine Corps Installations East-Marine Corps Base Camp Lejeune, North Carolina:

The restricted areas in the Atlantic Ocean east of the New River Inlet as shown on National Ocean Service chart 11543, will be closed to navigation up to 15 NM seaward because of firing exercises

During the following periods:

24 hours each day, 16 - 18 May 17, Ship Operations.

Vessels are urged to avoid the above area during these periods. Mariners traveling in Atlantic Intracoastal Waterway through this area can expect a delays of about one to four hours during the below times. Range Control Boats, from Camp Lejeune, NC monitor Channel 16 VHF-FM and the working Channel 82 VHF-FM. Range Control can be reached by phone at 910-451-3064 or 4449.

The restricted areas in the New River, as shown on National Ocean Service chart 11542, will be closed to navigation because of Stone Bay rifle range firing exercises during the following periods:

- Stone Creek Sector 24 hours a day, daily.
- Stone Bay Sector 24 hours a day, daily.
- Traps Bay Sector 24 hours a day, daily.
- Courthouse Bay Sector 24 hours a day, daily.
- Stone Bay Sector 24 hours a day, daily.
- Grey Point Sector 24 hours a day, daily.
- Farnell Bay Sector sunrise to sunset – daily.
- Morgans Bay Sector sunrise to sunset – daily.
- Jacksonville Sector sunrise to sunset – daily.

The Target Bombing area N1/BT-3 impact area in the Atlantic Ocean east of the New River Inlet as shown on National Ocean Service Chart 11543, may be closed to navigation because of firing exercises during the following periods:

- 8:00 am - 5:00 pm, 16 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).
- 8:00 am - 5:00 pm, 17 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).
- 8:00 am - 5:00 pm, 18 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).
- 2:00 pm – 7:30 pm, 22 May 17, Live Fire Operations, (US ARMY, E 3-4 ADR).
- 8:00 am – 7:30 pm, 23 thru 28 May 17, Live Fire Operations, (US ARMY, E 3-4 ADR).

Atlantic Intracoastal Waterway, inland waters in the Browns Island Inlet area between Bear Creek and Onslow Beach, may be closed for firing exercises during the following periods:

- 8:00 am - 5:00 pm, 16 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).
- 8:00 am - 5:00 pm, 17 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).
- 8:00 am - 5:00 pm, 18 May 17, Live Fire Operations, (II MEF-2D ANGLICO, NSFS).

Due to unexploded ordnance on Browns Island and in the adjacent waterways and marsh areas, Browns Island is off limits to all unauthorized personnel. Vessels may transit the surrounding waters; however no vessel shall bottom fish or anchor.

Charts: 11541 11542 11543

LNM: 01/16

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. . Dredging projects are usually conducted twenty-four (24) hours a day seven (7) days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels. Please see Enclosure 7 for more information and warnings.

LNM: 01/16

******PA – NJ – DELAWARE RIVER – DELAIR MEMORIAL RAILROAD BRIDGE - DRAWBRIDGE TEMPORARY (TEST) DEVIATION******

The Coast Guard has issued a temporary deviation authorizing the DELAIR Memorial Railroad Bridge over the Delaware River, mile 104.6, in Delair, NJ, to be remotely operated from the Conrail South Jersey dispatch center in Mount Laurel, NJ, from 8 a.m. on April 24, 2017, to 7:59 a.m. on October 21, 2017. This deviation will test the remote operation capability of the drawbridge to determine whether the bridge can be safely operated from a remote location. During the temporary deviation, a bridge tender will be stationed on-site at the bridge and will be able to immediately take local control of the bridge, as required. The remote operation system of the bridge incorporates a dedicated telephone line (856) 231-2301 for bridge operations, a push-to-talk (PTT) opening signal of 5 clicks on VHF-FM channel 13, and an automated identification system (AIS) transmitter to provide real-time bridge status. AIS bridge status is provided via the name transmitted by the private aids to navigation as: DELAIR BRG-OPEN (fully open and locked position, channel light green), DELAIR BRG-CLOSED (other than fully open, not inoperative), or DELAIR BRG-INOP (other than fully open, inoperative). The AIS transmitter is assigned maritime mobile service identity (MMSI) number 993663001 and has been installed on the New Jersey side of the bridge at the bridge and land intersection in approximate position 39-58-50.52N, 75-03-58.75W. The Coast Guard is encouraging public participation and requesting comments concerning this temporary (test) deviation. Comments and related material must reach the Coast Guard on or before August 18, 2017. Please access the Federal eRulemaking Portal at <http://www.regulations.gov> to view docket number USCG-2016-0257 for additional details and to provide comments concerning this temporary (test) deviation.

NJ – GREAT EGG HARBOR BAY - GARDEN STATE PARKWAY BRIDGE – DEMOLITION

An engineering firm, on behalf of the New Jersey Turnpike Authority, will be performing a bridge demolition project at the Garden State Parkway (southbound) Bridge across the Great Egg Harbor Bay, at mile 3.5, between Beesley's Point and Somers Point, NJ, from November 1, 2016 until February 28, 2018, between 7 a.m. and 4 p.m., Monday through Saturday. A second work shift and 24-hour operations may be scheduled via separate notice and broadcast notice to mariners. The old Garden State Parkway (southbound) Bridge across Great Egg Harbor Bay will be demolished and removed from the waterway. Vessels and barges will be operating and working in the area and necessary waterway closures will be scheduled via separate notice and broadcast notice to mariners. A work trestle situated at the southwest end of the Garden State Parkway Bridge erected in 2013 in connection with the construction of the new southbound structures will be used for equipment staging and debris removal. Mariners should use extreme caution when transiting the area.

MD – CHESAPEAKE BAY – BALTIMORE HARBOR – NORTHWEST HARBOR – MILITARY AMPHIBIOUS VEHICLE TESTING

On water operational testing of approximately 55 of the BAE Systems 27-foot long Assault Amphibious Vehicles (AAV) is scheduled to occur in Baltimore, MD from January 2017 through early September 2017. Testing will be somewhat sporadic and done in intervals. The anticipated scenario is to test 2 to 4 vehicles every two to four weeks, involving an estimated 20 working days total over an 8 to 9 months period. Each AAV test will involve off load and loading of vehicles from a truck, entry to swim area with ramp or crane from the Baltimore Marine Center boat yard at 1800 S. Clinton Street in Canton, tethered leak check and approximately ½-hour swim operational checks for each vehicle. The AAV will be accompanied by a safety support boat with divers to provide recovery and to pull the vehicle back to shore, if necessary. Testing activity is expected to occur in water over 12 feet in depth and in reasonably calm conditions with relatively light boat traffic. Interested mariners may contact the Baltimore Marine Center at Lighthouse Point at 410-675-8888 or via marine band radio VHF-FM Channel 16 for more information.

MD – CHESAPEAKE BAY – APPROACHES TO BALTIMORE HARBOR – PATAPSCO RIVER – SEDIMENT BORING OPERATIONS

J.D. Hynes and Associates will be conducting sediment borings in the Patapsco River at Baltimore, MD from on or about May 15 until on or about June 15, 2017. The work will occur at various locations between Hawkins Point and Sollers Point, in the vicinity of the Francis Scott Key Memorial (I-695/Baltimore Beltway) Bridge. All activities should remain clear of the federal navigation channel and will include use of a spud barge "151" (85' x 40' x 5.5'). A Smith Marine tug will be onsite at all times when the barge is on location. The barge will be moved to the northwestern shoreline by the foot of the bridge at night and lighted in accordance with CG regulations. Mariners are urged to use caution when transiting the area, and to operate at minimum wake speed needed to maintain safe course near the sediment boring site. Interested mariners can contact the tug "Miss Dee" via marine band radio VHF channels 16 and 13.

NC - OREGON INLET CHANNEL - HERBERT C. BONNER BRIDGE CONSTRUCTION & REPLACEMENT

Construction activities for the replacement bridge began on March 7, 2016 and are expected to finish on August 30, 2019. Work will be on-going 24-hours per day, seven days a week. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins. Tugs, crane barges, material barges, support vessels and crew boats will be operating or stationed in the vicinity of the existing and new bridge. Crane barges will be secured in place with four anchors connected by anchor wires to the corners of the barge. The anchor locations will be marked with yellow crown buoys within an approximate 500-ft radius of the crane barge. A work trestle/loading dock will be constructed approximately 200 yards south of the southeastern end of the existing Bonner Bridge, on the southwest side of South Point in Pamlico Sound, extending 150 feet southwesterly from the shoreline and terminate at approximately 35.766 N, 75.526 W. Running parallel to the dock will be a 245 foot breast-line comprised of eight 36-inch hollow pipe piles spaced fifty feet apart, to be used for mooring purposes. The breast-line will begin near shore and terminate at approximately 35.765N, 75.527 W. Each pile will be lit by a flashing white light. PCL Civil Constructors tugs and vessels will monitor VHF-FM channels 13 and 16 when work is in progress or vessels are operating in the area. The NCDOT Resident Engineer may be contacted at (252) 473-3637 and PCL Civil Constructors may be contacted at (252) 423-3093. Project information may be found at <http://www.ncdot.gov/projects/bonnerbridgereplace/>.

SUMMARY OF SHOALING REPORTED IN THE FIFTH COAST GUARD DISTRICT

DELAWARE SHOALING

DE – PA – NJ – DELAWARE RIVER – NEW CASTLE RANGE – SHOALING

There have been reports of shoaling in New Castle Range in the Delaware River. The shoaling is reportedly in the main navigation channel as follows: On the western side of the channel between the north side of the entrance to the Chesapeake and Delaware Canal and the southern end of Pea Patch Island, extending from the western edge of the channel approximately 300 feet into the channel. Mariners are advised to use extreme caution when transiting these portions of New Castle Range as some depths at Mean Low Low Water could be hazardous to navigation, especially during extreme weather events. Vessels drafting over 35 feet should pay particular attention to the tide and proceed with caution in the vicinity of the shoal. If you have any questions regarding the content of this bulletin, please contact the Waterways Management staff at (215) 271-4814 or the Command Center at (215) 271-4807. Ref LNM 08/17
Chart 12311

DE – PA – NJ – DELAWARE RIVER – DEEP WATER POINT RANGE – SHOALING

The Captain of the Port, Delaware Bay, is notifying mariners that there have been reports of shoaling in Deepwater Point Range in the Delaware River. The shoaling is reportedly in the main navigation channel as follows: Beginning on the north western side of the range, approximately 1400 feet south of Lighted Bell Buoy "1C" (LLN 2965), extending south on the western side 2400 feet past Lighted Buoy "5D" (LLN 2950), from the western edge of the channel 200 feet towards centerline. Beginning approximately 2800 feet north of Lighted Buoy "4D" (LLN 2945), extending south along the eastern side of the channel to the end of the range, from the eastern edge of the channel approximately 200 feet into the channel. Mariners are advised to use extreme caution when transiting these portions of Deepwater Range as some depths at Mean Low Low Water could be hazardous to navigation, especially during extreme weather events. Vessels drafting over 35 feet should pay particular attention to the tide and proceed with caution in the vicinity of the shoal. If you have any questions regarding the content of this bulletin, please contact the Waterways Management staff at (215) 271-4814 or the Command Center at (215) 271-4807. Ref LNM 08/17
Chart 12311

DE – PA – NJ – CHERRY ISLAND RANGE – SHOALING

The Captain of the Port, Delaware Bay, is notifying mariners that there have been reports of shoaling in Cherry Island Range. The shoaling is reportedly in the main navigation channel as follows: Beginning on the western side of the channel 1100 feet south of Green Buoy "7C" (LLN 3035) extending approximately 1000 feet past Green Buoy "5C" (LLN 3025), from the western edge of the channel approximately 100 feet into the channel. Mariners are advised to use extreme caution when transiting these portions of Cherry Island Range as some depths at Mean Low Low Water could be hazardous to navigation, especially during extreme weather events. Vessels drafting over 35 feet should pay particular attention to the tide and proceed with caution in the vicinity of the shoal. If you have any questions regarding the content of this bulletin, please contact the Waterways Management staff at (215) 271-4814 or the Command Center at (215) 271-4807. Ref LNM 08/17
Chart 12311, 12312

DE – PA – NJ – DELAWARE RIVER – MARCUS HOOK RANGE – SHOALING

The Captain of the Port, Delaware Bay is notifying mariners that there have been reports of shoaling in Marcus Hook Range. The shoaling is reportedly in the main navigation channel beginning on the Pennsylvania side at Marcus Hook Range Lighted Buoy 9M (LLNR 3210), traveling Southwest into the channel at centerline and on the New Jersey side for 1500 yards. Mariners are advised to use extreme caution when transiting this portion of the Marcus Hook Range as some depths at Mean low water could be hazardous to navigation, especially during extreme weather events. Vessels drafting over 35 feet should pay particular attention to the tide and proceed with caution in the vicinity of the shoal. You can find the latest Army Corps of Engineers survey data on their website at <http://www.nap.usace.army.mil/Missions/Civil-Works/Surveys/Projects/PhiladelphiatoSea/>. For questions regarding the content of this bulletin, please contact the Waterways Management Staff at (215) 271-4814 or the Command Center at (215) 271-4807. Ref LNM 07/17
Chart 12312

******PA – NJ – CHESTER RANGE – SHOALING******

The Coast Guard has received a report of shoaling 40ft within the PA side of the channel in approx position 39-49'33.80"N, 075-22'39.81"W. The rock mound has been reported to have a minimum depth of 39.1ft. Mariners are urged to use caution when transiting the area.
CHART 12312

DE- INDIAN RIVER BAY – SHOALING

There has been a report of shoaling in Indian River Bay between Indian River Inlet Buoy 19 (LLNR 4435) and Middle Island West Channel Junction Lighted Buoy MI (LLNR 4436). Depths of 0.0 ft at times, during low tide, were reported.
Chart 12216

NEW JERSEY SHOALING

NJ - INTRACOASTAL WATERWAY- SANDY HOOK TO LITTLE EGG HARBOR - MANASQUAN - ATLANTIC CITY

There has been a report of shoaling in the New Jersey Intracoastal Waterway within the channel boundaries in the vicinity of New Jersey Intracoastal Waterway Light 40 (LLNR 35125), to a depth of less than 4 feet 9 inches at mean low water. Ref LNM 05/16
Chart 12312

NJ - INTRACOASTAL WATERWAY- LITTLE EGG HARBOR – CAPE MAY - MANASQUAN - ATLANTIC CITY

Shoaling has been reported in the NJ Intracoastal Waterway (NJ-ICW) between NJ-ICW Daybeacon 159 (LLNR 35640) and NJ-ICW Buoy 161 (LLNR 35649).
Chart 12316

NJ - LITTLE EGG INLET TO HEREFORD INLET – LITTLE EGG INLET – SHOALING

Shoaling has been observed in Little Egg Inlet across the channel between to an average channel depth of 3 feet at MLW. As a result, the aids to navigation have been removed because they did not accurately mark safe water. DB BNM 008-17
Chart 12318

PENNSYLVANIA SHOALING

MARYLAND SHOALING

MD - FENWICK ISLAND TO CHINCOTEAGUE INLET-OCEAN CITY INLET – SHOALING

A USACE survey conducted on 18 Oct 16 has identified shoaling to a depth of 7 ft at MLLW between Ocean City Inlet Lighted Buoy 8 (LLNR 4745) and Ocean City Inlet Lighted Buoy 10 (LLNR 4750) and shoaling to a depth of 6 ft at MLLW between Ocean City Inlet Lighted Buoy 11 (LLNR 4755) and Ocean City Inlet Lighted Buoy 12 (LLNR 4757). Ref LNM 43/16, MD-NCR BNM 364-16
Chart 12211

MD - FENWICK ISLAND TO CHINCOTEAGUE INLET - SINEPUXENT BAY – SHOALING

Sinepuxent Bay Channel Daybeacon 11B (LLNR 5050), shoaling encroaches approximately 20 yds into the channel in a southwesterly direction. Water depths have been found as low as 2.5 ft during low tide. Between Sinepuxent Bay Channel Light 8 (LLNR 5020) and Sinepuxent Bay Channel Daybeacon 10 (LLNR 5035), shoaling encroaches approximately 15 yds into the channel in an easterly direction. Water depths have been found as low as 2 ft during low tide. Between Sinepuxent Bay Channel Buoy 33 (LLNR 5130) and Sinepuxent Bay Channel Daybeacon 35 (LLNR 5135) on the eastern side of the channel. Water depths have been found as low as 3 ft during low tide.
Chart 12211

MD - CHESAPEAKE BAY - TANGIER SOUND - NORTHERN PART - RHODES POINT GUT CHANNEL

There has been a report of shoaling in Rhodes Point gut channel within the channel boundaries between Rhodes Point Gut Channel Buoy 3 (LLNR 23000) and Rhodes Point Gut Channel Buoy 5 (LLNR 23005), to a depth of less than six feet at mean low water. Depth is reading approx one and a half feet. Ref MD BNM 278-16
Chart 12228

MD - CHESAPEAKE BAY - CHESAPEAKE BAY TO PINEY POINT - ST. JEROME CREEK - SHOALING

Maryland DNR survey of the mouth of St. Jerome Creek indicates shoaling, to at least depth of 3.1 feet MLLW, in the channel between St. Jerome Creek Light 4 (LLNR 18810), St. Jerome Creek Daybeacon 4A (LLNR 18812) and St. Jerome Creek Daybeacon 6 (LLNR 18815). The channel width in the area of St. Jerome Daybeacon 4A (LLNR 18812) and Deep Point is reduced to approx 20 ft. MD-NCR BNM 415-16, Ref LNM 52/16
Chart 12233

MD/VA - POTOMAC RIVER - PINEY POINT TO LOWER CEDAR POINT - ST. CATHERINE SOUND LOWER ENTRANCE - SHOALING

Shoaling exists in St. Catherine Sound Lower Entrance at the following locations: (1) off the northeastern tip of St. Catherine Island extending channel ward between position 38-14-17.586N, 076-47-15.562W and position 38-14-32.841N, 076-47-14.761W, and (2) in the vicinity of St. Catherine Sound Lower Entrance 4L (LLNR 17230). Ref LNM 44/16, CCGD5 BNM 524-16
Chart 12286

MD - CHESAPEAKE BAY – LITTLE CHOPTANK RIVER - SLAUGHTER CREEK - SHOALING

The shoals on the western portion of Slaughter Creek in the vicinity of Holland Point have slowly encroached easterly for most of the federally marked channel. The shoal adjacent to Slaughter Creek Light 2SC (LLNR 24645) has encroached approx 50-100 yds easterly with observed depths of 3-4' in between tide cycles. Shoaling to 5' MLW has been observed on the red side of the channel between Slaughter Creek Daybeacon 6 (LLNR 24670) and Slaughter Creek Buoy 8 (LLNR 24683). Sec MD-NCR BNM 045-17
Chart 12264, 12266

MD - CHESAPEAKE BAY - HONGA, NANTICOKE AND WICOMICO RIVERS – FISHING BAY - TAR BAY

A USACE survey conducted in Apr 2016 has identified shoaling to a depth of less than one foot at mean low water between Tar Bay Channel Daybeacon 4 (LLNR 24595) and Tar Bay Channel Daybeacon 8 (LLNR 24615). The channel width has been significantly reduced. Observed depths are between 2-4' at high tide. Sec MD-NCR BNM 044-17
Chart 12261

MD – CHESAPEAKE BAY- CHESTER RIVER – KENT ISLAND NARROWS NORTH APPROACH

Depths of less than 4 feet have been reported between Kent Island Narrows North Approach LT 4 (LLNR 26425) and Kent Island Narrows North Approach LT 6 (LLNR 26435) on the red side of the channel. Vessels transiting the Kent Island Narrows North Approach Channel should exercise caution. Ref LNM 05/16
Chart 12272

******MD – CHESAPEAKE BAY - ROCK HALL HARBOR – SHOALING******

The MD DNR Survey of Rock Hall Harbor Entrance, dated April 21, 2017 indicates shoaling across the marked channel from Rock Hall Harbor Entrance Buoy 1 (LLNR 26890) to Rock Hall Harbor Light 5 (LLNR 26900). Least depths range to 6.9 feet to 4.8 feet MLLW.

SUMMARY OF BRIDGE PERMITS, REGULATIONS AND CONSTRUCTION IN THE FIFTH COAST GUARD DISTRICT

(Yellow indicates new item)

CURRENT PROJECTS

Permits:

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland** –
Potomac River - Harry Nice Memorial Bridge – Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on November 10, 2016; vertical clearance of 106.5 feet above mean high water and a horizontal clearance of 250.
Neale Sound – MD-254 (Cobb Island Road) Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 22, 2017; vertical clearance of 20 feet above mean high water and a horizontal clearance of 55 feet.
- **Washington DC**
Anacostia River – Frederick Douglass Memorial/South Capitol Street (swing) Bridge – Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 8, 2015; vertical clearance of 42 feet above mean high water and a horizontal clearance of 150.
- **Virginia (Northern)**
Potomac River - Harry Nice Memorial Bridge – Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on November 10, 2016; vertical clearance of 106.5 feet above mean high water and a horizontal clearance of 250.

SECTOR DELAWARE BAY

- **Delaware**
Christina River – Christina River Bridge – Permit (1-17-5) signed April 7, 2017, for a fixed bridge across the Christina River, mile 3.8, City of Wilmington, New Castle County, DE. The bridge will provide a minimum vertical clearance of 14 feet above mean high water and a horizontal clearance of 150 feet centered on the axis of the navigable channel.
Raccoon Creek – US 130 (fixed) Bridge - new fixed bridge structure to replace (lift) bridge. Permit 2-15-5 signed December 9, 2015.
- **Pennsylvania**
Schuylkill River – Schuylkill River Grays Ferry Pedestrian Bridge – Replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on February 6, 2017; vertical clearance of 26 feet above mean high water (closed position) for swing drawbridge replacement alternative and vertical clearance of 50 feet above mean high water for fixed bridge replacement alternative; both replacement alternatives will provide a horizontal clearance of 75 feet (west) and 65 feet (east), via the existing swing drawbridge horizontal clearances.

SECTOR HAMPTON ROADS

- **Virginia (Southern)**
AICW – Elizabeth River Southern Branch – I-64/High Rise Bridge – VDOT has proposed to replace the existing drawbridge with a new fixed bridge at essentially the same location. The replacement project will modify the existing vertical clearance of the bridge. The charted vertical clearance of the existing bascule bridge in the closed-to-navigation position is 65 feet above MHW with unlimited vertical clearance in the full open position. The proposed replacement will be a fixed bridge that will provide a vertical clearance of 100 feet above MHW. The current horizontal clearance of 125 feet will be maintained for the new fixed bridge.
Elizabeth River (Western Branch) – US Route 17 (Churchland) Bridge - The purpose of this notice is to notify mariners, adjacent property owners, and government agencies that the City of Portsmouth has submitted an application to the Commander, Fifth Coast Guard District, to replace the existing (Churchland) bridge on US Route 17 (High) street across the Western Branch of the Elizabeth River in Portsmouth, VA. The new bridge will have a vertical clearance of 37 feet above mean high water, along with a horizontal clearance of 80 feet. The proposed project will replace the north-bound bridge with a multi-span continuous structure with spliced concrete girders. It will provide for two 12 foot travel lanes, 4 foot wide inside shoulder, an 8 foot wide outside shoulder and a 14 foot wide multi-use path separated from the vehicle lanes by a safety barrier. It is requested that the Coast Guard be provided with navigational information such as the sizes and types of vessels presently owned and operated on the Western Branch of the Elizabeth River as they relate to the proposed vertical and horizontal clearances. Comments should be forwarded to the above address attention **(dpb)** no later than **April 22, 2017**. Copies of **Preliminary Public Notice 5-1371** which describes the proposal in detail can be obtained by calling (757) 398-6227 or by viewing at <http://www.navcen.uscg.gov/?pageName=pnBridges>.

SECTOR NORTH CAROLINA

- **North Carolina**
Atlantic Intracoastal Waterway – NC 210/50 Bridge, Surf City, NC - proposed new fixed bridge structure to replace (swing) bridge. Permit 2-16-5 signed September 27, 2016.
The Straits – Harkers Island Bridge – Bridge Replacement - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 24, 2017; vertical clearance of 45 feet above mean high water and a horizontal clearance of 125 feet.

Regulations:

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Washington, DC & Virginia (Northern)** – None

SECTOR DELAWARE BAY

- **Delaware** – None

- **New Jersey (Central & Southern)**

NJICW – Barnegat Bay – SR37 (vertical-lift) Bridge – The CG is temporarily modifying the drawbridge operating schedule between December 1, 2015 and March 31, 2018. Over the span of two and half years, the drawbridge will be closed to navigation for three four-month closure periods in the winter months. Extensive replacement of parts and repairs to the bridge necessitate these closures.

Delaware River - DELAIR Memorial Railroad Bridge - The Coast Guard has issued a temporary deviation authorizing the bridge to be remotely operated from the Conrail South Jersey dispatch center in Mount Laurel, NJ, from 8 a.m. on April 24, 2017, to 7:59 a.m. on October 21, 2017. This deviation will test the remote operation capability of the drawbridge to determine whether the bridge can be safely operated from a remote location. During the temporary deviation, a bridge tender will be stationed on-site at the bridge and will be able to immediately take local control of the bridge, as required. The remote operation system of the bridge incorporates a dedicated telephone line (856) 231-2301 for bridge operations, a push-to-talk (PTT) opening signal of 5 clicks on VHF-FM channel 13, and an automated identification system (AIS) transmitter to provide real-time bridge status. AIS bridge status is provided via the name transmitted by the private aids to navigation as: DELAIR BRG-OPEN (fully open and locked position, channel light green), DELAIR BRG-CLOSED (other than fully open, not inoperative), or DELAIR BRG-INOP (other than fully open, inoperative). The AIS transmitter is assigned maritime mobile service identity (MMSI) number 993663001 and has been installed on the New Jersey side of the bridge at the bridge and land intersection in approximate position 39 degrees, 58 minutes, 50.52 seconds North (39.9807 N), 75 degrees, 03 minutes, 58.75 seconds West (-75.06632 W). The Coast Guard is encouraging public participation and requesting comments concerning this temporary (test) deviation. Comments and related material must reach the Coast Guard on or before August 18, 2017. Please access the Federal eRulemaking Portal at <http://www.regulations.gov> to view docket number USCG-2016-0257 for additional details and to provide comments concerning this temporary (test) deviation.

Construction, et al:

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland**

Choptank River - MD 331/Dover (fixed) Bridge – Construction activities begun on September 16, 2014 and are expected to finish in November 2018. Detailed project information and information concerning the waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins. Tugs, crane barges, and vessels are operating or stationed in the vicinity of the existing and new bridge. McLean Contracting Company's tugs and vessels are monitoring VHF-FM channel 13 when work is in progress or vessels are operating in the area. The MDSHA project engineer may be contacted at (816) 989-4019 and McLean Contracting Site Supervisor may be contacted at (443) 980-7633. Mariners should use extreme caution when transiting the area. Project Information may be found at: <http://apps.roads.maryland.gov/WebProjectLifeCycle/ProjectSchedule.aspx?projectno=TA392515>

Bear Creek - I-695 Bridge - Maintenance will be conducted between Wednesday, April 19, 2017, and Thursday, May 31, 2018; Mon-Fri; from 6 a.m. to 5 p.m. Repair and rehabilitation of the bridge will require up to 30 foot wide construction barges, and various construction craft to be working outside the navigable channel. This maintenance project is in conjunction with the Francis Scott Key Bridge project. Periodic maintenance updates will be added into the Local Notice to Mariners. Maintenance personnel, equipment and vessels can relocate. The vessels may be reached on VHF-FM channel 13 and 16. Mariners should use caution when transiting the area.

Patapsco River - Francis Scott Key Bridge - Maintenance will be conducted between Wednesday, April 19, 2017, and Thursday, May 31, 2018; Mon-Fri; from 6 a.m. to 5 p.m. Repair and rehabilitation of the bridge will require up to four, 30 foot wide construction barges, and various construction craft to be working outside the navigable channel. Periodic maintenance updates will be added into the Local Notice to Mariners. Maintenance personnel, equipment and vessels can relocate. The vessel may be reached on VHF-FM channel 13 and 16. The project superintendent can be reached at (571) 422-7954. Mariners should use caution when transiting the area.

South River - Riva Road Bridge - Underwater maintenance will be conducted from 7 a.m. to 5 p.m.; Monday- Friday; on May 1, 2017 through November 17, 2017. A 50 foot barge, a 19 foot skiff, several work floats and several work vessels will be in the vicinity of the bridge. Work vessels may be reached on VHF-FM channel 13. The project foreman can be reached at (443) 603-8311. Mariners should notify the work foreman no less than thirty minutes prior to navigating through the bridge and should use caution when transiting the area.

- **Washington DC** –

Potomac River - Francis Scott Key (fixed) Bridge - DDOT has completed a design for rehabilitation. This work commenced in May 2015 and is scheduled to continue for two years (OOA May 2017). Most of the work has to do with repairing cracks on the concrete arches, floor beams, piers and abutments, and repairing some deterioration of the underside of the bridge deck.

Potomac River – Washington DC Long Bridge – Maintenance will be performed on the bridge between March 10, 2016 and March 28, 2017. There is no pier work or work over the navigational channel. Mariners should use extreme caution when transiting the area.

- **Virginia (Northern)** - None

SECTOR DELAWARE BAY

- **Delaware**

Christina River – Industrial Trail Track Bridge (new pedestrian bridge) - Construction activities will begin on January 03, 2017, and are expected to finish on April 27, 2018. Workers will be on-scene from 7 a.m. to 4 p.m.; M-F. To facilitate the construction, a 41' barge and 2 work boats will be in and around the vicinity and will relocate from the navigable channel, upon request. The 41' barge will remain on-scene after work hours away from the navigational channel. Work vessels may

be reached on VHF-FM channel 13. The project foreman can be reached at (302) 363-1093. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners and broadcast notice to mariners. Mariners are urged to use caution when transiting the area.

- **New Jersey (Central & Southern)**

Delaware River – Commodore Barry (fixed) Bridge – To facilitate painting, work will continue until 2019. Work platforms will be installed 3 feet beneath the bridge in various locations reducing the vertical clearance to 178 ft. above mean high water at the edge of the navigable channel (187 ft. center of channel). Phase 1 – NJ approach girder and deck truss spans due completion in September 2016. Phase 2 – PA approach girder and deck truss spans, scheduled to commence fall of 2016. Phase 3 – Cantilever truss span, scheduled to commence in 2017 and conclude in 2019. Mariners should exercise caution.

Drag Channel & Great Egg Harbor Bay (GEHB) – Garden State Parkway (fixed) Bridges - Marine work consisting of several activities including but not limited to temporary cofferdam construction, superstructure erection and demolition are in progress through December 2018 for the replacement of the existing southbound bridges and rehabilitation of the northbound bridges. In addition to replacing the southbound causeway, the project includes the demolition of the remaining portions of the Beesely's Point Bridge (US Route 9 over GEHB and Drag Channel). Daily hours of construction operations are Monday through Saturday from 7 a.m. to 5 p.m. with a second shift and 24-hour operations scheduled for specific activities. It is anticipated that closure or reduced horizontal clearance of the navigational channels will be required.

Great Egg Harbor Bay - Garden State Parkway (southbound) Bridge – Demolition of the old bridge will be performed from November 1, 2016 until February 28, 2018, between 7 a.m. and 4 p.m., Monday through Saturday. A second work shift and 24-hour operations may be scheduled via separate notice and broadcast notice to mariners. One to three 40-foot barges will be placed in the navigation span from November 21, 2016, until January 15, 2017, limiting the approximate horizontal clearance through the navigation span to between 30 feet and 110 feet. Vessels and barges will be operating and working in the area and necessary waterway closures will be scheduled via separate notice and broadcast notice to mariners. A work trestle situated at the southwest end of the Garden State Parkway Bridge erected in 2013 in connection with the construction of the new southbound structures will be used for equipment staging and debris removal. Mariners should use extreme caution when transiting the area.

Great Egg Harbor Bay - Garden State Parkway (northbound and southbound) Bridges – Construction of a new fender system will occur from April 17, 2017, until February 26, 2018, between 7 a.m. and 4 p.m., Monday through Friday. One or more barges will be placed in the navigation span adjacent to the fender system, limiting the horizontal clearance through the navigation span to approximately 90 feet. Vessels may contact the marine superintendent via VHF-FM channels 13, 16 or 9 and (609) 381-9837. Mariners should use extreme caution when transiting the area.

Great Egg Harbor Bay - Garden State Parkway (Northbound) Bridge - Maintenance will be performed from November 1, 2016, until February 28, 2018, between 7 a.m. and 4 p.m., Monday through Saturday. A second work shift and 24-hour operations may be scheduled via separate notice and broadcast notice to mariners. Bridge work will include superstructure removal and replacement, deck repair and resurfacing, parapet replacement, substructure repairs, and fender replacement. A work platform extending approximately 2 feet below low steel of the bridge will be installed over the middle portion of the bridge, reducing the vertical clearance of the navigation span to approximately 48 feet. Vessels and barges will be operating and working in the area and necessary waterway closures will be scheduled via separate notice and broadcast notice to mariners. Mariners should use extreme caution when transiting the area.

Delaware River - Interstate 276/Delaware River Turnpike Bridge - Repainting and miscellaneous improvements will be performed from mid-November 2015 through December 31, 2017. All work on the bridge superstructure will be performed 7 am to 7 pm during the week and 6 am to 6 pm on the weekends. The overhead work will never occupy more than 55% of the channel and will reduce the vertical clearance by 5 ft. The construction company can be contacted at 856-429-3400. Mariners should use extreme caution when transiting the area.

Tuckahoe River - Route 50/State Highway Bridge - Mariners are advised of continued demolition work. The next stage of demolition work will include removal of the bridge superstructure, abutment walls, fender system and the bascule piers from 7:00 a.m. to 3:30 Monday through Friday, from September 2016 through January 2017. Mariners should adjust their transits accordingly. Construction is complete, waterway survey in process.

Manahawkin Bay (NJICW) - Route 72 Bridges – Bridge construction continues until May 2019. The new Route 72 Manahawkin Bridge has a vertical clearance of 55 feet above mean high water and a horizontal clearance of 100 feet between fender systems. In addition to bridge construction, marine construction operations include installation and removal of work trestles, caissons and cofferdams, bridge scaffolding and false work, as well as demolition of portions of the existing bridge not utilized in the new bridges. A containment system will be installed on the old bridge within the navigation span in March 2017, extending 4 feet below low steel, reducing the vertical clearance to approximately 51 feet above mean high water. This containment system will remain in place for approximately 3 months until June 30, 2017, when demolition of the old bridge is complete. Vessels may contact the demolition crew supervisor at (732) 751-2088 or (732) 751-2020. Vessels and barges will be used during marine construction and will monitor VHF-FM channel 13. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins. Mariners should use caution when transiting the area.

Salem Canal - Munson Dam (60-inch water line) Bridge -Repairs will be conducted from March 27, 2017, through September 01, 2017; M-F, from 7 a.m. to 3:30 p.m. To facilitate repairs, a crane barge will be on-scene to assist with the demolition and construction of concrete pilings. The Project Foreman and crane barge will be monitoring VHF Channels 13 and 16. Mariners are urged to minimize wake and use caution when transiting the area.

NJICW – Great Channel - CR 657 (Stone Harbor Blvd) Bridge - Maintenance will be conducted from April 24, 2017, to June 9, 2017; Monday through Friday from 5 a.m. to 1 p.m. and Sunday through Thursday from 10 p.m. to 5 a.m. The snooper truck and maintenance personnel will relocate from the moveable span, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman can be reached at (609) 952-3831. Mariners should use caution when transiting the area.

Delaware River - SR 413, Burlington-Bristol Bridge – Bridge is under a temporary deviation from the current operating regulation set out in 33 CFR 117.716, to tension all of the moveable lift span's sixty-four (64) counterweight ropes. Under this temporary deviation, the bridge will remain in the closed-to-navigation position from 9 p.m. to 5 a.m., Sunday through Friday, from April 30, 2017, through July 14, 2017. During closure periods, the bridge will open on signal if at least one hour notice is given. At all other times the bridge will operate per 33 CFR 117.716. The bridge is vertical lift, and has a vertical clearance in the closed-to-navigation position of 61 feet above mean high water. Vessels able to pass through the bridge in the closed position may do so at anytime. Mariners should use caution when transiting the area.

- **Pennsylvania –**

Delaware River – Walt Whitman Bridge (I-76) - Painting of the suspension spans and towers will be conducted from October 19, 2015 to March 31, 2018, between 7 a.m. and 5 p.m. daily. A work platform extending 3 feet beneath the lower portion of the bridge will be installed over the entire length of the bridge. The vertical clearance of the bridge will be reduced by 3 feet to approximately 136 feet above MHW. Mariners should use caution when transiting the area.

Delaware River - Interstate 276/Delaware River Turnpike Bridge - Repainting and miscellaneous improvements will be performed from mid-November 2015 through December 31, 2017. All work on the bridge superstructure will be performed 7 am to 7 pm during the week and 6 am to 6 pm on the weekends. The overhead work will never occupy more than 55% of the channel and will reduce the vertical clearance by 5 ft. The construction company can be contacted at 856-429-3400. Mariners should use extreme caution when transiting the area.

Delaware River - SR 413, Burlington-Bristol Bridge – Bridge is under a temporary deviation from the current operating regulation set out in 33 CFR 117.716, to tension all of the moveable lift span's sixty-four (64) counterweight ropes. Under this temporary deviation, the bridge will remain in the closed-to-navigation position from 9 p.m. to 5 a.m., Sunday through Friday, from April 30, 2017, through July 14, 2017. During closure periods, the bridge will open on signal if at least one hour notice is given. At all other times the bridge will operate per 33 CFR 117.716. The bridge is vertical lift, and has a vertical clearance in the closed-to-navigation position of 61 feet above mean high water. Vessels able to pass through the bridge in the closed position may do so at anytime. Mariners should use caution when transiting the area.

SECTOR HAMPTON ROADS

- **Virginia (Southern)**

AICW – Elizabeth River Southern Branch – Dominion Blvd Replacement (fixed) Bridge Project – Contractors have installed the permanent beam and construction continues through March 2017. The fixed height is at 95 feet above MHW. The old steel (bascule) bridge spans have been completely removed.

Lynnhaven Inlet – US 60/John A. Lesner (fixed) Bridge – Work is in progress through August 30, 2019 for a new replacement bridge at essentially the same location. The new bridge will have a vertical clearance of 45 feet above MHW, along with a horizontal clearance of 150 feet between face of the fenders. A dredge material placement site will be located southwest of the existing bridge, adjacent to the boat ramp facility and used as a staging area. The contractor will access the lay down and staging area via the waterway through a proposed temporary bulkhead.

Rappahannock River - SR 3 (Robert O. Norris Jr.) bridge - Maintenance will be conducted between October 3, 2016 through November 2017; 24 hours a day; 7 days a week. A containment system will be installed over the entire length of the bridge extending 4 feet below low steel. The vertical clearance of the bridge will be reduced by 4 feet, to approximately 106 feet above mean high water. A work platform will be attached to the bridge. Maintenance personnel, equipment, two barges and work vessels will be in the vicinity of the bridge. Quick flashing red lights will be positioned no more than 10 feet apart and on all corners, to mark the bottom of the work platform used attached to the bridge. Work vessels may be reached on VHF-FM channel 13. The project foreman can be reached at (804) 577-0049 or (216) 235-3933. Mariners should use caution when transiting the area.

Rappahannock River - Robert O. Norris Bridge - Maintenance will be conducted between Wednesday, May 10, 2017, through Wednesday, August 2, 2017; M-Th; from 7 a.m. to 5 p.m., and if necessary, Fridays from 7 a.m. to 3 p.m. Repair and rehabilitation of the bridge will require scaffolding to extend a maximum of 10 feet below the bridge, in less than a 40 foot section for the entirety of the maintenance period. A work barge will be below the bridge and can relocate with 60 minutes notice. The barge will be monitoring VHF channel 13 during all operations and all floating equipment will be removed after each work day. Mariners should use caution when transiting the area.

James River - James River Bridge - Maintenance has already commenced and is scheduled to be completed December 30, 2017. The workers will be on-scene 24 hours; M-F. The project foreman can be reached at (804) 520-9766. The maintenance will not affect operations of the movable span or restrict the height or width of the main navigational channel. Mariners should use caution when transiting the area.

Elizabeth River, Southern Branch - I-64 High Rise Bridge - Maintenance will be conducted from December 30, 2016 to August 17, 2017; Monday through Saturday from 7 a.m. to 5 p.m. Repair and rehabilitation of the bridge will occur. A barge and work boats will be in and around the vicinity of the bridge. Maintenance personnel, equipment and vessels will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13. The project foreman can be reached at (804) 520-9766. Mariners should notify the work foreman no less than one hour prior to navigating through the area and should use caution when transiting the area.

SECTOR NORTH CAROLINA

- **North Carolina**

Gallants (Beaufort) Channel – US 70/Grayden Paul (fixed) Bridge – Work is in progress through May 31, 2017 for construction of a high-level fixed bridge relocated between Radio Island and Michael J Field in Carteret County. When completed, the new high-level fixed bridge will have a vertical clearance of 65 feet above MWH, along with a horizontal clearance of 100 feet between pile bents. The construction operation will include in-water work involving pile driving, concrete placement, girder setting, and concrete deck installation with post tensioning. Tugboats and barges will be used and will monitor VHF channel 13 in the event that mariners need to contact the contractor. Waterway closures are being planned.

Oregon Inlet - Herbert C. Bonner Bridge – Construction activities for the replacement bridge will begin on March 7, 2016 and are expected to finish on August 30, 2019. Work will be on-going 24-hours per day, seven days a week. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners,

broadcast notice to mariners and marine safety information bulletins. Tugs, crane barges, material barges, support vessels and crew boats will be operating or stationed in the vicinity of the existing and new bridge. A work trestle/loading dock will be constructed approximately 200 yards south of the southeastern end of the existing Bonner Bridge, on the southwest side of South Point in Pamlico Sound, extending 150 feet southwesterly from the shoreline and terminate at approximately 35.766 N, 75.526 W. Running parallel to the dock will be a 245 foot breast-line comprised of eight 36-inch hollow pipe piles spaced fifty feet apart, to be used for mooring purposes. The breast-line will begin near shore and terminate at approximately 35.765N, 75.527 W. Each pile will be lit by a flashing white light. PCL Civil Constructors tugs and vessels will monitor VHF-FM channels 13 and 16 when work is in progress or vessels are operating in the area. The NCDOT Resident Engineer may be contacted at (252) 473-3637 and PCL Civil Constructors may be contacted at (252) 423-3093. Project information may be found at <http://www.ncdot.gov/projects/bonnerbridgereplace/>.

Cape Fear River - US 17/Wilmington Bypass Bridge - Construction activities begun on November 21, 2013 and are expected to be finished May 2017. When completed, the US 17/Wilmington Bypass Bridge will have a vertical clearance of 64 feet above mean water and a horizontal clearance of 160 feet. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety bulletins. Work barges and work boats are operating or stationed in and around the vicinity of the new bridge. Balfour Beatty Infrastructure, Inc.'s vessels will be monitoring VHF-FM channel 13 when work is in progress or when vessels are operating in the area. The NCDOT project engineer may be contacted at (910) 251-2691 or (757) 705-5246 and Balfour Beatty Infrastructure Inc.'s Site Supervisor may be contacted at (910) 231-3447 or (910) 632-2995. Mariners should use extreme caution when transiting the area.

Toomers Creek - US 17/Wilmington Bypass Bridge - Construction activities begun on November 21, 2013 and are expected to be finished November 2017. When completed, the US 17/Wilmington Bypass Bridge will have a vertical clearance of 26 feet above mean water and a horizontal clearance of 48 feet. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety bulletins. Work barges and work boats are operating or stationed in and around the vicinity of the new bridge. Balfour Beatty Infrastructure, Inc.'s vessels will be monitoring VHF-FM channel 13 when work is in progress or when vessels are operating in the area. The NCDOT project engineer may be contacted at (910) 251-2691 or (757) 705-5246 and Balfour Beatty Infrastructure Inc.'s Site Supervisor may be contacted at (910) 231-3447 or (910) 632-2995. Mariners should use extreme caution when transiting the area.

SUMMARY OF DREDGING/MARINE CONSTRUCTION PROJECTS CURRENTLY IN PROGRESS

****PA - DE - NJ - DELAWARE RIVER - MARCUS HOOK RANGE - DREDGING****

Mariners are advised that the dredge Illinois will begin pipe laying and dredging operations in the southern end of Marcus Hook Range on May 18, 2017 and continuing until **31 Jul 2017**, working their way to the north end of the range. The COTP is establishing a Safety Zone in anchorage no. 7 found in 33c CFR 110.157 (a) (8). This Safety Zone will be in place only during the time the dredge Illinois is conducting dredging operations in Marcus Hook range. Vessel requesting to transit Marcus Hook range shall contact the dredge Illinois on VHF-FM channel 13 or 16, at 1 hour, as well as 30 minutes, prior to arrival. Vessel shall then transit around the dredge project, utilizing Marcus Hook anchorage, while operating at the minimum safe speed necessary to maintain steerage and reduce wake. Entry into, transiting, or anchoring within the Safety Zone is prohibited unless vessels obtain permission from the Captain of the Port or make satisfactory passing arrangements with the dredge Illinois per this rule and the rules of the road (33 CFR subchapter e). Vessels desiring to anchor within Marcus Hook anchorage must obtain permission from the Captain of the Port at least 24 hours in advance, at (215) 271-4807. The COTP will permit one vessel at a time in Marcus Hook anchorage on a "first-come, first-served" basis. Normally, this is a 48 hour anchorage; however, vessels will not be permitted to occupy the anchorage beyond 12 hours during this time. Chart 12311, 12312

PA - DELAWARE RIVER - FORT MIFFLIN TANK FARM TERMINAL - CONSTRUCTION

Commerce Construction Corporation will be performing dock construction work on the Sunoco Logistics Dock B in the Delaware River at the Fort Mifflin Tank Farm Terminal, Fort Mifflin, PA on the North side of the Mifflin Range of the Delaware River, in approximate position 39 52 1, 75 13 00. The work will be complete by **Jun 30, 2017**. Contact Jon Wall at 856-241-0300 or jonwall@commerceconstruction.com for questions. Ref LNM 09/17 Chart 12312

PA - DELAWARE RIVER - MARCUS HOOK, PA - DOCK CONSTRUCTION

Commerce Construction Corporation crane barge SAMSON will be performing dock construction work on the Sunoco logistics dock #1A in the Delaware River at the Marcus Hook industrial complex, Marcus Hook, PA. Work is expected to be completed on or about **30 June, 2017**. Ref LNM 05/16 Chart 12312

SUMMARY OF MARINE EVENTS AND FIREWORKS DISPLAYS IN THE FIFTH COAST GUARD DISTRICT

****MD - FENWICK ISLAND TO CHINCOTEAGUE INLET – ISLE OF WIGHT BAY – FIREWORKS DISPLAY - SAFETY ZONE****

An annual fireworks display is scheduled to occur in Isle of Wight Bay on Sunday, **May 28, 2017** (rain date May 29, 2017), at 9:30 p.m. As described in the Table to 33 CFR Section 165.506, a Safety Zone is established for all waters of Isle of Wight Bay within a 200 yard radius of the fireworks barge in approximate position latitude 38°22'31" N, longitude 075°04'34" W, located at Ocean City, MD. The zone will be enforced from 8:30 p.m. to 10:30 p.m. on May 28, 2017. If necessary due to inclement weather, the zone will be enforced from 8:30 p.m. to 10:30 p.m. on May 29, 2017. The effect will be to restrict vessel traffic in the Isle of Wight Bay. The fireworks barge within the regulated area will have a diamond-shaped, 4 feet by 4 feet sign with orange retro-reflective border affixed to the port and starboard sides of the barge labeled "FIREWORKS—DANGER—STAY AWAY" with black block letters on a white background to provide on scene notice that the safety zone will be enforced. The Coast Guard Captain of the Port Maryland-national Capital Region can be contacted by telephone at (410) 576-2525 or by marine band radio on VHF-FM Channel 16. The Coast Guard Patrol Commander or the designated on-scene-patrol personnel enforcing this zone can be contacted on marine band radio VHF-FM Channel 16. Comments or questions should be directed to Coast Guard Sector Maryland-national Capital Region, Waterways Management Division, at telephone number (410) 576-2674 or (410) 576-2693.
Chart 12211

****MD - SEACOAST - FENWICK ISLAND TO CHINCOTEAGUE ISLAND - OCEAN CITY – FIREWORKS DISPLAY****

An annual low-level, aerial fireworks display is scheduled to occur along the North Atlantic Ocean at Ocean City, MD, on **June 3, 2017**, at 9:30 p.m. The fireworks will be discharged from the beach near the Clarion Hotel, at 10100 Coastal Highway, in approximate position latitude 38°24'52.65" N, longitude 075°03'19.61" W. Absent specific guidance, persons should remain 50 yards from the fireworks discharge site. For any comments or questions contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.
Chart 12211

MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT – SAILING REGATTA

An annual sailing regatta is scheduled to occur on the Chesapeake Bay on **May 20, 2017**, between 10 a.m. and 4:30 p.m. Up to 35 sailboats (30 to 45 ft in length) will race on a designated course located on waters north and south of the William P. Lane Jr. (US-50/301) Memorial Bridges, between the entrances to the Severn and Magothy River. Interested mariners may contact a Race Committee vessel via marine band radio VHF-FM channels 16 and 72. More information on the 7th Annual SCC/GIYS Regatta can be obtained at the Sailing Club of the Chesapeake website www.scc1944.org. For any comments or questions contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.
Charts 12270, 12278, 12282

MD - CHESAPEAKE BAY - COVE POINT TO SANDY POINT - CHESAPEAKE CHANNEL – FIREWORKS DISPLAY

A short-duration, aerial fireworks display is scheduled to occur along the Chesapeake Bay on **May 20, 2017** (rain date September 16, 2017), at 8 p.m. The fireworks will be discharged from the end of the pier at Breezy Point Beach and Campground in Calvert County, MD at Chesapeake Beach, MD, located in approximate position latitude 38°37'11.3" N, longitude 076°30'45.6" W. Mariners are urged to use caution when transiting the area, and absent specific guidance, should remain 150 yards from the fireworks discharge site. For any comments or questions contact Coast Guard Sector Baltimore Waterways Management Division at (410) 576-2674 or (410) 576-2693.
Chart 12266

MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT – EASTERN BAY – SEVERN AND MILES RIVERS – SAILING REGATTAS

Eastport Yacht Club's (EYC) annual sailing regattas are scheduled to occur in the Severn River and the Chesapeake Bay, near the mouth of the Severn River. Three individual events, with competing sailing vessels 24 to 45 feet in length, are scheduled on the following dates between 8 a.m. and 5 p.m. in 2017: May 13 (Elf Classic Yacht Race - 15 participants); May 27 (Annapolis to Miles River Race - 120 participants); and **May 28** (Miles River Race Back - 50 participants). The EYC Committee can be contacted at race.committee@eastportyc.org, and VHF-FM channels 16, 73 and 05. For any comments or questions, contact Coast Guard Sector Maryland-national Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.
Charts 12270, 12282, 12283

****MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT – WILLIAM P. LANE, JR. MEMORIAL BRIDGES – REGULATED AREA****

The annual "The Great Chesapeake Bay Swim" is scheduled to occur on Sunday, **June 11, 2017**. The 4.4-mile distance swim across the Chesapeake Bay will start at 8:30 am and finish at 12:30 pm. As described in Title 33 CFR Sec. 100.501, a regulated area is established for all waters of the Chesapeake Bay between and adjacent to the spans of the William P. Lane Jr. Memorial Bridges from shoreline to shoreline, bounded to the north by a line drawn parallel and 500 yards north of the north bridge span that originates from the western shoreline at latitude 39°00'36.6" N., longitude 076°23'55" W., thence eastward to the eastern shoreline at latitude 38°59'14.2" N., longitude 076°19'57.3" W.; and bounded to the south by a line drawn parallel and 500 yards south of the south bridge span that originates from the western shoreline at latitude 39°00'18.4" N., longitude 076°24'28.2" W., thence eastward to the eastern shoreline at latitude 38°58'39.2" N., longitude 076°20'8.8" W. The regulated area will be enforced from 7:30 a.m. to 1:30 p.m. on June 11, 2017. Except for persons or vessels authorized by the Coast Guard Patrol Commander, and event sponsor-designated participants and marine event patrol vessels, no person or vessel may enter or remain in the regulated area. The Coast Guard Captain of the Port Maryland-National Capital Region can be contacted at telephone number (410) 576-2525 or 2693. The marine event patrol and Patrol Commander can be contacted on VHF-FM channel 16. The Patrol Commander or designated marine event patrol may forbid and control the movement of all vessels in the regulated area, and upon being hailed or signaled by an official patrol vessel, the operator of a vessel shall immediately comply with the instructions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both. Persons or vessel operators may request authorization to enter, transit through, anchor in, or remain within the regulated area by contacting the Patrol Commander. When authorized to transit the regulated area, all vessels shall proceed at the minimum speed necessary to maintain a safe course that minimizes wake near the event area. For any comments or questions, Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.

The Annapolis Yacht Club's (AYC) annual sailing regattas are scheduled to occur in the Severn River and the Chesapeake Bay, near the mouth of the Severn River, between 10 a.m. and 4 p.m. 22 individual events, with competing sailing vessels 8 to 45 feet in length, are scheduled on the following dates in 2017: June 10 (Annual Regatta - 45 participants); June 17 (CRAB Cup - 4 participants); June 24-25 (U.S. Sailing Match Race Qualifier - 8 participants); July 6 (Junior Annual Regatta - 40 participants); July 8-9 (Free State Team Race - 12 participants); July 14-18 (Ida Lewis Regatta - 40 participants); July 22 (Summer One Design Regatta - 25 participants); August 26-27 (Corinthian Cup - 12 participants); September 9-10 (Harbor 20 East-Wests - 16 participants); September 16-17 (Inter-Club Team Race - 8 participants); September 22-24 (J/35 North Americans - 15 participants); September 30-October 1 (Fall Series Weekend 1 - 50 participants); October 7 (Fall Series Distance Race - 75 participants, and Fall Harbor Regatta - 25 participants); October 14-15 (Fall Series Weekend 2 - 60 participants); October 17-19 (Warrior Sailing Project - 8 participants); October 21-22 (Fall Eschells - Lippincott - 30 participants); October 28-29 (Halloween Howl - 45 participants, and J/105 & J/35 Fall Championships - 40 participants). The AYC Race Committee can be contacted via VHF-FM marine band radio and at <http://www.annapolisyc.com/racing/contacts>. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693. Charts 12270, 12282, 12283

MD – CHESAPEAKE BAY – SEVERN RIVER – ANNAPOLIS HARBOR – SAILING REGATTA WEEKLY SERIES

A sailing regatta is scheduled to occur weekly in the Chesapeake Bay near the mouth of the Severn River, the Severn River, and Annapolis Harbor, from May 12, 2017 through **August 25, 2017**, between 5 p.m. and 8:30 p.m. Up to 40 sailboats (20-45 feet in length) will compete on fixed marked courses on the Severn River on the following race dates on Fridays in 2017: SERIES 1 - 12 and 19 May; 02, 09, 16, 23 and 30 June; SERIES 2 - 07, 14, 21 and 28 July; 11, 18 and 25 August. The Eastport Yacht Club's Race Committee can be contacted at race.committee@eastportyc.org, and via marine band radio VHF-FM channels 16, 73 and 05. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693. Charts 12270, 12282, 12283

MD – CHESAPEAKE BAY – SEVERN RIVER & COLLEGE CREEK – REGULATED AREA

The U. S. Naval Academy will host its Blue Angels Air Show over the Severn River at Annapolis, MD on Wednesday, **May 24, 2017** at 2 p.m. High-speed, low-flying fixed-wing aircraft will operate between the Severn River (US-50) Bridge and Greenbury Point, MD. The event also includes a circle and arrival at 11 a.m. and a practice demonstration at 2 p.m. on Tuesday, May 23, 2017. As described in 33 CFR 100.501, a Regulated Area is established for all waters of the Severn River, from shoreline to shoreline, bounded to the northwest by a line drawn along the Severn River (US-50/301 highway) Bridge. The Regulated Area is bounded to the southeast by a line drawn from the U.S. Naval Academy Light at 38°58'39.5" N, 076°28'49.0" W, thence southeast to a point 1500 yards east of Chinks Point, MD at 38°57'41" N, 076°27'36" W, thence northeast to Greenbury Point at 38°58'27.7" N, 076°27'16.4" W. The effect will be to restrict vessel traffic on the Severn River and College Creek. The Regulated Area will be enforced from 9:30 a.m. to 4 p.m. on May 23, 2017, and from 9:30 a.m. to 4 p.m. on May 24, 2017. However, if the circle and arrival cannot be conducted on Tuesday, May 23, 2017 due to inclement weather, the Regulated Area will be enforced from 9:30 a.m. to 4 p.m. on Wednesday, May 24, 2017. Mariners are urged to schedule their transits on these waterways beyond the enforcement times on both days. The Patrol Commander or designated marine event patrol may forbid and control the movement of all vessels in the Regulated Area. When hailed or signaled by an official patrol vessel, a vessel in the area shall immediately comply with the directions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both. The marine event patrol and Patrol Commander may be contacted on VHF-FM channel 16. The operator of any vessel in the Regulated Area shall proceed at the minimum speed necessary to maintain a safe course that minimizes wake while within the Regulated Area. All persons and vessels shall remain outside the designated air show box. A marked temporary access channel (8 red buoys and 8 green buoys) will be established near Horn Point, to allow vessels to transit into and out of Annapolis Harbor during the event; vessels operating in this area will do so at their own discretion. At no time will spectators be permitted to obstruct either the temporary access channel or the federal navigation channel outside the Regulated Area. A "Commercial Vessel Spectator Zone" is located immediately adjacent to the temporary access channel, bounded by a line commencing at 38°58'38.2" N, 076°27'56.9" W, thence southeast to 38°58'24.9" N, 076°27'47.6" W, thence west to 38°58'22.3" N, 076°27'54.5" W, thence northwest to 38°58'28.3" N, 076°28'11" W, thence east to point of origin. This designated spectator area lies generally in the center portion of Middle Ground Anchorage, Severn River, MD, and is restricted to commercial small passenger vessels pre-approved by the Captain of the Port Maryland-National Capital Region for spectator area access. Mariners should expect the presence of a single U.S. Navy Yard Patrol craft anchored in the middle of the Severn River during May 23-24, 2017, used to mark the centerline of the air show flight box. In addition, several floating markers will be placed along the northern and southern boundaries of the air show box to indicate a buffer area established for Coast Guard safety patrol and enforcement operations. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region at (410) 576-2674 or (410) 576-2693. During the events, the Coast Guard Station Annapolis Officer-of-the-Day can be contacted at (410) 267-8108. Charts 12282, 12283

******MD – CHESAPEAKE BAY – CHESTER RIVER – OPEN WATER SWIM EVENT******

An open water distance swim is scheduled to occur across the Chester River on **May 20, 2017**, from 9 a.m. to 11 a.m. Two swimmers will operate along a 3.23-mile course, starting at the Eastern Wildlife Refuge shoreline at Cabin Cove at position latitude 39°01'35.8" N., longitude 076°14'22.8" W., and proceed westerly across the Chester River, finishing at the Kent Island shoreline at latitude 39°00'42.6" N., longitude 076°17'48.5" W. If necessary, due to inclement weather, the event will be postponed and held on any one of the following dates and times: (i) on May 21, 2017 from 10:15 a.m. to 12:15 p.m., (ii) on May 27, 2017 from 4 p.m. to 6 p.m., or (iii) on May 28, 2017 from 5 p.m. to 7 p.m. Each swimmer will be accompanied by a sponsor-provided kayak. Interested mariners can contact the watercraft on scene via marine radio VHF-FM channel 09, call sign "River Swimmer One", or telephone number (757) 903 1254. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.

******MD – CHESAPEAKE BAY – CHESTER RIVER – REGULATED AREA******

The annual reenactment portion of the "Chesertown Tea Party Festival" is scheduled to occur along the Chester River on Saturday, May 27, 2017, at 2 p.m. The key component of the event includes the movements and anchorage of the Schooner SULTANA off Chesertown, MD. As described in 33 CFR Section 100.501, special local regulations establish a regulated area on all waters of the Chester River, within a line connecting the following positions: Latitude 39°12'27" N., longitude 076°03'46" W., thence to latitude 39°12'19" N., longitude 076°03'53" W., thence to latitude 39°12'15" N., longitude 076°03'41" W., thence to latitude 39°12'26" N., longitude 076°03'38" W., thence to the point of origin at latitude 39°12'27" N., longitude 076°03'46" W., located at Chesertown, MD. This area will be enforced from 1 p.m. to 4 p.m. on **May 27, 2017**. The Patrol Commander or designated marine event patrol may forbid and control the movement of all vessels in the regulated area. When hailed or signaled by an official patrol vessel, a vessel in these areas shall immediately comply with the directions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both. The marine event patrol and PATCOM may be contacted on VHF-FM Channel 16. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.

******MD – VA – DC - POTOMAC RIVER - MATTAWOMAN CREEK TO GEORGETOWN - NATIONAL HARBOR ACCESS CHANNEL – FIREWORKS******

A short-duration, low-level fireworks display is scheduled to occur on the Potomac River at National Harbor, MD on **May 23, 2017**, at approximately 9 p.m. The fireworks will be launched from a floating platform located approximately 150 yards from the grounds of the Gaylord National Resort & Conference Center, in approximate position latitude 38° 47' 00" N, longitude 077° 01' 12" W. Mariners are urged to use caution when transiting the area, and heed the directions of patrolling law enforcement and public safety officials. Absent specific guidance, mariners should remain 100 yards from the fireworks discharge site. For any comments or questions contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.
Chart 12289

******VA – MD – POTOMAC RIVER – MATTAWOMAN CREEK TO GEORGETOWN - REGULATED AREA******

An annual distance swim event is scheduled to occur across the Potomac River on Sunday, **June 4, 2017**, from 8:15 a.m. to 9:15 a.m. Up to 150 participants will swim across the Potomac River between Virginia and Maryland on a 1.3-mile linear course located downriver of the Woodrow Wilson Memorial (I-95/I-495) Bridge. The start is located along the shore at North Point at Jones Point Park, and the finish is located along the shore at the National Harbor Commercial Pier. A portion of the swim course will cross the Potomac River navigation channel and the National Harbor Access Channel. The swimmers will be supported by sponsor-provided watercraft. As described in 33 CFR Sec. 100.501, a regulated area is established for all waters of the Potomac River, from shoreline to shoreline, bounded to the north by a line drawn that originates at Jones Point Park, VA at the west shoreline latitude 38°47'35" N, longitude 077°02'22" W, thence east to latitude 38°47'12" N, longitude 077°00'58" W, at east shoreline near National Harbor, MD. The regulated area is bounded to the south by a line drawn originating at George Washington Memorial Parkway highway overpass and Cameron Run, west shoreline latitude 38°47'23" N, longitude 077°03'03" W thence east to latitude 38°46'52" N, longitude 077°01'13" W, at east shoreline near National Harbor, MD.. The regulated area will be enforced from 7:30 a.m. to 10 a.m. on June 4, 2017. The effect will be to restrict vessel traffic on certain waters of the Potomac River. The Patrol Commander or designated marine event patrol may forbid and control the movement of all vessels in the regulated area. When hailed or signaled by an official patrol vessel, a vessel in the area shall immediately comply with the directions given. Failure to do so may result in expulsion from the area, citation for failure to comply, or both. The marine event patrol and Patrol Commander may be contacted on marine band radio VHF-FM channel 16. Mariners are urged to schedule their transits on this waterway beyond the enforcement times. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693.
