LOCAL NOTICE TO MARINERS

District: 5

COASTAL WATERS FROM SHREWSBURY RIVER, NEW JERSEY TO LITTLE RIVER, SOUTH CAROLINA

The Local Notice to Mariners contains all information relevant to the waterways within the Fifth Coast Guard District and is updated each Tuesday on the U.S. Coast Guard Navigation Center website at https://www.navcen.uscg.gov/?pageName=lnmDistrict&region=5.

If you have questions about the Fifth Coast Guard District Local Notice to Mariners (LNM), please contact:

COMMANDER
FIFTH COAST GUARD DISTRICT (dpw)
431 Crawford Street
Portsmouth, Virginia 23704

or for correspondence and article requests:
ward.b.posey@uscg.mil, (757) 398-6229 and CGDSWaterways@uscg.mil

All bearings are in degrees TRUE - All times are in Local Time unless otherwise noted.

AIDS TO NAVIGATION DISCREPANCY REPORTING
To report any Aids to Navigation discrepancies (missing, damaged, extinguished lights, off station), shoaling or hazards to navigation, discrepancies to bridge lighting, please contact the following 24 hour numbers:
1. For PA, NJ, DE waters, coastal and tributaries contact COGARD SECTOR DELAWARE BAY at (215) 271-4940.
2. For MD, DE in the Upper Chesapeake Bay and tributaries contact COGARD SECTOR MARYLAND NATIONAL CAPITAL REGION at (410) 576-2525.
3. For VA in Lower Chesapeake Bay below Smith Point Light and tributaries and VA, MD Eastern Shore Bay and coastal contact COGARD SECTOR HAMPTON ROADS at (757) 483-8567.
4. For NC waters, coastal and tributaries contact COGARD SECTOR NORTH CAROLINA at (910) 343-3882.

SECTION I - SPECIAL NOTICES
This section contains information of special concern to the Mariner.

**** NEW OR UPDATED INFORMATION IN THE LOCAL NOTICE TO MARINERS ****
In an effort to bring attention to new, updated or very important information in the Local Notice to Mariners (LNM) this information will be preceded and followed by four asterisks.

LNM: 25/16

****NON-COMPLIANT AIS DEVICES****
Federal Communications Commission issues Enforcement Advisory on non-compliant AIS devices.
Automatic Identification System (AIS) is designed to mitigate collisions and enhance situational awareness by exchanging real-time vessel navigation information autonomously and continuously. AIS is required to be properly installed, maintained, and used – but foremost, users should ensure they are buying a true AIS and not a knock-off sold on the internet. AIS equipment that is noncompliant and noncertified to adopted International Standards can confuse, degrade or even disrupt other users’ systems; and is illegal to be marketed, sold or used in the
U.S. On November 28, 2018, the Federal Communication Commission (FCC) issued an enforcement advisory https://docs.fcc.gov/public/attachments/da-18-1211a1.pdf reiterating this to sellers, advertisers, and operators of noncertified automatic identification systems devices like those used for fish net buoys. Violators may be subject to FCC penalties, including but not limited to, substantial monetary fines of up to $19,639 per day for marketing violations and up to $147,290 for an ongoing violation. Given the potential harm these devices may have on navigation safety and the coast guard’s interest in all AIS devices being operated and maintained in proper order, the coast guard will assist the FCC in enforcement. U.S. Coast Guard type-approved devices are labeled as such and numbered, either as USCG 165.155. xxxx or 165.156. xxxx. Similarly, they will also be labeled with a FCC type-certification number. A listing of these devices can also be found on their respective authorized equipment web pages, of USCG cgmix at https://cgmix.uscg.mil/ and of FCC OET at https://apps.fcc.gov/oetcf/eas/reports/genericsearch.cfm. For more information on AIS, how to properly install and operate it, and the nation’s AIS network, visit the Coast Guard Navigation Center (NAVCEN) website at www.uscg.navcen.gov.

**NC - HAZARDS OF NORTH CAROLINA COASTAL INLETS**

This notice is to notify mariners about accessing hazardous inlets, to heighten public awareness about the hazards that exist in and around the inlets, and to provide the mariner with available information. Mariners are advised that shoaling conditions exist at following North Carolina coastal inlets:

- Oregon Inlet
- Hatteras Inlet
- Ocracoke Inlet
- Barden Inlet
- Beaufort Inlet
- Bogue Inlet
- New River Inlet
- Topsail Inlet
- Masonboro Inlet
- Carolina Beach Inlet
- Lockwoods Folly Inlet
- Shallotte Inlet

Shoaling conditions increase the potential for groundings. These inlets are subject to continual and sometimes rapid environmental changes. Mariners are highly encouraged to obtain the most recent U.S. Army Corps of Engineers Wilmington, North Carolina District hydrographic survey information, centerline waypoints and controlling depth at:

Mariners should use caution when navigating in these areas and passage through the inlets is not recommended without local knowledge of the area. The aids to navigation in these inlets may not be charted and may not be marking best water due to continually shifting shoals. Consult Local Notice to Mariners, 5th Coast Guard District for the latest positions and status of aids to navigation:

https://www.navcen.uscg.gov/?pageName=lnmDistrict&region=5

To report any aids to navigation discrepancies (missing, damaged, off station, extinguished lights), shoaling, hazards to navigation, or discrepancies on bridge lighting, please contact Sector North Carolina Command Center (910) 343-2200.

**CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION**

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon these positions or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

**INTERFERENCE WITH AIDS TO NAVIGATION**

U. S. Code, Title 14, Part I, Chapter 5, § 84. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 81 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 83 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than $1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense. U. S. Code, Title 14, Part I, Chapter 5, § 84.
The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.

WESTERN ATLANTIC AND U.S. COASTAL WATERS - NORTH CAROLINA – SUNken MILITARY CRAFT ACT (SMCA) – PROHIBITION ON DISTURBING, REMOVING ARTIFACTS OR DAMAGING SUNken CRAFT

All mariners are advised of the special protections provided to sunken military craft by the "Sunken Military Craft Act" (SMCA) (Public Law 108-375). Along the U.S. East Coast, and particularly off North Carolina, there are many sunken U.S. and foreign military craft. Sunken military craft may be the final resting places of military personnel who died in service to their country and are also important historical resources. One very notable example is the wreck of the USS MONITOR, off the NC Coast, also protected by the National Marine Sanctuaries Act. Under international and U.S. law, sunken foreign military craft, including those located in U.S. waters, remain the property of their respective country's government. Sovereign immune vessels, such as military crafts, are afforded protections under U.S. and international law. Included among these vessels are at least three known sunken German submarines (commonly called U-boats) located in waters off the North Carolina coast. These U-boats remain the property of the Federal Republic of Germany. In accordance with the SMCA, no person shall engage in or attempt to engage in any activity directed at a sunken military craft that disturbs, removes, or injures the sunken craft or the associated contents of the craft except as authorized by law. This includes, but is not limited to, the equipment, cargo, contents of the vessel, and the remains and personal effects of the crew and passengers. Marines are urged to exercise due care when operating in the vicinity of military wrecks, as they can be damaged by both purposeful or inadvertent activities including anchoring, fishing, diving, and other marine activities. Special dangers, such as unexploded ordnance, may also be associated with sunken military craft, and should be considered when operating in these areas. Violations of the SMCA may subject individuals to penalties of up to $100,000 and to liability for damages. Mariners who witness theft of material from, disturbance of, or damage to a sunken military craft are asked to report it to the nearest U.S. Coast Guard unit.

SAFETY NOTICE - NAVIGATIONAL RANGE STRUCTURES ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER 1.7

The United States Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information on GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via e-mail subscription through the USCG Navigation Center website (https://www.navcen.uscg.gov/gps/status/default.htm). In addition, the NIS investigates all reports of degradation or loss of GPS and DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: 703-313-5900, Email: webmaster@navcen.uscg.mil or on the World Wide Web at https://www.navcen.uscg.gov.

BROADCAST NOTICES TO MARINERS

Broadcast Notices to Mariners (BNMs) that are still in effect at the date of this publication.

Sector Delaware Bay (DB) - 145, 146, 147, 148, 153, 157, 158, 159-19.
Sector Maryland (MD) - 080, 143, 177, 179, 180, 181, 182, 185, 189, 191, 192-19.
Sector Hampton Roads (HR) - 178 thru 194-19.
### DISCREPANCIES (FEDERAL AIDS)

#### SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

## SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only.

It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

<table>

**COAST GUARD POLICY ON NOTIFICATION OF PROPOSED CHANGES**

Periodically, the Coast Guard, evaluates the system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing the aid is considered. In this regard, the Coast Guard is evaluating changes in aids to navigation as noted in the below articles. Users can provide feedback by filling out the District 5 Waterway Proposals data/feedback form, located at the NAVCEN D5 LNM website: https://www.navcen.uscg.gov/pdf/lmns/D05%20LNM%202019%20Special%20Notice_Waterway_Proposal%20Feedback%20Form.pdf

On June 3, 2019, the Coast Guard changed the aids to navigation marking St. Peters Creek due to significant shoaling. The Coast Guard is proposing marking those changes permanent.

Rename St. Peters Creek Entrance Light 1SP (LL 23435) to Mankin River Channel Light 7.

Convert St. Peters Creek Daybeacon 2 (LL 23440) to St. Peters Creek Warning Daybeacon A with NW dayboards worded “Danger Shoal”, until pile can be removed and discontinued.

Convert St. Peters Creek Daybeacon 3 (LL 23445) to St. Peters Creek Warning Daybeacon B with NW dayboards worded “Danger Shoal”, until pile can be removed and discontinued.

Convert St. Peters Creek Daybeacon 5 (LL 23450) to St. Peters Creek Warning Daybeacon C with NW dayboards worded “Danger Shoal”, until pile can be removed and discontinued.

Convert St. Peters Creek Daybeacon 6 (LL 23455) to St. Peters Creek Warning Daybeacon D with NW dayboards worded “Danger Shoal”, until pile can be removed and discontinued.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

VA - ATLANTIC OCEAN - WALLOPS ISLAND ROCKET LAUNCHES

Rocket launches are regularly scheduled in the vicinity of Wallops Island, VA, Danger Zone 334.130. Prior to these launches, visual signals will be displayed consisting of either a large orange-colored, “blimp-shaped” balloon by day or a rotating alternately red and white beacon by night. The balloon will be flown from a position at 37-50-38N, 75-28-47W and the beacon will be displayed approximately 200 feet above mean high water in
position 37-50-16N, 75-29-07W. While the warning signal is displayed, all persons and vessels in the Danger Zone, except vessels entering or departing Chincoteague Inlet, shall leave the zone promptly by the shortest possible route and remain outside the zone until allowed by a patrol boat to enter or the danger signal has been discontinued. Vessels entering or departing Chincoteague Inlet must take the shortest route possible upon display of the danger signal. The Danger Zone is depicted on navigational charts 12210 and 12211 with corner points starting in the vicinity of Assawoman Inlet and proceeding southerly to position 37-43-20N, 075-29-41W; thence northeasterly to a point in the vicinity of Chincoteague Shoals; thence westerly back to Wallops Island shoreline.

VA - WILLOUGHBY BAY - THIMBLE SHOAL CHANNEL - HELICOPTER AIRBORNE MINE COUNTERMEASURES OPERATIONS

Helicopter Mine Countermeasures Squadron Fourteen (HM-14) routinely conducts airborne mine countermeasures (AMCM) operations utilizing the MH-53E helicopter at low altitudes over the following inland and coastal waterways:

- Willoughby Bay
- Thimble Shoal Channel from the Naval Station Norfolk piers to the Chesapeake Bay Bridge Tunnel.
- An area of the Chesapeake Bay, adjacent to the Thimble Shoal Channel from Thimble Shoal to the Chesapeake Bay bridge tunnel extending to the north four miles to form a four by seven mile rectangle.

During these operations, the aircraft will be operating at altitudes as low as seventy-five feet and will produce localized winds in excess of 125 miles per hour. Rotor wash produced winds pose a considerable hazard to vessels, especially sailing vessels. The devices the helicopters tow range in size and appearance from a large orange and white sled approximately the size of a pick up truck to slightly submerged steel pipes thirty feet in length, both of which have submerged cable extending well beyond the visible portion of the towed device. The Aircraft Commanders have been directed to exercise every effort to conflict and avoid surface vessels. All mariners are requested to remain well clear of the helicopters, the towed devices, and the area extending directly behind the aircraft for four hundred yards. Do not approach or cross the area directly behind the towed device as a submerged hazard exists regardless of whether the device is in motion or stationary.

These operations involve large naval helicopters at flight altitudes of 100 feet or less, towing surface and sub-surface devices at speeds up to 25 knots. Helicopters may be identified by a rotating amber position light on centerline of main hull flashing 90 times per minute. An area of hurricane-force winds exists within a 250-foot radius around these helicopters, sufficient to blow people and objects from exposed decks and capsize small craft. The towed devices may be completely invisible and include large cables on or just below the surface streaming up to 1200 feet behind the aircraft. AMCM helicopters will transit to and from the area described above in the following manner: Outboard from the seaplane ramp at the Norfolk Naval Air Station across Willoughby Bay to the main shipping channel, then easterly along the main channel to Buoy 21. From Buoy 21 either East, SE or SSE to the operating area. The return flight will follow the same path as the outbound flight. To minimize the potential for mishap, vessels are requested to remain well clear of these danger zones when AMCM operations are encountered.

VA - VIRGINIA CAPES OPERATING AREA (VCOA) - PERMANENT MINE WARFARE TRAINING FIELDS

The U.S. Navy has established four permanent mine warfare training fields within the Virginia Capes Operating Areas. The bounding coordinates for each field are as follow:

AREA A: 37-09.0N 075-31.0W, 37-09.0N 075-34.7W, 37-12.0N 075-31.0W, 37-12.0N 075-34.7W.
AREA B: 36-29.0N 075-31.8W, 36-29.0N 075-35.5W, 36-26.0N 075-35.5W, 36-26.0N 075-31.8W.
AREA C: 36-29.0N 075-20.8W, 36-29.0N 075-24.5W, 36-26.0N 075-24.5W, 36-29.0N 075-20.8W.
AREA D: 36-46.5N 075-47.8W, 36-46.5N 075-46.5W, 36-47.5N 075-46.5W, 36-47.5N 075-47.8W.

Each area contains inert bottom and moored training mines that pose a potential hazard to dredging operations and trawler nets. All moored mines are placed at a minimum of 40 feet depth (MLLW) to preclude them as hazards to navigation.

VA - COASTAL - STATE MILITARY RESERVATION, CAMP PENDLETON, VIRGINIA BEACH - SMALL ARMS LIVE FIRE SCHEDULE

The Camp Pendleton State Military Reservation Live Fire Small Arms Range described as "all of the waters seaward of the mean high water shore line within a sector between radial lines extending 13,500 yards seaward and bearing 090 degrees true and 150 degrees true, respectively, from a point on shore at 36° 49'09"N, 075° 58'45"W". All vessel operators are reminded to review Navigation Regulations as described in paragraph 334.380 of Chapter 2, of U.S. Coast Pilot 4, Atlantic Coast: Cape Henry to Key West (42nd Edition) when operating south of the entrance to the Chesapeake Bay. Firing will take place only during daylight hours and red flags will be displayed at conspicuous locations on the beach at the facility. Vessels shall proceed through the area with caution and shall remain in the area no longer than necessary for transit.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted twenty-four (24) hours a day seven (7) days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

NOAA recommends that mariners take advantage of the most recent chart updates by using the NOAA Electronic Navigational Chart (ENC) for navigation in U.S. waters. ENCs provide the most up to date information, whereas paper and raster nautical chart updates may be up to one month behind the corresponding ENC coverage. Over the next few years, mariners will see continued improvement in the extent and detail of ENC coverage, while there will be a reduction in ENC and paper chart coverage and service. ENCs will include routine changes between editions that are not published through notices to mariners. One significant change to the RNC and paper charts will be the removal of controlling (minimum) depth information from many maintained channels. Controlling channel depths will still be provided on ENCs. Comments or concerns can be addressed through ASSIST, NOAA’s Nautical Inquiry and Comment System.

NJ – UPPER BARNEGAT BAY – KETTLE CREEK – DREDGING

H&B Contracting will be conducting dredging operations in Upper Barnegat Bay at Kettle Creek-Sailors Quay Channel; Green Cove Channel; Bay Head Channel; Beaver Dam Creek; And The Metedeconk River Channel from 7 July thru 31 Dec 2019. Work hours are 24 hours a day, 7 days a week. Dredging will be performed by barge-mounted excavator loading scow barges. There will be one dredging excavator barge and multiple scows and push boats on scene. Channels will remain open during dredging but channel width will be reduced. All mariners are advised to reduce speed to minimum for making way while in the vicinity of dredging operations. Dredged material scows will be towed to a placement site near Bayside Park/Swamp Cove at 40°00'32"N, 74°03'42"W where there will be a floating turbidity curtain surrounding the site. All marine equipment operators will be monitoring VHF-FM channel 63 and channel 16 and 13. Dredge and work vessels will monitor VHF-FM channel 13 and 16.

NJ – ATLANTIC CITY – OFF SHORE – SURVEY ACTIVITIES

Ocean Wind Survey Vessel OCEAN RESEARCHER is conducting surveys in this area for the next several months. All Mariners transiting or fishing in the survey area are requested to give a wide berth to survey vessels, as they may be limited in their ability to maneuver (VRAM) and towing gear
The SR 413 (Burlington-Bristol) bridge, over Delaware River, mile 117.8, between Burlington, NJ and Bristol, PA, will be maintained in the closed-to-navigation position to facilitate bridge maintenance of the bridge lift span. The bridge will be maintained in the closed position 24 hours a day; 7 days a week; from 6 a.m. on June 19, 2019, through 7:59 a.m. on September 17, 2019. During bridge maintenance, work platforms will occupy the bridge span reducing the vertical clearance to approximately 58 feet above mean high water in the closed position and approximately 132 feet above mean high water in the open position. The bridge will open on signal, if two hours prior notification is given. The bridge will not be able to open for emergencies. At all other times the bridge will operate per 33 CFR 117.716 (a). Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. The bridge tender may be reached using VHF-FM channels 13/16. The project foreman may be reached at (267) 767-2550. Mariners should adjust their transits accordingly and should use caution when transiting the area.

The Delaware Department of Transportation, who owns and operates the SR 13 Bridge across Nanticoke River, mile 39.6, at Seaford, DE, has requested a temporary deviation from the current operating regulation to facilitate bridge repair and maintenance. Under this temporary deviation, the bridge will be maintained in the closed-to-navigation position, to facilitate bridge repair and maintenance. This deviation allows the bridge to be maintained in the closed-to-navigation position 24 hours a day; 7 days a week; from 6 a.m. on June 17, 2019, through 5:59 a.m. on July 13, 2019, and from 6 a.m. on July 15, 2019, through 5:59 a.m. on August 26, 2019. Maintenance will be performed, Monday through Friday; from 6 a.m. on June 17, 2019, through 5:59 a.m. on July 13, 2019, and from 6 a.m. on July 15, 2019, through 5:59 a.m. on August 26, 2019. The bridge is a bascule bridge with a vertical clearance in the closed-to-navigation position of 3 feet above mean high water. However, the bridge will have a containment system under the bridge reducing the vertical clearance to 1 foot above mean high water for the entirety of the project. The bridge will not be able to open in case of an emergency and there is no alternate route for vessels to pass. Mariners should use extreme caution when transiting the area.

Marine construction of the new dredge containment Cell Number 11 on Poplar Island is ongoing. Crews will be building sand and stone berms to expand the island and create a new containment cell for future dredge material. Mariners should avoid the area and if necessary contact the work vessels on VHF-FM channels 13 and 16.

The U.S. Army Corps of Engineers and Maryland Department of Natural Resources have placed rock and shell on the bottom at sites to restore Oyster Reef Habitat in the Tred Avon River in Talbot County, MD. In those areas, water depths are between 1 ft to 2 ft shallower than what is currently shown on NOAA nautical charts. More information including maps and site coordinates may be obtained from http://www.nab.usace.army.mil/Missions/Environmental/Oyster-Restoration/ or the USACE Project Manager at 410-962-7440. The SR-2 (Hanover Street) Bridge, at mile 12.0, across the Middle Branch of the Patapsco River in Baltimore, MD, is having electrical problems and the center and tail locks are frozen in place. Bridge repairs have commenced and will be ongoing until further notice. The bridge is inoperable and cannot open at this time. The bridge has a vertical clearance of 21 feet above Mean High Water in the closed position. Mariners should exercise caution when transiting the area.
****VA – MD – DC - POTOMAC RIVER – MATTAWOMAN CREEK TO GEORGE TOWN – GEORGETOWN CHANNEL – SECURITY ZONE****

The annual July 4th Celebration in Washington, D.C. is scheduled to occur on July 4, 2018. As described in Title 33 Code of Federal Regulations Section 165.508, a security zone is established upon the waters of the Georgetown Channel, Potomac River, within 75 yards from the eastern shore measured perpendicularly to the shore, between the Long Railroad Bridge (the most eastern bridge of the 5-span, Fourteenth Street Bridge Complex) to the Theodore Roosevelt Memorial Bridge and all waters in between, totaling including the waters of the Georgetown Channel Tidal Basin. This security zone will be enforced from 12:01 a.m. to 11:59 p.m. on July 4, 2019. Entry into or remaining in this zone is prohibited unless authorized by the Coast Guard Captain of the Port (COTP) Maryland-National Capital Region. Persons desiring to transit the area of the security zone must first request authorization from the COTP Maryland-National Capital Region or his designated representative. Public vessels and vessels already at berth at the time the security zone is implemented do not have to depart the zone. All vessels underway within the security zone at the time the security zone is implemented are to depart the zone when it is implemented. The COTP Maryland-National Capital Region can be contacted at telephone number (410) 576-2693 or marine band radio Channel 16 VHF-FM (156.8 MHz). The Coast Guard vessels enforcing this security zone can be contacted on marine band radio Channel 16 VHF-FM (156.8 MHz). Upon being hailed by a U.S. Coast Guard vessel by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed. If permission is granted, all persons and vessels must comply with the instructions of the COTP Maryland-National Capital Region and proceed at the minimum speed necessary to maintain a safe course while within the zone. The U.S. Coast Guard may be assisted in the patrol and enforcement of the zone by the federal, State, and local agencies. Address any comments or questions to U.S. Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at telephone (410) 576-2674.

****DC - UPPER POTOMAC RIVER - GEORGETOWN CHANNEL – BRIDGE REHABILITATION PROJECT****

UPDATED INFORMATION. Major rehabilitation of the Arlington Memorial Bridge will commence in the Potomac River in Washington, DC on or about July 2, 2018 and will continue until November 2020. The initial work consists of pinning a pier barge in place with a steel ramp connecting the barge to the shore on the western shoreline south of the bridge and outside of the federal navigation channel. Construction work will generally be conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., though nighttime work is possible. Marine equipment on site includes a crew boat, push boats, and up to 10 barges at various locations along the length of the bridge with work focused on the center span. On or about July 16, 2018, the project will require the temporary relocation of the federal navigation channel, which currently is located under the center span of the bridge (Arch 5). The temporary channel will be located under the adjacent span to the east (Arch 4), and will be established until the fall of 2020. Navigation channel lighting at the bridge will be in accordance with Coast Guard requirements. Once the temporary channel is established, work will begin to assemble a large work platform, which will completely obstruct the federal navigation channel. Upstream of this platform, a protection system will be deployed, which will be comprised of a floating pipe boom on the water surface attached to concrete anchors. All elements will be marked and lighted in accordance with USCG requirements. Mariners are urged to use caution when transiting the area, and operate at the minimum speed necessary to maintain safe course near the work site. Interested mariners can contact the vessels BULLDOG II and CAPT. JACK via marine band radio VHF-FM channels 16 and 13 and 13 when actively working on the river, or at telephone number 305-304-6853. The Kiewit bridge construction contractor can be contacted at 813-323-4611. For any questions or concerns, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at telephone (410) 576-2674 or (410) 576-2693.

VA – PORTSMOUTH – CRANEY ISLAND – MARINE CONSTRUCTION
Marine construction of two new breasting dolphins at North Pier D located at the Defense Fuel Supply Point (DFSP), Craney Island, Portsmouth, Virginia will begin June 12, 2019 and last through the end of October 2019. The structure consists of 24 inch square precast, prestressed concrete plumb and batter pies with a 25 feet by 30 feet cast-in-place concrete pile cap for the south breasting dolphin, and a 21.5 feet by 33 feet cast-in-place concrete pile cap for the north breasting dolphin. The breasting dolphins will be constructed with a top elevation of EL +12.00 feet (project datum), which is 12 feet above the mean lower low water level (MLLW) in order to match the existing top of North Pier D elevation. The top of the existing mooring dolphins will remain at their current elevation of +9.00 feet. Mariners are requested to keep a sharp lookout while transiting in the vicinity of the on-site construction barge expected to extend approximately 200 feet off the pier in an eastwardly direction in support of the project.

Mariners are advised to use extreme caution transiting through the Bonner Bridge in Oregon Inlet, NC. Mariners should follow the aids to navigation closely and stay clear of construction areas. There are submerged concrete pile sways between Bents 173 and 176 of the old bridge. The horizontal clearance of this span is 169 feet and the vertical clearance is 70 feet. Crane barges will be secured in place with four anchors connected by anchor wires to the corners of the barge. The anchor locations will be marked with yellow crown buoys within an approximate 500-ft radius of the crane barge. Mariners should be aware that anchor wires may be at or just above/below the water surface between the barges and crown buoys; therefore vessels should stay on

Herbert C. Bonner Bridge across the Oregon Inlet, at mile 0.9, Dare County, NC. During demolition of the old bridge, the designation of navigation spans and placement of bridge lighting will be changed several times, as reflected below, and provided via updated local notice to mariners and broadcast notice to mariners.

Phase 2 (Effective April 24, 2019): The navigation spans are between bridge bents 173 and 176 (old bridge, with no superstructure between bridge bents) and bridge bents 20 and 21 (span 21) on the new bridge. The approximate limiting navigation clearances are 70 feet above mean high water (new bridge, span 21) and 169 feet between bridge bents (old bridge, between bridge bents 173 and 176). Temporary bridge lighting has been placed between bridge bents 173 and 176 of the old bridge and between bridge bents 20 and 21 (span 21) of the new bridge.

Phase 3 (to be announced): The navigation span will be between bridge bents 22 and 23 (span 23) of the new bridge. The adjacent spans of the old bridge will have been removed. The limiting navigation clearances (approximate) will be 70 feet above mean high water and 275 feet between bridge bents. Permanent bridge lighting will be placed between bridge bents 22 and 23 (span 23) of the new bridge.

Mariners are advised to use extreme caution when transiting through the bridge, follow the aids to navigation closely and remain at least 500 feet clear of all construction vessels and equipment. Submerged concrete pilings are just below the surface of the water near construction activities.

CURRENT PROJECTS

Permits:

SECTOR DELAWARE BAY

- Delaware
  - Christina River – Christina River Bridge – Permit (1-17-5) signed April 7, 2017, for a fixed bridge across the Christina River, mile 3.8, City of Wilmington, New Castle County, DE. The bridge will provide a minimum vertical clearance of 14 feet above mean high water and a horizontal clearance of 150 feet centered on the axis of the navigable channel. (KB)

- New Jersey (Central & Southern)
  - Oldmans Creek – US Route 130 Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 15, 2018; vertical clearance of 5 feet above mean high water and a horizontal clearance of 75 feet. (HP)
  - Raccoon Creek – US 130 (fixed) Bridge - new fixed bridge structure to replace (lift) bridge. Permit (2-15-5) signed December 9, 2015. (KB)

- Pennsylvania
  - Schuylkill River – Grays Ferry Pedestrian Bridge – Permit (3-17-5) signed November 27, 2017, for a swing drawbridge replacement with a vertical clearance of 26 feet above mean high water (closed position), unlimited vertical clearance in the open position, and a horizontal clearance of 75 feet in the west navigation span and 65 feet in the east navigation span. (MT)
  - Darby Creek – S.R. 420 (Wanamaker Avenue) - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 13, 2018; vertical clearance of 11 feet above mean high water and a horizontal clearance of 78 feet. (MT)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- Maryland –
  - Potomac River – Governor Harry Nice Memorial Bridge – Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 2, 2018; vertical clearance of 135 feet above mean high water and a horizontal clearance of 250 feet. The center of the main navigation span of the bridge may be shifted up to 585 feet to the west of the current navigation span. (KB)
  - Neale Sound – MD-254 (Cobb Island Road) Bridge – Permit (1-18-5) signed May 2, 2018, for a fixed replacement bridge with a vertical clearance of 20 feet above mean high water and a horizontal clearance of 55 feet. (HP)

- Washington DC –
  - Anacostia River – Frederick Douglass Memorial Bridge - Permit (2-17-5) signed December 4, 2017, for a fixed bridge replacement with a vertical clearance of 42 feet above mean high water and a horizontal clearance of 150 feet. (MB)

- Virginia (Northern)
  - Potomac River – Governor Harry Nice Memorial Bridge – Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 2, 2018; vertical clearance of 135 feet above mean high water and a horizontal clearance of 250 feet. The center of the main navigation span of the bridge may be shifted up to 585 feet to the west of the current navigation span. (KB)

SECTOR HAMPTON ROADS

- Virginia (Southern)
  - Western Branch of the Elizabeth River – Churchland Bridge - Permit Amendment (53b-73-5) signed May 1, 2019, for a fixed bridge replacement of the northbound structure of the bridge with a structure providing a vertical clearance of 36.63 feet above mean high water and a horizontal clearance of 80 feet. (MS)

SECTOR NORTH CAROLINA

- North Carolina
  - Atlantic Intracoastal Waterway – NC 210/50 Bridge, Surf City, NC - new fixed bridge structure to replace (swing) bridge. Permit (2-16-5) signed September 27, 2016. (KB)

    - The Straits – Harkers Island Bridge – Bridge Replacement - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 24, 2017; vertical clearance of 45 feet above mean high water and a horizontal clearance of 125 feet. (MB)
    - Perquimans River – US 17 Business Bridge (Hertford, NC) – replacement swing drawbridge Preliminary Navigation Clearance Determination (PNCD) issued on November 1, 2017; vertical clearance of 33 feet above mean high water and a horizontal clearance of 55 feet. NCDOT preferred alternative would provide a vertical clearance of 12 feet above mean high water in the closed position, unlimited vertical clearance in the open position and a horizontal clearance of 55 feet. (HP)

    - Pamlico Sound – Bridge No. 71 (Rodanthe) Bridge – new fixed bridge carrying NC 12 on the mainland side of the outer bank along the northeastern shore of Pamlico Sound from a position approximately 1.8 miles north of the southern boundary of the Pea Island National Wildlife Refuge to a position north of the Chicamacomico Channel and the emergency ferry terminal in Rodanthe, Dare County, NC. Permit (1-19-5) signed on February 20, 2019. (HP)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- Washington, DC & Virginia (Northern) – None
SECTOR NORTH CAROLINA

- Delaware
  - Lewes and Rehoboth Canal - Rehoboth Avenue (SR 1A) Bridge – Under this temporary deviation, the bridge will remain in the closed-to-navigation position from Monday, May 13, 2019, and Saturday, August 31, 2019; Mon-Fri; from 8 a.m. to 5:00 a.m. The bridge is a bascule drawbridge with a vertical clearance in the closed-to-navigation position of 16 feet above mean high water; however, bridge maintenance will require a containment structure to hang below the bridge reducing the vertical clearance to 13 feet above mean high water throughout the maintenance period. The bridge will be unable to open for emergency vessels. Mariners should use caution when transiting the area. (MB)
  - Christiana River - SR 141 (1-501) Bridge – Bridge maintenance will be conducted from July 1, 2019, to September 30, 2019, Monday-Saturday from 7 a.m. to 5 p.m. To facilitate the work, barges will be connected and extended approximately 120 feet into the channel between the James Street Bridge and the SR 141 Bridge to assist with the placement of riprap. This will reduce the horizontal clearance of both bridges by 50%. There will also be divers in and around the vicinity of the bridge. The Project Foreman may be reached on VHF/FM Channel 13. Mariners are urged to use caution when transiting the area. (MB)
  - Nanticoke River - SR 13 Bridge - Bridge will be maintained in the closed-to-navigation position to facilitate bridge repair and maintenance. This deviation allows the bridge to be maintained in the closed-to-navigation position 24 hours a day; 7 days a week; from 6 a.m. on June 17, 2019, through 5:59 a.m. on July 13, 2019, and from 6 a.m. on July 15, 2019, through 5:59 a.m. on August 26, 2019. Maintenance will be performed, Monday through Friday; from June 17, 2019, and from July 13, 2019, to 5:59 a.m. on August 26, 2019. The bridge is a bascule bridge with a vertical clearance in the closed-to-navigation position of 3 feet above mean high water. However, the bridge will have a containment system under the bridge reducing the vertical clearance to 1 foot above mean high water for the entirety of the project. The bridge will not be able to open in case of an emergency and there is no alternate route for vessels to pass. Mariners should use extreme caution when transiting the area. (MB)
  - New Jersey Intracoastal Waterway (NJICW), Inside Thorofare - US40-322 (N Albany Ave) Bridge – Bridge maintenance will be conducted from 7 a.m. to 7 p.m.; M-F; and from 6 a.m. to 6 p.m. on the weekends. The repainting and miscellaneous improvements ongoing since mid-November, 2015, will be extended through July 31, 2019. The project foreman may be contacted at 267-767-2550. Mariners should use caution when navigating through the area. (MT)
  - Delaware River - Betsy Ross Bridge - Painting will be conducted from May 15, 2018, to October 1, 2019; Monday - Saturday, from 7 a.m. to 5 p.m. A work platform will be installed and will extend 3 feet below low steel. The vertical clearance of the bridge will be reduced by 3 feet to approximately 110 feet above mean high water. There will be no maintenance personnel or equipment in the waterway. A small safety boat will be in vicinity of the bridge when work is conducted over the navigational spans. Mariners are urged to use caution when transiting the area. (MS)
  - New Jersey Intracoastal Waterway (NJICW), Beach Thorofare - US 30 (Absecon Boulevard) Bridge – Bridge maintenance will be conducted from 7 a.m. to 7 p.m.; Monday-Friday; from September 24, 2018, through January 24, 2020. Work will consist of repair and rehabilitation of the bridge fender system. A crane barge, a material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 25 feet due to work floats located inside the navigational channel throughout for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit the bridge during periods with a reduced horizontal clearance may transit through the bridge between 11:30 a.m. and 12:30 p.m., if at least a 24-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel to facilitate the safe transit through the bridge of vessels that cannot safely transit the bridge with a reduced horizontal clearance. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (215) 394-7997. Mariners should use extreme caution when transiting the area. (MT)
  - New Jersey Intracoastal Waterway (NJICW), Cape May Channel - SR 109 Bridge – Bridge maintenance, which began in September, 2017, will continue to be conducted from 7 a.m. to 5 p.m.; M-F; through July 31, 2019. Several work vessels, work barges and work floats and divers will be around the vicinity of the bridge during work hours. Vessels can safely transit through the bridge, unrestricted, at any time. The work vessels and work barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907-5087 or (215) 208-1759. Mariners should use extreme caution when transiting the area and transit through the bridge at a safe speed. (MT)
Delaware River - SR 73 (Tacony-Palmyra) Bridge – Bridge maintenance will be conducted from March 21, 2019, to January 8, 2020, Monday through Saturday, from 7 a.m. to 5 p.m. The maintenance of the bridge will require a vertical clearance restriction of 3 feet in the arched span, between piers D and E, and 4 feet vertical clearance restriction along the remaining sections of the bridge. The project supervisor may be reached at (267) 767-2550. The bridge tender may be reached on VHF-FM channels 13 and 16. Mariners are urged to use caution when transiting the area. (MT)

Delaware River - SR 73 (Tacony-Palmyra) Bridge – Bridge painting project will be conducted from March 25, 2019, to March 16, 2020, Monday through Thursday, from 7 a.m. to 5 p.m. To facilitate the work, scaffolding will be installed underneath the bridge and will reduce the vertical clearance by 4 feet at the Tacony Truss and Palmyra Truss Spans and by 3 feet at the Arch Span. The Project Foreman may be reached at (267) 767-2550 or VHF/FM Ch. 13. Mariners are urged to use caution when transiting the area. (MS)

Delaware River - Interstate 276/Delaware River Turnpike Bridge – Bridge work on the bridge superstructure will continue to be performed from 7 a.m. to 3 p.m.; through May 31, 2019, Mon-Fri; from 7 a.m. to 3 p.m.; through Saturday, from 7 a.m. to 5 p.m.; and from May 27, 2019, through July 31, 2019. The project superintendent may be contacted at 267-767-2550. Mariners should adjust their transits accordingly and should use caution when transiting the area. (MT)

Schuylkill River - Route 71 (Main Street) Bridge – Bridge inspection will be conducted between Tuesday, June 25, 2019, and Saturday, June 29, 2019; Tues-Sat; from 8 a.m. to 4:30 p.m. The bridge inspection will require a pontoon boat with scaffolding to work in and around the navigable channel. Inspection personnel and vessel can relocate with 15 minutes notice. The vessel will be monitoring VHF channel 16, and the project superintendent may be reached at (609) 647-0630. Mariners should use caution when transiting the area. (MB)

Pennsylvania –

Schuylkill River - Grays Ferry Railroad Bridge - Modification (pedestrian bridge) activities which began June 2018, are expected to finish on May 1, 2020. Work will be performed from 6 a.m. to 5 p.m.; M-F. During this bridge modification project, one navigation span will be occupied; the other navigation span will be open for vessels to transit. Mariners should not navigate the waterway with extreme caution and due regard for personnel, equipment, and vessels that may be working or stationed in the vicinity of the existing pedestrian bridge. The project superintendent may be reached at 610-487-4976. Mariners should use extreme caution when navigating through the area. (MT)

Delaware River - SR 73 (Tacony-Palmyra) Bridge – Bridge maintenance will be conducted from March 21, 2019, to January 8, 2020, Monday through Thursday, from 7 a.m. to 5 p.m. The maintenance of the bridge will require a vertical clearance restriction of 3 feet in the arched span, between piers D and E, and 4 feet vertical clearance restriction along the remaining sections of the bridge. The project supervisor may be reached at (267) 767-2550. The bridge tender may be reached on VHF-FM channels 13 and 16. Mariners are urged to use caution when transiting the area. (MB)

Delaware River - Route 71 (Main Street) Bridge – Bridge painting project will be conducted from March 25, 2019, to March 16, 2020, Monday through Thursday, from 7 a.m. to 5 p.m. To facilitate the work, scaffolding will be installed underneath the bridge and will reduce the vertical clearance by 4 feet at the Tacony Truss and Palmyra Truss Spans and by 3 feet at the Arch Span. The Project Foreman may be reached at (267) 767-2550 or VHF/FM Ch. 13. Mariners are urged to use caution when transiting the area. (MS)
DELAWARE RIVER - SR 73 (Tacony-Palmyra) Bridge – Bridge maintenance will be conducted from 7 a.m. through 3:30 p.m.; Monday-Friday; from May 13, 2019, through August 9, 2019. Two work barges (45-foot crane barge and 35-foot supply barge) and several workboats will be in and around the vicinity of the bridge. The crane barge will be located adjacent to the navigational channel. Maintenance personnel, equipment and vessels will relocate from the moveable span and navigable channel, upon request. Vessels that require the crane barge relocate, should notify the bridge tender no less than 24 hours prior to transiting through the bridge. The bridge tender may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (215) 651-6278. Mariners should use extreme caution navigating through the area. (MT)

Chesapeake Bay - US 50/US 301 (William P. Lane Jr. Memorial) (Eastern Channel) Westbound Bridge – Bridge maintenance which began in July 2017, has been extended to December 31, 2020; 24 hours a day; 7 days a week. The work will involve the spans 44-46 (span 45 is the navigational span). A barge and work vessels will be in and around the vicinity of the bridge. A work platform will be attached to the underside of bridge which will reduce the vertical clearance of the bridge span to approximately 56 feet above mean high water. During the maintenance period from March 5, 2019, through May 25, 2019, a work barge will be located near the center of the navigational span, reducing the horizontal clearance of the bridge to approximately 300 feet on either side of the barge. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (717) 490-1699 or 803-535-9995. Mariners should use extreme caution navigating through the area. (MT)

Neale Sound - Bridge No. 0803800 (MD-254) Bridge - Construction activities will begin on May 21, 2018, and are expected to conclude on August 31, 2020. Work hours are from 6 a.m. to 6 p.m., Monday through Friday. Detailed project information and information concerning waterway restrictions will be provided to local navigation and mariners and marine safety information bulletins. Marine equipment engaged in bridge construction will include the Tug Rising Sun; wharley crane Hampton Road on a 46-foot by 108-foot barge; pedestrian crane Patapsco on a 40-foot by 100-foot barge; WS4 a 40-foot by 98-foot crane barge; SC149 a 52-foot by 115-foot deck barge; SC77 a 34-foot by 240-foot car float barge and work boats, jack boats and crew boats. Marine equipment will moor via spuds in Neale Sound during bridge construction and for heavy weather. Mariners may contact vessels and construction personnel via VHF-FM channel 13 and 16. The project superintendent may be contacted at (443) 980-7633 and the project area construction manager may be contacted at (410) 215-3579. Mariners should navigate with extreme caution in the vicinity of the bridge and construction equipment. (HP)

Potomac River - US 301 (Harry W Nice Memorial) Bridge - Underwater inspections will be conducted from October 8, 2018, to June 30, 2019, from 7 a.m. to 4 p.m. A 25ft dive boat will be utilized during the inspections and will be moored to the bridge pier and fender system during dive operations. Mariners should use extreme caution when transiting the area. (MS)

Potomac River - SR-2 (Hanover Street) Bridge – Bridge is having electrical problems and the center and tail locks are frozen in place. Bridge repairs have commenced and will be ongoing until further notice. The bridge is inoperable and cannot open at this time. The bridge has a vertical clearance of 21 feet above Mean High Water in the closed position. Mariners should exercise caution when transiting the area. (MB)

Choptank River - SR 331 (Dover) Bridge – Bridge maintenance will be conducted from 7 a.m. to 8 p.m.; 7 days a week; from May 20, 2019, through August 30, 2019. During the bridge maintenance period, the bridge will be maintained in the open position; a work platform will be located in one navigation span at all times. The other navigation span will be open for vessels to transit through the bridge. The bridge has a horizontal clearance of approximately 80 feet in each navigation span. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway. Maintenance personnel and equipment will not be able to relocate from the moveable span and bridge tender. The bridge tender may be reached on VHF-FM channels 13 and 16, and 410-822-0538. The project foreman may be reached at (410) 371-5124. Mariners should exercise caution navigating through the area. (MT)

WASHINGTON DC

Potomac River - Arlington Memorial Bridge - Major rehabilitation of the Arlington Memorial Bridge commenced in the Potomac River in Washington, DC on or about July 2, 2018, and will continue until November 2020. The initial work consists of pinning a pier barge in place with a steel ramp connecting the barge to the shore on the western shoreline south of the bridge and outside of the federal navigation channel. Construction work will generally be conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., though nighttime work is possible. Marine equipment on site includes a crew boat, push boat, and up to 10 barges at various locations along the length of the bridge with work focused on the center span. On or about July 16, 2018, the project will require the temporary relocation of the federal navigation channel, which currently is located under the center span of the bridge (Arch 5). The temporary channel will be located under the adjacent span to the east (Arch 4), and will be established until the fall of 2020. Navigation channel lighting at the bridge will be in accordance with Coast Guard requirements. Once the temporary channel is established, work will begin to assemble a large work platform, which will completely obstruct the federal navigation channel. Upstream of this platform, a protection system will be deployed, which will be comprised of a floating pipe boom on the water surface attached to concrete anchors. All elements will be marked and lighted in accordance with USCG requirements. Mariners are urged to use caution when transiting the area, and operate at the minimum speed necessary to maintain safe course near the work site. Interested parties can contact the vessels BULLDOG II and CAPT. JACK via marine band radio VHF-FM channels 16 and 13 when actively working on the river, or at telephone number 305-304-6853. The Kiewit bridge construction contractor may be contacted at 813-323-4611. For any questions or concerns, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at telephone (410) 576-2674 or (410) 576-2693. (MS)(RH)

Anacostia River - Frederick Douglass Memorial (South Capitol Street) Bridge – Bridge construction commenced in the Anacostia River in Washington, DC on April 19, 2018, and will continue into 2021. The current work consists of building the temporary West Trestle from the western shoreline out to the center of the Federal Channel. A work barge will be stationed in the western/down bound side of the Federal channel during trestle construction and properly lit. The existing western and center fender piers will also be partially demolished, south of the existing bridge. The western half of the Federal Channel is currently closed as demarcated by the white exclusion buoys upstream and downstream of the bridge. The East Trestle is also being constructed, which will extend from the eastern shoreline to the east side of the Federal channel. Multiple barges and push vessels are supporting this activity. The eastern half of the Federal channel, east of the center fender pier, will be open for navigation at all times. Construction work will be conducted Mondays through Saturday, between 7 a.m. and 7 p.m., with no pile driving work on Saturday. Marine equipment on site includes a crew boat, a push boat, and multiple deck barges.
**Virginia (Northern) - None**

**Virginia (Southern)**

**Lynnhaven Inlet – US 60/John A. Lesner (fixed) Bridge –** Work is in progress through August 30, 2019 for a new replacement bridge at essentially the same location. The new bridge will have a vertical clearance of 45 feet above MHW, along with a horizontal clearance of 150 feet between face of the fenders. A dredge material placement site will be located southwest of the existing bridge, adjacent to the boat ramp facility and used as a staging area. The contractor will access the lay down and staging area via the waterway through a proposed temporary bulkhead. (HP)

**Queens Creek - I-64 Bridges - Bridge construction will be conducted from December 3, 2018, to September 24, 2021, Monday-Friday from 7 a.m. to 6 p.m.** To facilitate the work, a temporary work trestle and a work barge will be in the vicinity of the navigational channel. A minimum 15-foot wide navigational opening will be maintained in the main navigational channel at all times. The Project Foreman may be reached on VHF/FM Channel 13. Mariners should use caution when transiting the area. (MS)

**York River - US 17 (Coleman Memorial) Bridge –** Bridge maintenance will be conducted from April 15, 2019, to September 6, 2019. Bridge maintenance will include installation of submarine cable protection panels outside the navigation channel. Mariners should use caution when transiting the area. (MS)

**James River - US 17/US 258/SR 32 (James River Bridge) Bridge –** Bridge maintenance will be conducted from 7 a.m. to 5 p.m.; Monday-Friday, from 7 a.m. on April 1, 2019, through 5 p.m. on June 30, 2019. A crane barge, work barge, a dive boat with diver, will be in and around the vicinity of the bridge. Maintenance personnel, equipment and vessels will relocate from the moveable span and navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (757) 817-1338. Mariners should notify the work foreman no less than thirty minutes prior to transiting through the bridge. Mariners should use caution navigating through the area. (MT)

**Sarah Creek (Northwest Branch) - SR 641 (Tidemill Road) Bridge –** Bridge maintenance will be conducted from 7 a.m. to 5 p.m.; Monday-Saturday, from June 1, 2019, through November 30, 2019. During work hours, a work platform and workboat will be in and around the vicinity of the bridge that will reduce the horizontal clearance of the bridge to approximately 39 feet. The bridge will be unrestricted, at all other times. Vessels able to safely transit through the bridge with the reduced clearance, may do so at any time. Vessels that cannot safely transit through the bridge will need to notify the project foreman no less than one hour prior to transiting through the bridge. Maintenance personnel, equipment and vessels will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channels 13 and 16. The project foreman may be reached at (804) 238-1182 or (804) 432-0179. Mariners should use caution navigating through the area. (MT)

**Currituck Sound - US 158 (Wright Memorial) Bridge -** Maintenance will be conducted from 7 a.m. to 7 p.m.; 7 days a week; from October 3, 2017, through November 30, 2019. A 40 ft. barge, several work boats, several work platforms and a team of divers will be in and around the vicinity of the bridge. Maintenance personnel, equipment and vessels will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channels 13 and 16. The project foreman may be reached at (252) 340-2471 or (936) 404-9514. Mariners should notify the work foreman no less than one hour prior to transiting through the bridge and should use caution when navigating the area. (MT)

**Atlantic Intracoastal Waterway (Bogue Sound) - SR 1184 (Atlantic Beach Bridge) Bridge –** Bridge maintenance, which began October 2018, will continue to be conducted from 7 a.m. to 7 p.m.; Monday-Saturday; through January 31, 2020. A crane barge, material barge, several tugs, several work vessels and platforms, and a snooper truck will be located in the vicinity of the bridge. The snooper truck will be performing concrete repairs outside the navigation span from September 1, 2019, through November 30, 2019, and within the navigation span from 5
December 1, 2019, through January 31, 2020. During work hours, within the navigation span period from December 1, 2019, through January 31, 2019, the snooper truck will extend below low steel of the bridge approximately five feet, reducing the vertical clearance in the navigation span to approximately 60 feet above mean high water. Vessels that require the snooper truck to clear the navigation span to safely navigate through the bridge should notify the work foreman no less than 30 minutes prior to navigating through the bridge. The tugs, barges, and work vessels and platforms will reduce the horizontal clearance in the navigation span to approximately 50 feet. Vessels that require the tugs, barges, and work vessels and platforms to clear the navigation span to safely navigate through the bridge should notify the work foreman no less than one hour prior to navigating through the bridge. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 231-8589. Mariners should use extreme caution navigating through the area. (MT)

The Straits - Harkers Island Bridge (SR 1332) - Bridge will remain in the closed-to-navigation position to facilitate bridge repairs due to damage caused by Hurricane Florence. The repairs require the bridge to remain in the closed-to-navigation position. The bridge is a swing bridge with a vertical clearance in the closed-to-navigation position of 14 feet above mean high water. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open in case of an emergency and there is an alternate route for vessels to pass. Mariners should use caution when transiting the area. (MB)

****DREDGING AND MARINE CONSTRUCTION CAUTIONS****

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Booms are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted 24 hours a day, 7 days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

****NJ – DEAL – DEMOLITION AND INSTALLATION OF NEW SEWER OUTFALL****

Weeks Marine, INC will be conducting demolition of the existing diffuser leg of Township of Ocean, NJ sewer outfall and installation of a new sewer outfall consisting of approx. 1,112ft of 42” Diameter HDPE pipe which will be covered in rock and covered by articulating concrete mats. Divers will be in the water during the majority of the work. Pipes will be driven along the new outfall location during a portion of the work. Work location is offshore of Deal, NJ running in the East-West direction starting approx. 1,220ft offshore and ending approx. 2,100ft offshore, in approximate position N 40° 15’ 17.65” / W 73° 59’ 08.07” to N 40°15’ 13.17” / W 73° 58’ 56.73”. MD - CHESAPEAKE BAY - COVE POINT TO SANDY POINT - BRIDGE REHABILITATION CONTINUES AT THE WILLIAM P. LANE JR

An engineering firm, on behalf of Maryland Transportation Authority, will be performing maintenance at US 50/US 301 (William P. Lane Jr. Memorial) (eastern channel) westbound bridge, over Chesapeake Bay, mile 138.1, near Stevensville, MD. The maintenance will continue through June 20, 2019, 24 hours a day, 7 days a week.  A work platform will be attached to the underside of bridge which will reduce the vertical clearance of the bridge spans by approximately 2 feet. To facilitate the work, a 265 ft wide by 48 ft wide barge is anchored along the north bridge (westbound) at span 46, between bridge piers 45 and 46, outside the eastern channel in approx posit lat 38-59-17,16 n, lon 076-21-20,88 w. The anchored barge has a 4-point mooring system held in place with cables at each of the four corners of the barge leading to a lighted buoy attached to and marking each anchor. The barge and buoys are marked and lighted IAW USCG regulations. A hanging staircase ladder is installed at this location to provide bridge workers access from the barge. MD - DC - UPPER POTOMAC RIVER - ANACOSTIA RIVER – MARINE CONSTRUCTION OPERATIONS

Construction of the new Frederick Douglass Memorial (South Capitol Street) Bridge across the Anacostia River in Washington, DC continues into 2021. The work is being conducted Mon through Sat, between 7 am and 7 pm., and currently consists of building two structures: 1. The Temporary West Trestle, which extends from the western shoreline eastward to the center of the federal navigation channel and includes new Bridge Pier 1. A work barge will be stationed in the western side of the federal navigation channel during trestle construction. Starting in Nov, the existing center fender pier, south of the existing bridge will be partially demolished. To support active demolition of the center fender, a 28-foot vessel will be positioned in the navigable channel. Mariners transiting this area are urged to contact the vessel MS. BECKY for passing arrangements. The western half of the federal navigation channel, approximately 150 feet, is currently restricted to navigation. This area is marked with two orange and white marker buoys labeled “Danger” that are placed approximately 85 yards (250 feet) upstream of the bridge.

2. The temporary East Trestle, which extends from the eastern shoreline westward to the eastern limit of the federal navigation channel and includes new Bridge Pier 2. This area is marked with two orange and white and regulatory marker buoys labeled “Danger” that are placed approximately 85 yards (250 feet) upstream of the bridge. The federal navigation channel east of the center pier (eastern half), approximately 150 feet wide, remains available for navigation. Marine equipment on site includes a crew boat, a push boat, a work boat, and multiple deck barges. Mariners are urged to use extreme caution when transiting the area, and to operate at minimum speed necessary to maintain safe course that minimizes wake. Interested mariners can contact the MS. BECKY or CLAIRE MARIE via VHF-FM channels 16 and 13. Chart 12289

***DC - UPPER POTOMAC RIVER - GEORGETOWN CHANNEL – BRIDGE REHABILITATION PROJECT***

UPDATED INFORMATION. Major rehabilitation of the Arlington Memorial Bridge will commence in the Potomac River in Washington, DC on or about July 2, 2018 and will continue until November 2020. The initial work consists of pinning a pier barge in place with a steel ramp connecting the barge to the shore on the western shoreline south of the bridge and outside of the federal navigation channel. Construction work will generally be conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., though nighttime work is possible. Marine equipment on site includes a crew boat, push boats, and up to 10 barges at various locations along the length of the bridge with work focused on the center span. On or about July 16, 2018, the project will require the temporary relocation of the federal navigation channel, which currently is located under the center span of the bridge (Arch 5). The temporary channel will be located under the adjacent span to the east (Arch 4), and will be established through the fall of 2020. Navigation channel lighting at the bridge will be in accordance with Coast Guard requirements. Once the temporary channel is established, work will begin to assemble a large work platform, which will completely obstruct the federal navigation channel. Upstream of this platform, a protection system will be deployed, which will be comprised of a floating pipe boom on the water surface attached to concrete anchors. All elements will be marked and lighted in accordance with USCG requirements. Mariners are urged to use caution when transiting the area, and operate at the minimum speed necessary to maintain safe course near the work site. Interested mariners can contact the vessels BULLDOG II and CAPT. JACK via marine band radio VHF-FM channels 16 and 13 when actively working on the river, or at telephone number 305-304-6653. The Kiewit bridge construction contractor can be contacted at 813-323-4611. For any questions or more information, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at telephone (410) 576-2674 or (410) 576-2693.

VA – CHESAPEAKE BAY ENTRANCE – CHESAPEAKE BAY BRIDGE TUNNEL – MARINE OPERATIONS

Chesapeake Tunnel Joint Venture will commence Tug, Crane and Barge operations along with the Tug Robert T (or other similar vessel) around the existing Chesapeake Bay Bridge Tunnel protection berms for Island 1 and Island 2 on or about February 11, 2019. Work is expected to last 2020. This work will not impede the navigational channel. Operators of vessels of all types should be aware that at different times, the crane barge and material barges may be held in place by way of spuds and at other times, it may be held in place by a single, or up to a six point anchoring system. Buoys are attached to the anchors so that the anchors may be moved as the crane barge advances along the project. All Mariners are cautioned to strictly comply with the Rules of the Road when in the vicinity of the job site and approaching or leaving the area of operations, and remain a safe distance away from any and all buoys, cables, barges, workboats, and tugs working at the job site. The anchor buoys will be illuminated at night by flashing white lights and the barges will be illuminated by steady white lights on all corners. Work vessels in the area will stand by on VHF-FM channels 13 and 16.

VA – LYNNHAVEN INLET – BROAD AND NARROWS CHANNELS – DREDGING

Cottrell Contracting Corporation of Chesapeake Virginia dredge LEXINGTON will be conducting 24/7 dredging operations within the Lynnhaven Inlet Federal Navigation Channel from 3 Jun until 1 Sep 2019 in multiple locations within the inlet and adjoining waterways. First phase of dredging operations are scheduled to begin in the Turning Basin on or around 3 Jun and continue through 15 Jul. The operation will also include sections along Long Creek during the latter part of this phase. Phase two of dredging will be in the vicinity of the Lynnhaven Inlet seaward of the Lesner Bridge. The dredge and associated equipment is expected to remain in the channel until completion on or around 5 Aug 2019. The final stage of the dredging project will involve working the Narrows in the vicinity of Linkhorn Bay. This work will continue until the project’s anticipated completion date of 1 Sep. Mariners are requested to use extreme caution when transiting in the vicinity of the dredge, buoys, pipelines, barges wires, cables, pipelines, barges, docks, wires and related equipment. The dredge LEXINGTON monitors VHF channels 13 and 16. All vessels are requested to contact the dredge prior to passing and maintain a safe speed and distance while transiting this area due to numerous areas of shoaling throughout the narrow waterway.
