Coast Guard**

LOCAL NOTICE TO MARINERS

District: 5

Week: 43/20

COASTAL WATERS FROM SHREWSBURY RIVER, NEW JERSEY TO LITTLE RIVER, SOUTH CAROLINA

The Local Notice to Mariners contains all information relevant to the waterways within the Fifth Coast Guard District and is updated each Tuesday on the U.S. Coast Guard Navigation Center website at <https://www.navcen.uscg.gov/>.

If you have questions about the Fifth Coast Guard District Local Notice to Mariners (LNM), please contact:

COMMANDER
FIFTH COAST GUARD DISTRICT (dpw)
431 Crawford Street
Portsmouth, Virginia 23704

or for correspondence and article requests:
ward.b.posey@uscg.mil, (757) 398-6229 and CGD5Waterways@uscg.mil

All bearings are in degrees TRUE - All times are in Local Time unless otherwise noted.

AIDS TO NAVIGATION DISCREPANCY REPORTING

To report any Aids to Navigation discrepancies (missing, damaged, extinguished lights, off station), shoaling or hazards to navigation, discrepancies to bridge lighting, please contact the following 24 hour numbers:

1. For PA, NJ, DE waters, coastal and tributaries contact COGARD SECTOR DELAWARE BAY at (215) 271-4940.
2. For MD, DE in the Upper Chesapeake Bay and tributaries contact COGARD SECTOR MARYLAND - NATIONAL CAPITAL REGION at (410) 576-2525.
3. For VA in Lower Chesapeake Bay below Smith Point Light and tributaries and VA, MD Eastern Shore Bay and coastal contact COGARD SECTOR VIRGINIA at (757) 483-8567.
4. For NC waters, coastal and tributaries contact COGARD SECTOR NORTH CAROLINA at (910) 343-3882.

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

****** NEW OR UPDATED INFORMATION IN THE LOCAL NOTICE TO MARINERS ******

New, updated or very important information in the Local Notice to Mariners (LNM) will be preceded and followed by four asterisks.

******NATIONAL OCEANIC ATMOSPHERIC ADMINISTRATION – U.S. COAST PILOT 2 - ATLANTIC COAST: CAPE COD, MA TO SANDY HOOK, NJ******

U.S. Coast Pilot 2, Atlantic Coast: Cape Cod, MA to Sandy Hook, NJ, 50th Edition, 2021 has been issued and is ready for free download and weekly updates at <https://nauticalcharts.noaa.gov/publications/coast-pilot/index.html>.

Only Print-on-Demand (POD) bound copies are available for purchase; visit www.nauticalcharts.noaa.gov/publications/print-agents.html#coast-pilot.

The 2021 Edition cancels the preceding 2020 Edition, and incorporates all previous corrections.

LNM: 43/20

******NJ – DE – SEACOAST - DELAWARE BAY – PORT ACCESS ROUTE STUDY – PUBLIC MEETINGS******

The Coast Guard is announcing two public meetings to discuss our notice of study entitled "Port Access Route Study: Seacoast of New Jersey including the offshore approaches to the Delaware Bay, Delaware" that was published in the Federal Register on May 5, 2020, (USCG-2020-0172). And our notice of inquiry entitled "Anchorage Grounds; Delaware Bay and Atlantic Ocean, Delaware" that was published in the Federal Register on November 29, 2019, (USCG-2019-0822). Because the public may have similar comments on both topics we have decided to hold joint public meetings to discuss both notices. To ensure adequate opportunity to address concerns raised at the meetings and any subsequent questions, the Coast Guard is reopening the comment period.

Interested members of the public can attend either session, via teleconference, on Thursday October 29, 2020, from 1 p.m. to 3 p.m. or on Wednesday November 4, 2020, from 6 p.m. to 8 p.m. The Coast Guard must receive all comments on or before November 10, 2020. The Coast Guard must receive your comments before October 15, 2020 if you want your comments to be considered before the public meetings.

The public meeting will be held via a web-enabled interactive, online format and teleconference line. To join the web-based meeting and

teleconference or to request special accommodations, contact the individual listed below no later than 1 p.m. on October 20, 2020. You may submit written comments identified by docket number USCG-2020-0172 using the Federal eRulemaking Portal at <https://www.regulations.gov>.

If you have questions about this notice, call or email Captain Maureen Kallgren, Fifth Coast Guard District, Waterways Management Branch, (757) 398-6250, Maureen.R.Kallgren@uscg.mil or Mr. Jerry Barnes, Fifth Coast Guard District, Waterways Management Branch, (757) 398-6230, Jerry.R.Barnes@uscg.mil. If you encounter technical difficulties accessing the online meeting, please call LTJG John Frank, (757) 398-6298.

LNM: 41/20

NATIONAL OCEANIC ATMOSPHERIC ADMINISTRATION - U.S. COAST PILOT 4 - ATLANTIC COAST

Cape Henry, VA to Key West, FL, 52nd Edition, 2020, has been issued and is ready for free download and weekly updates at <https://nauticalcharts.noaa.gov/publications/coast-pilot/index.html>.

Only Print-on-Demand (POD) bound copies are available for purchase; visit www.nauticalcharts.noaa.gov/publications/print-agents.html#coast-pilot.

The 2020 Edition cancels the preceding 2019 Edition, and incorporates all previous corrections.

LNM: 39/20

******COAST GUARD SEEKS COMMENTS ON HOW TO IMPROVE OUR NATION'S SHALLOW DRAFT WATERWAYS ATON SYSTEM******

The U.S. Coast Guard is conducting a Waterways Analysis and Management System (WAMS) Study on the Shallow Draft System (waters less than 12 feet). The purpose of this study is to determine the navigational needs and requirements of vessels operating in shallow draft navigable waterways throughout the country. The study will focus on the existing shallow water Aids to Navigation (ATON) system, future development projects, waterborne commerce transiting these waters, and marine casualty information. Waterway users, interested parties, and stakeholders are invited to provide comments or feedback via the tool posted at <https://www.surveymonkey.com/r/ShallowWaterWAMS>. This link will remain available until November 1, 2020. Further questions or comments may be emailed to CGNAV@uscg.mil using the subject line: "Shallow Draft WAMS".

LNM: 32/20

******NC – VA – MD – DE – NJ - ATLANTIC OCEAN - OFFSHORE STRUCTURE PATON MARKING GUIDANCE******

For Private Aids to Navigation (PATON) applicants requesting Coast Guard permits to provide navigational markings on offshore structures in Fifth Coast Guard District waters, the following structure identification, lighting, sound signal, and Automated Identification System (AIS) capabilities are strongly recommended. Applicants should plan to apply for one Private Aid Permit per structure (to include all label, light(s), sound signals and AIS signals). Private AtoN Permit applications should be submitted no sooner than 60 days prior to the need to activate a structure's final markings. Additional specific recommendations include:

Tower Identification:

- Uniquely lettered and numbered in an organized pattern as near to rows and columns as possible
- Letters and numbers labelled to as near to 3 meters high as possible
- Visible above any servicing platforms
- Visible throughout a 360-degree arc from the water's surface
- Visible at night through use of retro-reflective paint and lettering/numbering materials
- If feasible, also labelled below the servicing platform

Lighting:

- Located on all structures, preferably on the servicing platform, visible throughout a 360-degree arc from the water's surface
- Corner Towers/Significant Peripheral Structures (SPSs): Quick flashing yellow (QY) energized at a five nautical mile range
- Outer Boundary Towers: Yellow 2.5 sec (FL Y 2.5s) energized at three nautical mile range
- Interior Towers: Yellow 6 sec or yellow 10 sec (FL Y 6/FL Y 10) energized at a two nautical mile range
- All lights should be synchronized by their structure location within the field of structures

Note: All temporary base, tower and construction components preceding the final structure completion must be marked with Quick Yellow (QY) obstruction lights visible throughout 360 degrees at a distance of 5NM. These do not require permits, only Coast Guard notification for appropriate marine notices and broadcasts until the final structure marking is established.

Sound Signals:

- Should be located on all structures located at corners/SPSs
- Sound every 30 seconds (4s Blast, 26s off)
- Set to project at a range of 2NM
- Should not exceed 3NM spacing between perimeter structures
- Must be Mariner Radio Activated Sound Signal (MRASS) activated by keying VHF Radio frequency 83A five times within ten seconds
- Timed to energize for 45 minutes from last VHF activation

Automated Information System (AIS) Transponder Signals:

- Must be transmitted superimposed at all corner structures/SPSs
- Should be capable of transmitting signals to mark all locations of all structures throughout an

established field

- Must be approved at the Coast Guard Headquarters level (CG-NAV) based on the Fifth Coast Guard District's recommendation

PATON Application can be requested through email to: D05-SMB-CGD5Waterways@uscg.mil

Please forward questions or feedback in an e-mail to:

Jerry.R.Barnes@uscg.mil and Matthew.K.Creelman2@uscg.mil

LNLM: 36/20

******NOVEL CORONAVIRUS – MARINERS AND MARITIME COMMERCE - PART 1******

UPDATED. An outbreak of respiratory illness caused by a novel COVID-19 continues to affect mariners and maritime commerce. Vessel arriving to or traveling between any U.S. port or place must follow reporting and infection control measures to maintain the safety of personnel onboard vessels as well as within the port.

Vessel Reporting Requirements:

Illness of a person onboard any vessel that may adversely affect the safety of a vessel or port facility is a hazardous condition per 33 CFR 160.216 and must be reported immediately to the U.S. Coast Guard Captain of the Port (COTP). Cases of persons who exhibit symptoms consistent with COVID-19 must be reported to the COTP. This requirement is separate and additional to any other required Coast Guard or Center for Disease Control and Prevention (CDC) reporting, and applies to vessels departing from or arriving to any port or place in the U.S., includes internal waters, the territorial seas, and deep water ports. In addition to Coast Guard reporting requirements, 42 CFR 71.21 requires vessels destined for a U.S. port to report to the Center for Disease Control and Prevention (CDC) any sick or deceased crew/passengers during 15 days prior to arrival at the U.S. port. Guidance to vessels to report deaths and illnesses to the CDC can be found at: Cargo vessels and Cruise ships. U.S. flagged commercial vessels are also advised to report ill crewmembers in accordance with the requirements of each foreign port called upon. Further, 42 CFR 70.4 states the master of any vessel or person in charge of any conveyance engaged in interstate traffic, on which a case or suspected case of a communicable disease develops shall, as soon as practicable, notify the local health authority at the next port of call, station, or stop, and shall take such measures to prevent the spread of the disease as the local health authority directs. See Headquarters MSIB 06-20, (or Sector Virginia MSIB 20-063) "Vessel Reporting Requirements for Illness or Death", for further information.

******NOVEL CORONAVIRUS – MARINERS AND MARITIME COMMERCE – PART 2******

Vessel Control Actions:

Presidential Proclamations have placed entry restrictions from persons arriving from or through the following countries: Iran, China (excluding Hong Kong and Macau), the European states within the Schengen Area (Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland), United Kingdom and Republic of Ireland.

Non-passenger Commercial Vessels: Non-passenger commercial vessels that have been to the countries noted above or embarked crewmembers from the countries noted above within the last 14 days, with no sick crewmembers, will be permitted to enter the U.S. and conduct normal operations, provided that crewmembers remain aboard the vessel except to conduct specific activities directly related to vessel cargo or provisioning operations. U.S. citizens or any other persons listed in Section 2 of Presidential Proclamation "Suspension of Entry as Immigrants and Nonimmigrants of Certain Additional Persons Who Pose a Risk of Transmitting 2019 Novel Coronavirus", for example crewmembers with a transit and/or crewmember visa, may be permitted to disembark the vessel to conduct vessel operations pier side or for the immediate and continuous transit through the U.S. to another country. When entering the U.S. all persons must be cleared by Customs and Border Protection (CBP) and, if applicable, CDC. Crewmembers without the appropriate visas will generally be required to remain onboard unless otherwise cleared for entry by CBP and, if applicable, CDC. Non-passenger commercial vessels that have been to the countries noted above or embarked crewmembers from the countries noted above within the last 14 days, and do have sick crewmembers should expect delays and need to work with local health and port officials prior to entry.

Passenger Vessels: On April 15, 2020, the CDC updated their existing No Sail Order. This Order will remain in effect until the Secretary of Health and Human Services' declaration that COVID-19 constitutes a public health emergency, the CDC Director rescinds or modifies the order based on specific public health or other considerations, or 100 days from the date publication in the Federal Register. This renewed order requires all cruise ship operators to provide "an appropriate, actionable and robust plan to prevent, mitigate, and respond to the spread of COVID-19 on board cruise ships" prior to operating in waters subject to U.S. jurisdiction. In addition to the plan, there are further restrictions.

LNLM: 17/20

NC - HAZARDS OF NORTH CAROLINA COASTAL INLETS

Hazardous inlets. To heighten public awareness about the hazards that exist in and around the North Carolina, this information is provide to mariners. Shoaling conditions exist at following North Carolina coastal inlets:

Oregon Inlet Hatteras Inlet

Ocracoke Inlet Barden Inlet

Beaufort Inlet Bogue Inlet

New River Inlet Topsail Inlet

Masonboro Inlet Carolina Beach Inlet

Lockwoods Folly Inlet Shallotte Inlet

Shoaling conditions increase the potential for groundings. These inlets are subject to continual and sometimes rapid environmental changes.

Mariners are highly encouraged to obtain the most recent U.S. Army Corps of Engineers Wilmington, North Carolina District hydrographic survey information, centerline waypoints and controlling depth at:

<http://www.saw.usace.army.mil/Missions/Navigation/HydrographicSurveys.aspx>

Mariners should use caution when navigating in these areas and passage through the inlets is not recommended without local knowledge of the area. The aids to navigation in these inlets may not be charted and may not be marking best water due to continually shifting shoals. Consult Local Notice to Mariners, 5th Coast Guard District for the latest positions and status of aids to navigation:

<https://www.navcen.uscg.gov/?pageName=InmDistrict®ion=5>

To report any aids to navigation discrepancies (missing, damaged, off station, extinguished lights), shoaling, hazards to navigation, or discrepancies on bridge lighting, please contact Sector North Carolina Command Center (910) 343-2200.

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

INTERFERENCE WITH AIDS TO NAVIGATION

14 USC 543. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, wilfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 541 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 542 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense.

U.S. COAST GUARD AUXILIARY – PUBLIC EDUCATION CLASSES – FIND BY ZIPCODE

The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.

http://www.cgaux.org/boating/class_finder/index.php

WESTERN ATLANTIC AND U.S. COASTAL WATERS - NORTH CAROLINA – SUNKEN MILITARY CRAFT ACT (SMCA) –PROHIBITION ON DISTURBING, REMOVING ARTIFACTS OR DAMAGING SUNKEN CRAFT

Special protections are provided to sunken military craft by the "Sunken Military Craft Act" (SMCA) (Public Law 108-375). Along the U.S. East Coast, and particularly off North Carolina, there are many sunken U.S. and foreign military craft. Sunken military craft may be the final resting places of military personnel who died in service to their country and are also important historical resources. One very notable example is the wreck of the USS MONITOR, off the NC Coast, also protected by the National Marine Sanctuaries Act. Under international and U.S. law, sunken foreign military craft, including those located in U.S. waters, remain the property of their respective country's government. Sovereign immune vessels, such as military crafts, are afforded protections under U.S. and international law. Included among these vessels are at least three known sunken German submarines (U-boats) located in waters off the NC coast. These U-boats remain the property of the Federal Republic of Germany. In accordance with the SMCA, no person shall engage in or attempt to engage in any activity directed at a sunken military craft that disturbs, removes, or injures the sunken craft or the associated contents of the craft. This includes, but is not limited to, the equipment, cargo, contents of the vessel, and the remains and personal effects of the crew and passengers. Mariners are urged to exercise due care when operating in the vicinity of military wrecks, as they can be damaged by both purposeful or inadvertent activities including anchoring, fishing, diving, and other marine activities. Special dangers, such as unexploded ordnance, may also be associated with sunken military craft, and should be considered when operating in these areas. Violations of the SMCA may subject individuals to penalties of up to \$100,000 and to liability for damages. Mariners who witness theft of material from, disturbance of, or damage to a sunken military craft are asked to report it to the nearest Coast Guard unit.

SAFETY NOTICE - NAVIGATIONAL RANGE STRUCTURES ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

The U.S. Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information on GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via e-mail subscription through the USCG Navigation Center website (<https://www.navcen.uscg.gov/gps/status/default.htm>). In addition, the NIS investigates all reports of degradation or loss of GPS and DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: 703-313-5900, webmaster@navcen.uscg.mil or <https://www.navcen.uscg.gov>.

BROADCAST NOTICES TO MARINERS

Broadcast Notices to Mariners (BNMs) that are still in effect at the date of this publication.

CCGD5 (D5) - 573, 574, 575, 579, 580, 581, 583, 589, 590, 591, 592, 593, 594, 595, 596, 599, 600, 601, 602, 603-20.

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections. This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR						
(Temp) ADD		NATIONAL DOCK CHANNEL BUOY 3			CGD01 at 40-41-09.001N	074-02-48.001W
Corrective Action		Green can	Object of Corrective Action		Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		
<u>Advance Notice(s)</u>		

NJ – INTRACOASTAL WATERWAY – ATLANTIC CITY TO CAPE MAY – AID TO NAVIGATION CHANGES

On or about the first week of December, the Coast Guard will change the following aids from "Maintained year round" to seasonal buoys that are "Removed when endangered by ice".

- New Jersey Intracoastal Waterway Buoy 263 (LLNR 36007)
- New Jersey Intracoastal Waterway Buoy 263A (LLNR 36009)
- New Jersey Intracoastal Waterway Buoy 264A (LLNR 36011)
- New Jersey Intracoastal Waterway Buoy 376 (LLNR 36393)
- New Jersey Intracoastal Waterway Buoy 381 (LLNR 36410)

Chart 12316 LNM: 40/20

******NJ - DE – DELAWARE BAY MAIN CHANNEL – CHANGE IN SEASONAL CONDITION******

On or about the second week of November, the Coast Guard will change the Ice Condition for Delaware Bay Main Channel Lighted Buoy 34 (LLNR 1625) from "Replaced by nun from Nov 15 to Mar 15" to "Replaced by nun when endangered by ice".

Chart 12304 LNM: 43/20

******PA - NJ – UPPER DELAWARE RIVER – TEMPORARY BUOY RELOCATIONS FOR DREDGING******

The following buoys will be temporarily relocated for dredging the last week of Oct or the first week of November 2020.

- Upper Delaware River Channel Lighted Buoy 71 (LLNR 4155) to 40-07-21.424N, 074-46-52.421W
- Upper Delaware River Channel Lighted Buoy 72 (LLNR 4160) to 40-07-35.543N, 074-46-18.816W
- Upper Delaware River Channel Lighted Buoy 76 (LLNR 4170) to 40-08-00.585N, 074-45-31.735W
- Upper Delaware River Channel Lighted Buoy 78 (LLNR 4175) to 40-08-03.253N, 074-45-04.667W

Chart 12314 LNM: 43/20

DE – CAPE HENLOPEN TO INDIAN RIVER INLET – MIDDLE ISLAND WEST CHANNEL - AID TO NAVIGATION CHANGES

On or about the end of November 2020, the Coast Guard will discontinue the following aids;

- Middle Island West Channel Junction Lighted Buoys MI (LLNR 4436)
- Middle Island West Buoy 1 (LLNR 4437)
- Middle Island West Channel Buoy 3 (LLNR 4438)
- Middle Island West Channel Daybeacon 5 (LLNR 4439)
- Middle Island West Channel Buoy 7 (LLNR 4439.5)

Charts: 12214 12216 LNM: 39/20

******DE – CAPE HENLOPEN TO INDIAN RIVER INLET – WHITE CREEK – AID TO NAVIGATION CHANGES******

On or about the second week of November 2020, the Coast Guard will discontinue the following unlit seasonal buoys and convert lateral daybeacons to warning markers. Delaware has requested to establish Private Aids to navigation in White Creek and plans to establish new buoys in January 2021.

- White Creek Buoy 1 (LLNR 4645), Discontinue.
- White Creek Buoy 3 (LLNR 4650), Discontinue.
- White Creek Buoy 5 (LLNR 4655), Discontinue.
- White Creek Buoy 6 (LLNR 4660), Discontinue.
- White Creek Daybeacon 7 (LLNR 4665) change to White Creek Warning Daybeacon A (LLNR 4665).
- White Creek Daybeacon 9 (LLNR 4670) change to White Creek Warning Daybeacon B (LLNR 4670).
- White Creek Daybeacon 9A (LLNR 4675) change to White Creek Warning Daybeacon C (LLNR 4675).
- White Creek Daybeacon 11 (LLNR 4680) change to White Creek Warning Daybeacon D (LLNR 4680).

Chart 12216 LNM: 39/20

******MD – CHESAPEAKE BAY – APPROACHES TO BALTIMORE – MIDDLE RIVER – AID TO NAVIGATION NAME CHANGES******

On or about November 2, 2020 the Coast Guard will renumber and rename the following aids to navigation.

- Middle River Light 5 (LLNR 27117) to Middle River Light 3 (LLNR 27117).
- Middle River Light 6 (LLNR 27120) to Middle River Light 4 (LLNR 27120).
- Middle River Daybeacon 7 (LLNR 27155) to Middle River Daybeacon 5 (LLNR 27155).

Charts: 12273 12278 LNM: 42/20

VA – HAMPTON ROADS – ELIZABETH RIVER – NORFOLK INTERNATIONAL TERMINAL – AID RELOCATION FOR DREDGING

In association with the dredging/realignment project for Norfolk International Terminal South Channel the Coast Guard; on or about October 26, 2020, will temporarily relocate the following buoys. Norfolk International Terminal South Buoy 2S (LLNR 9555) to approximate position 36 54 48.069N, 76 20 12.405W and Norfolk International Terminal South Lighted Buoy 4S (LLNR 9560) to approximate position 36 54 42.585N, 76 19 57.796W approximately 140' outside the channel limit. Due to the reduced depths outside the channel limits a change to the authorized hulls are required. This change will reduce the daytime visibility to 1.2NM and radar range to 0.5NM.

Charts: 12206 12222 12245 LNM: 41/20

******VA – JAMES RIVER – JORDAN POINT FRONT AND REAR RANGE – DISCONTINUE******

On or about December 22, 2020 the Coast Guard will discontinue Jordan Point Range Rear Light (LLNR 12420) and Jordan Point Range Front Light (LLNR 12415). Jordan Point Range Front Passing Light (LLNR 124175) will be change to Jordan Point Warning Light showing a flashing 4S white light until the structure is removed.

Chart 12251 LNM: 43/20

NC – CAPE HATTERAS – AID TO NAVIGATION CHANGE

On or about the last week of November, the Coast Guard will convert Hatteras Inlet Channel Daybeacon 18 (LLNR 28760) to Hatteras Inlet Channel Buoy 18 (LLNR 28760).

Chart 11555

LNM: 39/20

NC – OCRACOE INLET – TEACHES HOLE CHANNEL – AID TO NAVIGATION CHANGE

On or about the first week of November, the Coast Guard will convert Teaches Hole Channel Light 30 (LLNR 28970) to Teaches Hole Channel Lighted Buoy 30 (LLNR 28970).

Charts: 11548 11550 11555

LNM: 36/20

NC – WESTERN PART OF PAMLICO SOUND – OYSTER CREEK - AID TO NAVIGATION CHANGE

During the last week of November, the Coast Guard will change Oyster Creek Daybeacon 8 (LLNR 32835) to Oyster Creek Buoy 8 (LLNR 32835).

Chart 11548

LNM: 39/20

NC – NEUSE RIVER – TRENT RIVER - AID TO NAVIGATION CHANGE

During the last week of November, the Coast Guard will change Trent River Daybeacon 4A (LLNR 34260) to Trent River Buoy 4A (LLNR 34260) and change Trent River Daybeacon 9 (LLNR 34280) to Trent River Buoy 9 (LLNR 34280).

Chart 11552

LNM: 39/20

******NC – CORE SOUND – AID REMOVAL******

Starting on or about the last week of October, the Coast Guard will discontinue the following damaged and/or abandoned fixed aids to navigation commencing around Wainwright Slough in northern part of Core Sound. Mariners should maintain a safe distance from construction vessel during demolition operations. Mariners may monitor project progress via BNM and weekly LNM Advance Notice updates as contractor completes work.

- Core Sound Warning Light CS (LLNR 34325)
- Core Sound Warning Daybeacon AA (LLNR 34330)
- Core Sound Warning Daybeacon BB (LLNR 34345)
- Core Sound Warning Daybeacon (LLNR 34350)
- Core Sound Warning Daybeacon DD (LLNR 34355)
- Core Sound Warning Light EE (LLNR 34365)

Chart 11550

LNM: 42/20

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT

COAST GUARD POLICY ON NOTIFICATION OF PROPOSED CHANGES

The Coast Guard is evaluating changes in aids to navigation as noted in the below articles. Users may provide feedback on the Fifth Coast Guard District Waterway Proposals Data/Feedback Form:

https://www.navcen.uscg.gov/pdf/Inms/D05_Proposal_Feedback_Form.pdf

This section also includes Public Notices for proposed changes to the bridges within the Fifth Coast Guard District with a request for comments as indicated.

LNM: 04/20

MD – CHESAPEAKE BAY – APPROACHES TO BALTIMORE – PATAPSCO RIVER – JONES CREEK – PROPOSED AID TO NAVIGATION CHANGE

North Point Creek Light 2 (LLNR 20515) is damaged with wreckage on scene. The wreckage is being marked with a Temporary Replacement Lighted Buoy (TRLB). The Coast Guard is proposing removing the wreckage and making the lighted buoy permanent, North Point Creek Lighted Buoy 2 (LLNR 20515), maintained from March 15 to December 1 and relocating it to approximate position 39 13 07.794N, 76 26 29.336W.

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at https://www.navcen.uscg.gov/pdf/Inms/D05_LNM_2015_Special_Notice_Waterway_Proposal_Feedback_Form.pdf

All comments will be carefully considered and are requested prior to November 16, 2020 to be considered in the analysis. Refer to project number 05-20-082(D)

LNM: 39/20

NC - CAPE HATTERAS TO LITTLE RIVER INLET – PROPOSAL TO CHANGE AID TO NAVIGATION

Due to the failing rotating beacon at Oak Island Light (LLNR 810) and based on considerable improvements in navigation safety, vessel training,

and carriage requirements, and wide-spread use of technology such as GPS and charting software, and other aids to navigation in the area; the Coast Guard Fifth District is proposing to replace the failing optic with a LED rotating beacon with a reduced nominal range of 21nm. Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at https://www.navcen.uscg.gov/pdf/Inms/D05_LNM_2015_Special_Notice_Waterway_Proposal_Feedback_Form.pdf All comments will be carefully considered, and are requested prior to October 26, 2020 to be considered in the analysis. Lockwoods Folly Inlet Buoy 7 (LLNR 31035)
Lockwoods Folly Inlet Buoy 8 (LLNR 31040)

Interested Mariners and other stakeholders are strongly encouraged to comment on the potential impacts this proposal would have on navigational safety. You may provide feedback using the U. S. Coast Guard Fifth District Waterway Data Sheet, available online at https://www.navcen.uscg.gov/pdf/Inms/D05_Proposal_Feedback_Form.pdf

All comments will be carefully considered and are requested prior to November 2, 2020 to be considered in the analysis. Refer to project number 05-20-078(D)

Send comments to CGD5Waterways@uscg.mil, or mail to:

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

VA - ATLANTIC OCEAN - WALLOPS ISLAND ROCKET LAUNCHES

Rocket launches are regularly scheduled in the vicinity of Wallops Island, VA, Danger Zone 334.130. Prior to these launches, visual signals will be displayed consisting of either a large orange-colored, "blimp-shaped" balloon by day or a rotating alternately red and white beacon by night. The balloon will be flown from a position at 37-50-38N, 75-28-47W and the beacon will be displayed approximately 200 feet above mean high water in position 37-50-16N, 75-29-07W. While the warning signal is displayed, all persons and vessels in the Danger Zone, except vessels entering or departing Chincoteague Inlet, shall leave the zone promptly by the shortest possible route and remain outside the zone until allowed by a patrol boat to enter or the danger signal has been discontinued. Vessels entering or departing Chincoteague Inlet must take the shortest route possible upon display of the danger signal. The Danger Zone is depicted on navigational charts 12210 and 12211 with corner points starting in the vicinity of Assawoman Inlet and proceeding southerly to position 37-43-20N, 075-29-41W; thence northeasterly to a point in the vicinity of Chincoteague Shoals; thence westerly back to Wallops Island shoreline.

******VA – CHESAPEAKE BAY – CAPE CHARLES TO NORFOLK HARBOR - JOINT EXPEDITIONARY BASE LITTLE CREEK FORT STORY – LIVE FIRING******

Live firing is conducted continuously off Joint Expeditionary Base Little Creek in Danger Zone 334.370, the area west of the south end of the Chesapeake Bay Bridge Tunnel, bounded by the following positions: 36-55-24N 76-08-43W, 36-55-50N 76-08-37W, 36-57-16N 76-08-14W, 36-57-16N 76-08-14W, 36-56-58.5N 76-07-11W, 36-57-07N 76-07-44W. Firing is conducted Monday through Friday from 7:00 am to 8:00 pm. For questions contact Range Operations and Training Area, Mr. Assaf or Ms. Lawrence at 757-422-7103/7101.

Charts: 12222 12254

VA - WILLOUGHBY BAY - THIMBLE SHOAL CHANNEL - HELICOPTER AIRBORNE MINE COUNTERMEASURES OPERATIONS

Helicopter Mine Countermeasures Squadron Fourteen (HM-14) routinely conducts airborne mine countermeasures (AMCM) operations utilizing the MH-53E helicopter at low altitudes over the following inland and coastal waterways:

- Willoughby Bay
- Thimble Shoal Channel from the Naval Station Norfolk piers to the Chesapeake Bay Bridge Tunnel.
- An area of the Chesapeake Bay, adjacent to the Thimble Shoal Channel from Thimble Shoal to the Chesapeake Bay bridge tunnel extending to the north four miles to form a four by seven mile rectangle.

During these operations, the aircraft will be operating at altitudes as low as seventy-five feet and will produce localized winds in excess of 125 miles per hour. Rotor wash produced winds pose a considerable hazard to vessels, especially sailing vessels. The devices the helicopters tow range in size and appearance from a large orange and white sled approximately the size of a pick up truck to slightly submerged steel pipes thirty feet in length, both of which have submerged cable extending well beyond the visible portion of the towed device. The Aircraft Commanders have been directed to exercise every effort to conflict and avoid surface vessels.

All mariners are requested to remain well clear of the helicopters, the towed devices, and the area extending directly behind the aircraft for four hundred yards. Do not approach or cross the area directly behind the towed device as a submerged hazard exists regardless of whether the device is in motion or stationary.

These operations involve large naval helicopters at flight altitudes of 100 feet or less, towing surface and sub-surface devices at speeds up to 25 knots. Helicopters may be identified by a rotating amber position light on centerline of main hull flashing 90 times per minute. An area of hurricane-force winds exists within a 250-foot radius around these helicopters, sufficient to blow people and objects from exposed decks and capsize small craft. The towed devices may be completely invisible and include large cables on or just below the surface streaming up to 1200 feet behind the aircraft. AMCM helicopters will transit to and from the area described above in the following manner: Outboard from the seaplane ramp at the Norfolk Naval Air Station across Willoughby Bay to the main shipping channel, then easterly along the main channel to Buoy 21. From Buoy 21 either East, SE or SSE to the operating area. The return flight will follow the same path as the outbound flight. To minimize the potential for mishap, vessels are requested to remain well clear of these danger zones when AMCM operations are encountered.

Charts: 12200 12205 12221 12222 12245 12254

VA –YORK RIVER – U.S. NAVAL WEAPONS STATION - CHEATHAM ANNEX - SMALL ARMS LIVE FIRE DANGER ZONE

A Danger zone has been established within an area beginning at Mean High Water on the shore at the U.S. Naval Weapons Station, Cheatham Annex facility on the York River, located at 37° 17' 33.10"N, 076° 36' 19.06" W; then northeast to a point on the York River at 37° 18' 36.650"N, 076° 34' 39.010"W, thence south, southeast to 37° 17' 59.37"N, 076° 34' 13.65"W; then southwest to a point on the shore located at 37° 17' 26.750"N, 076° 36' 14.890"W. Vessels may transit this area at anytime; however, no vessel shall anchor, fish or conduct any waterborne activities within the Danger Zone established in accordance with this regulation any time live firing exercises are being conducted. Any time live firing is being conducted a red flag will be displayed in a conspicuous location along the shore to signify the range is active. At night, red lights will be displayed.

Chart 12241

LNM: 37/20

VA - VIRGINIA CAPES OPERATING AREA (VCOA) - PERMANENT MINE WARFARE TRAINING FIELDS

The U.S. Navy has established four permanent mine warfare training fields within the Virginia Capes Operating Areas. The bounding coordinates for each field are as follow:

- AREA A: 37-09.0N 075-31.0W, 37-09.0N 075-34.7W, 37-12.0N 075-31.0W, 37-12.0N 075-34.7W.
- AREA B: 36-29.0N 075-31.8W, 36-29.0N 075-35.5W, 36-26.0N 075-35.5W, 36-26.0N 075-31.8W.
- AREA C: 36-29.0N 075-20.8W, 36-29.0N 075-24.5W, 36-26.0N 075-24.5W, 36-29.0N 075-20.8W.
- AREA D: 36-46.5N 075-47.8W, 36-46.5N 075-46.5W, 36-47.5N 075-46.5W, 36-47.5N 075-47.8W.

Each area contains inert bottom and moored training mines that pose a potential hazard to dredging operations and trawler nets. All moored mines are placed at a minimum of 40 feet depth (MLLW) to preclude them as hazards to navigation.

Chart 12200

VA - COASTAL - STATE MILITARY RESERVATION, CAMP PENDLETON, VIRGINIA BEACH - SMALL ARMS LIVE FIRE SCHEDULE

The Camp Pendleton State Military Reservation Live Fire Small Arms Range described as "all of the waters seaward of the mean high water shore line within a sector between radial lines extending 13,500 yards seaward and bearing 090 degrees true and 150 degrees true, respectively, from a point on shore at 36° 49' 09"N, 075° 58' 45"W". All vessel operators are reminded to review Navigation Regulations as described in paragraph 334.380 of Chapter 2, of U.S. Coast Pilot 4, Atlantic Coast: Cape Henry to Key West (42nd) Edition when operating south of the entrance to the Chesapeake Bay. Firing will take place only during daylight hours and red flags will be displayed at conspicuous locations on the beach at the facility. Vessels shall proceed through the area with caution and shall remain in the area no longer than necessary for transit.

Charts: 12205 12207 12221

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted twenty-four (24) hours a day seven (7) days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

****NJ – DE – SEACOAST - DELAWARE BAY – PORT ACCESS ROUTE STUDY – PUBLIC MEETINGS****

The Coast Guard is announcing two public meetings to discuss our notice of study entitled "Port Access Route Study: Seacoast of New Jersey including the offshore approaches to the Delaware Bay, Delaware" that was published in the Federal Register on May 5, 2020, (USCG-2020-0172). And our notice of inquiry entitled "Anchorage Grounds; Delaware Bay and Atlantic Ocean, Delaware" that was published in the Federal Register on November 29, 2019, (USCG-2019-0822). Because the public may have similar comments on both topics we have decided to hold joint public meetings to discuss both notices. To ensure adequate opportunity to address concerns raised at the meetings and any subsequent questions, the Coast Guard is reopening the comment period.

Interested members of the public can attend either session, via teleconference, on Thursday October 29, 2020, from 1 p.m. to 3 p.m. or on Wednesday November 4, 2020, from 6 p.m. to 8 p.m. The Coast Guard must receive all comments on or before November 10, 2020. The Coast Guard must receive your comments before October 15, 2020 if you want your comments to be considered before the public meetings.

The public meeting will be held via a web-enabled interactive, online format and teleconference line. To join the web-based meeting and teleconference or to request special accommodations, contact the individual listed below no later than 1 p.m. on October 20, 2020.

You may submit written comments identified by docket number USCG-2020-0172 using the Federal eRulemaking Portal at <https://www.regulations.gov>.

If you have questions about this notice, call or email Captain Maureen Kallgren, Fifth Coast Guard District, Waterways Management Branch, (757) 398-6250, Maureen.R.Kallgren@uscg.mil or Mr. Jerry Barnes, Fifth Coast Guard District, Waterways Management Branch, (757) 398-6230, Jerry.R.Barnes@uscg.mil. If you encounter technical difficulties accessing the online meeting, please call LTJG John Frank, (757) 398-6298.

LNM: 41/20

NJ – OFFSHORE – APPROACHES TO NEW YORK – CORE PENETRATIONS

From 10 Sep to 30 Oct 2020, the M/V FUGRO EXPLORER will be conducting Core Penetration Testing, 24 hours a day, seven days a week, in the area between the Ambrose to Nantucket Traffic Lane and the Hudson Canyon to Ambrose Traffic Lane. The vessel may be contacted on VHF-FM Channel 16 or at 713-489-3204. For more information, contact Flanery Tangang at 757-364-6111.

Chart 12300

LNM: 36/20

NJ – OFFSHORE – MANASQUAN - BARNEGAT LIGHT - ATLANTIC CITY – SURVEY ACTIVITIES

UPDATED AREA OF OPERATIONS. The M/V FUGRO ENTERPRISE, call sign WDD9388, will be conducting survey operations, using sensors towed approximately 150 meters behind the survey vessel. Operations will begin on July 23, 2020 and continue to approximately December 24, 2020. The survey area is located about 9 to 20 miles off the New Jersey coast, between Barnegat Light and Atlantic City bounded by the following approximate positions:

NE Corner: 39° 40' 22"N / 73° 56' 11"W

SE Corner: 39° 15' 43"N / 73° 56' 34"W

S Corner: 39° 08' 40"N / 74° 05' 50"W

SW Corner: 39° 16' 31"N / 74° 14' 55"W

NW Corner: 39° 35' 14"N / 74° 02' 59"W

The M/V Fugro Enterprise will be restricted in her ability to maneuver and is requesting mariners operating in or transiting the area to give a 1 NM CPA. The M/V Fugro Enterprise will be monitoring VHF channel 16 and can be contacted on these frequencies for safe passing arrangements. For more information contact Bruce Grimboll 713-369-5672.

Charts: 12318 12323

LNM: 19/20

****NJ – OFFSHORE – ABSECON INLET – HAZARD TO NAVIGATION****

The Coast Guard has received a report of a lost drill pipe protruding off the bottom of the seabed floor in approximate posit 39-13-23.952n, 074-08-25.885w, 15.3nm south east of Absecon Inlet. The pipe is approximately 5 feet off the seabed floor in approximately 60 feet of water.

Chart 12318

LNM: 38/20

NJ – DE – OFFSHORE – ENTRANCE TO DELAWARE BAY - GEOTECHNICAL SURVEYING

The Skipjack Wind Farm (SJWF) is an offshore wind farm planned for federal waters off the coast of Delaware and Maryland. The SJWF will consist of wind turbines, an offshore substation, and subsea transmission system to shore. Marine survey activities are currently ongoing. Marine construction is planned to start in 2022. Mariners transiting or fishing in the survey area are requested to provide a wide berth to survey vessels, as they will be limited in their ability to maneuver, and deploying various equipment to the seabed. For more information, contact Edward LeBlanc, Orsted Marine Affairs Manager, at 978-447-2737.

Chart 12214

LNM: 33/19

****PA – DELAWARE RIVER – CHRISTINA RIVER – US13/SR9 THIRD STREET BRIDGE****

The highway drawbridge – Third Street (US 13/SR 9/ East 4th Street) Bridge over the Christina River, mile 2.3, at Wilmington, DE, will be maintained in the closed-to-navigation position to facilitate bridge maintenance of the bridge bascule spans. The bridge will be maintained in the closed position from 7 a.m. to 7 p.m. from November 2, 2020, through November 4, 2020, with alternative work dates from 7 a.m. to 7 p.m., from November 9, 2020, through November 11, 2020. During the work hours, one of the bascule leaves will be able to open on signal, while the other bascule leaf will remain in the closed position for maintenance. Vessels able to pass through the bridge with one bascule leaf open and one closed, providing a horizontal clearance of approximately 70 feet and unlimited vertical clearance, may request an opening. One bascule leaf of the bridge will be able to open on signal for emergencies. There is no immediate alternative route for vessels unable to pass through the bridge in the closed position. The bridge provides a vertical clearance of 20 feet above mean high water in the closed position. Vessels able to pass through the bridge in the closed position during these closure periods may do so at any time. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.237(c). Mariners should adjust their transits accordingly and should use caution when transiting the area.

LNM: 43/20

****PA – DELAWARE RIVER – SCHUYLKILL RIVER – BRIDGE MAINTENANCE****

An engineering firm, on behalf of Pennsylvania Department of Transportation, will be performing maintenance on the SR 3021 (Grays Ferry Avenue) Bridge, across the Schuylkill River, mile 5.5, at Philadelphia, PA. The maintenance will be conducted from 7 a.m. to 3:30 p.m., Monday-Friday, from October 26, 2020, through February 28, 2021. A 30-foot crane barge, 26-foot work boat and divers will be located in and around the vicinity of the

******PA – DELAWARE RIVER – SCHUYLKILL RIVER – BRIDGE MAINTENANCE******

bridge. During bridge maintenance, one navigation span will be occupied and not available for navigation and the other navigation span will be open for vessels to transit. The west navigation span provides 75 feet of horizontal clearance and the east navigation span provides 65 feet of horizontal clearance. Vessels may transit the open navigation span with caution, due to potential opposing vessel traffic. The crane barge and work vessel may be reached on VHF-FM channel 13. The project foreman may be reached at (609) 313-0597 or (609) 209-2029. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway.

Chart 12313

LNM: 43/20

******PA – DELAWARE RIVER - SCHUYLKILL RIVER – PROPOSED BRIDGE******

All interested parties are notified that an application dated October 8, 2020, has been received from the City of Philadelphia by the Commander, Fifth Coast Guard District, for approval of the location and plans for construction of a new pedestrian fixed bridge over a navigable waterway of the United States.

WATERWAY AND LOCATION: Schuylkill River, between mile 6.3 and 6.4, at Philadelphia, PA.

CHARACTER OF WORK: The proposed project is to construct a 3,380-foot long multi-use recreational trail along the eastern bank of the Schuylkill River between Christian Street and University Avenue (2,730 feet along the river and 700 feet connection to the neighborhood). The northern and southern limits of the proposed trail extension will be constructed on the land along the bank of the river, while the middle section of the proposed trail will be a new bridge build over water. The pedestrian bridge (at span 11) will be constructed over the Veolia Peltz Street dock on an alignment that positions the bridge landward of the face of the dock. The proposed construction is an extension of the existing multi-use Schuylkill River Trail. The purpose of the project is to provide the public a safe and efficient recreational facility along the Schuylkill River waterfront within the City of Philadelphia.

There is no existing bridge. The new bridge will be a fixed bridge with a horizontal clearance of 268.9 feet in span 8 and a vertical clearance of 14 feet above mean high water in span 8.

Note: This bridge has no navigation span (s), given it lies along the east bank of the river and does not cross the navigable waterway. Span 8 provides clearances for vessels to navigate shoreward of the bridge.

A copy of Public Notice D05PN-11-2020, which describes the proposal in detail, can be obtained by calling (757) 398-6222 or by viewing at <https://www.navcen.uscg.gov/?pageName=pnBridges>. Comments on this proposal should be forwarded to the address in the notice no later than November 24, 2020.

Chart 12313

LNM: 42/20

******PA – DELAWARE RIVER - SCHUYLKILL RIVER - SUBMERGED OBJECT******

A submerged object has been reported in the Schuylkill River near Mud Island. Mariners are advised to use extreme caution when transiting this portion of the Schuylkill River as depth at mean low low water could be hazardous to navigation. Vessels drafting over 25 feet should avoid this area and transit around the object. Minimum depth 31.6 feet at mean low low water. Approximate location 39°53.275063N, 075°11.698723W. Approximately 25 feet west of channel centerline.

The U.S. Army Corps of Engineers is currently evaluating the object and assessing the potential for removal. If you have any questions regarding the content of this bulletin, please contact the Waterways Management staff at (215) 271-4814 or the Command Center at (215) 271-4807.

Chart 12313

******PA – NJ – DELAWARE RIVER – PHILADELPHIA HARBOR – SUBMERGED OBSTRUCTIONS******

UPDATED INFORMATION. The Army Corps of Engineers in Philadelphia has located the following submerged objects within the Philadelphia Harbor area of the Delaware River.

Object 1: Latitude: 39 58.154078 N, Longitude: 075 07.014819 W Depth at MLLW=30'

Object 2: Latitude: 39 58.161305 N, Longitude: 075 07.018522 W Depth at MLLW=30'

Object 7: Latitude: 39 56.525867 N, Longitude: 075 08.376694 W Depth at MLLW=39'

Object 8: Latitude: 39 56.558767 N, Longitude: 075 08.38489W Depth at MLLW=39'

See Enclosures 8 and 9.

There is currently no timetable for removal of these objects.

Chart 12312

LNM: 25/20

PA – NJ – DELAWARE RIVER – BENJAMIN FRANKLIN BRIDGE – BRIDGE MAINTENANCE

A contractor, on behalf of the Delaware River Port Authority, will perform a bridge maintenance project on the Benjamin Franklin Bridge across the Delaware River, mile 100.2, between Philadelphia, PA and Camden, NJ, from July 27, 2020, through December 31, 2024. For the duration of the project, the preferred navigation channel and bridge navigational lighting normally situated over the 410-foot Federal project channel, will be shifted to the east approximately 205 feet. The Federal Project channel will remain fully open to traffic, however the vertical clearance of the channel has temporarily decreased based on the planned scaffolding system (work platform) to be installed. The scaffolding system will be installed over the entire length of the bridge, as detailed below.

Preferred Navigation Channel: A 410-foot scaffolding (work platform) system, with five 82-foot independent work zones, will be installed extending below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet). When in use, a single 82-foot work zone portion of the 410-foot scaffolding (work platform) system will be extended below the bridge approximately 18.5 inches (1.54 feet), thereby reducing the vertical clearance of the bridge within the work zone by approximately 18.5 inches (1.54 feet). The single 82-foot work zone portion of the 410-foot scaffolding (work platform) system in use will be lifted to extend below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet), if at least 48 hours notice is given to Eric.Dovak@Skanska.com.

Outside the Preferred Navigation Channel: Scaffolding will extend below the bridge approximately two feet from the west boundary of the Federal project channel to the center of the Federal project channel (west boundary of preferred navigation channel) and from the east boundary of the preferred navigation channel toward the east abutment approximately 385 feet. West of the west boundary of the Federal project and east of the position approximately 385 feet east of the east boundary of the preferred navigation channel, scaffolding will extend below the bridge approximately three feet.

A safety boat will be in the vicinity of the bridge during bridge maintenance, which may be reached via VHF FM channel 13. Mr. Eric Dovak, contractor's representative, may be reached at Eric.Dovak@Skanska.com or (347) 860-2399. Mariners are advised to exercise caution when transiting the area.

MD - ABERDEEN PROVING GROUND PROHIBITION OF MARINE GATHERINGS DUE TO COVID – 19

Due to COVID-19, in order to protect the health and safety of our local community, marine gatherings are not authorized within the restricted waters of the Aberdeen Proving Ground military reservation, as described in 33 CFR 334.140, until further notice. Marine gatherings include, but are not limited to, the practice commonly known as a "raft-up," or the roping together of any number of small vessels, and gatherings of 8 or more people on one vessel. Boaters must maintain a minimum distance of 25 feet between vessels at all times.

******VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION******

The second phase of the Hampton Roads Connector Partners construction will begin on the west side and parallel with the Hampton Roads Bridge Tunnels, and will start at the north side at the Hampton Roads land side extending to the south side at the Willoughby land side. There will be at any given time several crane and barges along with several material barges as well as the tugs Uncle Mike, Robert T, Angelina Autumn, Miss Morgan and the Seaward 8, Seaward 9 and the Seaward 12. The following crew boats will be on site Seaward 10 Seaward 5 and the Brittany Lynn along with several outboard motor type safety vessels. All of the job site vessels will be standing by on VHF channels 13 & 16. This notice to mariners will

******VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION******

be updated from time to time as per the scope of the project increases. All barges will be lighted at night by solid white lights on their four corners. All floating mooring buoys shall be lighted with flashing white lights. All mooring piles will be lighted at night with solid white lights on each pile. All mariners when in the vicinity of the job site and approaching or leaving the area of operations, should remain a safe distance away from any and all buoys and or mooring piles. For more information or questions contact Shannon Gresham 757-685-3392, Kareem Myers 757-256-9715, Nathan Seburu 757-449-4652.

******VA – HAMPTON ROADS – NORFOLK NAVAL STATION – DREDGING******

The Dredge ESSEX and attendant plant and equipment will commence mobilization operations in Hampton Roads on or about October 22, 2020. Pipeline laying operations will commence first between the Craney Island Disposal Area and Norfolk Naval Station in the vicinity of Norfolk Harbor Reach and the Craney Island Flats. A submerged pipeline will be placed from the northeast corner of Craney Island to the western edge of the Norfolk Harbor Channel in the vicinity of Elizabeth River Channel Lighted Buoy 8 (LLNR 9500). The ESSEX will then commence dredging a trench across Norfolk Harbor Channel, on or about October 27, 2020. The trench dredging should take approximately 2 days. Once completed, a submerged pipeline will be placed in the trench and terminate at the head of Norfolk Naval Station Pier 9. The ESSEX will then perform dredging within the Norfolk Naval Station. The project is expected to continue until approximately January 20, 2021. The Dredge Operator will standby on channels 13 and 16 VHF-FM. Traffic should call 30 minutes prior to expected time of passage. For any emergencies, the dredge operator can be reached at 757-353-0455.

******VA - HAMPTON ROADS - LAFAYETTE RIVER – US 460 – GRANBY STREET BRIDGE******

An engineering firm, on behalf of City of Norfolk, will be performing maintenance on the US 460 (Granby Street) Bridge across the Lafayette River, mile 3.3, at Norfolk, VA. The maintenance which began in September 2020, will continue to be conducted from 7 a.m. to 5:30 p.m.; 7 days a week; through October 8, 2022. A 20 foot safety vessel and work a platform will be in and around the vicinity of the bridge. The work platform will be located underneath the bridge, positioned adjacent to the bridge pier behind the bridge fender system as to not impede the navigational channel. Maintenance vessels will relocate from the navigable channel, upon request. The work vessel may be reached on VHF-FM channel 13 and 16. The project foreman can be reached at (757) 920-6454 or (804) 229-1669. Mariners should use caution navigating through the area.

Chart 12245

******VA – ELIZABETH RIVER – SOUTHERN BRANCH – BELT LINE RAILROAD LIFT BRIDGE – CLOSED TO NAVIGATION******

Bridge maintenance work will be performed on the Belt Line Railroad Bridge, at mile 2.6 over the Southern Branch of the Elizabeth River. The bridge will be maintained in the closed-to-navigation position Thursday, November 5th, 2020 at 8 a.m. through 4 p.m. The bridge will open on signal for scheduled openings at 10:30 a.m. and at 1:30 p.m. Alternate date is Tuesday, November 10th, same times. Maintenance will be performed during the closure period and a broadcast notice to mariners will be issued when the bridge is returned to normal operating schedule. The drawbridge's vertical clearance is 6 ft. in the closed position, vessels able to pass through the bridge in the closed position may do so at any time. This closure will affect vessels heading to and from the Albemarle & Chesapeake Canal / Atlantic Intracoastal Waterway. The bridge will be able to open for emergencies if at least 30 minutes notice is given. The Project foreman may be reached at (757) 633-2241 and on VHF-FM channel 13. There is no immediate alternate route for vessels unable to pass through the bridge in the closed position. Should you have any questions or concerns, please contact United States Coast Guard Sector Virginia Waterways Management Division duty officer at (757) 374-3408 or VirginiaWaterways@uscg.mil.

VA – CHESAPEAKE BAY – YORK RIVER – SURVEY OPERATIONS

Continuing through November 2020 the M/V ATLANTIC SURVEYOR and R/V OYSTER BAY II will be conducting hydrographic survey operations in the waters of Southern and Central Chesapeake Bay, VA. Survey operations will be conducted in the waters of Mobjack Bay, VA and eastward of Horn Harbor, VA bounded from approximately 37° 27' 29"N / 076° 09' 08"W to the northeast and 37° 15' 07"N / 076° 28' 16"W to the southwest. Additionally hydrographic survey operations will be conducted in the waters of Central Chesapeake Bay bounded from approximately 38° 41' 24"N / 076° 02' 57"W to the northeast and 38° 25' 57"N / 076° 32' 01"W to the southwest. Survey operations include the Choptank River eastward to the Choptank River Bridge. The M/V ATLANTIC SURVEYOR is a 110', steel hulled survey boat with a black hull and a white deckhouse. The vessel will be towing a side scan sonar approximately 5-15 meters off of the seafloor and 50 meters astern of the vessel. The vessel will be conducting 24-hour operations. The ATLANTIC SURVEYOR may be contacted on VHF-FM channels 13 and 16 (call sign WTR5417). The R/V OYSTER BAY II is a 30', Aluminum hulled survey vessel. The vessel is equipped with over the side sonars. The vessel will primarily be conducting operations between 6:00 am and 8:00 pm. The R/V OYSTER BAY II may be contacted on VHF-FM channels 13 and 16. There may be occasional unmanned aerial aircraft (Drone) activities conducting photogrammetry within the survey area. Request all vessels give the M/V ATLANTIC SURVEYOR and R/V OYSTER BAY a wide berth. Please direct any questions you may have to the Project Supervisor at 401-848-4757.

VA – OFFSHORE – CAPE HENRY – COASTAL VIRGINIA OFFSHORE WIND – SURVEYS

Survey vessels SARAH BORDELON, MARCELLE BORDELON and KOMMANDOR IONA will be conducting survey operations until 15 November 2020. The NORTHSTAR CHALLENGER will begin work approximately 19 September and work until 30 October. The survey area is bounded by the following positions.

36.9947490 N, 75.4854888 W

36.9955457 N, 75.2157756 W

36.8216755 N, 75.4843933 W

36.8224672 N, 75.2152887 W

See Enclosure 11 for more detail.

The CVOW Commercial Project is being developed by Virginia Electric and Power Company, Dominion Energy Virginia. High resolution geophysical data will be collected across the lease area in support of the project. The survey vessel will be mapping the seabed with hull mounted sensors as well as towed sensors. The vessel will be working with restricted/limited manoeuvrability with equipment in tow up to 1000 feet to the stern of the vessel. The master requests a CPA of 0.5 – 1.0 mile to accommodate operations. For more information or questions, contact Mark MacLean at 902-412-1780.

******NC – OREGON INLET – BONNER BRIDGE – NAVIGATION SPAN – CONSTRUCTION******

Demolition crews are continuing working near Bonner Bridge in Oregon Inlet, NC. Workers and equipment will be present in, around bent 37, and between bents 24-25 of the Bonner Bridge demolition project. Oregon Inlet has significant shoaling in between Oregon Inlet Lighted Buoy 6 (LLNR 28003) and Oregon Inlet Buoy 7 (LLNR 28005). Mariners should follow the aids to navigation closely and stay clear of demolition Work areas.

Mariners are requested to transit at no wake speeds and use extreme caution in this area during work hours. Crane barges will be secured in place with four anchors connected by anchor wires to the corners of the barge. The anchor locations will be marked with yellow crown buoys within an approximate 500-ft radius of the crane barge. Mariners should be aware that anchor wires may be at or just above/below the water surface between the barges and crown buoys; therefore vessels should stay on the outboard side of the crown buoys. The NCDOT Resident Engineer may be contacted at (252) 473-3637 and PCL Civil Constructors may be contacted at (252) 423-3093. Project information may be found at <http://www.ncdot.gov/projects/bonnerbridge/replace/>.

******NC – OREGON INLET – BONNER BRIDGE – SAFETY ZONE******

33CFR165.T05-1065 Safety Zone; Oregon Inlet, Dare County, NC.

(a) Location. The following area is a safety zone: all navigable waters of Oregon Inlet, within 100 yards of active demolition work and demolition equipment, along the old Herbert C. Bonner Bridge, which follows a line beginning at approximate position 35°46'47- N, 75°32'41- W, then southeast to 35°46'37- N, 75°32'33- W, then southeast to 35°46'09-N, 75°31'59- W, then southeast to 35°46'03- N, 75°31'51- W, then southeast to 35°46'01- N, 75°31'40- W (NAD 1983) in Dare County, NC.

(b) Definitions. As used in this section- Designated representative means a Coast Guard Patrol Commander, including a Coast Guard commissioned, warrant, or petty officer designated by the Captain of the Port North Carolina (COTP) for the enforcement of the safety zone. Captain of the Port means the Commander, Sector North Carolina. Demolition crews means persons and vessels involved in support of demolition.

(c) Regulations. (1) The general regulations governing safety zones in §165.23 apply to the area described in paragraph (a) of this section.

(2) With the exception of demolition crews, entry into or remaining in this safety zone is prohibited.

(3) All vessels within this safety zone when this section becomes effective must depart the zone immediately.

(4) The Captain of the Port, North Carolina can be reached through the Coast Guard Sector North Carolina Command Duty Officer, Wilmington, North Carolina at telephone number 910-343-3882.

(5) The Coast Guard and designated security vessels enforcing the safety zone can be contacted on VHF-FM marine band radio channel 13 (165.65 MHz) and channel 16 (156.8 MHz).

(d) Enforcement. The U.S. Coast Guard may be assisted in the patrol and enforcement of the safety zone by Federal, State, and local agencies.

(e) Enforcement period. This regulation will be enforced from March 4, 2019, through March 30, 2020.

(f) Public notification. The Coast Guard will notify the public of the active enforcement times at least 48 hours in advance by transmitting Broadcast Notice to Mariners via VHF-FM marine channel 16.

******NC - INTRACOASTAL WATERWAY - NEUSE RIVER TO MYRTLE GROVE SOUND - DREDGING******

Continuing until approximately 15 November 2020 Weeks Marine Inc. will install a dredging pipeline and will be mobilizing equipment to the staging area located in the Banks Channel, NC.

Staging Area will be bound by the following approximate positions:

34°21'11.90"N, 77°39'14.81"W

34°21'9.57"N, 77°39'11.40"W

34°21'22.68"N, 77°38'54.75"W

34°21'25.17"N, 77°38'56.94"W

Starting approximately 15 November 2020 and continuing until approximately 10 February 2021, Weeks Marine hydraulic dredge BORINQUEN will be operating in the Topsail Creek, Cut Through and Banks Channel near Topsail Beach, NC.

Work limits for borrow area at "Topsail Creek/ Cut Through" will be bound by the following approximate positions:

34°21'12.91"N, 77°41'5.75"W

34°21'46.85"N, 77°40'9.63"W

34°20'6.02"N, 77°38'54.23"W

34°19'36.46"N, 77°39'41.87"W

Work limits for borrow area at "Banks Channel" will be bound by the following approximate positions:

34°20'59.32"N, 77°39'44.49"W

34°20'37.83"N, 77°39'25.11"W

34°23'7.26"N, 77°36'17.18"W

34°23'16.50"N, 77°36'27.01"W

Work limits for placement area will be bound by the following approximate positions:

34°20'39.81"N, 77°38'45.39"W

34°20'53.02"N, 77°39'1.49"W

34°23'25.93"N, 77°35'21.57"W

34°23'37.47"N, 77°35'34.35"W

Once underway, dredging operations will continue on a twenty-four hour per day, seven days per week basis. The dredge will monitor VHF-FM channels 13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. NC - CAPE FEAR RIVER - DREDGING

Southern Dredging Company dredge BRUNSWICK will be working in the Cape Fear River Channel between the Cape Fear Memorial Bridge and the Upper and Lower Brunswick Ranges in the vicinity of Cape Fear River Channel Lighted Buoy 58 (LLNR 30840) commencing on or about 14 October 2020. The Dredge will operate on a 24 hour per day, 7 day per week basis until approximately 31 January 2021. Dredged material will be transported by pipeline to the Eagle Island disposal site on the West side of the river. To ensure safe passage in the vicinity of the operation, boaters should establish contact with the dredge on VHF-FM channels 13 and 16. For more information or questions, contact Neil Rodgers at 843-729-1269 or Michael Kitchell at 843-830-1015.

******NC – WILIMINGTON – GPS TESTING******

The GPS Navigation Signal may be unreliable due to testing on GPS frequencies used by shipboard navigation and handheld systems. Systems that rely on GPS, such as e-911, AIS and DSC, may be affected at an approximate Testing Center Point of 34°38'54.7"n 78°17'54.0"w, with a possible impact radius of 69 nm at 50 feet above ground level from center point. GPS testing is scheduled to be conducted on 11 Oct - 16 Nov. More information is available at the Coast Guard Navigation Center web site www.navcen.uscg.gov. During this period GPS users are encouraged to report any GPS service outages that they may experience to the navigation information service (NIS) by calling (703) 313-5900 or by using the NAVCEN web site to submit a GPS problem report. For additional information, you may contact the Navigation Information Service (NIS) watch stander at (703) 313-5900.

SUMMARY OF SHOALING REPORTED IN THE FIFTH COAST GUARD DISTRICT

NEW OR UPDATED INFORMATION

New, updated or very important information in this enclosure will be highlighted in yellow.

NEW JERSEY SHOALING

NJ – INTRACOASTAL WATERWAY – LITTLE EGG HARBOR TO CAPE MAY INLET – SHOALING

Shoaling has been located in the vicinity of New Jersey Intracoastal Waterway Light 262 (LLNR 36005). Shoaling has encroached into the channel, depths are currently 5 - 6ft at MLW.

Chart 12316

NJ – INTRACOASTAL WATERWAY – LITTLE EGG HARBOR TO CAPE MAY INLET – SHOALING

The shoal adjacent to New Jersey Intracoastal Waterway Light 132 (LLNR 35550) and New Jersey Intracoastal Waterway Daybeacon 130A (LLNR 35537) has encroached approximately 25-50yds into the channel. Depths of 2-3' at MLW. Shoaling to 3' MLW has been observed on the side of the channel between New Jersey Intracoastal Waterway Light 132 (LLNR 35550) and New Jersey Intracoastal Waterway Daybeacon 130A (LLNR 35537). SEC DB BNM 124-20

Chart 12316

NJ – INTRACOASTAL WATERWAY – MANASQUAN INLET TO CAPE MAY INLET - SHOALING

Shoaling has been reported in the New Jersey Intracoastal Waterway (NJICWW) between Manasquan Inlet and Cape May Inlet. Mariners are advised to use extreme caution when transiting the NJICWW due to shoaling. The following are some of the locations where the shoaling has been reported.

NJICWW Light 4 (LLNR 34995).

NJICWW Light 38 (LLNR 35115).

NJICWW Daybeacon 45 (LLNR 35165) & Daybeacon 46 (LLNR 35167).

NJICWW Daybeacon 49 (LLNR 35108).

NJICWW Junction Light LB (LLNR 35420) to Light 109 (LLNR 35430).

North side of Tow Island at NJICWW Daybeacon 129 (LLNR 35530).

NJICWW Light 145 (LLNR 35590) to Light 163 (LLNR 35655) Black Point on the red side.

Between NJICWW Daybeacon 206 (LLNR 35825) and Daybeacon 209 (LLNR 35835) IVO Bader Field.

IVO NJICWW Daybeacon 221 (LLNR 35867).

Between NJICWW Light 233 (LLNR 35905) and Daybeacon 243 (LLNR 3535945) Broad Thorofare.

IVO NJICWW Buoy 263 (LLNR 36007) and Buoy 263A (LLNR 36009) Shooting Island on the green side.

Between NJICWW Daybeacon 272 (LLNR 36035) and Daybeacon 282 (LLNR 36070) in Peck Bay.

Between NJICWW Light 383 (LLNR 36420) Daybeacon 399 (LLNR 36470).

Between NJICWW Buoy 417 (LLNR 36517) and Buoy 424 (LLNR 36535) Great Channel.

Between NJICWW Light 449 (LLNR 36625) and Light 453 (LLNR 36639) Grassy Sound. Ref LNM 24/17

Chart 12316, 12324

NJ – SALEM RIVER – SHOALING

Shoaling was reported in the Salem River, in Salem, NJ. The shoaling was reported between Salem River Entrance Channel Light 5 (LLNR 2670), Light 6 (LLNR 2675) and Light 7 (LLNR 2680), Light 8 (LLNR 2685) on the east side of the channel. The depth was reported at 10 feet shortly after high tide.

Chart 12311

PENNSYLVANIA SHOALING

PA – DE – NJ – DELAWARE RIVER – MARCUS HOOK RANGE – SHOALING

Shoaling has occurred in the Delaware River in approximate position 39-48.18791, 075-25.354427w, 50 feet off the green channel toe, in the vicinity of Marcus Hook Intake Light (LLNR 3170). Shallowest depth 38.5 feet. All mariners are requested to transit the area with caution. Ref LNM 09/18

Chart 12312

PA – NJ – CHESTER RANGE – SHOALING

The Coast Guard has received a report of shoaling 40ft within the PA side of the channel in approx position 39-49'33.80"N, 075-22'39.81"W. The rock mound has been reported to have a minimum depth of 39.1ft. Mariners are urged to use caution when transiting the area.

Chart 12312

DELAWARE SHOALING

DE – MURDERKILL RIVER – SHOALING

Shoaling has been reported in the Murderkill River between Murderkill River Buoy 2 (LLNR 2315) and Murderkill River Buoy 6 (LLNR 2337). Channel depths have been noted to be less than 2 feet in locations and an average depth of 4 feet. DB BNM 342-19

Chart 12304

DE- INDIAN RIVER BAY – SHOALING

There has been a report of shoaling in Indian River Bay between Indian River Inlet Buoy 19 (LLNR 4435) and Middle Island West Channel Junction Lighted Buoy MI (LLNR 4436). Depths of 0.0 ft at times, during low tide, were reported.

Chart 12216

DE – DELAWARE BAY – REHOBOTH BAY – SHOALING

Shoaling has been reported near Rehoboth Bay Channel Light 2 (LLNR 2097). Depths as low as 3 feet reported. DB BNM 051-20

Chart 12304

DE – REHOBOTH BAY – INDIAN RIVER – BACKERS CHANNEL – SHOALING

Delaware Department of Natural Resources and Environmental Control (DNREC) reports shoaling in Baker's Channel between Baker's Channel Lighted Buoy 1A (LLNR 2136) and Baker's Channel Lighted Buoy 1B (LLNR 2137) as well as Baker's Channel Lighted Buoy 5 (LLNR 2137.04) and Baker's Channel Lighted Buoy 6 (LLNR 2137.05). DNREC has established two warning buoys worded "DANGER SHOAL" to mark the shoaling. Ref LNM 26/17 Chart 12216

DE – INDIAN RIVER BAY – MIDDLE ISLAND WEST – SHOALING

Shoaling was observed in the Middle Island West Channel to 2 – 4 feet at MLW. Seasonal Aid to Navigation Middle Island West Channel Buoy MI (LLNR 4436), Middle Island West Channel Buoy 1 (LLNR 4437), Middle Island West Channel Buoy 3 (LLNR 4438) and Middle Island West Channel Buoy (LLNR 4439.5) were unable to be established. SEC DB 054-20 Chart 12216

DELETE AFTER 19/20

DE – INDIAN RIVER BAY – PEPPER CREEK – SHOALING

Shoaling was observed in Pepper Creek throughout the entire waterway to 2 – 4 feet at MLW. Seasonal Aid to Navigation Pepper Creek Buoy 1 (LLNR 4440), Pepper Creek Buoy Lighted Wreck Buoy WR2 (LLNR 4445), Pepper Creek Buoy 4 (LLNR 4450), Pepper Creek Buoy 5 (LLNR 4455) and Pepper Creek Lighted Wreck Buoy WR 10 (LLNR 4470) were unable to be established. SEC DB BNM 056-20 Chart 12216

DELETE AFTER 19/20

DE – INDIAN RIVER BAY – WHITE CREEK – SHOALING

Shoaling was observed in White Creek to 2 – 5 feet at MLW. Seasonal Aids to Navigation White Creek Buoy 1 (LLNR 4645), White Creek Buoy 3 (LLNR 4650), White Creek Buoy 5 (LLNR 4655) and White Creek Buoy 6 (LLNR 4660) were unable to be established. SEC DB 055-20 Chart 12216

DELETE AFTER 19/20

MARYLAND SHOALING

MD - FENWICK ISLAND TO CHINCOTEAGUE INLET - OCEAN CITY INLET – SHOALING

A USACE survey dated Oct 8, 2019 has identified shoaling at Ocean City Inlet Lighted Buoy 8 (LLNR 4745) to a depth of less than six feet centerline of the channel at MLLW and extending approximately 150 feet northwest down channel towards Ocean City Inlet Lighted Buoy 10 (LLNR 4750) with deeper water to the left and right of centerline. A second area of shoaling was identified extending west of Ocean City Inlet Junction Lighted Buoy OC (LLNR 4753) to a depth of eight to nine feet at MLLW and extending west approximately 150 feet. Shoaling was identified west of Ocean City Inlet Lighted Buoy 11 (LLNR 4755) extending from the southern channel boundary to mid-channel for approximately 500 feet towards the commercial fish harbor with depths less than four feet at MLLW. Shoaling within the channel to the commercial fish harbor extends mostly from the northern channel boundary to mid-channel with depths of eight feet or less at MLLW. Chart 12211

MD FENWICK ISLAND TO CHINCOTEAGUE INLET - SINEPUXENT BAY SHOALING

There has been a report of shoaling in Sinepuxent Bay within the channel boundaries between Sinepuxent Bay Channel Buoy 6 (LLNR 5015) and Sinepuxent Bay Channel Buoy 7 (LLNR 5017), to a depth of 4.5 feet at mean low water. Shoaling has also been reported between Sinepuxent Bay Channel Buoy 33 (LLNR 5130) and Sinepuxent Bay Channel Daybeacon 35 (LLNR 5135) in the channel, to a depth of 3.0 feet at mean low water. Chart 12211

MD-CHESAPEAKE BAY-NANTICOKE SHOALING

Shoaling has been reported in the immediate vicinity of Nanticoke River Cut Light 4 (LLNR 23995) at the mouth of Nanticoke Harbor, extending approximately 30 ft into the channel. Water depths have been found as low as 2 ft at low water. MD-NCR BNM 147-20 Chart 12261

MD - CHESAPEAKE BAY - HONGA RIVER – SHOALING

There is shoaling in the Honga River extending out at 500yds radius from approximate position 38 - 18.38N 076 - 11.78W. Actual depth ranges from 5ft to 9ft at mean low water. SEC MD-NCR BNM 335-19 Chart 12261

MD - CHESAPEAKE BAY - COVE POINT TO SANDY POINT – FLAG HARBOR – SHOALING

Shoaling has been reported in the Entrance Channel to Flag Harbor Yacht Haven in Calvert County, MD. The shoaling is located just outside Flag Harbor Light 1 (LLNR 7671) and Flag Harbor Entrance Light 2 (LLNR 7672). Depth of water is less than 5 Ft at MHW. BNM MD 376-19 Chart 12263

MD – POTOMAC RIVER – ST. GEORGE CREEK – SHOALING

The Army Corps of Engineers, Baltimore District, Survey of St. George Creek Channel dated April 2018, indicates shoaling across the entire channel. The shoaling is from 850 feet up the channel of St. George Creek West Channel Warning Light A (LL 16760) to 500 feet up the channel of St. George Creek West Channel Warning Daybeacon B (LL 16765), with a least depth of 3.1 feet MLLW. Chart 12233

MD - POTOMAC RIVER – ST. PATRICK CREEK – SHOALING

There has been a report of severe shoaling within the channel boundaries of St. Patrick Creek. Shoaling has been reported in the vicinity of St. Patrick Creek Channel Daybeacon 3 (LLNR 17120) extending to St. Patrick Creek Channel Daybeacon 5 (LLNR 17135) with depths of 2-4' at MLW. Shoaling to 1' MLW has been observed in the channel in the vicinity of St. Patrick Creek Channel Buoy 3A (LLNR 17125). Chart 12286

MD – MOBJACK BAY AND YORK RIVER ENTRANCE – BACK RIVER

A recent NOAA survey identified shoaling to a depth of 8 feet at MLW in Back River between Back River Channel Daybeacon 6 (LLNR 12930) and Back River Channel Light 5 (LLNR 12925). The survey also identified shoaling around Back River Channel Light 4 (LLNR 12920) to a depth of 10 ft at MLW. Chart 12222

MD - CHESAPEAKE BAY - CHESAPEAKE BAY TO PINEY POINT - ST. JEROME CREEK - SHOALING

Maryland DNR survey of the mouth of St. Jerome Creek indicates shoaling, to at least depth of 3.1feet MLLW, in the channel between St. Jerome Creek Light 4 (LLNR 18810), St. Jerome Creek Daybeacon 4A (LLNR 18812) and St. Jerome Creek Daybeacon 6 (LLNR 18815). The channel width in the area of St. Jerome Daybeacon 4A (LLNR 18812) and Deep Point is reduced to approx 20 ft. MD-NCR BNM 415-16, Ref LNM 52/16 Chart 12233

MD/VA - POTOMAC RIVER - PINEY POINT TO LOWER CEDAR POINT - ST. CATHERINE SOUND LOWER ENTRANCE - SHOALING

Shoaling exists in St. Catherine Sound Lower Entrance (1) off the northeastern tip of St. Catherine Island extending channel ward between 38-14-17.586N, 076-47-15.562W and 38-14-32.841N, 076-47-14.761W, (2) IVO St. Catherine Sound Lower Entrance 4L (LLNR 17230). Ref LNM 44/16, Chart 12286

MD - CHESAPEAKE BAY - POCOMOKE AND TANGIER SOUNDS - POCOMOKE RIVER – SHOALING

Shoaling has been reported in the Pocomoke River between Pocomoke River Channel Buoy 7 (LLNR 22540) and Pocomoke River Channel Buoy 8 (LLNR 22555). MD-NCR BNM 006-20 Chart 12228

MD - LITTLE CHOPTANK RIVER - SLAUGHTER CREEK – SHOALING

Shoaling in the western portion of Slaughter Creek IVO of Holland Point has encroached easterly in most of the channel. The shoal adjacent to Slaughter Creek Light 2SC (LLNR 24645) has encroached approx 50-100 yds easterly with observed depths of 3-4' in between tide cycles. Shoaling to 5' MLW has been observed on the red side of the channel between Slaughter Creek Buoy 6 (LLNR 24670) and Slaughter Creek Buoy 8 (LLNR 24683). Sec MD-NCR BNM 045-17, Chart 12264, 12266

MD - CHESAPEAKE BAY - HONGA, NANTICOKE AND WICOMICO RIVERS – FISHING BAY - TAR BAY

A USACE survey conducted in Apr 2016 has identified shoaling to a depth of less than one foot at mean low water between Tar Bay Channel Warning Daybeacon E (LLNR 24595) and Tar Bay Channel Warning Daybeacon K (LLNR 24615). The channel width has been significantly reduced. Observed depths are between 2-4' at high tide. Sec MD-NCR BNM 044-17 Chart 12261

MD – FISHING BAY – FARM CREEK – SHOALING

From entrance of channel to Farm Creek Channel Daybeacon 2 (LLNR 24430) least depth of 5 feet within the channel limits. From Farm Creek Channel Daybeacon 2 (LLNR 24430) to Farm Creek Channel Daybeacon 7 (LLNR 24445) least depth of 2.0 feet on red side of channel, 3.9 Ft centerline of channel, and 2.8 feet on the green side of channel. Ref LNM 16/18.

VA – MD – POTOMAC RIVER – BONUM CREEK – SHOALING

U. S. Army Corps of Engineers Survey of Bonum Creek indicates shoaling, to less than 4 feet MLLW, in the channel. Chart 12286

VIRGINIA SHOALING

VA – CHINCOTEAGUE CHANNEL – SHOALING

Shoaling has been found in vicinity of Chincoteague Channel Lighted Buoy 28 (LLNR 5397). Depth observed at: 4 feet on the red side, 4.5 feet in the middle of the channel, and 5.5 feet on the green side at low tide. VA BNM 033-20 Chart 12210, 12211

VA – CHINCOTEAGUE INLET TO GREAT MACHIPONGO INLET – VIRGINIA INSIDE PASSAGE – BRADFORD BAY – SHOALING

Shoaling has been identified 480' past Wachapreague Channel Junction LT WB (LLNR 6695) and continues to 850' past Bradford Channel Buoy 5A (LLNR 6035). Least depth range from 5.9' TO 2.9' MLLW. Shoaling has been identified in vicinity of Wachapreague Day Beacon 10 (LLNR 5995). Least depth range 4.0' MLLW. Shoaling has been identified 130' past Wachapreague Channel Daybeacon 13 (LLNR 6690) to Wachapreague Channel Junction Light WB (LLNR 6695). Least depth 4.0' MLLW. LNM 2619, Chart 12210

VA – CHINCOTEAGUE INLET TO GREAT MACHIPONGO INLET – QUINBY CHANNEL – SHOALING

Norfolk District Army Corp of Engineers Survey of Quinby Creek; dated 11 Feb 2020, indicated significant shoaling with least depth of 6.0'MLLW at Quinby Channel Buoy 13 (LLNR 6775) to 1.2'MLLW at Quinby Channel Light 19 (LLNR 6785). VA BNM 040-20 Chart 12210

Shoaling has been reported at the entrance to Nandua Creek to 2 feet. HR BNM 311-13 Chart 12226

VA – CHINCOTEAGUE INLET TO GREAT MACHIPONGO INLET – VIRGINIA INSIDE PASSAGE - WALLOPS ISLAND – SHOALING

There has been a report of shoaling in the vicinity of Wallops Island Lighted Buoy 2 (LLNR 5520) to a depth of one foot. Chart 12210

VA – VIRGINIA INSIDE PASSAGE (VIP)

VIP Day beacon 184 (LLNR 6220) to VIP Day beacon 265 (LLNR 6580), Shoaling to less than 6ft MLW. HR BNM 106-16 Quinby Creek Day beacon 7 (LLNR 6770) to Quinby Creek Light 13 (LLNR 6785), Shoaling to less than 6 ft MLW. HR BNM 104-16 VIP Day beacon 244 (LLNR 6485), Shoaling to 1 foot. HR BNM 272-14, Sand Shoal Channel Light 1 (LLNR 6990) to Sand Shoal Light 10 (LLNR 6996) LNM 24-13, Oyster Creek Channel Junction Lighted Buoy OC (LLNR 7002/6447) to Oyster Creek Light 10 (LLNR 7025), Shoaling to less than 6ft MLW. HR BNM 107-16, Chart 12210, 12224

VA – LYNNHAVEN INLET – LONG CREEK – SHOALING

ACOE Survey indicates shoaling in Lynnhaven Basin and connected tributaries, south of the Lesner Bridge. Depths of 3.1 - 5.2 feet extend into channel from Pleasure House Creek eastbound to Long Creek Light 6 (LLNR 10170), in Crab Creek, Lynnhaven Inlet and Long Creek. Depths of 1.4 - 5.0 feet observed in Long Creek side channel in the vicinity of Fish House Island. Navigation of the area requires extreme caution. SEC VA BNM 114-20 Chart 12254

VA - GREAT BRIDGE TO ALBEMARLE SOUND - INTRACOASTAL WATERWAY – SHOALING

There has been a report of shoaling in the VA Intracoastal Waterway approximately 1.15 nm south of North Landing Bridge IVO positions 36-42.71n, 076-04.87w, and 36-42.75n, 076-05.00w, to a least depth of 0.5 feet. Chart 12206

VA – CHESAPEAKE BAY – RAPPAHANNOCK RIVER ENTRANCE - MILFORD HAVEN EAST

Shoaling to a depth of 2 Feet at low tide has been identified from 400 yards northeast of Milford Haven East Buoy 7 (LLNR 14593.5) extending to the south 600 yards. Shoaling extends to the west 250 yard and impedes the width of the channel both inbound and out bound. Shoaling to a depth of 3 feet has been identified in various locations west of Buoy 7 (LLNR 14593.5) To Buoy 18 (LLNR 14625). Chart 12235

VA – RAPPAHANNOCK RIVER ENTRANCE – QUEENS CREEK – SHOALING

The ACOE Survey of Queens Creek Channel; dated June 21, 2017 indicates shoaling across the channel from Queens Creek Channel Buoy 2 (LLNR 14820) to Queens Creek Channel Lighted Buoy 5(LLNR 14840) Least depths range from 5.8 feet MLLW to 1.8 feet MLLW. LNM 29/17 Chart 12235

VA – CHESAPEAKE BAY - MATTAWOMAN CREEK – SHOALING

Shoaling has been Reported to a depth of 2-3ft at mean low water in the channel of Mattawoman Creek between Mattawoman Creek Light 1MC (LLNR 21580) and Mattawoman Creek Light 2 (LLNR 21585). Mariners are advised to transit the area with caution. Chart 12226

VA – HAMPTON ROADS - WILLOUGHBY BAY

The USACE has reported shoaling in Willoughby Channel to 2.6 feet MLLW in the vicinity of Willoughby Channel Buoy 3 (LLNR 10583). Chart 12245

VA – PAGEN RIVER – SHOALING

Significant shoaling has been identified in the Pagen River Channel between Pagan River Channel Daybeacons 15 (LLNR 11435) and Daybeacon 17 (LLNR 11445). Least depth of 3.3 FT. HR BNM 218-19 Chart 12248

VA – CHESAPEAKE BAY – MOBJACK BAY AND YORK RIVER ENTRENCE – DAVIS CREEK – SHOALING

Significant shoaling has been identified from USACOE survey dated 07 Sep 2016 in Davis Creek. Shoaling begins 100 yards south of Davis Creek Warning Daybeacon B (LLNR 14130) to a depth of 4.9 feet extending across the entire length and width of the channel to 150 yards north of Davis Creek Warning Daybeacon D (LLNR 14140) with a minimum identified depth of 1.2 feet. Ref LNM 12/17 Chart 12238

VA – CHESAPEAKE BAY – MOBJACK BAY AND YORK RIVER ENTRANCE - HORN HARBOR

Shoaling has been reported to 1-2 feet extending 50 yards channel ward from Horn Harbor Lighted Buoy 8 (LLNR 14487). HR BNM 182-15 Chart 12238

VA – CHESAPEAKE BAY – BACK RIVER – SHOALING

A NOAA Survey identified shoaling to a depth of 6 feet MLW in Back River in approximate position 37-06'33.0"N, 076-16'40.8"W, approximately 75 yards west of Back River Daybeacon 6 (LLNR 12930). Mariners are advised to transit the area with caution. HR BNM 044-17, LNM 07/17 Chart 12222

VA – CHESAPEAKE BAY – YORKTOWN TO WEST POINT - QUEEN CREEK

Shoaling to less the 3 feet has been reported in Queen Creek from Queen Creek Entrance Light 2QC (LLNR 13785) to Queen Creek Day beacon 10 (LLNR 13820). HR BNM 170-14 Chart 12243

VA – GREAT WICOMICO RIVER – SHOALING

Shoaling has been identified in the vicinity of Great Wicomico River Light 9 (LLNR 16300) extending 30 yards north and north northeast of structure to a depth of less than 2 feet.

VA – RAPPAHANNOCK RIVER – SHOALING

Rappahannock River mile 60 to 63, Devils Elbow. Shoaling has been reported to a depth of less than 04 ft at mean low water along the eastern side of the channel from Horse Head Point to south of Tobys Point extending along the eastern side of Tobys Point to North Bend. HR BNM 051-17, LNM 08/17 Chart 12237

VA - RAPPAHANNOCK RIVER - CORROTOMAN RIVER TO FREDERICKSBURG – GREENVALE CREEK SHOALING

An ACOE Survey of Greenvale Creek Channel indicates shoaling, to a least depth of 1.7 feet MLLW, across the channel from approximately 250 feet North-Northeast of Greenvale Channel Warning Daybeacon A (LLNR 15305) continuing inbound for approximately 880 feet. Ref LNM 50/16 Charts 12237

VA – EASTERN SHORE - CHESAPEAKE BAY – MATTAWOMAN CREEK – SHOALING

Shoaling has been located in Mattawoman Creek VA. Lowest depth found 3' at high tide from Mattawoman Creek Light 1MC (LLNR 21580) to west of Mattawoman Creek Light 3 (LLNR 21590). VA BNM 006-20 Chart 12225

VA – CHESAPEAKE BAY – TANGIER SOUND - TANGIER ISLAND EAST CHANNEL – SHOALING

There has been a report of shoaling in the Tangier Island East Channel within the channel boundaries between Tangier Island East Daybeacon 6 (LLNR 22765) and Tangier Island East Channel Light 7 (LLNR 22770) to a depth of three feet.
Chart 12228

VA - CHESAPEAKE BAY - POCOMOKE SOUND - DEEP CREEK – SHOALING

U.S. Army Corps Survey on 19 Sep 19 indicated a least depth of 1.2' MLW within the channel limits. From Deep Creek Channel Daybeacon 12 (LLNR 22225) to Deep Creek Channel Daybeacon 14 (LLNR 22230) least depth of 6.3' in center of channel, 5.8' on green side of channel, and 4.5' on red side of channel. From Deep Creek Channel Daybeacon 14 to Deep Creek Channel Light 15 (LLNR 22235) least depth of 5.0' in center of channel, 3.0' on green side of channel, 3.8' on red side of Channel. From Deep Creek Channel Light 15 to Deep Creek Channel Daybeacon 16 (LLNR 22240) least depth of 4.4' in center of channel, 3.2' on green side of channel, and 4.1' on red side of channel. From Deep Creek Channel Daybeacon 16 to Deep Creek Channel Daybeacon 17 (LLNR 22245) least depth of 3.6' in center of Channel, 0.2' on green side of channel, and 2.6' on red side of channel.
Chart 12207

VA - MD - POTOMAC RIVER - PINEY POINT TO LOWER CEDAR POINT - ST. CATHERINE SOUND LOWER ENTRANCE - SHOALING

Shoaling exists in St. Catherine Sound Lower Entrance at the following locations: (1) off the northeastern tip of St. Catherine Island extending channel ward between position 38-14-17.586N, 076-47-15.562W and position 38-14-32.841N, 076-47-14.761W, and (2) in the vicinity of St. Catherine Sound Lower Entrance 4L (LLNR 17230). Ref LNM 44/16, CCGD5 BNM 524-16
Chart 12286

VA - POTOMAC RIVER - YEOCOMICO RIVER - SHOALING

There has been a report of shoaling in the Yeocomico River within channel boundaries, located SE of South Yeocomico River Daybeacon 2 (LLNR 16830) to a depth of less than ten feet at mean low water. MD-NCR BNM 408-16, Ref LNM 50/16
Chart 12233

VA - POTOMAC RIVER - PINEY POINT TO LOWER CEDAR POINT - BONUM CREEK - SHOALING

Soundings in Bonum Creek indicates shoaling in the channel between Bonum Creek Warning Daybeacon C (LLNR 16885), Bonum Creek Warning Daybeacon D (LLNR 16890), and Bonum Creek Warning Daybeacon E (LLNR 16895). Due to extensive shoaling off Sandy Point Neck, the channel width has been reduced to approx 20ft between Bonum Creek Warning Daybeacons C and D. Mariners are urged to use caution.
Chart 12286

VA – UPPER POTOMAC RIVER – POTOMAC CREEK – SHOALING

Severe shoaling has been reported within the channel boundaries of Potomac Creek. Shoaling extends 15 yards channel ward of Potomac Creek Buoy 3 (LLNR 17920) with depths of 3 to 4 feet at MLW. Additional shoaling further in has been observed to a depth less than 3 feet at MLW. Ref LNM 14/18
Chart 12288

VA – RUDEE INLET – SHOALING

Survey dated 8 Oct 2020. Shoaling remains on the inside, 300' West of the ends of the jetties with a new least depth 8 feet at MLLW.

NORTH CAROLINA SHOALING

NC – CAPE HENRY TO PAMLICO SOUND – WALTER SLOUGH – SHOALING

Shoaling exists within Walter Slough Channel. Shoaling to 3-4 feet MLW was observed between Walter Slough Buoy 8 (LLNR 28335) and Walter Slough Lighted Buoy 9 (LLNR 28340). NC BNM 134-20
Chart 12205

NC – OREGON INLET – SHOALING

Severe shoaling exists at the Oregon Inlet Bar between Oregon Inlet Lighted Buoy 6 (LLNR 28003) and Oregon Inlet Buoy 7 (LLNR 30005). Mariners are advised to use extreme caution while navigating this area.
Chart 12204

NC – OREGON INLET – SHOALING

Shoaling has been located in the vicinity of Oregon Inlet Buoy 17 encroaching from the south side of the channel. Water depths of 3 feet at MLW. Also shoaling has been located in Oregon Inlet from Oregon Inlet Buoy 21A (LLNR 28073) to Oregon Inlet Buoy 25 (LLNR 28080) encroaching from the south side of the channel. Water depths of 7ft at MLW. NC BNM 463-19, NC BNM 445-19, NC BNM 390-20
Charts 12204

NC - HATTERAS INLET - SHOALING

UPDATED. Shoaling exists in various locations throughout Hatteras Inlet Channel to a depth of 5 feet at mean low water. Shoaling continues to encroach the channel near Hatteras Inlet Channel Lighted Buoy 12A (LLNR28732.1). Some aids to navigation in the inlet may be unreliable. Mariners are advised to use caution while navigating this area.
Chart 11555

NC – BARNEY SLOUGH - SHOALING

Shoaling exists North East of Barney Slough Channel Buoy 3A (28721.6). Reported depths of 4 feet MLW in position 35-47-34.526N, 075-31-34.764W. Shoaling extends to middle of channel to a depth of 4 FT MLW. Shoaling has been found along north side of channel between Barney Slough Channel Buoy 4 (LLNR 28721.7) and Lighted Buoy 6 (LLNR 28722.3). Observed depths of 4 feet MLW. Shoaling is occurring in the vicinity of Barney Slough Channel Lighted Buoy 15 (LLNR 28723.7). NC BNM 204-20, 013-20
Chart 11555

NC – BIG FOOT SLOUGH – SHOALING

Shoaling exists IVO Big Foot Slough Channel Buoy 11 (LLNR 29070). NC BNM 464-19

NC – OCRACOKE INLET – TEACHES HOLE CHANNEL – SHOALING

Significant shoaling has been reported in Ocracoke Inlet IVO Teaches Hole Channel Buoy 20A (LLNR 28955), Teaches Hole Channel Buoy 21 (LLNR 28957) and Teaches Hole Channel Lighted Buoy 19 (LLNR 28953). The aids to navigation in the area may be unreliable. All mariners are requested to transit the area with caution. SEC NC BNM 318-20
Chart 11550

NC - OCRACOKE INLET - SHOALING

Shoaling exist in the vicinity of Ocracoke Inlet. Current Aids to Navigation may be unreliable in various locations between Ocracoke Inlet Buoy 1 (LLNR 28900) and Ocracoke Inlet Buoy 8 (LLNR 28927). Mariners are advised to use caution while navigating this area. NC BNM 207-20

NC – BEAUFORT INLET AND CORE SOUND – BARDEN INLET – BACK SOUND – SHOALING

Severe shoaling between Barden Inlet Buoy 24 (LLNR 29240) and Back Sound Lighted Buoy 1 (LLNR 29315) has rendered the waterway unmarkable. All floating aids were removed and fixed aids were converted to non-lateral Danger Beacons. Those remaining fixed aids have been removed. Pending dredging operations or waterway improvements, Barden Inlet Channel no longer connects to Back Sound Channel. Mariners are advised to navigate the area with caution, local knowledge is recommended. NC BNM 409-20
Chart 11545

NC – PAMLICO SOUND – CORE SOUND – WAINWRIGHT SLUE – SHOALING

Due to lack of navigable water all floating aids have been removed and all remaining fixed aids converted to non-lateral warning beacons up to Core Sound Light 11 (LLNR 34370) proceeding south from Pamlico Sound. The remaining fixed aids are scheduled for removal. Pending future dredging or waterway improvements, the Core Sound waterway is no longer accessible from Pamlico Sound.

SUMMARY OF BRIDGE PERMITS, REGULATIONS AND CONSTRUCTION IN THE FIFTH COAST GUARD DISTRICT

(Yellow indicates new item)

CURRENT PROJECTS

Permits:

SECTOR DELAWARE BAY

- **Delaware**

Christina River – Christina River Bridge – Permit (1-17-5) signed April 7, 2017, for a fixed bridge across the Christina River, mile 3.8, City of Wilmington, New Castle County, DE. The bridge will provide a minimum vertical clearance of 14 feet above mean high water and a horizontal clearance of 150 feet centered on the axis of the navigable channel. (KB)

- **New Jersey (Central & Southern)**

Oldmans Creek – US Route 130 Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on March 15, 2018; vertical clearance of 5 feet above mean high water and a horizontal clearance of 75 feet. (HP)

Raccoon Creek – US 130 (fixed) Bridge - new fixed bridge structure to replace (lift) bridge. Permit (2-15-5) signed December 9, 2015. (KB)

Glimmer Glass - W9 (Brielle Road) Drawbridge – Fixed bridge replacement and drawbridge replacement Preliminary Navigation Clearance Determination (PNCD) issued on October 22, 2019. A fixed bridge replacement will provide a horizontal clearance of 31.9 feet and a vertical clearance of 60 feet above mean high water and a drawbridge replacement will provide a vertical clearance of 9 feet above mean high water in the closed position, unlimited vertical clearance in the open position and a horizontal clearance of 31.9 feet. (MS)

Atlantic Intracoastal Waterway, Middle Thorofare - Ocean Drive Causeway Bridge - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 10, 2019; vertical clearance of 80 feet above mean high water and a horizontal clearance of 80 feet. (MB)

- **Pennsylvania**

Schuylkill River – Grays Ferry Pedestrian Bridge – Permit (3-17-5) signed November 27, 2017, for a swing drawbridge replacement with a vertical clearance of 26 feet above mean high water (closed position), unlimited vertical clearance in the open position, and a horizontal clearance of 75 feet in the west navigation span and 65 feet in the east navigation span. (MT)

Darby Creek – S.R. 420 (Wanamaker Avenue) - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 13, 2018; vertical clearance of 11 feet above mean high water and a horizontal clearance of 78 feet. (MT)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland –**

Potomac River – Governor Harry Nice Memorial Bridge – Permit (1-20-5) signed March 20, 2020, for a fixed replacement bridge with a vertical clearance of 135 feet above mean high water and a horizontal clearance of 250 feet. The center of the main navigation span of the bridge may be shifted up to 585 feet to the west of the current navigation span. (KB)

Neale Sound – MD-254 (Cobb Island Road) Bridge – Permit (1-18-5) signed May 2, 2018, for a fixed replacement bridge with a vertical clearance of 20 feet above mean high water and a horizontal clearance of 55 feet. (HP)

- **Washington DC –**

Anacostia River – Frederick Douglass Memorial Bridge - Permit (2-17-5) signed December 4, 2017, for a fixed bridge replacement with a vertical clearance of 42 feet above mean high water and a horizontal clearance of 150 feet. (MB)

- **Virginia (Northern)** – None.

SECTOR VIRGINIA

- **Virginia (Southern)**

Western Branch of the Elizabeth River – Churchland Bridge - Permit Amendment (53b-73-5) signed May 1, 2019, for a fixed bridge replacement of the northbound structure of the bridge with a structure providing a vertical clearance of 36.63 feet above mean high water and a horizontal clearance of 80 feet. (MS)

Darby Creek – S.R. 420 (Wanamaker Avenue) - Fixed replacement bridge Preliminary Navigation Clearance Determination (PNCD) issued on December 13, 2018; vertical clearance of 11 feet above mean high water and a horizontal clearance of 78 feet. (MT)

Hampton Roads - I-64/US 60 (Hampton Roads Beltway) north and south approach bridges for the Hampton Roads Bridge Tunnel (HRBT) – Fixed bridge replacement Preliminary Navigation Clearance Determination (PNCD) issued on July 1, 2020: north approach bridge – vertical clearance of 16 feet above mean high water and horizontal clearance of 80 feet; south approach bridge – vertical clearance of 16 feet above mean high water and horizontal clearance of 100 feet. (MT)

Willoughby Bay – I-64/US 60 (Hampton Roads Beltway/Willoughby Bay) Bridge - Fixed bridge replacement Preliminary Navigation Clearance Determination (PNCD) issued on July 1, 2020; vertical clearance of 25 feet above mean high water and horizontal clearance of 50 feet. (MT)

Blackwater River - Permit (4-20-5) signed July 29, 2020., for a fixed bridge replacement providing a vertical clearance of 35 feet above mean high water and a horizontal clearance of 60 feet. (MS)

Schuylkill River -

All interested parties are notified that an application dated October 8, 2020, has been received from the City of Philadelphia by the Commander, Fifth Coast Guard District, for approval of the location and plans for construction of a new pedestrian fixed bridge over a navigable waterway of the United States.

WATERWAY & LOCATION: Schuylkill River, between mile 6.3 & 6.4, at Philadelphia, PA.

CHARACTER OF WORK: The proposed project is to construct a 3,380-foot long multi-use recreational trail along the eastern bank of the Schuylkill River between Christian Street and University Avenue (2,730 feet along the river and 700 feet connection to the neighborhood). The northern and southern limits of the proposed trail extension will be constructed on the land along the bank of the river, while the middle section of the proposed trail will be a new bridge build over water. The pedestrian bridge (at span 11) will be constructed over the Veolia Peltz Street dock on an alignment that positions the bridge landward of the face of the dock. The proposed construction is an extension of the existing multi-use Schuylkill River Trail. The purpose of the project is to provide the public a safe and efficient recreational facility along the Schuylkill River waterfront within the City of Philadelphia.

There is no existing bridge. The new bridge will be a fixed bridge with a horizontal clearance of 268.9 feet in span 8 and a vertical clearance of 14 feet above mean high water in span 8. **Note: This bridge has no navigation span (s), given it lies along the east bank of the river and does not cross the navigable waterway. Span 8 provides clearances for vessels to navigate shoreward of the bridge.** A copy of **Public Notice D05PN-11-2020**, which describes the proposal in detail, can be obtained by calling (757) 398-6222 or by viewing at <https://www.navcen.uscg.gov/?pageName=pnBridges>. Comments on this proposal should be forwarded to the address in the notice no later than **November 24, 2020**. (HP)

SECTOR NORTH CAROLINA

- **North Carolina**

Atlantic Intracoastal Waterway – NC 210/50 Bridge, Surf City, NC - new fixed bridge structure to replace (swing) bridge. Permit (2-16-5) signed September 27, 2016. (KB)

The Straits – Harkers Island Bridge – Fixed replacement bridge - Permit (2-20-5) dated September 30, 2020; vertical clearance of 45 feet above mean high water and a horizontal clearance of 125 feet. (HP)

Pamlico Sound – Bridge No. 71 (Rodanthe) Bridge – new fixed bridge carrying NC 12 on the mainland side of the outer bank along the northeastern shore of Pamlico Sound from a position approximately 1.8 miles north of the southern boundary of the Pea Island National Wildlife Refuge to a position north of the Chicamacomico Channel and the emergency ferry terminal in Rodanthe, Dare County, NC. Permit (1-19-5) signed on February 20, 2019. (HP)

Perquimans River – Bridge No. 8 (US17 BUS/NC37) Bridge, Hertford, Perquimans County, NC - new drawbridge to replace existing drawbridge. Permit (6-19-5) signed December 31, 2019. (HP)

Currituck Sound - Preliminary Public Notice D05PPN-04-2020 - Comments closed on **March 24, 2020**. (MB)

Regulations:

SECTOR DELAWARE BAY

- *Delaware* – None

- *New Jersey (Central & Southern)*

Rancocas Creek - Riverside-Delanco Bridge – The bridge will be maintained in the closed-to-navigation position from 12:01 a.m. on May 5, 2020, through 11:59 p.m. on October 31, 2020. The closure is necessary due to reduced personnel staffing related to the coronavirus (COVID-19) pandemic. During the closure, the bridge will open on signal between 3 p.m. and 8 p.m., from Monday through Friday, and between 1 p.m. and 8 p.m., on Saturday and Sunday. The vertical clearance of the bridge in the closed-to-navigation position is 4 feet above mean high water. Vessels able to safely pass through the bridge in the closed-to-navigation position may do so at any time. The bridge will be able to open for emergencies if at least 30 minutes notice is given to (856) 829-3002. At all other times the bridge will operate per 33 CFR 117.745 (b). Mariners should use caution when transiting the area. (HP)

- *Pennsylvania* – None

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- *Washington, DC & Virginia (Northern)* – None

- *Maryland* – None

SECTOR VIRGINIA

- *Virginia (Southern)* - None

SECTOR NORTH CAROLINA

- *North Carolina* - None

Construction, et al:

SECTOR DELAWARE BAY

- *Delaware*

Lewes and Rehoboth Canal - Bridge 3-150 (State Road 1) Bridge – Bridge maintenance will be conducted from July 19, 2019, to December 30, 2020. To facilitate the work, scaffolding will be installed underneath the bridge and will reduce the vertical clearance to 32 feet above mean high water. The Project Foreman may be reached on VHF/FM Channel 13. Mariners should use caution when transiting the area. (MS)

Christina River - I-95 Bridge - Bridge maintenance will be conducted between Thursday, July 2, 2020, and Monday, March 1, 2021; Mon-Thurs; from 7 a.m. to 5 p.m. The maintenance will require one 30 x 40 foot barge to be anchored parallel to each pier while that pier has maintenance performed. Each span is 80 feet wide, which will leave approximately a 49-foot opening for vessels to pass alongside the barge. All additional spans will retain their 80-foot horizontal openings. The project superintendent may be reached at 484-318-0713. Mariners should use caution when transiting the area. (MB)

New Jersey (Central & Southern)

Delaware River – Commodore Barry (fixed) Bridge – Repainting of the main (cantilever) truss span, signal gantries, steel barriers along the entire bridge, and water tower will continue through 2023. Work platforms will be installed, reducing the available vertical clearance by 3 feet, reducing the clearance from 190 feet to 187 feet above mean high water. Mariners should exercise caution when transiting the area. (KB)

New Jersey Intracoastal Waterway (NJICW), Inside Thorofare - US40-322 (N Albany Ave) Bridge – Bridge maintenance that begun in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through December 31, 2020. Work will consist of repair and rehabilitation of the bridge fender system. A crane barge, a material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 25 feet due to work floats located inside the navigational channel throughout for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge between 11:30 a.m. and 12:30 p.m., if at least a 24-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel to facilitate the safe transit through the bridge of vessels that cannot safely transit the bridge with a reduced horizontal clearance. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners

should use extreme caution when transiting the area. (MT)

New Jersey Intracoastal Waterway (NJICW), Beach Thorofare - US 30 (Absecon Boulevard) Bridge – Bridge maintenance that begun in September, 2018, will continue to be conducted from 6 a.m. to 6 p.m.; Monday-Friday; through December 31, 2020. Work will consist of repair and rehabilitation of the bridge fender system. A crane barge, a material barge, a 25-foot work vessel, and several work floats will be located in and around the vicinity of the bridge. During the work hours, the horizontal clearance of the bridge will be reduced to approximately 30 feet due to work floats located inside the navigational channel throughout for the duration of the maintenance period. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Vessels that cannot safely transit through the bridge during periods with a reduced horizontal clearance may transit through the bridge between 11:30 a.m. and 12:30 p.m., if at least a 24-hour prior notice is given to the project foreman. Maintenance personnel, equipment and vessels will relocate from the navigable channel to facilitate the safe transit through the bridge of vessels that cannot safely transit the bridge with a reduced horizontal clearance. Work vessels and barges may be reached on VHF-FM channel 13. The project foreman may be reached at (267) 907- 5087 or (215) 815-1251. Mariners should use extreme caution when transiting the area. (MT)

New Jersey Intracoastal Water (NJICW), Ingram Thorofare - CR 601 (Avalon Blvd) Bridge – Bridge construction will be conducted from September 1, 2019, to May 25, 2021. To facilitate the work, scaffolding will be installed underneath the bridge and will reduce the vertical clearance to 33ft above mean high water. The Project Foreman may be reached on VHF/FM Channel 13. Mariners should use caution when transiting the area. (MS)

Delaware River - Benjamin Franklin Bridge – Bridge maintenance will be performed from July 27, 2020, through December 31, 2024. For the duration of the project, the preferred navigation channel and bridge navigational lighting normally situated over the 410-foot Federal project channel, will be shifted to the east approximately 205 feet. The Federal Project channel will remain fully open to traffic, however the vertical clearance of the channel has temporarily decreased based on the planned scaffolding system (work platform) to be installed. The scaffolding system will be installed over the entire length of the bridge, as detailed below.

Preferred Navigation Channel: A 410-foot scaffolding (work platform) system, with five 82-foot independent work zones, will be installed extending below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet). When in use, a single 82-foot work zone portion of the 410-foot scaffolding (work platform) system will be extended below the bridge approximately 18.5 inches (1.54 feet), thereby reducing the vertical clearance of the bridge within the work zone by approximately 18.5 inches (1.54 feet). The single 82-foot work zone portion of the 410-foot scaffolding (work platform) system in use will be lifted to extend below the bridge approximately 10 inches (.83 feet), thereby reducing the vertical clearance of the bridge within the preferred navigation channel by approximately 10 inches (.83 feet), if at least 48 hours notice is given to Eric.Dovak@Skanska.com.

Outside the Preferred Navigation Channel: Scaffolding will extend below the bridge approximately two feet from the west boundary of the Federal project channel to the center of the Federal project channel (west boundary of preferred navigation channel) and from the east boundary of the preferred navigation channel toward the east abutment approximately 385 feet. West of the west boundary of the Federal project and east of the position approximately 385 feet east of the east boundary of the preferred navigation channel, scaffolding will extend below the bridge approximately three feet.

A safety boat will be in the vicinity of the bridge during bridge maintenance, which may be reached via VHF FM channel 13. Mr. Eric Dovak, contractor's representative, may be reached at Eric.Dovak@Skanska.com or (347) 860-2399. Mariners are advised to exercise caution when transiting the area. (HP)

Delaware River - US 322 (Commodore Barry) Bridge – Bridge maintenance will be conducted from 6 a.m. to 4 p.m.; Monday-Thursday; from 6 a.m. on September 11, 2020, through 4 p.m. on December 18, 2020. Several work boats will be located around the vicinity of the bridge. During the maintenance period, work platforms will be located on both bridge piers inside the navigational channel; these work platforms will reduce the horizontal clearance of the bridge by approximately 6 feet (approximately 3 feet per pier) to approximately 1594 feet. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Maintenance personnel and vessels will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (609) 707-7439 or (856) 472-5714. Mariners should notify the work foreman no less than thirty minutes prior to transiting through the bridge. Mariners should use caution navigating through the area. (MT)

Pennsylvania

Schuylkill River - Grays Ferry Railroad Bridge - Modification activities that began June 2018, are expected to finish on December 31, 2020. Work will be performed from 6 a.m. to 5 p.m.; M-F. During this bridge modification project, one navigation span will be occupied; the other navigation span will be open for vessels to transit. Mariners should navigate the waterway with extreme caution and due regard for prevailing conditions on the waterway. The new bridge will have a vertical clearance of 26 feet above mean high water in the closed-to-navigation position, an unlimited vertical clearance in the open position, a horizontal clearance of 75 feet in the western navigation span, and 65 feet in the eastern navigation span. Detailed project information and information concerning the waterway closures will be provided via updated local notice to mariners, broadcast notice to mariners and marine safety information bulletins. (MT)

Schuylkill River - I-76 (Schuylkill) Expressway, west bank, between University Avenue - Bridge maintenance will be conducted between Wednesday, March 27, 2019, and Friday, **December 1, 2020**; Mon-Fri; from 6 a.m. to 4 p.m. The maintenance will require a tug and two barges to work along the western bank of the Schuylkill River. The project superintendent may be reached at (610) 487-4976. The tug will be monitoring VHF-FM channels 13 and 16. Mariners should use caution when transiting the area. (HP)

Delaware River - US 322 (Commodore Barry) Bridge – Bridge maintenance will be conducted from 6 a.m. to 4 p.m.; Monday-Thursday; from 6 a.m. on September 11, 2020, through 4 p.m. on December 18, 2020. Several work boats will be located around the vicinity of the bridge. During the maintenance period, work platforms will be located on both bridge piers inside the navigational channel, these work platforms will reduce the horizontal clearance of the bridge by approximately 6 feet (approximately 3 feet per pier) to approximately 1594 feet. Vessels that can safely transit through the bridge during periods with a reduced horizontal clearance may do so at any time. Maintenance personnel and vessels will relocate from the navigable channel, upon request. Work vessels may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (609) 707-7439 or (856) 472-5714. Mariners should notify the work foreman no less than thirty minutes prior to transiting through the bridge. Mariners should use caution navigating through the area. (MT)

SECTOR MARYLAND-NATIONAL CAPITAL REGION

- **Maryland**

Chesapeake Bay - US 50/US 301 (William P. Lane Jr. Memorial) (Eastern Channel) Westbound Bridge – Bridge maintenance which began in July 2017, has been extended to December 31, 2020; 24 hours a day; 7 days a week. The work will involve the Spans 44-46 (span 45 is the navigational span). A barge and work vessels will be in and around the vicinity of the bridge. A work platform will be attached to the underside of bridge which will reduce the vertical clearance of the bridge span to approximately 56 feet above mean high water. During the maintenance period from March 5, 2019, through May 25, 2019, a work barge will be located near the center of the navigational span, reducing the horizontal clearance of the bridge to approximately 300 feet on either side of the barge. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (717) 490-1699 or 803-535-9995. Mariners should use extreme caution navigating through the area. (MT)

Severn River - US 50/US 301/SR 2 (John Hanson Highway/Severn River) Bridge - Bridge maintenance will be conducted from 7 a.m. to 3:30 p.m., Monday-Friday; from 7 a.m. on April 16, 2020, through 3:30 p.m. on April 30, 2021. During the maintenance period a work platform will be

located beneath the bridge which will reduce the vertical clearance of the bridge to approximately 70 feet above mean high water. The project foreman may be reached at (410) 984-1807 or (443) 506-3756 or (443) 458-8620. Mariners should use caution navigating through the area. (MT)

Lower Potomac River - Harry W. Nice/Thomas "Mac" Middleton (US 301) Bridge – Construction will commence in May 2020, with completion estimated in November 2024. Work is scheduled from 7:00 a.m. to 7:00 p.m., Monday through Saturday, with limited work outside these hours for special operations. To facilitate bridge construction, a barge loading facility will be constructed on the Maryland shore and work trestles will be located north of the existing bridge extending outward from the Virginia shore to approximately 320 feet and from the Maryland shore to approximately 200 feet. Dredging will occur from the end of the Virginia work trestle until the water depth reaches 6 feet at mean lower low water. A vertical clearance of 135 feet above mean high water and horizontal clearance of 250 feet will be maintained throughout construction. Detailed project information and information concerning waterway closures will be provided via updated local notice to mariners and broadcast notice to mariners. Mariners are urged to use caution when transiting the area. (KB)

Susquehanna River - Amtrak Railroad Bridge - To facilitate emergency repairs, the bridge will be maintained in the closed-to-navigation position from 7 a.m. on August 4, 2020, to 11 p.m. on October 5, 2020. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.575. (MS)

Chesapeake Bay - US 50 (William Preston Lane Jr.) Memorial Bridge – Bridge inspection will be conducted from September 8, 2020, to October 15, 2020, from 7 a.m. to 5 p.m. To facilitate the inspection, a 30' x 90' work barge and personnel lift will be operating outside of the navigational channel. Mariners should use caution when transiting the area. (MS)

Curtis Creek - SR 173 (Pennington Avenue) Bridge - To facilitate the repairs, the bridge will be maintained in the closed-to-navigation position from 6:30 a.m. to 6:30 p.m., on October 7, 2020. The alternate date is from 6:30 a.m. to 6:30 p.m., on October 8, 2020. The drawbridge has a vertical clearance of 40 feet above mean high water in the closed position. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open for emergencies and there is no immediate alternate route for vessels to pass. At all other times, the drawbridge will operate in accordance with the operating regulations set out in Title 33 Code of Federal Regulations Part 117.5. Vessels may contact the project foreman at (443) 694-3916. Mariners should exercise caution when transiting the area. (MS)

- **Washington DC**

Potomac River - Arlington Memorial Bridge - Major rehabilitation of the Arlington Memorial Bridge commenced in the Potomac River in Washington, DC in July of 2018, and will continue until November 2020. The initial work consisted of pinning a pier barge in place with a steel ramp connecting the barge to the shore on the western shoreline south of the bridge and outside of the federal navigation channel. Construction work will generally be conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., though nighttime work is possible. Marine equipment on site includes a crew boat, push boats, and up to 10 barges at various locations along the length of the bridge with work focused on the center span. In July of 2018, the project relocated the federal navigation channel under the center span of the bridge (Arch 5) to a temporary channel located under the adjacent span to the east (Arch 4). On Monday, August 17, 2020, the temporary channel will be relocated to Arch 3 due to marine construction under Arch 5 and Arch 4. On August 24, 2020, the temporary channel will be relocated to Arch 2 due to the final construction efforts on Arches 5, 4, and 3. On November 6, 2020 the Federal Navigation Channel will be restored to its original location under Arch 5. On the evening of September 25th, 2020 Navigation channel lighting at the bridge will be in accordance with Coast Guard requirements. The federal navigation channel (Arch 5) remains completely obstructed to replace the center span of the bridge. All elements will be marked and lighted in accordance with USCG requirements. Mariners are urged to use caution when transiting the area, and operate at the minimum speed necessary to maintain safe course near the work site. Interested mariners can contact the vessels BULLDOG II and CAPT. JACK via marine band radio VHF-FM channels 16 and 13 when actively working on the river, or at telephone number 305-304-6853. The Kiewit bridge construction contractor may be contacted at 813-323-4611. For any questions or concerns, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at telephone (410) 576-2674 or (410) 576-2693. (MS)(RH)

Anacostia River - Frederick Douglass Memorial (South Capitol Street) Bridge – Bridge construction commenced in the Anacostia River in Washington, DC on April 19, 2018, and will continue into 2022. The work is being conducted Mondays through Saturdays, between 7 a.m. and 7 p.m., with intermittent night work and currently consists of: (1) The temporary West Trestle, which extends from the western shoreline eastward to the center of the federal navigation channel and includes new Bridge Pier 1 and the western portion of the new bridge superstructure. The western half of the federal navigation channel, approximately 150 feet, is currently restricted to navigation. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" that are placed approximately 85 yards (250 feet) upstream of the bridge. (2) The temporary East Trestle, which extends from the eastern shoreline westward to the eastern limit of the federal navigation channel and includes new Bridge Pier 2 and the eastern portion of the new bridge structure. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" with the standard 'Exclusion' diamond symbol that are placed approximately 85 yards (250 feet) upstream of the bridge. The federal navigation channel east of the center pier (eastern half), approximately 150 feet wide, remains available for navigation. To support active construction operations, a vessel/barge may be intermittently positioned within the navigable channel. Mariners intending to transit this area are urged to contact the vessels MS. BECKY or CLAIRE MARIE for passing arrangements. Marine equipment on site includes a crew boat, a push boat, and multiple deck barges. All equipment will be marked and lighted as required by U. S. Coast Guard regulations. Mariners are urged to use extreme caution when transiting the area, and to operate at minimum speed necessary to maintain safe course that minimizes wake near the work site. Interested mariners can contact the vessel MS. BECKY or vessel CLAIRE MARIE via VHF-FM channels 16 and 13 when actively working on the river. (MB)(RH)

- **Virginia (Northern)** - None

SECTOR VIRGINIA

- **Virginia (Southern)**

James River - SR 156 (Benjamin Harrison Memorial) Bridge – Bridge maintenance will be conducted from 7 a.m. to 5 p.m., Monday-Friday; from 7 a.m. on March 9, 2020, through 5 p.m. on October 30, 2020. A 40-foot barge and two work boats and a dive team will be located in the vicinity of the bridge, but should not encroach into the navigation channel. Work vessels may be reached on VHF-FM channel 13 and 16. The project foreman may be reached at (757) 435-9097 or (757) 558-3939 or (757) 478-2705. Mariners should use extreme caution navigating through the area. (MT)

James River - SR 156 (Benjamin Harrison Memorial) Bridge - Bridge maintenance will be conducted from 7 a.m. to 7 p.m.; Monday-Saturday; from October 5, 2020, through December 4, 2020. A 60 foot crane barge and a tug boat will be located around the vicinity of the bridge during the work hours. Vessels can safely transit through the bridge, unrestricted, at any time. Work vessels may be reached on VHF-FM channel 13 and 16. The project foreman can be reached at (870) 919-1226. Mariners should notify the work foreman no less than 2 hours prior to transiting through the bridge to provide for navigation safety. Mariners should use caution navigating through the area. (MT)

Atlantic Intracoastal Waterway (AIWW), South Branch of the Elizabeth River - I-64 (US 17/High Rise) Bridge – Bridge inspection will be conducted from 8 p.m. to 5 a.m.; Sunday-Thursday; from November 1, 2020, through November 12, 2020. An inspection vehicle will be operating on top of the bridge to provide access for inspection. During the work hours, the inspection vehicle will be located in the navigation channel reducing the vertical clearance of the bridge to approximately 55 feet above mean high water. Inspection personnel, equipment and vehicle will relocate from the moveable span and navigable channel, upon request. The vehicle may be reached on VHF-FM channels 13 and

16. The project foreman can be reached at (757) 270-9569. Mariners should notify the work foreman no less than five minutes prior to transiting the bridge. Mariners should use caution when navigating through the area. (MT)

SECTOR NORTH CAROLINA

- *North Carolina*
 - Oregon Inlet - Herbert C. Bonner Bridge – Demolition of the old bridge is anticipated to be completed by January 31, 2020. During demolition of the old bridge, the designation of navigation spans and placement of bridge lighting will be changed several times, as reflected below, and provided via updated local notice to mariners and broadcast notice to mariners. Phase 2 (Effective April 24, 2019): The navigation spans are between bridge bents 173 and 176 (old bridge, with no superstructure between bridge bents) and bridge bents 20 and 21 (span 21) on the new bridge. The approximate limiting navigation clearances are 70 feet above mean high water (new bridge, span 21) and 169 feet between bridge bents (old bridge, between bridge bents 173 and 176). Temporary bridge lighting has been placed between bridge bents 173 and 176 of the old bridge and between bridge bents 20 and 21 (span 21) of the new bridge. Phase 3 (to be announced): The navigation span will be between bridge bents 22 and 23 (span 23) of the new bridge. The adjacent spans of the old bridge will have been removed. The limiting navigation clearances (approximate) will be 70 feet above mean high water and 275 feet between bridge bents. Permanent bridge lighting will be placed between bridge bents 22 and 23 (span 23) of the new bridge. Mariners are advised to use extreme caution when transiting through the bridge, follow the aids to navigation closely and remain at least 500 feet clear of all construction vessels and equipment. Submerged concrete pilings are just below the surface of the water near construction activities. (HP)
 - Atlantic Intracoastal Waterway (Boque Sound) - SR 1184 (Atlantic Beach Bridge) Bridge – Bridge maintenance, which began October 2018, will continue to be conducted from 7 a.m. to 7 p.m.; Monday-Saturday; through November 30, 2020. A crane barge, material barge, several tugs, several work vessels and platforms, and a snooper truck will be located in and around the vicinity of the bridge. During work hours, the snooper truck will be located in and around the navigational span of the bridge performing concrete repairs through November 30, 2020. During work hours, the crane barge, material barge, several tugs, several work vessels and platforms will be located within the navigation span performing work on the fender system through March 31, 2020. The snooper truck will extend below low steel of the bridge approximately ten feet, reducing the vertical clearance in the navigation span to approximately 55 feet above mean high water. Vessels that require the snooper truck to clear the navigation span to safely navigate through the bridge should notify the work foreman no less than 30 minutes prior to navigating through the bridge. The tugs, barges, and work vessels and platforms will reduce the horizontal clearance in the navigation span to approximately 38 feet. Vessels that require the tugs, barges, and work vessels and platforms to clear the navigation span to safely navigate through the bridge should notify the work foreman no less than one hour prior to navigating through the bridge. Work vessels may be reached on VHF-FM channel 13. The project foreman may be reached at (571) 287-9269 or (703) 231-8589. Mariners should use extreme caution navigating through the area. (MT)
 - The Straits - Harkers Island Bridge (SR 1332) - Bridge will remain in the closed-to-navigation position to facilitate bridge repairs due to damage caused by Hurricane Florence. The repairs require the bridge to remain in the closed-to-navigation position. The bridge is a swing bridge with a vertical clearance in the closed-to-navigation position of 14 feet above mean high water. Vessels able to pass through the bridge in the closed position may do so at any time. The bridge will not be able to open in case of an emergency and there is an alternate route for vessels to pass. Mariners should use caution when transiting the area. (MB)
 - Northeast Cape Fear River - US 74/SR 133 (Isabel S. Holmes) Bridge – Bridge maintenance which began in September 2019, will continue to maintain the bridge in the closed position 24 hours a day, 7 days a week, through 12:01 a.m. on June 30, 2021. The bridge will open on signal for daily scheduled openings at 6 a.m., 10 a.m., 2 p.m. and 7 p.m., if at least a 24-hour notice is given; except for scheduled bridge closures for events per 33 CFR 117.829 (a) (4). The bridge will open on signal for vessels unable to safely transit the bridge during a scheduled opening, due to the vessel's draft, if at least a 24-hour notice is given; except for scheduled bridge closures for events per 33 CFR 117.829 (a) (4). During the maintenance period, a work platform will be located underneath the bridge, which will reduce the vertical clearance of the bridge to approximately 34 feet above mean high water in the closed position. Vessels that can safely transit through the bridge in the closed position with the reduced vertical clearance may do so, if at least a 30-minute notice is given, to allow for navigation safety. The bridge will not be able to open for emergencies. Work vessels and barges may be reached on VHF-FM channel 13 and the project foreman may be reached at (910) 251-5774 or 561-232-9773. Mariners should adjust their transits accordingly and should use caution when transiting the area. (MT)

SUMMARY OF DREDGING/MARINE CONSTRUCTION PROJECTS CURRENTLY IN PROGRESS

NEW OR UPDATED INFORMATION

New, updated or very important information in this enclosure will be highlighted in yellow.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted 24 hours a day, 7 days a week. All fishnets, crab pots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

NJ – UPPER BARNEGAT BAY – DREDGING

H&L Contracting will be conducting dredging operations in Upper Barnegat Bay at Andrews Point Channel; Silver Bay Entrance Channel; Silver Bay Channel; Bay Shore Bridge Channel; Pier 1 Channel; And Lavallette Beach Channel until **10 Jan 2021**. Work hours are 24 hours a day, 7 days a week. Dredging will be performed by barge-mounted excavator loading scows. There will be one dredging excavator barge and multiple scows and push boats on scene. Channels will remain open during dredging but channel width will be reduced. All mariners are advised to reduce speed to minimum for making way while in the vicinity of dredging operations. Dredged material scows will be towed to a placement site near bayside park/swamp cove at 40°00'32"n, 74°03'42"w where they will be emptied. Marine equipment operators will be monitoring VHF-FM Channel 13, 16 and 63.

NJ – ABSECON INLET TO GREAT EGG HARBOR INLET - DREDGING – BEACHFILL OPERATIONS

Great Lakes Dredge & Dock Company will be conducting dredging and beachfill operations in Margate, Ventnor and Longport NJ until **Feb 2021**. Material will be dredged from offshore between Absecon Inlet and Great Egg Harbor Inlet and pumped to the shoreline using submerged pipelines. The following vessels, in addition to others will be in the area, the Dredge LIBERTY ISLAND, Tug BOBBIE ANN, Tug BAYOU BRAVE, Tug MONICA LYNN, Tug POPS, and Tug VOLUNTEER STATE and may be contacted on VHF-FM channels 13 and 16. For more information, contact Stuart Hilgendorf at 443-831-0785 or SHilgendorf@gldd.com.
Chart 12316, 12318

NJ – GREAT EGG HARBOR BAY – BEESLEYS POINT – TRANSITION TOWER CONSTRUCTION

In mid-August 2019, South State Contractors will begin construction of new transition towers in Great Egg Harbor Bay west of the Garden State Parkway Great Egg Harbor. The new towers will be located approximately 500' to the west of the existing towers. All barges and work boats involved will be monitoring VHF channel 13. Project work will be conducted 7 days a week between the hours of 5:00 a.m. and 8:00 p.m. and expected to last till **Aug 2021**. A floating dock consisting of Shugart barges will be staged outside of navigable channel near the old Route 9 bridge.
Chart 12316

NJ - GREAT EGG HARBOR INLET TO TOWNSENDS INLET, AND PECK BEACH – DREDGING - BEACHFILL

Great Lakes Dredge & Dock Company will be conducting dredging and beachfill operations from Great Egg Harbor Inlet to Townsends Inlet, and Peck Beach, Cape May County, New Jersey. Operations will commence in June and continue until **Oct 2020**. Material will be dredged from the Great Egg Harbor Inlet Borrow Area and be pumped directly to shore from the hydraulic dredge OHIO. VHF- FM Channels 13 & 16 will be monitored 24hr/day, 7 day/week. For more information or questions contact Stuart Hilgendorf Project Manager (443) 831-0785 or SHilgendorf@gldd.com.
Chart 12318

NJ – SEA ISLE CITY – DREDGING - BEACHFILL

Great Lakes Dredge & Dock Company will be conducting dredging and beachfill operations in Sea Isle City. Operations will commence in June and continue until **Oct 2020**. Material will be dredged from the L1 Borrow Area and be pumped directly to shore from the hydraulic dredge LIBERTY ISLAND. VHF- FM Channels 13 & 16 will be monitored 24hr/day, 7 day/week. For more information or questions contact Stuart Hilgendorf Project Manager (443) 831-0785 or SHilgendorf@gldd.com.
Chart 12318

NJ – HEREFORD INLET – SEAWALL REPAIR

Continuing until **Feb 25, 2021** a Crane Barge along with an attendant plant will be operating at various locations in and around the Hereford Inlet. Materials will be delivered to this Crane Barge via tug and barge. The Crane Barge will not be in the federally marked navigation channel at any time. The crew will be working Monday through Friday during day light hours. The Crane and attendant plant will both monitor VHF-FM Channel 16. Mariners are urged to use extreme caution and transit the area at a safe speed. For questions or additional information, contact Agate Construction at cyurick@agateconstruction.net or (609) 780-5175.
Chart 12316, 12318

PA – NJ – DELAWARE RIVER – BAXTER AVE MARINE TERMINAL – DREDGING

JPC Group will be conducting Dredging Operations at the Baxter Ave Marine Terminal on the Delaware River until **31 Dec 2020**. Dredge spoils will be transported by barge to the Fort Mifflin Disposal Site. For more information or questions, contact Frank Branagan at 856-265-3558 or frankbranagan@jpcgroupinc.com.
Chart 12312

PA – NJ – MIFFLIN RANGE – FORT MIFFLIN TERMINAL DOCK – MARINE CONSTRUCTION

Commerce Construction Corporation will be performing marine construction for Energy Transfer Partners at Fort Mifflin Terminal Dock, located along the Del River in Tinicum Township, PA. Crews will be on the water from 6:00 AM to 6:00 PM Monday thru Sunday, thru **Dec 2020**. Multiple barge mounted cranes, support barges and small craft will be near the dock supporting construction activities. Operators of vessels of all types should be aware that men will be working on floating equipment and within the water around the crane barge and docks. A NO WAKE transit is requested. LNM 40/18
Chart 12312

PA - NJ – DELAWARE RIVER – PORT OF PAULSBORO – MARINE CONSTRUCTION

The Paulsboro Marine Terminal will be conducting construction activities along the existing marine wharf. The multi-phase project will involve creation of a new berth on the downriver side of the existing pier. The project will continue through **Oct 2021**. During construction, there will be multiple tugs, work vessels, material and crane barges in the vicinity of the pier and Mantua Creek. For questions contact Coast Guard Sector Delaware Bay Waterways. Chart 12312

DE – DELAWARE BAY – WEST SIDE – HARBOR OF REFUGE – MARINE CONSTRUCTION

Marine Technologies Inc. will be removing the wreckage from the destroyed Light and rebuilding Harbor of Refuge North End Light 1 (LLNR 2050) from 3 Sep to **30 Nov 2020** in approximate position [38°48'52.6N, 75°05'32.6W](#). Work will be conducted from 6:00 am to 9:00pm seven days a week. The Crane Barge FATHOM INOVATION and Tug Boat JEZABEL will be on scene with a 28' workboat and may be contacted on VHF-FM 16 and 79. For more information or questions, contact Mike Williams, 443.995.2756, mwilliams@marinetechnologiesinc.com. Chart 12216, 12304

DE – BETHANY BEACH – DREDGING

Continuing until approximately **31 December 2020**, the hopper dredge R.N. WEEKS and support equipment will be operating three (3) nautical miles offshore of South Bethany Beach placement site. Dredge pipeline will be prepared in the staging area and then relocated offshore of Bethany Beach placement areas and submerged into two different pipeline corridors, bound by the following approximate positions:

38°32'45.68"N, 75° 3'16.95"W, 38°32'45.46"N, 75° 2'9.25"W, 38°30'12.51"N, 75° 2'10.73"W, 38°30'14.44"N, 75° 3'8.83"W

Dredged material will be transported from the Borrow Area to the discharge station and then pumped out through a combination of floating and submerged line reaching between 2,500 feet to 4,500 feet offshore from the beach placement.

Borrow Area will be the perimeter bound by the following approximate positions:

38°31'20.56"N, 75° 1'18.04"W, 38°31'23.75"N, 74°59'30.80"W, 38°30'0.92"N, 74°59'29.48"W, 38°29'58.80"N, 75° 1'16.00"W

Once underway, dredging operations will continue on a twenty-four (24) hours per day, seven days per week. The dredge will VHF channels 13 and 16.

Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. For questions or more information, contact Matt Henry at 985-237-5050 or mthentry@weeksmarine.com

Chart 12214, 12216

MD – CHOPTANK RIVER – CAMBRIDGE – MARINE CONSTRUCTION

McLean Contracting Company will be replacing the Timber Bulkhead at Cambridge Marine Terminal in Cambridge Creek in Dorchester County MD. Construction equipment and barges will be in the waterway during construction. Work expected to last until **30 Nov 2020**. Equipment will monitor VHF-FM channels 13 and 16. Contact John Hackmann 443-623-8412 or Jay Musser 443-392-8089 for additional information. Chart 12266

MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT – SAUNDERS POINT – SHORE LINE STABILIZATION

Central Marine will be working on the Beverly Triton Shoreline Stabilization Project near Saunders Point in the Chesapeake Bay. Work will be from 15 Sep 2020 to **30 Mar 2021** and conducted each day during daylight hours. Barges and small vessels will be in the area and a blue and white mooring buoy will be established in approximate position 38.87N, 76.48W. For any questions or additional information, contact Charlie Young at 410-320-7030. Chart 12263

MD – SEVERN RIVER – ENTRANCE TO LAKE OGLETON – DREDGING

Maintenance dredging operations are scheduled to occur in the entrance channel to Lake Ogleton, Anne Arundel County, MD from October 15, 2020, until **November 15, 2020**. In approximate position 38°57'7.89"N, 76°27'27.98"W. Dredging will take place in the entrance channel to Lake Ogleton where there will be a hydraulic dredge, approximately 3,000ft of pipeline which will be marked with orange buoys, 1 work barge and 2 work skiffs. The channel width will be restricted during the dredging operation. Mariners are urged to use caution when transiting the area and reduce to a no-wake speed in the vicinity of the equipment. Southern Maryland Dredging, Inc. can be contacted on VHF-FM channels 08 and 16 or at 443-336-2320, 954-662-8112. Chart 12283

MD – APPROACHES TO BALTIMORE – BREWERTON AND SPARROWS POINT CHANNELS – DREDGING

Corman Kokosing Construction Company will be conducting dredging operations on behalf of Trade Point Atlantic near the intersection of Brewerton Channel and Sparrows Point Channel, near 39° 11.5873N, 076° 28.8007W. Loaded scows will be towed to unloader #3 located at the Cox Creek Dredge Containment Facility, 39° 11.9741N, 076° 31.7074W on a daily basis. A 16" submerged pipeline will be placed from the Unloading Barge into the placement Facility, located at 39° 11.9659N, 076° 31.7814W. The Dredge CKC 2400 will be dredging the area with the assistance of a Tender Tug, a Towing Tug, and three scows. All vessels and crew will monitor VHF-FM channels 13 and 7. Dredging and unloading operations will continue daily until approximately **16 Nov 2020**. For more information of questions, contact Harry Tolson at 301-343-6081 or Tolson@CormanConstruction.com. Chart 12278

MD – CHESAPEAKE BAY – BALTIMORE HARBOR – BEAR CREEK- TRANSMISSION TOWER FOUNDATION REPAIR

Marine Solutions, Inc. (Marine Solutions) has been contracted by BG&E to complete the foundation repair on two transmission towers located in Bear Creek in Baltimore MD. Work will be conducted from 2 Nov 2020 to **1 Mar 2021**. The two towers are located just to the south of I-695 over Bear Creek. All work will take place outside of the navigation channel and no channel closures are anticipated. Diving operations will be conducted from two barges and two work vessels that will be tied-off to the barges. The barges will be moored adjacent to the towers. For more information or questions, contact Jeff Brown 302-250-6073. Chart 12281

MD – CHESAPEAKE BAY – APPROACHES TO BALTIMORE HARBOR – PATAPSCO RIVER – AERIAL TRANSMISSION LINE CONSTRUCTION

Marine construction operations in support of the installation of aerial electric power transmission lines are scheduled to occur on the Patapsco River, between Hawkins Point and Sollers Point north and adjacent to the Francis Scott Key Memorial (I-695/Baltimore Beltway) Bridge, during **May 4, 2020-October 7, 2022**. The work will occur 24 hours per day, 7 days per week, at the following 5 approximate positions: (1) latitude 39°12'46.8737" N, longitude 076°32'14.0536 W; (2) latitude 39°12'58.5610 N, longitude 076°31'58.7405 W; (3) latitude 39°13'13.7886 N, longitude 076°31'38.7851 W; (4) latitude 39°13'26.6084 N, longitude 076°31'21.9825 W; and (5) latitude 39°13'39.4271 N, longitude 076°31'05.1787 W. McLean Contracting Company marine equipment spudded on site will include: (1) a sectional barge (120'x120'x7') with Manitowoc Crane, (2) the Whirley Crane Baltimore barge (140'x70'x12.5'); (3) the Whirley Crane Hampton Roads barge (108'x 46'x8'); (4) a Whirley Crane Newport News barge (110'x43'x8'); and (5) a deck barge. All marine equipment will be marked and lighted in accordance with USCG regulations. Mariners are urged to use caution when transiting the area, and to operate at minimum wake speed necessary to maintain safe course near the work site. Interested mariners can contact the attending vessels on site, including "WB29", "MEGALADON", "RISING SUN", "CAPTAIN STEVE", crewboat and jackboats on marine band radio VHF-FM channels 16 and 13. Throughout the construction of the Key Crossing Reliability Initiative project, the Baltimore Gas and Electric Company will regularly provide updates on project progress at website: <https://www.bge.com/SmartEnergy/InnovationTechnology/Pages/Construction-Updates.aspx>. Chart 12281

MD – HEAD OF CHESAPEAKE BAY – BUSH RIVER – DREDGING

Cianelli Construction, Inc will be conducting dredging operations in the Bush River north of the Railroad Bridge near the mouth of Otter Point Creek. Work will be conducted until **1 Mar 2021**. The vessel MISS ROSE and Dredge WOLVERINE will be on scene and may be contacted on VHF-FM channel 16. For more information or questions, contact Phil Cianelli at 443-807-9110. Chart 12247

MD – UPPER CHESAPEAKE BAY – ELK RIVER – DREDGING

Great Lakes Dredge and Dock Company will be conducting dredging operations in the Upper Chesapeake Bay and Elk River in the following approximate position 39° 31' 32.36" N, 75° 52' 21.54" W to 39°16'13.71"N, 76°17'48.08"W. Work will be conducted from 6 Nov to **31 Dec 2020**. The following equipment will be on scene in addition to their tending and towing tugs, Clamshell Dredge 54, Clamshell Dredge 55, Unloader #2, Booster Reggie, Survey Vessel Blue Witch, and Scows GL - 601, 602, 701, 702, 61, and 65. Contact equipment on scene on VHF-FM Channels 5, 13 and 16. For more information or questions, contact Johan Van Bladel at 630-235-9612. Chart 12274

DC – POTOMAC RIVER – MATTAWOMAN CREEK TO GEORGETOWN – ANACOSTIA RIVER – MARINE CONSTRUCTION OPERATIONS

Construction of the new Frederick Douglass Memorial (South Capitol Street) Bridge across the Anacostia River in Washington, DC continues into **2022**. Work is conducted Monday through Saturday, 7 am to 7 pm, with intermittent night work and currently consists of: 1. The temporary West Trestle, which extends from the shoreline eastward to the center of the federal navigation channel and includes new Bridge Pier 1 and the western portion of the new bridge superstructure. The western half of the federal navigation channel, approximately 150 feet, is currently restricted to navigation. This area is marked with two orange and white information and regulatory marker buoys labeled "Danger" that are placed approximately 85 yards upstream of the bridge. 2. The temporary East Trestle, which extends from the shoreline westward to the eastern limit of the navigation channel and includes new Bridge Pier 2 and the eastern portion of the new bridge structure. This area is marked with two orange and white information and regulatory buoys labeled "Danger" with the standard 'Exclusion' diamond symbol that are placed approx 85 yards upstream of the bridge. The federal navigation channel east of the center pier (eastern half), approximately 150 feet wide, remains available for navigation. A vessel/barge may be intermittently positioned within the channel. Mariners intending to transit this area should contact the vessels MS. BECKY or CLAIRE MARIE for passing arrangements. Chart 12289

VA – CHINCOTEAGUE INLET TO GREAT MACHIPONGO INLET – WALLOPS ISLAND – DREDGING AND BREAKWATER CONSTRUCTION

Continental Heavy Civil Corp will be conducting a Breakwater and Beach Nourishment project at Wallops Island in Accomack County VA. Operations will begin on 25 Mar 2020 and continue until **Feb 2021**. The vessels CAPTAIN BEAU and HEIDI will be on scene. The beach nourishment project will be along the beach front inside the NASA base. The construction of six off shore stone breakwaters will be directly in-front on the newly placed sand. The project will include, barging material from Cape Charles Terminal to Wallops Island for the installation of the stone breakwaters. Project Coordinates are 37°51'10.06"N, 75°27'41.12"W. Contact Francisco J. Juelle for more information at 787-238-3243 or fjuelle@chcivil.com. LNM 1120 Chart 12210

VA – CHESAPEAKE BAY ENTRANCE – CHESAPEAKE BAY BRIDGE TUNNEL – MARINE OPERATIONS

Chesapeake Tunnel Joint Venture will continue Tug, Crane and Barge operations near the existing tunnel protection berms for Islands 1 and 2. This work will not impede the navigational channel. A crane barge may be held in place by way of spuds and at other times it may be held in place by a six point anchoring system or made fast to several steel mooring piles. Buoys will be attached to the anchors so that the anchors may be moved as the crane barge advances. Buoys will be illuminated at night by one second flashing white lights and the barges will be illuminated by steady white lights on all corners. The steel piles will be illuminated at night by white lights. The steel piles and trestle will be positioned west of Island #1 approximately 125 feet and extending north of the fishing pier approximately 1000 feet. The ROBERT T and ANGELINA AUTUMN be on VHF-FM 13 and 16. Charts 12222

VA – LYNNHAVEN BAY – LINKHORN BAY – BRIDGE CONSTRUCTION

Allan Myers is conducting road widening and bridge replacement on Laskin Road in Virginia Beach, VA until **Oct 2022**. Bridge passes over Great Neck Creek. A cofferdam and turbidity curtains are installed at the site. For more information contact Pat Robinson at 610-960-3139. Chart 12222

VA – HAMPTON ROADS – HAMPTON ROADS BRIDGE TUNNEL (HRBT) – CONSTRUCTION

The second phase of the Hampton Roads Connector Partners construction will begin on the west side and parallel with the Hampton Roads Bridge Tunnels, and will start at the north side at the Hampton Roads land side extending to the south side at the Willoughby land side. At any given time several crane and barges along with material barges as well as the tugs Uncle Mike, Robert T, Angelina Autumn, Miss Morgan and the Seaward 8, Seaward 9 and the Seaward 12. The following crew boats will be on site Seaward 10 Seaward 5 and the Brittany Lynn along with several outboard motor type safety vessels. All of the job site vessels will be standing by on VHF channels 13 & 16. This notice to mariners will be updated from time to time as the scope of the project increases. All barges will be lighted at night by solid white lights on their four corners. All floating mooring buoys shall be lighted with flashing white lights. All mooring piles will be lighted with solid white lights. All mariners should remain a safe distance away from all buoys and or mooring piles. For more information or questions contact Shannon Gresham 757-685-3392, Kareem Myers 757-256-9715. Chart 12245

VA – HAMPTON ROADS – NORFOLK NAVAL STATION – DREDGING

The Dredge ESSEX and attendant plant and equipment will commence mobilization operations in Hampton Roads on or about October 22, 2020. Pipeline laying operations will commence first between the Craney Island Disposal Area and Norfolk Naval Station in the vicinity of Norfolk Harbor Reach and the Craney Island Flats. A submerged pipeline will be placed from the northeast corner of Craney Island to the western edge of the Norfolk Harbor Channel in the vicinity of Elizabeth River Channel Lighted Buoy 8 (LLNR 9500). The ESSEX will then commence dredging a trench across Norfolk Harbor Channel, on or about October 27, 2020. The trench dredging should take approximately 2 days. Once completed, a submerged pipeline will be placed in the trench and terminate at the head of Norfolk Naval Station Pier 9. The ESSEX will then perform dredging within the Norfolk Naval Station. The project is expected to continue until approximately January 20, 2021. The Dredge Operator will standby on channels 13 and 16 VHF-FM. Traffic should call 30 minutes prior to expected time of passage. For any emergencies, the dredge operator can be reached at 757-353-0455. Chart 12245

VA – HAMPTON ROADS – CRANEY ISLAND REACH – LAMBERTS POINT PIER – DREDGING

Maintenance dredging operations on behalf of Norfolk Southern will commence on or about 12 October near the intersection of the Craney Island Reach and Lambert's Point Pier 6, in the vicinity of 36° 52' 47.3736" N, 76° 19' 55.7796". Loaded scows will be towed from this location to the Unloader #2 located at the Craney Island Dredge Containment Facility for offloading on a daily basis and a 16" submerged pipeline will be placed on the sea bottom from the Unloading Barge into the placement Facility. The dredge XAVIER will be dredging the area with the assistance of a Tender Tug, a Towing Tug, and three scows. All vessels and crew will monitor VHF-FM channels 13 and 7 during the project execution. Dredging and unloading operations will continue daily until the estimated completion date of **14 Nov 2020**. For questions or more information, contact Adam Dondero at 443-695-3788. Chart 12245, 12253

VA – ELIZABETH RIVER – WESTERN BRANCH – BRIDGE CONSTRUCTION

Until **Mar 2023**, McLean Contracting will be conducting bridge demolition, and replacement of the Churchland Bridge on the Western Branch of the Elizabeth River. Signs have been installed on both sides of the bridge worded "OVERHEAD BRIDGE CONSTRUCTION 500 FEET AHEAD". A temporary pile crane trestle will be extending approximately 600ft from either shoreline on the North side of the bridge. Barges and tugs will be on scene throughout the project and may be contacted on VHF-FM Channels 03, 13 and 16. For information, contact Scott White at 757-641-2132. LNM 2320 Chart 12253

VA – ELIZABETH RIVER – PORTSMOUTH WATERFRONT – NORTH STREET FERRY LANDING TO TIDWATER YACHT MARINA – SEAWALL CONSTRUCTION

Crofton Construction will be conducting repairs to the seawall located in the Elizabeth River at the following locations: N36° 50'20" and W76 °17'45" and N36° 50'25" and W76 °17'46". Beginning November 09, 2020 and continuing until January 31, 2021 or until complete. Construction operations will include, barge and crane operations, in conjunction with general marine construction. Barges and vessels will be moored on site with employees working over the side on small floats at times along with crew boats. The construction equipment will be confined to the barges, with small crew boats, working in the vicinity. Vessels are requested to proceed in this area with caution and causing no wake. Crews will be monitoring VHF-FM Channels 13 & 16. For more information or questions, contact Olga Mileyko at 757-397-1131. Chart 12253

VA – HAMPTON ROADS – ELIZABETH RIVER – NEWPORT NEWS CHANNEL – DREDGING

END DATE EXTENDED. Cottrell Contracting Corporation of Chesapeake, Virginia Dredge LEXINGTON will be conducting dredging operations in various locations within the Norfolk Harbor Federal Channel. Dredging will be between Elizabeth River Channel Lighted Buoy 1ER (LLNR 9445) and Elizabeth River Channel Lighted Buoy 25 (LLNR 9710) and in the Newport News Channel between Newport News Channel Lighted Buoy 2 (LLNR 10840) and Newport News Channel Lighted Buoy 10 (LLNR 10875). The dredging will continue until **01 Dec 2020**. Chart 12222

VA - NORFOLK HARBOR AND ELIZABETH RIVER - SOUTHERN BRANCH OF ELIZABETH RIVER – I-64 HIGH RISE BRIDGE

An engineering firm, on behalf of Virginia Department of Transportation are performing bridge construction at I-64 High Rise Bridge over Elizabeth River Southern Branch, mile 7.1, in Chesapeake, VA. Mariners should expect construction activity and related equipment in the vicinity of the bridge 24 hours a day; 7 days a week. A crane barge is currently being used within the navigation channel to complete the final stages of bridge fender system work and is removed from the channel at the end of each shift. Work vessels may be reached on VHF-FM channel 13. The project manager can be reached at (757) 579-8400. Mariners should use caution and proceed at a safe speed to minimize wake for work vessels when transiting the area. Should you have any questions or concerns regarding this matter, contact US Coast Guard Sector Virginia Waterways Management Division at 757-668-5580 or email at virginiawaterways@uscg.mil. Chart 12253

VA – JAMES RIVER – NEWPORT NEWS TO JAMESTOWN ISLAND – DREDGING

Cottrell Contracting Corporation of Chesapeake, Virginia Dredge MARION has completed dredging in Dancing Point - Swann Point Shoal Channel and will now be conducting dredging operations in the James River in the Tribell Shoal and Goose Hill Channels until **1 Feb 2021**. Chart 12251

VA – YORK RIVER - PAMUNKEY RIVER – TRANSMISSION LINE REPLACEMENT

STANTEC on behalf of Dominion Energy will be rebuilding an existing overhead transmission line which crosses the Pamunkey River approximately 6.5 miles west northwest of West Point, VA. Work will consist of the removal and replacement of five transmission structures within the Pamunkey River and adjacent tidal marsh. All new structures will be located outside the navigational channel. One existing structure, 224/228 is located within the river. Construction will begin on Sep 22, 2019. During the wire pulling operation, two boats will be actively patrolling the waterway and making contact with any vessel traffic. Barges will be moored in the Pamunkey River outside of the navigational channel when not actively working. Chart 12244

VA – RAPPAHANNOCK RIVER – CABLE CROSSING INSTALLATION

Construction activities by Croman Construction for the for Dominion Energy Virginia Rappahannock River Cable Crossing will continue until **Apr of 2021**, east of the VA Route 3 Rappahannock River Bridge in the vicinity of 37 37 01.655N, 076 25 44.9693W (South Platform) and, 37 37 55.1326N, 076 24 52.724W (North Platform). The Crane Barges Xavier and CKCC 495 will be performing the construction activities supported by a Tender Tug, a Towing Tug, and material barges. All vessels and crew will monitor VHF channels 13 and 7. For more information, contact James Matters 410-320-7534. Chart 12237

NC – OREGON INLET – BONNER BRIDGE - ARTIFICIAL REEF DEPLOYMENTS

North Carolina Division of Marine Fisheries will be conducting bridge material deployments at several artificial reefs located offshore of Oregon Inlet. Material will be deployed from a barge and tugboat, which will have limited maneuverability while offloading. Deployments will take 2-3 hours each. For more information, contact Jordan Byrum at 252-808-8036 or at jordan.byrum@ncdenr.gov. The following artificial reefs will be used. AR-130 (36° 00.296'N, 75° 31.957'W), AR-140 (35° 56.718'N, 75° 31.965'W), AR-145 (35° 54.017'N, 75° 23.883'W), AR-160 (35° 43.888'N, 75° 26.771'W) Chart 12204

NC – HATTERAS INLET – CONSTRUCTION AREA

NCDOT is performing construction work in Hatteras Inlet on the shoreline near the Ocracoke North Ferry Terminal in approximate position 35-11'29"N, 075-46'48"W. Mariners are advised to travel at no wake speeds and use caution while navigating this area. NC BNM 311-19

NC – PAMLICO SOUND – OUTER BANKS – US 12 - BRIDGE CONSTRUCTION

Construction will take place on the new US-12 Bypass Bridge (also known as Jug Handle) from Jan 2019 through **May 2021** on the Outer Banks of NC. This bridge extends approximately 2.5 from the southern end of the Pea Island National Wildlife Refuge over the Pamlico Sound into Rodanthe. The air draft along the new bridge during construction will be restricted to 14 feet. <https://www.ncdot.gov/projects/nc-12-rodanthe/Pages/default.aspx> Chart 12204

NC – INTRACOASTAL WATERWAY – NEUSE RIVER TO MYRTLE GROVE SOUND – DREDGING

Continuing until approximately 15 Nov 2020 Weeks Marine Inc. will install a dredging pipeline and will be mobilizing equipment to the staging area located in the Banks Channel, NC.

Staging Area will be bound by the following approximate positions:

34°21'11.90"N, 77°39'14.81"W, 34°21'9.57"N, 77°39'11.40"W, 34°21'22.68"N, 77°38'54.75"W, 34°21'25.17"N, 77°38'56.94"W

Starting approximately 15 November 2020 and continuing until approximately **10 Feb 2021**, Weeks Marine hydraulic dredge BORINQUEN will be operating in the Topsail Creek, Cut Through and Banks Channel near Topsail Beach, NC.

Work limits for borrow area at "Topsail Creek/ Cut Through" will be bound by the following approximate positions:

34°21'12.91"N, 77°41'5.75"W, 34°21'46.85"N, 77°40'9.63"W, 34°20'6.02"N, 77°38'54.23"W, 34°19'36.46"N, 77°39'41.87"W

Work limits for borrow area at "Banks Channel" will be bound by the following approximate positions:

34°20'59.32"N, 77°39'44.49"W, 34°20'37.83"N, 77°39'25.11"W, 34°23'7.26"N, 77°36'17.18"W, 34°23'16.50"N, 77°36'27.01"W

Work limits for placement area will be bound by the following approximate positions:

34°20'39.81"N, 77°38'45.39"W, 34°20'53.02"N, 77°39'1.49"W, 34°23'25.93"N, 77°35'21.57"W, 34°23'37.47"N, 77°35'34.35"W

Once underway, dredging operations will continue on a twenty-four hour per day, seven days per week basis. The dredge will monitor VHF-FM channels 13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. NC – CAPE FEAR RIVER – DREDGING

Southern Dredging Company dredge BRUNSWICK will be working in the Cape Fear River Channel between the Cape Fear Memorial Bridge and the Upper and Lower Brunswick Ranges in the vicinity of Cape Fear River Channel Lighted Buoy 58 (LLNR 30840) commencing on or about 14 October 2020. The Dredge will operate on a 24 hour per day, 7 day per week basis until approximately **31 Jan 2021**. Dredged material will be transported by pipeline to the Eagle Island disposal site on the West side of the river. To ensure safe passage, boaters should establish contact with the dredge on VHF-FM channels 13 and 16. For more information or questions, contact Neil Rodgers 843-729-1269 or Michael Kitchell 843-830-1015.

Chart 11537

SUMMARY OF MARINE EVENTS AND FIREWORKS DISPLAYS IN THE FIFTH COAST GUARD DISTRICT

NEW OR UPDATED INFORMATION

New, updated or very important information in this enclosure will be highlighted in yellow.

MD – CHESAPEAKE BAY – WICOMICO RIVER – WICOMICO CREEK – LIGHTED BOATS PARADE

An annual lighted boats parade is scheduled to occur in the upper Wicomico River on **November 30, 2019**, between 5:30 p.m. and 7:45 p.m. The holiday season boat parade consists of approximately 20 power vessels (18-60 feet in length) operating on a designated route that will start at the Port of Salisbury, MD at 5:30 p.m., transit downbound in the Wicomico River, and finish at the Wicomico Yacht Club in Wicomico Creek at 7:45 p.m. Interested mariners may contact the Wicomico Yacht Club Fleet Captain via marine band radio VHF-FM channels 16 and 72, if necessary. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region at (410) 576-2674 or (410) 576-2693. Chart 12261

MD – CHESAPEAKE BAY – COVE POINT TO SANDY POINT AND SEVERN RIVER – SAILING REGATTA

An annual sailing regatta is scheduled to occur in the Chesapeake Bay near Annapolis, MD **Oct 31 and Nov 01, 2020**, between 10 a.m. and 5 p.m. Up to 25 auxiliary sailing vessels (23 feet in length) will compete along two drop-mark race courses located near the mouth of the Severn River. On Saturday, the first race of the day will start after 11 a.m., and on Sunday, the first race of the day will start after 10 a.m. A maximum of eight races are scheduled over both days. Race Committee officials can be contacted on board the Signal Boat via marine band radio VHF-FM channels 16, 13, 09 and 73. More information on this Eastport Yacht Club event can be obtained at <http://eastportyc.org/fallbrawl>. For any comments or questions, contact Coast Guard Sector Maryland-National Capital Region, Waterways Management Division, at (410) 576-2674 or (410) 576-2693. Charts 12270, 12283
