LOCAL NOTICE TO MARINERS

District: 7

Week: 20/20

LITTLE RIVER, SOUTH CAROLINA TO ECONFINA RIVER, FLORIDA (INCLUDES PUERTO RICO AND THE U.S. VIRGIN ISLANDS)

Commander, Seventh Coast Guard District (dpw)
Brickell Plaza Federal Building
909 SE 1st Avenue, Room 406
Miami, Florida 33131-3028
Telephone: (305) 415-6750 or Fax: (305) 415-6757

LNM Article Entries and Updates: D07-SMB-D7-LNM@uscg.mil
Proposed Changes Comments: D07-SMB-DPWPublicComments@uscg.mil

Aids to Navigation discrepancies (missing, damaged, extinguished or off-station), shoaling or hazard to navigation and Bridge discrepancies (including lighting) report to the nearest Coast Guard unit.

-DISTRICT 7 (305) 415-6800
-SECTOR CHARLESTON (843) 740-7050
-SECTOR JACKSONVILLE (904) 714-7557
-SECTOR MIAMI (305) 535-4472

-SECTOR ST PETERSBURG (727) 824-7506
-SECTOR SAN JUAN (787) 729-2041

BROADCAST NOTICE TO MARINERS

Navigation information of immediate concern to the Mariner, and promulgated by the following broadcasts:

- CCGD7 (D7) BNM 169-20 to 180-20
- SECTOR CHARLESTON (CHA) BNM 111-20 to 117-20
- SECTOR JACKSONVILLE (JAX) BNM 090-20 to 094-20
- SECTOR MIAMI (MIA) BNM 061-20 to 064-20
- SECTOR KEY WEST (KWT) BNM 025-20 to 025-20
- SECTOR ST PETERSBURG (STP) BNM 370-20 to 380-20
- SECTOR SAN JUAN (SJN) BNM 016-20 to 016-20

TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition: None

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

HURRICANE INFORMATION:

The hurricane season extends from June 1st through November 30th. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Public Advisory (TCP) is issued every six hours, with intermediate bulletins provided as needed. For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life.

Four alerts are issued:

- (a) TROPICAL STORM WATCH – An announcement that sustained winds of 34 to 63 knots (39 to 73 mph or 63 to 118 km/hr) are possible within the specified area within 48 hours in association with a tropical, subtropical, or post-tropical cyclone.
- (b) TROPICAL STORM WARNING – An announcement that sustained winds of 34 to 63 knots (39 to 73 mph or 63 to 118 km/hr) are expected somewhere within the specified area within 36 hours in association with a tropical, subtropical, or post-tropical cyclone.

(c) HURRICANE WATCH – An announcement that sustained winds of 64 knots (74 mph or 119 km/hr) or higher are possible within the specified area in association with a tropical, subtropical, or post-tropical cyclone. Because hurricane preparedness activities become difficult once winds reach tropical storm force, the hurricane watch is issued 48 hours in advance of the anticipated onset of tropical storm force winds.

d) HURRICANE WARNING – An announcement that sustained winds of 64 knots (74 mph or 119 km/hr) or higher are expected somewhere within the specified area in association with a tropical, subtropical, or post-tropical cyclone. Because hurricane preparedness activities become difficult once winds reach tropical storm force, the warning is issued 36 hours in advance of the anticipated onset of tropical-storm-force winds. The warning can remain in effect when dangerously high water or a combination of dangerously high water and waves continue, even though winds may be less than hurricane force.

Additional information of interest to mariners is included in the Tropical Cyclone Forecast/Advisory (TCM) and the Tropical Cyclone Surface Wind Speed Probabilities (PWS) products. The TCM provides current and forecast storm positions, intensities, and wind fields out to 120 hours. The PWS provides probabilities of sustained wind speeds equal to or exceeding 34-, 50-, and 64-kt wind speed thresholds for select coastal and offshore locations.

LNM: 20/20

HURRICANE INFORMATION CONTINUED:

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished, or otherwise deemed discrepant as a result of hurricanes and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available. Port Hurricane Conditions are set up by the COTP and will change as the threat of severe weather increases, or as a storm approaches a specific COTP Area of Responsibility. For COTP-specific Port Hurricane Conditions, you should review information provided under the Port Directory tab of <http://homeport.uscg.mil> Condition 4 – Hurricane Seasonal Alert. 01 June–30 November; port status: open.

Condition Whiskey – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 72 hours; port status: open.

Condition X-Ray – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 48 hours; port status: open.

Condition Yankee – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 24 hours; port status: restricted; vessel/facility control measures in effect.

Condition Zulu – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 12 hours; port status: closed to all vessel traffic and waterside activities except for activities approved by the COTP.

Drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of Gale Force winds of 34 knots or greater. Extended closure periods may be authorized up to 8 hours prior to arrival of Gale Force winds to facilitate evacuation of land traffic. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of Gale Force winds.

LNM: 20/20

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

LNM: 01/20

INTERFERENCE WITH AIDS TO NAVIGATION

U. S. Code, Title 14, Part I, Chapter 5, § 84. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 81 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 83 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense. U. S. Code, Title 14, Part I, Chapter 5, § 84.

LNM: 01/20

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

The United States Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days

a week. The NIS provides information on the current operational status, effective policies, and general information on GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via-e-mail subscription through the USCG Navigation Center website (<https://www.navcen.uscg.gov/gps/status/default.htm>). In addition, the NIS investigates all reports of degradation or loss of GPS and DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following Phone:(703) 313-5900, Email: webmaster@navcen.uscg.mil or on the World Wide Web at <https://www.navcen.uscg.gov>.

LNM: 01/20

U.S. ARMY CORPS OF ENGINEERS DISTRICT SITES, CHARLESTON AND JACKSONVILLE

The U.S. Coast Guard strongly recommend that mariners regularly check for any updates and notices on the U.S. Army Corps of Engineers District Sites "Charleston and Jacksonville" specifically regarding Notices to Navigation, Channel Condition Reports/Hydrographic Maps and Lock Hours/Notices.

U.S. Army Corps of Engineers Charleston District –

LNM: 06/19

NATIONAL GEOSPATIAL- INTELLIGENCE AGENCY POSTS USCG LIGHT LISTS TO NGA MARINE SAFETY INFORMATION WEBSITE

Effective immediately with NGA NtM 16/2020 (18 APR 2020), NGA will now be posting fully corrected versions of the USCG Light List (LL) to their Maritime Safety Information (MSI) webpage and will suspend issuing corrections to the USCG LL within the NGA NtM. The USCG NAVCEN provides PDF and XML versions of their weekly corrected Light List publications available at

<https://www.navcen.uscg.gov/?pageName=lightListWeeklyUpdates>. USCG NVIC 01-16 allows for publications to be kept in electronic format as long as the publication updates are reasonably available. To align with the NVIC, NGA will match the USCG format and will start posting the fully corrected USCG Light List PDFs on their website at <https://msi.nga.mil/Publications/USCGLL>. This will allow the mariner to download a corrected version of the USCG Light List instead of applying notice corrections to the baseline PDFs. Effective immediately, NGA will stop incorporating individual USCG Light List corrections in their weekly Notice to Mariners. Additionally, the "SEARCH ONLINE DATABASE" query function on NGA's MSI webpage will no longer be maintained. Until it can be removed from the MSI webpage, mariners are directed to only use the updated USCG LL PDFs for all light information. The specific USCG Light List corrections can continue to be viewed in each USCG Local Notice to Mariner by District at: <https://www.navcen.uscg.gov/?pageName=InmMain>. Please contact the Maritime Safety Office or the Maritime Light Team at Maritime_Lights@nga.mil with any questions.

LNM: 15/20

ATLANTIC OCEAN –EAST COAST - OFFSHORE: SURFACE WAVE GLIDER DATA COLLECTION

ThayerMahan, Inc. will be transecting one autonomous, unmanned maritime vehicle (Wave Glider-WG) from approximately 100NM east of Port Canaveral, FL to about 100NM east of Cape May, NJ. The transit will commence on or about May 27, 2020 and is expected to terminate on or about August 27, 2020. Operations will run 24/7 and consist of scientific ocean data collection. The Wave Glider carries no fuel, lubricants or hydrocarbons. It is wave powered and remotely attended from the ThayerMahan Operations Center, moving at speeds of about 1kt, and is designed to automatically give way if encountered by a vessel transmitting AIS. It is approximately 6.5' x 2' (surfboard size), copper in color, with a contact plaque and mast extending 3' above the water surface. Mariners are advised to requested to transit the area with caution and to remain a safe distance from the wave glider. Further information contact the ThayerMahan Operations center at (860) 969-3171.

LNM: 20/20

ATLANTIC OCEAN - GEORGIA - FLORIDA - JACKSONVILLE: U.S. NAVY EXERCISES HAZARDOUS TO SURFACE VESSEL

The following areas will contain exercises hazardous to surface vessels in the Jax/Chasnoa during May 18-24, 2020. Mariners are advised to avoid these areas:

Date: 18-24 MAY 0000-2359 (LCL)

30-45N2 80-56W9 GUNEX AREA

LNLM: 20/20

ATLANTIC OCEAN – FLORIDA – CAPE CANAVERAL: SPACE LAUNCH ZONES (VIRTUAL- AIS PRIVATE AID TO NAVIGATION)

The U.S. Coast Guard has approved the use of a Virtual Automatic Identification System Private Aid to Navigation (V-AIS PATON) to mark a restricted navigation area during a space launch. The Coast Guard authorized the Space Exploration Technologies Corporation, better known as SpaceX, to use Virtual-AIS PATONs to inform mariners of non-charted restricted zones around launch areas. While the Coast Guard does not approve Virtual-AIS PATON for all restricted areas, particularly charted ones, the space launch zones are non-charted, dynamic and temporary. Safety zones designed to keep vessels from entering the launch area while an active rocket launch is taking place.

The Captain of the Port Jacksonville, FL will activate Safety Zone "B" located near Cape Canaveral, as described in 33 CFR 165.775(a)(2), 45 minutes prior to the opening of the scheduled launch window. At that time, SpaceX will transmit Virtual AIS aids marking the corners of the active safety zone. The virtual-AIS aids will remain transmitting until the Captain of the Port Jacksonville has deactivated the safety zone. The Virtual-AIS aids will be labeled:

N 28° 48.8' W 80° 28.9' (28.813333 -80.481667) N1*X*33CFR165.775 (A) (2), MMSI# 993663027
N 28° 29.7' W 80° 18.9' (28.495000 -80.315000) E2*X*33CFR165.775 (A) (2), MMSI# 993663028
N 28° 29.7' W 80° 31.6' (28.495000 -80.526667) S3*X*33CFR165.775 (A) (2), MMSI# 993663029
N 28° 40.1' W 80° 38.4' (28.668333 -80.640000) W4*X*33CFR165.775 (A) (2), MMSI# 993663030

If a vessel equipped with AIS is determined to be entering the launch hazard area, an addressed safety message 14 with the text "REGULATED AREA 33 CFR 165.775 ACTIVE STAY CLEAR" will be transmitted to the vessel. All provisions of the safety zone remain in effect; no person or vessel may enter, pass through or remain within the safety zone unless authorized by the Captain of the Port. Mariners are required to contact the Coast Guard via VHF FM channel 16 to arrange for this authorization.

LNLM: 17/20

ATLANTIC OCEAN - FLORIDA - CAPE CANAVERAL: EASTERN RANGE OP# X0056 FALCON 9 BLAST DANGER AREA

The Blast Danger Area is activated in conjunction with Launch Vehicle Testing and is a hazard within the listed coordinates:

2838 0.62N 8036 58.76W
2839N 8035W
2838N 8033W
2837N 8033W
2836N 8035W
2836N 8035 11.05W

Date/Time/Duration of test: 22-23 May 20 / 1952Z - 0317Z

LNLM: 20/20

ATLANTIC OCEAN - FLORIDA - CAPE CANAVERAL: EASTERN RANGE HAZARDOUS OPERATION OP# X0053 FALCON 9 CREW DEMO-2

Hazardous operation within the following coordinates;

Hazard periods for primary launch day and backup launch days;
Primary launch day: 27 / 2022Z thru 27 / 2107Z May 20. Preferred T-0 is 2032Z.
Backup launch day (1): 30 / 1911Z thru 30 / 1956Z May 20. Preferred T-0 is 1921Z.
Backup launch day (2): 31 / 1849Z thru 31 / 1934Z May 20. Preferred T-0 is 1859Z.

LMN: 20/20

ATLANTIC OCEAN - FLORIDA - PALM SHORES TO WEST PALM BEACH: USN OPERATIONS

The US Navy will conduct offshore testing from April 27 - July 31, 2020 with a manned submersible vehicle piloted by two personnel. The submersible will transit on the surface from Intracoastal Waterway (ICW) in vicinity of Riviera Beach west of Peanut Island, south on the ICW to the Port of Palm Beach turning basin. From the turning basin the submersible will be towed by a RHIB out the Lake Worth inlet then south to the operational area. Testing will occur from Lake Worth inlet south to Boynton Inlet from near shore up to 10 miles offshore. Testing may occur 24 hours daily, weekdays only. During this time the submersible will be accompanied by 2 surface RHIBs displaying amber flashing lights. Dive operations with scuba divers in the water may occur anytime during the testing and RHIBs will display diver down flags in the vicinity of scuba divers. RHIBs will be monitoring VHF CH16. Mariners are advised to transit the area with caution and maintain 200 yards clearance from RHIBs and dive balls.

Operational area:
N26 46.248 W80 01.910
N26 46.248 W79 50.763

ATLANTIC OCEAN - FLORIDA - OFFSHORE FORT LAUDERDALE: USN OPERATIONS ERMA-DERMA

The United States Navy, South Florida Ocean Measurement Facility (SFOMF) will be conducting operations in the water immediately south and east of Port Everglades inlet. The operations are scheduled within a period beginning on 0500R May 28, 2020 to 2000R June 2, 2020. A naval vessel will be conducting maneuvers between ¾ NM to 4 NM off shore, and from ½ NM south of the Port Everglades inlet to 2.5 NM south of the Dania Beach Pier. The vessel will be restricted in maneuverability and these operations are considered a hazard to navigation. All traffic must remain clear of the area bounded by the coordinates below for the duration of the operations. Local law enforcement and Tow Boat US small craft will provide range security and range clearance for the naval vessel during these operations. Ships entering Port Everglades are requested to enter from the northeast thereby avoiding the waters south of the channel. To allow for the safe operation of the naval vessel, all maritime traffic transiting the area is requested to stay 5 NM east of PEV or inshore of the Barracuda Reef mooring buoys. Any concerned vessels may contact U.S. Navy Fort Lauderdale on VHF Channel 16.

WEST INDIES – PUERTO RICO - (ISLA DE VIEQUES) IVO BAHIA SALINA DEL SUR & BAHIA ICACOS: NAVY OPERATIONS

The U.S. Navy will be conducting underwater operations in vicinity of Bahía Salinas del Sur, Bahía Icacos, and the surrounding areas in Vieques, PR. Operations will occur from March 2, 2020 through May 29, 2020 from 7:00 a.m. through 4:00 p.m. daily. Mariners are advised to remain at least 3,074 feet from coordinate boundaries. The Navy Dive Ops Safety Officer can be reached via VHF channel 16 or the Navy Site Manager, Ms. Maria Danois at (787) 232-3801.

Encompassed by a line connecting the following points beginning: 18°08'56.48"N, 065°20'10.69"W, thence to 18°09'10.72"N, 065°20'04.11"W, thence to 18°08'50.19"N, 065°17'05.78"W, thence to 18°08'05.79"N, 065°16'16.71"W, thence to 18°07'38.60"N, 065°17'45.95"W, thence to 18°07'38.60"N, 065°17'45.94"W, thence to 18°07'23.72"N, 065°17'58.33"W, thence to 18°07'18.76"N, 065°18'29.64"W, thence to 18°07'34.47"N, 065°18'31.81"W back to the beginning point.

FLORIDA - AICW - PALM SHORES TO WEST PALM BEACH - LAKE WORTH NORTH: USN OPERATIONS.

US Navy will conduct testing from April 27 – July 31, 2020 with a manned submersible vehicle piloted by two personnel. Testing may occur 24 hour daily, weekdays only. The vehicle will transit on the surface escorted by 2 RHIBs with flashing amber lights from intracoastal in vicinity of Riviera Beach west of Peanut Island, north on the intracoastal waterway, transiting under Blue Heron Bridge to approximately 0.5 miles north of the bridge. Operations will take place west of the ICW and may include scuba diving operations. The RHIBs will display diver down flags when divers are in the water. RHIBs will be monitoring VHF CH16. Mariners are advised to give wide berth and minimum wake while submersible is transiting on the ICW.

Operational area:

- N26 47.902 W80 02.618
- N26 47.267 W80 02.601
- N26 47.266 W80 02.714
- N26 47.908 W 80 02.807

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR						
(Temp) ADD	NATIONAL DOCK CHANNEL BUOY 3				CGD01	074-02-48.001W
Corrective Action	Green can	Object of Corrective Action		Position		

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

Approved Project(s)
None

Project Date **Ref. LNM**

Advance Notice(s)

SEACOAST – GEORGIA - TYBEE ISLAND TO DOBOY SOUND

The following changes have been approved to the Aids to Navigation System in the Savannah River:

To facilitate the Savannah River Entrance Channel expansion, Tybee LB T (LLNR 350/4530) will be relocated approximately 7.1NM seaward of its current position. In addition (6) physical lighted buoys and (4) V-AIS signals will be established to mark the outer most boundaries of this new channel leg. Positions of all the aids to navigation and V-AIS signals will be published in the Chart and Light List Corrections Section of this publication upon installation. This new channel leg will be named Savannah Entrance Channel.

Chart 11509 LNM: 15/20

STRAITS OF FLORIDA – FOWEY ROCKS TO ALLIGATOR REEF

The following change has been approved to the Aids to Navigation System in the Straits of Florida:

Pacific Reef Light (LLNR 935) optic to be upgraded to a more reliable LED (Light-emitting diode) lantern and the nominal range reduced to 7NM.

Charts: 411 11013 11450 11460 11462 11465 11466 11469 LNM: 33/14

STRAIGHTS OF FLORIDA – SOMBRERO KEY TO DRY TORTUGAS – LOOE REEF

The following change has been approved to the Aids to Navigation System in Looe Key:

Pelican Shoal Light 26 (LLNR 1020) in position 24-30-21.903N / 081-35-59.070W will be permanently discontinued

Chart 11452 LNM: 20/18

SOUTH CAROLINA – CHARLESTON HARBOR – CHARLESTON HARBOR NORTH CHANNEL

The following changes has been approved to the Aids to Navigation System to the Bennis Reach Range Optics located in the Charleston Harbor North Channel.

Both range structures will be converted to solar power vice A/C power and remain day night optics to provide a more reliable and modern range optic.

Bennis Reach Range Front Light (LLNR 2505.5) in position 32-47-17.763N/079-55-28.611W will be changed from Fixed Red characteristic to a Quick Flash Red characteristic.

Bennis Reach Range Rear Light (LLNR 2506) in position 32-47-23.927N/079-55-42.577W will be changed from a Fixed Red characteristic to an ISO R 6s characteristic.

Chart 11524

LNLM: 01/20

GEORGIA - SAVANNAH RIVER - KINGS ISLAND TURNING BASIN (UPDATE April 3, 2020)

The following aids have been temporarily discontinued to facilitate dredging operations by the Norfolk Dredging Company:

Kings Island Turning Basin Light 12 (LLNR 5055) in position 32-07-54.581N/081-08-04.510W
Kings Island Turning Basin Light 14 (LLNR 5060) in position 32-08-07.924N/081-08-14.144W

Estimate completion date of dredging by Norfolk Dredging Company is January 2021. Upon completion of dredge operations the aids will be rebuilt. All mariners are requested to exercise caution when transiting the area and contact any of the Norfolk Dredging Company vessels on scene via VHF-FM channels 13 and 16. (Ref: LNM 14/20)

Chart 11514

LNLM: 11/20

GEORGIA - OSSABAW AND ST. CATHERINES SOUND

The following changes have been approved to the Aids to Navigation System in Ossabaw Sound:

Ossabaw Sound North Channel Daybeacon 10 (LLNR 5760) and Ossabaw Sound North Channel Daybeacon 12 (LLNR 5770) will be changed to Ossabaw Sound North Channel Buoys 10 and 12 with same corresponding LLNR's. With moving shoals and a semi exposed area these conditions make it very difficult to service and rebuild fixed aids. Floating aids will allow the Coast Guard more flexibility when marking safe passage.

SOUTH CAROLINA - AICW - MYRTLE GROVE SOUND AND CAPE FEAR RIVER TO CASINO CREEK - LITTLE RIVER - WINYAH BAY

Due to a shifting shoal and rock hazards Little River-Winyah Bay Daybeacon 16A (LLNR 33670) will be changed to Little River-Winyah Bay Buoy 16A (LLNR 33670) and relocated to mark safe water.

Chart 11534

LNLM: 20/20

FLORIDA - AICW - TOLOMATO RIVER TO PALM SHORES - BANANA RIVER

The following changes have been approved to the Aids to Navigation System in the Banana River:

The U.S. Coast Guard will convert the fixed aids in the Banana River, south of the Canaveral Barge Canal, to floating aids. The current water depths prohibit the assigned maintenance vessel from repairing damage to the fixed piles. Upon becoming discrepant, these aids will be replaced with floating aids displaying similar characteristics.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted twenty-four (24) hours a day seven (7) days a week. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM channels.

LNM: 01/20

SEACOAST FLORIDA – PALM SHORES TO WEST PALM BEACH - LAKE WORTH: Mid-Town Segment and Phipps Ocean Park (Reach 7) Beach Renourishment (UPDATE April 24, 2020)

Weeks Marine will continue to mobilize pipeline and equipment to a staging area located east of Lake Worth Lagoon, Palm Beach, Florida until May 15, 2020. Dredging Operations will continue until approximately May 1, 2020. The submerged pipeline will be removed at the completion of dredging operations. Operations will occur 24 hours per day -7 days per week. Demobilization will occur until approximately 15 May 2020.(Ref: LNM 12/20, 15/20, 17/20)

The staging area for pipeline/equipment will be bound by the following approximate positions:

SEACOAST FLORIDA – PALM SHORES TO WEST PALM BEACH - LAKE WORTH: Mid-Town Segment and Phipps Ocean Park (Reach 7) Beach Renourishment (UPDATE April 24, 2020)

26°46'8.841"N, 80° 2'41.584"W
26°46'8.102"N, 80° 2'40.117"W
26°45'55.923"N, 80° 2'47.461"W
26°45'56.608"N, 80° 2'49.032"W

Any pipe and/or equipment that is broken out of this mooring area would be under power of a tug or multiple tugs and could be moved on demand. Dredge pipeline will be prepared in the staging area and placed offshore of Palm Beach shores and submerged into the designated pipeline corridors:

Pipeline Corridor 1 (Northern Reach): between 26°43'9.901"N, 80° 2'2.085"W and 26°43'14.661"N, 80° 1'38.860"W
Pipeline Corridor 2 (Center Reach): between 26°42'30.288"N, 80° 1'58.110"W and 26°42'28.282"N, 80° 1'39.393"W
Pipeline Corridor 3 (Southern Reach): between 26°41'38.820"N, 80° 2'0.923"W and 26°41'38.265"N, 80° 1'42.971"W

Dredged material will be transported from the borrow area and it will be pumped to the beach placement site through a combination of floating and submerged pipeline. The borrow area will be bounded by the following approximate locations:

26°47'11.950"N, 80° 1'7.931"W
26°48'11.102"N, 80° 1'8.711"W
26°48'10.713"N, 80° 1'35.505"W
26°47'11.814"N, 80° 1'35.353"W

Ingress/Egress Zone for Transit Between Borrow Area and Pipeline Corridors:

26°47'16.543"N, 80° 1'26.702"W
26°46'20.738"N, 80° 0'36.139"W
26°45'4.373"N, 80° 0'54.083"W
26°41' 8.058"N, 80° 0'41.159"W
26°41'6.598"N, 80° 1'15.108"W
26°41'25.290"N, 80° 1'46.195"W
26°43'0.885"N, 80° 1'40.746"W
26°44'42.303"N, 80° 1'52.051"W
26°46'11.217"N, 80° 1'47.252"W
26°47'16.543"N, 80° 1'26.702"W

The Hopper Dredge will monitor VHF channels 13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Further information contact the Project Managers on site:

ATLANTIC OCEAN – GEORGIA: Offshore Artificial Reef deployment at CCA-JL Reef.

GADNR, Georgia Department of Natural Resources intends to deploy a 52' steel vessel previously used as a shrimp-fishing vessel at CCA Reef between May 18 and June 18, 2020. The vessel will be trimmed down to an overall height of 36'. The CCA-JL Reef site is approximately 67' deep at the proposed location and has an approved clearance of -28' MLW. Material placements will not exceed this site's approved clearance. Deployments are conducted in favorable weather conditions and during daylight hours. The proposed material deployment location is 31.725047° Latitude, -80.677567° Longitude. GADNR will obtain GPS coordinates for specific material locations within CCA-JL Reef immediately post deployment, follow up with GADNR at (912) 280-6926 to acquire coordinates.

LNM: 20/20

ATLANTIC OCEAN – GEORGIA: Offshore Artificial Reef deployment at JY Reef.

GADNR, Georgia Department of Natural Resources intends to deploy a 180' steel vessel previously used as a Menhaden fishing vessel at JY Reef between May 18 and June 18, 2020. The vessel will be trimmed down to an overall height of 38'. The JY Reef site is approximately 69' deep at the proposed location and has an approved clearance of -28' MLW. Material placements will not exceed this site's approved clearance. Deployments are conducted in favorable weather conditions and during daylight hours. The proposed material deployment location is in a cluster at 31.608315° Latitude, -80.797796° Longitude. GADNR will obtain GPS coordinates for specific material locations within JY Reef immediately post deployment, follow up with GADNR at (912) 280-6926 to acquire coordinates.

STRAITS OF FLORIDA AND APPROACHES-STRAITS OF FLORIDA: Flows through the Straits of Florida, (7) Underwater Research Mooring Buoys (UPDATE: November 18, 2019)

The U.S. Department of State Bureau of Oceans and International Environmental and Scientific Affairs have approved the install of (8) Research Mooring Buoys stretching roughly from the Florida Keys to Cuba. Moorings labeled (EFL5, EFL6, EFL7 and EFL15) fall within the US Exclusive Economic Zone. The program aimed at measuring the flows between Cuba and Florida. The Research Vessel B/O Justo Sierra will be conducting marine scientific research studying the measurement of inflows/outflows of the Gulf and currents/temperatures. The research apparatus is anchored by a 2000lb weight and held vertical by a flotation balloon at 130ft below the surface. Mariners are to avoid close proximity, or any other interference of these buoy's data gathering function. The replacement moorings will occur pending funding. (Ref: LNM 34/16, 23/17, 30/18, 38/18, 31/19, 47/19)

STRAITS OF FLORIDA - FOWEY ROCKS TO ALLIGATOR REEF: Hazard to Navigation (UPDATE: September 10, 2015)

The U.S. Coast Guard received a report in 2013 of an S/V allision with Pacific Reef Light (LLNR 935). The vessel was located approximately 250 yards west of the structure and has 6ft of mast protruding above the water. The area surrounding the structure is a hazard to navigation. Mariners are urged to avoid the area. (Ref: LNM 50/13, 37/15)

Pacific Reef Light (LLNR 935) is extinguished. The aid was deemed unsafe to climb due to severe deterioration to the structure and ladder. A Temporary Light (TRLT) with FI Q W characteristics, with a 4NM range was placed on the NE corner of the aid approximately 8ft above the waterline. The TRLT may not be visible from certain angles depending on the mariners approach. (Ref: LNM 32/15)

Chart 11462

STRAITS OF FLORIDA - SOMBRERO KEY TO DRY TORTUGAS: Hazard to Navigation. (UPDATE: July 16, 2018)

Pelican Shoal Light 26 (LLNR 1020) is destroyed. The collapsed steel structure and wreckage is massive and poses a hazard to navigation. Wreckage is marked with a TRLB WR26, 5NM, displaying FL Q R characteristics in position 24-30-21.443N/081-35-59.412W. Mariners are advised to exercise extreme caution while transiting the area. (Ref: LNM 34/16, 29/18)

Chart 11434

LNM: 33/16

STRAITS OF FLORIDA – SOMBRERO KEY TO DRY TORTUGAS: FWC Temporary Lighted Buoys.

The Florida Fish and Wildlife Conservation Commission (FWC) is will be deploying three (3) lighted sonar buoy systems for approximately 1½ years to monitor fish spawning aggregations at Riley's Hump, Tortugas South Ecological Reserve. The buoys will be tethered to instruments that will allow FWC to remotely assess biomass, distribution, and seasonality of fish species in this important aggregation site. Tentative deployment date is May 15, 2019 and will remain on station until approximately October 31, 2020. Mariners are urged to use caution when transiting the area and be aware of equipment on the surface.

The three (3) lighted buoys will be equipped with a FI W 2s characteristics:
Lighted Buoy A in approximate position: 24-29-26.100N / 083-07-17.460W
Lighted Buoy B in approximate position: 24-30-04.140N / 083-07-56.640W
Lighted Buoy C in approximate position: 24-30-18.000N / 083-08-42.000W

SOUTH CAROLINA – CHARLESTON HARBOR – COOPER RIVER: Vertical Clearance Reduction on the Mark Clark I-526 Bridge.

Until further notice all mariners be advised the Mark Clark I-526 Bridge RACON Private aid (LLNR 2905.5) vertical clearance is less than the charted 155 feet due to the RACON sitting below, making the vertical clearance approximately 149.6 feet.

Chart 11524

LNM: 27/19

SOUTH CAROLINA – CHARLESTON ENTRANCE – CHARLESTON HARBOR: Post 45 Charleston Entrance Channel Maintenance (UPDATE May 11, 2020)

Great Lakes Dredge & Dock Company has commenced dredge operations February 15, 2018 in the Charleston Harbor Entrance Channel, South Carolina and will continue until approximately June 2022.

Dredging Operations by the Cutter Suction Dredges TEXAS and CAROLINA and support equipment will occur 24hrs/day at 7-days/week. Operations will occur from Charleston Harbor Channel LB 1 (LLNR 2370.1) to LB 16 (LLNR 2410). The Cutter Suction Dredge TEXAS is expected to commence dredging operations on April 22, 2020 in the Charleston Entrance Channel. The Cutter Suction Dredge CAROLINA is expected to continue dredging operations on May 15, 2020 in the Charleston Entrance Channel. Material will be pumped thru the 30" float hose (1800' length) connected to the Spider Barge GL 175. The Spider Barge will direct material into the scows, which will be towed using tugs to the placement areas. The 30" float hose will be marked with a flashing yellow light every 80' maximum. Multiple anchors are used to secure equipment in the work area(s) and surrounding vicinity. The anchors will be marked with yellow can buoys outfitted with flashing lights.

The MARY BENNET will be operating the Drag Barge GL-148 performing bed leveling operations. The Tug BREAK OF DAWN will also be performing dragging operations. Dredging expected to continue through September 30, 2020. The Tugs will tow the loaded scows and will place the dredged material in the Ocean Dredged Material Disposal Site (ODMDS) and Beneficial-Use Reefs. Commercial Anchorage B located adjacent to the South Channel and James Island within Charleston Harbor will be utilized throughout the project for periodically staging all vessels and waterside equipment, pipeline and pontoons.

SOUTH CAROLINA – CHARLESTON ENTRANCE – CHARLESTON HARBOR: Post 45 Charleston Entrance Channel Maintenance (UPDATE May 11, 2020)

The crew transfer vessels MUSKEGON RIVER and SAGINAW RIVER will transport crew and personnel daily from Salmons Dredging Marina located at 32° 49' 55"N, 79° 56' 31"W to the Dredges TEXAS and CAROLINA at their location at the time of transfer. Crew and material transfers will occur periodically between all equipment. The survey vessel PEARL RIVER will perform survey operations in all work areas. The vessels will be docked as needed at Salmons Dredging Marina located at 32° 49' 55"N, 79° 56' 31"W or Veterans Terminal – Zulu dock

To support safe dredging operations and monitor sea conditions a Wave Data Buoy will be deployed in the work area of the Charleston Entrance Channel. The Buoy is in approximate position 32-37-56.7488N/079-38-20.7561W displaying Fl Y 60s, 4M characteristics. The exact position of the Buoy is dependent on local tides and currents. Mariners are advised to exercise caution and remain clear of the area.

IMPORTANT: All material placement/disposal locations are currently UNDER CONSTRUCTION! Stay clear of ODMDS, Mitigation Reefs, and Beneficial Use Reefs, depths are shallower than current navigation charts. See enclosure section for project map, Data Wave Buoy information, and the current forecasted work areas including coordinates. SOUTH CAROLINA – CHARLESTON HARBOR - COOPER RIVER: South Carolina Ports Authority Hugh K. Leatherman, Sr. Terminal Construction (UPDATE March 26, 2020)

Cape Romain Contractors will begin construction work at the Hugh K. Leatherman, Sr. Terminal located along the western shore of the Cooper River, North Charleston, SC at (32° 50' 12N/079° 55' 59W) approximate completion date is August 2020. Dredging operations and stone revetment operations are completed. Steel barges will be moving around the localized site to de-mobilize equipment from the jobsite. Warning lights have been placed to outline the barges. Mariners are advised barges will be crossing the channels over the next few months and to use extreme caution when transiting the work area. Tugboats will monitor VHF Channel 13. For more information, contact the Project Manager, Greg Tuttle at (843) 884-5167 or greg@caperomaincontractors.com (Ref: LNM 43/18, 02/19, 15/19, 13/20)

UPDATE: Until further notice - HLK Terminal Lighted Buoy A (LLNR 2752) and HLK Terminal Lighted Buoy B (LLNR 2753) have been temporarily discontinued.

SOUTH CAROLINA – CHARLESTON HARBOR – COOPER RIVER - WANDO RIVER TERMINAL: Dredge Operations (UPDATE May 14, 2020)

Southern Dredging has commenced dredge operations March 1, 2020 in the Cooper River, South Carolina until approximately June 30, 2020 - operations will occur 24 hours per day, 7 days per week.

Operations will begin in the Wando Welch Terminal State Port Dock in the Upper Reach of the Wando River between Wando River Terminal Lighted Buoy 6 (LLNR 33320) and LB 8 (LLNR 33330) on or about May 15 until approximately June 15, 2020. To ensure safe passage in the vicinity of the operations, mariners are advised to contact dredges CHEROKEE on VHF channels 13 and 16. Further information contact Neil Rodgers at (843) 729-1269 or Michael Kitchell at (843) 830-1015. (Ref: LNM 14/20, 20/20)

SOUTH CAROLINA – CHARLESTON HARBOR - WANDO RIVER TERMINAL: Lower Harbor Maintenance Dredging (UPDATE April 2, 2020)

Norfolk Dredging Company's dredge VIRGINIAN will commence dredging operations for the Post 45 Charleston Lower Harbor Maintenance and New Work Dredging Contract 3 at the Wando Terminal Turning Basin on the Wando River on or about October 5, 2019. The dredge ATLANTIC will commence dredging operations on the Wando River Lower Reach digging outbound in the vicinity of Wando River Terminal Lighted Buoy 6 (LLNR 3320) approximately October 9, 2019. The VIRGINIAN operates on spuds, and the ATLANTIC operates on four anchor wires located some distance away from the dredge. Both Dredges will be loading Mud Scows and towing them to the Ocean Dredged Material Disposal Site (ODMDS) located 6.5 miles South East of Charleston Harbor Channel Lighted Buoy 17 (LLNR 2415) near the end of the SW Jetty. The center of this overall disposal area is located at the following location: 32-38.1130N/79-44.36525W (WGS 84). This project is expected to continue until approximately August 11, 2022. The Dredges will monitor VHF channels 13 & 16. Further information contact Norfolk Dredging at (757) 547-9391.

There will be three equipment mooring balls temporarily established north of the Wando Terminal and north of the Wando River Terminal Lighted Buoy 8 (LLNR 3330). The three moorings are for the scows and a fuel barge. A fourth scow mooring has been placed near Wando River Buoy 10 (LLNR 3335). Mariners are advised the moorings will be relocated frequently within the construction/dredging zone. (Ref: LNM 42/19, 48/19, 50/19, 14/20)

SOUTH CAROLINA – CHARLESTON – ASHLEY RIVER: Drainage/Construction Operations.

Conti Enterprises will commence construction activities in the Ashley River in Charleston, SC. The company will construct a pump station and outfall structure at 135 Lockwood Drive, Charleston, SC as part of Phase 4 of the Spring-Fishburne US 17 Drainage Improvements for the City of Charleston. This will involve the construction of a temporary work trestle, a temporary cofferdam, and a permanent outfall structure in the Ashley River. The work area is located between the two Route 17 bascule bridges on the east bank of the river in approximate position 32-47.3N/079-57.32W. Operations will begin on or around September 30, 2019 and will last until approximately July 31, 2022. Construction activities are expected to remain about 700' from the shipping channel for the duration of the project. Further information contact the Project Engineer, Chris Sweetgall at csweetgall@contienterprises.com or USCG Sector Charleston, Waterways Management Division at (843) 323-7761.

SOUTH CAROLINA – ST. HELENA SOUND: Hunting Island State Park Beach Restoration (UPDATE February 13, 2020)

Great Lakes Dredge will commence beachfill nourishment operations at Hunting Island, SC. Operations will begin on or about January 2, 2020 until approximately May 1, 2020 – operations will occur 24 hours per day -7 days per week.

Dredging will consist of placement of up to 1,200,000 cubic yards of beach fill material on Hunting Island. GLDD will be utilizing two (2) submerged pipeline corridors roughly two miles in length to pump material from the dredge borrow area to the beach. In addition, GLDD will be utilizing a marine staging area in the Morgan River. Auxiliary equipment will be active in the area to support the dredging operations, including but not limited to tugs, anchor barges, supply barges, and derricks. All pipelines, barges and vessels will be marked with flashing yellow lights and orange buoys. These markers are NOT for navigation, and boaters are advised to avoid these areas. Dredge ALASKA and survey vessels MIAMI RIVER, SAGINAW RIVER and GALVESTON BAY will monitor VHF channels 13 and 16. Mariners are urged to use extreme caution in the area and transit at their slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made. See enclosure section for project map details/coordinates. Further information contact Project Manager, Nicholas Williams at (630) 247-2256 / NDWilliams@glidd.com) or QC Manager Rafael Castillo (630) 842-7009 / RCastillo@glidd.com). Ref: LNM 02/20, 07/20.

32° 5'11.886"N, 81° 2'38.846"W
32° 5'27.312"N, 81° 3'43.462"W

Staging Area 2 for supply barge will be bound by the following approximate positions:

32° 4'30.499"N, 80°57'42.102"W
32° 4'36.775"N, 80°57'34.912"W
32° 4'34.676"N, 80°57'31.622"W
32° 4'28.725"N, 80°57'38.638"W

Dredging Operations:

Starting approximately May 12, 2020 and continuing until approximately September 30, 2020 with the Hydraulic Dredge J.S. CHATRY will be operating along the Savannah River Channel between Tybee Knoll Cut Range Lighted Buoy 24 (LLNR 4740) and ACL TB Light 60 (LLNR 5020). The submerged pipeline will be removed at the completion of dredging operations. Dredging operations will continue twenty-four (24) hours per day, seven days per week basis. The dredge will monitor VHF channels 13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Further information contact the Project Managers on-site: Mr. James Ferguson at (985) 273-1286, jcferguson@weeksmarine.com or Mr. Ryan Welch at (985) 237-9667, rrwelch@weeksmarine.com

GEORGIA – SAVANNAH RIVER – SAVANNAH INNER HARBOR: Savannah Harbor Expansion Project - Dredging Operations.

Norfolk Dredging will commence dredging operations on or around September 20, 2019 until approximately March 2021 for Savannah Inner Harbor Dredging part of the Savannah Harbor Expansion Project. Operations will occur between Kings Island and Fig Island within the Federal Navigation Channel encompassing the Savannah River and the Kings Island Turning Basin. Material will be pumped to upland disposal areas near the confluence of the Back River with the Savannah River in the vicinity of Jasper County, SC. Operations will occur in and around the channel a submerged pipeline will be placed, parallel along the north side of the channel. Submerged pipeline will be marked with buoys every 500' with appropriate signs and lights placed at pipeline entry and exit points. The pipeline length is approximately 42,000 feet at its longest and will cross the Back River near the eastern end of Fig Island to reach the upland disposal area. The dredge CHARLESTON will monitor VHF-FM channels 13, 16 and 4 for any emergencies the dredge operator can be reached at (757) 508-2326. Further information contact Norfolk at (757) 547-9391.

FLORIDA – FORT PIERCE – FORT PIERCE INLET INNER HARBOR: Artificial Reef.

Underwater Engineering Services, Inc has been contracted by St. Lucie County to construct an artificial reef in the Fort Pierce Inlet, FL. Operations are scheduled to begin May 4 thru June 19, 2020. The reef will consist of 2-3' limestone boulders placed in the water using a 70 crawler crane. The project location is 0.3 acre located south of Coon Island at SE: N27 degrees 28'13.92, W80 degrees 18' 02.08SW coordinates: N27 degrees 28' 12.47"; W 80 degrees 18' 04.07". UESI has subcontracted McCulley Marine to supply tugboat REGINA T and barge Mobro 126 for the work platform.

FLORIDA – JUPITER – SIMS CREEK: Dredge Operations.

Cavache will commence dredging operations in the Sims Creek Channel area and transporting it directly via a pipeline to the upland dredged material management area located on 400 N. Delaware Blvd, Jupiter, FL on or about April 15 and will be completed no later than June 30, 2020. The portions of the pipeline closet to the dredge will remain floating and marked with flashing lights at night. The pipeline will be sunk along the channel. The dredge will monitor VHF channels 16 and 79. Boaters are urged to maintain safe distance from the dredge to avoid potential interference with the pipeline. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after arrangements have been made. Further information contact Cavache at (954) 568-0007.

FLORIDA – FORT LAUDERDALE – PORT EVERGLADES SOUTHPORT: Port Everglades Southport Turning Notch Expansion and Southport Crane Rail Infrastructure Improvements Project. (UPDATE September 20, 2019)

Orion Marine has commenced operations December 12, 2018. Construction will begin from the waterside using two crane loaded deck barges and two material barges; all being serviced by the push-boat BAYOU TEDDY. Simultaneously, while installing 900 feet of temporary sheet pile wall and 1200 feet of new environmentally friendly bulkhead from the waterside, Orion will be installing an additional 4000 feet of bulkhead on land. All barges will be spudded down inside the Port Everglades Berth 30 perimeter (26° 04' 26.34N/80°07' 02.49W) while installing the EFB wall and the temporary sheet pile wall. Operations will be completed approximately December, 2020. VHF radio communications will be broadcasted on channel 11. For further information, contact Edson Corredor, Project Controls Engineer at Orion Marine (813) 839-8441. (Ref: LNM 13/19, 39/19)

Port Everglades Southport Turn Light (LLNR 10385/47515) has been relocated to position 26-04-30.157W/080-06-55.177W. The characteristics have changed from a fixed red to a flashing white 2.5s located at the top of the structure, at a height of 25 feet. In addition, there are (3) three all around fixed white lights at the lower part of the structure, one on the north, east and south faces of the steel H-beam pile, approximately 9 feet above MLLW. (Ref: LNM 35/19)

WEST INDIES – PUERTO RICO – BAHIA DE SAN JUAN - PUERTO NUEVO CHANNEL: Dredging Operations (UPDATE March 9, 2020)

Cashman Dredging will commence dredge operations in the Puerto Nuevo Channel, San Juan, Puerto Rico on approximately January 15, 2020 until approximately May 31, 2020. The marine equipment will be located throughout the work area during operations. The project will utilize the Dredge FJ BELESIMO and the Dump Scow EDDIE CARROLL. Loaded scows will be transported to the Ocean Dredge Material Disposal Site (ODMDS), located approximately 2.2 nautical miles northwest of San Juan Harbor. The marine equipment will be supported by the tugs BALTIC DAWN, PIKE, and RANGER and survey vessel SURVEY 4. All vessels will monitor VHF channels 16 and 13. Operations will be conducted 24 hours, seven days a week. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For further information contact Cashman Dredging and Marine at (617) 890-0600 or info@jaycashman.com (Ref: LNM 10/20)

FLORIDA – AICW - PALM SHORES TO WEST PALM BEACH – TORTOISE ISLAND AND SAMSON ISLAND - WITHIN GRAND CANAL AND ADJACENT CANALS: Restoration Dredging Operations.

Gator Dredging will commence muck removal operations within the Grand Canal and adjacent canals within a subdivision, just north of Samson Island Park and just south of Patrick AFB. Operations will begin on or about October 1, 2019 until approximately November 30, 2022 - Monday through Saturday, 30 minutes after sunrise until 30 minutes before sunset. The dredge GATOR will monitor VHF channels 16 & 68. Mariners are urged to use extreme caution in the area, transit at their slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made. Floating and submerged high density polyethylene (HDPE) pipeline associated with the hydraulic dredging operations of the canals will be utilized. Pipeline, work vessels, dredge barge, booster pump barge(s) and buoys will be visibly lighted and will be in the area until all work is complete. The configuration will change daily and Vessels and/or equipment will be in multiple locations at the same time. Further information contact Kyle Bulleit at (727) 527-1300 ext. 237.

B. DRAWBRIDGE STATUS SUMMARY

The following is a list of known drawbridge discrepancies, restrictions, and closures in navigable waters of the Seventh Coast Guard District. Additional information regarding bridges can be found in Volume 4 (Cape Henry to Key West) or Volume 5 (Gulf of Mexico, Puerto Rico and Virgin Islands) of the U.S. Coast Pilot, 33 CFR 117, or by calling (305) 415-6946. Unless otherwise noted in the date column, the described status will be in effect until further notice. Mariners knowing of bridge activities not listed below are urged to notify the Seventh Coast Guard District Bridge Branch.

The Coast Guard has received numerous questions regarding Bridge Regulations and where to locate them. Bridge Regulations can be found online utilizing the Electronic Code of Federal Regulations (e-CFR). Click the attached hyperlink which will direct you to Title 33 part 117 Drawbridge Operation Regulations, Subpart A - General requirements and Subpart B - Specific Requirements. Subpart A - General Requirements is the Operational requirements for bridge owners, bridge operators and mariners as set forth in the CFR. Subpart B - Specific Requirements, in which the bridges are listed by the State and waterway where the bridge is located. https://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title33/33cfr117_main_02.tpl If a specific "movable" bridge is not listed, that bridge operates on an "on demand" for opening.

C. BRIDGE INFORMATION

SOUTH CAROLINA - ST HELENA SOUND - HARBOR RIVER - SEA ISLAND EXPRESSWAY: Bridge Construction.

The Coast Guard has issued a permit to United Infrastructure Group, Inc on behalf of the South Carolina Department of Transportation (SCDOT) replace the Sea Island Expressway (Hunting Island Bridge) US21 Swing Bridge, mile 0.6 Harbor River with a fixed bridge at mile 0.8 Harbor River. Construction began on April 23, 2019 and will continue through November 21, 2021. There will be numerous barges, drill rigs, cranes and push boats on scene during construction. All vessels are advised to proceed with caution when transiting the area. Points of contact with United Infrastructure Group, Inc regarding the project are Billy Hardwick / 803-513-1903 / Billy.Hardwick@uig.net Felipe Rosa / 704-975-5452 / Felipe.Rosa@uig.net For Waterways questions, contact Sector Charleston Waterways Management Division at (843) 323-7761 or the Sector's 24-hour Command Center Line at (843) 740-7050. As updates are available, they will be provided via the Local Notice to Mariners.

UPDATE

Starting early-June, United Infrastructure Group, Inc. (UIG) will be driving piles for the new fender system at the Harbor River Bridge and will be interfering with the current navigational channel. The "West Fender Piles" will be located at approximately 32°24'16" N and 80°27'10.5" W and the "East Fender Piles" will be located at approximately 32°24'15.5" N and 80°27'09" W. UIG will start by driving the West Fender Piles on the west side channel. At such time, the west side channel will be closed and the east side channel will open for vessel traffic. Once the West Fender Piles are completed, UIG will move to the east side channel and drive the East Fender Piles.. At such time, the east side channel will be closed and the west side channel will be open with the Horizontal clearance on the west channel will be reduced to 40 feet. For approximately one day while the East Fender Piles are being driven, the bridge will not be able to open due to a conflict between the existing bridge truss and some of the East Fender Piles, and consequently both the west and east sides channels will be closed for that one day. The Coast Guard will update this article to the LNM once the date of the closure is determined. Once the new Fenders are established on the East channel, the horizontal clearance will be reduced to 52 feet.

Once both the West & East Fender Piles are completed, the new shorter horizontal clearances will remain for over one year, until the existing fender system can be removed and the existing bridge can be demolished. Boat and vessel operators are asked to use caution when close to the work area.

SOUTH CAROLINA – MYRTLE GROVE SOUND AND CAPE FEAR RIVER TO CASINO CREEK - WACCAMAW RIVER - COASTLINE RR SWING BRIDGE: Closed to Navigation

Due to flooding, the Waccamaw Coastline RR Bridge in Conway, Horry County, SC at mile marker 44.4 will be closed to marine traffic due to flooding. The bridge will remain closed to navigation position until the floodwaters subside. Mariners are urged to prepare and plan transits accordingly to avoid unnecessary disruption. Horry County Public Works Department will continue to monitor the flood stage in order to open the Coastline RR Swing bridge to Navigation. For additional information regarding the bridge closure contact the Horry County Public works department at 813-915- 5410. Or visit their website www.horrycounty.org . For Waterways questions, contact Sector Charleston Waterways Management Division at (843) 323-7761 or the Sector's 24-hour Command Center Line at (843) 740-7050.

FLORIDA - ST JOHNS RIVER – FLORIDA EAST COAST RAILWAY - RAIL BRIDGE: Bridge Repairs

Florida East Coast Railway (FECR) is authorized to temporarily deviate from drawbridge operation regulation 33 CFR 117.325(b) that governs the FEC St. Johns River Railroad Bridge across the St. Johns River, mile 24.9, at Jacksonville, Florida. Under this temporary

deviation, the FEC St. Johns River RR Bridge is authorized to remain in the closed to navigation position between the hours of 8 a.m. and 2 p.m. on the following days:

- May 8, 9, 12, 13, 29 and 30, 2020
- June 2, 3, 12, 13, 16 and 17, 2020

This deviation is necessary for the maintenance to the main trunnion and link pin bearings. Vessels able to pass without an opening may do so at any time. During non-working hours the bridge will operate in accordance with 33 CFR 117.325(b). The drawbridge shall return to its regular operating schedule, 33 CFR 117.325(b), at the end of the designated time period. We are approving this request under the provisions of 33 CFR 117.35. For waterways questions, contact USCG Sector Jacksonville Waterways Management Office, MST2 Rory Boyle at 904-714-7661, email: Rory.C.Boyle@uscg.mil.

FLORIDA - ST JOHNS RIVER - BUCKMAN BRIDGE: Bridge Repairs

Florida Safety Contractors advises that work is being conducted at the Buckman Bridge St. Johns River and will occur approximately from March 9, 2020 through June 20, 2021. There will be associated construction equipment/vessels in and around the bridge including job boats also Tug and barge in the vicinity working. All boaters are advised to proceed with caution while transiting the area. This construction project will not impact the navigational channel. For waterways questions, contact USCG Sector Jacksonville Waterways Management Office, MST2 Rory Boyle at 904-714-7661, email: Rory.C.Boyle@uscg.mil

Ref: LNM 10-20 through 20-20

Chart: 11491

FLORIDA – ST JOHNS RIVER – FULLER WARREN BRIDGE: Bridge Repairs

Archer Western Contractors have advised the Coast Guard that they will be working on the Fuller Warren Bridge across the St Johns River, Jacksonville, Florida. The contractor will have floating equipment in the vicinity of the bridge to include barges, cranes, and other work vessels. Future waterway restrictions may be necessary for the replacement of the bridge fender system and girder erection. This work is anticipated to start September 2017 and will be completed by the Fall 2020. The Fuller Warren Bridge is undergoing a stage of construction during which the location of barges will impact the horizontal clearance. At no time will the horizontal clearance be reduced by more than half. . For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

FLORIDA – ST. JOHNS RIVER – BLACK CREEK – SR 23 FIRST COAST EXPRESSWAY: Bridge Construction

Sacyr Construction SA has advised the Coast Guard that they will be building SR-23 First Coast Expressway over Black Creek. The contractor will have floating equipment in Black Creek in the vicinity of the bridge and will consist of sectional barges, cranes, and other work vessels. Obstructions in water may consist of concrete and steel pilings in the foot print of the bridge foundations. Please use caution while boating in the vicinity of the bridge. Sacyr will maintain a minimum 80.0 Feet of Channel while performing bridge work activities. Water work will be taking place Monday-Saturday 7:00 AM - 7:00 PM. Pile driving will only occur Monday-Friday 7:00 AM -7:00 PM. Future waterway restrictions may be necessary for girder erection over the channel span. This work is anticipated to begin in the waterway May 2020 and continue through winter 2021. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904)-714-7631 or via email at Jeremy.S.Bailey@uscg.mil

FLORIDA - ST JOHNS RIVER - RACY PT TO CRESCENT LAKE - DUNNS CREEK- US 17 (SR15) BRIDGE: Bridge Construction

GLF Construction will commence construction of a new bridge adjacent to the US 17 (SR15) Bridge across Dunn's Creek, Mile 0.9, near Satsuma, Florida on February 4, 2019. During construction floating equipment, small barges and support vessels may be partially obstructing the channel. Future updates will be provided as the new bridge is built. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

UPDATE 1

The Captain of the Port Jacksonville advises all mariners that construction work is occurring on the Highway 17/SR15/ Dunns Creek bridge in Satsuma, Florida. Through May 2020 the horizontal clearance will be reduced by approximately fifty percent. During this phase of construction, pylons and beams will be intermittently suspended above then main navigation channel by crane. Mariners are advised to proceed at a slow, no wake speed. Construction barges will be present with personnel on board on the north side of the channel to the obstruction to the navigable channel. Construction personnel will be present to guide boaters through the construction site using orange

flags and hand signals when it is unsafe to pass through the channel. At times, when the channel is blocked due to overhead hazards, the channel will be made clear upon request, after construction equipment is made safe. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

FLORIDA – ST JOHNS RIVER – LAKE DEXTER TO LAKE HANEY – CRFC RAILROAD BRIDGE: Bridge Repair

Kiewit Infrastructure South Co acting on behalf of the bridge owner, Florida Department of Transportation (FDOT), is authorized to temporarily deviate from drawbridge operation regulations 33 CFR 117.5 that governs the CFRC Railroad Bridge over the St Johns River at Lake Monroe, mile 160.9, at Sanford, Florida.

Under this temporary deviation, the CFRC Railroad Bridge is authorized to limit the vertical clearance with channel obstructions between 9 p.m. and 8 a.m., Wednesday through Sunday nights, beginning January 23, 2020 through April 6, 2020. Additionally, the contractor is authorized complete bridge closures on Sunday nights from 9 p. m. to 5 a. m. between February 9 and April 30, 2020. Work will be halted at the request of passing vessels. At all other times, the bridge will operate in accordance with its regular operating schedule. If you have any questions please contact USCG Sector Jacksonville Waterways Division, LTJG Emily Sysko at (904)714-7616, email emily.t.sysko@uscg.mil

FLORIDA - EAST COAST- CAPE CANAVERAL TO BETHEL SHOAL- CRANE CREEK/GOAT CREEK/SAINT SEBASTIAN RIVER R/R BRIDGES: Bridge Repair/Construction

HSR Construction on behalf of the Bridge Owner, Virgin Trains USA Florida LLC will be conducting Bridge Construction and repair of the Railroad bridges crossing Crane Creek, mile 0.34 (from confluence with Indian River), at Melbourne, Brevard County, FL. Lat/Long: 28.076250, -80.603611, Goat Creek at Malabar, Brevard County, FL. Lat/Long 27.969188, -80.546472 and the Saint Sebastian River, St. Sebastian River, mile 1.3, between Micco and Roseland, Brevard and Indian River Counties, FL. Lat/Long: 27.838437, -80.497070. These bridge replacements are part of a larger project known as the All Aboard Florida (Brightline) -Orlando to Miami, Florida Intercity Passenger Rail Project, which proposes the construction of a privately owned and operated intercity passenger railroad system that will connect Orlando and Miami, with intermediate stops in Fort Lauderdale and West Palm Beach, Florida. This project will start on July 1, 2019 and continue through March 19, 2021. There will be cranes present on the trestles and small jon boats in the water during construction. Point of contact for the project with HSR Contractors is Jessica Workman, phone: (816) 261-8409 or email jworkman@hsrctv.com . For Waterways question concerning Crane and Goat Creek(s) please contact LT Emily T. Sysko, Sector Jacksonville, Waterways Management Division, U.S. Coast Guard; telephone 904-714-7616, e-mail Emily.T.Sysko@uscg.mil . For Waterways question concerning the Saint Sebastian River please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITS@USCG.MIL

Crane Creek UPDATE:

The Coast Guard has approved the contractor to erect a temporary work trestle east of the existing working track and commence in-water work in accordance with the plans submitted for Phase 1. During Phase 1, maritime navigation will be available through the structures. There is not a designated navigational channel, any section that will impede navigation will be properly marked as to alert mariners to use alternate spans. Red stationary lights will be installed along both side for safe navigation. The new structures, when completed, will provide for a vertical clearance of 15.8' and a horizontal clearance of 65' toward the northeast side of the bridge more in line with the existing US1 Highway bridge. The current navigation clearances are 15' vertical and 45' horizontal. The temporary trestle will meet or exceed the vertical clearance of the existing structures.

FLORIDA - EAST COAST - WEST PALM BEACH TO MIAMI - MIAMI RIVER- BRICKELL AVENUE BRIDGE: Bridge Repair

BPA Engineers, acting on behalf of the bridge owner, Florida Department of Transportation (FDOT), is authorized to temporarily deviate from drawbridge operation regulations 33 CFR 117.305(d) that governs the Brickell Avenue Bridge across the Miami River, mile 0.1, at Miami, Florida.

Under this temporary deviation, the Brickell Avenue Bridge is authorized single-leaf operations with a 4-hour advanced notice for a full opening between 10 p.m. and 5:30 a.m., Sunday through Friday, beginning February 10, 2020 through May 31, 2020. During the February to May timeframe a five foot reduction in vertical clearance beneath the non-opening span during work hours only. Associated construction equipment may be located beneath the non-opening span during work hours. The Contractor will be using a 14' x 24' barge with a 50 ft boom manlift to work from the water. While staging and/or loading, the barge will be mooring to the back side (non-navigational side) of the fender system. While the contractor is working, the 14' x 24' barge will moor to the fender system along the 24' side of the barge reaching the bridge with the 50' manlift obstructing 1/2 of the navigational channel. Vessels able to pass without an opening beneath the non-obstructed span, may do so at anytime. During non-work hours, associated equipment will be located outside of the main channel and not interfere with drawbridge operations or obstruct the channel. All equipment will be properly lighted. Additionally, the contractor is authorized to temporarily reduce the vertical clearance of the non-opening leaf by five feet while construction work is in progress. At all other times, the bridge will operate in accordance with its regular operating schedule.

UPDATE

Starting May 15, 2020 through June 30, 2020, the Coast Guard has authorized the contractor an additional temporary deviation. From 6 p.m. to 10 p.m., Sunday through Thursday, the bridge is allowed single-leaf operations with a 2-hour advanced notice for a full opening. Additionally, the contractor is authorized to temporarily reduce the vertical clearance of the non-opening leaf by five feet while construction work is in progress. At all other times, the bridge will operate in accordance with its regular operating schedule.

FLORIDA - EAST COAST - WEST PALM BEACH TO MIAMI - MIAMI RIVER- SW 1ST STREET BRIDGE: Bridge Replacement **UPDATED:**

GLF Construction Corporation was contracted by the bridge owner, Florida Department of Transportation (FDOT), to commence construction of a new bridge that will replace the SW 1st Street Bridge across the Miami River, Mile 0.9, in Miami, Florida. Construction is scheduled to begin on May 20, 2019 and continue through Summer 2022.

Demolition and removal of the existing bascule piers continues from the land side with no anticipated restrictions to the channel. The installation of sheet piles for the new cofferdam on the west side has been completed and excavation of the new cofferdam is ongoing.

Sheet pile testing for the new cofferdam on the east side is ongoing and installation is expected to begin the week of September 16. The new seawall (combination wall) has been completed on the east side and west side.

As early as September 23, 2019, the contractor will move forward with excavating (dredging) the channel. While a barge will be in the channel for the channel excavation operation, no impacts to the channel restricting the current horizontal navigational clearance are anticipated. As early as October 28, 2019, the contractor will perform the submarine cable installation and in order to perform this work, half of the channel will be temporarily restricted at a time. The contractor will coordinate with USCG Sector Miami prior to any channel closures and/or restrictions and will provide adequate notice to the public. For project information, please contact Community Outreach Specialist Sergies Duarte at sergies.duarte@dot.state.fl.us or 305-216-3617. If you have any questions regarding the waterway, please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAMI-MARINE-PERMITTS@USCG.MIL

FLORIDA- FLORIDA KEYS- ALLIGATOR REEF TO SOMBRERO KEY - SNAKE CREEK CHANNEL- SNAKE CREEK BRIDGE: Fender Repair

The Florida Department of Transportation has advised the Coast Guard that their contractor, Kiewit, will be conducting work on the fender system for the Snake Creek Bridge. The Contractor has stated that they will begin this work on Wednesday, March 31st until Friday, April 3rd. The hours for this work will be between 7AM - 5PM, daily. The barge will take up 8' of the channel while in use. The barge will not be left unattended and will be moved out of the channel at the end of each day's work. In addition to this, the barge can also be moved, during work activities, to let large boats pass through the channel as needed. For more information please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA- FLORIDA KEYS- SOMBRERO KEY TO SAND KEY-MOSER CHANNEL-SEVEN MILE BRIDGE: Bridge Repairs

The Florida Department of Transportation has advised the Coast Guard that their contractor Southern Road & Bridge, LLC will be conducting long-term maintenance and repairs to the Seven Mile Bridge. The main span of the bridge for Moser Channel will not be affected. Lighted 20' x 40' construction barges and work floats will be positioned within other spans along the bridge but the remaining spans will be open for vessel traffic. Mariners are advised that National Marine Sanctuary regulations prohibit vessels from operating at more than 4 knots or in a manner to create a wake within 100 yards of stationary vessels. This project is expected to continue until March 2020. For more information, please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA- FLORIDA KEYS- SOMBRERO KEY TO SAND KEY-MOSER CHANNEL-OLD SEVEN MILE BRIDGE: Bridge Repairs

The Florida Department of Transportation has advised the Coast Guard that their contractor SAFFO Contractors Inc. will be conducting long-term maintenance and repairs to the Old Seven Mile Bridge. The main span of the bridge for Moser Channel will not be affected. Certain bridge spans will have lighted work platforms suspended from the bridge reducing the vertical clearance by from 2.5-5 feet as well as lighted staging extending 5 feet from all side of certain bridge piers. The remaining spans will not be affected. Mariners are advised to abide by all Navigation Rules, proceed with caution in the vicinity of the project, and are urged to plan transits accordingly avoiding areas of the bridge with active work crews. This project is expected to continue until July 2022. For more information please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA- FLORIDA KEYS - KEY WEST HARBOR-COW KEY BRIDGE: Bridge Repairs

The Coast Guard is approving a request from the Florida Department of Transportation (FDOT) to temporarily reduce the vertical clearance between Span 3 and Span 4 at the US1 (SR A1A) Highway (Cow Key Channel) Bridges across Cow Key Channel, mile 0.9, at Key West, Florida to 6.5 feet at MHW. Underpinning reinforcements will be utilized as the best safety measure due to the failing concrete until construction of the new spans is completed. Underpinning of the bridge is expected to start on July 9th 2018 with an estimated start date of construction of the new bridge to begin in February of 2019 with completion in June of 2021. FDOT's contractor will be installing signage and buoys alerting vessels of the reduced clearance. When the new spans are constructed, the vertical clearance shall return to the permitted clearance of 9 feet at MHW. No work will be conducted on span #2 and will be open for small vessels able to transit this channel. If you have any questions regarding the waterway, please contact MSTC Greg Bergstrom, USCG Sector Key West, Waterways Management Division, (305) 292-8772, email SKWWaterways@uscg.mil

UPDATE

The Florida Department of Transportation has advised the Coast Guard that their contractor, Kiewit, will begin replacement of the Cow Key Channel Bridge at Mile Marker 4 on April 16, 2020. Crews will be working from a barge under spans three and four beginning April 13, 2020. The barge will remain in place, with crews working in the water and overhead, until replacement of both bridge spans is completed. This project is expected to continue through October 2020. For more information please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA – WEST COAST - TAMPA BAY AND ST. JOSEPH SOUND - LITTLE MANATEE RIVER- CSX RAILROAD BRIDGE: Bridge Repair

PCL Civil Constructors, Inc on behalf of the Bridge owner, CSX Rail systems has submitted a request to temporarily close one of the two navigable spans at Little Manatee River swing bridge mile 2.7 Little Manatee River, Ruskin Florida, in order to allow structural steel work to be completed. The Coast Guard has approved this request. This work will be managed by PCL Civil Constructors, Inc. as the Construction Manager Contractor. CSX Little Manatee swing bridge has two navigable channels, one channel will be completely blocked by equipment for this work, while the other remains open to marine vessels. Under this temporary deviation, the PCL Civil Constructors is allowed to limit the openings of the Little Manatee Rail Bridge during the hours of 7 a.m. to 5:30 p.m. Monday through Friday from April 20, 2020 through May 15, 2020. Per the stipulations listed in 33 CFR 117.297 the CSX Little Manatee Railroad Bridge will open upon request only at 7 a.m., 11 a.m. and 3 p.m. daily Monday through Friday. At all other times, the bridge will operate in accordance with its regular operating schedule. From April 20, 2020 thru May 15, 2020 the south span will be blocked and the north span will be passable. Vessels that can pass through the northern span without requesting an opening, may do so at any time while maintaining a slow, no wake speed. Mariners requiring a bridge opening shall continue to request per the current bridge operating regulation 33 CFR 117.297. For waterways information please contact U.S. Coast Guard Sector St. Petersburg at 727-824-7506 or via email at D07-SMB-Tampa-WWM@uscg.mil

GEORGIA - ATLANTIC INTRACOASTAL WATERWAY – BEAUFORT RIVER TO ST. SIMON SOUND - WILMINGTON RIVER- CAUSTON BLUFF (ISLAND EXPWY) SR 26 BRIDGE: Bridge Replacement / Temporary Deviation- UPDATE

Prince Contracting has been contracted by the Georgia Department of Transportation to replace the CR 787 (Island Expressway) Drawbridges across the AICW (Wilmington River), at mile 579.9, in Savannah, GA. The bridge replacement project will replace the existing dual span bascule bridges with dual span high level fixed bridges. When completed, the new high-level fixed bridges will provide a horizontal clearance of 170 feet between the fender system and a vertical clearance 65 feet at Mean High Water (MHW). The project has started and is estimated to be completed November 2021. Work barges and associated equipment may be located in the vicinity of the bridge but will not impede the navigational channel. All mariners are requested to use caution when transiting the area. For additional waterway information, please contact Coast Guard Marine Safety Unit Savannah at (912) 652-4353.

UPDATE 1: Causton Bluff / Islands Expressway Bridge is allowed single-leaf operations utilizing the drawbridge operating schedule in 33 CFR 117.353(b) from 6 a.m. on August 26, 2019 through 6 a.m. on June 30, 2020. A full opening will be provided during daylight hours only with a 48 hour advanced notice to the bridge tender. Vessels that can pass without an opening may do so at any time.

UPDATE 2: The beams have been set crossing the AICW on the Island Expressway (SR 26) Bridge with a 65' vertical clearance MHW and 170' between the fender systems with 100' navigable channel.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY - ST. SIMONS SOUND TO TOLOMATO RIVER – WONDERWOOD DRIVE BRIDGE: Bridge Repairs

The Coast Guard has received a request from M & J Construction acting on behalf of the Florida Department of Transportation (FDOT), to reduce the vertical clearance of the SR 116 / Wonderwood Drive Bridge, across the Atlantic Intracoastal Waterway (AICW), mile 742.1, at Jacksonville, Florida to facilitate bridge repairs.

The Coast Guard is approving a vertical clearance reduction of 4 feet for the installation of a containment system. The vertical clearance will be reduced to 61 feet at Mean High Water (MHW) over one-half of the navigational channel during repair work. When the contractor is not working in the navigational channel the containment system will be retracted providing 64 feet of vertical clearance at MHW throughout the entire navigational channel. Installation of the containment would begin on November 7, 2017 and with an estimated completion date of June 09, 2020. For details relating to the bridge repair contact Mr. Jose Gonzalez with M&J Construction at (727) 938-6478. For Coast Guard related concerns call or e-mail LTJG Emily Sysko, CG Sector Jacksonville Waterways Management Division, telephone (904) 714-7616, email; Emily.T.Sysko@uscg.mil

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – PALM SHORES TO WEST PALM BEACH – BLUE HERON BLVD BRIDGE: Fender Replacement

M&J Construction Company on behalf of Florida Department of Transportation (FDOT) will be replacing the fender system in the navigable channel on the Blue Heron Blvd Bridge at mile 1017.2, Atlantic Intracoastal Waterway (AICW), Palm Beach Florida from 31 July 2019 to 30 Jun, 2020. Equipment on scene will be a 110 foot barge with crane and a 60' barge with a crane along with a push boat. Work will be being performed 24 hours a day, 7 days a week. The channel will be reduced to 45 feet while work is ongoing. The barge/equipment can be moved for boats requiring the full width of the channel with a one hour advance notice. Boaters should contact Joe Burgos (352) 232-0396 or Robbie Belasic – (352) 293-1585. During non-working hours and Saturdays and Sundays, the equipment will be removed from the channel. For waterways questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITS@USCG.MIL

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – PALM SHORES TO WEST PALM BEACH –SOUTHERN BOULEVARD BRIDGE: Bridge Construction, Updated

The Southern Blvd bridge has been removed in its entirety from the waterway and a new bascule bridge is being constructed along the same alignment. A temporary lift bridge was installed approx. 100 feet north of the construction site. The temporary lift bridge provides a

vertical clearance of 65 feet in the lifted position and a horizontal clearance of 125 feet between the fender system. The temporary lift bridge will operating in accordance with federal drawbridge operating regulation, 33 CFR 117.261(w).

From March 12, 2020 through August 31, 2021, the contractor will have construction equipment in the navigational channel directly south the temporary lift bridge. From 6 a.m. to 6 p.m. daily, the navigational channel south of the temporary lift bridge will be partially obstructed providing approximately 50 feet of horizontal clearance. Vessels requiring the full channel to safely pass are required to provide a 4-hour advanced notice. Public vessels of the United States and vessels in distress shall be passed at any time.

Questions regarding the ongoing construction of the new Southern Blvd bascule bridge may be directed to Mr. Clay Bores, 407-488-0738 or Mr. Andre Thomas, 561-657-1973. If you have waterway related questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER – FEC RAILROAD BRIDGE: Test Deviation: UPDATED:

The Coast Guard has issued a temporary deviation from the operating schedule that governs the Florida East Coast (FEC) Railroad Bridge across the New River, mile 2.5, at Fort Lauderdale, Florida. This deviation will test a change to the drawbridge operation schedule to determine if the proposed operating schedule changes will meet the reasonable needs of maritime traffic and railway traffic. This deviation will allow the bridge to operate a more predictable drawbridge opening schedule. This deviation is effective from 12:01 a.m. on January 1, 2020 to 11:59 p.m. on June 26, 2020. For the purposes of enforcement, actual notice will be used from 12:01 a.m. on January 4, 2020. You may submit comments identified by docket number USCG-2019-0955 using Federal eRulemaking Portal at <http://www.regulations.gov>. Comments and relate material must reach the Coast Guard on or before March 30, 2020.

Under this deviation, the Florida East Coast (FEC) Railroad Bridge shall be maintained in the fully open-to-navigation position for vessels at all times, except during periods when it is closed for the passage of rail traffic, inspections and minor repairs. The drawbridge shall open and remain open to navigation for a fixed 10-minute period each hour, except that the drawbridge shall be open at the following times which shall serve as the hourly fixed 10-minute period:

- 7 a.m. until 7:10 a.m.
- 9 a.m. until 9:10 a.m.
- 4 p.m. until 4:10 p.m.
- 6 p.m. until 6:10 p.m.
- 10 p.m. until 10:10 p.m.

Additionally, in each hour from Noon to 2:59 p.m., the drawbridge shall open and remain open to navigation for an additional 10-minute period. The fixed 10-minute opening periods shall be published on a quarterly basis by the drawbridge owner and reflected on the owner's website and mobile application. In any case, the drawbridge shall not be closed to navigation for more than 60 consecutive minutes. The drawbridge shall have a drawbridge tender onsite at all times who is capable of physically tending and operating the drawbridge by local control, if necessary, or when ordered by the Coast Guard. The drawbridge tender shall provide estimated times of drawbridge openings and closures, upon request. Operational information will be provided 24 hours a day on VHF-FM channels 9 and 16 or by telephone at (305) 889-5572. Signs shall be posted visible to marine traffic and displaying VHF radio contact information, website and application information, and the telephone number for the bridge tender.

In the event of a drawbridge operational failure, or other emergency circumstances impacting normal drawbridge operations, the drawbridge owner shall immediately notify the Coast Guard Captain of the Port Miami and provide an estimated time of repair and return to normal operations.

A drawbridge log shall be maintained including drawbridge opening and closing times. The drawbridge log should include reasons for those drawbridge closings that interfere with scheduled openings in this part. This log shall be provided to the Coast Guard upon request. A website and mobile application shall be maintained to publish: drawbridge opening times required by this subsection; timely updates to schedules; at least 24-hour advance notice for each schedule in order to facilitate planning by maritime operators; and to the extent reasonably practicable, at least 60-minutes advance notice of schedule changes or delays.

Vessels able to pass through the bridge in the closed position may do so at anytime. The bridge will be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the FOR FURTHER INFORMATION CONTACT section of this document for alternate instructions. We accept anonymous comments. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and the docket, visit <http://www.regulations.gov/privacynotice>.

If you have any questions please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL

The website and mobile application for the FEC New River Railroad Bridge can be found in both the Android and Apple, using the search feature and entering New River Bridge Schedule or online at <http://www.nrbinfo.com>.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER – ANDREWS AVENUE BRIDGE: Bridge Rehabilitation Project UPDATE:

Broward County is authorized to temporarily deviate from the drawbridge operation regulation 33 CFR 117.313(b) that governs the Andrews Avenue Bridge across the New River (Tarpon River), mile 2.3, at Fort Lauderdale, Florida.

Under this temporary deviation, the Andrews Avenue Bridge will require a 2 hour advanced notice for a bridge opening between the hours of 10:30 p.m. and 6 a.m., Sunday evenings through Friday mornings, beginning October 18, 2019 through May 31, 2020. This deviation is necessary for the bridge rehabilitation and painting project. At all other times, the bridge will operate in accordance with 33 CFR 117.313(b).

For waterways information or questions, call or e-mail U.S. Coast Guard Sector Miami, Waterways Management Division; telephone 305-535-4317, email; D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER CANAL (South Fork) – I-595 BRIDGE: Bridge Construction

Archer Western on behalf of Florida Department of Transportation (FDOT) will be removing the fender system in the navigable channel on the I-595 Bridge across the South Fork of the New River Canal in preparation of the addition of the Express Lanes starting on October 18, 2019 through March 31, 2020. Work is being conducted 7 days a week from 6 a.m. to 6 p.m. Daily. Work barges will be present with full channel blockage at times. The barge/equipment can be moved for boats requiring the full width of channel with one hour advance notice. Boaters should contact Chris Thorthon (954) 605-4235 or Cloyce Poling (561) 718-2129 to request passage. For waterways questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – MIAMI TO ELLIOT KEY - RICKENBACKER CSWY BRIDGE: Fender Repairs

Lambert Bros, Inc. has been contracted by Miami-Dade County to remove and install new sections to the fender system on the Rickenbacker Cswy Bridge. The project will begin on February 25, 2019 and will continue thru May of 2020. The contractor will have floating equipment in the vicinity of the bridge to include barges, cranes, and other work vessels. Future waterway restrictions may be necessary. For waterways information or concerns, call or e-mail U.S. Coast Guard Sector Miami, Waterways Management Division; telephone 305-535-4317, email; D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL

FLORIDA – GULF INTRACOASTAL WATERWAY - FORT MYERS TO CHARLOTTE HARBOR AND WIGGINS PASS – AREA BRIDGES: Bridge Construction

Construction of Bridge Nos. 120001, Bridge over Billy's Creek, 120002, SR 45 over Caloosahatchee River, 120077, SR S-82-B over ten-mile canal, 120157, Edison Bridge NB, and 120158, Edison Bridge SB, in Lee County has begun. The construction project will be ongoing until approximately September 21, 2019. There will be several pieces of floating construction equipment remaining in the water during the period of construction. The navigation channels under the bridges will be reduced to ½ channel size during the construction. All boaters are advised to use extreme caution while transiting the area.

The project manager, Seacoast Inc., may be reached at 813-925-3555 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

FLORIDA - GULF INTRACOASTAL WATERWAY - TAMPA BAY TO PORT RICHEY – THE NARROWS – PARK BLVD BRIDGE: Bridge Repair

Quinn Construction, Inc., on behalf of the bridge owner, Pinellas County Florida, is authorized to temporarily deviate from the drawbridge operation regulation 33 CFR 117.5 that governs the Park Blvd Bridge across the Gulf Intracoastal Waterway, mile 126, at Indian Shores, Florida.

Under this temporary deviation, the Park Blvd Bridge will provide single-leaf openings on demand and with a 4 hour advanced notice for a full opening, from March 11, 2020 through 11:59 p.m. on September 7, 2020. Additionally, the Coast Guard is approving the contractor's request to reduce the vertical clearance by 16 inches through September 7, 2020. This approval allows the contractor to continue necessary work on the bridge to complete the repair project. All boaters are advised to use extreme caution while transiting the area.

The project manager, Quinn Construction, Inc., may be reached at 941-722-7722 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

FLORIDA - GULF INTRACOASTAL WATERWAY - TAMPA BAY TO PORT RICHEY - BOCA CIEGA BAY - PINELLAS BAYWAY STRUCTURE 'E' BRIDGE: Bridge Repair

Construction on the Pinellas Bayway Structure 'E' Bridge has begun. The construction project will be ongoing from Jun 2019 through late July/early August 2020. There will be several pieces of floating equipment remaining in the water during the period of construction to include barges, cranes, and other work vessels. The Bayway Structure 'E' construction project is located near mile 113 on the Gulf Intracoastal Waterway, in Boca Ciega Bay, FL. As the work on the bridge progresses, navigation will be restricted in different areas around the bridge to accommodate the construction project. The navigation channel will then be partially closed in summer 2020 periodically. All boaters are advised to use extreme caution while transiting the area.

The project manager for American Bridge, Jon Yates, may be reached at 813-538-8012 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

D7 SUMMARY OF MARINE EVENTS

GEORGIA – ST SIMONS SOUND: REGULATED NAVIGATION AREA (RNA)

MARINERS ARE STRONGLY ADVISED TO REDUCE THEIR WAKE AROUND CEDAR CREEK, IN THE BRUNSWICK HARBOR DUE TO SALVAGE AND BOOMING OPERATIONS IN THE VICINITY OF THE M/V GOLDEN RAY

The following area is a regulated navigation area (RNA): All navigable waters of St. Simons Sound, GA, bounded by a line drawn from a point located at 31°07'48" N, 081°23'30" W, thence to 31°07'29" N, 081°23'37" W, thence to 31°07'38" N, 081°24'10" W, thence to 31°07'22" N, 081°24'38" W, thence to 31°07'40" N, 081°25'01" W, thence to 31°08'07" N, 081°24'48" W

The following aid has been temporarily relocated to facilitate salvage operations for the M/V GOLDEN RAY:

St. Simons Sound Lighted Buoy 19 (LLNR 6140) to position 31-07-38.072N/081-23-46.352W
Temporary chart correction LNM 39/19

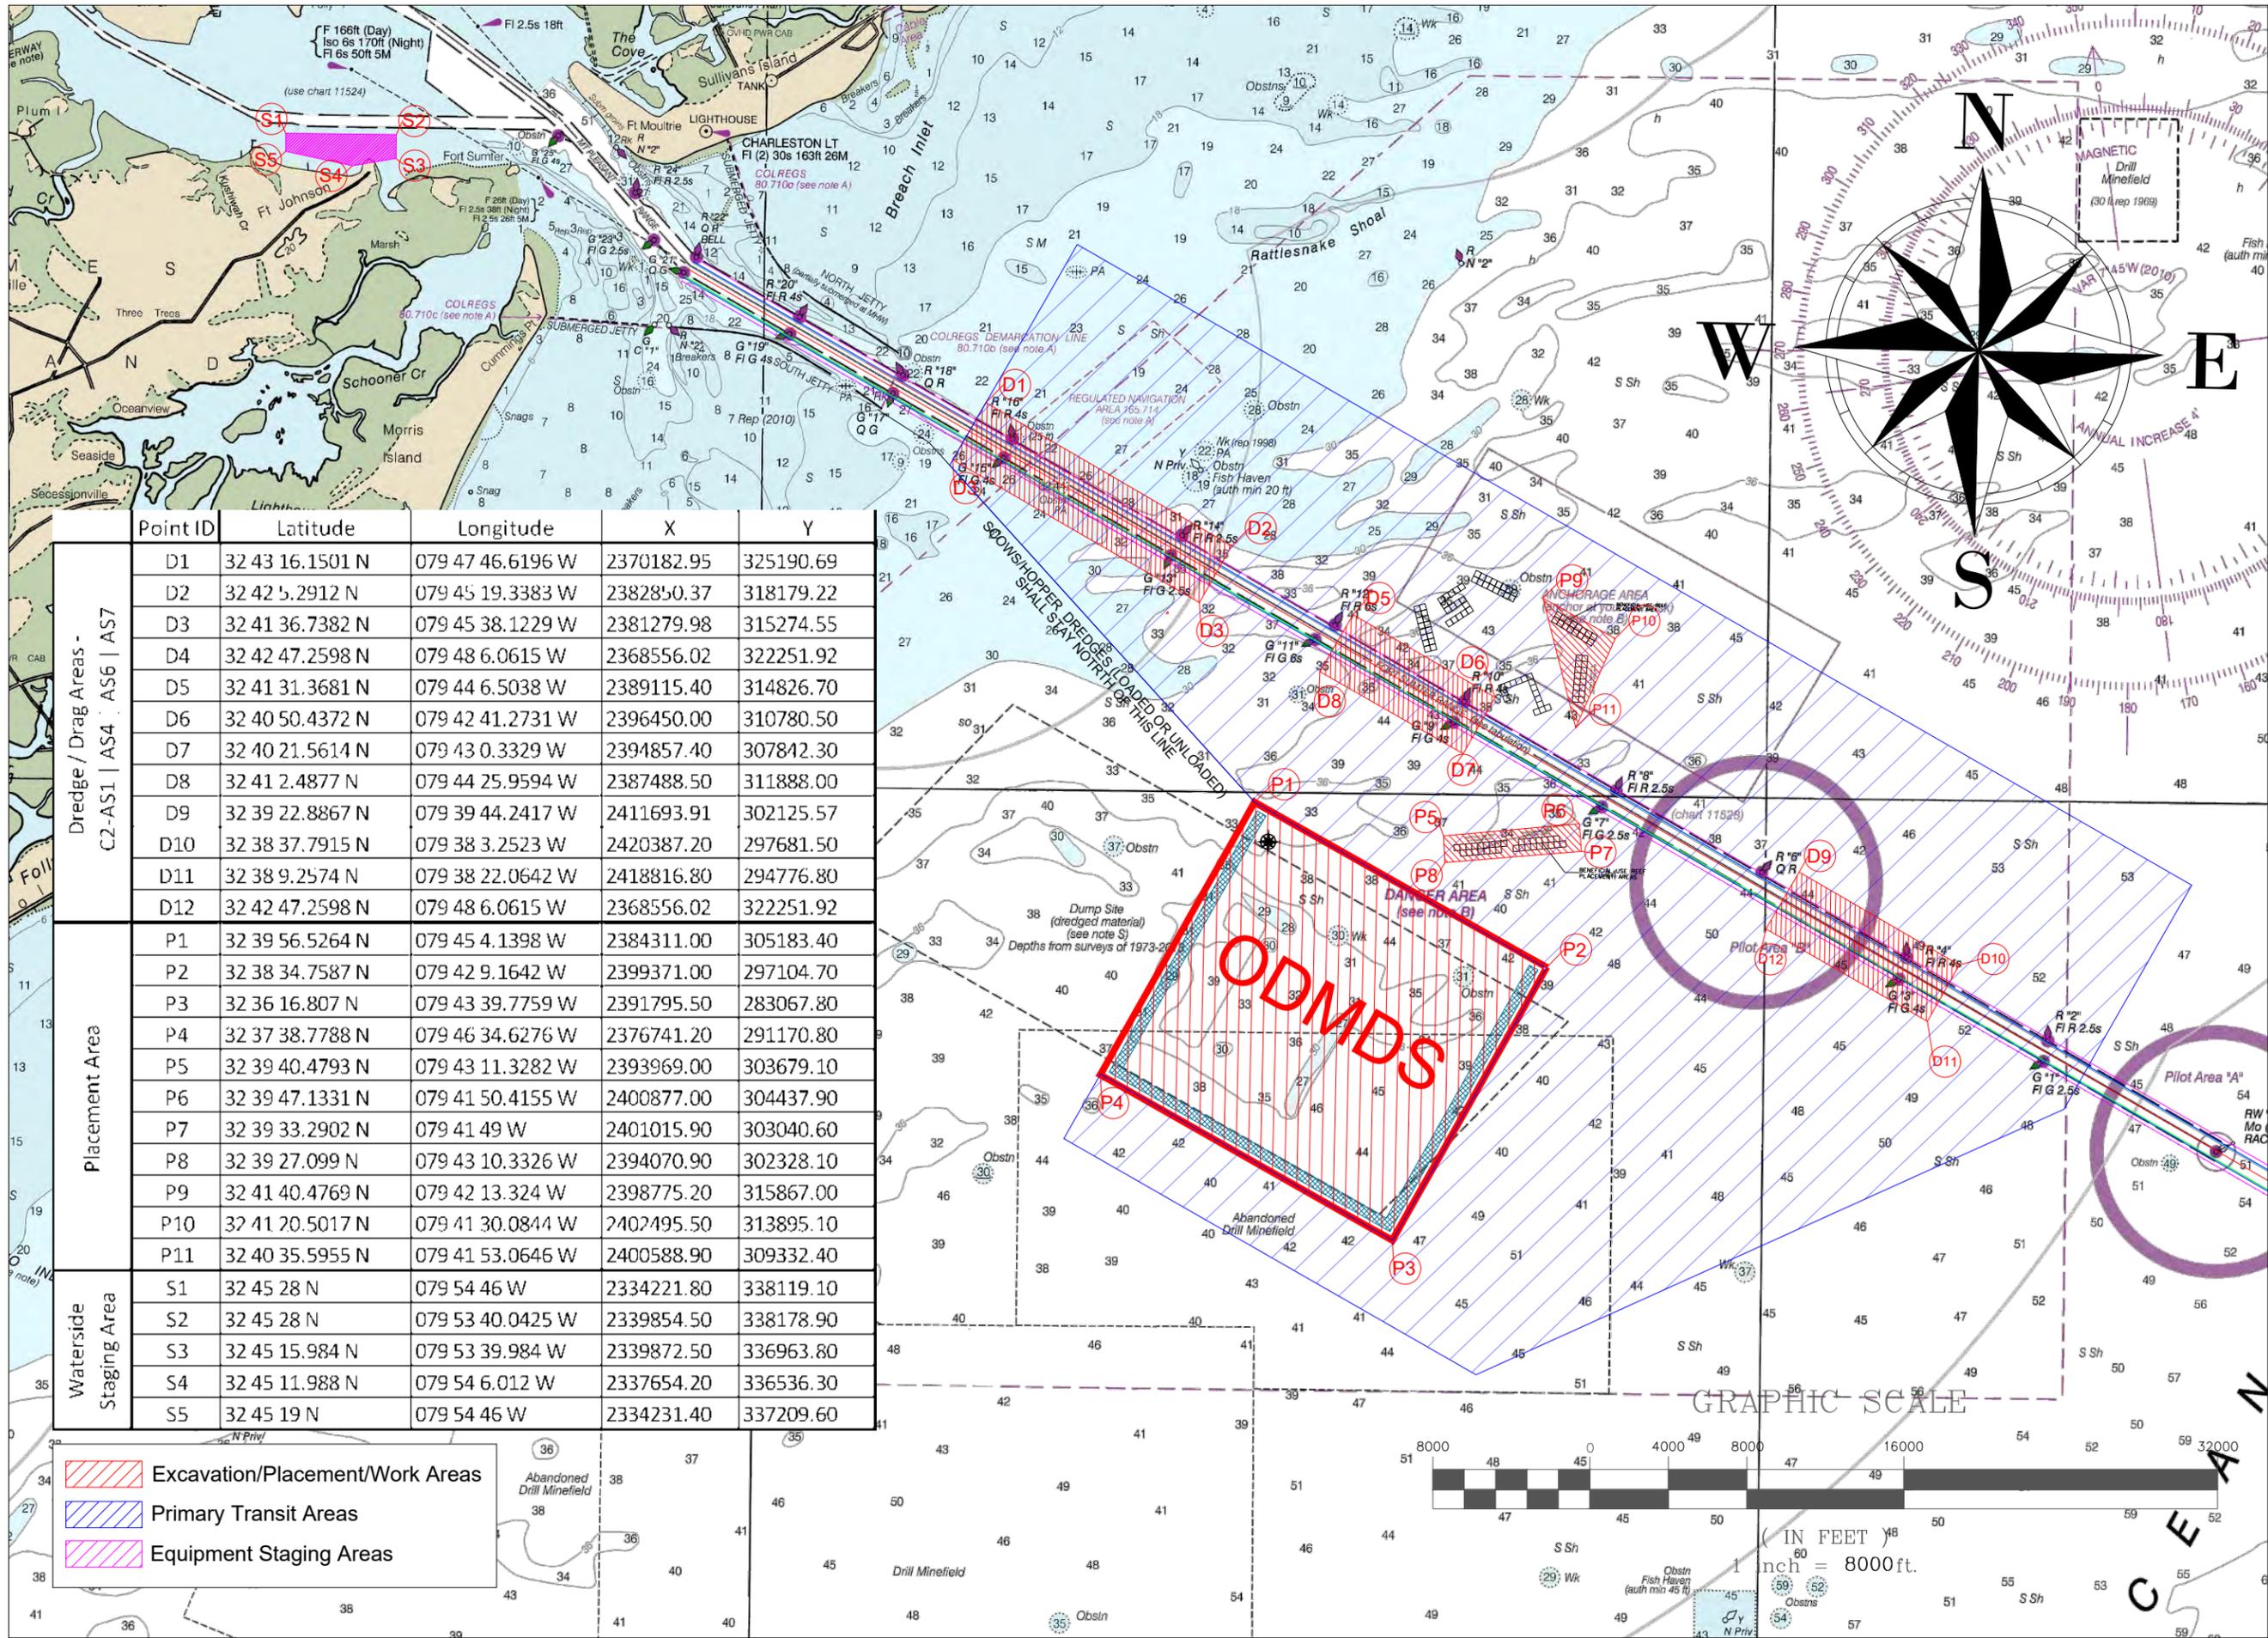

All vessels greater than 500 gross tons intending to transit through the RNA must seek prior approval from the COTP Savannah at least 24-hours in advance of the vessel's arrival to, or departure from, the Port of Brunswick. The COTP Savannah can be contacted at (614) 943-5532. The COTP Savannah's designated representative can be contacted on VHF-FM channel 13. Upon approval to enter the RNA, the COTP Savannah will provide an approved timeframe a vessel may enter the RNA. Chart: 11506, Ref: LNM 37/19, 38/19, 40/19, 42/19, 46/19

GEORGIA – ST. SIMONS SOUND: INSTALL OF PILES AROUND M/V GOLDEN RAY

Weeks Marine will be installing piles to create a barrier around the M/V GOLDEN RAY. During this construction phase, approximately 40 pile pairs will be installed. After the install of the piles, lights will be installed directly on the top of each pile. The lights will be transferred from the pile to the top of the pile pair structural framing when the framing is installed, with one light on each end of the top framing beam, with the lights approximately 20 feet apart at an elevation of +20 feet above MLLW. The pile pairs are typically spaced 155 feet apart around the perimeter of the EPB, environmental protection barrier. The lights will be an all-around white light with a minimum range of 1-mile. Vessels on scene: (2) Tugs: ROBERT and THOMAS, (3) Derrick Crane Barges: Weeks 526, 531 and 541 and (1) Crew boat: SORENSEN MILLER. All vessels will monitor VHF channels 13 and 16. Further information contact Weeks Marine, Rick Palmer at (757) 387-0032 or the US Coast Guard Marine Safety Unit Savannah at (912) 652-4353. Chart: 11506, Ref: LNM 07/20

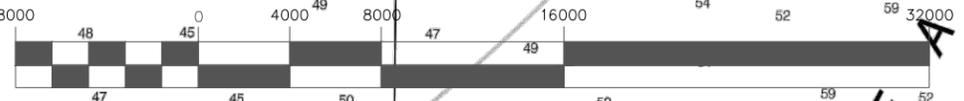

FLORIDA – STUART – ST. LUCIE RIVER: PORT ST LUCIE RIVERWALK BOARDWALK CONSTRUCTION

Construction on the City of Port St. Lucie's Riverwalk will commence on January 14, 2020. The project includes the construction of a 1300-foot boardwalk along the eastern shoreline of the St. Lucie River just south of the Port St. Lucie Blvd. Bridge. Floating equipment used during the project will include a 150 foot x 40 foot inland spud barge with crawler crane, 30 foot x 8 foot assistance barge, and turbidity curtain. During the project, construction equipment will occupy approximately 60 feet of the St. Lucie River, leaving approximately 200 feet of navigable channel to the west of the barge. The contractor will properly light all barges and pilings. The project is expected to be completed by May 2020. Chart: 11428, Ref: LNM 02/20

RE: Local Notice to Mariners / Notice of Intent to Dredge

Designation: Wave Buoy – Charleston Offshore
Post 45 Charleston Entrance Channel Maintenance and New Work
USACE Contract No. W912HP-17-C-0007 / USACE Contract No. W912HP-18-C-0001
United States Army Corps of Engineers

Contractor: Great Lakes Dredge & Dock Company, LLC
2122 York Road
Oak Brook, IL 60523
Point of Contact: John Huit
(630) 207-5196

Equipment: Nexsens Technology – Wave Data Buoy – Model CB950

Purpose / Duration: The wave data buoy is being deployed in the approximate work area of the Charleston Entrance Channel Dredging Projects to monitor sea conditions for the purpose of supporting safe dredging operations offshore. The wave data buoy will be anchored/tethered to the sea floor with ~130' of chain, the exact position of the buoy is dependent on local tides and currents. Mariners and vessels operating are advised to remain clear of the area.

Wave Buoy Location: The attached map indicate the current location including coordinates.
32 37 56.7488 N X 2418950.13
079 38 20.7561 W Y 293514.88

We will report updates of the data buoy should the location change. Additionally, local updates will be emailed out daily during operations to Charleston Area Pilots, USCG, and USACE. Should you have any questions concerning the data buoy, please contact us immediately.

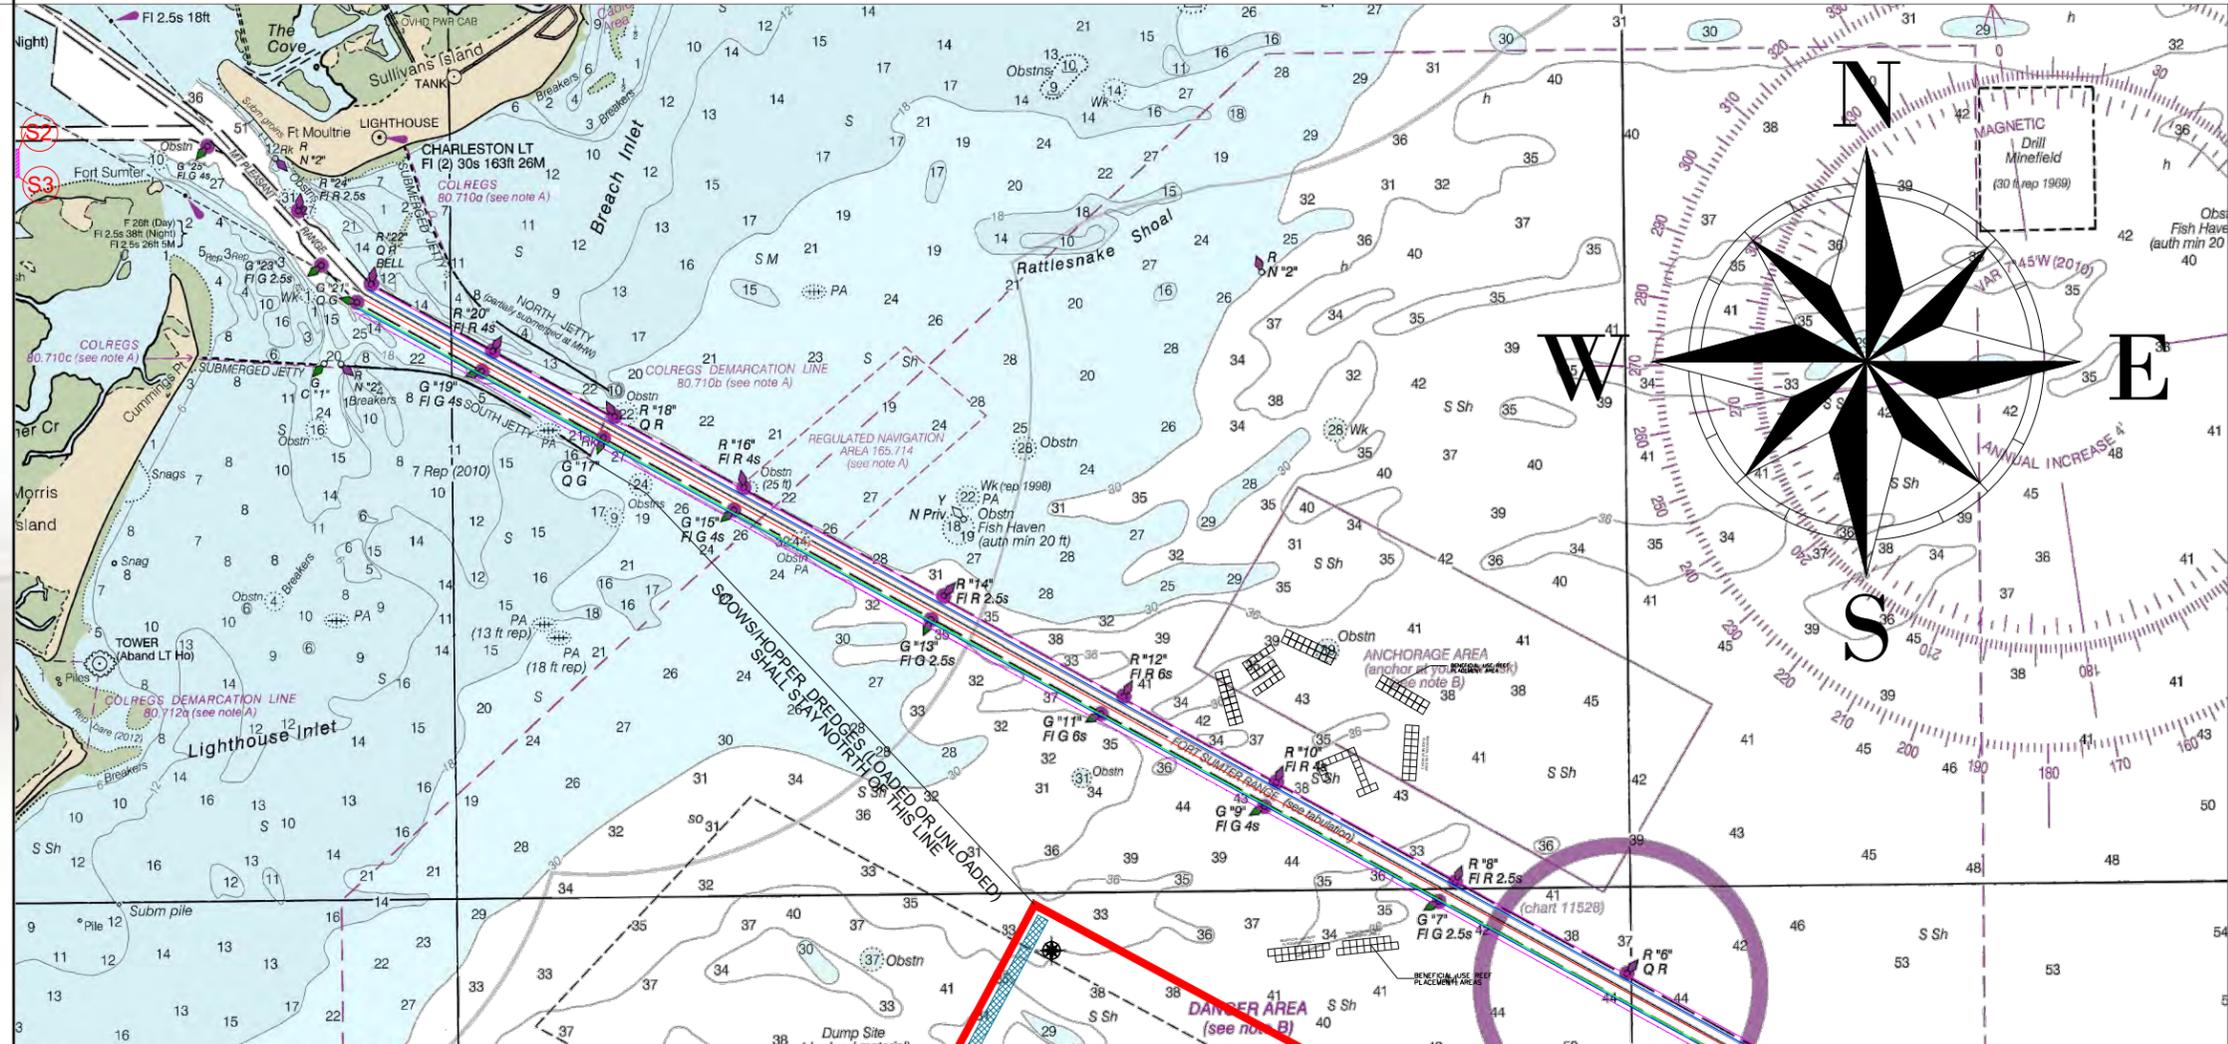

Sincerely,

Matthew Paladino

NexSens CB-950

Data Buoy

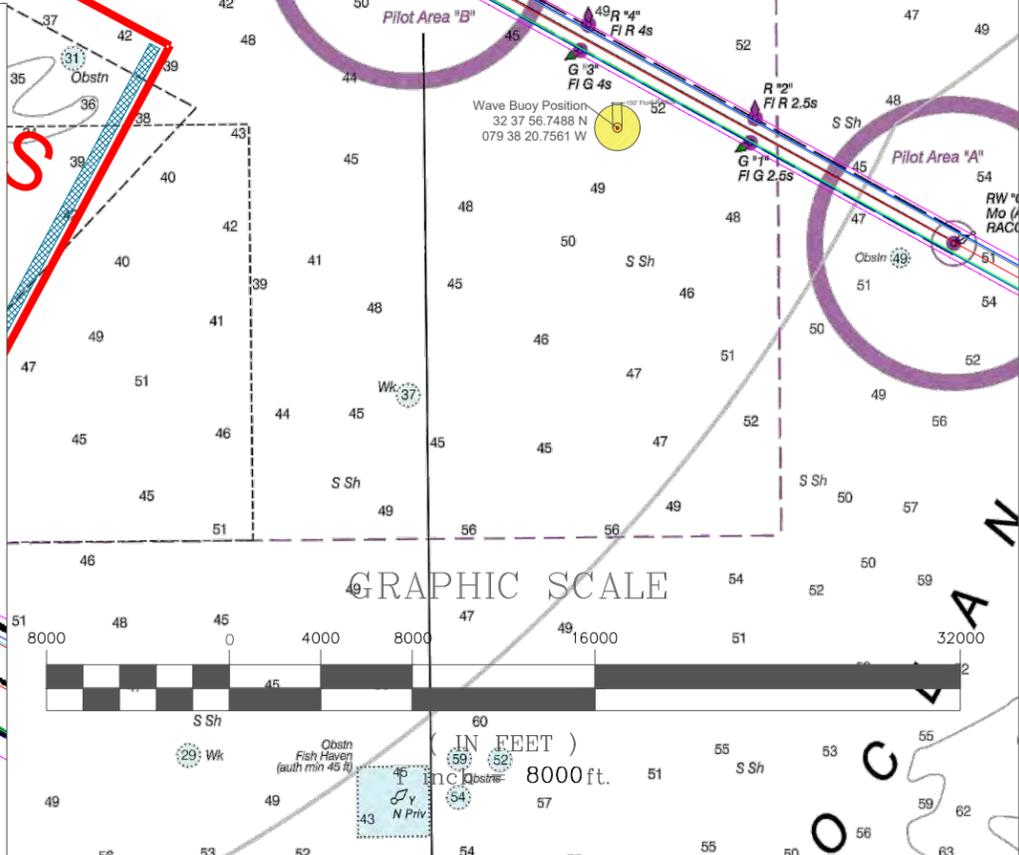

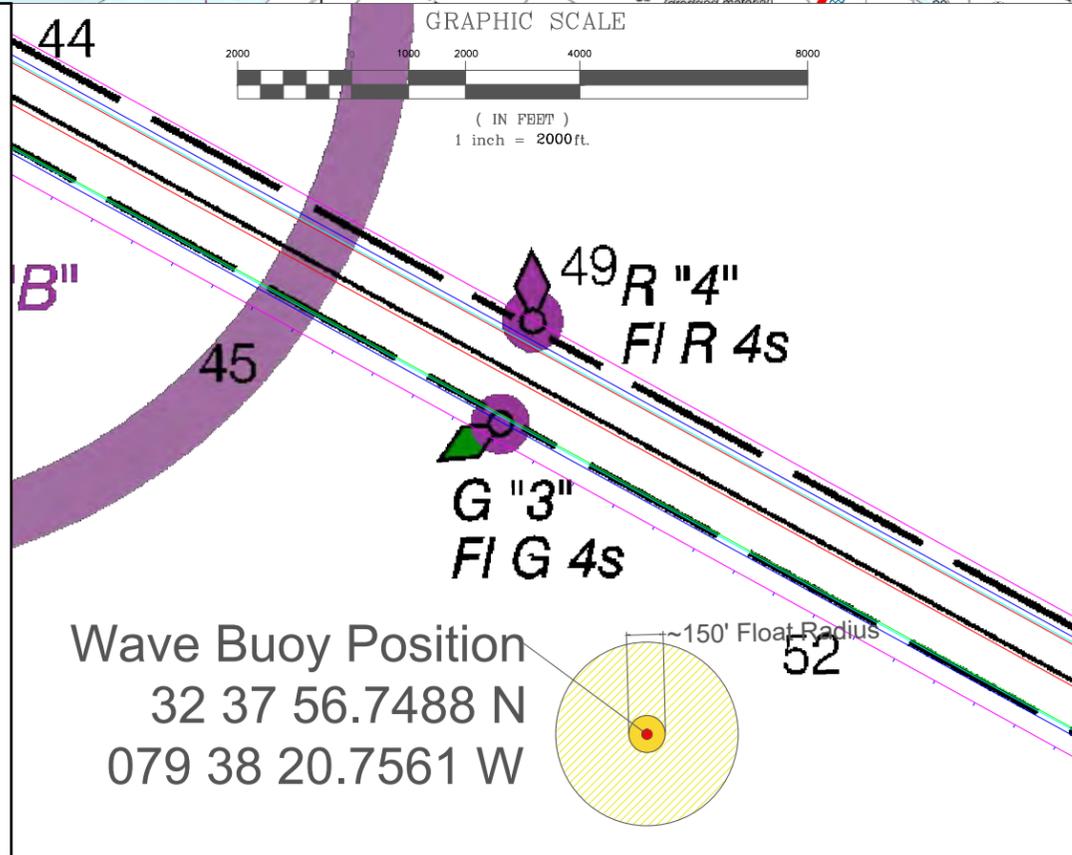

Wave Data Buoy

Buoy is anchored in the listed location with ~130' of chain tethering the buoy. Exact position is dependent on tides and currents.

Buoy has an exposed Topside Tower ~45" above waterline equipped with solar panels for maintaining system operations.

Buoy tower is equipped with solar marine light with 4-nautical mile range, 60 flashes per minute, yellow.

NORTH LOBE

SEMINOLE BLVD

102nd Ave./ Bryan Dairy

SOUTH LOBE

NOTICE TO LOCAL BOATERS

Date of Notice: 07-01-2019

Effective End Date: 10-20-2022

RESTORATION DREDGING TO BE CONDUCTED WITHIN LAKE SEMINOLE

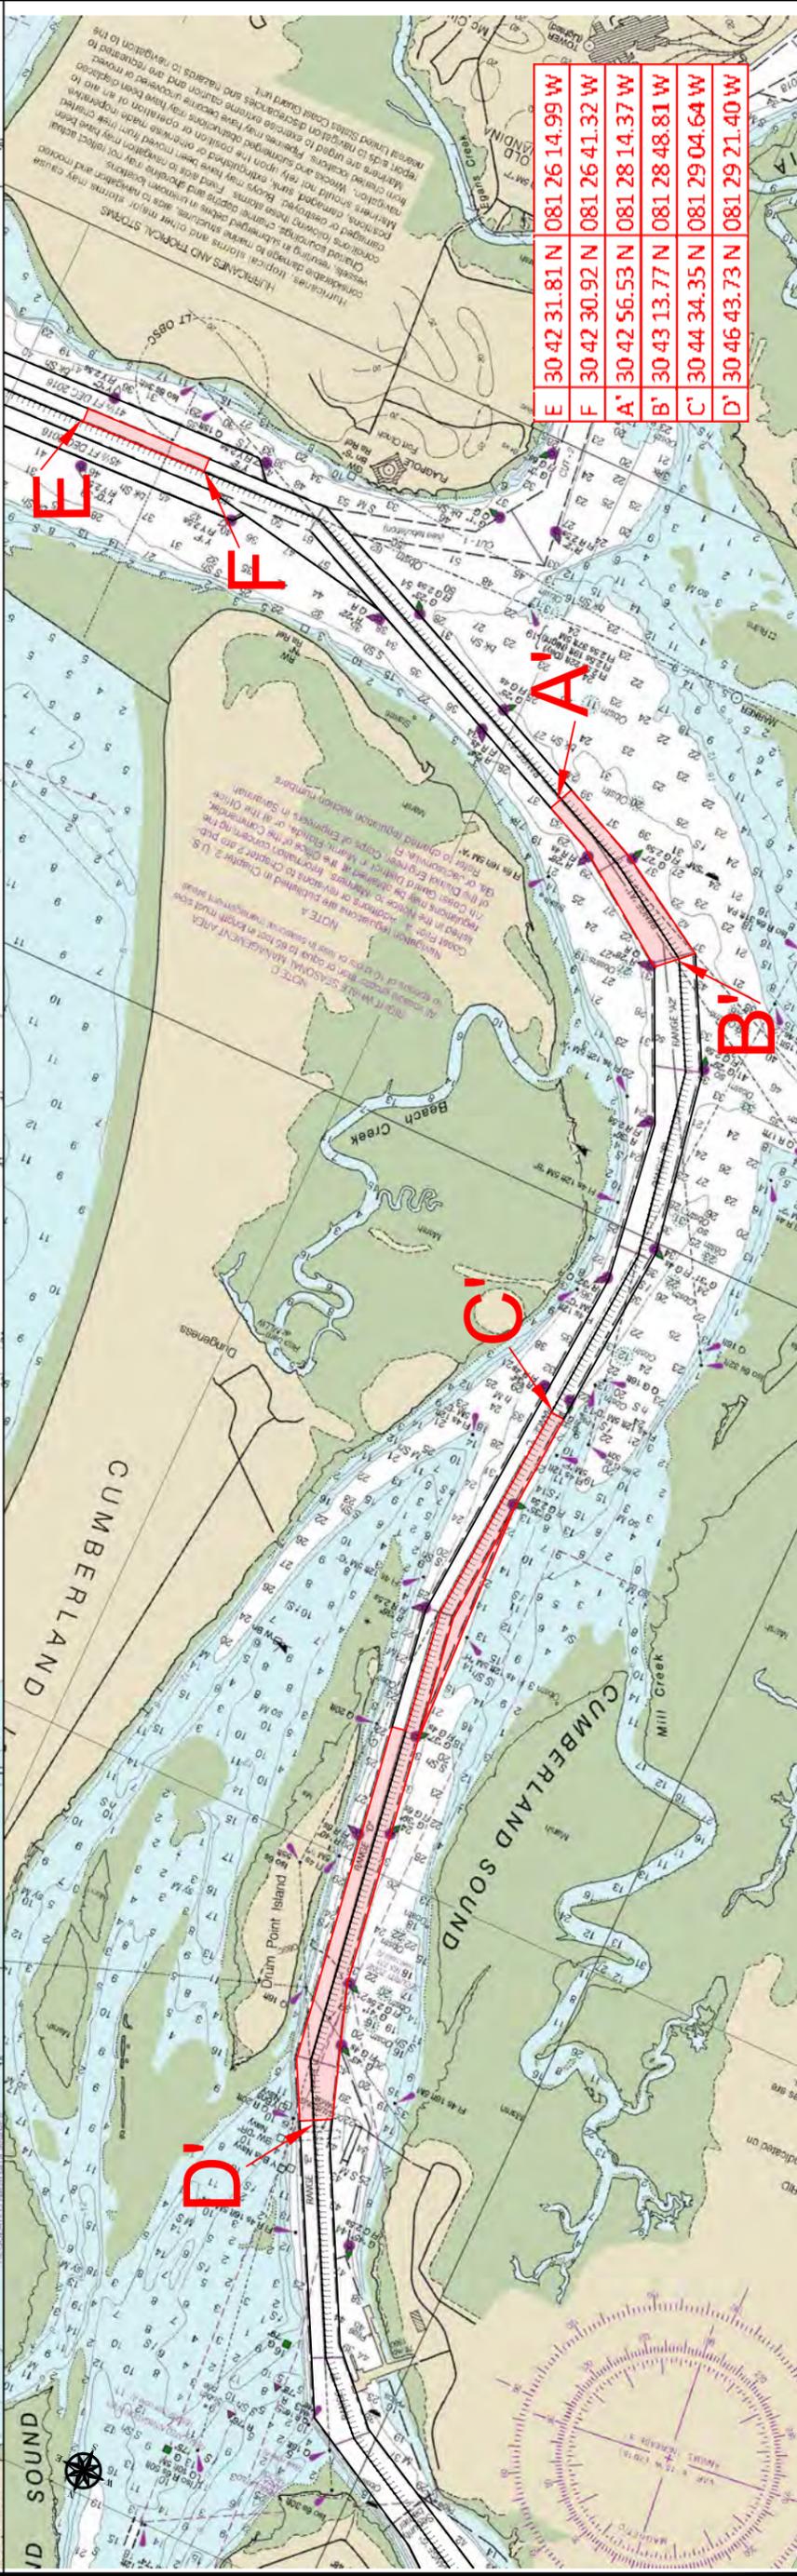

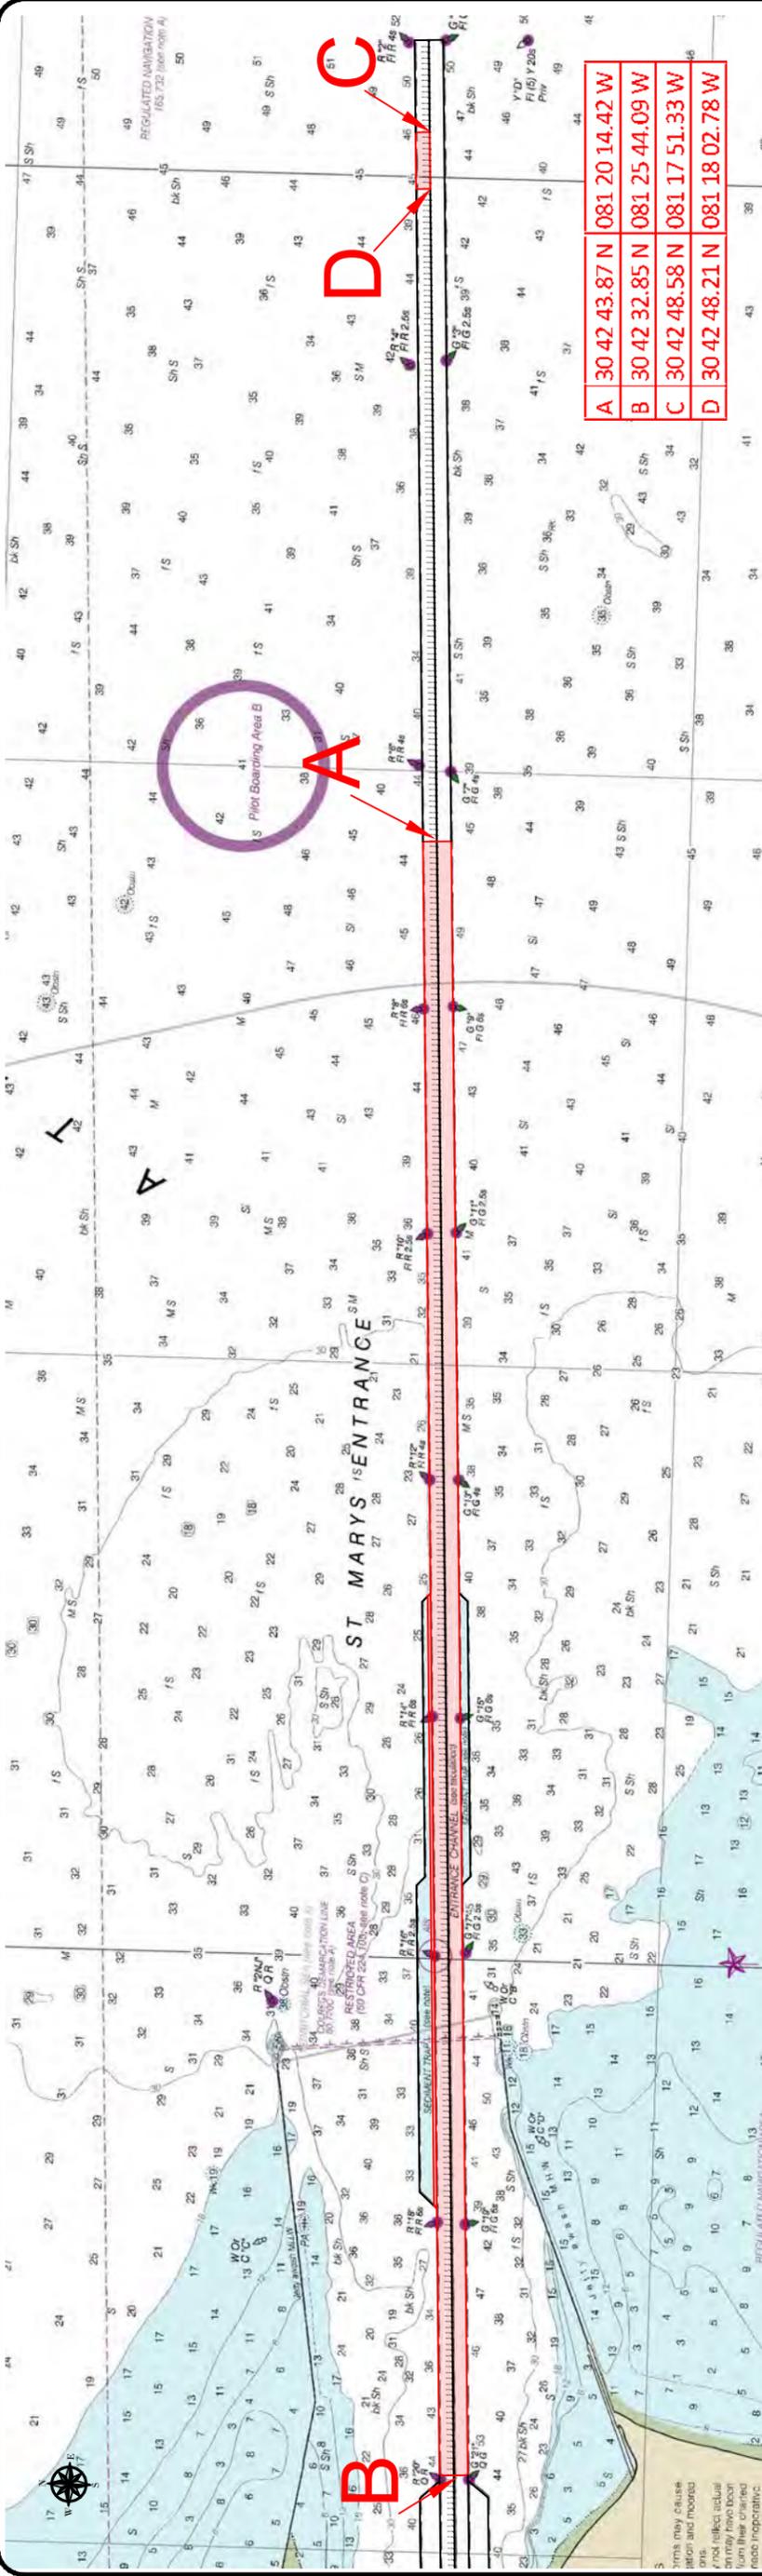

Dredging Commence Date:	October 1, 2019
Dredging Completion Date:	October 31, 2022 (anticipated)
Hours of Operation:	24 hours per day (day and night)
Days of Operation:	Monday through Sunday (7 days per week)
Name of Dredge Vessel:	Jessie Marie Dredge (others possible)
VHF Channels Monitored:	Channels 16 & 68
Land Contact:	Keith Ayers (Project Superintendent) Cell: (815) 315-3255
Secondary Land Contact:	Bret Sapp (Project Manager) Cell: (727) 798-0238

Mariners are urged to use extreme caution in the area, transit at their slowest safe speed to minimize wake, and proceed with caution after passing arrangements have been made. Floating and submerged high density polyethylene (HDPE) pipeline associated with the hydraulic dredging operations of the lake will be utilized. Pipeline, work vessels, dredge barge, booster pump barge(s) and buoys will be visibly lighted and marked according to Coast Guard regulations and will be in the area until all work is complete and can change configuration daily. Vessels and/or equipment will be located on lake in multiple locations at the same time. PLEASE SEE MAP FOR DETAILS ON WHERE THIS EQUIPMENT CAN BE LOCATED.
