**United States
Coast Guard**

LOCAL NOTICE TO MARINERS

District: 7

Week: 25/20

LITTLE RIVER, SOUTH CAROLINA TO ECONFINA RIVER, FLORIDA (INCLUDES PUERTO RICO AND THE U.S. VIRGIN ISLANDS)

Commander, Seventh Coast Guard District (dpw)
Brickell Plaza Federal Building
909 SE 1st Avenue, Room 406
Miami, Florida 33131-3028
Telephone: (305) 415-6750

LNM Article Entries and Updates: D07-SMB-D7-LNM@uscg.mil
Proposed Changes Comments: D07-SMB-DPWPublicComments@uscg.mil

Aids to Navigation discrepancies (missing, damaged, extinguished or off-station), shoaling or hazard to navigation and Bridge discrepancies (including lighting) report to the nearest Coast Guard unit.

-DISTRICT 7: (305) 415-6800
-SECTOR CHARLESTON: (843) 740-7050
-SECTOR JACKSONVILLE: (904) 714-7557
-SECTOR MIAMI: (305) 535-4472
-SECTOR KEY WEST: (305) 292-8727
-SECTOR ST PETERSBURG: (727) 824-7506
-SECTOR SAN JUAN: (787) 729-2041

BROADCAST NOTICE TO MARINERS

The following Broadcast Notice to Mariners (BNM) are in effect and have been included, unless previously cancelled, and promulgate important navigational safety information that is of immediate concern to Mariners:

- CCGD7 (D7) to BNM 214-20
- SECTOR CHARLESTON (CHA) to BNM 141-20
- SECTOR JACKSONVILLE (JAX) to BNM 114-20
- SECTOR MIAMI (MIA) to BNM 083-20
- SECTOR KEY WEST (KWT) to BNM 037-20
- SECTOR ST PETERSBURG (STP) to BNM 444-20
- SECTOR SAN JUAN (SJM) to BNM 020-20

Navigation Internet Sites:

Local Notice to Mariners (LNM) published weekly on the USCG Navigation Center website:
<https://www.navcen.uscg.gov/?pageName=lnmDistrict®ion=7>

Public Notices for Bridges: <https://www.navcen.uscg.gov/?pageName=prBridges>

Online 2020 Light List: <https://www.navcen.uscg.gov/index.php?pageName=lightLists>
Full updates to electronic editions of these volumes: <https://www.navcen.uscg.gov/>

USCG Auxiliary Public Education Classes: https://www.cgaux.org/boatinged/class_finder/index.php

USCG Navigation Information Service (NIS): <https://www.navcen.uscg.gov>

U.S. Coast Pilot: <https://nauticalcharts.noaa.gov/publications/coast-pilot/index.html>

NOAA Chart Corrections and Chart Viewer: <https://www.nauticalcharts.noaa.gov>

NTM Special Notice Section: <https://msi.nga.mil/NTM>

Note: This publication is the subject of an ongoing internal review in an effort which includes improving grammatical and formatting uniformity and some changes may be noticeable. The inclusion of information obtained from District-wide Broadcast Notice to Mariners (BNM) has continued but the method in which they are listed on this cover page has also changed. For any questions or comments please email D07-SMB-D7-LNM@uscg.mil

ABBREVIATIONS

A through H

ADRIFT - Buoy Adrift
AICW - Atlantic Intracoastal Waterway
AI - Alternating
B - Buoy
BKW - Breakwater
bl - Blast
BNM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK/Daymk - Daymark
DBN/Dbn - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - eclipse
EST - Established Aid
ev - every
EVAL - Evaluation
EXT - Extinguished
F - Fixed
fl - flash
Fl - Flashing
G - Green
GIWW - Gulf Intracoastal Waterway
HAZ - Hazard to Navigation
HBR - Harbor
HOR - Horizontal Clearance
HT - Height

I through O

I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
ISL - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LNM - Local Notice to Mariners
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal
MSLD - Misleading
N/C - Not Charted
NGA - National Geospatial-Intelligence Agency
NO/NUM - Number
NOS - National Ocean Service
NW - Notice Writer
OBSCU - Obscured
OBST - Obstruction
OBSTR - Obstruction
Oc - Occulting
ODAS - Anchored Oceanographic Data Buoy

P through Z

PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RRL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal
STA - Station
STRUCT - Structure
St M - Statute Mile
TEMP - Temporary Aid Change
TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition:

24/7 - twenty-four hours per day, seven days a week
AIS - automatic identification system
COTP - Captain of the Port
FWC - Florida Fish and Wildlife Conservation
GIWW - Gulf Intracoastal Waterway
GPS - Global Positioning System
km/hr - kilometer per hour
kt(s) - knot(s)
LED - light-emitting diode
LL - Light List
MLLW - mean lower low water
MLW - mean low water
mph - miles per hour
MMSI - Maritime Mobile Service Identity
m/v - motor vessel
NANU - Notice Advisory to NAVSTAR
NAVCEN - U.S. Coast Guard Navigation Center
NGA - National Geospatial-Intelligence Agency
NIS - U.S. Coast Guard Navigational Informational Service
NM - nautical miles
NVIC - U.S. Coast Guard Navigation and Vessel Inspection Circulars
ODMDS - ocean dredge material disposal site
PATON - private aids to navigation
PWS - Tropical Cyclone Surface Wind Speed Probabilities
RHIB - ridged-hull inflatable boat
SCPA - South Carolina Port Authority
s/v - sailing vessel
TCP - tropical cyclone public advisory
TCM - tropical cyclone forecast/advisory
UXO - unexploded ordinance
V-AIS - virtual automatic identification system

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

HURRICANE INFORMATION:

The hurricane season extends from June 1st through November 30th. Hurricanes can cause excessive damage to vessels and loss of life. To minimize these dangers, the following precautions should be taken by all mariners before getting underway during the hurricane season:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures;
- (b) Pre-sailing check of vessel, machinery, and equipment for seaworthiness;
- (c) Installation of strong ground tackle;
- (d) Review of storm center evasion procedures;
- (e) Knowledge of nearest hurricane shelter or port; and
- (f) Constant radio watches on channel 16 VHF-FM and frequent monitoring of weather broadcasts.

The civilian hurricane warning service for the North Atlantic is provided by the National Hurricane Center, Miami, Florida. The center collates ship, aircraft, radar, and satellite data to produce and issue tropical cyclone warnings and forecasts for the North Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico. A Tropical Cyclone Public Advisory (TCP) is issued every six hours, with intermediate bulletins provided as needed. For tropical storms and hurricanes threatening to cross the coast of the U.S., coastal warnings are issued to the public so that precautionary actions, including evacuation, can be initiated to minimize damage and loss of life.

Four alerts are issued:

- (a) **TROPICAL STORM WATCH** – An announcement that sustained winds of 34 to 63 kts (39 to 73 mph or 63 to 118 km/hr) are possible within the specified area within 48 hours in association with a tropical, subtropical, or post-tropical cyclone.
- (b) **TROPICAL STORM WARNING** – An announcement that sustained winds of 34 to 63 kts (39 to 73 mph or 63 to 118 km/hr) are expected somewhere within the specified area within 36 hours in association with a tropical, subtropical, or post-tropical cyclone.
- (c) **HURRICANE WATCH** – An announcement that sustained winds of 64 kts (74 mph or 119 km/hr) or higher are possible within the specified area in association with a tropical, subtropical, or post-tropical cyclone. Because hurricane preparedness activities become difficult once winds reach tropical storm force, the hurricane watch is issued 48 hours in advance of the anticipated onset of tropical storm force winds.
- (d) **HURRICANE WARNING** – An announcement that sustained winds of 64 kts (74 mph or 119 km/hr) or higher are expected somewhere within the specified area in association with a tropical, subtropical, or post-tropical cyclone. Because hurricane preparedness activities become difficult once winds reach tropical storm force, the warning is issued 36 hours in advance of the anticipated onset of tropical-storm-force winds. The warning can remain in effect when dangerously high water or a combination of dangerously high water and waves continue, even though winds may be less than hurricane force.

Additional information of interest to mariners is included in the Tropical Cyclone Forecast/Advisory (TCM) and the Tropical Cyclone Surface Wind Speed Probabilities (PWS) products. The TCM provides current and forecast storm positions, intensities, and wind fields out to 120 hours. The PWS provides probabilities of sustained wind speeds equal to or exceeding 34-, 50-, and 64-kt wind speed thresholds for select coastal and offshore locations.

LNM: 20/20

HURRICANE INFORMATION CONTINUED:

Mariners are reminded that aids to navigation, particularly lighted and unlighted buoys, may be moved from charted position, damaged, destroyed, extinguished, or otherwise deemed discrepant as a result of hurricanes and storms. Mariners should not rely solely upon the position or operation of an aid to navigation, but also employ such other methods of determining position as may be available. Port Hurricane Conditions are set up by the COTP and will change as the threat of severe weather increases, or as a storm approaches a specific COTP Area of Responsibility. For COTP-specific Port Hurricane Conditions, you should review information provided under the Port Directory tab of <http://homeport.uscg.mil> Condition 4 – Hurricane Seasonal Alert. June 1st - November 30th; port status: open.

Condition Whiskey – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 72 hours; port status: open.
 Condition X-Ray – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 48 hours; port status: open.
 Condition Yankee – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 24 hours; port status: restricted; vessel/facility control measures in effect.
 Condition Zulu – Sustained Gale Force winds associated with Tropical Cyclone activity are predicted within 12 hours; port status: closed to all vessel traffic and waterside activities except for activities approved by the COTP.

Drawbridges along the coast may deviate from normal operating procedures. Drawbridges are authorized to remain closed upon approach of Gale Force winds of 34 knots or greater. Extended closure periods may be authorized up to 8 hours prior to arrival of Gale Force winds to facilitate evacuation of land traffic. Due to the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of Gale Force winds.

LNM: 20/20

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent

mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

LNM: 01/20

INTERFERENCE WITH AIDS TO NAVIGATION

U. S. Code, Title 14, Part I, Chapter 5, § 84. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 81 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 83 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense. U. S. Code, Title 14, Part I, Chapter 5, § 84.

LNM: 01/20

USCG NAVIGATIONAL INFORMATION SERVICE (NIS)/USCG NAVIGATION CENTER

The United States Coast Guard Navigational Information Service (NIS), operated by the USCG Navigation Center, is staffed 24/7. The NIS provides information on the current operational status, effective policies, and general information on GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar (NANU). These notices can also be obtained via-e-mail subscription through the USCG Navigation Center website (<https://www.navcen.uscg.gov/gps/status/default.htm>). In addition, the NIS investigates all reports of degradation or loss of GPS and DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following Phone: (703) 313-5900, Email: webmaster@navcen.uscg.mil or on the World Wide Web at <https://www.navcen.uscg.gov>.

LNM: 01/20

U.S. ARMY CORPS OF ENGINEERS DISTRICT SITES, CHARLESTON AND JACKSONVILLE

The U.S. Coast Guard strongly recommend that mariners regularly check for any updates and notices on the U.S. Army Corps of Engineers District Sites "Charleston" and "Jacksonville" specifically regarding Notices to Navigation, Channel Condition Reports/Hydrographic Maps and Lock Hours/Notices.

U.S. Army Corps of Engineers Charleston District –

LNM: 06/19

ATLANTIC OCEAN – EAST COAST - OFFSHORE: SURFACE WAVE GLIDER DATA COLLECTION

ThayerMahan, Inc. will be transecting one autonomous, unmanned maritime vehicle (Wave Glider-WG) from approximately 100NM east of Port Canaveral, FL to about 100NM east of Cape May, NJ. The transit will commence on or about May 27, 2020 and is expected to terminate on or about August 27, 2020. Operations will run 24/7 and consist of scientific ocean data collection. The Wave Glider carries no fuel, lubricants or hydrocarbons. It is wave powered and remotely attended from the ThayerMahan Operations Center, moving at speeds of about 1kt, and is designed to automatically give way if encountered by a vessel transmitting AIS. It is approximately 6.5' x 2' (surfboard size), copper in color, with a contact plaque and mast extending 3' above the water surface. Mariners are advised to requested to transit the area with caution and to remain a safe distance from the wave glider. Further information contact the ThayerMahan Operations center at (860) 969-3171.

LNM: 20/20

ATLANTIC OCEAN GEORGIA - FLORIDA - JACKSONVILLE: USN EXERCISES

The following areas will contain exercises hazardous to surface vessels in the JAX/CHASNOA during June 22-28, 2020. Mariners are advised to avoid these areas:

Date: 22 - 28 JUN 0000-2359 (LCL) GUNEX AREA W-137L
30-45N2 80-56W9

30-45N2 80-30W1
30-34N0 80-30W1
30-34N0 80-57W0
30-36N2 80-57W0

Date: 22 - 28 JUN 0000-2359 (LCL) GUNEX AREA W-138L

30-45N2 80-30W0
30-45N2 79-38W7
30-34N0 79-41W1
30-34N0 80-30W1

Date: 22 - 28 JUN 0000-2359 (LCL) GUNEX AREA 31J

29-20N3 79-50W1
29-20N3 79-40W0
29-10N2 79-40W0
29-10N2 79-50W1

Date: 22 - 28 JUN 0000-2359 (LCL) GUNEX AREA 27C

30-00N3 81-00W9
30-00N3 80-50W3
29-50N6 80-50W3
29-50N6 81-00W9

Date: 22 - 28 JUN 0000-2359 (LCL) GUNEX AREA JSWTR

30-28N3 80-22W2
30-28N3 80-00W8
30-03N6 80-06W4
30-03N6 80-29W9

LNM: 25/20

ATLANTIC OCEAN – FLORIDA – CAPE CANAVERAL: SPACE LAUNCH ZONES (VIRTUAL- AIS PRIVATE AID TO NAVIGATION)

The U.S. Coast Guard has approved the use of a Virtual Automatic Identification System Private Aid to Navigation (V-AIS PATON) to mark a restricted navigation area during a space launch. The Coast Guard authorized the Space Exploration Technologies Corporation, better known as SpaceX, to use V-AIS PATONs to inform mariners of non-charted restricted zones around launch areas. While the Coast Guard does not approve V-AIS PATON for all restricted areas, particularly charted ones, the space launch zones are non-charted, dynamic and temporary. Safety zones designed to keep vessels from entering the launch area while an active rocket launch is taking place.

The Captain of the Port Jacksonville, Florida will activate Safety Zone "B" located near Cape Canaveral, as described in 33 CFR 165.775(a)(2), 45 minutes prior to the opening of the scheduled launch window. At that time, SpaceX will transmit V-AIS aids marking the corners of the active safety zone. The V-AIS aids will remain transmitting until the Captain of the Port Jacksonville has deactivated the safety zone. The V-AIS aids will be labeled:

N 28° 48.8' W 80° 28.9' (28.813333 -80.481667) N1*X*33CFR165.775 (A) (2), MMSI# 993663027
N 28° 29.7' W 80° 18.9' (28.495000 -80.315000) E2*X*33CFR165.775 (A) (2), MMSI# 993663028
N 28° 29.7' W 80° 31.6' (28.495000 -80.526667) S3*X*33CFR165.775 (A) (2), MMSI# 993663029
N 28° 40.1' W 80° 38.4' (28.668333 -80.640000) W4*X*33CFR165.775 (A) (2), MMSI# 993663030

If a vessel equipped with AIS is determined to be entering the launch hazard area, an addressed safety message 14 with the text "REGULATED AREA 33 CFR 165.775 ACTIVE STAY CLEAR" will be transmitted to the vessel. All provisions of the safety zone remain in effect; no person or vessel may enter, pass through or remain within the safety zone unless authorized by the Captain of the Port. Mariners are required to contact the Coast Guard via VHF-FM channel 16 to arrange for this authorization.

LNM: 17/20

ATLANTIC OCEAN - FLORIDA - CAPE CANAVERAL: EASTERN RANGE OP# X0108 FALCON 9 STARLINK V1.0-L9 (UPDATED: June 22, 2020)

Eastern range will be conducting hazardous operations surface to unlimited within portions of Warning Areas W497A, W497B, W137F/G, W138E, W139E/F, W140E, W141, W122 and the following Hazard Areas.

A: From 2839 40.67N 8038 9.75W
TO 2848N 8030W
TO 2920N 7952W
TO 2917N 7950W
TO 2837N 8027W
TO 2834 20.25N 8034 15.16W
TO 2838 25.83N 8037 17.02W to beginning

B: From 3139N 7720W
TO 3315N 7557W
TO 3340N 7459W
TO 3321N 7425W
TO 3245N 7432W
TO 3125N 7706W to beginning

2. Hazard periods for primary launch day and backup launch days;

Primary launch day: 25/2029Z thru 25/2137Z Jun 20. Preferred T-0 is 2039Z.
Backup launch day: 26/2008Z thru 26/2116Z Jun 20. Preferred T-0 is 2018Z.
(Ref: LNM 25/20)

LNM:24/20

ATLANTIC OCEAN-FLORIDA-CAPE CANAVERAL: EASTERN RANGE OP X4733 FALCON 9 GPS III-3.

Eastern range will be conducting hazardous operations surface to unlimited within portions of Warning Areas W497A, W497B, W137F/G, W138E, W139E/F, W141, W122 and the following Hazard Areas.

A: From 2837 08.90N 8036 12.53W
TO 2906N 8012W
TO 2903N 8008W
TO 2834N 8029W
TO 2831 06.69N 8033 20.06W
TO 2831 32.29N 8033 32.33W to beginning

B: From 3205N 7732W
TO 3346N 7616W
TO 3416N 7544W
TO 3418N 7508W
TO 3352N 7434W
TO 3318N 7440W
TO 3249N 7514W
TO 3150N 7721W to beginning

Hazard periods for primary launch day and backup launch days;

Primary launch day: 30 / 1951Z thru 30 / 2102Z JUNE 20. Preferred T-0 is 1956Z.
Backup launch day: 01 / 1947Z thru 01 / 2058Z JULY 20. Preferred T-0 is 1952Z

LNM:25/20

ATLANTIC OCEAN - FLORIDA - PALM SHORES TO WEST PALM BEACH: USN OPERATIONS

The United States Navy will conduct offshore testing from April 27 - July 31, 2020 with a manned submersible vehicle piloted by two personnel. The submersible will transit on the surface from Intracoastal Waterway (ICW) in vicinity of Riviera Beach west of Peanut Island, south on the ICW to the Port of Palm Beach turning basin. From the turning basin the submersible will be towed by a RHIB out the Lake Worth inlet then south to the operational area. Testing will occur from Lake Worth inlet south to Boynton Inlet from near shore up to 10NM offshore. Testing may occur 24 hours daily, weekdays only. During this time the submersible will be accompanied by two surface RHIBs displaying amber flashing lights. Dive operations with scuba divers in the water may occur anytime during the testing and RHIBs will display diver down flags in the vicinity of scuba divers. RHIBs will be monitoring VHF-FM Channel 16. Mariners are advised to transit the area with caution and maintain 200 yards clearance from RHIBs and dive balls.

Operational area:
N26 46.248 W80 01.910
N26 46.248 W79 50.763
N26 32.863 W80 02.208
N26 32.863 W79 51.111
Chart 11466

LNM: 16/20

ATLANTIC OCEAN - FLORIDA - OFFSHORE FORT LAUDERDALE: USN OPERATIONS ERMA-DERMA

The United States Navy, South Florida Ocean Measurement Facility (SFOMF) will be conducting operations in the water immediately south and east of the Port Everglades inlet. The operations are scheduled within a period beginning at 6:00 a.m. on June 23, 2020 through 9:00 p.m. on July 3, 2020. A naval vessel will be conducting maneuvers between $\frac{3}{4}$ NM to 4NM offshore, and from $\frac{1}{2}$ NM south of the Port Everglades inlet to 2.5NM south of the Dania Beach Pier. The vessel will be restricted in maneuverability and these operations are considered a hazard to navigation. All traffic must remain clear of the area bounded by the coordinates below for the duration of the operations. Local law enforcement and Tow Boat US small craft will provide range security and range clearance for the naval vessel during these operations. Ships entering Port Everglades are requested to enter from the northeast thereby avoiding the waters south of the channel. To allow for the safe operation of the naval vessel,

all maritime traffic transiting the area is requested to stay 5NM east of Port Everglades or inshore of the Barracuda Reef mooring buoys. Any concerned vessels may contact U.S. Navy Fort Lauderdale on VHF-FM Channel 16.

SFOMF OPAREA:

NW Corner: 26-05-03.000 N / 080-05-42.000 W
NE Corner: 26-05-03.000 N / 080-02-04.200 W
SE Corner: 26-00-57.000 N / 080-02-25.200 W
SW Corner: 26-00-57.000 N / 080-06-03.600 W

LNM: 23/20

FLORIDA - STRAITS OF FLORIDA - MARATHON TO DRY TORTUGAS: SURFACE WAVE GLIDER DEMONSTRATION

ThayerMahan, Inc. will be demonstrating up to four autonomous, unmanned maritime vehicles (Wave Glider-WG) in the Straits of Florida between Marathon and Dry Tortugas. The demonstration will commence on or about June 8, 2020 and is expected to terminate on or about July 31, 2020. 24/7 operations consist of system evaluation and scientific ocean data collection. The Wave Glider carries no fuel, lubricants or hydrocarbons. It is wave powered and remotely attended from the ThayerMahan Operations Center, moving at speeds of about 1kt, and is designed to automatically give way if encountered by a vessel transmitting AIS. It is approximately 6.5' x 2' (surfboard size), copper in color, with a contact plaque and mast extending 3' above the water surface. Mariners are requested to transit the area with caution. For more details contact the ThayerMahan Operations center at (860) 969-3171.

LNM: 24/20

WEST INDIES - PUERTO RICO – CEIBA – ISLA PIÑEROS: (UXO)

The U.S. NAVY is advising all mariners to refrain from entering the following area in Ceiba, Puerto Rico: the waters surrounding Isla Piñeros. Mariners are advised to stay away from this danger zone until further notice, as it contains (UXO) Unexploded Ordnance. The U.S. Coast Guard may be contacted via VHF-FM Channel 16 or via landline at (787) 289-2041. For more information, contact Mrs. Maria Danois at (787) 232-3801 or email: maria.danois@navy.mil

WEST INDIES – PUERTO RICO - (ISLA DE VIEQUES) IVO BAHIA SALINA DEL SUR & BAHIA ICACOS: NAVY OPERATIONS

The U.S. Navy will be conducting underwater operations in vicinity of Bahía Salinas del Sur, Bahía Icacos, and the surrounding areas in Vieques, Puerto Rico. Operations will occur from March 2, 2020 through May 29, 2020 from 7:00 a.m. through 4:00 p.m. daily. Mariners are advised to remain at least 3,074' from coordinate boundaries. The Navy Dive Ops Safety Officer can be reached via VHF-FM Channel 16 or the Navy Site Manager, Ms. Maria Danois at (787) 232-3801.

Encompassed by a line connecting the following points beginning: 18°08'56.48"N, 065°20'10.69"W, thence to 18°09'10.72"N, 065°20'04.11"W, thence to 18°08'50.19"N, 065°17'05.78"W, thence to 18°08'05.79"N, 065°16'16.71"W, thence to 18°07'38.60"N, 065°17'45.95"W, thence to 18°07'38.60"N, 065°17'45.94"W, thence to 18°07'23.72"N, 065°17'58.33"W, thence to 18°07'18.76"N, 065°18'29.64"W, thence to 18°07'34.47"N, 065°18'31.81"W back to the beginning point.

LNM: 09/20

WEST INDIES - EAST COAST PUERTO RICO - CULEBRA ISLAND: (UXO)

An Exclusion Zone of 377' is established along the length of Tamarindo Grande Beach in Culebra Island from 18-19.23N / 065-19.47W to 18-19.26N / 065-19.38W due to (UXO) Unexploded Ordnance Operations being conducted. This will remain in effect from 7:00 a.m. - 4:00 p.m. Monday through Friday until further notice. This exclusion zone is for intrusive UXO Operations only. The U.S. Coast Guard may be contacted on VHF-FM Channel 16 or at (787) 289-2041.

FLORIDA - AICW - PALM SHORES TO WEST PALM BEACH - LAKE WORTH NORTH: USN OPERATIONS.

US Navy will conduct testing from April 27 – July 31, 2020 with a manned submersible vehicle piloted by two personnel. Testing may occur 24 hour daily, weekdays only. The vehicle will transit on the surface escorted by two RHIBs with flashing amber lights from intracoastal in vicinity of Riviera Beach west of Peanut Island, north on the intracoastal waterway, transiting under Blue Heron Bridge to approximately 0.5 miles north of the bridge. Operations will take place west of the ICW and may include scuba diving operations. The RHIBs will display diver down flags when divers are in the water. RHIBs will be monitoring VHF-FM Channel 16. Mariners are advised to give wide berth and minimum wake while submersible is transiting on the ICW.

Operational area:

N26 47.902 W80 02.618
N26 47.267 W80 02.601

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER						
Main Panel 2245 NEW YORK HARBOR						
(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			CGD01	074-02-48.001W
	Corrective Action	Green can	Object of Corrective Action		Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		

Advance Notice(s)

SEACOAST – GEORGIA - TYBEE ISLAND TO DOBOY SOUND

The following changes have been approved to the Aids to Navigation System in the Savannah River:

To facilitate the Savannah River Entrance Channel expansion, Tybee LB T (LLNR 350/4530) will be relocated approximately 7.1NM seaward of its current position. In addition (6) physical lighted buoys and (4) V-AIS signals will be established to mark the outer most boundaries of this new channel leg. Positions of all the aids to navigation and V-AIS signals will be published in the Chart and Light List Corrections Section of this publication upon installation. This new channel leg will be named Savannah Entrance Channel.

Chart	11509	LNLM: 15/20
-------	-------	-------------

STRAITS OF FLORIDA – FOWEY ROCKS TO ALLIGATOR REEF

The following change has been approved to the Aids to Navigation System in the Straits of Florida:

Pacific Reef Light (LLNR 935) optic to be upgraded to a more reliable LED (Light-emitting diode) lantern and the nominal range reduced to 7NM.
 Charts: 411 11013 11450 11460 11462 11465 11466 11469 LNLM: 33/14

STRAIGHTS OF FLORIDA – SOMBRERO KEY TO DRY TORTUGAS – LOOE REEF

The following change has been approved to the Aids to Navigation System in Looe Key:

Pelican Shoal Light 26 (LLNR 1020) in position 24-30-21.903N / 081-35-59.070W will be permanently discontinued.
 Chart 11452 LNLM: 20/18

SOUTH CAROLINA – CHARLESTON HARBOR – CHARLESTON HARBOR NORTH CHANNEL

The following changes have been approved to the Aids to Navigation System to the Bennis Reach Range Optics located in the Charleston Harbor North Channel.

Both range structures will be converted to solar power vice A/C power and remain day night optics to provide a more reliable and modern range optic.

Bennis Reach Range Front Light (LLNR 2505.5) in position 32-47-17.763N/079-55-28.611W will be changed from F R characteristic to a FI Q R characteristic.

Bennis Reach Range Rear Light (LLNR 2506) in position 32-47-23.927N/079-55-42.577W will be changed from a Fixed Red characteristic to an ISO R

6s characteristic.

LNLM: 01/20

GEORGIA - SAVANNAH RIVER - KINGS ISLAND TURNING BASIN (UPDATE April 3, 2020)

The following aids have been temporarily discontinued to facilitate dredging operations by the Norfolk Dredging Company:

Kings Island Turning Basin Light 12 (LLNR 5055) in position 32-07-54.581N/081-08-04.510W
Kings Island Turning Basin Light 14 (LLNR 5060) in position 32-08-07.924N/081-08-14.144W

Estimate completion date of dredging by Norfolk Dredging Company is January 2021. Upon completion of dredge operations the aids will be rebuilt. All mariners are requested to exercise caution when transiting the area and contact any of the Norfolk Dredging Company vessels on scene via VHF-FM Channels 13 and 16 (Ref: LNM 14/20).

Chart 11514

LNLM: 11/20

GEORGIA - OSSABAW AND ST. CATHERINES SOUND

The following changes have been approved to the Aids to Navigation System in Ossabaw Sound:

Ossabaw Sound North Channel Daybeacon 10 (LLNR 5760) and Ossabaw Sound North Channel Daybeacon 12 (LLNR 5770) will be changed to Ossabaw Sound North Channel Buoys 10 and 12 with same corresponding LLNR's. With moving shoals and a semi exposed area these conditions make it very difficult to service and rebuild fixed aids. Floating aids will allow the Coast Guard more flexibility when marking safe passage.

Chart 11511

LNLM: 14/19

GEORGIA AND FLORIDA – CUMBERLAND SOUND – FERNANDINA HARBOR TO KINGS BAY

The following change has been approved to the Aids to Navigation System in Kings Bay:

Kings Bay Light 62 (LLNR 7040) will be permanently discontinued

Chart 11503

LNLM: 31/19

FLORIDA - ST. JOHNS RIVER - BRILLS CUT

The following change has been approved to the Aids to Navigation System in the St. Johns River - Brills Cut:

Brills Cut Lighted Buoy 53 (LLNR 7485) in position 30-24-13.550N/081-34-49.775W will be discontinued and replaced with a V-AIS Marker with the same name in the current assigned position.

Chart 11491

LNLM: 19/20

FLORIDA – ST JOHNS RIVER – BRILLS CUT

The following change has been approved to the Aids to Navigation System in the St. Johns River - Brills Cut:

Brills Cut Buoy 53A (LLNR TBD) will be established in approximate position 30-24-13.568N/081-34-55.203W.

Chart 11491

LNLM: 25/20

FLORIDA – MIAMI HARBOR – MIAMI MAIN CHANNEL

The following change has been approved to the Aids to Navigation system in the Meloy Channel near the Miami Main Channel.

Meloy Channel Shoal Buoy (LLNR TBD) will be established in approximate position 25-46-08.793N/080-08-31.447W. This change will give mariners a reference to a shoal that has encroached into the main channel.

Chart 11468

LNLM: 25/20

FLORIDA - MIAMI TO MARATHON AND FLORIDA BAY - HAWK CHANNEL - LARGO SOUND CHANNEL

The following changes have been approved to the Aids to Navigation System in the Largo Sound Channel:

Relocate Largo Sound Channel Daybeacon 3 (LLNR 11775) to 25-05-51.468N/080-24-09.400W
Relocate Largo Sound Channel Daybeacon 4 (LLNR 11780) to 25-05-51.677N/080-24-09.245W
Relocate Largo Sound Channel Daybeacon 5 (LLNR 11785) to 25-05-55.669N/080-24-30.290W
Discontinue Largo Sound Channel Daybeacon 6A (LLNR 11795)
Relocate Largo Sound Channel Daybeacon 7 (LLNR 11800) to 25-05-57.979N/080-24-39.051W
Discontinue Largo Sound Channel Daybeacon 7A (LLNR 11805)
Relocate Largo Sound Channel Daybeacon 8 (LLNR 11810) to 25-05-59.607N/080-24-40.095W
Discontinue Largo Sound Channel Daybeacon 10 (LLNR 11820)
Relocate Largo Sound Channel Daybeacon 11 (LLNR 11825) to 25-06-07.312N/080-24-50.494W

Chart 11451

FLORIDA – MIAMI TO MARATHON AND FLORIDA BAY – LARGO SOUND CHANNEL

The following change has been approved to the Aids to Navigation System in the Largo Sound Channel:

Marvin D Adams WW Light B (LLNR 11885) will be renamed Marvin D Adams WW Light.

Charts: 11451 11464

LNLM: 40/19

FLORIDA – FLORIDA KEYS – NINETY SEVENTH STREET CHANNEL

The following change has been approved to the Aids to Navigation System in the Ninety Seventh Street Channel:

East Washerwoman Shoal LT 49 (LLNR 13720) will be permanently discontinued and replaced with a single pile structure with the same characteristics and nominal range.

Charts: 11449 11451 11452 11453 LNM: 20/18

FLORIDA - FORT MYERS TO CHARLOTTE HARBOR AND WIGGINS PASS - MATANZAS PASS CHANNEL

The following change has been approved to the Aids to Navigation System in the Matanzas Pass Channel:

Matanzas Pass Channel Daybeacon 13 (LLNR 18232) will be changed to Matanzas Pass Channel Light 13 (LLNR 18232) displaying a FI Q G characteristic. This change will give mariners a more reliable signal when transiting this channel and navigating the turned presently marked by Daybeacon 13.

Chart 11427 LNM: 24/20

FLORIDA - ST. LUCIE INLET TO FORT MEYERS AND LAKE OKEECHOBEE - OKEECHOBEE WATERWAY - ST. LUCIE RIVER

The following change has been approved to the Aids to Navigation System in the St. Lucie River:

Woods Point Daybeacon 1 (LLNR 50760) will be changed to Woods Point Buoy 1 (LLNR 50760). This change will give mariners a more reliable signal when transiting this channel. Currently a temporary buoy is on station in this location.

Chart 11428 LNM: 24/20

SOUTH CAROLINA - AICW - MYRTLE GROVE SOUND AND CAPE FEAR RIVER TO CASINO CREEK - LITTLE RIVER - WINYAH BAY

Due to a shifting shoal and rock hazards, Little River-Winyah Bay Daybeacon 16A (LLNR 33670) will be changed to Little River-Winyah Bay Buoy 16A (LLNR 33670) and relocated to mark safe water.

Chart 11534 LNM: 20/20

SOUTH CAROLINA - AICW - CASINO CREEK TO BEAUFORT RIVER - WINYAH BAY - CHARLESTON HARBOR

The following change has been approved to the Aids to Navigation System in the Intracoastal Waterway of South Carolina:

Winyah Bay-Charleston Harbor Daybeacon 51 (LLNR 34305) will be changed to Winyah Bay-Charleston Harbor Buoy 51 (LLNR 34305) and will remain at its current assigned position. The current daybeacon has been destroyed approximately 3 times in the last three years and currently has a TRUB on station. This change should reduce the amount of discrepancies and improve the reliability of the aid for safe transit.

Chart 11518 LNM: 24/20

GEORGIA - AICW - ST SIMONS SOUND TO TOLOMATO RIVER - JEKYLL CREEK

The following changes have been approved to the Aids to Navigation System in Jekyll Creek:

Jekyll Creek Jetty RFL (LLNR 37290) and Jekyll Creek Jetty RRL (LLNR 37295) will be permanently discontinued. These range lights provide no lateral significance and the current range rear structure has been destroyed since 2018.

Chart 11489 LNM: 22/20

FLORIDA – AICW – TOLOMATO RIVER TO PALM SHORES – BANANA RIVER

The following changes have been approved to the Aids to Navigation System in the Banana River:

The U.S. Coast Guard will convert the fixed aids in the Banana River, south of the Canaveral Barge Canal, to floating aids. The current water depths prohibit the assigned maintenance vessel from repairing damage to the fixed piles. Upon becoming discrepant, these aids will be replaced with floating aids displaying similar characteristics (Ref: LNM 24/16).

Chart 11485 LNM: 44/16

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

LNM: 14/20

FLORIDA - KEY WEST HARBOR AND APPROACHES – CALDA CHANNEL

The U.S. Coast Guard is proposing the following change in the Calda Channel waterway:

Calda Channel DBN 9 (LLNR 15360) will permanently change to Calda Channel B 9 (LLNR 15360).
Calda Channel DBN 12 (LLNR 15370) will permanently change to Calda Channel B 12 (LLNR 15370).
Calda Channel DBN 17 (LLNR 15395) will permanently change to Calda Channel B 17 (LLNR 15395).

All comments should be emailed to: D07-SMB-DPWPUBLICComments@uscg.mil or Andrew.m.Engle@uscg.mil with Calda Channel as the subject line. Comments can also be mailed to Commander (dpw), Seventh Coast Guard District, 909 SE 1st Ave (STE 406) Brickell Plaza Federal Building, Miami FL 33131-3050 to be received by August 23, 2020.

Chart 11441

LNM: 25/20

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

DREDGING AND MARINE CONSTRUCTION CAUTIONS

Mariners are cautioned to stay clear of dredge, booster, floating (pontoon) and submerged pipelines, barges, derricks and operating wires associated with dredging and marine construction operations. Operators of vessels of all types should be aware that dredges and floating pipelines are held in place by cables, attached to anchors some distance away from the equipment. Buoys are attached to the anchors so that the anchors may be moved as the dredge advances and the location of the submerged pipelines are marked by buoys on each side of the channel. Mariners are cautioned to strictly comply with the Inland Rules of the Road when approaching, passing and leaving the area of operations, and remain a safe distance away from the dredge, booster, buoys, cables, pipeline, barges, derricks, wires and related equipment. Dredging projects are usually conducted 24/7. All fishnets, crabpots and structures in the general area must be removed prior to commencement of any work. A NO WAKE transit is requested of all vessels passing the dredge and if necessary to clarify a SAFE PASSAGE contact the dredge on the appropriate VHF-FM Channels.

LNM: 01/20

ATLANTIC OCEAN – GEORGIA: Offshore Artificial Reef deployment at CCA-JL Reef.

Georgia Department of Natural Resources (GADNR) intends to deploy a 52' steel vessel previously used as a shrimp-fishing vessel at CCA Reef between May 18 and June 18, 2020. The vessel will be trimmed down to an overall height of 36'. The CCA-JL Reef site is approximately 67' deep at the proposed location and has an approved clearance of -28' MLW. Material placements will not exceed this site's approved clearance. Deployments are conducted in favorable weather conditions and during daylight hours. The proposed material deployment location is 31.725047° Latitude, -80.677567° Longitude. GADNR will obtain GPS coordinates for specific material locations within CCA-JL Reef immediately post deployment, follow up with GADNR at (912) 280-6926 to acquire coordinates.

LNM: 20/20

ATLANTIC OCEAN – GEORGIA: Offshore Artificial Reef deployment at JY Reef.

Georgia Department of Natural Resources (GADNR) intends to deploy a 180' steel vessel previously used as a Menhaden fishing vessel at JY Reef between May 18 and June 18, 2020. The vessel will be trimmed down to an overall height of 38'. The JY Reef site is approximately 69' deep at the proposed location and has an approved clearance of -28' MLW. Material placements will not exceed this site's approved clearance. Deployments are conducted in favorable weather conditions and during daylight hours. The proposed material deployment location is in a cluster at 31.608315° Latitude, -80.797796° Longitude. GADNR will obtain GPS coordinates for specific material locations within JY Reef immediately post deployment, follow up with GADNR at (912) 280-6926 to acquire coordinates.

STRAITS OF FLORIDA AND APPROACHES-STRAITS OF FLORIDA: Flows through the Straits of Florida, (7) Underwater Research Mooring Buoys (UPDATE: November 18, 2019)

The U.S. Department of State Bureau of Oceans and International Environmental and Scientific Affairs have approved the install of Research Mooring Buoys stretching roughly from the Florida Keys to Cuba. Moorings labeled (EFL5, EFL6, EFL7 and EFL15) fall within the US Exclusive Economic Zone. The program aimed at measuring the flows between Cuba and Florida. The Research Vessel B/O Justo Sierra will be conducting marine scientific research studying the measurement of inflows/outflows of the Gulf and currents/temperatures. The research apparatus is anchored by a 2000 pound weight and held vertical by a flotation balloon at 130' below the surface. Mariners are to avoid close proximity, or any other interference of these buoy's data gathering function. The replacement moorings will occur pending funding (Ref: LNM 34/16, 23/17, 30/18, 38/18, 31/19, 47/19).

Location of moorings deployed during CANEK39:

STRAITS OF FLORIDA - FOWEY ROCKS TO ALLIGATOR REEF: Hazard to Navigation (UPDATE: September 10, 2015)

The U.S. Coast Guard received a report in 2013 of a s/v allision with Pacific Reef Light (LLNR 935). The vessel was located approximately 250 yards west of the structure and has 6' of mast protruding above the water. The area surrounding the structure is a hazard to navigation. Mariners are urged to avoid the area (Ref: LNM 50/13, 37/15).

Pacific Reef Light (LLNR 935) is extinguished. The aid was deemed unsafe to climb due to severe deterioration to the structure and ladder. A Temporary Light (TRLT) with Fl Q W characteristics, with a 4NM range was placed on the NE corner of the aid approximately 8' above the waterline. The TRLT may not be visible from certain angles depending on the mariners approach (Ref: LNM 32/15).

Chart 11462

LNM: 50/13

STRAITS OF FLORIDA - FOWEY ROCKS TO ALLIGATOR REEF - THE ELBOW: Hazard to Navigation. (UPDATE: September 23, 2017)

Elbow Reef Light 6 (LLNR 950) is extinguished and missing all daymarks. The aid is unsafe to climb due to severe deterioration to the structure and the ladder. A Temporary Light (TRLT) with Fl Q W characteristics has been affixed to the damaged structure on the north facing side of the platform approximately 6' above the waterline, decreasing the nominal range to 4NM. The TRLT may not be visible from certain angles depending on the mariners approach (Ref: LNM 04/16, 38/17, 39/17).

Chart 11462

LNM: 09/14

STRAITS OF FLORIDA - SOMBRERO KEY TO DRY TORTUGAS: Hazard to Navigation. (UPDATE: July 16, 2018)

Pelican Shoal Light 26 (LLNR 1020) is destroyed. The collapsed steel structure and wreckage is massive and poses a hazard to navigation. Wreckage is marked with a TRLB WR "26", 5NM, displaying Fl Q R characteristics in position 24-30-21.443N/081-35-59.412W. Mariners are advised to exercise extreme caution while transiting the area (Ref: LNM 34/16, 29/18).

Chart 11434

LNM: 33/16

STRAITS OF FLORIDA – SOMBRERO KEY TO DRY TORTUGAS: FWC Temporary Lighted Buoys.

The Florida Fish and Wildlife Conservation Commission (FWC) is will be deploying three (3) lighted sonar buoy systems for approximately 1½ years to monitor fish spawning aggregations at Riley's Hump, Tortugas South Ecological Reserve. The buoys will be tethered to instruments that will allow FWC to remotely assess biomass, distribution, and seasonality of fish species in this important aggregation site. Tentative deployment date is May 15, 2019 and will remain on station until approximately October 31, 2020. Mariners are urged to use caution when transiting the area and be aware of equipment on the surface.

The three (3) lighted buoys will be equipped with a Fl W 2s characteristics:
Lighted Buoy A in approximate position: 24-29-26.100N / 083-07-17.460W
Lighted Buoy B in approximate position: 24-30-04.140N / 083-07-56.640W
Lighted Buoy C in approximate position: 24-30-18.000N / 083-08-42.000W

SOUTH CAROLINA – CHARLESTON HARBOR – COOPER RIVER: Vertical Clearance Reduction on the Mark Clark I-526 Bridge.

Until further notice all mariners be advised the Mark Clark I-526 Bridge RACON Private aid (LLNR 2905.5) vertical clearance is less than the charted 155' due to the RACON sitting below, making the vertical clearance approximately 149.6'.

Chart 11524

LNM: 27/19

SOUTH CAROLINA – CHARLESTON ENTRANCE – CHARLESTON HARBOR: Post 45 Charleston Entrance Channel Maintenance (UPDATE May 21, 2020)

Great Lakes Dredge & Dock Company has commenced dredge operations February 15, 2018 in the Charleston Harbor Entrance Channel, South Carolina and will continue until approximately June 2022.

Dredging Operations by the Cutter Suction Dredges TEXAS and CAROLINA and support equipment will occur 24/7. Operations will occur from Charleston Harbor Channel LB 1 (LLNR 2370.1) to LB 16 (LLNR 2410). The Cutter Suction Dredge TEXAS is expected to commence dredging operations on April 22, 2020 in the Charleston Entrance Channel. The Cutter Suction Dredge CAROLINA is expected to continue dredging operations on May 15, 2020 in the Charleston Entrance Channel. Material will be pumped thru the 30" float hose (1800' length) connected to the Spider Barge GL 175. The Spider Barge will direct material into the scows, which will be towed using tugs to the placement areas. The 30" float hose will be marked with a flashing yellow light every 80' maximum. Multiple anchors are used to secure equipment in the work area(s) and surrounding vicinity. The anchors will be marked with yellow can buoys outfitted with flashing lights.

SOUTH CAROLINA – CHARLESTON ENTRANCE – CHARLESTON HARBOR: Post 45 Charleston Entrance Channel Maintenance (UPDATE May 21, 2020)

The MARY BENNET will be operating the Drag Barge GL-148 performing bed leveling operations. The Tug BREAK OF DAWN will also be performing dragging operations. Dredging expected to continue through September 30, 2020. The Tugs will tow the loaded scows and will place the dredged material in the Ocean Dredged Material Disposal Site (ODMDS) and Beneficial-Use Reefs. Commercial Anchorage B located adjacent to the South Channel and James Island within Charleston Harbor will be utilized throughout the project for periodically staging all vessels and waterside equipment, pipeline and pontoons.

The crew transfer vessels MUSKEGON RIVER and SAGINAW RIVER will transport crew and personnel daily from Salmons Dredging Marina located at 32-49' 55"N, 79- 56' 31"W to the Dredges TEXAS and CAROLINA at their location at the time of transfer. Crew and material transfers will occur periodically between all equipment. The survey vessel PEARL RIVER will perform survey operations in all work areas. The vessels will be docked as needed at Salmons Dredging Marina located at 32-49' 55"N, 79-56' 31"W or Veterans Terminal – Zulu dock

To support safe dredging operations and monitor sea conditions a Wave Data Buoy will be deployed in the work area of the Charleston Entrance Channel. The Buoy is in approximate position 32-37-57.180N/079-38-25.296W displaying FI Y 60s, 4NM characteristics. The exact position of the Buoy is dependent on local tides and currents. Mariners are advised to exercise caution and remain clear of the area.

IMPORTANT: All material placement/disposal locations are currently UNDER CONSTRUCTION! Stay clear of ODMDS, Mitigation Reefs, and Beneficial Use Reefs, depths are shallower than current navigation charts. See enclosure section for project map, Data Wave Buoy information, and the current forecasted work areas including coordinates. GLDD POC: Matthew Paladino at: (630) 207-9936 or email: mpaladino@gldd.com (Ref: LNM 14/18, 18/17, 22/18, 31/18, 32/18, 42/18, 45/18, 50/18, 04/19, 08/19, 11/19, 16/19, 25/19, 16/20, 18/20).

SOUTH CAROLINA – CHARLESTON HARBOR - COOPER RIVER: South Carolina Ports Authority Hugh K. Leatherman, Sr. Terminal Construction (UPDATE March 26, 2020)

Cape Romain Contractors will begin construction work at the Hugh K. Leatherman, Sr. Terminal located along the western shore of the Cooper River, North Charleston, South Carolina in approximate position 32° 50' 12N/079° 55' 59W; the estimated completion date is August 2020. Dredging operations and stone revetment operations are completed. Steel barges will be moving around the localized site to de-mobilize equipment from the jobsite. Warning lights have been placed to outline the barges. Mariners are advised barges will be crossing the channels over the next few months and to use extreme caution when transiting the work area. Tugboats will monitor VHF-FM Channel 13. For more information, contact the Project Manager, Greg Tuttle at (843) 884-5167 or greg@caperomaincontractors.com (Ref: LNM 43/18, 02/19, 15/19, 13/20).

UPDATE: Until further notice - HLK Terminal Lighted Buoy A (LLNR 2752) and HLK Terminal Lighted Buoy B (LLNR 2753) have been temporarily discontinued.

SOUTH CAROLINA – CHARLESTON HARBOR - WANDO RIVER TERMINAL: Lower Harbor Maintenance Dredging (UPDATE June 2, 2020)

Norfolk Dredging continues to perform dredging operations at the Wando Terminal Turning Basin on the Wando River with dredge VIRGINIAN, while the Bucket dredge ATLANTIC continues to operate throughout Wando River Lower Reach. The following channel reaches have yet to be deepened,

SOUTH CAROLINA – CHARLESTON HARBOR - WANDO RIVER TERMINAL: Lower Harbor Maintenance Dredging (UPDATE June 2, 2020)

so the dredges will continue to work throughout Lower Charleston Harbor: Hog Island Reach, Upper Wando Reach, Wando Turning Basin and Berth, Horseshoe Reach, Mt. Pleasant Reach, Bennis Reach, and Rebellion Reach. Both Dredges are loading Mud Scows and towing them to the Ocean Dredged Material Disposal Site (ODMDS) located 6.5NM southeast of Jones Island Range Lighted Bell Buoy 17 (LLNR 4640) near the end of the SW Jetty. This portion of the project is expected to continue until approximately August 11, 2022.

During this dredging project, the area in the ODMDS identified by perimeter coordinates (listed below) may be temporarily shallower than the most current nautical charts reflect. It is suggested that mariners avoid the area while it is under construction since multiple shoals may be present, actual water depths are unknown, and actual depths may not accurately correspond to the nautical charts. The Dredges operator will standby and monitor VHF-FM Channels 13 and 16. Mariners are advised to call 60-minutes prior to expected time of passage and requested to stay clear of the dredge, barges, derricks and operating wires about the dredge. Further information contact Norfolk Dredging at (757) 547-9391.

32.63148528N, 79.73342653W
32.61707993N, 79.742604W
32.62775988N, 79.76430559W

There will be three equipment mooring balls temporarily established north of the Wando Terminal and north of the Wando River Terminal Lighted Buoy 8 (LLNR 3330). The three moorings are for the scows and a fuel barge. A fourth scow mooring has been placed near Wando River Buoy 10 (LLNR 3335). Mariners are advised the moorings will be relocated frequently within the construction/dredging zone (Ref: LNM 42/19, 48/19, 50/19, 14/20, 21/20, 23/20).

Mooring #1 32-50-25.0769N/079-53-39.7577W

LNM: 38/19

SOUTH CAROLINA – CHARLESTON – ASHLEY RIVER: Drainage/Construction Operations.

Conti Enterprises will commence construction activities in the Ashley River in Charleston, South Carolina. The company will construct a pump station and outfall structure at 135 Lockwood Drive, Charleston, South Carolina as part of Phase 4 of the Spring-Fishburne US-17 Drainage Improvements for the City of Charleston. This will involve the construction of a temporary work trestle, a temporary cofferdam, and a permanent outfall structure in the Ashley River. The work area is located between the two Route 17 bascule bridges on the east bank of the river in approximate position 32-47.300N/079-57.320W. Operations will begin on or around September 30, 2019 and will last until approximately July 31, 2022. Construction activities are expected to remain about 700' from the shipping channel for the duration of the project. Further information contact the Project Engineer, Chris Sweetgall at csweetgall@contienterprises.com or USCG Sector Charleston, Waterways Management Division at (843) 323-7761.

GEORGIA – SAVANNAH RIVER – SAVANNAH INNER HARBOR: Savannah Harbor Expansion Project - Dredging Operations.

Norfolk Dredging will commence dredging operations on or around September 20, 2019 until approximately March 2021 for Savannah Inner Harbor Dredging part of the Savannah Harbor Expansion Project. Operations will occur between Kings Island and Fig Island within the Federal Navigation Channel encompassing the Savannah River and the Kings Island Turning Basin. Material will be pumped to upland disposal areas near the confluence of the Back River with the Savannah River in the vicinity of Jasper County, South Carolina. Operations will occur in and around the channel a submerged pipeline will be placed, parallel along the north side of the channel. Submerged pipeline will be marked with buoys every 500' with appropriate signs and lights placed at pipeline entry and exit points. The pipeline length is approximately 42,000' at its longest and will cross the Back River near the eastern end of Fig Island to reach the upland disposal area. The dredge CHARLESTON will monitor VHF-FM Channels 4, 13, and 16 for any emergencies the dredge operator can be reached at (757) 508-2326. Further information contact Norfolk at (757) 547-9391.

FLORIDA – ST. JOHNS RIVER – MAYPORT CUT/SHERMAN CUT/MILE POINT/TRANING WALL/WHITE SHELLS AND ST. JOHNS BLUFF: Construction Dredge Operations, 47-foot Project (UPDATE April 7, 2020)

Great Lakes Dredge & Dock Company has commenced dredge activities November 14, 2018 in the Jacksonville Harbor, Cut-7 to Cut-42 in Duval County, Florida and will continue until approximately fall 2020, Contract B Project, Cut-7 to Cut-42. Operations will occur 24/7 per week.

Dredging activities continue on the St. Johns River, from the eastern end of Blount Island, outbound to Mile Point Lighted Buoy 22 (LLNR 7270). The Cutter Suction Dredge TEXAS and the Mechanical Dredges NEW YORK, GL 58, GL 53, GL 55 are excavating material from varying cuts along this portion of the Entrance Channel. The material is loaded into Dump Scows and sailed offshore by Towing Tugs (MISS GILL, INDIAN DAWN, STEVEN WAYNE, OCEAN TOWER, GULF DAWN, LAYLA RENEE) and deposited into the ODMDS - approximately 5NM offshore of the St. Johns Jetty's and south of the Entrance Channel. To monitor sea conditions a Wave Buoy has been placed offshore in position 30-19-35.2182N/081-16-53.5651W. See the enclosure section for the project limits within the St. Johns River Channel along with disposal coordinates in the offshore disposal site (ODMDS). For additional information, contact Great Lakes at (630) 574-3000. (Ref: LNM 51/18, 09/19, 10/19, 13/19, 15/19, 18/19, 29/19, 41/19, 48/19, 49/19, 01/20, 04/20,10/20,15/20)

Until further notice, the following aids are temporarily relocated:

St Johns River Entrance Lighted Buoy 3 (LLNR 7125) to position 30-23-43.981N/081-21-37.514W

St Johns River Entrance Lighted Buoy 4 (LLNR 7130) to position 30-23-54.670N/081-21-34.513W

FLORIDA - PALM SHORES TO WEST PALM BEACH - ST. LUCIE POWER PLANT: Breakwater project.

Florida Power & Light's (FPL) St. Lucie Nuclear Plant on Hutchinson Island has commenced installing an offshore breakwater project within an area location in approximate position: 27-21-10.491N, 080-14-15.914W. The project consists of installing three submerged sections of reef ball mat units approximately 400' offshore in the vicinity of the plant's two underwater cooling water discharge pipes. The breakwater structure sections measure 325', 207', and 154' in length and each section is separated by a gap of approximately 103'. The project dimensions include a total length of approximately 900' and a width of approximately 43'.

During the project, several private aids to navigation (PATONS) regulatory markers will be established to mark the boundary of the project and of the submerged shoal area. The buoys will be white with an orange diamond and labeled with the words "Danger Obstruction," each affixed with a quick flashing white light. For further information, contact Mark Jones - coordinator Four Points Environmental - at (561) 346-2028.

FLORIDA - GIWW - LOSTMANS RIVER TO WIGGINS PASS - BIG MARCO PASS - GORDON PASS: Maintenance Dredging.

Cavache Inc. has commenced maintenance dredging operations on or about June 22, 2020 in Big Marco Pass, Florida and will continue until approximately September 2020. Dredge MAYA CAELYN is scheduled to dredge portions of Federal Channel in the Gulf Intracoastal Waterway (GIWW), Gordon Pass and Gordon Pass Entrance Channel, and dredging a new, 100-foot-wide Settling Basin adjoining the length of the Entrance Channel. The dredge material will be disposed via floating and submerged pipelines to a nearshore disposal area approximately 300' south of Gordon Pass, and extending approximately 4,000' south on Keewaydin Island. The Portions of the pipeline closest to the dredge will remain floating and will be marked with flashing lights at night. The pipeline will be floating close to shoreline. Boaters are urged to maintain safe distance from the dredge to avoid potential interference with the pipeline.

The dredge MAYA CAELYN may be reached on VHF-FM Channels 16 and 79. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after arrangements have been made.

Chart 11430

LNM: 25/20

FLORIDA - GIWW - FORT MYERS TO CHARLOTTE HARBOR AND WIGGINS PASS - MATANZAS PASS: Maintenance Dredging.

Cavache Inc. will commence maintenance dredging operations on or around July 2020 in Matanzas Pass, Florida and will continue until approximately December, 2020. Dredge MAYA CAELYN is scheduled to dredge portions of Federal Channel and setting basin at Matanzas Pass leading to Ft. Myers Harbor, Florida. The dredge material will be disposed of via floating and submerged pipelines to a nearshore disposal area East of Matanzas Pass approximate 300' seaward of the shoreline. The Portions of the pipeline closest to the dredge will remain floating and will be marked with flashing lights at night. The pipeline will be floating close to shoreline and mariners are urged to maintain safe distance from the dredge to avoid potential interference with the pipeline.

The dredge MAYA CAELYN may be reached on VHF-FM Channels 16 and 79 and mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after arrangements have been made.

B. DRAWBRIDGE STATUS SUMMARY

The following is a list of known drawbridge discrepancies, restrictions, and closures in navigable waters of the Seventh Coast Guard District. Additional information regarding bridges can be found in Volume 4 (Cape Henry to Key West) or Volume 5 (Gulf of Mexico, Puerto Rico and Virgin Islands) of the U.S. Coast Pilot, 33 CFR 117, or by calling (305) 415-6946. Unless otherwise noted in the date column, the described status will be in effect until further notice. Mariners knowing of bridge activities not listed below are urged to notify the Seventh Coast Guard District Bridge Branch.

The Coast Guard has received numerous questions regarding Bridge Regulations and where to locate them. Bridge Regulations can be found online utilizing the Electronic Code of Federal Regulations (e-CFR). Click the attached hyperlink which will direct you to Title 33 part 117 Drawbridge Operation Regulations, Subpart A - General requirements and Subpart B - Specific Requirements. Subpart A - General Requirements is the Operational requirements for bridge owners, bridge operators and mariners as set forth in the CFR. Subpart B - Specific Requirements, in which the bridges are listed by the State and waterway where the bridge is located. https://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title33/33cfr117_main_02.tpl If a specific "movable" bridge is not listed, that bridge operates on an "on demand" for opening.

C. BRIDGE INFORMATION

SOUTH CAROLINA - ST HELENA SOUND - HARBOR RIVER - SEA ISLAND EXPRESSWAY: Bridge Construction.

The Coast Guard has issued a permit to United Infrastructure Group, Inc on behalf of the South Carolina Department of Transportation (SCDOT) replace the Sea Island Expressway (Hunting Island Bridge) US21 Swing Bridge, mile 0.6 Harbor River with a fixed bridge at mile 0.8 Harbor River. Construction began on April 23, 2019 and will continue through November 21, 2021. There will be numerous barges, drill rigs, cranes and push boats on scene during construction. All vessels are advised to proceed with caution when transiting the area. Points of contact with United Infrastructure Group, Inc regarding the project are Billy Hardwick / 803-513-1903 / Billy.Hardwick@uig.net Felipe Rosa / 704-975-5452 / Felipe.Rosa@uig.net For Waterways questions, contact Sector Charleston Waterways Management Division at (843) 323-7761 or the Sector's 24-hour Command Center Line at (843) 740-7050. As updates are available, they will be provided via the Local Notice to Mariners.

UPDATE

Starting early-June, United Infrastructure Group, Inc. (UIG) will be driving piles for the new fender system at the Harbor River Bridge and will be interfering with the current navigational channel. The "West Fender Piles" will be located at approximately 32°24'16" N and 80°27'10.5" W and the "East Fender Piles" will be located at approximately 32°24'15.5" N and 80°27'09" W. UIG will start by driving the West Fender Piles on the west side channel. At such time, the west side channel will be closed and the east side channel will open for vessel traffic. Once the West Fender Piles are completed, UIG will move to the east side channel and drive the East Fender Piles.. At such time, the east side channel will be closed and the west side channel will be open with the Horizontal clearance on the west channel will be reduced to 40 feet. For approximately one day while the East Fender Piles are being driven, the bridge will not be able to open due to a conflict between the existing bridge truss and some of the East Fender Piles, and consequently both the west and east sides channels will be closed for that one day. The Coast Guard will update this article to the LNM once the date of the closure is determined. Once the new Fenders are established on the East channel, the horizontal clearance will be reduced to 52 feet.

Once both the West & East Fender Piles are completed, the new shorter horizontal clearances will remain for over one year, until the existing fender system can be removed and the existing bridge can be demolished. Boat and vessel operators are asked to use caution when close to the work area.

FLORIDA - ST JOHNS RIVER – FLORIDA EAST COAST RAILWAY - RAIL BRIDGE: Bridge Repairs

Florida East Coast Railway (FECR) is authorized to temporarily deviate from drawbridge operation regulation 33 CFR 117.325(b) that governs the FEC St. Johns River Railroad Bridge across the St. Johns River, mile 24.9, at Jacksonville, Florida. Under this temporary deviation, the FEC St. Johns River RR Bridge is authorized to remain in the closed to navigation position between the hours of 8 a.m. and 2 p.m. on the following days:

- June 16, 17, 18, 19 and 21, 2020
- See UPDATE for June 20, 2020

This deviation is necessary for the maintenance to the main trunnion and link pin bearings. Vessels able to pass without an opening may do so at any time. During non-working hours the bridge will operate in accordance with 33 CFR 117.325(b). The drawbridge shall return to its regular operating schedule, 33 CFR 117.325(b), at the end of the designated time period. We are approving this request under the provisions of 33 CFR 117.35. For waterways questions, contact USCG Sector Jacksonville Waterways Management Office, MST2 Rory Boyle at 904-714-7661, email: Rory.C.Boyle@uscg.mil.

UPDATE

On June 20, 2020, authorization to remain in the closed to navigation position is approved between the hours of 9 a.m. and 2 p.m. This change is due to a previously approved Marine Event by USCG Sector Jacksonville. At no time prior to 9 a.m. shall the waterway be obstructed without prior approval by USCG Sector Jacksonville.

FLORIDA - ST JOHNS RIVER - BUCKMAN BRIDGE: Bridge Repairs

Florida Safety Contractors advises that work is being conducted at the Buckman Bridge St. Johns River and will occur approximately from March 9, 2020 through June 20, 2021. There will be associated construction equipment/vessels in and around the bridge including job boats also Tug and barge in the vicinity working. All boaters are advised to proceed with caution while transiting the area. This construction project will not impact the navigational channel. For waterways questions, contact USCG Sector Jacksonville Waterways Management Office, MST2 Rory Boyle at 904-714-7661, email: Rory.C.Boyle@uscg.mil

FLORIDA – ST JOHNS RIVER – FULLER WARREN BRIDGE: Bridge Repairs

Archer Western Contractors have advised the Coast Guard that they will be working on the Fuller Warren Bridge across the St Johns River, Jacksonville, Florida. The contractor will have floating equipment in the vicinity of the bridge to include barges, cranes, and other work vessels. Future waterway restrictions may be necessary for the replacement of the bridge fender system and girder erection. This work is anticipated to start September 2017 and will be completed by the Fall 2020. The Fuller Warren Bridge is undergoing a stage of construction during which the location of barges will impact the horizontal clearance. At no time will the horizontal clearance be reduced by more than half. . For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

Ref: LNM 42-17 through 25-20

FLORIDA – ST. JOHNS RIVER – BLACK CREEK – SR 23 FIRST COAST EXPRESSWAY: Bridge Construction

Sacyr Construction SA has advised the Coast Guard that they will be building SR-23 First Coast Expressway over Black Creek. The contractor will have floating equipment in Black Creek in the vicinity of the bridge and will consist of sectional barges, cranes, and other work vessels. Obstructions in water may consist of concrete and steel pilings in the foot print of the bridge foundations. Please use caution while boating in the vicinity of the bridge. Sacyr will maintain a minimum 80.0 Feet of Channel while performing bridge work activities. Water work will be taking place Monday-Saturday 7:00 AM - 7:00 PM. Pile driving will only occur Monday-Friday 7:00 AM -7:00 PM. Future waterway restrictions may be necessary for girder erection over the channel span. This work is anticipated to begin in the waterway May 2020 and continue through winter 2021. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904)-714-7631 or via email at Jeremy.S.Bailey@uscg.mil

FLORIDA - ST JOHNS RIVER - RACY PT TO CRESCENT LAKE - DUNNS CREEK- US 17 (SR15) BRIDGE: Bridge Construction

GLF Construction will commence construction of a new bridge adjacent to the US 17 (SR15) Bridge across Dunn's Creek, Mile 0.9, near Satsuma, Florida on February 4, 2019. During construction floating equipment, small barges and support vessels may be partially obstructing the channel. Future updates will be provided as the new bridge is built. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

UPDATE 1

The Captain of the Port Jacksonville advises all mariners that construction work is occurring on the Highway 17/SR15/ Dunns Creek bridge in Satsuma, Florida. Through May 2020 the horizontal clearance will be reduced by approximately fifty percent. During this phase of construction, pylons and beams will be intermittently suspended above then main navigation channel by crane. Mariners are advised to proceed at a slow, no wake speed. Construction barges will be present with personnel on board on the north side of the channel to the obstruction to the navigable channel. Construction personnel will be present to guide boaters through the construction site using orange

flags and hand signals when it is unsafe to pass through the channel. At times, when the channel is blocked due to overhead hazards, the channel will be made clear upon request, after construction equipment is made safe. For waterways related questions, contact Coast Guard Sector Jacksonville Waterways Management Division at (904) 714-7631 or via email at Jeremy.S.Bailey@uscg.mil

FLORIDA - EAST COAST- CAPE CANAVERAL TO BETHEL SHOAL- CRANE CREEK/GOAT CREEK/SAINT SEBASTIAN RIVER R/R BRIDGES: Bridge Repair/Construction

HSR Construction on behalf of the Bridge Owner, Virgin Trains USA Florida LLC will be conducting Bridge Construction and repair of the Railroad bridges crossing Crane Creek, mile 0.34 (from confluence with Indian River), at Melbourne, Brevard County, FL. Lat/Long: 28.076250, -80.603611, Goat Creek at Malabar, Brevard County, FL. Lat/Long 27.969188, -80.546472 and the Saint Sebastian River, St. Sebastian River, mile 1.3, between Micco and Roseland, Brevard and Indian River Counties, FL. Lat/Long: 27.838437, -80.497070. These bridge replacements are part of a larger project known as the All Aboard Florida (Brightline) -Orlando to Miami, Florida Intercity Passenger Rail Project, which proposes the construction of a privately owned and operated intercity passenger railroad system that will connect Orlando and Miami, with intermediate stops in Fort Lauderdale and West Palm Beach, Florida. This project will start on July 1, 2019 and continue through March 19, 2021. There will be cranes present on the trestles and small jon boats in the water during construction. Point of contact for the project with HSR Contractors is Jessica Workman, phone: (816) 261-8409 or email jworkman@hsrjv.com . For Waterways question concerning Crane and Goat Creek(s) please contact LT Emily T. Sysko, Sector Jacksonville, Waterways Management Division, U.S. Coast Guard; telephone 904-714-7616, e-mail Emily.T.Sysko@uscg.mil . For Waterways question concerning the Saint Sebastian River please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMAMI-MARINE-PERMITS@USCG.MIL

Crane Creek UPDATE:

The Coast Guard has approved the contractor to erect a temporary work trestle east of the existing working track and commence in-water work in accordance with the plans submitted for Phase 1. During Phase 1, maritime navigation will be available through the structures. There is not a designated navigational channel, any section that will impede navigation will be properly marked as to alert mariners to use alternate spans. Red stationary lights will be installed along both side for safe navigation. The new structures, when completed, will provide for a vertical clearance of 15.8' and a horizontal clearance of 65' toward the northeast side of the bridge more in line with the existing US1 Highway bridge. The current navigation clearances are 15' vertical and 45' horizontal. The temporary trestle will meet or exceed the vertical clearance of the existing structures.

Ref: LNM 21-19 through 25-20

Chart: 11476

FLORIDA - EAST COAST- CAPE CANAVERAL TO BETHEL SHOAL- SEBASTIAN RIVER R/R BRIDGE: Bridge Repair/Construction

The replacement of the FEC RR Bridge across the Sebastian River is expected to commence late June 2020. The majority of bridge work, including pile-driving, will take place during daylight hours between 7AM and 7PM. Bridge work is expected to continue until mid-2022. A temporary work trestle (platform) for cranes will be installed on the west side of the existing bridge (south bank). Demolition work is expected to begin in July 2020. Temporarily lighting shall be installed indicating safe passage of at least 19 feet of horizontal clearance through structures at locations along the trestle and bridge. All in-water equipment shall be properly lighted. The low-chord of the trestle shall be higher than the low-chord of the existing steel bridge on site. At no time will the entire waterway be closed to navigation without prior Coast Guard approval. Anticipate future waterway restrictions and/or closures. For Waterways question concerning the Saint Sebastian River please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMAMI-MARINE-PERMITS@USCG.MIL

FLORIDA –ST. LUCIE INLET TO FORT MYERS AND LAKE OKEECHOBEE– MARTIN DOWNS BLVD (SR 714) BRIDGE: Clearance Reduction

C&D Construction, Inc., acting on behalf of the bridge owner, Florida Department of Transportation (FDOT), is authorized to temporarily reduce the horizontal clearance at the SR 714 (Martin Downs Blvd) Bridge across the Okeechobee Waterway (St. Lucie River), mile 9.5, at Palm City, Florida.

The authorized navigation clearance at this location is 56 feet of vertical clearance at Mean High Water (MHW) and 90 feet of horizontal clearance between the fender system. C&D Construction requested to reduce the horizontal clearance by 40 feet during the replacement of the fender system. The Coast Guard is approving this request to reduce the horizontal clearance to 50 feet from July 7, 2020 through November 4, 2020, between the hours of 7 a.m. to 5 p.m. daily, Monday through Saturday. During non-working hours, the navigational channel will be cleared allowing for 90 feet of horizontal clearance through the bridge. A full channel opening will be provided with a 2 hour advanced notice to the contractor. Contractors contact information: Cellular (321) 323-6006

For waterways questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL

FLORIDA - EAST COAST - MIAMI HARBOR – MELOY CHANNEL – MACARTHUR CAUSEWAY EAST BRIDGE: Bridge Repair

Metalizing Technical Services, contracted through FDOT will be painting the MacArthur Causeway East Bridge crossing Meloy Channel (Miami Beach Channel), Miami Beach, Florida. The Coast Guard has authorized a temporary reduction of the vertical clearance across the navigational channel of 4 feet for the installation of a containment system. From September 1, 2019 through April 30, 2020, the vertical clearance will be reduced to 31 feet at Mean High Water (MHW). There will be work barges and divers in the water. Contact for Metalizing Technical Services is Mr. Jerrod Monaghan at (661) 972-7223. All mariners transiting the area are advised to proceed with caution and at a slow speed. For waterways information or concerns, call or e-mail LT Samuel Rodriguez-Gonzalez, U.S. Coast Guard Sector Miami, Waterways Management Division; telephone 305-535-4317, email; D07-PF-SECMIAMI-MARINE-PERMITS@USCG.MIL

Ref: LNM 34-19 through 25-20

Chart: 11468

FLORIDA - EAST COAST - WEST PALM BEACH TO MIAMI - MIAMI RIVER- BRICKELL AVENUE BRIDGE: Bridge Repair

BPA Engineers, acting on behalf of the bridge owner, Florida Department of Transportation (FDOT), is authorized to temporarily deviate from drawbridge operation regulations 33 CFR 117.305(d) that governs the Brickell Avenue Bridge across the Miami River, mile 0.1, at Miami, Florida.

Under this temporary deviation, the Brickell Avenue Bridge is authorized single-leaf operations with a 4-hour advanced notice for a full opening between 10 p.m. and 5:30 a.m., Sunday through Friday, beginning February 10, 2020 through August 14, 2020. During the February to May timeframe a five foot reduction in vertical clearance beneath the non-opening span during work hours only. Associated construction equipment may be located beneath the non-opening span during work hours. The Contractor will be using a 14' x 24' barge with a 50 ft boom manlift to work from the water. While staging and/or loading, the barge will be mooring to the back side (non-navigational side) of the fender system. While the contractor is working, the 14' x 24' barge will moor to the fender system along the 24' side of the barge reaching the bridge with the 50' manlift obstructing 1/2 of the navigational channel. Vessels able to pass without an opening beneath the non-obstructed span, may do so at anytime. During non-work hours, associated equipment will be located outside of the main channel and not interfere with drawbridge operations or obstruct the channel. All equipment will be properly lighted. Additionally, the contractor is authorized to temporarily reduce the vertical clearance of the non-opening leaf by five feet while construction work is in progress. At all other times, the bridge will operate in accordance with its regular operating schedule.

UPDATE

Starting May 15, 2020 through August 14, 2020, the Coast Guard has authorized the contractor an additional temporary deviation. From 6 p.m. to 10 p.m., Sunday through Thursday, the bridge is allowed single-leaf operations with a 2-hour advanced notice for a full opening. Additionally, the contractor is authorized to temporarily reduce the vertical clearance of the non-opening leaf by five feet while construction work is in progress. At all other times, the bridge will operate in accordance with its regular operating schedule.

If you have any questions regarding the waterway, please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAMI-MARINE-PERMITS@USCG.MIL

FLORIDA - EAST COAST - WEST PALM BEACH TO MIAMI - MIAMI RIVER- SR-836 DOLPHIN EXPRESSWAY BRIDGE: Bridge Construction

Archer Western/De Moya Group (CJV) will commence operations on the SR 836 Bridge mile 2.4 over the Miami River acting on behalf of the bridge owner, Miami-Dade Expressway Authority. Work is scheduled to begin on 15 March 2020 and continue through October 2024. There will be a work barge on scene outside the navigable channel. Vessels are advised to transit the area with caution, maintaining a no wake speed. Future updates will be provided via the local Notice to Mariners as the project progresses. For information on the I-395/SR 836/I-95 Design-Build Project and work on SR 836 Bridge, please contact Community Outreach Specialist Oscar Gonzalez at ogonzalez@mrgmiami.com or via cell phone at 786-280-0983. If you have any questions regarding the waterway, please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAMI-MARINE-PERMITS@USCG.MIL

FLORIDA - EAST COAST - WEST PALM BEACH TO MIAMI - MIAMI RIVER- SW 1ST STREET BRIDGE: Bridge Replacement **UPDATED:**

GLF Construction Corporation was contracted by the bridge owner, Florida Department of Transportation (FDOT), to commence construction of a new bridge that will replace the SW 1st Street Bridge across the Miami River, Mile 0.9, in Miami, Florida. Construction is scheduled to begin on May 20, 2019 and continue through Summer 2022.

Demolition and removal of the existing bascule piers continues from the land side with no anticipated restrictions to the channel. The installation of sheet piles for the new cofferdam on the west side has been completed and excavation of the new cofferdam is ongoing. Sheet pile testing for the new cofferdam on the east side is ongoing and installation is expected to begin the week of September 16. The new seawall (combination wall) has been completed on the east side and west side.

As early as September 23, 2019, the contractor will move forward with excavating (dredging) the channel. While a barge will be in the channel for the channel excavation operation, no impacts to the channel restricting the current horizontal navigational clearance are anticipated. As early as October 28, 2019, the contractor will perform the submarine cable installation and in order to perform this work, half of the channel will be temporarily restricted at a time. The contractor will coordinate with USCG Sector Miami prior to any channel closures and/or restrictions and will provide adequate notice to the public. For project information, please contact Community Outreach Specialist Sergies Duarte at sergies.duarte@dot.state.fl.us or 305-216-3617. If you have any questions regarding the waterway, please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAAMI-MARINE-PERMIT@USCG.MIL

FLORIDA- FLORIDA KEYS- SOMBRERO KEY TO SAND KEY-MOSER CHANNEL-SEVEN MILE BRIDGE: [Bridge Repairs](#)

The Florida Department of Transportation has advised the Coast Guard that their contractor Southern Road & Bridge, LLC will be conducting long-term maintenance and repairs to the Seven Mile Bridge. The main span of the bridge for Moser Channel will not be affected. Lighted 20' x 40' construction barges and work floats will be positioned within other spans along the bridge but the remaining spans will be open for vessel traffic. Mariners are advised that National Marine Sanctuary regulations prohibit vessels from operating at more than 4 knots or in a manner to create a wake within 100 yards of stationary vessels. This project is expected to continue until March 2020. For more information, please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA- FLORIDA KEYS- SOMBRERO KEY TO SAND KEY-MOSER CHANNEL-OLD SEVEN MILE BRIDGE: [Bridge Repairs](#)

The Florida Department of Transportation has advised the Coast Guard that their contractor SAFFO Contractors Inc. will be conducting long-term maintenance and repairs to the Old Seven Mile Bridge. The main span of the bridge for Moser Channel will not be affected. Certain bridge spans will have lighted work platforms suspended from the bridge reducing the vertical clearance by from 2.5-5 feet as well as lighted staging extending 5 feet from all side of certain bridge piers. The remaining spans will not be affected. Mariners are advised to abide by all Navigation Rules, proceed with caution in the vicinity of the project, and are urged to plan transits accordingly avoiding areas of the bridge with active work crews. This project is expected to continue until July 2022. For more information please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA- FLORIDA KEYS - KEY WEST HARBOR-COW KEY BRIDGE: [Bridge Repairs](#)

The Coast Guard is approving a request from the Florida Department of Transportation (FDOT) to temporarily reduce the vertical clearance between Span 3 and Span 4 at the US1 (SR A1A) Highway (Cow Key Channel) Bridges across Cow Key Channel, mile 0.9, at Key West, Florida to 6.5 feet at MHW. Underpinning reinforcements will be utilized as the best safety measure due to the failing concrete until construction of the new spans is completed. Underpinning of the bridge is expected to start on July 9th 2018 with an estimated start date of construction of the new bridge to begin in February of 2019 with completion in June of 2021. FDOT's contractor will be installing signage and buoys alerting vessels of the reduced clearance. When the new spans are constructed, the vertical clearance shall return to the permitted clearance of 9 feet at MHW. No work will be conducted on span #2 and will be open for small vessels able to transit this channel. If you have any questions regarding the waterway, please contact MSTC Greg Bergstrom, USCG Sector Key West, Waterways Management Division, (305) 292-8772, email SKWWaterways@uscg.mil

UPDATE

The Florida Department of Transportation has advised the Coast Guard that their contractor, Kiewit, will begin replacement of the Cow Key Channel Bridge at Mile Marker 4 on April 16, 2020. Crews will be working from a barge under spans three and four beginning April 13, 2020. The barge will remain in place, with crews working in the water and overhead, until replacement of both bridge spans is completed.

This project is expected to continue through October 2020. For more information please contact the Sector Key West Command Center at (305) 292-8727.

FLORIDA – WEST COAST - TAMPA BAY AND ST. JOSEPH SOUND - LITTLE MANATEE RIVER- CSX RAILROAD BRIDGE: Bridge Repair

PCL Civil Constructors Inc., acting on behalf of the bridge owner, CSX Transportation, is authorized to temporarily deviate from drawbridge operation regulation 33 CFR 117.297 that governs the CSX (Seaboard Systems) Railroad Bridge over the Little Manatee River mile 2.4, at Ruskin, Florida. The Coast Guard has approved this request..

Under this temporary deviation, the Little Manatee Rail Bridge will remain in the closed to navigation position from June 22 through June 26, 2020 for the replacement of rail lift machinery components. From June 22 through June 24, 2020 during the hours of 7 a.m. to 5:30 p.m., vessels able to transit through the bridge in closed position may do so through the west channel only, work barges will block the east channel. From June 25 through June 26, 2020 during the hours of 7 a.m. to 5:30 p.m., vessels able to transit through the bridge in closed position may do so through the east channel only, work barges will block the west channel. At all other times, vessels able to transit the bridge in the closed to navigation position may transit both the east and west channel at any time

For waterways information please contact U.S. Coast Guard Sector St. Petersburg at 727-824-7506 or via email at D07-SMB-Tampa-WWM@uscg.mil

GEORGIA - ATLANTIC INTRACOASTAL WATERWAY – BEAUFORT RIVER TO ST. SIMON SOUND - WILMINGTON RIVER- CAUSTON BLUFF (ISLAND EXPWY) SR 26 BRIDGE: Bridge Replacement / Temporary Deviation- **UPDATED-06/19**

Chatham County, the bridge owner, is authorized to continue to temporarily deviate from the drawbridge operation regulation 33 CFR 117.353(b) that governs the Causton Bluff (Islands Expressway) Bridges across the Atlantic Intracoastal Waterway (Wilmington River), mile 579.9, at Savannah, Georgia.

Due to unforeseen circumstances with the opening of the new high-level fixed bridge, which will make the drawbridges obsolete, the Coast Guard has authorized the temporary deviation to continue. Under this temporary deviation, the Causton Bluff (Islands Expressway) Bridge is allowed single-leaf operations utilizing the drawbridge operating schedule in 33 CFR 117.353(b) through 6 a.m. on December 31, 2020. A full opening will be provided during daylight hours only with a 48 hour advanced notice to the bridge tender. Vessels that can pass without an opening may do so at any time.

The beams have been set crossing the AICW on the Island Expressway (SR 26) Bridge with a 65' vertical clearance MHW and 170' between the fender systems with 100' navigable channel.

If you have any questions please contact USCG Marine Safety Unit (MSU) Savannah Waterways Management, email MSUSavannah-WWM@uscg.mil

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY - ST. SIMONS SOUND TO TOLOMATO RIVER – WONDERWOOD DRIVE BRIDGE: Bridge Repairs

The Coast Guard has received a request from M & J Construction acting on behalf of the Florida Department of Transportation (FDOT), to reduce the vertical clearance of the SR 116 / Wonderwood Drive Bridge, across the Atlantic Intracoastal Waterway (AICW), mile 742.1, at Jacksonville, Florida to facilitate bridge repairs.

The Coast Guard is approving a vertical clearance reduction of 4 feet for the installation of a containment system. The vertical clearance will be reduced to 61 feet at Mean High Water (MHW) over one-half of the navigational channel during repair work. When the contractor is not working in the navigational channel the containment system will be retracted providing 64 feet of vertical clearance at MHW throughout the entire navigational channel. Installation of the containment would begin on November 7, 2017 and with an estimated completion date of Dec, 2020. For details relating to the bridge repair contact Mr. Jose Gonzalez with M&J Construction at (727) 938-6478. For Coast Guard related concerns call or e-mail LTJG Emily Sysko, CG Sector Jacksonville Waterways Management Division, telephone (904) 714-7616, email: Emily.T.Sysko@uscg.mil

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – PALM SHORES TO WEST PALM BEACH –SOUTHERN BOULEVARD BRIDGE: Bridge Construction, Updated

The Southern Blvd bridge has been removed in its entirety from the waterway and a new bascule bridge is being constructed along the same alignment. A temporary lift bridge was installed approx. 100 feet north of the construction site. The temporary lift bridge provides a vertical clearance of 65 feet in the lifted position and a horizontal clearance of 125 feet between the fender system. The temporary lift bridge will operating in accordance with federal drawbridge operating regulation, 33 CFR 117.261(w).

From March 12, 2020 through August 31, 2021, the contractor will have construction equipment in the navigational channel directly south the temporary lift bridge. From 6 a.m. to 6 p.m. daily, the navigational channel south of the temporary lift bridge will be partially obstructed providing approximately 50 feet of horizontal clearance. Vessels requiring the full channel to safely pass are required to provide a 4-hour advanced notice. Public vessels of the United States and vessels in distress shall be passed at any time.

Questions regarding the ongoing construction of the new Southern Blvd bascule bridge may be directed to Mr. Clay Bores, 407-488-0738 or Mr. Andre Thomas, 561-657-1973. If you have waterway related questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMITTS@USCG.MIL.

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER – FEC RAILROAD BRIDGE: Test Deviation: UPDATED:

The Coast Guard has issued a temporary deviation from the operating schedule that governs the Florida East Coast (FEC) Railroad Bridge across the New River, mile 2.5, at Fort Lauderdale, Florida. This deviation will test a change to the drawbridge operation schedule to determine if the proposed operating schedule changes will meet the reasonable needs of maritime traffic and railway traffic. This deviation will allow the bridge to operate a more predictable drawbridge opening schedule. This deviation is effective from 12:01 a.m. on January 1, 2020 to 11:59 p.m. on June 26, 2020. For the purposes of enforcement, actual notice will be used from 12:01 a.m. on January

4, 2020. You may submit comments identified by docket number USCG-2019-0955 using Federal eRulemaking Portal at <http://www.regulations.gov>. Comments and relate material must reach the Coast Guard on or before March 30, 2020.

Under this deviation, the Florida East Coast (FEC) Railroad Bridge shall be maintained in the fully open-to-navigation position for vessels at all times, except during periods when it is closed for the passage of rail traffic, inspections and minor repairs. The drawbridge shall open and remain open to navigation for a fixed 10-minute period each hour, except that the drawbridge shall be open at the following times which shall serve as the hourly fixed 10-minute period:

7 a.m. until 7:10 a.m.
9 a.m. until 9:10 a.m.
4 p.m. until 4:10 p.m.
6 p.m. until 6:10 p.m.
10 p.m. until 10:10 p.m.

Additionally, in each hour from Noon to 2:59 p.m., the drawbridge shall open and remain open to navigation for an additional 10-minute period. The fixed 10-minute opening periods shall be published on a quarterly basis by the drawbridge owner and reflected on the owner's website and mobile application. In any case, the drawbridge shall not be closed to navigation for more than 60 consecutive minutes. The drawbridge shall have a drawbridge tender onsite at all times who is capable of physically tending and operating the drawbridge by local control, if necessary, or when ordered by the Coast Guard. The drawbridge tender shall provide estimated times of drawbridge openings and closures, upon request. Operational information will be provided 24 hours a day on VHF-FM channels 9 and 16 or by telephone at (305) 889-5572. Signs shall be posted visible to marine traffic and displaying VHF radio contact information, website and application information, and the telephone number for the bridge tender.

In the event of a drawbridge operational failure, or other emergency circumstances impacting normal drawbridge operations, the drawbridge owner shall immediately notify the Coast Guard Captain of the Port Miami and provide an estimated time of repair and return to normal operations.

A drawbridge log shall be maintained including drawbridge opening and closing times. The drawbridge log should include reasons for those drawbridge closings that interfere with scheduled openings in this part. This log shall be provided to the Coast Guard upon request. A website and mobile application shall be maintained to publish: drawbridge opening times required by this subsection; timely updates to schedules; at least 24-hour advance notice for each schedule in order to facilitate planning by maritime operators; and to the extent reasonably practicable, at least 60-minutes advance notice of schedule changes or delays.

Vessels able to pass through the bridge in the closed position may do so at anytime. The bridge will be able to open for emergencies and there is no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

We encourage you to submit comments through the Federal eRulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the FOR FURTHER INFORMATION CONTACT section of this document for alternate instructions. FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER – FEC RAILROAD BRIDGE:
Test Deviation:

, Florida East Coast Railway (FECR) is authorized to temporarily deviate from the temporary drawbridge operation regulation that governs the FEC New River Railroad Bridge across the New River, mile 2.5, at Fort Lauderdale, Florida

The Coast Guard authorized temporary deviation in lieu of 33 CFR §117.313(c). That temporary deviation is published in the Federal Register and can be identified by docket number USCG-2019-0955.

The Coast Guard is authorizing a temporary deviation to USCG-2019-0955 from July 13, 2020 through August 7, 2020. During this time, the FEC New River Railroad Bridge may remain closed to navigation at the following designated times:

- 7/13/2020 from 11 p.m. to 5 a.m.
- 7/14/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 11 p.m. and 7 a.m. for 15 minutes
- 7/15/2020 from 11 p.m. to 5 a.m.
- 7/16/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 10 p.m. and 7 a.m. for 15 minutes

- 7/20/2020 from 11 p.m. to 5 a.m.
- 7/21/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 11 p.m. and 7 a.m. for 15 minutes
- 7/22/2020 from 11 p.m. to 5 a.m.
- 7/23/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 10 p.m. and 7 a.m. for 15 minutes

- 7/27/2020 from 11 p.m. to 7 a.m.
- 7/28/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 11 p.m. and 7 a.m. for 15 minutes
- 7/29/2020 from 11 p.m. to 7 a.m.
- 7/30/2020 from 7 p.m. to 9 a.m.; except that the bridge will open at 10 p.m. and 7 a.m. for 15 minutes
- 8/1/2020 from 12 a.m. to 7a.m.

- 8/3/2020 through 8/7/2020 from 4:15 p.m. to 6 p.m.

At all other times the bridge will operate in accordance with the temporary deviation published in the Federal Register and identified by docket number USCG-2019-0955. If you have any questions please contact USCG Sector Miami Waterways Division at (305) 535-4317, email D07-PF-SECMIAAMI-MARINE-PERMIT@USCG.MIL

FLORIDA – ATLANTIC INTRACOASTAL WATERWAY – WEST PALM BEACH TO MIAMI – NEW RIVER CANAL (South Fork) – I-595 BRIDGE: Bridge Construction

Archer Western on behalf of Florida Department of Transportation (FDOT) will be removing the fender system in the navigable channel on the I-595 Bridge across the South Fork of the New River Canal in preparation of the addition of the Express Lanes starting on October 18, 2019 through March 31, 2020. Archer Western requested a 6-month extension due to unexpected delays. The Coast Guard has approved this request through September 30, 2020. Work is being conducted 7 days a week from 6 a.m. to 6 p.m. Daily. Work barges will be present with full channel blockage at times. The barge/equipment can be moved for boats requiring the full width of channel with one hour advance notice. Boaters should contact Chris Thorthon (954) 605-4235 or Cloyce Poling (561) 718-2129 to request passage. For waterways questions, call or e-mail Coast Guard Sector Miami, FL, Waterways Management Division, telephone 305-535-4317, email D07-PF-SECMIAAMI-MARINE-PERMIT@USCG.MIL.

FLORIDA – GULF INTRACOASTAL WATERWAY - FORT MYERS TO CHARLOTTE HARBOR AND WIGGINS PASS – AREA BRIDGES: Bridge Construction

Construction of Bridge Nos. 120001, Bridge over Billy's Creek, 120002, SR 45 over Caloosahatchee River, 120077, SR S-82-B over ten-mile canal, 120157, Edison Bridge NB, and 120158, Edison Bridge SB, in Lee County has begun. The construction project will be ongoing until approximately September 21, 2019. There will be several pieces of floating construction equipment remaining in the water during the period of construction. The navigation channels under the bridges will be reduced to ½ channel size during the construction. All boaters are advised to use extreme caution while transiting the area.

The project manager, Seacoast Inc., may be reached at 813-925-3555 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

FLORIDA - GULF INTRACOASTAL WATERWAY - TAMPA BAY TO PORT RICHEY – THE NARROWS – PARK BLVD BRIDGE: Bridge Repair

Quinn Construction, Inc., on behalf of the bridge owner, Pinellas County Florida, is authorized to temporarily deviate from the drawbridge operation regulation 33 CFR 117.5 that governs the Park Blvd Bridge across the Gulf Intracoastal Waterway, mile 126, at Indian Shores, Florida.

Under this temporary deviation, the Park Blvd Bridge will provide single-leaf openings on demand and with a 4 hour advanced notice for a full opening, from March 11, 2020 through 11:59 p.m. on September 7, 2020. Additionally, the Coast Guard is approving the contractor's request to reduce the vertical clearance by 16 inches through September 7, 2020. This approval allows the contractor to continue necessary work on the bridge to complete the repair project. All boaters are advised to use extreme caution while transiting the area.

The project manager, Quinn Construction, Inc., may be reached at 941-722-7722 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

FLORIDA - GULF INTRACOASTAL WATERWAY - TAMPA BAY TO PORT RICHEY - BOCA CIEGA BAY - PINELLAS BAYWAY STRUCTURE 'E' BRIDGE: Bridge Repair

Construction on the Pinellas Bayway Structure 'E' Bridge has begun. The construction project will be ongoing from Jun 2019 through late July/early August 2020. There will be several pieces of floating equipment remaining in the water during the period of construction to include barges, cranes, and other work vessels. The Bayway Structure 'E' construction project is located near mile 113 on the Gulf Intracoastal Waterway, in Boca Ciega Bay, FL. As the work on the bridge progresses, navigation will be restricted in different areas around the bridge to accommodate the construction project. The navigation channel will then be partially closed in summer 2020 periodically. All boaters are advised to use extreme caution while transiting the area.

Update:

The following areas of the bridge will be closed or partially closed to navigation during construction per the dates listed:

Span 7 (Partial Closure) – 6/15/20-6/16/20

Span 6 (**Full Channel Closure**) – 6/22/20-6/23/20

Span 5 (Partial Closure) – 6/29/20-6/30/20

The project manager for American Bridge, Jon Yates, may be reached at 813-538-8012 for details on the project. For waterways related questions, contact Coast Guard Sector St Petersburg Waterways at (813) 228-2191 or via email at D07-SMB-Tampa-WWM@uscg.mil

D7 SUMMARY OF MARINE EVENTS

GEORGIA – ST SIMONS SOUND: REGULATED NAVIGATION AREA (RNA)

MARINERS ARE STRONGLY ADVISED TO REDUCE THEIR WAKE AROUND CEDAR CREEK, IN THE BRUNSWICK HARBOR DUE TO SALVAGE AND BOOMING OPERATIONS IN THE VICINITY OF THE M/V GOLDEN RAY

The following area is a regulated navigation area (RNA): All navigable waters of St. Simons Sound, GA, bounded by a line drawn from a point located at 31°07'48" N, 081°23'30" W, thence to 31°07'29" N, 081°23'37" W, thence to 31°07'38" N, 081°24'10" W, thence to 31°07'22" N, 081°24'38" W, thence to 31°07'40" N, 081°25'01" W, thence to 31°08'07" N, 081°24'48" W

The following aid has been temporarily relocated to facilitate salvage operations for the M/V GOLDEN RAY:

St. Simons Sound Lighted Buoy 19 (LLNR 6140) to position 31-07-38.072N/081-23-46.352W
Temporary chart correction LNM 39/19

All vessels greater than 500 gross tons intending to transit through the RNA must seek prior approval from the COTP Savannah at least 24-hours in advance of the vessel's arrival to, or departure from, the Port of Brunswick. The COTP Savannah can be contacted at (614) 943-5532. The COTP Savannah's designated representative can be contacted on VHF-FM channel 13. Upon approval to enter the RNA, the COTP Savannah will provide an approved timeframe a vessel may enter the RNA. Chart: 11506, Ref: LNM 37/19, 38/19, 40/19, 42/19, 46/19

GEORGIA – ST. SIMONS SOUND: INSTALL OF PILES AROUND M/V GOLDEN RAY

Weeks Marine will be installing piles to create a barrier around the M/V GOLDEN RAY. During this construction phase, approximately 40 pile pairs will be installed. After the install of the piles, lights will be installed directly on the top of each pile. The lights will be transferred from the pile to the top of the pile pair structural framing when the framing is installed, with one light on each end of the top framing beam, with the lights approximately 20 feet apart at an elevation of +20 feet above MLLW. The pile pairs are typically spaced 155 feet apart around the perimeter of the EPB, environmental protection barrier. The lights will be an all-around white light with a minimum range of 1-mile. Vessels on scene: (2) Tugs: ROBERT and THOMAS, (3) Derrick Crane Barges: Weeks 526, 531 and 541 and (1) Crew boat: SORENSEN MILLER. All vessels will monitor VHF channels 13 and 16. Further information contact Weeks Marine, Rick Palmer at (757) 387-0032 or the US Coast Guard Marine Safety Unit Savannah at (912) 652-4353. Chart: 11506, Ref: LNM 07/20

FLORIDA – MIAMI – BISCAYNE BAY – REGULATED NAVIGATION AREA

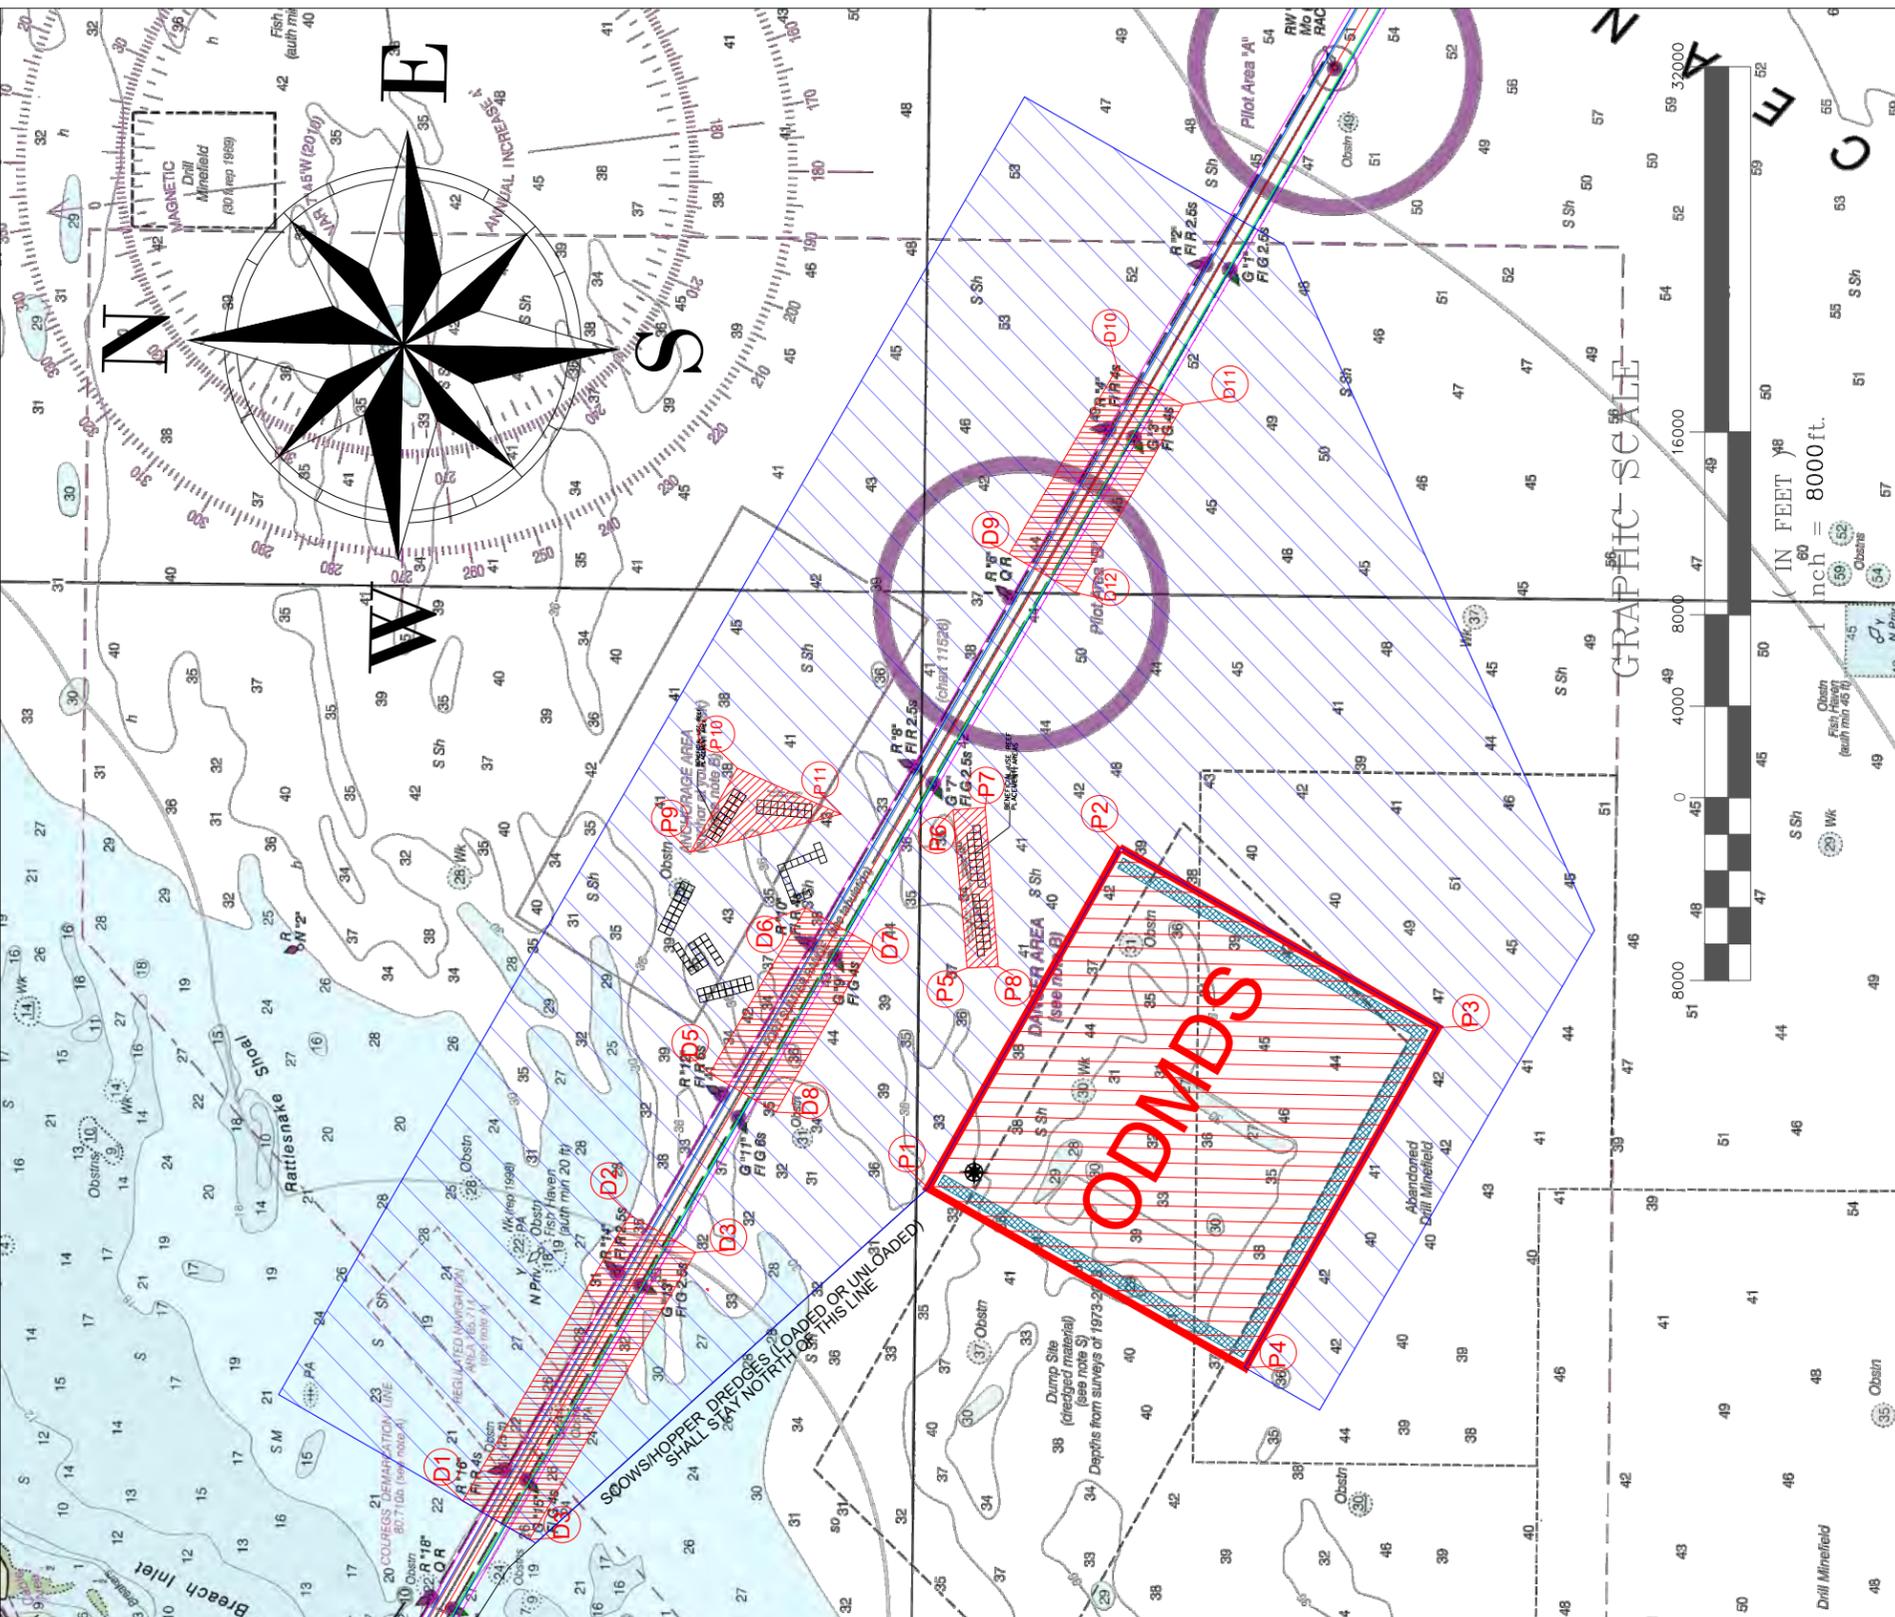

The Coast Guard will enforce a Regulated Navigation Area (33 CFR§165.779) on July 4, 2020 from 7:00 p.m. until 2:00 a.m. on July 5, 2020. The regulated area includes all navigable waters within Biscayne Bay from approximately Julia Tuttle Causeway south to Turkey Point. Vessels will be required to transit the regulated area at no more than 15 knots. Ref: LNM 25/20
