SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-second characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jttfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

SPECIAL NOTICE - HURRICANE SEASON

The hurricane season is considered to extend from June 1, 2018 through November 30, 2018. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.
- (f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM Weather Channel for National Weather Service Broadcasts.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved, due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation system marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in IALA Region B and follow the traditional 3R rule of red,

right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation is generally considered as moving westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest Coast Guard unit.

During the hurricane season, drawbridges along the coast may deviate from normal operating procedures. Some bridges may be unable to open because of high winds. Others may be authorized extended closed periods to facilitate evacuation of land traffic. Mariners should anticipate bridge closures by listening to the National Weather Service and Coast Guard Broadcasts on hurricane conditions. Because of the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

Locks and Navigation Structures are operated to pass navigation until such time, that water levels and wind conditions warrant operations unsafe. The structures are then closed in accordance with hurricane preparation procedures. Mariners will be given as much notice as possible when structures are to be closed. However, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

LNM: 21-18

SPECIAL NOTICE - HURRICANE SEASON

Mariners are advised that the Hurricane Season extends from June 1, 2018 until November 30, 2018.

Locks and Navigation Structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe.

The structures are then closed in accordance with Hurricane procedures. Be advised that this includes the Harvey Canal Sector Gate, located in the Harvey Canal immediately south of the Lapalco Bridge at mile marker 2.8 of the Gulf Intracoastal Waterway (GIWW) West of Harvey Lock (WHL).

Mariners will be given as much notice as possible when Structures are to be closed. However, these Structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

DISCONTINUATION OF AUTOMATIVE REAL TIME NARRATIVE SUMMARIES (ARNS)

Effective May 31, 2018, at 1300 Coordinated Universal Time

(UTC) (9AM EDT), the NOAA/NOS/CO-OPS Automated Real-Time Narrative Summaries (ARNS) Product will be discontinued by NOS/CO-OPS.

Currently, ARNS is available through the Physical Oceanographic Real Time System (PORTS) under a link titled 'ARNS Real-time Text Summary'.

Examples of ARNS Link on Port Pages: <https://tidesandcurrents.noaa.gov/ports/index.html?port=mi>

ARNS on the mobile PORTS pages (e.g. Chesapeake Bay South): <https://mobile.tidesandcurrents.noaa.gov/ports/mobile.shtml?port=cs>

The ARNS product displays Real-Time Text Summary in a narrative form to reduce the need to visually inspect the multiple graphic products of water level, winds, water and air temperature and atmospheric pressure from NOS/CO-OPS NWLON stations. There are no changes to the PORTS or NWLON observing system but the ARNS display has become redundant with newer data dissemination pathways.

SECTION III - TEMPORARY CHANGES and TEMPORARY CHANGES CORRECTED

This section contains temporary changes and corrections to Aids to Navigation for this edition. When charted aids are temporarily relocated for dredging, testing, evaluation, or marking an obstruction, a temporary correction shall be listed in Section IV giving the new position.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

		Green can				
	Corrective Action	Object of Corrective Action			Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true.

Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

Advance Notice(s)

TX – COPRUS CHRISTI BAY – LA QUINTA CHANNEL

In order to mark the centerline of the La Quinta Channel extension the following aids to navigation will be established between May 2018 and October 2018:

Establish La Quinta Channel A Outer Range Front Light (LLNR-29076) in position 27-52-26.553N/097-14-56.319W, showing Q G Day/Night and KRW on skeleton tower.

Establish La Quinta Channel A Outer Range Front Passing Light (LLNR-29076.01) in position 27-52-26.553N/097-14-56.319W, on same structure as the La Quinta Channel A Outer Range Front Light, showing FI W 4s

Establish La Quinta Channel A Outer Range Rear Light (LLNR-29077) in position 27-52-20.098N/097-14-24.959W, showing Iso G 6s Day/Night and KRW on skeleton tower.

Establish La Quinta Channel A Outer Precision Directional Light (LLNR-29078) in position 27-52-20.098N/097-14-24.959W, showing FI G from 101.9 to 102.2, F G from 102.2 to 102.6, alternating GW from 102.6 to 102.9, F W (on channel line) from 102.9 to 103.1, alternating RW from 103.1 to 103.5, F R from 103.5 to 103.9, FI R from 103.9 to 104.2. The PDL will be waterway user activated via a Marine Radio Activated Light System (MRALS).

Establish La Quinta Channel A Inner Range Front Light (LLNR-29101.25) in position 27-52-53.103N/097-17-05.427W, showing Q G Day/Night and KRW on skeleton tower.

Establish La Quinta Channel A Inner Range Rear Light (LLNR-29101.26) in position 27-52-56.969N/097-17-24.241W, showing Iso G 6s Day/Night and KRW on skeleton tower.

Establish La Quinta Channel A Inner Precision Directional Light (LLNR-29101.28) in position 27-52-56.969N/097-17-24.241W, on same structure as the La Quinta Channel A Inner Range Rear Light, showing FI R from 281.9 to 282.3, F R from 282.3 to 282.6, alternating RW from 282.6 to 282.9, F W (on channel line) from 282.9 to 283.1, alternating GW from 283.1 to 283.5, F G from 283.5 to 283.8, FI G from 283.8 to 284.2. The PDL will be waterway user activated via a Marine Radio Activated Light System (MRALS).

More specific construction dates will be published as soon as they are available.

TX – UPPER GALVESTON BAY – HOUSTON SHIP CHANNEL – BAYPORT SHIP CHANNEL

Dredging that will widen the entrance to the Bayport Ship Channel and allow for an easier transition for marine traffic both inbound and outbound from the Houston Ship Channel into the Bayport Ship Channel is currently being conducted. The following changes will be made upon completion of the Bayport Ship Channel Flare Dredging Project.

Establish Bayport Ship Channel Light 1 (LLNR-24450) in approximate position 29-36-37.415N/094-57-23.283W, FL G 6s, Focal Height 17ft, Nominal Range 4NM, SG on a pile, Radar Reflector.

Relocate Bayport Ship Channel Light 3 (LLNR-24475) to approximate position 29-36-44.560N/094-57-34.010W.

Relocate Bayport Ship Channel Light 5 (LLNR-24485) to approximate position 29-36-49.137N/094-57-50.161W.

Relocate Houston Ship Channel Light 75 (LLNR-24385) to approximate position 29-36-26.614N/094-57-18.025W.

FL – ST. MARKS RIVER AND APPROACHES – ST. MARKS RIVER

The following change will be made after the week of July 10, 2018.

Due to shoaling and shallow water depths, the Coast Guard is reducing the size of the buoy hulls marking the channel. This change shall enable smaller Coast Guard vessels to respond quicker to any buoy discrepancies and better maintain this channel. The mariner will notice a slight difference in nominal visual and radar range of the buoy.

Change St. Marks River Buoy 8 (LLNR-1550) on scene hull in approximate position 30-04-06.207N/084-11-22.607W.

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

FL - GULF OF MEXICO - U.S. Navy Testing

Continuing until approximately January 1, 2019, the U.S. Navy will be conducting inert underwater mine and Airborne Mine Neutralization System (AMNS) destructor testing in the Gulf of Mexico, in an area approximately 39 nautical miles southwest of the Panama City Pass. The inert mine destructors are silver and orange, 3 feet long, 6 inches in diameter and weighs approximately 2 pounds in water, while weighing 35 pounds in air. Inert mine bottom shapes and inert mine destructors will be deployed, operated and tested in the below test areas during this period. AMNS testing will consist of surface ship operations to include the following: R/V SEWEE or R/V STARFLEET PATRIOT and Project Support Crafts (PSC) 02, 03, 05 or PSC 11; however, additional R/Vs may be added in the future. It is requested that all vessels maintain a one nautical mile CPA of all vessels while operations are in progress. All U.S. Navy / U.S. Navy contracted AMNS support vessels will monitor VHF-FM Channel 16. For up-to-date information, mariners can contact Mr. Robertson, at (850) 230-7698 or via e-mail at William.f.robertson@navy.mil . The corners of the test areas are as follows:

Test Area Tango:

FL - GULF OF MEXICO - U.S. Navy Testing

The U.S. Navy will be conducting tow body test operations in the Gulf of Mexico, navigation chart; U.S. Gulf Of Mexico Cape St. George to Mississippi Passes chart number 11362, Panama City Operations Area; W-151A, W-151B, 6D, 6C and 7B, continuing through June 30, 2018. The test area is defined by the following approximate positions:

29-45-13.9N 086-06-08.3W,
29-23-01.0N 086-11-48.1W,
29-22-31.7N 086-27-38.5W and
29-38-46.2N 086-27-50.0W.

The U.S. Navy will be towing the submerged towed body behind the tow platform at various cable scopes that could reach up to 1,600 feet. The vessel will display the appropriate day shapes per the International Regulations for Prevention of Collisions at Sea, 1972 (72 COLREGS) while the tow body operations are being conducted. The main surface craft supporting these test/operations and serving as the tow platform is the M/V PATRIOT. It is requested that all vessels maintain a one nautical mile CPA of the M/V PATRIOT while operations are in progress. All U.S. Navy support craft will monitor VHF-FM Channel 16

Continuing until approximately July 2018, Great Lakes Dredge & Dock Company will be conducting dredging operations from the Ship Shoal Block 88 Borrow Area located approximately 8.2 nautical miles south southwest of Whiskey Island. Material dredged will be hydraulically placed via submerged pipeline onto the center of Whiskey Island. The 30 inch diameter submerged steel pipeline will be placed directly on top of the existing natural sea floor within the permitted conveyance corridor. The hydraulic cutter suction Dredge ALASKA will be operating within the Ship Shoal Block 88 Borrow Area along with Tender Tugs and Anchor Barges. Approximately 3,000 feet of float hose will be trailing the Dredge ALASKA within the Borrow Area. Three Hydraulic Boosters, the ERIN, JESSIE and TEXAS JUNIOR, will be anchored at various points within the permitted submerged pipeline conveyance corridor to aid in pumping the dredge material from the Borrow Area to Whiskey Island. Work will be performed 24-hours a day, 7-days a week. The Dredge ALASKA and support vessels will be monitoring VHF-FM Channel 13 or 16. All vessels will display appropriate lighting and day markers as required by U.S. Coast Guard Regulations. All floating pipeline (Float Hose) and marker/anchor buoys will be highly visible and marked with yellow flashing lights. The submerged pipeline will be marked with regularly spaced orange Norwegian type buoys with Solas retro-reflective tape at a maximum spacing of 500 feet as well as yellow can buoys with yellow flashing lights at a maximum spacing of 2,500 feet apart. LA - LAKE PONTCHARTRAIN - US 11 Bridge Rehabilitation Outside the Main Channel Spans

The contractor continues the rehabilitation work on the U.S. 11 Bascule Bridge across Lake Pontchartrain between New Orleans and Slidell, Orleans and St. Tammany Parishes, Louisiana. The contractor will work Monday through Friday, from 6:30 a.m. until 5:30 p.m. Work on the project has begun on the Slidell side (north) and consist of inspections, measuring of cracks, sand blasting, grinding, spall repairs and wrapping of the piers and caps as necessary. The contractor has extended the scaffolding to a total of 2,400 feet north of the Bascule Bridge, as this entire section has a reduced vertical clearance of 8 feet, thus eliminating the availability by recreational boaters. The new scaffolding set-up, including moving cables to Span 423 to Span 403. The majority of the time workers are located between Span 465 to Span 398. Some work is being done on the Orleans side (south shore) between Span 8 to Span 15. The work area will be marked by danger buoys approximately 50 feet on either side of the bridge marking an exclusion zone for vessels to stay out of the work zone. The buoys will be spaced approximately 200 feet apart and will mark the entire length of the work area. The buoys will be lighted at night with FI W 2.5 sec. lights. Mariners should avoid this area at all times. Additionally, the contractor has added an additional crane barge measuring 150 feet by 50 feet, to the existing barges (1 measuring 30 feet by 120 feet, with a height of 25 feet and 1 measuring 30 feet by 110 feet). There are also 2 flex floats and 1 supply barge located near the bridge within the work zone. When the contractor is not working at night and over the weekends, the barges will be grouped together and spud down away from the navigation span and near the work area. This equipment will be lighted by fixed white lights on each outward corner as required. During the work day, the Tug JO ANN SIMS will monitor VHF-FM Channel 16. The L&A Contracting Company is the contractor on the project and can be reached at (601) 270-7704, 24-hours a day. This project will take approximately 48 months to complete. In conjunction with this work, additional work beneath the bridge on the New Orleans Side (south) will have divers placing wraps during daylight hours, issued in a separate Local Notice to Mariners, for additional information.

TX - LAVACA BAY - Bridge Rehabilitation - UPDATE

The rehabilitation project on the SH 35 bridge across Lavaca Bay, mile 8.2, at Port Lavaca, Calhoun County, Texas continues. The scheduled working hours are from 7:00 a.m. until 7:00 p.m. The main channel work has begun to include a walking platform reducing vertical clearance by 4 feet the entire horizontal clearance between Bents 115 to 118. Therefore, the vertical clearance reduction is 41 feet within the channel until August 2018. Presently, small work floats measuring approximately 40 feet by 8 feet, in multiple configurations could obstruct an entire area near the main channel. Two barges are working in Span 133 to Span 153. All barges are located at Span 66 and when heavy winds and bad water conditions are present barges are returned to the dock facility. If barges remain they will be properly lighted as required by the "Inland Navigation Rules of 1980" and accompanied by a 26 foot push boat. The M/V BARBARA ANN will monitor VHF-FM Channel 16, or onsite Project Manager can be contacted, at (281) 831-7864. Mariners should avoid these areas. Harrison County, Mississippi
Owner Contract No. W91278-14-8-0007 GL #84510**

To Whom It May Concern:

Great Lakes Dredge and Dock has been contracted by The USACOE Mobile District in connection with the above referenced contract. We hereby notify and request that an issue of "Notice to Mariners" be published alerting to those using the locations identified below. **Please be advised, buoys marking these locations should NOT be used for navigational purposes. Boaters should try to maintain a safe distance form these buoys.**

Operations: The locations between Ship Islands West and East and in Biloxi Bay will be occupied as a staging area for pipeline for future use while conducting island restoration operations on Ship Island; in addition, submerged pipeline will start to be laid near Ship Islands West and East in preparation for island restoration operations; additional equipment includes but is not limited to anchors barges, dredge tenders and floating pipeline. The location between the Biloxi Bay ship channel and Deer Island will see occasional traffic with pipeline of lengths up to 3000'; in addition, pipeline preparations may be conducted with additional equipment outside the safety fairway toward Deer Island. All manned vessels will monitor VHF Channels 3, 5, and 16.
