REPORT DISCREPANCIES IN AIDS TO NAVIGATION TO THE NEAREST COAST GUARD UNIT

The Ninth District and all Sector offices for their areas of responsibility issue a BROADCAST NOTICE TO MARINERS.

The following Broadcast Notice to Mariners have been incorporated into this week's Local Notice to Mariners:

Sector Buffalo, NY - B004-17 through B004-17

Ninth District - C022-17 through C023-17

Sector Detroit, MI - D005-17 through D008-17

Sector Lake Michigan, WI - M029-17 through M035-17

Sector Sault Ste Marie, MI - S019-17 through S022-17

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The

NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <https://cgls.uscg.mil/mailman/listinfo/nanu>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or AIS service. Users are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, mail to: webmaster@smtp.navcen.uscg.mil, or on the internet at: <https://www.navcen.uscg.gov>

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids to navigation with varying degrees of reliability. Prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid to navigation. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker which secures the buoy to the seabed. The approximate position is used because of the practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision in position fixing methods, prevailing atmospheric and sea conditions, slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying length of chain, and the fact that the buoy body and/or sinker positions are not under continuous surveillance, but are normally checked only during periodic maintenance visits which often occur more than a year apart. Due to the forces of nature, the position of the buoy body can be expected to shift inside and outside the charted symbol. The mariner is also cautioned that buoys may be extinguished or sound signals may not function as the result of ice, running ice, or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction that the buoy marks.

IMPORTANT SAFETY NOTICE ABOUT THE RELIABLE OPERATION OF ECDIS

Following an announcement by the International Maritime Organization (IMO) concerning potential display anomalies in some ECDIS systems, the International Hydrographic Organization (IHO) issued an ENC Data Presentation and Performance Check in October 2011. This check is intended to assist mariners and to help determine the extent of the anomalies. IHO has received reports from mariners confirming that a number of ECDIS fail to display some significant underwater features in the "Standard" display mode. For all significant objects to be visible to the mariner, these ECDIS must be operated in "Full display" or "All display" mode until a software upgrade is made available from the manufacturer. Mariners are strongly encouraged to use the IHO ENC Data Presentation and Performance Check issued through ENC service providers and also available directly from the IHO website (www.iho.int) to check the operation of their ECDIS and to determine whether their system is affected. IHO Circular Letter 33/2012 is available on the Coast Guard's Navigation Center website (<http://www.navcen.uscg.gov>) under the heading News and Notices.

IMPLEMENTATION OF THE NEW U.S. MARITIME ADVISORY SYSTEM

Effective January 26, 2017, a new U.S. Maritime Advisory System was implemented. The new system streamlines, consolidates, and replaces maritime threat information previously disseminated in three separate government agency instruments: Special Warnings, MARAD Advisories, and global maritime security related Marine Safety Information Bulletins. See enclosure 5 for details.

LNM: 06/17

ZIKA VIRUS UPDATE

The U.S. Department of Transportation's Maritime Administration (MARAD) has issued MARAD Advisory 2016-03 on the Zika Virus and Impacts on Maritime Commerce. The Advisory can be found at <https://www.marad.dot.gov/newsroom/advisory/2016/marad-advisory-2016-03/>. U.S. flag operators are requested to forward this link to their ships by the most expeditious means.

LNM: 39/16

AIS ATON TESTING

The Coast Guard will be conducting tests of our AIS Aids to Navigation on 7 Feb thru 8 Feb 2017. The test may intermittently affect the AIS signals on our AIS Aids to Navigation and may change the MMSI Number. Any permanent change resulting from the test will be published in the Local Notice to Mariners and corrections made to the Light List

LNM: 05/17

OPERATION TACONITE

Commander Coast Guard Sector Sault Ste Marie commenced operation TACONITE.

At the start of each voyage or transit, to enhance the coordination of ice breaking resources, COTP Sault Ste Marie directs all shipping companies to provide an estimated time of arrival for their vessels downbound to WHITEFISH POINT, upbound to DETOUR REEF LT, eastbound to LANSING SHOAL LT, westbound to ROUND ISLAND, or arriving or departing from any of the Western Superior ports and terminals.

Similarly, for vessels operating in LAKE MICHIGAN in the presence or ice, all shipping companies should provide an estimated time of arrival for vessels entering the STURGEON BAY SHIP CANAL, ROCK ISLAND PASSAGE or when arriving or departing ESCANABA, GREEN BAY, MARINETTE or any other ports and terminals within GREEN BAY.

Estimated time of arrivals MUST be received six (6) hours prior to a vessels arrival to any of these points or once a day by 1000 (eastern). Position reports may be filed with "SAULT TRAFFIC" either by LANDLINE: 906-635-3232, FAX: 906-635-3238, or EMAIL: SOOTFC@USCG.MIL.

A vessels ETA must be updated whenever the arrival time changes by more than six (6) hours. Mariners are asked to establish VHF Radio contact with the servicing Icebreaker on VHF-FM Channel 16 approximately one (1) hour before reaching the appropriate service area.

LNM: 51/16

WATERWAY CLOSURE - ST MARYS RIVER - Lake Nicolet To Munuscong Lake

Per 33 CFR 162.117 VTS St Mary's River will close the West Neebish Channel. Alternating one way traffic will be established in the Munuscong and Middle Neebish Channel's, effective 0800 local 19 Jan 2017.

LNM: 03/17

WATERWAY CLOSURE - LAKE MICHIGAN - De Tour Passage To Munuscong Lake

Per 33 CFR 162.117 VTS St Mary's River closed Pipe Island Passage to the East of Pipe Island Shoal and North of Pipe Island Twins. Pipe Island course is an alternating one way route, effective 1800 local 11 Jan 2017.

LNM: 03/17

WATERWAY CLOSURE - LAKE HURON - Straits Of Mackinac

Per 33 CFR 165.901 Captain of the port Sault Ste Marie closed the waters between Cheboygan, Michigan and Bois Blanc Island known as the South Channel, effective 1800 local 11 Jan 2017.

LNM: 03/17

WATERWAY CLOSURE - LAKE MICHIGAN - Grays Reef Passage

Per 33 CFR 165.901 Captain of the port Sault Ste Marie closed Greys Reef Passage, effective 1800 local 11 Jan 2017.

LNM: 03/17

OPERATION COAL SHOVEL

Commander U.S. Coast Guard Sector Detroit has commence Operation COAL SHOVEL. To enhance the coordination of ice breaking resources, Captain of the Port Detroit directs all shipping companies to provide an estimated time of arrival (ETA) for their vessels arriving or departing from any port or terminal within the Operation COAL SHOVEL area of responsibility (AOR).

The COAL SHOVEL AOR extends from the eastern extent of navigable waters of Lake Erie through the Detroit and St. Clair River system and

north to include all navigable waters of Lake Huron south of 45 degrees, 20 minutes north latitude.

ETA reports must be received six (6) hours prior to vessel arrival or once a day by 1000 (eastern). This requirement may be met through submission of the Daily Vessel Movement Reports in electronic form via email to SecDetroitWWM@uscg.mil. Estimated time of arrivals must be updated whenever the arrival time deviates by more than 6 hours. ETA updates may be reported by telephone to the Sector Detroit Command Center at 313-568-9560.

LNM: 01/17

RANGE STRUCTURES

The U.S. Coast Guard has become aware that Coast Guard information used to depict a rangeline on NOAA Electronic Navigational Charts (ENC) may not be of sufficient accuracy to accurately portray the rangeline on the ENC. Mariners are cautioned that the position of a rangeline as shown on an ENC may not reflect its true position.

THE 2017 ELECTRONIC LIGHT LIST

The 2017 Light List is now available.

Coast Guard Light Lists are a means for communicating aids to navigation information to the maritime public. The last government printed Light Lists were the 2014 editions. While the Light Lists will no longer be available in government printed form, commercial reproductions may be available for purchase from maritime service providers. Local Notices to Mariners will continue to advertise Light List corrections and NAVCEN will continue to publish a compilation of corrections.

2017 Light Lists are available on the USCG Navigation Center's website at: <https://www.navcen.uscg.gov/?pageName=lightLists>

Complete versions of the 2017 Light Lists are updated weekly on the NAVCEN website and mariners should download applicable copies and updates as needed at: <https://www.navcen.uscg.gov/?pageName=lightListWeeklyUpdates>.

A summary of 2017 Light List corrections are available at: <http://www.navcen.uscg.gov/?pageName=lightListCorrections>

USE OF ELECTRONIC CHARTS AND PUBLICATIONS IN LIEU OF PAPER CHARTS, MAPS, AND PUBLICATIONS

The U.S. Coast Guard has issued Navigation and Vessel Inspection Circular (NVIC) No. 01-16 which contains guidance on the use of electronic charts and publications in lieu of paper charts, maps, and publications. This guidance applies to U.S. flagged vessels subject to U.S. domestic chart, map, and publication carriage requirements contained in Titles 33 and 46 of the Code of Federal Regulations. The NVIC can be viewed at <https://www.uscg.mil/hq/cg5/nvic/default.asp> or <https://cgportal2.uscg.mil/library/directives/SitePages/Home.aspx>.

LNM: 06/16

GREAT LAKES - Great Lakes Water Levels

The expected water levels on the Great Lakes for February 10, 2017. Connecting Channels and the St. Lawrence River, given in inches above (+) or below (-) Low Water Datum (LWD). LWD is a plane of reference used on a navigation chart. It is also known as chart datum.

Great Lakes:

Lake Ontario +24, Lake Erie +35, Lake St. Clair +30, Lake Michigan-Huron +18, Lake Superior +9.

St. Lawrence River:

Above Long Sault Dam +37, Above Iroquois Dam +25, Ogdensburg +26, Alexandria Bay +24, Head of River at Cape Vincent +24.

Detroit River:

Lake Erie at Pelee Passage +35, Mouth of River at Gibraltar +30, Fort Wayne +32, Head of River above Belle Isle +32.

St. Clair River:

Mouth of River at St. Clair Flats +30, Algonac +33, St. Clair +27, Blue Water Bridge +25, Head of River at Fort Gratiot +20, Lake Huron Approach Channel +18.

St. Marys River:

Mouth of River at Detour +18, West and Middle Neebish +17, Head of Little Rapids +17, U.S. Slip +17, Above Locks +14, Head of River at Point Iroquois +9.

Available water depth is determined for a location by adding (if +) or subtracting (if -) the amount from the above to the water depth shown on National Oceanic and Atmospheric Administration (NOAA) navigational charts. Caution: Depths so determined are representative of a still water surface elevation, disturbed by neither wind nor other causes. Depth, however, may be reduced or increased as much as several feet for short periods of time due to these disturbances, or when sections of channels develop shoals. Vessel masters should refer to the Local Notice to Mariners for extent of shoaling and scattered bedrock projections in all channels. For further information direct inquiries to: Department of the Army, Detroit District Corps of Engineers P. O. Box 1027, Detroit, MI 48231, (313) 226-6443. SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

Waterways Analysis and Management System Study - 2017

The Coast Guard is conducting a Waterways Analysis and Management System Study on the following waterways during 2017. The study focuses on the area's aid to navigation system, waterborne commerce, marine casualty information, emergency response plans, routine and emergency communication capabilities, and future development projects. Any company or individual wishing to comment on the waterway reviews listed below is encouraged to contact the Coast Guard unit listed or email comments to william.d.sharp@uscg.mil. Any comments emailed will be forwarded to the appropriate unit for use in the WAMS project. A survey is attached to the Local Notice to Mariner and can be used to comment on these reviews or on any waterways located in the Great Lakes.

AVAILABILITY OF PUBLIC NOTICE

All interested parties are notified that an application has been received by Commander, Ninth Coast Guard District, from the Wisconsin Department of Transportation for approval of location and plans for the replacement of a double-bascule highway bridge over a navigable waterway of the United States.

WATERWAY AND LOCATION: Wisconsin State Route 116, Mile 2.43, Wolf River, Village of Winneconne, Winnebago County, Wisconsin.

CHARACTER OF WORK: Replacement of a double-bascule highway bridge with a fixed highway bridge. The proposed replacement bridge would be constructed on the same alignment but would be located approximately 65-feet south of the existing bridge.

PROPOSED MINIMUM NAVIGATIONAL CLEARANCES:

EXISTING	PROPOSED
Horizontal: 85.5-ft between bridge piers, normal to the axis of the navigation channel.	Horizontal: 115-ft between bridge piers, normal to the axis of the channel.
Vertical (closed position): 9-feet at center (Referred to Mean Sea Level at New York, NY)	Vertical: 23.5-ft at center with 23.25-ft at the limits of the navigation channel (Referred to Standard Low Water, Elevation 745.64, IGLD85)
Vertical (open position): Unlimited	

ENVIRONMENTAL CONSIDERATIONS: Federal Highway Administration (FHWA), the lead federal agency for the proposed project, issued a Finding of No Significant Impact (FONSI) for the project as proposed on August 5, 2014 for purposes of the National Environmental Policy Act (NEPA).

FOR MORE INFORMATION INCLUDING INSTRUCTIONS ON PROVIDING

COMMENTS: The complete public notice including a brief summary of project impacts, a map of the location, and plans for the proposed bridge can be viewed and printed from the U.S. Coast Guard Navigation Center's web site

<http://www.navcen.uscg.gov/?pageName=pnBridges&Active=1®ion=9> , or by calling, emailing or mailing a request to the Coast Guard project manager, Mr. Blair Stanifer. He can be contacted by telephone at (216) 902-6086, by mail at Commander (dpb), Ninth Coast Guard District, 1240 E. 9th St., Cleveland, OH 44199, or by email at William.b.stanifer@uscg.mil . Comments received will be made part of the case record.

All federal, state and local agencies and public representatives are requested to submit an email address(s) to the project manager to obtain this public notice and announcements of future public notices from this office.

Interested parties are requested to express their views, in writing, on the proposed project giving sufficient detail to establish a clear understanding of their reasons for support or opposition to the proposed work. Comments will be received for the record at the office of: Commander (dpb), Ninth Coast Guard District, 1240 E. 9th St, Cleveland, OH 44199, for a 30 day period from the date of the public notice.

Mariners are requested to comment on the proposed vertical and horizontal navigational clearances and any other navigational safety issues including the extent of nighttime navigation past the proposed project's site.

U.S. Coast Guard to Test Automatic Identification System (AIS) Aids to Navigation (ATON)

In the near future, the U.S. Coast Guard and other authorized agencies and organizations (i.e., U.S. Army Corps of Engineers, Marine Exchange of Alaska) will begin transmitting AIS ATON messages and marine safety information via AIS for testing and evaluation. The exact content, location, and times of these broadcasts will be announced in future Local Notices to Mariners.

AIS is an internationally adopted radio communication protocol that enables the autonomous and continuous exchange of navigation safety related messages amongst vessels, lifeboats, aircraft, shore stations, and aids to navigation (AIS ATON). AIS ATON stations broadcast their presence, identity (9-digit Marine Mobile Service Identity (MMSI) number), position, and status at least every three minutes or as needed. These broadcasts can originate from an AIS station located on an existing physical aid to navigation (Real AIS ATON) or from another location (i.e., AIS Base Station). An AIS Base Station signal broadcasted to coincide with an existing physical aid to navigation is known as a Synthetic AIS ATON. An electronically charted, but non-existent as a physical aid to navigation, is identified as a Virtual AIS ATON. The latter two can be used to depict an existing aid to navigation that is off station or not watching properly or to convey an aid to navigation that has yet to be charted. All three variants can be received by any existing AIS mobile device, but they would require an external system for their portrayal (i.e., AIS message 21 capable ECDIS, ECS, radar, PC). How they are portrayed currently varies by manufacturer, but the future intention is for the portrayal to be in accordance with forthcoming International Standards (i.e., IEC 62288 (Ed. 2), IHO S-4 (Ed. 4.4.0)).

Mariners capable of receiving and displaying these test AIS messages are encouraged to provide feedback and report any anomalies to the USCG NAVCEN Website: <http://www.navcen.uscg.gov> | Contact Us Tab | Subject: AIS | Category: AIS Testing.

ENCLOSURE

IMPLEMENTATION OF THE NEW U.S. MARITIME ADVISORY SYSTEM

The launch of the new *U.S. Maritime Advisory System* represents the most significant update since 1939 to the U.S. government process for issuing maritime security alerts and advisories. The new system establishes a single Federal process to expeditiously provide maritime threat information to maritime industry stakeholders, including vessels at sea. In response to valuable feedback from stakeholders, the *U.S. Maritime Advisory System* was developed to streamline, consolidate, and replace maritime threat information previously disseminated in three separate government agency instruments: Special Warnings, MARAD Advisories, and global maritime security related Marine Safety Information Bulletins.

The *U.S. Maritime Advisory System* includes two types of notifications: A U.S. Maritime Alert and a U.S. Maritime Advisory. Maritime Alerts quickly provide basic threat information to the maritime industry. When amplifying information is available, a more detailed U.S. Maritime Advisory may be issued on a threat and could include recommendations and identify available resources. U.S. Maritime Alerts and U.S. Maritime Advisories will be broadcast by the National Geospatial-Intelligence Agency, emailed to maritime industry stakeholders, and posted to the Maritime Security Communications with Industry (MSCI) web portal at www.marad.dot.gov/MSCI. Maritime Advisory 2017-001, released on January 26, 2017, can be found there.

The *U.S. Maritime Advisory System* is a whole-of-government notification mechanism. The Departments of State, Defense, Justice, Transportation, and Homeland Security, and the intelligence community supported the development of this new system in coordination with representatives from the U.S. maritime industry through the Alerts, Warnings, and Notifications Working Group.

Questions regarding the *U.S. Maritime Advisory System* may be emailed to MARADSecurity@dot.gov. Additional contact information is available on the MSCI web portal.
