## LOCAL NOTICE TO MARINERS

**District: 11**

**Week: 02/20**

CORRESPONDENCE TO:  
COMMANDER  
DISTRICT ELEVEN (DPW)  
COAST GUARD ISLAND BUILDING 50-2  
ALAMEDA, CA 94501-5100

REFERENCES: COMDTPUB P16502.6, Light List Volume VI, 2017 Edition, U.S. Chart No.1 12th Edition, and Coast Pilot Volume 7 49th Edition. These publications, along with corrections, are available at: <https://nauticalcharts.noaa.gov/>

BROADCAST NOTICE TO MARINERS - Information concerning aids to navigation and waterway management promulgated through BNM HB-0003-19, SF-0006-20, LA-0006-20, and SD-0003-20 have been incorporated in this notice, or will continue if still significant.

---

### SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

---

#### **SUBMITTING INFORMATION FOR PUBLICATION IN THE LOCAL NOTICE TO MARINERS**

A complete set of guidelines with examples and contact information can be found at <http://www.pacificarea.uscg.mil/Our-Organization/District-11/Prevention-Division/LnmRequest/> or call D11 Waterways Management Branch at 510-437-2980 or e-mail [D11LNM@uscg.mil](mailto:D11LNM@uscg.mil). Please provide all Local Notice to Mariners submissions 14 days prior to the start of operations.

#### **BRIDGE INFORMATION- PROJECTS, DISCREPANCIES, CORRECTIONS & REGULATORY**

For all bridge related issues, including lighting, operation, obstructions, construction, demolition, etc. contact the Eleventh Coast Guard District Bridge Administrator 24 hour cell phone at 510-219-4366. Flotsam may accumulate on and near bridge piers and abutments. Mariners should approach all bridges with caution. A vessel delay at a drawbridge may be reported to the District Bridge Administrator by telephone, or by using the [Delay\\_Report\\_11-2017.pdf](#) included in the Enclosures section of this Local Notice to Mariners.

#### **BRIDGE INFORMATION-COMMUNICATIONS PROTOCOL-BENICIA/MARTINEZ UPRR BRIDGE- CARQUINEZ STRAIT**

All mariners requiring a bridge lift at the Benicia-Martinez Union Pacific Railroad Bridge, mile 7.0, over the Carquinez Strait, California, should follow the protocol in the document entitled "Coordination of Communications for Union Pacific Railroad Lift Operations." Mariners can download a copy of the document by selecting the link BENICIA-MARTINEZ RR BRIDGE under the QUICK LINKS section at <https://www.pacificarea.uscg.mil/vtssf>.

#### **CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION**

The aids to navigation depicted on charts comprise a system of fixed and floating aids to navigation with varying degrees of reliability. Prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid to navigation. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker which secures the buoy to the seabed. The approximate position is used because of the practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision in position fixing methods, prevailing atmospheric and sea conditions, slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying length of chain, and the fact that the buoy body and/or sinker positions are not under continuous surveillance, but are normally checked only during periodic maintenance visits which often occur more than a year apart. Due to the forces of nature, the position of the buoy body can be expected to shift inside and outside the charted symbol. The mariner is also cautioned that buoys may be extinguished or sound signals may not function as the result of natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Furthermore, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction that the buoy marks.

#### **MARINE SAFETY INFORMATION BULLETIN**

Mariners directing the movement of large ships in or near the offshore approaches to San Francisco Bay have indicated to the Coast Guard that

the high-intensity “work-lights” on decks used by commercial fishing vessels prevent vessel operators from seeing the commercial fishing vessel’s navigation lights at night and in low-visibility conditions.

A clear and present threat to navigation safety exists when one vessel cannot see the navigation lights of another vessel. If navigation lights are obscured, the aspect of the latter vessel cannot be determined making it extremely difficult for both vessels to successfully execute the nautical rules of the road. International Navigation Rule 20 states that no other lights that may impair the visibility of the lights specified in the Rules shall be displayed from sunset to sunrise and during periods of low visibility. Vessels found to be in violation of Rule 20 may be subject to a potential \$6,500 fine.

All vessels operating near the San Francisco Bay inbound or outbound off-shore traffic lanes are strongly encouraged to comply with the Navigation Rules as they pertain to navigation lights. Vessels are also encouraged to maintain an active listening watch on VHF-FM Chan. 13 and 16, when the intentions of another vessel are unclear, communicate to make arrangements to reduce the risk of collision.

**NORTHERN CALIFORNIA-HUMBOLDT BAY-SEASONAL AID DISCONTINUANCE**

Humboldt Bay Lighted Bell Buoy 2 (LLNR 8135) will be temporarily discontinued for the 2019-2020 winter season until May 2020. The buoy is scheduled for re-establishment and back on-station station May 2020. A Synthetic AIS for the aid position is active and will be available year-round for this aid position. For more details or comments contact LT Ruth Sadowitz at 510-437-3801 or ruth.a.sadowitz@uscg.mil.

**SECTION II - DISCREPANCIES**

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

**DISCREPANCIES (FEDERAL AIDS)**

Ref. LNM

Advance Notice(s)

**SAN FRANCISCO BAY - RANGE UPGRADE**

The U.S. Coast Guard is increasing the brightness of Oakland Outer Harbor Range B Front Light (LLNR 4610), Oakland Outer Harbor Range A Front Light (LLNR 4620), and Oakland Outer Harbor Centerline Range Front Light (LLNR 4617) due to the background lighting of the Oakland Stadium.

For more details or comments contact LT Ruth Sadowitz, 510-437-3801 or ruth.a.sadowitz@uscg.mil.

Chart 18650

LNM: 46/19

**SECTION VI - PROPOSED CHANGES**

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

Proposed Change Notice(s)

**NORTHERN CALIFORNIA-POINT EDITH-LIGHT CONFIGURATION**

The U.S. Coast Guard is proposing to upgrade and reconfigure the lighting system on Point Edith Crossing Range Front and Rear Lights (LLNR 6433/6434) from an all around white light to a directional LED range light.

For more details or comments contact LT Ruth Sadowitz, 510-437-3801 or ruth.a.sadowitz@uscg.mil.

Charts: 18656 18658

LNM: 51/19

**SOUTHERN CALIFORNIA-NEWPORT BAY CHANNEL-AID CONVERSION**

The U. S. Coast Guard is proposing to make the temporary buoy for Newport Bay Channel Light 11 (LLNR 2470) a permanent buoy.

For more details or comments contact LT Ruth Sadowitz, 510-437-3801 or ruth.a.sadowitz@uscg.mil.

Chart 18754

LNM: 46/19

**SECTION VII - GENERAL**

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

**ARIZONA-BULLHEAD CITY-COLORADO RIVER-DAVIS DAM**

A rocky shoal has been reported below the Davis Dam in position 35-11-34N 114-34-16W where depths are reported between 5' to less than 1' depending upon the outflow from the dam. Recreational vessels have been seen running aground after making contact with the rocks as there are no signs or buoys marking the area. Mariners are requested to transit the area with caution. For more details or comments contact USCG Sector San Diego at 619-278-7073.

LNM: 16/18

**NORTHERN CALIFORNIA-CORDELL BANK-SURVEY OPERATIONS**

NOAA has deployed two research moorings in the following positions:

38-03-03N 123-27-24W

34-03-24N 123-29-09W

These are orange mooring buoys that have a flat surface float, flagpole, flag, and radar reflector. R/V MUSSEL POINT will be monitoring VHF-FM Chan. 16. Mariners are requested to transit the area with caution. For more details or comments contact Danielle Lipski at 415-464-5264.

Charts: 18010 18645

LNM: 52/18

**NORTHERN CALIFORNIA-CORTE MADERA CREEK-BRIDGE**

BON AIR RD BRIDGE REPLACEMENT-Construction of the replacement bridge is in progress. A temporary work trestle spans the channel and provides 20' of horizontal clearance, pile to pile, and 3' of vertical clearance from mean high water to the lowest hittable portion of the trestle (see BonAirRd\_Trestle.pdf at the end of this notice for navigation channel location). Four cofferdams have been placed within the creek to facilitate construction of the replacement bridge piers. Work will be conducted Monday through Saturday from 0700-1800. Mariners are requested to transit the area with caution. For conditions at the construction site, mariners can contact the contractor at 925-953-4610/916-919-2428 or the city at 415-259-7050. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

Chart 18649

LNM: 41/18

**NORTHERN CALIFORNIA-DELTA & RIVERS-MIDDLE RIVER-BRIDGE**

NEW WOODWARD ISLAND BRIDGE CONSTRUCTION-The new bridge completely spans the waterway and provides approximately 25' of vertical clearance at mean high water and 80' of horizontal clearance between piers 4 and 5, the main navigation span. Exact navigational clearances will be provided to the Coast Guard once the bridge owner completes construction and the navigation span surveyed. The 80' wide navigational channel, marked by lighted channel buoys, is still in place, available for vessel passage. (See WoodwardConstruction\_Lighting.pdf at the end of this notice for the construction lighting configuration). Installation of dolphin piles for pier protection and removal of the existing ferry docks is the only work remaining. Work is being conducted Monday through Saturday, 0700-2000. One spudded 45' x 200' material barge, one spudded 60' x 160' 230-ton crawler crane barge, the LINDA T work boat and several skiffs will be moored at various locations during the remainder of the work. The crane barge and LINDA T will be monitoring VHF-FM Chan. 09, 16 and 80A and can be moved for navigational safety if 4.5 hours notification is given to the contractor. After the workday, the barges will be left on-site. The upstream and downstream corners of each barge will be lighted at night with steady burning red lights. For more details or comments contact the contractor at 415-686-3938 or the Coast Guard Bridge Office at 510-437-3516.

Chart 18661

LNM: 41/19

**NORTHERN CALIFORNIA-DELTA & RIVERS-MOKELUMNE RIVER-BRIDGE**

CA ROUTE 12 BRIDGE-In order to carry out bridge rehabilitation, Caltrans is requesting to secure the bridge in the closed-to-navigation position during the following dates and times:

From 2100 on 05 Feb 20 to 0500 on 06 Feb 20, and  
From 27 Mar 20 through 30 Mar 20 (3 full days), and  
From 03 Apr 20 through 27 Apr 20 (24 full days).

Vessels that cannot transit the bridge while in the closed position can take an alternate route to reach either side of the drawspan.

The Coast Guard is requesting comments from waterway users on this proposed temporary operating schedule change. Please submit comments to Mr. Chris Cerles, Project Manager by email at Chris.G.Cerles@uscg.mil or telephone at 510-437-3461 no later than 31 Jan 20.

Chart 18661

LNM: 02/20

**NORTHERN CALIFORNIA-DELTA & RIVERS-SACRAMENTO RIVER-BRIDGE**

"I" STREET RAILROAD/HIGHWAY BRIDGE-The downstream swing span pier protection red light is extinguished. The swing span alternate red/green lights are showing both colors in closed position. Estimated time of repair is unknown. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

Chart 18662

LNM: 11/19

**NORTHERN CALIFORNIA-DELTA & RIVERS-SACRAMENTO RIVER-BRIDGE**

RIO VISTA DRAWBRIDGE- A temporary change in the drawspan operation schedule is in effect through 19 Mar 20. From 0701 on Mondays until 0700 on Saturdays, the drawspan will open when 2-hour notification is given to the drawtender and from 0701 Saturdays until 0700 Mondays, the drawspan shall open on signal when notice is given to the drawtender. For more details or comments, contact the Coast Guard Bridge Office at 510-437-3461.

Chart 18661

LNM: 01/20

**NORTHERN CALIFORNIA-DELTA & RIVERS-SACRAMENTO RIVER-BRIDGE**

ELKHORN FERRY (I-5) BRIDGE-The upstream clearance gauge is missing. Debris is built up against the northwest dolphin. Estimated time to resolve discrepancies is unknown. For more details or comments contact the Coast Guard Bridge Office at 510-437-3514.

Chart 18664

LNM: 13/19

**NORTHERN CALIFORNIA-DELTA & RIVERS-SAN JOAQUIN RIVER-BRIDGE**

REPLACEMENT NAVY DR BRIDGE-Construction of the replacement bridge is complete. The replacement bridge provides 18 ft of vertical clearance at mean high water and 80 ft of horizontal clearance in the middle navigation span. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

Chart 18661

LNM: 01/20

**NORTHERN CALIFORNIA-DELTA & RIVERS-THREE MILE SLOUGH-BRIDGE**

THREE MILE SLOUGH DRAWBRIDGE-The drawspan is secured in the closed-to-navigation position due to operational failure. Estimated time of repair Apr 20. The bridge provides 12' of vertical navigational clearance at mean high water when closed. Vessels able to transit the bridge while closed can continue to do so at any time. For more details or comments contact the Coast Guard Bridge at 510-437-3516.

Chart 18661

LNM: 39/19

**NORTHERN CALIFORNIA-HUMBOLDT BAY-HAZARDOUS CONDITIONS**

Humboldt Bay entrance is observing a reduced deep draft limit to 34' based on a +6' tide until maintenance dredging can be performed. Hazardous conditions with breaking surf and heavy shoaling have been observed in the vicinity of Humboldt Bay Lighted Buoy 9 (LLNR8195). Mariners are requested to transit the area with caution and contact U. S. Coast Guard Sector Humboldt Bay on VHF-FM Chan. 16 for assistance. For more details or comments contact U.S. Coast Guard Sector Humboldt Bay at 707-839-6113.

Chart 18622

LNM: 50/18

**NORTHERN CALIFORNIA-MIDDLE RIVER-POTENTIAL OBSTRUCTION TO NAVIGATION**

There is a potential obstruction to navigation in the Middle River at the entrance to Empire Cut at 37-58-18N 121-31-18W. The obstruction is a

**NORTHERN CALIFORNIA-MIDDLE RIVER-POTENTIAL OBSTRUCTION TO NAVIGATION**

partially submerged metal pipe. Mariners are requested to transit the area with caution. For more details or comments contact LT Emily Rowan at 415-399-7443.

Chart 18661

LNM: 46/19

**NORTHERN CALIFORNIA-MOSS LANDING-WAVEGLIDER DATA COLLECTION**

Monterey Bay Aquarium Research Institute (MBARI) is conducting 24 hours per day 7 days a week autonomous, unmanned maritime vehicle operations of two Liquid Robotics, Inc. Wavegliders until 30 Jun 20. Vehicles will be deployed in the vicinity of Moss Landing that will operate continuously between latitudes 35-07-12N and 37-12-00N and will extend shoreward as far West as 122-58-35W. Operations consist of scientific ocean data collection. The Waveglider carries no fuel, lubricants or hydrocarbons. It is wave powered and remotely attended from MBARI, moving at speeds of ~1kt, and designed to give way or part if encountered by a vessel. It is approximately 6.5' x 2' (surfboard size), yellow in color, with a contact plaque and mast extending 3' above the water surface, supporting a flag. Mariners are requested to transit the area with caution. **NORTHERN CALIFORNIA-SAN FRANCISCO BAY-BRIDGE**

GOLDEN GATE BRIDGE-Four 54' temporary under deck platforms; one 275' and one 1575' north of the south tower and one 275' and one 1575' south of the north tower have been installed at the bridge. Temporary platforms reduce vertical clearance at the bridge by no more than 14'. As the work progresses, the two outer platforms will be moved towards the towers and the two inner platforms moved towards the centerline of the bridge. The bridge's maintenance travelers are in use during the project and will remain outboard of the furthest north and furthest south temporary platforms. The temporary platforms and maintenance travelers are lighted at night with all-round red lights (see PlatformLighting\_GG\_Bridge.pdf at the end of this notice to see the lighting plan and locations of the temporary platforms). For navigational safety the maintenance travelers can be moved by contacting the Golden Gate Bridge at 415-923-2220. Work is being conducted Monday through Saturday, 0700-1700 and 2100-0500. For conditions at the bridge, mariners can contact the contractor at 415-716-0384. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

**NORTHERN CALIFORNIA-SUISUN MARSH-BOAT LOCKS**

The California Department of Water Resources have installed flashboards across the maintenance channel at the Suisun Marsh Salinity Control Structure, located 2.2 nm from the easterly end of Montezuma Slough at 38-05-36N 121-53-07W. The boat lock will operate daily from 0700-1700 until 31 May 20. Signs and lights are currently posted to warn vessels to avoid the use of the maintenance channel on the east side of the facility. The boat lock signal is a standard traffic light. Whistle signals to request opening are two prolonged blasts followed by two short blasts. VHF-FM Chan. 13 will be monitored during hours of operation. The boat lock is located on the east side of the channel and provides the following clearances: 16 feet horizontally; 9' over the sill at MLLW; 70' in length between sector gates; and no vertical impairment. The piers will be marked by fixed red lights, and other parts of the structure will be marked by fixed yellow lights. Mariners should be aware a shoal area exists along the east bank on both sides of the structure extending approximately 50' out from the existing levee. Marker buoys have been placed to identify the area. Mariners are requested to transit the area with caution and be advised that the Salinity Control Structure operations can at times create currents at the site greater than currents in other areas of Montezuma Slough. For more details or comments contact Reza Shahcheraghi at 916-574-2299.

**SOUTHERN CALIFORNIA-MISSION BAY-MARINE EVENT**

Hanohano Outrigger Canoe Club will sponsor the Hanohano Ocean Challenge in Mission Bay, CA on 25 Jan 20 from 0600-1400. The race will consist of approximately 400 paddle boards and canoes racing on two different courses. The short course starts in Bonita Cove, transits through Perez Cove to South Shores, proceeds north through Fisherman's Channel, then finishes back at Bonita Cove. The long course starts offshore just north of Mission Beach Jetty then heads to Crystal Pier, turns around, and finishes at Bonita Cove. Mariners are requested to transit the area with caution. For more details or comments contact Mr. Dan Van Dyck at 760-436-3589.

Chart 18765

LNM: 50/19

**SOUTHERN CALIFORNIA-OFFSHORE LOS ANGELES-HAZARDOUS OPERATIONS**

The U.S. Navy will be conducting hazardous operations from 0700-1200 on 28-29 Jan 20. All operations will be conducted in the vicinity of San Clemente Island, CA at 33-35-00N 118-35-00W. Mariners are requested to remain clear of this area by 3 nm and transit the area with caution. U.S. Naval vessels will monitor VHF-FM Chan. 16 and 65A. For more details or comments contact CPO Jon Mantle at 562-626-7786.

Charts: 18746 18757

LNM: 02/20

**SOUTHERN CALIFORNIA-OFFSHORE SAN DEIGO-OCEANOGRAPHIC OPERATIONS**

Scripps Institution of Oceanography research vessel ROBERT GORDON (Call sign WSQ-2674) will conduct surface to floor oceanographic operations offshore San Diego, CA within 1 nm of 32-40-00N 117-23-00W from 0800-2000 on 27-29 Jan 20. R/V ROBERT GORDON SPROUL will be restricted in her ability to maneuver during operations and will monitor VHF-FM Chan. 13 and 16. Mariners are requested to transit the area with caution. For more details or comments contact Eric Buck at 858-534-5568.

**SOUTHERN CALIFORNIA-POINT CONCEPTION-WAVERIDER BUOY**

University of California, San Diego and the U.S. Army Corps of Engineers have deployed a waverider buoy (Station 071-Harvest Buoy) in position 34-27-06N 120-46-48W, approximately 16 nm west of Point Conception, CA. The buoy is a 3' diameter sphere with an attached telemetry whip antenna and Fl (5) Y 20s light characteristic, the buoy is painted yellow and is marked "Wave Buoy". For more details or comments contact James Behrens at 858-534-3032.

LNM: 26/18

**SOUTHERN CALIFORNIA-PORTS OF LOS ANGELES/LONG BEACH-CERRITOS CHANNEL-BRIDGE**

REPLACEMENT SCHUYLER HEIM BRIDGE CONSTRUCTION-Two temporary trestles remain in place between the Henry Ford Railroad Bridge and the partially constructed replacement Heim Bridge provides 75' of horizontal clearance. Over the channel falsework provides at least 43' of vertical clearance at mean high water. The upstream and downstream low steel of the falsework and the upstream and downstream edges of the temporary trestles are lighted at night with steady burning red lights. (See Trestle\_Falsework\_Lighting\_Heim.pdf at the end of this notice). Work is taking place from 0600 to 1600, Mon-Fri. For conditions at the bridge, mariners can contact Caltrans at 562-572-5852, 310-882-3160, 949-394-9168, 310-715-9500; or the contractor at 818-489-5772, 909-322-4424. Mariners are requested to transit the area with caution. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

Chart 18749

LNM: 33/19

**SOUTHERN CALIFORNIA-PORTS OF LOS ANGELES/LONG BEACH-LA/LB HARBOR-BRIDGE**

VINCENT THOMAS BRIDGE-Painting of the under deck of the bridge continues. A 180' long platform is being erected below low steel of the bridge, just to the east of the west channel margin red light, reducing vertical clearance by 5' 4". Once a 90' section is complete, that section of the platform will be moved to the east, in a leap frog technique. The platform will migrate towards the east until it reached 250' west of centerline of the bridge span. Each corner and every 50' along the upstream and downstream side of the platform will be lighted at night with steady burning red lights (see V\_Thomas\_Platform\_Lighting1.pdf at the end of this notice). Work will take place during daylight hours, Monday through Friday. For conditions at the bridge mariners can contact 213-479-4138, 213-479-1144 or 310-261-9552. For more details or comments contact the Coast Guard Bridge Office at 510-437-3516.

GERALD DESMOND BRIDGE REPLACEMENT PROJECT-Main span construction at the navigation channel continues. Before transiting the bridge construction site, all vessels should contact on-scene flag vessels on VHF-FM CH 13 and 79 to determine safe passage through the site. Mariners can also contact the SFI Water Traffic Coordinator at 310-809-0162 or 702-215-9740 for passing guidance. For conditions at the construction site mariners can contact the SFI Water Traffic Field Coordinator at 424-230-9925. See GDB\_Channel\_Safety\_Flyer.pdf in the enclosure section of the notice for Safety Boat Contact Information. For more details view the website, www.NewGDBridge.com/Waterway, or contact the Coast Guard Bridge Office at 510-437-3516.

### **SOUTHERN CALIFORNIA-SAN CLEMENTE ISLAND-SAFETY ZONES**

Mariners operating in the vicinity of San Clemente Island are reminded of the restricted waterway access surrounding San Clemente Island (33 CFR 165.1131; 33CFR 165.1141). Since the inception of the regulations, numerous safety zone violations have been processed by Coast Guard Sector San Diego. Safety Zone Incursions put the public at risk and cause costly and unnecessary training delays, as well as range cancellations. Violators of the San Clemente Island Safety and Security Zones are subject to monetary penalties. Criminal penalties may also be issued for repeated Safety and/or Security Zone violations. Failure to comply with the federal regulations could result in civil penalties of up to \$90,901.00. Furthermore, if a mariner holds a Merchant Mariner Credential, suspension or revocation action may be pursued against the mariner's credential. For more details see MSSB 02-16 SCI Safety Zone.pdf in the enclosure section.

Chart 18762

LNM: 41/16

### **SOUTHERN CALIFORNIA-SAN CLEMENTE ISLAND-UUV Operations**

The US Navy will conduct unmanned underwater vehicle (UUV) operations approximately 1 nm east of Wilson Cove at San Clemente Island, CA from 23-24 Jan 20. Scientific data collection operations will be conducted by deploying 1-2 UUVs from a 46' research vessel. One UUV is 8' long by 1' wide and the other is 2' long, 1.5' wide, and 1.5' tall. During these operations the vessel and UUVs will be restricted in their ability to maneuver and will travel at speeds of approximately 3 kts. The vessel will monitor VHF-FM Chan. 16. Mariners are requested to transit the area with caution and maintain a safe distance of 1000 yds from the vessel. For more details or comments contact Robert Rocha at 619-553-1293.

Chart 18762

LNM: 02/20

### **SOUTHERN CALIFORNIA-SAN DIEGO BAY-BRIDGE**

CORONADO BAY BRIDGE MAINTENANCE-Scaffolding installed between piers 11-12, 12-13, and 13-14, reduces vertical clearance by more than 8'. The upstream and downstream lower edges of the scaffolding are lighted at night with red lights. For more details or comments contact the Coast Guard Bridge Office at 510-437-3461.

Charts: 18772 18773

### **SOUTHERN CALIFORNIA-SAN DIEGO BAY-DREDGE OPERATIONS**

R.E. Staitte Engineering Inc. is conducting dredge operations at Naval Base Point Loma in San Diego Bay, CA at 32-41-18N 117-14-02W until 31 Mar 20. Operations will be conducted by DB PALOMAR, RES 180, CLARENCE D, HAROLD M, RES 3001, RES 3002 along with tugs KILEEN and CUYAMACA. All vessels will monitor VHF-FM Chan. 16. Mariners are requested to transit the area with caution. For more details or comments contact Erick Myers at 619-233-0178.

Chart 18773

LNM: 43/19

### **SOUTHERN CALIFORNIA-SAN DIEGO BAY-MARINE CONSTRUCTION**

Marathon Construction Corporation is conducting demolition and repair of Naval Base San Diego Pier 1 in position 32-39-44N 117-07-17W, until April 2020. A 60'x120' crane spud barge will be spudded and anchored adjacent to Pier 1. A 50'x100' material spud barge, 30'x60' material barge, and 28'x90' material barge will be moored next to the crane barge on site. The crane barge will have deployed anchors and anchor buoys. Mariners are requested to transit at their slowest safe speed to minimize wake and proceed with caution when passing. For more details or comments contact Marathon Construction's project manager Tim Meyer 619-843-8975.

Chart 18773

LNM: 19/19

### **SOUTHERN CALIFORNIA-SAN DIEGO BAY-MARINE CONSTRUCTION**

The Port of San Diego will conduct marine construction in San Diego Bay, CA at 32-43-37N 117-11-11-16W until June 2020. Work areas will be marked with 3' diameter buoys at the following coordinates:

32-43-40N 117-11-11W

32-43-37N 117-11-15W

32-43-37N 117-11-26W

A 16' small craft along with kayaks will be conducting operations and will monitor VHF-FM Chan. 13 and 16. Mariners are requested to transit the area with caution and to minimize wake after making passing arrangements. For more details or comments contact Timothy Barrett at 619-686-6544.

Chart 18773

LNM: 43/19

### **SOUTHERN CALIFORNIA-SAN DIEGO BAY-MARINE CONSTRUCTION**

R.E. Staitte Engineering Inc. is conducting marine construction at Huntington Ingalls Industries-Pier 7 Marginal Wharf at 32-41-36N 117-09-04W until 31 May 20. Vessels DB PALOMAR, RES 180, JOHN DRAKE, JEANIE R, and tug CUYAMACA will conduct operations. All vessels will monitor VHF-FM Chan. 16. Mariners are requested to transit at lowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For more details or comments contact project manager Erick Myers at 619-233-0178.

Charts: 18772 18773

LNLM: 46/19

**SOUTHERN CALIFORNIA-SAN DIEGO-OCEANOGRAPHIC SURVEY-OCEAN MONITORING**

City of San Diego Marine Biology Lab is conducting year-round ocean monitoring sampling in the vicinity of South Bay Ocean Outfall and Point Loma Ocean Outfall. Ocean sampling will be conducted in an area bounded by the following coordinates:

- 32-31-55N 117-11-11W
- 32-32-11N 117-11-58W
- 32-32-04N 117-12-07W
- 32-32-33N 117-11-56W

- 32-40-10N 117-19-23W
- 32-40-05N 117-19-34W
- 32-39-37N 117-19-32W
- 32-39-57N 117-19-39W
- 32-40-11N 117-16-56W

The M/V OCEANUS and M/V MONITOR III when in the area will monitor VHF-FM Chan. 16. Mariners are requested to transit the area with caution. For more details or comments contact Mike Kelly at 619-758-2342.

Charts: 18765 18772

LNLM: 22/17

**SOUTHERN CALIFORNIA-SAN DIEGO-OCEANOGRAPHIC SURVEY-OCEAN MONITORING**

City of San Diego Marine Biology Lab is conducting year-round ocean monitoring sampling in the vicinity of South Bay Ocean Outfall and Point Loma Ocean Outfall until November 2020. Ocean sampling will be conducted within the following coordinates:

1.
  - 32-31-55N 117-11-11W
  - 32-32-11N 117-11-58W
  - 32-32-04N 117-12-07W
  - 32-32-33N 117-11-56W

2.
  - 32-40-10N 117-19-23W
  - 32-40-05N 117-19-34W
  - 32-39-37N 117-19-32W
  - 32-39-57N 117-19-39W
  - 32-40-11N 117-16-56W

The M/V OCEANUS and M/V MONITOR III when in the area will monitor VHF-FM Chan. 16. Mariners are requested to transit the area with caution. For more details or comments contact Adriano Feit at 619-758-2377 or 858-882-7055.

Gerald Desmond Bridge  
Replacement Project

Caltrans • Metro • Port of Long Beach • US Department of Transportation

# SAFETY NOTICE For Watercraft on Back Channel

Construction of the Gerald Desmond Bridge Replacement Project's main span has begun over the Back Channel.

All recreational and commercial watercraft that travel through the channel between the hours of 6:00 a.m. and 2:30 a.m. Monday through Saturday are advised to be aware of and identify the stationed spotter boat (pictured) for safe passage under the Bridge Project.

**For watercraft approaching the Bridge Project, Marine VHF radio channels 13 and 79 can be used to communicate with the spotter boat to determine safe passage.**

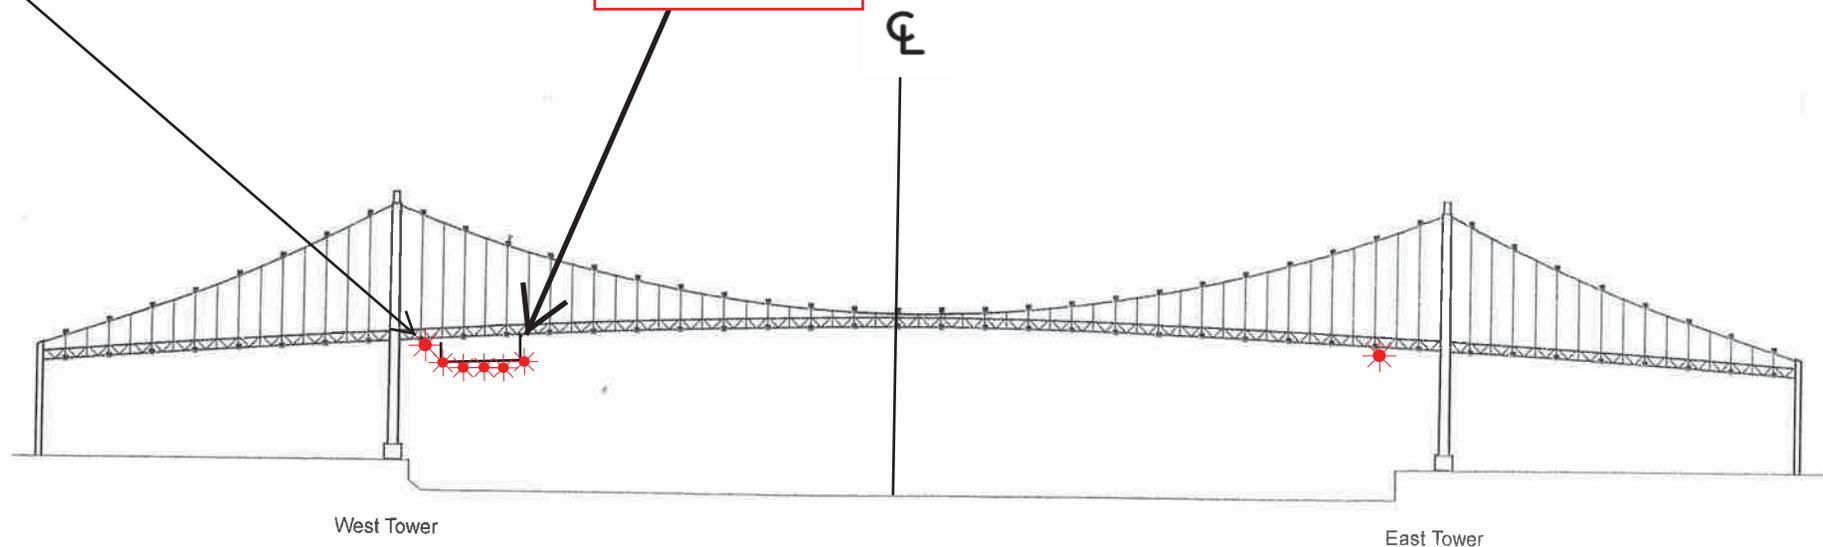

**For more information, visit: [www.NewGDBridge.com/Waterway](http://www.NewGDBridge.com/Waterway)**

If you have any questions about this announcement, please contact the **Bridge Project Communications Team** at (562) 485.2780 or [info@GDBRProject.com](mailto:info@GDBRProject.com). Thank you!

## SAN CLEMENTE ISLAND LIMITED ACCESS ADVISORY

Mariners operating in the vicinity of San Clemente Island are reminded of the **restricted** waterway access surrounding San Clemente Island according to Title 33, Code of Federal Regulations (CFR) Part 165.1131 and 33 CFR 165.1141).

Since the inception of the regulations, Coast Guard Sector San Diego has processed numerous safety zone violations. Safety Zone incursions put the public at risk and cause costly and unnecessary training delays, as well as range cancellations. Violators of the San Clemente Island Safety and Security Zones are subject to monetary penalties. Criminal penalties may also be issued for repeated Safety and/or Security Zone violations. Failure to comply with the federal regulations could result in civil penalties of up to \$94,219 under 46 USC 70036(a). Furthermore, if a mariner holds a Merchant Mariner Credential, suspension or revocation action may be

pursued against the mariner's credential.

San Clemente Island is a top strategic Department of Defense military training facility. Dangerous naval activities occur weekly to ensure deployable military forces are trained for worldwide missions (e.g. small arms training, ground and air explosive ordinance training). Mariners conducting operations around San Clemente Island must abide by Federal regulations that apply to the three NM radius around the island. Eight zones comprise the Safety and Security Zones. Restriction times are based on U.S. Navy live fire exercises. Wilson Cove Security Zone and Zone G of the Safety Zones are permanently closed. Mariners wishing to transit through Zone G must have preapproval from San Clemente Island. The U.S. Navy makes every effort to maintain a schedule in advance and minimize the restrictions to the public for water access around the island. Periods of enforcement can be found at <https://www.scisland.org>. Restricted access areas and times are highlighted in red and listed in the associated website chart. If a Safety Zone section is green, mariners may access the waters. Mariners are advised to contact San Clemente Island via call sign "KRAKEN" on VHF CH 82A, or call Coast Guard Sector San Diego Joint Harbor Operations Center on VHF CH16, or at (619) 278-7033 or 7656, to verify real time status of the restricted waters.

If you would like more information about the Security and Safety zones surrounding San Clemente Island, please contact the Coast Guard Sector San Diego Waterways Management Division at 619-278-7656 or by email at [D11MarineEventsSD@uscg.mil](mailto:D11MarineEventsSD@uscg.mil)

Sincerely,

A handwritten signature in blue ink, appearing to read "T.J. Barelli".

**Air Draft Situational Awareness**

U.S. Coast Guard Sector San Francisco has observed a recent trend of marine casualties involving vessel allisions with overhead power lines. The Captain of the Port is releasing this bulletin as a reminder of the importance of mariners maintaining situational awareness of their vessel's air draft, including that of movable equipment onboard. Staying vigilant of overhead obstructions crossing waterways in relation to your vessel's air draft is essential to navigational safety.

Air draft (draught) is a term used to describe the distance from the top of a vessel's highest point to its waterline. Vertical clearance is the distance in excess of the air draft that allows a vessel to pass safely under a bridge or overhead obstruction. **The consequences of failing to consider air draft and to properly calculate a vessel's vertical clearance under bridges, power lines, and other obstructions encountered during a passage can be catastrophic.**

U.S. Coast Guard Sector San Francisco recommends that all vessel operators remain cognizant of their air draft at all times. More precisely, the calculation from both the vessel's highest fixed point and highest movable point to safely clear all overhead obstructions encountered while maneuvering in the San Francisco Bay Area is of paramount importance.

Additionally, it is recommended that vessel operators ensure they have the most current nautical charts and publications onboard. A link to these publications, which include authorized overhead clearances, can be found at <http://www.charts.noaa.gov/InteractiveCatalog/nrnc/shtml>.

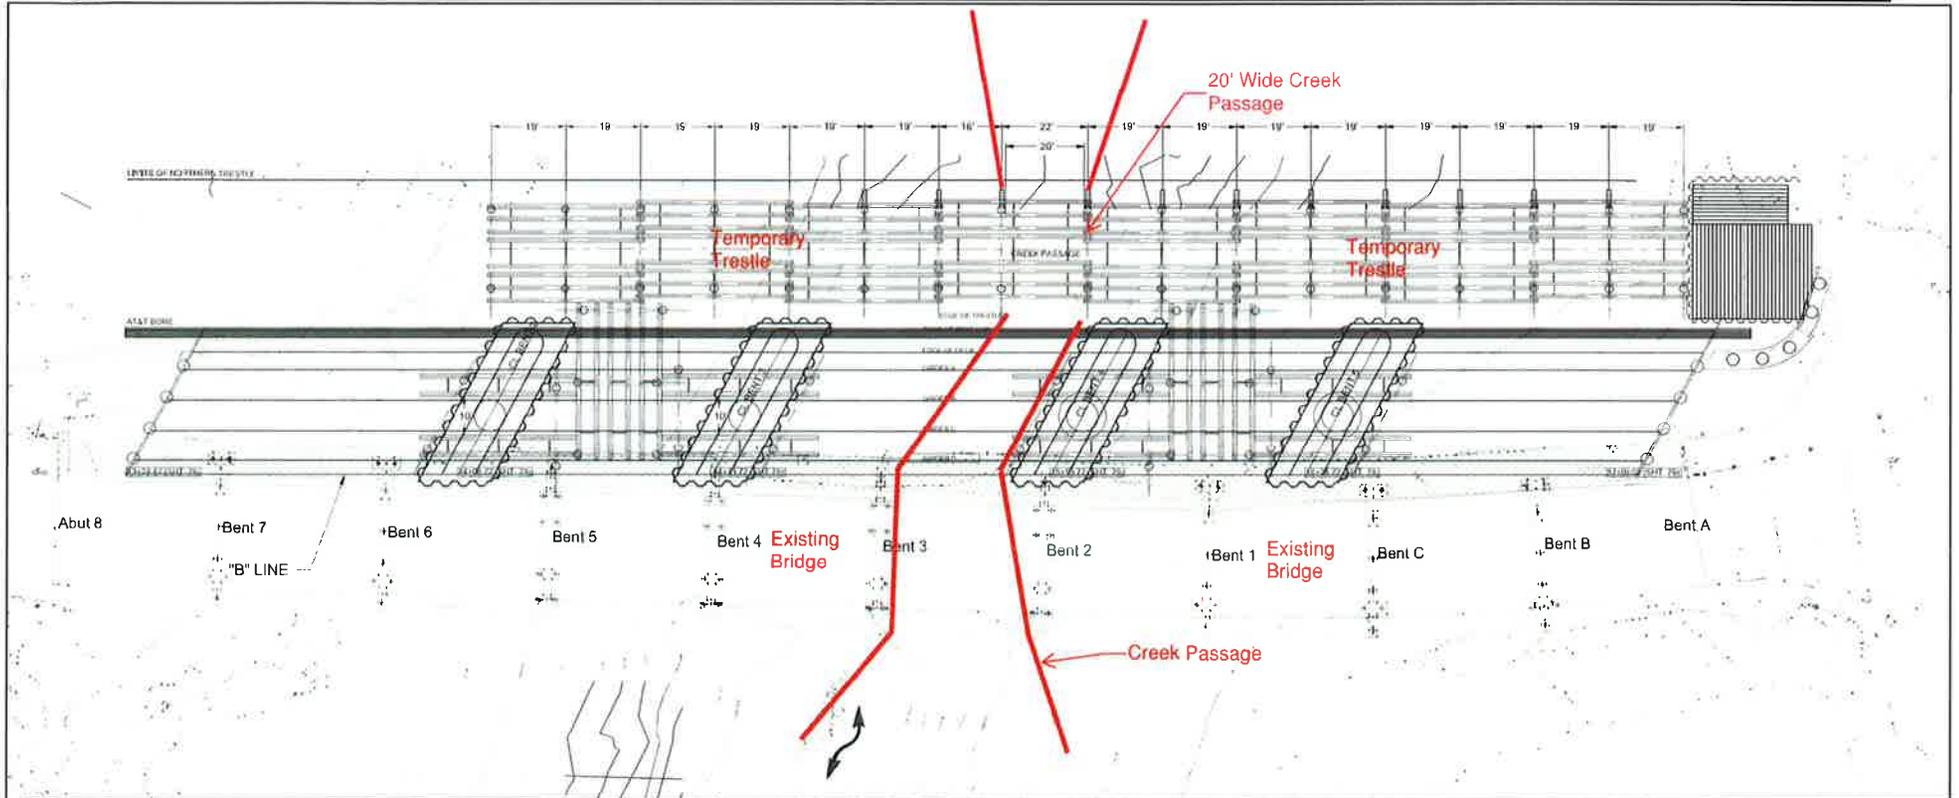

For additional information regarding this bulletin, please contact the U.S. Coast Guard Sector San Francisco Investigations Division at [SectorSF.Investigations@uscg.mil](mailto:SectorSF.Investigations@uscg.mil) / (510) 813-9636, the Domestic Vessel Inspections Branch at [SectorSF.Domestic.Insp@uscg.mil](mailto:SectorSF.Domestic.Insp@uscg.mil) / (510)-207-1495, or the Waterways Management Division at [SFWaterways@uscg.mil](mailto:SFWaterways@uscg.mil) / (415) 871-9051.

Sincerely

# Bon Air Rd Bridge Replacement Project Mile 2.2, Corte Madera Creek

**Cofferdams and a temporary trestle will be installed to facilitate construction of the replacement bridge. The temporary trestle will provide a center creek navigation channel with at least 20 feet of horizontal clearance and 3 feet of vertical clearance, from mean high water to the lowest hittable portion of the trestle, for waterway users. Mariners are urged to use extreme caution when transiting the construction site.**

**ENCLOSURE (1)**

# 5 things you can do TO REDUCE THE RISK OF A WHALE STRIKE

## 1 KNOW BEFORE YOU GO

Anticipate likely whale sightings by communicating with other mariners and subscribing to Whale Alert or other services. Find out about the seasonal movements and behavior of whales.

## 2 PLAN YOUR PASSAGE

With advance planning, vessels may avoid whale concentrations with a minimal increase to passage time. If travel through whale aggregations cannot be avoided, plan to reduce speed in areas where whales are likely, especially if sighting conditions are poor.

## 3 DISCUSS WHALE AVOIDANCE

Bridge teams that discuss in advance what actions to take when whales are sighted near the ship's path can save valuable time when these events occur. Conducting avoidance drills can also be helpful.

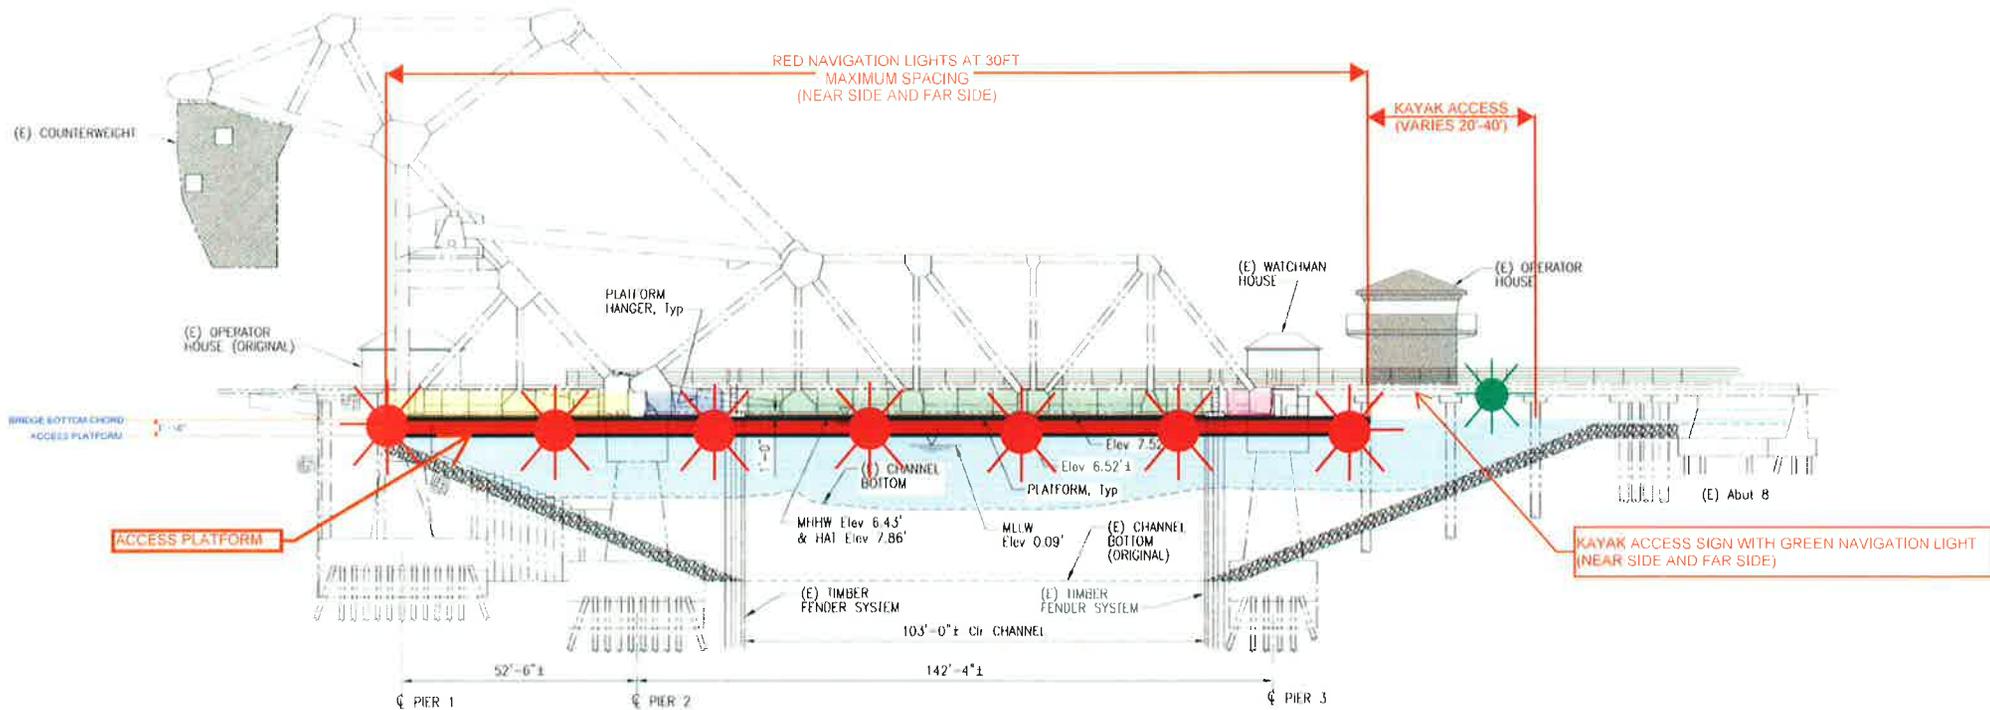

## 4 KEEP A DEDICATED WATCH

Keep a consistent lookout, focusing on whales near the path of the ship. If you see one whale, keep looking, as there are likely more nearby! Specify the information needed (bearing, estimated distance, and direction of travel). Keeping critical distances in mind may help you avoid surprises at close range. For example, if ship speed is 18 knots, the **whale with the highest chance of surfacing** off your bow was 1.7 miles ahead on its previous surfacing (or 1.4 miles at 15 knots, both assuming a 5 to 6 minute dive time). Detecting whales at a greater distance opens up more options for avoiding a strike.

## 5 MAKE MODEST ADJUSTMENTS

When a whale comes up in the path of the ship, determine its direction of travel and identify the best course of action. Steering behind the whale is often most effective. A small decrease in speed when you first see the whale can make the difference between a strike and a near miss.

**ELEVATION VIEW  
THIRD STREET BRIDGE WITH ACCESS PLATFORM**

## 3rd St Drawbridge Rehabilitation Platform Lighting Plan and Alternate Channel

Platforms installed below low steel of the bridge reduces vertical clearance by 1.5 feet. The upstream and downstream lower edges of the platform is lighted at night with steady burning all-round red lights. An alternate channel south of the operators house, marked upstream and downstream with a all round green light, is available for small vessels to pass during rehabilitation.
