COMDTPUB P16502.6, Light List Volume VI, 2020 Edition, and Coast Pilot Volume 7, 2019 Edition.
Light List Volume VI, 2020 Edition is available at https://www.navcen.uscg.gov/pdf/lightLists/LightList_V6_2020.pdf
Coast Pilots, along with corrections, are available at: www.nauticalcharts.noaa.gov/publications/coast-pilot/index.html. Print on Demand (POD) copies are available for purchase at: www.nauticalcharts.noaa.gov/publications/print-agents.html#coast-pilot.

UNITED STATES COAST GUARD NAVIGATION INFORMATION SERVICE (NIS)

The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts / Broadcast Notice to Mariners (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). LNM's and other navigation notices can be obtained via e-mail subscription through the USCG Navigation Center website:

<https://www.navcen.uscg.gov/?pageName=feeds>

In addition, the NIS investigates all reports of degradation or loss of GPS or DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900 or Email: webmaster@navcen.uscg.mil, or on the World Wide Web: <https://www.navcen.uscg.gov/?pageName=gpsUserInput>

BROADCAST NOTICE TO MARINERS

Urgent marine navigational and weather information is broadcast over VHF channel 22A (157.1 MHz). Broadcasts are first announced over the distress, safety and calling channel 16 before they are made. All ships in U.S. waters over 20 meters in length are required to monitor VHF channel 16, and must have radios capable of tuning to the VHF simplex channel 22A.

This section contains a range of all the significant Broadcast Notice to Mariners (BNM's) on the date of this edition.

Originating Unit CGD THIRTEEN	Beginning BNM D13-0333-20	Ending BNM D13-0340-20
----------------------------------	------------------------------	---------------------------

ABBREVIATIONS

A through H

ADRIFT - Buoy Adrift
AICW - Atlantic Intracoastal Waterway
Al - Alternating
B - Buoy
BKW - Breakwater
bl - Blast
BNM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK/Daymk - Daymark
DBN/Dbn - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - eclipse
EST - Established Aid
ev - every
EVAL - Evaluation

I through O

I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
ISL - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LNM - Local Notice to Mariners
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal
MSLD - Misleading

P through Z

PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RRL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal
STA - Station

EXT - Extinguished
F - Fixed
fl - flash
Fl - Flashing
G - Green
GIWW - Gulf Intracoastal Waterway
HAZ - Hazard to Navigation
HBR - Harbor
HOR - Horizontal Clearance
HT - Height

N/C - Not Charted
NGA - National Geospatial-Intelligence Agency
NO/NUM - Number
NOS - National Ocean Service
NW - Notice Writer
OBSCU - Obscured
OBST - Obstruction
OBSTR - Obstruction
Oc - Occulting
ODAS - Anchored Oceanographic Data Buoy

STRUCT - Structure
St M - Statute Mile
TEMP - Temporary Aid Change
TMK - Topmark
TRLB - Temporarily Replaced by Lighted Buoy
TRLT - Temporarily Replaced by Light
TRUB - Temporarily Replaced by Unlighted Buoy
USACE - Army Corps of Engineers
W - White
Y - Yellow

Additional Abbreviations Specific to this LNM Edition:

AtoN - Aids to Navigation
COTP - Captain of the Port
CPA - Closest Point of Approach
LLNR - Light List Number

NAVCEN - U.S. Coast Guard Navigation Center
NM - Nautical Miles
ODOT - Oregon Department of Transportation
RM - River Mile Marker

S-AIS - Synthetic AIS
VTS - Vessel Traffic Service
WSDOT - Washington State Department of Transportation
TSS - Traffic Separation Scheme

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

SNAKE RIVER – LAKE HERBERT G. WEST – Delay in lockage times at Little Goose navigation lock

Mariners will experience a 15-20 minute delay in lockage time at the Little Goose navigation lock, at Snake River mile 70.3, due to repairs on three of the lock's tainter valves. Repair work will begin on 26 May 2020 and is estimated to be complete by 1800 on 02 Jul 2020. For additional information on this work contact the Little Goose Shift Operator at (509) 399-2233, x231.

Chart 18546

LNM: 21/20

COLUMBIA RIVER – PACIFIC OCEAN TO HARRINGTON POINT - Mouth of the Columbia River Jetty System Major Rehabilitation Project

Scheduled repairs of the South Jetty have commenced and are planned to continue through 2024. Current in water repairs are being conducted via the land access, but at a future date barges and in water equipment will be used to conduct repairs. This notice will be updated once in water work is scheduled. For additional information on this project contact Sherri Brenner at (503) 550-6743 and email Sheri@jemcamis.com or the Project Superintendent Aaron Anderson at (503) 791- 2161 and email AAnderson@jemcamis.com.

The jetties at the Columbia River Entrance have suffered severe deterioration and may no longer be correctly represented upon the nautical charts of the area. Mariners should use caution when transiting in the vicinity of the jetties and the river entrance. Repairs of the North jetty were completed in 2019. More information may be found at the USACE Portland District web site: <http://www.nwp.usace.army.mil/jetties/>.

Chart 18521

LNM: 20/20

OREGON – PORT OF PORTLAND – WILLAMETTE RIVER – Burnside Bridge Deviation (Revised from LNM 17/20)

The Coast Guard has approved a temporary bridge deviation for the Burnside Highway Bridge (LLNR 14955.4) across the Willamette River at mile 12.4, in Portland, Oregon. The deviation period is from 0600 to 1800 on 26 May 2020, and from 0600 to 1800 on 28 May 2020. The bridge has experienced an electrical failure that requires emergent repairs. The double bascule bridge is authorized to operate in single leaf mode (one side open only). The east leaf will be in the closed-to-navigation position for repairs while the west leaf will open per the schedule here in. Tug assistance will be available upon request when contacting the Hawthorne Bridge for an opening. The Burnside Bridge's vertical clearance in the closed-to-navigation position provides 64 feet above Columbia River Datum 0.0. The horizontal clearance in single leaf is 96 feet. Vessels which do not require a bridge opening may continue to transit through the bridge during this closure period. The bridge is able to open the west leaf for emergencies, and there is no immediate alternate route for vessels to pass. Please refer to 33 CFR 117.897(c)(3)(iii) for opening request procedures. For more information, contact Carl Morgan at (503) 988-7122.

Chart 18526

LNM: 20/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERON – DUWAMISH WATERWAY – Special Bridge notice

Beginning 01 Jun 2020 SDOT and Kraemer North America will commence making structural repairs to the West Seattle Freeway Bridge (LLNR 16870.2) across the Duwamish West Waterway at mile 0.35, which will impact mariners in several ways. First, there will be approximately a seven (7) foot reduction of vertical clearance from 01 Jun to 31 Oct 2020 to facilitate under bridge inspection truck (UBIT) operations during the first and second weeks in June and the installation of a work access platform on the underside of the bridge. A 60' wide barge will be moored just outside of the channel on the east side of the river during construction and demobilization. This barge will be moved into the channel to install the work platform, which will require multiple 4-hour closures of the waterway during the second and third weeks of June. Additionally, multiple 4-hour closures of the waterway will be required at the end of the maintenance period to dismantle the access platform, anticipated for early October. The exact times of the channel closures will be advertised to mariners once they become available. The barge will be marked with white fixed lights on all corners and the access platform will be marked with flashing amber lights. Mariners should be aware of overhead work and the possibility for falling debris. Additionally, when the work barge is moored outside of the channel it may reduce maneuvering room for larger vessels. Mariners that anticipate the reduced vertical clearance may impact their operations should contact the contractor to coordinate. The Kraemer North America point of contact is Justin Sieg at (425) 961-2769 and email jsieg@kraemerna.com

Charts: 18449 18450

LNM: 20/20

IDAHO – SNAKE RIVER – GAMBLE ISLAND – Special Bridge Notice

The U.S. Coast Guard has issued public notices announcing permit applications from Alscott Farms, LLC, seeking the approval of location and plans for the construction of two replacement bridges partially over the Snake River from the Oregon side to the privately owned Gamble Island, at mile 386, near the town of Nyssa, Oregon, in approximate position 43-54-26.400N, 116-58-40.200W. The existing bridges provide a navigation opening of 38.7’ and 34.0’ respectively of horizontal clearance and 10.3’ and 5.88’ respectively of vertical clearance (above OHW). The proposed bridges will both provide a navigation opening of 48.83’ of horizontal clearance and 10.3’ and 6.14’ respectively of vertical clearance (above OHW). District 13 Bridges Public Notices 03-20 and 04-20 solicit comment and are available at <http://www.navcen.uscg.gov/D13BN> Questions or comments can be addressed to the Bridge Administrator, Steve Fischer at (206) 220-7282, or email D13-SMB-D13BRIDGES@uscg.mil.

LNM: 20/20

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Interstate 5 Highway Bridge notice

The Coast Guard intends to approve a request for a temporary deviation from the operating schedule that governs the Interstate 5 Highway Bridge (LLNR 11258) across the Columbia River at mile 106.5 between Vancouver, Washington and Portland, Oregon, wherein on 04 Jul 2020 from 2000-2359 the bridge would not need to open to maritime traffic. Mariners may submit any objections or comments to the District 13 Bridge Administrator at d13-smb-d13-bridges@uscg.mil no later than 04 Jun 2020.

Charts: 18525 18531

LNM: 19/20

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – St. Johns Railroad Bridge notice

The Coast Guard intends to approve a request for a temporary deviation from the operating schedule that governs the St. Johns Railroad Bridge (LLNR 14927.5) across the Willamette River at mile 6.9 at Portland, Oregon, wherein on 10 Aug to 03 Sep 2020 from 0900-1500 on Monday – Thursday the bridge need not open for maritime traffic. The bridge would resume its normal operating schedule on Friday – Sunday, and the bridge would be able to open for emergencies at any time given a 1-hour notice. Mariners may submit any objections or comments to the District 13 Bridge Administrator at d13-smb-d13-bridges@uscg.mil no later than 04 Jun 2020.

Chart 18526

LNM: 19/20

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Steel Bridge notice

The Coast Guard intends to approve a request for a temporary deviation from the operating schedule that governs the Steel Railroad-Highway Bridge (LLNR 14955.3) across the Willamette River at mile 12.1 at Portland, Oregon, wherein on 02 – 29 Aug 2020 the upper deck of the bridge need not open for maritime traffic. The upper deck will open given 72 hours advance request. Mariners may submit any objections or comments to the District 13 Bridge Administrator at d13-smb-d13-bridges@uscg.mil no later than 04 Jun 2020.

Chart 18526

LNM: 19/20

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Morrison and Hawthorne Bridge notice

The Coast Guard intends to approve a request for a temporary deviation from the operating schedules that govern the Morrison Highway Bridge (LLNR 14955.5) across the Willamette River at mile 12.8, and the Hawthorne Highway Bridge (LLNR 14955.6) across the Willamette River at mile 13.1, wherein on 09 Aug 2020, from 0630 – 1130 the bridge need not open for maritime traffic. Mariners may submit any objections or comments to the District 13 Bridge Administrator at d13-smb-d13-bridges@uscg.mil no later than 04 Jun 2020.

Chart 18526

LNM: 19/20

OREGON- WILLAMETTE RIVER – PORTLAND TO WALNUT EDDY – Underwater drilling operations

Clackamas County’s Water Environment Services will conduct geotechnical exploration and underwater drilling with a drill rig mounted on a barge, moored in the Willamette River (mile 25.5) at Oregon City near Jon Strom Park from 02-05 Jun 2020. The barge will be stationary, and spudded or anchored near approximate position 45-21-57.966N, 122-36-13.075W for 24-hours a day for the duration of the project. If additional mooring is required for contingency drilling on 08 Jun 2020, the barge will be stationed to minimize interference with navigation and water-based activities at Jon Storm Park. Barge will be marked with four Coast Guard-approved, fixed white lights, one on each corner. For more information, contact Edward Nieto, at (971) 284-9074, or email enieto@clackamas.us.

Chart 18528

LNM: 19/20

WASHINGTON - PUGET SOUND - SEATTLE TO BREMERTON – ELLIOTT BAY / DUWAMISH WATERWAY– Tribal Fisheries

The Muckleshoot Tribe will commence gillnet salmon fishing operations starting at 0600 on 24 May 2020. The operations will take place on the Duwamish River from north of the South Park Bridge down to the mouth of the river near Harbor Island, and in Elliott Bay, east of a line drawn from Pier 91 to Duwamish Head Light (LLNR 16910). These fisheries are expected to cause significant congestion on the waterway, and mariners are advised to use caution while transiting the area. For more information, contact Coast Guard Sector Puget Sound Waterways Management at (206) 217-6051 or the Muckleshoot Tribal Enforcement at (253) 876-2927.

Chart 18450

LNM: 19/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – Bridge deviation (Revised from LNM 03/20)

The Coast Guard intends to approve a deviation from the operating schedule that governs the 1st Avenue South Highway Twin Bridge (LLNR 16887) across the Duwamish Waterway, mile 2.5, in Seattle, WA. This deviation will authorize the bridge to operate in single leaf mode or half span openings from 2100 to 0500 nightly, Sunday – Friday, from 06 Jul - 14 Sep 2020. No work is planned on Saturday nights, unless delays require it. The 1st Ave Bridge shall fully open (double bascule) on signal when at least 12 hours’ notice has been given. If an emergency response vessel needs a full opening, the crew needs at least 45 minutes to clear the span. The 1st Ave Bridge will open on demand in single leaf only. Containment will be installed under half of the 1st Ave Bridge, but will not reduce the vertical clearance. An Under Bridge Inspection Truck (UBIT)

truck will be used to aid the work efforts, and will reduce the vertical clearance up to 13 feet from 39 feet center to 26 feet center, and from 22 feet to 9 feet on the sides. The UBIT will move around the bridge, but will only take up a small section the bridge. The UBIT will move for vessel traffic when required, and will be identified with a flashing amber light. The deviation is necessary to accommodate WSDOT's bridge roadway deck panel replacements. Additionally, the subject bridge need not open to vessels of 5000 gross tons and over, a vessel towing a vessel of 5000 gross tons and over, and a vessel proceeding to pick up for towing a vessel of 5000 gross tons and over. Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. If any mariner or marine business cannot support this temporary bridge deviation, please submit comments no later than 04 Jun 2020 at d13-smb-d13-bridges@uscg.mil.

Chart 18450

LNM: 19/20

OREGON – WASHINGTON – U.S. Coast Pilot 7 and U.S. Coast Pilot 10 new editions

The U.S Coast Pilot 7 will be divided into two editions in the spring 2020 due to its large size. The following are the projected new editions that will be issued on the same date and ready for free download and weekly updates on 9 Jun 2020 at nauticalcharts.noaa.gov/publications/coast-pilot/index.html.

U.S. Coast Pilot 7, Pacific Coast: California - 52nd Edition, 2020

U.S. Coast Pilot 10, Pacific Coast: Oregon, Washington, Hawaii and Pacific Islands - 1st Edition, 2020

Only Print-on-Demand bound copies are available for purchase at www.nauticalcharts.noaa.gov/publications/print-agents.html#coast-pilot

For any questions or comments; visit www.nauticalcharts.noaa.gov/customer-service/assist/

LNM: 18/20

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Interstate 5 Highway Bridge deviation

The Coast Guard has approved a temporary deviation from the operating schedule that governs the Interstate 5 Highway Bridge (LLNR 11258) across the Columbia River at mile 106.5 between Vancouver, Washington and Portland, Oregon. In order to facilitate a major repair to the lift mechanism of the northbound span, the bridge need not open to mariners from 10 Sep through 22 Sep 2020. A safety zone will be established around the draw span for construction equipment, and mariners will not be able to transit through the main channel. The Barge Channel North and Alternate Barge Channel South will remain available to mariners during this deviation. Enclosure (4) to this LNM provides more details. For additional information or questions, please contact ODOT, Ben White, at (503) 731-8517 or email Benjamin.White@odot.state.or.us

Charts: 18525 18531

LNM: 18/20

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Hawthorne Bridge deviation

The Coast Guard has approved two temporary deviations to the operating schedule that governs the Hawthorne Highway Bridge (LLNR 14955.6) across the Willamette River, mile 13.1, at Portland, Oregon. The deviation periods will be from 0700 to 1700 daily on 03 Jul to 06 Jul 2020, and from 0700 to 1700 daily on 10 Jul to 13 Jul 2020. These deviations are necessary to accommodate electrical service upgrades, and allows the bridge to remain in the closed-to-navigation position to facilitate the safe and timely upgrades. The Hawthorne Bridge provides 49 feet of vertical clearance in the closed-to-navigation position referenced to the vertical clearance above Columbia River Datum 0.0. The normal operating schedule is in 33 CFR 117.897(c)(3)(v). Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. The draw span will not be able to open for vessels engaged in emergency response operations during this closure period. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. For more information, please contact Jon Henrichsen at (503) 988-7126 or email jon.p.henrichsen@multco.us.

Chart 18526

LNM: 18/20

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – WARRENDALE – NOAA Fisheries research barge (Revised from LNM 15/20)

NOAA has moored a fisheries research barge on the Columbia River, near Hamilton Island Reach in approximate position 45-37-40.580N, 121-58-32.495W from 23 Apr through 23 Jun 2020. The stern of the barge is attached to a white mooring ball downstream and anchored to a 250 ft. mooring line upstream. The barge is 50 ft wide, 30 ft long and 4 ft tall and marked with yellow flagging on all corners, a radar reflector and a yellow light flashing every 4s (Fl Y 4s). Mariners are requested to reduce wake when transiting the area and keep a safe distance. For additional information, contact Gabriel Brooks at (206) 334-6824 or email Gabriel.Brooks@noaa.gov.

Chart 18531

LNM: 18/20

WASHINGTON - PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – West Seattle Bridge information

The Captain of the Port (COTP) Puget Sound has issued Marine Safety Information Bulletin (MSIB) 02-20 regarding the West Seattle Freeway Bridge (LLNR 16870.2) and recommendations for Duwamish Waterway users. MSIB 02-20 is included as Enclosure (5) to this Local Notice to Mariners and all interested and impacted maritime stakeholders should read it in its entirety.

Chart 18450

LNM: 18/20

WASHINGTON – LAKE WASHINGTON – SAMMAMISH RIVER – Special Bridge Notice

The Coast Guard has issued a Navigation Only public notice (PN) for a Washington State Department of Transportation bridge design modification for a proposed I-405/522/527 Bridge Project. The Project is at the Sammamish River, mile 4.6, within the City of Bothell, Washington. Public Notice 02-20 solicits comments exclusively on the proposed bridges ability to meet the reasonable needs of navigation, and is available at <https://www.navcen.uscg.gov/D13BN>. Questions or comments will be received until 05 Jun 2020 and should be addressed to the District Bridge Administrator at D13-SMB-D13-Bridges@uscg.mil or by telephone (if unable to submit comments in writing) at (206) 220-7280.

LNM: 18/20

IDAHO – LAKE PEND OREILLE – BNSF Railroad Bridge Notice

BNSF Railway Company (BNSF) has commenced construction on the new BNSF Railroad Bridge 3.9 (LLNR 20087) on Lake Pend Oreille, Mile 2.7 at Sandpoint, Idaho. Construction is expected to continue until 31 Oct 2020. Due to the seasonal fluctuation of LPO water levels, the project will be done in stages and as needed BNSF will update this Notice to Mariners. The first phase of work includes construction of two temporary work trestles at the north shore (Dog Beach) and south shore (near East Algoma), immediately adjacent to and west of the existing single-track bridge. Work barges will be staged from these temporary work trestles, and moved as necessary by a tug. Hours of construction activities will be 0700 to 1900, Monday to Saturday. During this work phase, some navigational channels will be obstructed; however, one of the channels at spans 67 and 68 and half of the existing spans 2 and 3; 14 through 17; 27 through 30; 40 through 43; 53 through 56; 84; and 95 through 97 will remain unobstructed. Vertical clearance of the existing bridge will be unchanged. The temporary work trestles and work barges will have navigation lights and work zone buoys in accordance with the Navigation Rules. Enclosure (6) of this Local Notice to Mariners displays the project vicinity and expected locations of barges for this phase work activities. Significant changes to the work locations will be updated in a subsequent notice. During all phases and locations, the noted navigational buoy safety lighting for the work areas will be in place. The point of contact for the bridge contractor, Ames Construction, is Mike Pamperin at (612) 741-6535. For additional information contact the BNSF Project Manager, Ryan Kopera at (913) 284-3467.

LNM: 18/20

IDAHO – CLEARWATER RIVER – NEZ PERCE COUNTY – Special Bridge Notice

The Coast Guard has issued a public notice announcing a permit application from Nez Perce County for the approval of location and plans for the replacement of the Cherrylane Bridge waterway mile 21.4, near Lenore, ID, at 46-30-55.680N, 116-40-50.930W. Nez Perce County proposes to replace the existing bridge. Public Notice 01-20 solicits comments and is available at <https://www.navcen.uscg.gov/D13BN>. Questions or comments can be addressed to the District Bridge Administrator at D13-SMB-D13-Bridges@uscg.mil.

Advance Notice(s)

COLUMBIA RIVER – CRIMS ISLAND TO VANCOUVER – Testing of LED Range Lights (Revised from LNM 49/19)

The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The remaining change is expected to occur during the spring or summer of 2020:

Kalama Upper Range Rear Light (LLNR 10920) the intensity will be increased to match the Range Front Light.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Charts: 18524 18525

LNM: 52/19

COLUMBIA RIVER – LAKE UMATILLA – BLALOCK ISLAND TO MCNARY DAM - Testing of LED Range Lights

The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The changes are expected to occur during the summer or fall of 2020:

Irrigon Lower Range Front Light 60 (LLNR 12655) the high intensity beam will be increased from 1° to 3° and the intensity of the light will be increased.

Irrigon Lower Range Rear Light (LLNR 12660) the intensity will be increased to match the Range Front Light.

Irrigon Middle Range Front Light 67 (LLNR 12690) the high intensity beam will be increased from 1° to 3° and the intensity of the light will be increased.

Irrigon Middle Range Rear Light (LLNR 12695) all characteristic and intensity will remain the same.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast

SNAKE RIVER – LAKE HERBERT G. WEST – LOWER MONUMENTAL - Testing of LED Range Light at McGuire Range

The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The changes are expected to occur during the summer or fall of 2020:

McGuire Range Front Light 60 (LLNR 13655) the high intensity beam will be increased from 1° to 3°. The intensity of the high intensity beam will remain the same, but the intensity of the 360° light will increase.

McGuire Range Rear Light (LLNR 13660) all characteristic and intensity will remain the same.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

WASHINGTON – APPROACHES TO STRAIT OF JUAN DE FUCA – QUILLAYUTE RIVER – Temporary change of Quillayute River Direction Light

Due to equipment failure, the U.S. Coast Guard has temporarily changed the lighting characteristic of Quillayute River Direction Light (LLNR 16090) from a three color sector light to a yellow occulting light, flashing every 4 s (Oc Y 4s). This aid will be lighted 24 hours a day and have an arc of visibility of 1.5° degrees either side of the bearing of 005.5° true to the light. Chart and Light List corrections have been published in Local Notice to Mariners 49/19. Mariners are encouraged to share comments on this change and the performance and operation of this aid to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

LNLM: 49/19

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

Proposed Change Notice(s)

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Disestablishment of North Portland Harbor East End Range and establishment of Oregon Slough Light 2

The U.S. Coast Guard is proposing to permanently disestablish the North Portland Harbor East End Range Front Light (LLNR 11280) and Range Rear Light (LLNR 11285). These range lights no longer mark the navigable channel into the east entrance of the Oregon Slough. Oregon Slough Light 2 will be established at the south east corner of the entrance channel in approximate position 45-36-04.727N 122-38-27.222W with a quick flashing red light (Q R). North Portland Harbor Light 2 (LLNR 11285) will be renamed as Oregon Slough Light 4 (LLNR and relocated to approximate position 45-36-12.829N 122-38-06.457W to mark the eastern boundary of the navigable channel. Additionally, North Portland Harbor Daybeacon 1 (LLNR 11290) will be renamed as Oregon Slough Daybeacon 1 (LLNR 11280).

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Chart 18531

LNLM: 18/20

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Creation of a dual front range structure for Government Island and Lady Island Range

The U.S. Coast Guard is proposing to permanently disestablish the separate structures for Government Island Range Front Light (LLNR 11465) and Lady Island Range Front Light (LLNR 11490) and build a single front range structure in approximate position 45-33-42.058N 122-26-36.548W. The day and night characteristics for both ranges will be changed to a quick flashing red light (Q R), with high intensity 3° beams at 076° and 309°, in addition to a lower intensity 360° quick flashing red light (Q R).

Government Island Range Rear Light (LLNR 11470) will be relocated to approximate position 45-34-07.756W and Lady Island Range Rear Light (LLNR 11495) will be relocated to approximate position 45-33-44.516N 122-27-01.705W to maintain the required distance between structure for range sensitivity.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Chart 18531

LNLM: 18/20

WASHINGTON - STRAIT OF JUAN DE FUCA ENTRANCE - Disestablishment of Strait of Juan de Fuca Traffic Separation Lane Lighted Whistle Buoy J

The U.S. Coast Guard is proposing to disestablish Strait of Juan de Fuca Traffic Separation Lane Lighted Whistle Buoy "J" (LLNR 755-16135) as it is considered no longer necessary to the safe navigation of the waterway. The Synthetic AIS (S-AIS) signal will be converted to a Virtual AIS (V-AIS)

and will remain, being broadcast on the currently assigned position. Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

SUMMARY OF BRIDGE LIGHTING DISCREPANCIES AND CORRECTIONS

The summary of Bridge Lighting Discrepancies and Corrections is listed as Enclosure (1) of this Local Notice to Mariners.

LNM: 21/20

SUMMARY OF DREDGING OPERATIONS

The summary of Dredging Operations is listed as Enclosure (2) of this Local Notice to Mariners.

LNM: 21/20

SUMMARY OF MARINE EVENTS

The summary of Marine Events is listed as Enclosure (3) of this Local Notice to Mariners.

LNM: 21/20

OREGON – COOS BAY – McCullough Highway Bridge Notice

ODOT will be painting and preserving the McCullough Highway Bridge (US 101) (LLNR 9009) at North Bend, Oregon, across Coos Bay, mile 9.5, from 01 Apr 2019 through 31 Mar 2021, from 0700-1900 seven days per week. The subject bridge provides 148 feet of vertical clearance, which will be reduced to 145.5 feet with the containment system. The containment will be marked with flashing amber lights. Mariners may transit under the bridge at any time, but are advised to use caution for fall hazards. For additional information, contact Nick Frangopoulos at (330) 540-1008 or vimaspainting@aol.com.

Chart 18587

LNM: 11/19

COLUMBIA RIVER – PACIFIC OCEAN TO HARRINGTON POINT – Youngs Bay Highway Bridge Repair notice

ODOT will be conducting repair work on the Youngs Bay Highway Bridge (LLNR 14573) at Warrenton, Oregon, from 11 Mar 2019 through Nov 2021. Mariners are advised that there will be barges and assist vessels at the work site and a containment system under the bridge reducing vertical clearance. There will be no containment system under the liftspan of the bridge, and the main channel will remain clear for traffic, with no change to the operation of the lift. Mariners are requested to use slow speed to minimize wake. Interested parties can contact the on-site construction manager, Craig Gries at (503) 580-6319 or email at cgries@orstbridge.com

Chart 18521

LNM: 10/19

COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Bridge construction

Advanced American Construction (AAC) will be conducting bridge construction in the Columbia River at the mouth of Little White Salmon River / Drano Lake, near RM 162. Operations include pile driving and work is expected to occur from 06 Jan 2020 to 04 Feb 2021. AAC's Derrick Barge DB 4100, tug Lindy Marie, and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 through 1800, Monday through Saturday. The floating equipment will remain on-station during non-working hours and will be illuminated at night by fixed white lights on all corners. Mariners are asked to transit the area with extreme caution and minimize wake. Please contact Shad Huber at (360) 953-4833 and email Shadh@callAAC.com or Todd High at (503) 572-0101 and email Toddh@callAAC.com with any questions.

Chart 18532

LNM: 51/19

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Bridge notice

The Coast Guard has approved a temporary deviation due to the cancelation of the Rose Festival Parade. The bridges listed in 33CFR§117.897 shall operate as follows:

(c) The draws of the bridges listed in paragraph (c)(3) shall open on signal if appropriate advance notice is given to the drawtender of the Hawthorne Bridge subject to the following requirements and exceptions:

(1) The draws need not open for the passage of vessels from 7 a.m. to 9 a.m. and 4 p.m. to 6 p.m. every Monday through Friday; except that on New Year's Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, and Christmas Day, the draws shall open in accordance with the notice requirements of paragraph (c)(3) below.

(3)(i) Broadway Bridge, mile 11.7, from 8 a.m. to 5 p.m. Monday through Friday, one hour's notice shall be given for draw openings. At all other times, notice of at least two hours in advance is required.

(ii) Steel Bridge (upper deck only), Portland, mile 12.1. From 8 a.m. to 5 p.m. Monday through Friday, one hour's notice shall be given for draw openings. At all other times, two hours notice is required.

(iii) Burnside Bridge, mile 12.4, from 8 a.m. to 5 p.m. Monday through Friday, one hour's notice shall be given for draw openings. At all other times, two hours notice is required.

(iv) Morrison Bridge, Portland, mile 12.8, from 8 a.m. to 5 p.m. Monday through Friday, one hour's notice shall be given for draw openings. At all other times, two hours notice is required.

(v) Hawthorne Bridge, Portland, mile 13.1, no advance notice required.

For information on this deviation, mariners can email D13-SMB-D13Bridges@uscg.mil

Chart 18526

LNM: 15/20

WASHINGTON – PUGET SOUND – NORTHERN PART – PORT MADISON AND PORT ORCHARD – Painting of the Agate Pass Bridge

WSDOT will be painting the Agate Pass Bridge (LLNR 17935) on a 24 hour daily schedule from 01 Jun 2019 to 01 Jun 2020 (Monday through Saturday). WSDOT will be using containment to prepare and paint sections of the bridge one section at a time. At mean high water elevation

WASHINGTON – PUGET SOUND – NORTHERN PART – PORT MADISON AND PORT ORCHARD – Painting of the Agate Pass Bridge

Agate Pass Bridge provides 76 feet of vertical navigation clearance. The containment system will reduce the bridge's vertical clearance by approximately 8 feet thus reducing the vertical navigation clearance to 68 feet in the vicinity of the containment systems. Bridge navigation lights will not be affected. Vessels that require the bridge's full vertical clearance, may use a section without containment, plan to navigate at low water or use Rich Passage as an alternate route. Mariners exercise caution for falling debris when transiting underneath the Agate Pass Bridge. For further information please contact the WSDOT Assistant Project Engineer Andy Larson at (360) 874-3011, or email LarsonA@wsdot.wa.gov.

Chart 18441

LNM: 20/19

WASHINGTON – LAKE WASHINGTON SHIP CANAL - George Washington Memorial Bridge Notice (Revised from LNM 01/18)

Washington State Department of Transportation will be conducting painting and preservation operations on the George Washington Memorial Street Bridge (Aurora Avenue Bridge) (LLNR 18184). The work will be conducted from 01 Apr 18 through 31 Oct 20. Hours of work will be from 0700 to 1900, Monday through Saturday. The subject bridge provides 135 feet of vertical clearance will be reduced to 125 feet for containment. The containment will be marked with flashing yellow lights and signage. Half of the 150 feet of horizontal clearance will have containment. Mariners may transit under the bridge at any time, and are advised to use caution while transiting the area. For additional information, contact Nick Hadsell, PM, at (330) 402-3232 or nhadsell@libertymaintenanceinc.com.

Chart 18447

LNM: 26/18

WASHINGTON – LAKE WASHINGTON SHIP CANAL – LAKE UNION – Fairview Avenue Bridge Notice (Revised from LNM 18/19)

Preliminary work to install a turbidity curtain for the Fairview Avenue Bridge Replacement project started on 12 Apr 2019. This turbidity curtain will remain in Lake Union waters 24 hours a day for the duration of the project, projected to run through early 2021. Navigation warning lights are installed on top of flotation logs indicating the location of the turbidity curtain. The bridge will be closed to all road traffic and in-water work will commence on 16 Sep 2019. Navigation is not allowed across or beyond the turbidity curtain which indicates the beginning of an active construction zone. The turbidity curtain is located on waterway 8 in front of the Zymo Genetics building and spans the waterway between Seattle Seaplanes and Windermere Real Estate. For more information contact Chris Barnes, SDOT Construction Engineer, (206) 234-1404, and email chris.barnes@seattle.gov

Chart 18447

LNM: 33/19

WASHINGTON - LAKE WASHINGTON SHIP CANAL - UNION BAY REACH - SR 520 West Approach Bridge South Bridge Replacement (Revised from LNM 38/19)

American Bridge Company will be constructing a temporary work trestle for the State Route (SR) 520 West Approach Bridge South project in southern Union Bay from 04 Nov 2019 through 29 Jan 2021. The temporary work trestle will be left in place through October 2022 and used for demolishing the existing West Approach Bridge South and constructing the new Approach Bridge. The limits of the temporary work trestle extend from the bridge abutment to approximately 1,100ft west of the west navigation channel. Mariners are advised to transit with caution when navigating near the project area and be aware that no boaters are permitted between the active work zone and work trestles at any time. A graphical representation of the impacted area was included as Enclosure (4) to LNM 43/19. For additional information, contact Dennis Suh at (504) 206-6494 or email at dsuh@americanbridge.net.

Chart 18447

LNM: 40/19

WASHINGTON – LAKE WASHINGTON SHIP CANAL – LAKE WASHINGTON - Interstate 90 Highway Bridge construction (Revised from LNM 28/19)

Kiewit-Hoffman will be performing seismic upgrades to the existing approach piers for the Interstate 90 (I-90) Highway Bridge (LLNR 18389 and 18398). The west navigation channel and east navigation channels for the I-90 Floating Bridge will have marine activities, including the moving of barges, but will stay open to mariners. Mariners are advised to use caution while transiting near barges within the Sound Transit E130 project area. These vessels are currently moored to columns and may present hazards. Construction barges located within the work zones will be marked with steady white lights on all four corners. Mariners should maintain a safe distance and minimize wake around all floating barges and other construction vessels. The eastern navigation channel will be open and will not change vertical or horizontal clearances. Two temporary mooring buoys marked with white lights flashing every 4 seconds (FI W 4s) have been relocated near the bridge for the mooring of the barges. The positions are:

Mooring Buoy (Northwest side of I-90 Floating Bridge) 47-35-32.040N, 122-16-49.740W

Mooring Buoy (Northeast side of I-90 Floating Bridge) 47-35-31.860N, 122-15-37.680W

Mariners should not deviate from these established paths through navigations channels when open to vessel traffic. Construction and operations at this site are expected to continue through 2020. For additional information contact Evan Spading (808)-342-3561 or email Evan.spading@kiewit.com.

Chart 18447

LNM: 05/20

WASHINGTON – LAKE WASHINGTON – SAMMAMISH RIVER – Bridge Notice

Construction has started on the West Sammamish River Bridge at Sammamish River mile 0.5 near Kenmore, Washington, and will continue through October 2023. The western bridge will be removed and a new bridge constructed. Mariners may transit through the construction zone, but are advised that temporary work piers will be constructed on the west side of the bridge, and will reduce the horizontal span to 40 feet of clearance. Containment will be installed under the bridge reducing the vertical clearance from 11.5 feet to 10.5 feet measured at OHW. Working hours will normally be from 0700 to 1600 five days per week. If construction falls behind schedule, the work hours may shift to 24 hours/seven days per week. For more information regarding construction, contact Jake Brockmoller at (253) 888-2514, or Mick Cannon at (253) 377-1041.

Chart 18447

LNM: 13/20

WASHINGTON – EVERETT HARBOR - SNOHOMISH RIVER – Bridge inspection

WSDOT will be inspecting the SR 529 Highway Bridge (North Bound) (LLNR 18591.3) over the Snohomish River, mile 3.7, and the SR 529 Highway Bridge (North Bound) (LLNR 18594.11) over the Steamboat Slough, mile 1.2, from 0800 to 1500 on 20 and 23 Jul 2020. The bridges will be inspected using an under-bridge inspection truck (UBIT) that occupies a portion of the roadway and extends a boom under the bridge. There is no fixed impact to navigational clearance from this operation (an approximate 10 ft. reduction to clearance while bucket is under the bridge) however UBIT will promptly give way to tall marine vessels. Mariners are advised to use caution while transiting the area. The UBIT bucket will have a flashing orange light on the bottom and a safety lookout will be on the bridge. Bridge openings will occur as usual. For additional information, contact Mr. Alan Kuper, P.E. at (360) 701-0556 or kupera@wsdot.wa.gov.

Chart 18444

LNM: 12/20

WASHINGTON – PUGET SOUND – ANACORTES TO SKAGIT BAY – DECEPTION PASS – Bridge notice

WSDOT will be cleaning, painting and repairing the bridges over Deception Pass and Canoe Pass south of Anacortes. The work is expected to begin at 0600 on 01 Apr 2019 and be complete by 2000 on 31 Oct 2020. The Deception Pass Bridge has a vertical clearance of 144 feet, and the vertical clearance under the Canoe Pass Bridge is 154 feet. No in-water work will be conducted, and a full containment system will be employed, however, mariners are cautioned that fall hazards will exist. For further information on this project contact the Project Engineer, Shane Spahr, at (360) 848-7103 or email spahrs@wsdot.wa.gov.

Chart 18427

LNM: 06/19

SNAKE RIVER – LAKE SACAJAWEA TO LAKE HERBERT G. WEST - Snake River Minimum Operating Pool operations

Beginning 03 Apr 20, the Snake River reservoirs will transition to Minimum Operating Pool (MOP) operations and spring spill for fish passage in accordance with the 2020 Fish Operations Plan. The facilities affected are; McNary Lock and Dam (Columbia River mile 292); Ice Harbor Lock & Dam (RM 9.7); Lower Monumental Lock & Dam (RM 41.6); Little Goose Lock & Dam (RM 70.3); and variable MOP at Lower Granite Lock & Dam (RM 107.3). The MOP ranges for each Snake River pool are listed below, with the elevations referenced to the North American Vertical Datum of 1929 and the Pool Elevation listed in feet:

- Ice Harbor, Lake Sacajawea: 437 to 438.5 (509)-543-3231. Call Sign WUJ42 Ice Harbor
- Lower Monumental, Lake Herbert G. West: 537 to 538.5 (509) 282-7231. Call Sign WUJ43 Lower Monumental
- Little Goose, Lake Bryon: 633 to 634.5 (509) 399-2233 x231. Call Sign WUJ44 Little Goose
- Lower Granite, Lower Granite Lake: 733 to 736.5 (509) 843-2231. Call Sign WUJ45 Lower Granite

The variable MOP at Lower Granite is based on Snake River flows:

INFLOW	FOREBAY RANGE
120,000+ CFS	733.0-734.5
80,000-120,000 CFS	734.0-735.5
50,000-80,000 CFS	734.5-736.0
0 – 50,000 CFS	735.0-736.5

Because State water quality standards have changed since 2019, there may be a higher rate of discharge through the dam spillways compared to previous years, and river navigators may experience currents and eddies in the tailrace not previously encountered. If navigators believe river conditions inhibit safe navigation to or from a lock, they may request a temporary adjustment to spill using the contact information below. Contact with lock and dam shift operators should be initiated no less than 30 minutes prior to arriving at the lock, as a requested redistribution or reduction of spill may take as long as 30 minutes to attenuate. Additionally, downstream departures may be delayed for the requested spill change to be implemented and take effect. Navigators are encouraged to contact dam operators and report any unsafe navigation conditions. For additional information, contact the NWW Operations Division at (509) 527-7364.

SNAKE RIVER – LAKE SACAJAWEA AND LAKE HERBERT G. WEST AND LAKE BRYAN – Upstream floating guidewall restrictions (Revised from LNM 15/20)

Until further notice, vessels transiting the Snake River navigation locks must use caution when operating near the upstream floating guidewalls at several of the projects:

- Ice Harbor Lock and Dam, Snake River Mile 9.7; vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor may they use the guidewall as a pivot for entering the lock.
- Lower Monumental Lock and Dam, Snake River Mile 41.6, vessels may not rub against the floating guidewall when approaching or leaving the lock, nor should they use the guidewall as a pivot point for entering the lock.
- Little Goose Lock and Dam, Snake River Mile 70.3, vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor may they use the guidewall as a pivot for entering the lock.

These restrictions will remain in place until more substantial repairs can be made to the locks' floating guidewall cables. For additional information on this work, contact the NWW Operations Division at (509) 527-7364.

OREGON – SIUSLAW RIVER – Shoaling at entrance to Siuslaw River

The Coast Guard has observed significant shoaling at the entrance to Siuslaw River. Mariners are urged to exercise caution when transiting the bar, especially at low tide. Approximately 200 yards west of the jetty tips is an area of significant shoaling with depths as shallow as 8 feet. This shoal area is causing the bar to break in lighter weather conditions than is normal. Local mariners can contact Coast Guard Station Siuslaw River for more information.

COLUMBIA RIVER – CRIMS ISLAND TO ST HELENS – NOAA research buoy temporary deployment

NOAA is deploying a science research buoy with current meter in the Columbia River in the vicinity of Stella Range from 18 May to 11 Sep 2020. The buoy will be deployed in location 46-10-28.500N, 123-06-22.800W, which is at RM 57.5, on the Oregon side of the river, abeam of Crims Island Dike Light 6 (LLNR 10685), approximately 250 yards outside of the navigational channel. The buoy is yellow in color, cylindrical in shape, and will be lit with a yellow light flashing with 5 1-second flashes every 20 seconds (Fl Y (5) 20s). For more information, contact NOAA's Drew Maczko at (206) 526-6918 or email Drew.Maczko@noaa.gov.

WASHINGTON – STRAIT OF GEORGIA AND STRAIT OF JUAN DE FUCA – PUGET SOUND – Bottom Trawl survey

From 22 Apr through 28 May 2020, the Washington Department of Fish and Wildlife (WDFW) Marine Fish Science (MFS) Unit will conduct their annual bottom trawl survey to assess marine fish living in the waters of Puget Sound, including the Strait of Juan de Fuca, Strait of Georgia, San Juan Archipelago, Hood Canal, Central Sound, and South Sound regions. The F/V Chasina, a 57-foot seiner/trawler (call sign WYQ-6987), will conduct the operations for WDFW and will carry WDFW RESEARCH placards posted on both sides of the upper deck. The MFS Unit has conducted this trawl survey annually since 1987 and sampled a series of fixed index stations since 2008. For more information on WDFW's MFS unit and the bottomfish programs, visit <https://wdfw.wa.gov/species-habitats/species/bottomfish> or contact Jennifer Blaine at (425) 379-2313 (office) or (425) 231-9476 (cell) or email at Jennifer.Blaine@dfw.wa.gov.

WASHINGTON – PUGET SOUND – ELLIOTT BAY - Colman Dock construction

Washington State Ferries is conducting demolition and construction operations at the Colman Docks, scheduled to be completed in the summer of 2022. Operations will be conducted from 0700 to 1700, Monday through Friday. Mariners should be aware of marine construction equipment moored around the Colman Dock and regular tows up and down the Duwamish River in support of the operation. Equipment may obstruct small sections of the waterway adjacent to Colman Dock. Water quality monitoring will be taking place during construction operations. Please direct any inquiries to WSF Communications at (206) 402-8070 or email wsfcomms@wsdot.wa.gov.

WASHINGTON – PUGET SOUND – ELLIOTT BAY – Terminal 5 pier construction

Orion Marine will be performing pile removal, demolition of structures, and new pier construction for the Terminal 5 Berth Modernization Project for the Port of Seattle on the Duwamish River west waterway. Phase 1 will start 22 Jul 2019 and run through 31 Dec 2020 and phase 2 will run from Jun 2021 through Mar 2023. Work will typically take place from 0700 to 1700, Monday thru Friday. The DB Rainier and DB St. Helens, will each have a material barge moored alongside and will always remain on site. Each floating plant will have all corners marked with steady burn white lights. The DBs will run on anchors at times so mariners are requested to keep at least a 200-foot distance. The crane and tugs will monitor VHF-FM channel 13. For additional information please contact Bradley Morlock at (253) 552-1140 or email at bmorlock@orionmarinegroup.com

LNM: 28/19

WASHINGTON – PUGET SOUND – APPLE COVE TO KEYPORT – Submersible Vehicle testing (Revised from LNM 49/19)

The Naval Undersea Warfare Center (NUWC) at Keyport, WA will be continuing operations in the vicinity of NUWC between the Brownsville Marina and Keyport through 23 Dec 2020. Operations will be conducted Monday through Friday during daylight hours. Operations will involve semi-submersible and submersible vehicles escorted by a small naval craft with a flashing red light. The small craft will monitor VHF-FM channels 12 and 16. The call sign for the small craft will be "Keyport Range Control". All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles while the range is in operation. Questions can be directed to Keyport Range Control on VHF-FM channels 12 and 16 or by contacting the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.

LNM: 50/19

OREGON – WASHINGTON – IDAHO – NOAA's planned end of paper chart production

On 15 Nov 2019, NOAA formerly announced in the Federal Register (Docket #2019-24807) that they would begin a 5-year process of discontinuing their traditional paper, or raster, charts by 2025. NOAA intends to gradually 'sunset' raster chart products and is introducing an option to create custom ENC data based charts that can be printed as a paper copy locally or commercially, via one of their certified third party printers. More detailed information regarding this transition is available from <https://nauticalcharts.noaa.gov/publications/docs/raster-sunset.pdf>. Comments/questions on the Federal Register Notice and the NOAA Custom Chart application should be submitted at <https://www.nauticalcharts.noaa.gov/customer-service/assist/>. Other concerns may be directed to your local NOAA Navigation Manager, <https://nauticalcharts.noaa.gov/customer-service/regional-managers/index.html>. In order to identify and overcome the regulatory challenges associated with this transition including but not limited to updating commercial vessel carriage requirements and maritime safety information processes, NOAA will continue to work directly with its Agency charting partners. A prototype version of the NOAA Custom Chart Tool is available at <https://devgis.charttools.noaa.gov/pod/>.

LNM: 03/20

OREGON – WASHINGTON – National Geospatial-Intelligence Agency updated Light List Corrections procedures

Effective immediately with NGA NtM 16/2020 (18 APR 2020), NGA will now be posting fully corrected versions of the Coast Guard Light List (LL) to their Maritime Safety Information (MSI) webpage and will suspend issuing corrections to the Coast Guard LL within the NGA NtM. The Coast Guard NAVCEN provides PDF and XML versions of their weekly corrected Light List publications available at <https://www.navcen.uscg.gov/?pageName=lightListWeeklyUpdates>. Coast Guard NVIC 01-16 allows for publications to be kept in electronic format as long as the publication updates are reasonably available. To align with the NVIC, NGA will match the Coast Guard format and will start posting the fully corrected Coast Guard Light List PDFs on their website at <https://msi.nga.mil/Publications/USCGLL>. This will allow the mariner to download a corrected version of the Coast Guard Light List instead of applying notice corrections to the baseline PDFs. Effective immediately, NGA will stop incorporating individual USCG Light List corrections in their weekly Notice to Mariners. Additionally, the "SEARCH ONLINE DATABASE" query function on NGA's MSI webpage will no longer be maintained. Until it can be removed from the MSI webpage, mariners are directed to only use the updated Coast Guard Light List PDFs for all light information. The specific Light List corrections can continue to be viewed in each Local Notice to Mariner by District at: <https://www.navcen.uscg.gov/?pageName=lnmMain>. Please contact the Maritime Safety Office or the Maritime Light Team at Maritime_Lights@nga.mil with any questions.

LNM: 15/20

OREGON – WASHINGTON – Updated email addresses for contacting the Coast Guard

All mariners and maritime stakeholders should note that the Coast Guard's Thirteenth District office of Waterways Management, Aids to Navigation and Bridge Administration in Seattle, Washington has changed their office shared email addresses. These include emails for LNM submissions, aids to navigation discrepancies, questions and comments, private aids to navigation (PATON) issues, Bridge operations and permits, and WAMS questionnaires. We apologize for any inconvenience this change may cause.

Beginning on 15 Apr 2020, the following email addresses are discontinued:

D13-LNM@uscg.mil
D13-PF-LNM@uscg.mil
D13-PF-D13BRIDGES@uscg.mil
D13-PATON@uscg.mil
D13-PF-D13DPW@uscg.mil

The new email addresses below should be used for all future communications:

D13-SMB-D13-LNM@uscg.mil

Dredging operations are scheduled or in progress at the following locations:

Start Date	End Date	Times	Location	Dredge Vessel	Assist Vessel	Channels Monitored	Disposal Area	LNM
26-May-20	20-Jun-20	24 Hrs/7 Days	Columbia River; Cottonwood Island Lower Range (RM 67+25 to 68+25)	M/V OREGON	Clackmas, Ivanhoff, Williams	VHF-FM 13 & 16	TBD	20/20

Mariners are advised that the start and ending dates for dredging activities may vary due to unforeseen on-site conditions, such as gill net fishing, weather and other factors.

USACE dredges request mariners transit at their slowest safe speed to minimize wake when in the vicinity of a dredge and proceed with caution after passing arrangements have been made. Vessel(s) and/or equipment may encroach into the channel.

NOTICE TO MARINERS

April 2020

The northbound span of the Interstate Bridge over the Columbia River (River Mile 106.5) requires repairs to prevent failure of the 272-foot high lift span that allows marine traffic through the main river navigation channel.

In September of 2020, ODOT will replace bridge components including the two sheave/trunnion/bearing (pulley) assemblies and counterweight cables in the top of the tower at the south end of the bridge lift span.

Routine inspection revealed a half inch deep crack in the trunnion. The bridge is currently safe, but the crack has grown from 4.0 inches long to 6.5 inches long in 2 years and analysis indicates that it could reach critical depth causing catastrophic failure by 2045.

INTERSTATE BRIDGE CLOSURE

The northbound span of the Interstate Bridge will close to vehicle traffic from September 12–September 20, 2020 and will affect river navigation by interrupting the operation of the lift span.

LIFT SPAN

The lift span cannot be raised while the trunnions and other associated bridge components are replaced.

During this closure, marine traffic will use the bridge's wide span and, for maximum vertical clearance, the high span between Pier 5 and Pier 6 (3 white lights over 1 green light) with 72 feet of clearance to the zero water level mark.

ANTICIPATED SCHEDULE

The navigable channel under the lift span, between Pier 2 and Pier 3, will close to marine traffic from:

12:01 a.m. on September 10, 2020 (closure starts) through 11:59 p.m. on September 22, 2020 (closure ends).

During the remainder of the project, the lift span will operate normally.

Marine traffic will use the bridge's wide span and, for maximum vertical clearance, the high span between Pier 5 and Pier 6 while the lift span is closed.

Interstate Bridge with lift span lowered.

MORE INFORMATION

Outreach will continue as the project progresses.

MARINE SAFETY INFORMATION BULLETIN

These bulletins are purely informational for the maritime community within this Captain of the Port zone. They advise you of emerging information & situations that may impact our Marine Transportation System. As important, they help to manage expectations & facilitate cooperation regarding actions that we may be taking and/or that you may need to employ in the interest of safety/security. Increased vigilance in our maritime world hinges significantly upon proactive engagement & information sharing with the private sector, which has the primary responsibility for security & safety at their waterfront facilities & vessels.

BULLETIN NO: 02-20

Date: 04 May 2020

SUBJECT: WEST SEATTLE HIGH RISE BRIDGE – RECOMMENDATIONS FOR DUWAMISH WATERWAY USERS

1. **Background:** The Seattle Department of Transportation (SDOT) identified significant structural cracking on the West Seattle High Rise Bridge (“the bridge”) and immediately closed the bridge to vehicle traffic on March 23, 2020. Based on SDOT’s daily inspections, cracks continue to propagate on the bridge, but at a slower rate than before the bridge was closed.
2. **Current Situation:** The bridge is inspected multiple times a day by SDOT engineers. As of this date, SDOT has determined the bridge safe for workers and safe for vessels to pass below it. SDOT is currently installing sensors to actively monitor the bridge’s structural status and serve as an early warning system in the event of a catastrophic structural failure. However, it is essential for waterway users and marine terminal operators to be aware that the condition of the bridge is dynamic and there is a potential for the bridge’s safety status to change on short notice. If the bridge becomes unsafe, the waterway may be closed to all marine traffic by the U.S. Coast Guard. The U.S. Coast Guard is actively supporting SDOT, the lead agency, with emergency planning, alert notification, and evacuation procedures. Both the City of Seattle Office of Emergency Management and the U.S. Coast Guard have established Alert Warning System protocols to immediately communicate changes to the bridge and/or waterway status. **The safety of waterway users and unobstructed use of this vital Marine Transportation System hub is a top regional priority.** The U.S. Coast Guard is working closely with Federal, State, and Local partners to ensure the waterway is cleared as soon as possible in the event of an unforeseen obstruction.
3. **Recommendations:** Commercial vessel and marine terminal operators, recreational vessel owners, and Tribal nations who operate south of the West Seattle High Rise Bridge should consider the following voluntary Standards of Care:
 - a. Prepare contingency plans in the event of an extended waterway closure.
 - b. Determine alternative operation sites north of the bridge.
 - c. Limit navigating the Duwamish waterway south of the bridge to essential operations only.
 - d. Streamline shore to ship cargo handling procedures to reduce time south of the bridge.
 - e. Make alternate arrangements to layup or moor inactive vessels north of the bridge.
 - f. Do not station-keep or linger underneath the bridge waiting for the Lower Spokane Street Swing Bridge to open or close.

**WEST SEATTLE HIGH RISE BRIDGE –
RECOMMENDATIONS FOR DUWAMISH WATERWAY USERS**

4. **Communication:** These recommendations will remain active until the bridge is determined sufficiently stabilized by SDOT. The U.S. Coast Guard will continue to be actively involved in SDOT and other key stakeholder meetings and will update this Marine Safety Information Bulletin as appropriate. To obtain the latest and most accurate information on the West Seattle High Rise Bridge:
 - a. Sign up for the Coast Guard Alert & Warning System alerts. Please e-mail SectorPugetSoundWWM@uscg.mil.
 - b. Sign up for SDOT/City of Seattle alerts (<https://alert.seattle.gov/>).
 - c. Follow updates via the SDOT Bridge Project website: (<http://www.seattle.gov/transportation/westseattlebridge>).
 - d. All vessels underway in the vicinity of Harbor Island and the Duwamish Waterway should monitor VHF Marine Band Radio Channel 16 and/or VHF Marine Band Radio Channel 14 (Vessel Traffic Service).
5. For more information, please contact SectorPugetSoundWWM@uscg.mil or the Sector Puget Sound Command Center at (206) 217-6002.

Sincerely,

L. A. Sturgis
Captain, U.S. Coast Guard
Captain of the Port, Sector Puget Sound

Navigation Lighting/Buoy Details

LIGHT COLORS AND HORIZONTAL ARCS OF VISIBILITY

- A CHANNEL CENTER(100)- GREEN (150)- GREEN ON BRIDGES LIGHTED PRIOR TO JAN 1, 1947, UNTIL LIGHTS ARE REPAIRED OR REPLACED;
