LOCAL NOTICE TO MARINERS

District: 13

Week: 30/20

ISSUED BY: COMMANDER, THIRTEENTH COAST GUARD DISTRICT (dpw)
915 Second Avenue, 35th Floor, Rm 3510, Seattle, Washington 98174-1067
Telephone: (206) 220-7280
Email: D13-SMB-D13-LNM@uscg.mil
https://www.pacificarea.uscg.mil/Our-Organization/District-13/District-Staff/-dpw/
https://www.navcen.uscg.gov/?pageName=lnmDistrict&region=13

Coast Pilots, along with corrections, are available at: www.nauticalcharts.noaa.gov/publications/coast-pilot/index.html. Print on Demand (POD) copies are available for purchase at: www.nauticalcharts.noaa.gov/publications/print-agents.html#coast-pilot.

UNITED STATES COAST GUARD NAVIGATION INFORMATION SERVICE (NIS)
The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts / Broadcast Notice to Mariners (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). LNMs and other navigation notices can be obtained via e-mail subscription through the USCG Navigation Center website: https://www.navcen.uscg.gov/?pageName=feeds

In addition, the NIS investigates all reports of degradation or loss of GPS or DGPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900 or Email: webmaster@navcen.uscg.mil, or on the World Wide Web: https://www.navcen.uscg.gov/?pageName=gpsUserInput

BROADCAST NOTICE TO MARINERS
Urgent marine navigational and weather information is broadcast over VHF channel 22A (157.1 MHZ). Broadcasts are first announced over the distress, safety and calling channel 16 before they are made. All ships in U.S. waters over 20 meters in length are required to monitor VHF channel 16, and must have radios capable of tuning to the VHF simplex channel 22A.

This section contains a range of all the significant Broadcast Notice to Mariners (BNM’s) on the date of this edition.

ABBREVIATIONS

A through H
ADRIFT - Buoy Adrift
AC - Atlantic Coastal Waterway
AI - Alternating
B - Buoy
BW - Breakwater
bl - Blast
BM - Broadcast Notice to Mariner
bu - Blue
C - Canadian
CHAN - Channel
CGD - Coast Guard District
C/O - Cut Off
CONT - Contour
CRK - Creek
CONST - Construction
DAYMK - Daymarker
DBN - Daybeacon
DBD/DAYBD - Dayboard
DEFAC - Defaced
DEST - Destroyed
DISCON - Discontinued
DMGD/DAMGD - Damaged
ec - Eclipse
EST - Established Aid
ev - every
EVAL - Evaluation

I through O
I - Interrupted
ICW - Intracoastal Waterway
IMCH - Improper Characteristic
INL - Inlet
INOP - Not Operating
INT - Intensity
Isl - Islet
Iso - Isophase
kHz - Kilohertz
LAT - Latitude
LB - Lighted Buoy
LBB - Lighted Bell Buoy
LHB - Lighted Horn Buoy
LGB - Lighted Gong Buoy
LONG - Longitude
LT - Light
LT CONT - Light Continuous
LTR - Letter
LWB - Lighted Whistle Buoy
LWP - Left Watching Properly
MHz - Megahertz
MISS/MSNG - Missing
Mo - Morse Code
MRASS - Marine Radio Activated Sound Signal
MSLD - Misleading

P through Z
PRIV - Private Aid
Q - Quick
R - Red
RACON - Radar Transponder Beacon
Ra ref - Radar reflector
RBN - Radio Beacon
REBUILT - Aid Rebuilt
RECOVERED - Aid Recovered
RED - Red Buoy
REFL - Reflective
RFL - Range Rear Light
RELIGHTED - Aid Relit
RELOC - Relocated
RESET ON STATION - Aid Reset on Station
RFL - Range Front Light
RIV - River
RRASS - Remote Radio Activated Sound Signal
s - seconds
SEC - Section
SHL - Shoaling
si - silent
SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
SS - Sound Signal
STA - Station
SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

COLUMBIA RIVER – LAKE CELILO – Bridge inspection
WSDOT will be performing a regular scheduled inspection of the Biggs-Maryhill Highway Bridge (LLNR 12333) at Columbia River mile 209.2 between the hours of 0700 to 1700 on 17 - 21 Aug 2020. The inspection will use two under-bridge inspection trucks (UBITs) from top of the bridge deck of SR-97. Vertical clearance will not impact navigation from this operation. The UBIT will reduce the vertical clearance approximately 10 feet while the bucket is under the bridge, however the UBIT will promptly give way to tall marine vessels. UBITs display a flashing amber light mounted to the bottom of each bucket. For additional information, contact Tad Kendrick, P.E. at (360) 259-7368 or kendrit@wsdot.wa.gov.

COLUMBIA RIVER – JOHN DAY DAM TO BLALOCK – Navigation lock maintenance outage
The Navigation Lock at John Day Lock and Dam at Columbia River mile 215.6 has a planned lock outage for maintenance to repair a standpipe in the adjoining stub gallery on Tuesday 18 Aug 2020 from 0630 - 1700. Repairing the standpipe requires the water level in the lock to remain steady at tailrace level for worker safety in a confined space environment. River users may contact the John Day operator at (541) 298-9712 or the Portland Operations Center at (503) 808-4341.

SNAKE RIVER – SNAKE RIVER TO LAKE BRYAN – Rebuilding of Aids to Navigation
The U.S. Coast Guard and Bergerson Construction will be rebuilding the following aids to navigation on the Snake River, commencing 03 Aug 20 and possibly continuing through the month of August. Those aids to navigation are listed below in the approximate order of construction:

Schultz Bar Range Front Light (LLNR 13845) on Lake Bryan
Schultz Bar Range Rear Light (LLNR 13850) on Lake Bryan
Little Goose Reservoir Light 22 (13800) on Lake Bryan
Little Goose Reservoir Light 29 (LLNR 13835) on Lake Bryan
McGuire Range Front Light (LLNR 13655) on Lake Herbert G. West
Snake River Daybeacon 4 (LLN 13140) on Lake Sacajawea

Mariners should use caution when transiting in the vicinity of these aids to navigation and reduce wake when in the presence of the construction barge. Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Charts: 18545 18546 18547

SNAKE RIVER – LAKE SACAJAWEA – Navigation lock maintenance outage
The Navigation Lock at Lower Monumental Lock and Dam, at Snake River mile 41.6, will be closed daily starting 27 Jul 2020, between the hours of 0800-2000. These outages are necessary for divers to perform removal and replacement of a lock floating guide wall service cable that holds the guide wall in place. The work is planned for completion by 17 Aug 2020. River users may contact the Lower Monumental Shift Operator at (509) 282-7231, or VHF-FM Channel 14 using call sign WUJ43 Lower Monumental, to determine if the daily work schedule allows for an earlier opening on that particular day.

Chart 18545

WASHINGTON – APPROACHES TO ADMIRALTY INLET - Sequim Bay scientific sensor deployment
The Pacific Northwest National Laboratory (PNL) will be deploying and retrieving submerged scientific equipment in Sequim Bay, Washington from 13 Aug 20 through 26 Aug 20. The submerged equipment will be located in approximate position 48-04-46.86N 123-02-36.36W on the seafloor in 30 feet of water. The research vessels Desdemona or Strait Science may be on scene during the deployment and may be hailed on...
WASHINGTON – PUGET SOUND – ADMIRALTY INLET TO COMMENCEMENT BAY - Waterways Survey

The Coast Guard is conducting a user survey in the Puget Sound from Admiralty Inlet south to Dalco Passage and Commencement Bay. The Coast Guard uses the Waterways Analysis and Management System (WAMS) to validate the adequacy of the existing aids to navigation (AtoN) system, as well as to get a better understanding of the uses of each waterway and general safety issues. WAMS focuses on the waterway’s present AtoN system, marine casualty information, port and harbor resources, changes in recreational and commercial marine vessel usage and future development and dredging projects. The survey is available at the Coast Guard District 13 WAMS website https://www.pacificarea.uscg.mil/Our-Organization/District-13/District-Divisions/-dpw/-wams. The deadline for survey comments will be 20 Nov 2020. For additional information please contact LTJG Katie Matha at (206) 220-7283 or email D13-SMB-D13-DPW@uscg.mil.

Charts: 18446 18449 18450 18453 18474  LNM: 30/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – ELLIOTT BAY – Tribal fisheries

The Muckleshoot Tribe will commence gillnet salmon fishing operations starting on 05 Aug 2020. The operations will take place in Elliott Bay east of a line drawn from Pier 91 to Duwamish Head Light (LLNR 16910) based upon the schedule listed below:

Elliott Bay fishery only
- 2000 on 05 Aug to 0800 on 06 Aug 2020
- 2000 on 12 Aug to 0800 on 13 Aug 2020 (Tentative Date to be confirmed)

These fisheries are expected to cause congestion on the waterway, and mariners are advised to use caution while transiting the area. For more information, contact Coast Guard Sector Puget Sound Waterways Management at (206) 217-6051 or the Muckleshoot Tribal Enforcement at (253) 876-2927.

Chart 18450  LNM: 30/20

WASHINGTON – PUGET SOUND – NORTHERN PART – POSSESSION SOUND – Construction at the Mukilteo Ferry Terminal

WASHINGTON – PUGET SOUND – NORTHERN PART – POSSESSION SOUND – Construction at Mukilteo Ferry Terminal

Manson Construction Co. will be conducting operations to build the new Mukilteo Ferry Terminal marine structures from 17 Aug 20 through 15 Mar 21. The typical hours of operation are Monday through Friday, 0600 to 1630. The new terminal is located approximately .3 NM north-west of the existing W SF Mukilteo Ferry Terminal. Operations will include, but are not limited to pile driving, pouring concrete, steel erection and welding, heavy lifting, and miscellaneous marine construction. Marine construction equipment will stay on location during operational and non-operational periods. The vessels involved in the project are Derrick barge 24, Deck barges Manson 38, Manson 50, Manson 58 and Manson 64. The tug Harry M will be onsite intermittently. The vessels will monitor VHF-FM channel 8. The Derrick Barge 4 will have anchors deployed with crown buoys, each submerged anchor. Submerged anchor cables are present and local mariners are requested to stay at least 1000ft from equipment. Mariners are requested to proceed with extreme caution, provide a wide berth, and operate at a slow speed while transiting in this area. For additional information contact Manson’s Project Manager Ms. Monica Blanchard at (206) 913-7498 or Project Superintendent Mr. Erik Dolmseth at (206) 384-3025.

Chart 18443  LNM: 30/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – Duwamish Waterway Closure

Seattle City Light will be laying fiber optic cable across the Duwamish waterway on 30 Jul 2020, from 0900 to 1400. The east access crossing point is at 44 S Nevada St in position 47-33-49.0N 122-20-44.0W across the Duwamish to the west access point at 420 W Marginal Way in position 47-21. The typical hours of operation are Monday through Friday, 0600 to 1630. The new terminal is located approximately .3 NM north-west of the existing W SF Mukilteo Ferry Terminal. Operations will include, but are not limited to pile driving, pouring concrete, steel erection and welding, heavy lifting, and miscellaneous marine construction. Marine construction equipment will stay on location during operational and non-operational periods. The vessels involved in the project are Derrick barge 24, Deck barges Manson 38, Manson 50, Manson 58 and Manson 64. The tug Harry M will be onsite intermittently. The vessels will monitor VHF-FM channel 8. The Derrick Barge 4 will have anchors deployed with crown buoys, each submerged anchor. Submerged anchor cables are present and local mariners are requested to stay at least 1000ft from equipment. Mariners are requested to proceed with extreme caution, provide a wide berth, and operate at a slow speed while transiting in this area. For additional information contact Manson’s Project Manager Ms. Monica Blanchard at (206) 913-7498 or Project Superintendent Mr. Erik Dolmseth at (206) 384-3025.

Chart 18449  LNM: 30/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – Special Bridge notice (Revised from LNM 29/20)

SDOT and Kraemer North America are conducting structural repairs to the West Seattle Freeway Bridge (LLNR 16870.2) across the Duwamish Waterway at mile 0.35, which will impact mariners in several ways. There will be approximately a seven (7) foot reduction of vertical clearance under the bridge from 01 Jun to 31 Oct 2020 due to the installation of work access platforms on the underneath side of the bridge. Mariners should be aware of overhead work and the possibility for falling debris. Mariners should expect that multiple 4-hour closures of the clearance under the bridge from 01 Jun to 31 Oct 2020 due to the installation of work access platforms on the underneath side of the bridge. The vessels involved in the project are Derrick barge 24, Deck barges Manson 38, Manson 50, Manson 58 and Manson 64. The tug Harry M will be onsite intermittently. The vessels will monitor VHF-FM channel 8. The Derrick Barge 4 will have anchors deployed with crown buoys, each submerged anchor. Submerged anchor cables are present and local mariners are requested to stay at least 1000ft from equipment. Mariners are requested to proceed with extreme caution, provide a wide berth, and operate at a slow speed while transiting in this area. For additional information contact Manson’s Project Manager Ms. Monica Blanchard at (206) 913-7498 or Project Superintendent Mr. Erik Dolmseth at (206) 384-3025.

Chart 18449 18450  LNM: 30/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – Special Bridge notice (Revised from LNM 29/20)

SDOT and Kraemer North America are conducting structural repairs to the West Seattle Freeway Bridge (LLNR 16870.2) across the Duwamish Waterway at mile 0.35, which will impact mariners in several ways. There will be approximately a seven (7) foot reduction of vertical clearance under the bridge from 01 Jun to 31 Oct 2020 due to the installation of work access platforms on the underneath side of the bridge. Mariners should be aware of overhead work and the possibility for falling debris. Mariners should expect that multiple 4-hour closures of the waterway will be required at the end of the maintenance period to dismantle the access platform, anticipated for early October. Questions regarding the navigation closures should be directed to Justin Sieg, Kraemer North America, (425) 961-2769.

Chart 18449 18450  LNM: 30/20

WASHINGTON – LAKE WASHINGTON SHIP CANAL – LAKE WASHINGTON - Interstate 90 Highway Bridge construction (Revised from LNM 05/20)

Kiewit-Hoffman will be performing seismic upgrades and installation of corrosion mitigation devices to the existing approach piers and exterior face of Homer Hadley and Lacey V Murrow for the Interstate 90 (I-90) Highway Bridge (LLNR 18389 and 18398). The west navigation channel and
east navigation channels for the I-90 Floating Bridge will have marine activities, including the moving of barges, but will stay open to mariners. Mariners are advised to use caution while transiting near barges within the Sound Transit E130 project area. These vessels are currently moored to columns or buoys and may present hazards. Construction barges located within the work zones will be marked with steady white lights on all four corners. Mariners should maintain a safe distance and minimize wake around all floating barges and other construction vessels as well as minimizing wake on the north side of Homer Hadley within 200 yards. Barges will be working on both the east and west structures performing retrofit scopes, and will be traveling to and from the temporary mooring buoys Monday through Saturday. Two temporary mooring buoys marked with white lights flashing every 4 seconds (Fl W 4s) have been relocated near the bridge for the mooring of the barges. The positions are:
Mooring Buoy (Northwest side of I-90 Floating Bridge) 47-35-32.040N, 122-16-49.740W
Mariners should not deviate from these established paths through navigations channels. Construction and operations at this site are expected to continue through 2020. For additional information contact Jason Hops at (360) 772-6232 or email Jason.Hops@Kiewit.com

WASHINGTON - SWIFTSURE BANK – ECHO Program 2020 Voluntary Vessel Slowdown Trial at Swiftsure Bank
Effective 01 Aug 2020, a voluntary vessel slowdown in the vicinity of Swiftsure Bank is in effect for all outbound commercial vessels. If it is safe and operationally feasible to do so, commercial vessels are requested to not exceed the following speeds through the water:
11.5 knots – Bulkers, tankers, general cargo vessels, and government vessels
14.5 knots – Vehicle carriers, cruise ships, and container vessels.
The voluntary vessel slowdown takes place in the outbound lane of the vessel traffic separation scheme between Light Buoy JA (LLNR 756) and the end of the traffic separation scheme. A speed transition zone is in place, beginning at longitude 124-33-36.860W. The ECHO Program voluntary slowdown aims to reduce underwater noise in known southern resident killer whale feeding areas. This initiative will remain in effect 24 hours per day until 2359 PDT on 31 Oct 2020. For more detailed information related to this slowdown and the ECHO program, refer to the following internet web address:

WASHINGTON – BUDD INLET– Olympia Harbor Days Tug Boat Races
The Coast Guard will enforce Olympia Harbor Days Tug Boat Races Special Local Regulation, as per 33 CFR 100.1309, from 11 1100 - 1600 on 06 Sep 2020. Entry into, transiting through, mooring or anchoring within the specified area is prohibited unless authorized by the Captain of the Port or her Designated Representative.

WASHINGTON – HOOD CANAL – Coast Guard Training Exercise Safety Zone
The Coast Guard will enforce the safety zone around vessels involved in Coast Guard training exercises in Hood Canal, WA set forth in 33 CFR 165.1339, from 0800 on 17 Aug through 1700 on 21 Aug 2020, unless cancelled sooner by the Captain of the Port. Under the provisions of 33 CFR 165.1339, no person or vessel may enter or remain within 500 yards of any vessel involved in Coast Guard training exercises while such vessel is transiting Hood Canal, WA between Foul Weather Bluff and the entrance to Dabob Bay, unless authorized by the Captain of the Port or a Designated Representative. In addition, the regulation requires all vessels to obtain permission for entry during the enforcement period by contacting the on-scene patrol commander on VHF channel 13 or 16, or the Sector Puget Sound Joint Harbor Operations Center at (206) 217-6001. Members of the maritime public will be able to identify participating vessels as those flying the Coast Guard Ensign.

WASHINGTON – PUGET SOUND – HOOD CANAL - Military Airborne Water Drop Exercise
The US Air Force 304th Rescue Squadron will be conducting military airborne water drop exercises in Hood Canal on 02 – 04 Aug 2020. This exercise will take place in the Great Bend portion of Hood Canal near Annas Bay in approximate position 47-22-19.000N, 123-07-59.000W. The exercise will consist of aircraft and several small boats that will monitor VHF-FM channel 16. Due to the complexity of these exercises, mariners are advised to stay well clear of this area and follow any instructions of military personnel involved in the operations. For more information contact Quinn Murray at quinn.murray@us.af.mil.

OREGON – COQUILLE RIVER ENTRANCE – Search and Rescue Detachment operations
The Coast Guard Search and Rescue Detachment (SARDET) on the Coquille River at Bandon, Oregon, is standing a modified duty schedule (Thursday-Sunday) this season. As with the entire Oregon Coast, the Coast Guard will maintain search and rescue coverage for all mariners operating within the Coquille River area, however, Coast Guard personnel will only be present from Thursday-Sunday, during all fishing derbies and any time the Coast Guard observes instances of high vessel activity. All mariners are encouraged, when operating in the vicinity of the Coquille River Bar, to check tidal conditions, forecasted weather, and transit the area with caution. Any mariners seeking a bar condition report can contact Coast Guard Station Coos Bay at (541) 888-3267.

**OREGON – CAPE BLANCO TO CAPE FLATTERY – Research operations**

As part of the Ocean Observatories Initiative (OOI), the University of Washington will be recovering and deploying scientific instruments 02 Aug through 27 Aug 2020 off the Oregon coast from the Stonewell Bank area approximately 12 NM off Yaquina Head extending approximately 200 NM westward in the vicinity Brown Bear Seamount. The OOI operations will be performed 24 hours a day from the R/V Thomas G. Thompson with an attached, cabled Remotely Operated Vehicle (ROV) working on the ocean floor. The research vessel will monitor VHF-FM Channel 13 and 16 during all operations. Mariners are requested to keep a 4,000-yard closest point approach (CPA) in the vicinity of the research vessel to avoid possible entanglement or damage to equipment and/or fishing gear. The approximate dates and locations of the operations are as follows:

**Leg 1**
- 44-22-09.594 N, 124-57-14.724 W (Endurance Offshore, WD 580m) from 02 Aug – 03 Aug
- 44-31-44-280 N, 125-23-22.908 W (Slope Base, WD 2900m) from 04 Aug – 05 Aug
- 45-49-49.752 N, 129-45-11.850 W (Axial Base, WD 2600m) from 06 Aug – 08 Aug
- 45-49-49.752 N, 129-45-11.850 W (Axial Base, WD 2600m) on 11 Aug
- 44-31-44-280 N, 125-23-22.908 W (Slope Base, WD 2900m) from 12 Aug – 13 Aug
- 44-22-09.594 N, 124-57-14.724 W (Endurance Offshore, WD 580m) on 13 Aug

**Leg 2**

For additional information contact Brian Ittig at bittig@uw.edu

---

**COLUMBIA RIVER – CRIMS ISLAND TO ST. HELENS - COWLITZ RIVER – I-5 Twin Bridge notice**

WSDOT will be conducting preservation and painting work on the I-5 Twin Bridge across the Cowlitz River at mile 31.4 near Toledo, Washington. The project will begin on 23 Jul 2020 and continue until approximately Jul 2021, weather pending. The working hours will be 0700 to 1600, and from 2000 to 0700. Containment and an Under Bridge Inspection Truck will reduce the vertical clearance by three feet. The subject bridge’s vertical clearance at high water is 15 feet, and will be reduced to 12 feet. The containment will be marked with flashing amber lights. The project will involve rigging, sand blasting and painting. Mariners should be cautious of fall hazards. For more information, contact Joanna Lowery at lowreyj@wsdot.wa.gov, or Lefty Helidonis at (360) 280-2879.

---

**WASHINGTON – PUGET SOUND – HOOD CANAL – Pier construction**

Manson Construction will be conducting pier demolition and construction activities in Hood Canal on Navy Base Kitsap Bangor from 17 July 2020 through Jun 2022. The project will consist of demolition of existing pier, pile driving and construction of a 500’ pier extension. Operations will be performed Monday through Friday, from 20 Jul to 31 Jul 2020. Containment and an Under Bridge Inspection Truck will reduce the vertical clearance by three feet. The subject bridge’s vertical clearance at high water is 15 feet, and will be reduced to 12 feet. The containment will be marked with flashing amber lights. The project will involve rigging, sand blasting and painting. Mariners should be cautious of fall hazards. For more information, contact Joanna Lowery at lowreyj@wsdot.wa.gov, or Lefty Helidonis at (360) 280-2879.

---

**WASHINGTON – PUGET SOUND – HOOD CANAL – Naval Test and Evaluation Barge operations**

The Naval Surface Warfare Center Detachment Puget Sound, located at SUBASE Bangor, will be operating with Western Towboat to operate and occasionally moor the Research, Development, Test and Evaluation Barge M241 in the Hood Canal between Misery Point and Carlson Spit. A Western Towboat tug will continuously accompany the barge will be on the moor or underway from approximately 0730 to 1700, Monday through Friday, from 20 Jul to 31 Jul 2020. Questions can be directed to any operating support craft/personnel on VHF-FM channel 13. For more information, contact US Navy POC Dennis Wiechmann at (360) 315-4084 email dennis.e.wiechmann@navy.mil or the Manson Construction superintendent Brian Dorning at (206) 718-8626.

---

**COLUMBIA RIVER – PACIFIC OCEAN TO HARRINGTON POINT – BAKER BAY – West Sand Island remediation project**

There will be an environmental remediation project conducted on West Sand Island in Baker Bay near Ilwaco, Washington, from approximately 22 Jul through 15 Sep 2020. The tug Christie will transport a work barge for mobilization and deployment of machinery and equipment from Tongue Point (46-11-49.58N, 123-45-44.31W) to the Northwest Corner of West Sand Island (46-16-54.93N, 124-02-14.64W). The landing craft Flasher will be moored at Port of Ilwaco and provide daily crew transport trips to and from West Sand Island. Operations on West Sand Island will typically occur Monday-Friday during daylight hours along the North and East shorelines. Mariners are requested to use caution and reduce wake when transiting the area. Tug boats and work boats will be monitoring VHF Channel 13. For additional information, contact Aquatic Contracting at (541) 740-3270.
SNAKE RIVER – OXBOW – Mining operations
Underwater mining operations will be conducted in the Snake River near Oxbow in Baker County, Oregon from 15 Jul through 25 Sep 2020. The operation will include divers deployed from a boat on the Oregon side of the river in approximate position 44-58-50.387 N, 116-51-30.470 W. Boaters in the area should use caution and reduce speed in the vicinity of these operations. For more information or to contact the onscene supervisor, call Ken Dye at (503) 709-5552.

SECTION II - DISCREPANCIES
This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

#### Advance Notice(s)

**COLUMBIA RIVER – CRIMS ISLAND TO VANCOUVER – Testing of LED Range Lights (Revised from LNM 49/19)**

The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The remaining change is expected to occur during the spring or summer of 2020:

- **Kalama Upper Range Rear Light** (LLNR 10920) the intensity will be increased to match the Range Front Light.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Charts: 18524 18525

LNM: 52/19

---

**COLUMBIA RIVER – LAKE UMATILLA – BLALOCK ISLAND TO MCNARY DAM - Testing of LED Range Lights**

The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The changes are expected to occur during the summer or fall of 2020:

- **Irrigon Lower Range Front Light 60** (LLNR 12655) the high intensity beam will be increased from 1° to 3° and the intensity of the light will be increased.

- **Irrigon Lower Range Rear Light (LLNR 12660)** the intensity will be increased to match the Range Front Light.

- **Irrigon Middle Range Front Light 67** (LLNR 12690) the high intensity beam will be increased from 1° to 3° and the intensity of the light will be increased.

- **Irrigon Middle Range Rear Light (LLNR 12695)** all characteristic and intensity will remain the same.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Chart 18539
The U.S. Coast Guard is testing LED combination lantern systems to replace the incandescent lanterns at the locations listed below. The changes are expected to occur during the summer or fall of 2020:

McGuire Range Front Light 60 (LLNR 13655) the high intensity beam will be increased from 1° to 3°. The intensity of the high intensity beam will remain the same, but the intensity of the 360° light will increase.

McGuire Range Rear Light (LLNR 13660) all characteristic and intensity will remain the same.

Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Chart 18546

WASHINGTON – APPROACHES TO STRAIT OF JUAN DE FUCA – QUILLAYUTE RIVER – Temporary change of Quillayute River Direction Light

Due to equipment failure, the U.S. Coast Guard has temporarily changed the lighting characteristic of Quillayute River Direction Light (LLNR 16090) from a three color sector light to a yellow occulting light, flashing every 4 s (Oc Y 4s). This aid will be lighted 24 hours a day and have an arc of visibility of 1.5° degrees either side of the bearing of 005.5° true to the light. Chart and Light List corrections have been published in Local Notice to Mariners 49/19. Mariners are encouraged to share comments on this change and the performance and operation of this aid to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

Chart 18480

WASHINGTON - STRAIT OF JUAN DE FUCA ENTRANCE - Disestablishment of Duntze Rock Lighted Bell Buoy 2

The U.S. Coast Guard is disestablishing Duntze Rock Lighted Bell Buoy 2 (LLNR 765-16150) as it is considered no longer necessary to the safe navigation of the waterway. The Synthetic AIS (S-AIS) signal will be converted to a Virtual AIS (V-AIS) and will remain, being broadcast on the currently assigned position. Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

Charts: 18460 18480

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

Proposed Change Notice(s)

COLUMBIA RIVER – CRIMS ISLAND TO ST. HELENS –Suspension of the establishment of the seasonal Columbia City Lighted Buoy 75A

The U.S. Coast Guard is proposing to not establish Columbia City Lighted Buoy 75A (LLNR 11027) seasonal aid to navigation in 2020. Columbia City Lighted Buoy 75A is established yearly from 15 August through 01 October to mark the Oregon side of the navigation channel boundary during the fishing season. As the 2020 Salmon Season has been suspended, the need for this lighted buoy is no longer necessary, and its placement restricts the waterway for larger draft vessels. Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil.

Chart 18524

WASHINGTON – STRAIT OF JUAN DE FUCA – EASTERN PART - ADMIRALTY INLET – Removal of the RACON on Puget Sound Traffic Separation Lane Lighted Buoy “SA”

The U.S. Coast Guard is proposing to remove the Raccon from Puget Sound Traffic Separation Lane Lighted Buoy “SA” (LLNR 16405) due to the consistent failure of the signal and that it is no longer considered necessary for safe navigation of the waterway. Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

Charts: 18440 18441 18471

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

SUMMARY OF BRIDGE LIGHTING DISCREPANCIES AND CORRECTIONS

The summary of Bridge Lighting Discrepancies and Corrections is listed as Enclosure (1) of this Local Notice to Mariners.
SUMMARY OF BRIDGE LIGHTING DISCREPANCIES AND CORRECTIONS

The summary of Dredging Operations is listed as Enclosure (2) of this Local Notice to Mariners.

SUMMARY OF DREDGING OPERATIONS

The summary of Marine Events is listed as Enclosure (3) of this Local Notice to Mariners.

SUMMARY OF MARINE EVENTS

OREGON – COOS BAY – McCullough Highway Bridge Notice

ODOT will be painting and preserving the McCullough Highway Bridge (US 101) (LLNR 9009) at North Bend, Oregon, across Coos Bay, mile 9.5, from 01 Apr 2019 through 31 Mar 2021, from 0700-1900 seven days per week. The subject bridge provides 148 feet of vertical clearance, which will be reduced to 145.5 feet with the containment system. The containment will be marked with flashing amber lights. Mariners may transit under the bridge at any time, but are advised to use caution for fall hazards. For additional information, contact Nick Frangopolous at (330) 540-1008 or vimaspainting@aol.com.

Chart 18587

LNM: 30/20

COLUMBIA RIVER – PACIFIC OCEAN TO HARRINGTON POINT – St. Johns Railroad Bridge deviation

The Coast Guard has approved a temporary deviation from the operating schedule that governs the St. Johns Railroad Bridge (LLNR 14573) at Warrenton, Oregon, from 11 Mar 2019 through Nov 2021. Mariners are advised that there will be barges and assist vessels at the work site and a containment system under the bridge reducing vertical clearance. There will be no containment system under the liftspan of the bridge, and the main channel will remain clear for traffic, with no change to the operation of the lift. Mariners are requested to use slow speed to minimize wake. Interested parties can contact the on-site construction manager, Craig Gries at (503) 580-6319 or email at cgries@orstbridge.com

Chart 18521

LNM: 11/19

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Interstate 5 Highway Bridge deviation

The Coast Guard has approved a temporary deviation from the operating schedule that governs the Interstate 5 Highway Bridge (LLNR 11258) across the Columbia River at mile 106.5 between Vancouver, Washington and Portland, Oregon. In order to facilitate a major repair to the lift mechanism of the northbound span, the bridge need not open to mariners from 10 Sep through 22 Sep 2020. A safety zone will be established around the draw span for construction equipment, and mariners will not be able to transit through the main channel. The Barge Channel North and Alternate Barge Channel South will remain available to mariners during this deviation. A graphic representation of the project was included as enclosure (4) to LNM 21/20 which provided more details. For additional information or questions, please contact ODOT, Ben White, at (503) 731-8517 or email Benjamin.White@odot.state.or.us

Charts: 18525 18531

LNM: 10/19

COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Bridge construction

Advanced American Construction (AAC) will be conducting bridge construction in the Columbia River at the mouth of Little White Salmon River / Drano Lake, near RM 162. Operations include pile driving and work is expected to occur from 06 Jan 2020 to 04 Feb 2021. AAC's Derrick Barge DB 4100, tug Lindy Marie, and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 through 1800, Monday through Saturday. The floating equipment will remain on-station during non-working hours and will be illuminated at night by fixed white lights on all corners. Mariners are asked to transit the area with extreme caution and minimize wake. Please contact Shad Huber at (360) 953-4833 and email Shadh@callAAC.com or Todd High at (503) 572-0101 and email Toddh@callAAC.com with any questions.

Chart 18532

LNM: 18/20

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – St. Johns Railroad Bridge deviation

The Coast Guard has approved a temporary deviation from the operating schedule that governs the St. Johns Railroad Bridge (LLNR 14927.5) across the Willamette River at mile 6.9 at Portland, Oregon, wherein on 10 Aug to 03 Sep 2020 from 0900-1500 on Monday – Thursday the bridge will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. For additional information contact Jeff Swanson at Jeff.Swanson@BNSF.com.

Chart 18526

LNM: 51/19

OREGON – WILLAMETTE RIVER – PORT OF PORTLAND – Steel Bridge deviation

The Coast Guard has approved a temporary deviation from the operating schedule that governs the Steel Railroad-Highway Bridge (LLNR 14955.3) across the Willamette River at mile 12.1 at Portland, Oregon, wherein on 02 – 29 Aug 2020 the upper deck of the bridge need not open for maritime traffic. The upper deck will open given 72 hours advance request. The lower lift span of the Steel Bridge operates in accordance with 33 CFR 117.5 (open on single). When the lower lift is in the closed-to-navigation position, the bridge provides 26 feet of vertical clearance above Columbia River Datum 0.0; and in the open-to-navigation position with the upper lift in the closed-to-navigation position, the vertical clearance is 71 feet above Columbia River Datum 0.0. The Steel Bridge will be able to open the lower deck for emergencies, but not the upper deck. This part of the Willamette River does not have an immediate alternate route for vessels to pass. Vessels may continue to transit beneath the Steel Bridge with the lower deck in the closed or open-to-navigation position, or the upper deck in the closed-to-navigation position may do so at any time. The normal operating schedule for the Steel Bridge upper lift is in accordance with 33 CFR § 117.897(c)(3)(ii). In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. For additional information contact Theresa Minor at (503) 962-2254.

Chart 18526

LNM: 23/20

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – 1st Avenue Bridge deviation

The Coast Guard has approved a deviation from the operating schedule that governs the 1st Avenue South Highway Twin Bridge (LLNR 16887)
WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – DUWAMISH WATERWAY – 1st Avenue Bridge deviation

across the Duwamish Waterway, mile 2.5, in Seattle, Washington. This deviation authorizes the bridge to operate in single leaf mode or half span openings from 2100 to 0500 nightly, Sunday – Friday, from 06 Jul - 14 Sep 2020. The deviation is necessary to accommodate WSDOT’s bridge roadway deck panel replacements. No work is planned on Saturday nights, unless delays require it. The subject bridge shall fully open (double bascule) on signal when at least 12 hours’ notice has been given. If an emergency response vessel needs a full opening, the crew needs at least 45 minutes to clear the span. Containment will be installed under half of the 1st Ave Bridge, but will not reduce the vertical clearance. An Under Bridge Inspection Truck (UBIT) truck will be used to aid the work efforts, and will reduce the vertical clearance up to 13 feet from 39 feet center to 26 feet center, and from 22 feet to 9 feet on the sides. The UBIT will move around the bridge, but will only take up a small section the bridge. The UBIT will move for vessel traffic when required, and is identified with a flashing amber light. Additionally, the subject bridge need not open on signal to vessels of 5000 gross tons and over, a vessel towing a vessel of 5000 gross tons and over, and a vessel proceeding to pick up for towing a vessel of 5000 gross tons and over. Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. For additional information contact Curtis Pitts at (206) 718-6845.

WASHINGTON – WASHINGTON – LAKE WASHINGTON SHIP CANAL – George Washington Memorial Bridge Notice (Revised from LNM 01/18)
Washington State Department of Transportation will be conducting painting and preservation operations on the George Washington Memorial Bridge (Aurora Avenue Bridge) (LLNR 18184). The work will be conducted from 01 Apr 18 through 31 Oct 20. Hours of work will be from 0700 to 1900, Monday through Saturday. The subject bridge provides 135 feet of vertical clearance will be reduced to 125 feet for containment. The containment will be marked with flashing yellow lights and signage. Half of the 150 feet of horizontal clearance will have containment. Mariners may transit under the bridge at any time, and are advised to use caution while transiting the area. For additional information, contact Nick Hadsell, PM, at (330) 402-3232 or nhadsell@libertymaintenanceinc.com.

Chart 18447
LNM: 26/18

WASHINGTON – LAKE WASHINGTON – Bridge Notice

The Coast Guard has approved a temporary deviation from the operating schedule that governs the University Street Bridge (LLNR 18235), across the Lake Washington Ship Canal in Seattle at mile 4.3. The University Bridge is authorized to operate in single leaf mode (half of the span) from 0900 to 1500 daily from 20 Jul to 14 Aug 2020. The subject bridge shall operate in single leaf when signaled for an opening. A full opening may be given with a one-hour notice. The bridge shall open half the span for responding emergency vessels, but may give a full opening upon request. After 1500 each day, the bridge will return to full operations. A service barge will be moored under the subject bridge to operate a lift boom, and will be lighted per Coast Guard regulations. The service barge will occupy 20 feet of the Ship Canal. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. The deviation is necessary to fulfill a federal mandate and has been rescheduled to complete the work after being delayed due to COVID19 delays. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. For additional information, contact Kit Loo at (206) 684-3669, or kit.loo@seattle.gov.

Chart 18447
LNM: 26/20

WASHINGTON – LAKE WASHINGTON – Lake Union – Fairview Avenue Bridge Notice (Revised from LNM 18/19)
Preliminary work to install a turbidity curtain for the Fairview Avenue Bridge Replacement project started on 12 Apr 2019. This turbidity curtain will remain in Lake Union waters 24 hours a day for the duration of the project, projected to run through early 2021. Navigation warning lights are installed on top of flotation logs indicating the location of the turbidity curtain. The bridge will be closed to all road traffic and in-water work will commence on 16 Sep 2019. Navigation is not allowed across or beyond the turbidity curtain which indicates the beginning of an active construction zone. The turbidity curtain is located on waterway 8 in front of the Zymo Genetics building and spans the waterway between Seattle Seaplanes and Windermere Real Estate. For more information contact Chris Barnes, SDOT Construction Engineer, (206) 234-1404, and email chris.barnes@seattle.gov

LNM: 33/19

WASHINGTON – LAKE WASHINGTON – Union Bay Reach – SR 520 West Approach Bridge South Bridge Replacement (Revised from LNM 38/19)
American Bridge Company will be constructing a temporary work trestle for the State Route (SR) 520 West Approach Bridge South project in southern Union Bay from 04 Nov 2019 through 29 Jan 2021. The temporary work trestle will be left in place through October 2022 and used for constructing the new Approach Bridge. The limits of the temporary work trestle extend from the bridge abutment to approximately 1,100ft west of the west navigation channel. Mariners are advised to transit with caution when navigating near the project area and be aware that no boaters are permitted between the active work zone and work trestles at any time. For more information contact Dennis Suh at (504) 206-6494 or email at dsuh@americanbridge.net.

LNM: 40/19

WASHINGTON – Lake Washington – Sammamish River – Bridge Notice

Construction has started on the West Sammamish River Bridge at Sammamish River mile 0.5 near Kenmore, Washington, and will continue through October 2023. The western bridge will be removed and a new bridge constructed. Mariners may transit through the construction zone, but are advised that temporary work piers will be constructed on the west side of the bridge, and will reduce the horizontal span to 40 feet of clearance. Containment will be installed under the bridge reducing the vertical clearance from 11.5 feet to 10.5 feet measured at OHW. Working hours will normally be from 0700 to 1600 five days per week. If construction falls behind schedule, the work hours may shift to 24 hours/seven days per week. For more information regarding construction, contact Jake Brockmoller at (253) 888-2514, or Mick Cannon at (253) 377-1041.

LNM: 13/20

WASHINGTON – Puget Sound – Anacortes to Skagit Bay – Deception Pass – Bridge Notice

WSDOT will be cleaning, painting and repairing the bridges over Deception Pass and Canoe Pass south of Anacortes. The work is expected to begin at 0600 on 01 Apr 2019 and be complete by 2000 on 31 Oct 2020. The Deception Pass Bridge has a vertical clearance of 144 feet, and the vertical clearance under the Canoe Pass Bridge is 154 feet. No in-water work will be conducted, and a full containment system will be employed, however, mariners are cautioned that fall hazards will exist. For further information on this project contact the Project Engineer, Shane Spahr, at (360) 848-7103 or email spahr@wsdot.wa.gov.

LNM: 06/19
COLUMBIA RIVER – SNAKE RIVER - 2020 summer lockage schedule for recreational vessels

The USACE, Walla Walla District, is implementing the 2020 summer lockage schedule for the passage of recreational vessels through the following navigation locks:
- McNary Lock and Dam, Columbia River Mile 292 (541) 922-2231
- Ice Harbor Lock and Dam, Snake River Mile 9.7 (509) 543-3231
- Lower Monumental Lock and Dam, Snake River Mile 41.6 (509) 282-7231
- Little Goose Lock and Dam, Snake River Mile 70.3 (509) 399-2233 x231
- Lower Granite Lock and Dam, Snake River Mile 107.5 (509) 843-2231

The following annual recreational craft lockage schedules will be implemented for all the locks beginning 04 Jun through 14 Sep 2020:

Upstream Direction Times: 0900, 1200, 1500, 1800, 2100
Downstream Direction Times: 0930, 1230, 1530, 1830, 2130

Note: From 04 Jun through 02 Jul, Little Goose lockage times may take as long as 45 minutes.

SNAKE RIVER – LAKE SACAJAWEA AND LAKE HERBERT G. WEST AND LAKE BRYAN – Upstream floating guidewall restrictions (Revised from LNM 16/20)

Until further notice, vessels transiting the Snake River navigation locks must use caution when operating near the upstream floating guidewalls at several of the projects:
- Ice Harbor Lock and Dam, Snake River Mile 9.7; vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor may they use the guidewall as a pivot for entering the lock.
- Lower Monumental Lock and Dam, Snake River Mile 41.6, vessels may not tie up to or rub against the floating guidewall when approaching or leaving the lock, nor should they use the guidewall as a pivot for entering the lock.
- Little Goose Lock and Dam, Snake River Mile 70.3, vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor may they use the guidewall as a pivot for entering the lock.
- Lower Granite Lock and Dam, Snake River Mile 107.5, vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor should they use the guidewall as a pivot for entering the lock.
- Lower Granite Lock and Dam, Snake River Mile 107.5, vessels may not tie up to or rub against the upstream floating guidewall when approaching or leaving the lock, nor may they use the guidewall as a pivot for entering the lock.

These restrictions will remain in place until more substantial repairs can be made to the locks’ floating guidewall cables. For additional information on this work, contact the Operations Division at (509) 527-7364.

SNAKE RIVER – LAKE SACAJAWEA TO LAKE HERBERT G. WEST - Snake River Minimum Operating Pool operations

Beginning 03 Apr 20, the Snake River reservoirs will transition to Minimum Operating Pool (MOP) operations and spring spill for fish passage in accordance with the 2020 Fish Operations Plan. The facilities affected are: McNary Lock and Dam (Columbia River mile 292); Ice Harbor Lock & Dam (RM 9.7); Lower Monumental Lock & Dam (RM 41.6); Lower Granite Lock & Dam (RM 107.3); and variable MOP at Lower Granite Lock & Dam (RM 107.3). The MOP ranges for each Snake River pool are listed below, with the elevations referenced to the North American Vertical Datum of 1929 and the Pool Elevation listed in feet:

Because State water quality standards have changed since 2019, there may be a higher rate of discharge through the dam spillways compared to previous years, and river navigators may experience currents and eddies in the tailrace not previously encountered. If navigators believe river conditions inhibit safe navigation to or from a lock, they may request a temporary adjustment to spill using the contact information below. Contact with lock and dam shift operators should be initiated no less than 30 minutes prior to arriving at the lock, as a requested redistribution or reduction of spill may take as long as 30 minutes to attenuate. Additionally, downstream departures may be delayed for the requested spill change to be implemented and take effect. Navigators are encouraged to contact dam operators and report any unsafe navigation conditions. For additional...
OREGON – YAQUINA HEAD TO COLUMBIA RIVER – Underwater cable installation
SUBCOM is scheduled to conduct underwater fiber optic cable installation off the northern Oregon coast, from a starting point between Cape Lookout and Cape Kiwanda offshore for 375 nautical miles. The Cable Ship DECISIVE will conduct the work which is expected to occur between 22 Jul and 23 Aug 2020, following a route starting at approximately 45-16.03.84N, 124-03.54.060W and moving toward 44-01.26.598N, 132-39.52.4.06W. C/S DECISIVE, call sign V7D7, can be hailed on VHF-FM channel 16, and she will be restricted in her ability to maneuver during these operations. For more information, contact the ship via email at csdcmaster@subcom.com

LNM: 24/20

OREGON – CRIMS ISLAND TO SAINT HELENS – Stella Range and the centerline of Stella Channel (Revised from LNM 17/20)
Stella Range Rear Light (LLNR 10665) was rebuilt in February 2020 and relocated 21 feet in the direction of 352.3° true to correct a previous error that caused the Stella Range to be misaligned from the US Army Corps of Engineers channel centerline coordinates. After the rebuild of the rear range structure it was found that the new rangeline differs from the Stella Channel centerline by 281.9 feet to the left or southwest of the channel center when at the upriver (southeast) entrance to the channel near river mile 60, and 16 feet to the left or southwest when at the down river (northwest) entrance to the channel near river mile 57. Upon further investigation, it was determined that the Stella Range Front Light (LLNR 10660) position was inaccurate causing the deviation. Mariners should use caution while navigating Stella Range, be aware of this anomaly, and continue to use all available means to determine their vessel’s position. The Coast Guard is working to incorporate a rebuild of the Stella Range Front Light in a future construction project.

LNM: 20/20

OREGON – PORT OF PORTLAND – WILLAMETTE RIVER – Underwater research activities
The Research Vessels Nancy Anne and Peter R will be conducting sediment sampling operations in the Portland Harbor between Willamette River miles 10.9 - 11.6 from 01 Jun – 31 Aug 2020. Sampling operations will occur from 0700 to 1900 daily, Monday through Saturday. The R/V will be deployed in location 46-10-28.500N, 123-06-22.800W, which is at RM 57.5, on the Oregon side of the river, abeam of Crims Island Dike Light 6 (LLNR 10685), approximately 250 yards outside of the navigational channel. The buoy is yellow in color, cylindrical in shape, and will be lit with a yellow light flashing with 5 1-second flashes every 20 seconds (FL Y S 2bc). For more information, contact NOAA’s Drew Maczko at (206) 526-6918 or email Drew.Maczko@noaa.gov.
Chart 18254
LNM: 11/20

OREGON – PORT OF PORTLAND – WILLAMETTE RIVER – Dredging and capping project
HME Construction will conduct operations for the Former Portland Gas Manufacturing Site Dredging and Capping Project on the Willamette River from 06 Jul to 05 Oct 2020. Operations include debris removal, dredging, and sediment cover. The main project site is the west side of the Willamette River, mile 12.1- 12.3 between the Burnside (LLNR 14955.5) and Steel bridges (LLNR 14955.3). Equipment onsite will be the dredge Sea Hawk, Excavator, pontoon barge, miscellaneous barges and tugs. Additionally, sediment amending will occur at the Port of Portland Terminal 4, Berth 416 on the east side of the Willamette River, mile 4.8-5.0. Equipment at this location will be the derrick dredge Sea Vulture and miscellaneous barges. The dredges Sea Hawk and Sea Vulture will display proper day shapes and lights, operate VHF-FM channel 67 and monitor channels 13 and 16. Operations will be performed approximately 10 hours per day, Monday - Saturday. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. The onsite superintendent, Justin Bay, can be reached at (360) 904-2978.
Chart 18256
LNM: 22/20

OREGON – WILLAMETTE RIVER – PORTLAND TO WALNUT EDDY – ROCK ISLAND CHANNEL – Floating aids to navigation
Mariners are advised to exercise extra caution and proceed at a safe speed when navigating the Rock Island Channel section of the Willamette River, mile 29.5 to 30.7. Prudent mariners will not rely solely on any single aid to navigation, particularly buoys, whose position is not permanently fixed. Due to the predominantly rocky riverbed in this area, the Rock Island Channel buoys are susceptible to moving off their assigned position. Additionally, sections of Rock Island Channel are very narrow and contain multiple hazards, requiring the buoys to be positioned very close to the hazards they mark. Passing close aboard to a buoy risks collision with the buoy or with the hazard the buoy is marking.

WASHINGTON – STRAIT OF JUAN DE FUCA – Port of Vancouver Canada 2020 Voluntary Lateral Displacement Program
As of 01 Jun 2020, the ECHO Program voluntary inshore lateral displacement is in effect for all tug and barge vessels transiting the Canadian inshore area of the Strait of Juan de Fuca. If it is safe and operationally feasible to do so, tugs are requested to move south of the known killer whale.
WASHINGTON – STRAIT OF JUAN DE FUCA – Port of Vancouver Canada 2020 Voluntary Lateral Displacement Program

feeding area and navigate either through the outbound shipping lane or the inshore lateral displacement zone, while maintaining a buffer distance of 1,000 meters from the traffic separation scheme (TSS). The inshore lateral displacement zone is 1,500 meters wide and occurs in the area between 123-52-21.192W, 48-18-37.332N and 124-31-33.378W, 48-28-53.316N, covering a distance of approximately 28 NM. The ECHO Program voluntary lateral displacement initiative aims to reduce underwater noise in known southern resident killer whale feeding areas along the northern edge of the Strait of Juan de Fuca. This initiative will remain in effect through 31 Oct 2020. See enclosure (4) of LNM 25/20 for more information on the program as well as a chartlet of the displacement zone. For more detailed information related to lateral displacement and the ECHO program, visit the following address: https://www.portvancouver.com/environment/water-land-wildlife/echo-program/projects/lateraldisplacement/

WASHINGTON – STRAIT OF GEORGIA AND STRAIT OF JUAN DE FUCA – Acoustic research buoys

SMRU Consulting will be testing acoustic buoys in three locations in the Middle Bank and Heink Bank areas south of San Juan Island, from 01 Jun until 01 Nov 2020. The buoys will be monitoring underwater acoustic noise, and will be located in the following approximate positions: (A) 48-24-25.0452N, 122-58-51.8952W (B) 48-23-6.1728N, 123-7-28.7112W (C) 48-19-54.012N, 123-4-25.955W. A chart graphic was included as Enclosure (4) of LNM 11/20. Buoys are 2-feet diameter, yellow in color, marked with a FL Y 6s (flashing yellow six second) light and an orange flag. Mariners are requested to keep a safe distance from the buoy. For additional information, contact Jason Wood at (306) 298-0166 or jw@smriconsulting.com.

Chart 18421

WASHINGTON – PUGET SOUND – ELLIOTT BAY - Colman Dock construction

Washington State Ferries is conducting demolition and construction operations at the Colman Docks, scheduled to be completed in the summer of 2022. Operations will be conducted from 0700 to 1700, Monday through Friday. Mariners should be aware of marine construction equipment moored around the Colman Dock and regular tows up and down the Duwamish River in support of the operation. Equipment may obstruct small sections of the waterway adjacent to Colman Dock. Water quality monitoring will be taking place during construction operations. Please direct any inquiries to WSF Communications at (206) 402-8070 or email wsfcomms@wsdot.wa.gov.

Charts 18450

WASHINGTON – PUGET SOUND – ELLIOTT BAY – Terminal 5 pier construction

Orion Marine will be performing pile removal, demolition of structures, and new pier construction for the Terminal 5 Berth Modernization Project for the Port of Seattle on the Duwamish River west waterway. Phase 1 will start 22 Jul 2019 and run through 31 Dec 2020 and phase 2 will run from Jun 2021 through Mar 2023. Work will typically take place from 0700 to 1700, Monday thru Friday. The DB Rainier and DB St. Helens, will each have a material barge moored alongside and will always remain on site. Each floating plant will have all corners marked with steady burn white lights. The DBs will run on anchors at times so mariners are requested to keep at least a 200-foot distance. The crane and tugs will monitor VHF-FM channel 13. For additional information please contact Bradley Morlock at (253) 552-1140 or email bmorlock@orionmarinergroup.com.

Chart 18450

WASHINGTON – PUGET SOUND – APPLE COVE TO KEYPORT – Submersible Vehicle testing (Revised from LNM 49/19)

The Naval Undersea Warfare Center (NUWC) at Keyport, WA will be continuing operations in the vicinity of NUWC between the Brownsville Marina and Keyport through 23 Dec 2020. Operations will be conducted Monday through Friday during daylight hours. Operations will involve semi-submersible and submersible vessels escorted by a small naval craft with a flashing red light. The small craft will monitor VHF-FM channels 12 and 16. The call sign for the small craft will be “Keyport Range Control”. All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles while the range is in operation. Questions can be directed to Keyport Range Control on VHF-FM channels 12 and 16 or by contacting the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.

Chart 18446

OREGON – WASHINGTON – IDAHO – NOAA’s planned end of paper chart production

On 15 Nov 2019, NOAA formerly announced in the Federal Register (Docket #2019-24807) that they would begin a 5-year process of discontinuing their traditional paper, or raster, charts by 2025. NOAA intends to gradually ‘sunset’ raster chart products and is introducing an option to create custom ENC data based charts that can be printed as a paper copy locally or commercially, via one of their certified third party printers. More detailed information regarding this transition is available from https://nauticalcharts.noaa.gov/publications/docs/raster-sunset.pdf. Comments/questions on the Federal Register Notice and the NOAA Custom Chart application should be submitted at https://www.nauticalcharts.noaa.gov/customer-service/assist/. Other concerns may be directed to your local NOAA Navigation Manager, https://nauticalcharts.noaa.gov/customer-service/regional-managers/index.html. In order to identify and overcome the regulatory challenges associated with this transition including but not limited to updating commercial vessel carriage requirements and maritime safety information processes, NOAA will continue to work directly with its Agency charting partners. A prototype version of the NOAA Custom Chart Tool is available at https://devgis.charttools.noaa.gov/pod/.

Mariners are advised that the start and ending dates for dredging activities may vary due to unforeseen on-site conditions, such as gill net fishing, weather and other factors.

USACE dredges request mariners transit at their slowest safe speed to minimize wake when in the vicinity of a dredge and proceed with caution after passing arrangements have been made. Vessel(s) and/or equipment may encroach into the channel.
