PART 83—RULES

Subpart A—General
§ 83.01 Application (Rule 1).
§ 83.02 Responsibility (Rule 2).
§ 83.03 Definitions (Rule 3).

Subpart B—Steering and Sailing Rules

Conduct of Vessels in Any Condition of Visibility
§ 83.04 Application (Rule 4).
§ 83.05 Look-out (Rule 5).
§ 83.06 Safe speed (Rule 6).
§ 83.07 Risk of collision (Rule 7).
§ 83.08 Action to avoid collision (Rule 8).
§ 83.09 Narrow channels (Rule 9).
§ 83.10 Traffic separation schemes (Rule 10).

Conduct of Vessels in Sight of One Another
§ 83.11 Application (Rule 11).
§ 83.12 Sailing vessels (Rule 12).
§ 83.13 Overtaking (Rule 13).
§ 83.14 Head-on situation (Rule 14).
§ 83.15 Crossing situation (Rule 15).
§ 83.16 Action by give-way vessel (Rule 16).
§ 83.17 Action by stand-on vessel (Rule 17).
§ 83.18 Responsibilities between vessels (Rule 18).

Conduct of Vessels in Restricted Visibility
§ 83.19 Conduct of vessels in restricted visibility (Rule 19).

Subpart C—Lights and Shapes
§ 83.20 Application (Rule 20).
§ 83.21 Definitions (Rule 21).
§ 83.22 Visibility of lights (Rule 22).
§ 83.23 Power-driven vessels underway (Rule 23).
§ 83.24 Towing and pushing (Rule 24).
§ 83.25 Sailing vessels underway and vessels under oars (Rule 25).
§ 83.26 Fishing vessels (Rule 26).
§ 83.27 Vessels not under command or restricted in their ability to maneuver (Rule 27).
§ 83.28 [Reserved] (Rule 28).
§ 83.29 Pilot vessels (Rule 29).
§ 83.30 Anchored vessels and vessels aground (Rule 30).
§ 83.31 Seaplanes (Rule 31).

Subpart D—Sound and Light Signals
§ 83.32 Definitions (Rule 32).
§ 83.33 Equipment for sound signals (Rule 33).
§ 83.34 Maneuvering and warning signals (Rule 34).
§ 83.35 Sound signals in restricted visibility (Rule 35).
§ 83.36 Signals to attract attention (Rule 36).
§ 83.37 Distress signals (Rule 37).

Subpart E—Exemptions
§ 83.38 Exemptions (Rule 38).

Source: USCG—2009–0048, 75 FR 19546, Apr. 15, 2010, unless otherwise noted.
Subpart A—General

§ 83.01 Application (Rule 1).

(a) These Rules apply to all vessels upon the inland waters of the United States, and to vessels of the United States on the Canadian waters of the Great Lakes to the extent that there is no conflict with Canadian law. The regulations in this subchapter (Subchapter E, 33 CFR parts 83 through 90) have preemptive effect over State or local regulation within the same field.

(b) International Regulations.

(i) These Rules constitute special rules made by an appropriate authority within the meaning of Rule 1(b) of the International Regulations for Preventing Collisions at Sea, 1972, including annexes currently in force for the United States ("International Regulations").

(ii) All vessels complying with the construction and equipment requirements of the International Regulations are considered to be in compliance with these Rules.

(c) Special rules. Nothing in these Rules shall interfere with the operation of any special rules made by the Secretary of the Navy with respect to additional station or signal lights and shapes or whistle signals for ships of war and vessels proceeding under convoy, or by the Secretary with respect to additional station or signal lights and shapes for fishing vessels engaged in fishing as a fleet. These additional station or signal lights and shapes or whistle signals shall, so far as possible, be such that they cannot be mistaken for any light, shape, or signal authorized elsewhere under these Rules. Notice of such special rules shall be published in the Federal Register and, after the effective date specified in such notice, they shall have effect as if they were a part of these Rules.

(d) Traffic regulation schemes; vessel traffic service regulations. (d) Traffic separation schemes may be established for the purpose of these Rules. Vessel traffic service regulations may be in effect in certain areas.

(e) Alternative compliance. (e) Whenever the Secretary determines that a vessel or class of vessels of special construction or purpose cannot comply fully with the provisions of any of these Rules with respect to the number, position, range, or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signaling appliances, the vessel shall comply with such other provisions in regard to the number, position, range, or arc of visibility of lights or shapes, as well as to the disposition and characteristics of sound-signaling appliances, as the Secretary shall have determined to be the closest possible compliance with these Rules. The Secretary may issue a certificate of alternative compliance for a vessel or class of vessels specifying the closest possible compliance with these Rules. The Secretary of the Navy shall make these determinations and issue certificates of alternative compliance for vessels of the Navy.

(f) Acceptance of certificates of alternative compliance from contracting parties to International Regulations. (f) The Secretary may accept a certificate of alternative compliance issued by a contracting party to the International Regulations if it determines that the alternative compliance standards of the contracting party are substantially the same as those of the United States.

(g) The operator of each self-propelled vessel 12 meters or more in length shall carry, on board and maintain for ready reference, a copy of these Rules.

§ 83.02 Responsibility (Rule 2).

(a) Exoneration. Nothing in these Rules shall exonerate any vessel, or the owner, master, or crew thereof, from the consequences of any neglect to comply with these Rules or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

(b) Departure from rules when necessary to avoid immediate danger. (b) In construing and complying with these Rules due regard shall be had to all dangers of navigation and collision and to any special circumstances, including the limitations of the vessels involved, which may make a departure from these Rules necessary to avoid immediate danger.

§ 83.03 General Definitions (Rule 3).

For the purpose of these Rules and this Subchapter E, except where the context otherwise requires:

(a) Vessel The word vessel includes every description of water craft, including non displacement, WIG craft and seaplanes, used or capable of being used as a means of transportation on water.

(b) Power The term power-driven vessel means any vessel propelled by machinery.

(c) Sailing The term sailing vessel means any vessel under sail provided that propelling machinery, if fitted, is not being used.

(d) Engaged in fishing The term vessel engaged in fishing means any vessel fishing with nets, lines, trawls, or other fishing apparatus which restricts maneuverability, but does not include a vessel fishing with trolling lines or other fishing apparatus which do not restrict maneuverability.

(e) Seaplane The word seaplane includes any aircraft designed to maneuver on the water.

(f) Not under command The term vessel not under command means a vessel which, through some exceptional circumstance, is unable to maneuver as required by these Rules and is therefore unable to keep out of the way of another vessel.

(g) Restricted in her ability to maneuver The term vessel restricted in her ability to maneuver means a vessel which, from the nature of her work, is restricted in her ability to maneuver as required by these Rules and is therefore unable to keep out of the way of another vessel. The term vessels restricted in their ability to maneuver include, but are not limited to:

(1) A (i) a vessel engaged in laying, servicing, or picking up a navigation mark, submarine cable, or pipeline;
(2) A (ii) a vessel engaged in dredging, surveying, or underwater operations;
(3) A (iii) a vessel engaged in replenishment or transferring persons, provisions, or cargo while underway;
(4) A (iv) a vessel engaged in the launching or recovery of aircraft;
(5) A (v) a vessel engaged in mine clearance operations; and
(6) A (vi) a vessel engaged in a towing operation such as severely restricts the towing vessel and her tow in their ability to deviate from their course.

(h) Reserved [Reserved]

(i) The word underway means that a vessel is not at anchor, or made fast to the shore, or aground.
In determining a safe speed the following factors shall be among those taken into account:

- By all vessels:
  1. The term restricted visibility means any condition in which visibility is restricted by fog, mist, falling snow, heavy rainstorms, sandstorms, or any other similar cause.
  2. The term Wing-In-Ground (WIG) craft means a multimodal craft which, in its main operational mode, flies in close proximity to the surface by utilizing surface-effect action.

- Western Rivers means the Mississippi River, its tributaries, South Pass, and Southwest Pass, to the navigational demarcation lines dividing the high seas from harbors, rivers, and other inland waters of the United States, and the Port Allen-Morgan City Alternate Route, and that part of the Atchafalaya River above its junction with the Port Allen-Morgan City Alternate Route including the Old River and the Red River.
  - Great Lakes means the Great Lakes and their connecting and tributary waters including the Calumet River as far as the Thomas J. O’Brien Lock and Controlling Works (between mile 326 and 327), the Chicago River as far as the east side of the Ashland Avenue Bridge (between mile 321 and 322), and the Saint Lawrence River as far east as the lower exit of Saint Lambert Locks.
  - Secretary means the Secretary of the Department in which the Coast Guard is operating.
  - Inland Waters means the navigable waters of the United States shorward of the navigational demarcation lines dividing the high seas from harbors, rivers, and other inland waters of the United States and the waters of the Great Lakes on the United States side of the International Boundary.
  - Inland Rules or Rules means these Inland Navigational Rules and the annexes thereto, which govern the conduct of vessels and specify the lights, shapes, and sound signals that apply on inland waters and.
  - International Regulations means the International Regulations for Preventing Collisions at Sea, 1972, including annexes currently in force for the United States.

Subpart B—Steering and Sailing Rules
Conduct of Vessels in Any Condition of Visibility

§ 83.04 Application (Rule 4).
Rules in this subpart 4 through 10 (§§ 83.04 through 83.10) apply in any condition of visibility.

§ 83.05 Look-out (Rule 5).
Every vessel shall at all times maintain a proper look-out by sight and hearing as well as by all available means appropriate to the prevailing circumstances and conditions so as to make a full appraisal of the situation and of the risk of collision.

§ 83.06 Safe speed (Rule 6).
Every vessel shall at all times proceed at a safe speed so that she can take proper and effective action to avoid collision and be stopped within a distance appropriate to the prevailing circumstances and conditions.

In determining a safe speed the following factors shall be among those taken into account:

(a) By all vessels:
  1. The state of visibility;
  2. The traffic density including concentration of fishing vessels or any other vessels;
  3. The maneuverability of the vessel with special reference to stopping distance and turning ability in the prevailing conditions;
  4. At night, the presence of background light such as from shores lights or from back scatter of her own lights;
  5. The state of wind, sea, and current, and the proximity of navigational hazards;
  6. The draft in relation to the available depth of water.

(b) Additionally, by vessels with operational radar:
  1. The characteristics, efficiency and limitations of the radar equipment;
  2. Any constraints imposed by the radar range scale in use;
  3. The effect on radar detection of the sea state, weather, and other sources of interference;
  4. The possibility that small vessels, ice and other floating objects may not be detected by radar at an adequate range;
  5. The number, location, and movement of vessels detected by radar;
  6. The more exact assessment of the visibility that may be possible when radar is used to determine the range of vessels or other objects in the vicinity.

§ 83.07 Risk of collision (Rule 7).
(a) Determination of risk exists.
Every vessel shall use all available means appropriate to the prevailing circumstances and conditions to determine if risk of collision exists. If there is any doubt such risk shall be deemed to exist.
(b) Proper use shall be made of radar equipment if fitted and operational, including long-range scanning to obtain early warning of risk of collision and radar plotting or equivalent systematic observation of detected objects.
(c) Scanty information.
Assumptions shall not be made on the basis of scanty information, especially scanty radar information.
(d) In determining if risk of collision exists the following considerations shall be among those taken into account:
  1. Such risk shall be deemed to exist if the compass bearing of an approaching vessel does not appreciably change;
  2. Such risk may sometimes exist even when an appreciable bearing change is evident, particularly when approaching a very large vessel or a tow or when approaching a vessel at close range.

§ 83.08 Action to avoid collision (Rule 8).
§ 83.09 Narrow channels (Rule 9).

(a) Keeping clear to avoid collision. Any vessel proceeding along the course of a narrow channel or fairway shall keep as near to the outer limit of the channel or fairway which lies on her starboard side as is safe and practicable.

(b) Vessels of less than 20 meters in length. A vessel of less than 20 meters in length shall not impede the passage of a vessel which can safely navigate only within a narrow channel or fairway.

(c) Vessels engaged in fishing. A vessel engaged in fishing shall not impede the passage of any other vessel navigating within a narrow channel or fairway.

(d) Action to avoid collision. A vessel shall not cross a narrow channel or fairway if such crossing impedes the passage of a vessel which can safely navigate only within that channel or fairway. The latter vessel shall use the danger signal prescribed in Rule 34(d) (§ 83.34(d)) if in doubt as to the intention of the crossing vessel.

§ 83.10 Traffic separation schemes (Rule 10).

(a) Obligations under other Rules unaffected. This Rule applies to traffic separation schemes and does not relieve any vessel of her obligation under any other Rule in subchapter E.

(b) Duties for vessel using scheme. A vessel using a traffic separation scheme shall:

(i) Proceed in the appropriate traffic lane in the general direction of traffic flow for that lane;

(ii) So far as practicable keep clear of a traffic separation line or separation zone;

(iii) Normally join or leave a traffic lane at the termination of the lane, but when joining or leaving from either side shall do so at as small an angle to the general direction of traffic flow as practicable.

(c) Crossing traffic lanes. A vessel shall, so far as practicable, avoid crossing traffic lanes but if obliged to do so shall cross on a heading as nearly as practicable at right angles to the general direction of traffic flow.

(d) Limit of inshore traffic zone. A vessel shall not use an inshore traffic zone when she can safely use the appropriate traffic lane within the adjacent traffic separation scheme. However, vessels of less than 20 meters in length, sailing vessels, and vessels engaged in fishing may use the inshore traffic zone.
§ 83.13 Overtaking (Rule 13).

(a) Keeping out of the way. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other as follows:

(i) When each has the wind on a different side, the vessel which has the wind on the port side shall keep out of the way of the other;

(ii) When both have the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward;

(iii) If a vessel with the wind on the port side sees a vessel to windward and cannot determine with certainty whether the other vessel has the wind on the port or on the starboard side, she shall assume that it does exist and act accordingly.

(b) A vessel shall be deemed to be overtaking when coming up with another vessel from a direction more than 22.5 degrees abaft her beam; that is, in such a position with reference to the vessel she is overtaking, that at night she would be able to see only the sternlight of that vessel but neither of her sidelights.

(c) Any subsequent alteration of the bearing between the two vessels shall not make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

(d) Notwithstanding paragraph (d) of this Rule, a vessel may use an inshore traffic zone when en route to or from a port, offshore installation or structure, pilot station, or any other place situated within the inshore traffic zone, or to avoid immediate danger.

Rule 14

(a) Course alterations to starboard or port side passage. Unless otherwise agreed, when two power-driven vessels are meeting on reciprocal or nearly reciprocal courses so as to involve risk of collision each shall alter her course to starboard so that each shall pass on the port side of the other.

(b) Existence of head-on situation. Such a situation shall be deemed to exist when a vessel sees the other ahead or nearly ahead and by night she could see the masthead lights of the other in a line or nearly in a line and/or both sidelights and by day she observes the corresponding aspect of the other vessel.

(c) Assumption that head-on situation exists in case of doubt. When a vessel is in any doubt as to whether such a situation exists she shall assume that it does exist and act accordingly.

(d) Notwithstanding paragraph (a) of this Rule, a power-driven vessel operating on the Great Lakes, Western Rivers, or other specified waters, and proceeding downbound with following current, shall not make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

§ 83.15 Crossing situation (Rule 15).

(a) Assumption of crossing situation. A vessel other than a crossing vessel or a vessel joining or leaving a lane shall not normally enter a separation zone or cross a separation line except:

(i) In cases of emergency to avoid immediate danger;

(ii) To engage in fishing within a separation zone.

(b) Caution in areas near termination of scheme. A vessel navigating in areas near the terminations of traffic separation schemes shall do so with particular caution.

(c) Exemption from maintenance of safety of navigation. A vessel restricted in her ability to maneuver when engaged in an operation for the maintenance of safety of navigation in a traffic separation scheme is exempted from complying with this Rule to the extent necessary to carry out the operation.

(d) Exemption; laying, servicing, or picking up submarine cable. A vessel restricted in her ability to maneuver when engaged in an operation for the laying, servicing, or picking up of a submarine cable, within a traffic separation scheme, is exempted from complying with this Rule to the extent necessary to carry out the operation.

§ 83.11 Application (Rule 11).

Rules in this subpart (§§ 83.11 through 83.18) apply to vessels in sight of one another.

§ 83.12 Sailing vessels (Rule 12).

(a) Keeping out of the way. When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other as follows:

(i) When each has the wind on a different side, the vessel which has the wind on the port side shall keep out of the way of the other;

(ii) When both have the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward;

(iii) If a vessel with the wind on the port side sees a vessel to windward and cannot determine with certainty whether the other vessel has the wind on the port or on the starboard side, she shall assume that it does exist and act accordingly.

(b) A vessel shall be deemed to be overtaking when coming up with another vessel from a direction more than 22.5 degrees abaft her beam; that is, in such a position with reference to the vessel she is overtaking, that at night she would be able to see only the sternlight of that vessel but neither of her sidelights.

(c) Any subsequent alteration of the bearing between the two vessels shall not make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

(d) Notwithstanding paragraph (d) of this Rule, a vessel may use an inshore traffic zone when en route to or from a port, offshore installation or structure, pilot station, or any other place situated within the inshore traffic zone, or to avoid immediate danger.

Rule 14

(a) Course alterations to starboard or port side passage. Unless otherwise agreed, when two power-driven vessels are meeting on reciprocal or nearly reciprocal courses so as to involve risk of collision each shall alter her course to starboard so that each shall pass on the port side of the other.

(b) Existence of head-on situation. Such a situation shall be deemed to exist when a vessel sees the other ahead or nearly ahead and by night she could see the masthead lights of the other in a line or nearly in a line and/or both sidelights and by day she observes the corresponding aspect of the other vessel.

(c) Assumption that head-on situation exists in case of doubt. When a vessel is in any doubt as to whether such a situation exists she shall assume that it does exist and act accordingly.

(d) Notwithstanding paragraph (a) of this Rule, a power-driven vessel operating on the Great Lakes, Western Rivers, or other specified waters, and proceeding downbound with following current, shall not make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

§ 83.15 Crossing situation (Rule 15).

(a) Assumption of crossing situation. A vessel other than a crossing vessel or a vessel joining or leaving a lane shall not normally enter a separation zone or cross a separation line except:

(i) In cases of emergency to avoid immediate danger;

(ii) To engage in fishing within a separation zone.

(b) Caution in areas near termination of scheme. A vessel navigating in areas near the terminations of traffic separation schemes shall do so with particular caution.

(c) Exemption from maintenance of safety of navigation. A vessel restricted in her ability to maneuver when engaged in an operation for the maintenance of safety of navigation in a traffic separation scheme is exempted from complying with this Rule to the extent necessary to carry out the operation.

(d) Exemption; laying, servicing, or picking up submarine cable. A vessel restricted in her ability to maneuver when engaged in an operation for the laying, servicing, or picking up of a submarine cable, within a traffic separation scheme, is exempted from complying with this Rule to the extent necessary to carry out the operation.

Conduct of Vessels in Sight of One Another
§ 83.16 Action by give-way vessel (Rule 16).

Every vessel which is directed to keep out of the way of another vessel shall, so far as possible, take early and substantial action to keep well clear.

§ 83.17 Action by stand-on vessel (Rule 17).

(a) Stand-on vessel to keep course and speed action allowed when give-way vessel fails to take appropriate action.

(i) Where one of two vessels is to keep out of the way, the other shall keep her course and speed.

(ii) The latter vessel may, however, take action to avoid collision by her maneuver alone, as soon as it becomes apparent to her that the vessel required to keep out of the way is not taking appropriate action in compliance with these Rules.

(b) Action by stand-on vessel allowed when action by give-way vessel alone cannot avoid collision.

(i) When, from any cause, the vessel required to keep her course and speed finds herself so close that collision cannot be avoided by the action of the give-way vessel alone, she shall take such action as will best aid to avoid collision.

(ii) A vessel not under command.

(iii) A vessel engaged in fishing.

(c) Crossing situations.

A power-driven vessel which takes action in a crossing situation in accordance with paragraph (a) (ii) of this Rule to avoid collision with another power-driven vessel shall, if the circumstances of the case admit, not alter course to port for a vessel on her own port side.

(d) Any vessel not relieved of obligation to keep out of the way.

This Rule does not relieve the give-way vessel of her obligation to keep out of the way.

§ 83.18 Responsibilities between vessels (Rule 18).

Except where Rules 9, 10, and 13 (§§ 83.09, 83.10, and 83.13) otherwise require:

(a) Power-driven vessel underway.

(i) A vessel not under command;

(ii) A vessel restricted in her ability to maneuver;

(iii) A vessel engaged in fishing; and

(iv) A sailing vessel.

(b) Sailing vessel underway.

(i) A vessel not under command;

(ii) A vessel restricted in her ability to maneuver;

(iii) A vessel engaged in fishing.

(c) Vessel engaged in fishing when underway.

(i) A vessel engaged in fishing when underway shall, so far as possible, keep out of the way of:

(ii) A vessel not under command; and

(iii) A vessel restricted in her ability to maneuver.

(d) Seaplane on the water.

(i) A seaplane on the water shall, in general, keep well clear of all vessels and avoid impeding their navigation. In circumstances, however, where risk of collision exists, she shall comply with the Rules of this Subparts (Rules 4-19) (§§ 83.4 through 83.19); and

(ii) A WIG craft shall, when taking off, landing and in flight near the surface, keep well clear of all other vessels and avoid impeding their navigation; and

(iii) A WIG craft operating on the water surface shall comply with the Rules of this Subpart (Rules 4-19) (§§ 83.4 through 83.19) as a power-driven vessel.

Conduct of Vessels in Restricted Visibility

§ 83.19 Conduct of vessels in restricted visibility (Rule 19).

(a) Vessels in which rule applies.

This Rule applies to vessels not in sight of one another when navigating in or near an area of restricted visibility.

(b) Safe speed or engines ready for immediate maneuver.

Every vessel shall proceed at a safe speed adapted to the prevailing circumstances and conditions of restricted visibility. A power-driven vessel shall have her engines ready for immediate maneuver.

(c) Due regard to the prevailing circumstances and conditions of restricted visibility.

Every vessel shall have due regard to the prevailing circumstances and conditions of restricted visibility when complying with Rules 4 through 10 (§§ 83.04 through 83.10).

(d) Prevention of collision by radar alone.

A vessel which detects by radar alone the presence of another vessel shall determine if a close-quarters situation is developing or risk of collision exists. If so, she shall take avoiding action in ample time, provided that when such action consists of an alteration of course, so far as possible the following shall be avoided:

(i) An alteration of course to port for a vessel forward of the beam, other than for a vessel being overtaken; and

(ii) An alteration of course toward a vessel abaft the beam.

(e) Reduction of speed to minimum.

Except where it has been determined that a risk of collision does not exist, every vessel which hears apparently forward of her beam the fog signal of another vessel, or which cannot avoid a close-quarters situation with another vessel forward of her beam, shall reduce her speed to the minimum at which she can be kept on course. She shall if necessary take all her way off and, in any event, navigate with extreme caution until danger of collision is over.
Subpart C—Lights and Shapes

§ 83.20 Application (Rule 20).
(a) Compliance in all weathers. Rules in this part (Rules 20-31) (§§ 83.20 through 83.31) shall be complied with in all weathers.
(b) Rules concerning lights exhibited from sunset to sunrise. The Rules concerning lights (§§ 83.20 through 83.31) shall be complied with from sunset to sunrise, and during such times no other lights shall be exhibited, except such lights as cannot be mistaken for the lights specified in these Rules or do not impair their visibility or distinctive character, or interfere with the keeping of a proper lookout.
(c) Lights during daylight hours in restricted visibility other circumstances. (c) The lights prescribed by these Rules shall, if carried, also be exhibited from sunrise to sunset in restricted visibility and may be exhibited in all other circumstances when it is deemed necessary.
(d) Rules concerning shapes compliance by day. (d) The Rules concerning shapes shall be complied with by day.
(e) Annex. The lights and shapes specified in these Rules shall comply with the provisions of Annex I of these Rules (33 CFR part 84).
(f) A vessel's navigation lights and shapes may be lowered if necessary to pass under a bridge.

§ 83.21 Definitions (Rule 21).
(a) Masthead light means a white light placed over the fore and aft centerline of the vessel showing an unbroken light over an arc of the horizon of 225 degrees and so fixed as to show the light from right ahead to 22.5 degrees abaat the beam on either side of the vessel, except that on a vessel of less than 12 meters in length the masthead light shall be placed as nearly as practicable to the fore and aft centerline of the vessel.

(b) Side lights mean a green light on the starboard side and a red light on the port side each showing an unbroken light over an arc of the horizon of 112.5 degrees and so fixed as to show the light from right ahead to 22.5 degrees abaat the beam on its respective side. On a vessel of less than 20 meters in length the side lights may be combined in one lantern carried on the fore and aft centerline of the vessel, except that on a vessel of less than 12 meters in length the side lights when combined in one lantern shall be placed as nearly as practicable to the fore and aft centerline of the vessel.

(c) Sternlight means a yellow light having the same characteristics as the "sternlight" defined in paragraph (c) of this Rule.

(d) Flare means a yellow light flashing at regular intervals at a frequency of 50 to 70 flashes per minute, placed as far forward and as nearly as practicable on the fore and aft centerline of the vessel.

(e) Special flashing light means a yellow light flashing at regular intervals at a frequency of 50 to 70 flashes per minute, placed as far forward and as nearly as practicable on the fore and aft centerline of the vessel and showing an unbroken light over an arc of the horizon of not less than 180 degrees nor more than 225 degrees and so fixed as to show the light 67.5 degrees from right aft on each side of the vessel.

(f) All-round light means a white light placed over the fore and aft centerline of the vessel showing an unbroken light over an arc of the horizon of 360 degrees.

§ 83.22 Visibility of lights (Rule 22).
The lights prescribed in these Rules (Subpart C) shall have an intensity as specified in Annex I to these Rules (33 CFR part 84), so as to be visible at the following minimum ranges:
(a) Vessels of 50 meters or more in length.
   (1) A masthead light, 6 miles;  
   (2) A side light, 3 miles;  
   (3) A sternlight, 3 miles;  
   (4) A towing light, 3 miles;  
   (5) A white, red, green or yellow all-round light, 3 miles; and  
   (6) A special flashing light, 2 miles.
(b) Vessels of 12 meters or more in length but less than 50 meters in length.  
   (1) A masthead light, 5 miles; except that where the length of the vessel is less than 20 meters, 3 miles;  
   (2) A side light, 2 miles;  
   (3) A sternlight, 2 miles;  
   (4) A towing light, 2 miles;  
   (5) A white, red, green or yellow all-round light, 2 miles; and  
   (6) A special flashing light, 2 miles.
(c) Vessels of less than 12 meters in length.  
   (1) A masthead light, 2 miles;  
   (2) A side light, 1 mile;  
   (3) A sternlight, 2 miles;  
   (4) A towing light, 2 miles;  
   (5) A white, red, green or yellow all-round light, 2 miles; and  
   (6) A special flashing light, 2 miles.
(d) In an inconspicuous, partly submerged vessel or objects being towed.  
   (1) A white all-round light, 3 miles.

§ 83.23 Power-driven vessels underway (Rule 23).
(a) Lights exhibited by power-driven vessels underway.  
   (1) A power-driven vessel underway shall exhibit:  
       (a) A masthead light forward;
§ 83.24 Towing and pushing (Rule 24).
(a) A power-driven vessel when towing astern. A power-driven vessel when towing astern shall exhibit:

- (i) Instead of the light prescribed either in Rule 23(a)(4) or 23(a)(2)ii) §§ 83.23(a)(i) and (ii), two masthead lights in a vertical line. When the length of the tow, measuring from the stern of the towing vessel to the after end of the tow exceeds 200 meters, three such lights in a vertical line;
- (ii) Sidelights;
- (iii) A sternlight;
- (iv) A towing light in a vertical line above the sternlight; and
- (v) When the length of the tow exceeds 200 meters, a diamond shape where it can best be seen.

(b) Pushing vessel and pushed vessel rigidly connected in composite unit. (b) When a pushing vessel and a vessel being pushed ahead are rigidly connected in a composite unit they shall be regarded as a power-driven vessel and exhibit the lights prescribed in Rule 23c (§ 83.23).

(c) A power-driven vessel when pushing ahead or towing alongside. (c) A power-driven vessel when pushing ahead or towing alongside, except as required by paragraphs (b) and (d) of this Rule, shall exhibit:

- (i) Instead of the light prescribed either in Rule 23(a)(4) or 23(a)(2)ii) §§ 83.23(a)(i) or (ii), two masthead lights in a vertical line;
- (ii) Sidelights;
- (iii) A sternlight; and
- (iv) Two towing lights in a vertical line.

(d) Compliance with other requirements. (d) A power-driven vessel to which paragraphs (a) or (c) of this Rule apply shall also comply with Rule 23c (§ 83.23) i) and 23c(2)ii) § 83.23(a)(i) or (ii).

1. Vessels being towed. A vessel or object other than those referred to in paragraph (g) of this Rule being towed shall exhibit:

- (i) Sidelights;
- (ii) A sternlight; and
- (iii) When the length of the tow exceeds 200 meters, a diamond shape where it can best be seen.

2. Vessels being towed alongside or pushed in a group. (f) Provided that any number of vessels being towed alongside or pushed in a group shall be lighted as one vessel, except as provided in paragraph (d)(iii) of this Rule.

- (i) A vessel being pushed ahead, not being part of a composite unit, shall exhibit at the forward end, sidelights and a special flashing light;
- (ii) A vessel being towed alongside shall exhibit a sternlight and at the forward end, sidelights and a special flashing light; and
- (iii) When vessels are towed alongside on both sides of the towing vessel, a sternlight shall be exhibited on the stern of the outboard vessel on each side of the towing vessel, and a single set of sidelights as far forward and as far outboard as is practicable, and a single special flashing light.

2. An inconspicuous, partly submerged vessel or object, or combination of such vessels or objects being towed. An inconspicuous, partly submerged vessel or object being towed, shall exhibit:

- (i) If it is less than 25 meters in breadth, one all-round white light at or near each end;
- (ii) If it is 25 meters or more in breadth, four all-round white lights to mark its length and breadth;
- (iii) If it exceeds 100 meters in length, additional all-round white lights between the lights prescribed in subparagraphs (i) and (ii) of this Rule so that the distance between the lights shall not exceed 100 meters: Provided, that any vessels or objects being towed alongside each other shall be lighted as one vessel or object;
- (iv) A diamond shape at or near the aftermost extremity of the last vessel or object being towed; and
- (v) The towing vessel may direct a searchlight in the direction of the tow to indicate its presence to an approaching vessel.

3. Alternative lighting of vessel or object being towed. (h) Where from any sufficient cause it is impracticable for a vessel or object being towed to exhibit the lights prescribed in paragraph (e) or (g) of this Rule, all possible measures shall be taken to light the vessel or object towed or at least to indicate the presence of the unlighted vessel or object.

- (i) Western Rivers or other specified waterways exceptions. Notwithstanding paragraph (c)(i) of this Rule, on the Western Rivers (except below the Huey P. Long Bridge at mile 106.1 Above Head of Passes on the Mississippi River) and on waters specified by the Secretary, a power-driven vessel when pushing ahead or towing alongside, except as paragraph (b) of this Rule applies, shall exhibit:

- (i) Sidelights; and
- (ii) Two towing lights in a vertical line.

4. Towing another vessel in distress or otherwise in need of assistance. (i) Where from any sufficient cause it is impracticable for a vessel not normally engaged in towing operations to display the lights prescribed by paragraph (a), (c) or (i) of this Rule, such vessel shall not be required to exhibit those lights when engaged in towing another vessel in distress or otherwise in need of assistance. All possible measures
shall be taken to indicate the nature of the relationship between the towing vessel and the vessel being assisted. The searchlight authorized by Rule 36 (§ 83.36) may be used to illuminate the tow.

§ 83.25  Sailing vessels underway and vessels under oars (Rule 25).

(a) Sailing vessels underway.

(i) Sidelights; and

(ii) A sternlight.

(b) Sailing vessels of less than 20 meters in length.

(ii) Two all-round lights in a vertical line, the upper being red and the lower white, or a shape consisting of two cones with their apexes together in a vertical line one above the other;

(c) Additional lights. A sailing vessel underway may, in addition to the lights prescribed in paragraph (a) of this Rule, exhibit at or near the top of the mast, where they can best be seen, two all-round lights in a vertical line, the upper being red and the lower green, but these lights shall not be exhibited in conjunction with the combined lantern permitted by paragraph (b) of this Rule.

(d) Sailing vessels of less than 2 meters in length, vessels under oars.

(i) A sailing vessel of less than 7 meters in length shall, if practicable, exhibit the lights prescribed in paragraph (a) or (b) of this Rule, but if she does not, she shall exhibit an all-round white light or have ready at hand an electric torch or lighted lantern showing a white light which shall be exhibited in sufficient time to prevent collision.

(ii) A vessel under oars may exhibit the lights prescribed in this Rule for sailing vessels, but if she does not, she shall exhibit an all-round white light or have ready at hand an electric torch or lighted lantern showing a white light which shall be exhibited in sufficient time to prevent collision.

§ 83.26  Fishing vessels (Rule 26).

(a) Exhibition of only prescribed lights and shapes.

A vessel engaged in fishing, whether underway or at anchor, shall exhibit only the lights and shapes prescribed in this Rule.

(b) Vessels engaged in trawling.

(i) Two all-round lights in a vertical line, the upper being green and the lower white, or a shape consisting of two cones with their apexes together in a vertical line one above the other;

(ii) A masthead light abait of and higher than the all-round green light; a vessel of less than 50 meters in length shall not be obliged to exhibit such a light but may do so, and

(iii) When making way through the water, in addition to the lights prescribed in this paragraph, sidelights and a sternlight.

(c) Vessels engaged in fishing other than trawling. A vessel engaged in fishing, other than trawling, shall exhibit:

(i) Two all-round lights in a vertical line, the upper being green and the lower white, or a shape consisting of two cones with their apexes together in a vertical line one above the other;

(ii) A masthead light abait of and higher than the all-round green light; a vessel of less than 50 meters in length shall not be obliged to exhibit such a light but may do so, and

(iii) When making way through the water, in addition to the lights prescribed in this paragraph, sidelights and a sternlight.

(d) Vessels engaged in fishing in close proximity to other vessels engaged in fishing. The additional signals described in Annex II to these Rules apply to a vessel engaged in fishing in close proximity to other vessels engaged in fishing.

§ 83.27  Vessels engaged in fishing.

(a) Vessels engaged in fishing shall exhibit:

(i) Two all-round lights in a vertical line, the upper being red and the lower white, or a shape consisting of two cones with apexes together in a vertical line one above the other;

(ii) A searchlight directed forward and in the direction of the other vessel of the pair;

(iii) When making way through the water, in addition to the lights prescribed in this paragraph, sidelights and a sternlight.

§ 83.29  Fishing vessels fishing in close proximity.

(i) The lights mentioned herein shall be placed where they can best be seen. They shall be at least 0.9 meters apart but at a lower level than lights prescribed in this Rule. The lights shall be visible all around the horizon at a distance of at least 1 mile but at a lesser distance than the lights prescribed by paragraphs (a) through (c) of this Rule for fishing vessels.

(ii) Signals for trawlers.

(1) Vessels when engaged in trawling, whether using demersal or pelagic gear, may exhibit:

(A) When shooting their nets: two white lights in a vertical line;

(B) When hauling their nets: one white light over one red light in a vertical line;

(C) When a net has come fast upon an obstruction: two red lights in a vertical line.

(2) Each vessel engaged in pair trawling may exhibit:

(A) By night, a searchlight directed forward and in the direction of the other vessel of the pair;

(B) When shooting or hauling their nets or when their nets have come fast upon an obstruction, the lights prescribed in paragraph (a) of this Rule.
§ 83.27 Vessels not under command or restricted in their ability to maneuver (Rule 27).

(a) Vessels not under command. A vessel not under command shall exhibit:

(i) Three all-round lights in a vertical line where they can best be seen;

(ii) Two balls or similar shapes in a vertical line where they can best be seen; and

(iii) When making way through the water, in addition to the lights prescribed in this paragraph, sidelights and a sternlight.

(b) Vessels restricted in their ability to maneuver. A vessel restricted in her ability to maneuver, except a vessel engaged in mine clearance operations, shall exhibit:

(i) Three all-round lights in a vertical line where they can best be seen. The highest and lowest of these lights shall be red and the middle light shall be white;

(ii) Three shapes in a vertical line where they can best be seen. The highest and lowest of these shapes shall be balls and the middle one a diamond;

(ii) When making way through the water, a masthead light or lights, sidelights and a sternlight, in addition to the lights prescribed in subparagraph (b)(i) of this Rule; and

(iv) When at anchor, in addition to the lights or shapes prescribed in subparagraphs (b)(i) and (ii) of this Rule, the light, lights or shapes prescribed in Rule 30 (§ 83.30).

(c) Vessels engaged in towing operations. A vessel engaged in a towing operation which severely restricts the towing vessel and her tow in their ability to deviate from their course shall, in addition to the lights or shapes prescribed in subparagraphs (b)(i) and (ii) of this Rule, exhibit the lights or shapes prescribed in Rule 24 (§ 83.24).

(d) Vessels engaged in dredging or underwater operations. A vessel engaged in dredging or underwater operations, when restricted in her ability to maneuver, shall exhibit the lights and shapes prescribed in subparagraphs (b)(i), (ii), and (iii) of this Rule and shall in addition, when an obstruction exists, exhibit:

(i) Two all-round red lights or two balls in a vertical line to indicate the side on which the obstruction exists;

(ii) Two all-round green lights or two diamonds in a vertical line to indicate the side on which another vessel may pass; and

(iii) When at anchor, the lights or shapes prescribed by this paragraph, instead of the lights or shapes prescribed in Rule 30 (§ 83.30).

(iv) Dredge pipelines that are floating or supported on trestles shall display the following lights at night and in periods of restricted visibility.

(1) One row of yellow lights. The lights must be:

(A) Flashing 50 to 70 times per minute,

(B) Visible all around the horizon,

(C) Visible for at least 2 miles,

(D) Not less than 1 and not more than 3.5 meters above the water,

(E) Approximately equally spaced, and

(F) Not more than 10 meters apart where the pipeline crosses a navigable channel. Where the pipeline does not cross a navigable channel the lights must be sufficient in number to clearly show the pipeline's length and course.

(2) Two red lights at each end of the pipeline, including the ends in a channel where the pipeline is separated to allow vessels to pass (whether open or closed). The lights must be:

(A) Visible all around the horizon, and

(B) Visible for at least 2 miles, and

(C) One meter apart in a vertical line with the lower light at the same height above the water as the flashing yellow light.

(e) Whenever the size of a vessel engaged in diving operations makes it impracticable to exhibit all lights and shapes prescribed in paragraph (d) of this Rule, as appropriate, the following shall instead be exhibited:

(i) Three all-round lights in a vertical line where they can best be seen. The highest and lowest of these lights shall be red and the middle light shall be white;

(ii) A rigid replica of the International Code flag "A" not less than 1 meter in height. Measures shall be taken to insure its all-round visibility.

(f) Vessels engaged in mine clearance operations. A vessel engaged in mine clearance operations shall, in addition to the lights prescribed for a power-driven vessel in Rule 23 (§ 83.23) or to the lights or shape prescribed for a vessel at anchor in Rule 30 (§ 83.30), as appropriate, exhibit three all-round green lights or three balls. One of these lights or shapes shall be exhibited near the foremost head and one at each end of the fore yard. These lights or shapes indicate that it is dangerous for another vessel to approach within 1000 meters of the mine clearance vessel.

(g) Vessels of less than 12 meters in length. A vessel of less than 12 meters in length, except when engaged in diving operations, is not required to exhibit the lights or shapes prescribed in this Rule.

(h) Signals of vessels in distress and requiring assistance. The signals prescribed in this Rule are not signals of vessels in distress and requiring assistance. Such signals are contained in Annex IV to these Rules (33 CFR part 87).
(a) Vessels engaged on pilotage duty

A vessel engaged on pilotage duty shall exhibit:

(i) At or near the masthead, two all-round lights in a vertical line, the upper being white and the lower red;
(ii) When underway, in addition, sidelights and a sternlight; and
(iii) When at anchor, in addition to the lights prescribed in subparagraph (i) of this Rule, the anchor light, lights, or shape prescribed in Rule 30 (§ 83.30) for anchored vessels.

(b) Vessels when not engaged on pilotage duty

A pilot vessel when not engaged on pilotage duty shall exhibit the lights or shapes prescribed for a vessel of her length.

§ 83.30 Anchored vessels and vessels aground

Vessels anchored, aground, and moored barges (Rule 30).

(a) Vessels at anchor

A vessel at anchor shall exhibit where it can best be seen:

(i) In the fore part, an all-round white light or one ball; and
(ii) At or near the stern and at a lower level than the light prescribed in subparagraph (i) of this Rule, an all-round white light.

(b) Vessels of less than 50 meters in length

A vessel of less than 50 meters in length may exhibit an all-round white light where it can best be seen instead of the lights prescribed in paragraph (a) of this Rule.

(c) Illumination of decks

A vessel at anchor may, and a vessel of 100 meters or more in length shall, also use the available working or equivalent lights to illuminate her decks.

(d) Vessels aground

A vessel aground shall exhibit the lights prescribed in paragraph (a) or (b) of this Rule and in addition, if practicable, where they can best be seen:

(i) Two all-round red lights in a vertical line; and
(ii) Three balls in a vertical line.

(e) Vessels of less than 20 meters in length when at anchor

(c) A vessel of less than 7 meters in length, when at anchor, not in or near a narrow channel, fairway, anchorage, or where other vessels normally navigate, shall not be required to exhibit the lights or shape prescribed in paragraphs (a) and (b) of this Rule.

(f) Vessels of less than 12 meters in length when aground

(f) A vessel of less than 12 meters in length when aground shall not be required to exhibit the lights or shapes prescribed in subparagraphs (d)(1) and (2) of this Rule.

(g) Vessels of less than 20 meters in length when at anchor in special anchorage

(g) A vessel of less than 20 meters in length, when at anchor in a special anchorage area designated by the Secretary of the Coast Guard, shall not be required to exhibit the anchor lights and shapes required by this Rule.

(h) The following barges shall display at night and if practicable in periods of restricted visibility the lights described in paragraph (i) of this Rule:

(i) Every barge projecting into a buoyed or restricted channel.
(ii) Every barge so moored that it reduces the available navigable width of any channel to less than 80 meters.
(iii) Barges moored in groups more than two barges wide or to a maximum width of over 25 meters.
(iv) Every barge not moored parallel to the bank or dock.

(i) Barges described in paragraph (h) of this Rule shall carry two unobstructed all-round white lights of an intensity to be visible for at least 1 nautical mile and meeting the technical requirements as prescribed in Annex I (33 CFR part 84).

(j) A barge or group of barges at anchor or made fast to one or more mooring buoys or other similar device, in lieu of the provisions of this Rule, may carry unobstructed all-round white lights of an intensity to be visible for at least 1 nautical mile that meet the requirements of Annex I (33 CFR part 84) and shall be arranged as follows:

(i) Any barge that projects from a group formation, shall be lighted on its outboard corners.
(ii) On a single barge moored in water where other vessels normally navigate on both sides of the barge, lights shall be placed to mark the corner extremities of the barge.
(iii) On barges moored in group formation, moored in water where other vessels normally navigate on both sides of the group, lights shall be placed to mark the corner extremities of the group.

(k) The following are exempt from the requirements of this Rule:

(i) A barge or group of barges so designated by the Secretary of the Coast Guard.
(ii) A barge or group of barges moored behind a pierhead.
(iii) A barge less than 20 meters in length when moored in a special anchorage area designated in accordance with § 109.10 of this chapter.

(l) Barges moored in well-illuminated areas are exempt from the lighting requirements of this Rule. These areas are as follows:

Chicago Sanitary Ship Canal

(1) Mile 293.2 to 293.9
(2) Mile 295.2 to 296.1
(3) Mile 297.5 to 297.8
(4) Mile 298 to 298.2
(5) Mile 298.6 to 298.8
(6) Mile 299.3 to 299.4
(7) Mile 299.8 to 300.5
(8) Mile 303 to 303.2
(9) Mile 303.7 to 303.9
(10) Mile 305.7 to 305.8
(11) Mile 306.7 to 307.9
(12) Mile 311 to 311.2
(13) Mile 312.5 to 312.6
(14) Mile 313.8 to 314.2
§ 83.31 Seaplanes (Rule 31).
Where it is impracticable for a seaplane or a WIG craft to exhibit lights and shapes of the characteristics or in the positions prescribed in the Rules of this subpart she shall exhibit lights and shapes as closely similar in characteristics and position as is possible.

Subpart D—Sound and Light Signals

§ 83.32 Definitions (Rule 32).

(a) Whistle The word whistle means any sound signaling appliance capable of producing the prescribed blasts and which complies with specifications in Annex III to these Rules. (33 CFR part 86).

(b) Short The term short blast means a blast of about 1 second's duration.

(c) Prolonged The term prolonged blast means a blast of from 4 to 6 seconds' duration.

§ 83.33 Equipment for sound signals (Rule 33).

(a) Vessels of 12 meters or more in length. A vessel of 12 meters or more in length shall be provided with a whistle and, a vessel of 20 meters or more in length shall be provided with a bell in addition to a whistle, and a vessel of 100 meters or more in length shall, in addition, be provided with a gong, the tone and sound of which cannot be confused with that of the bell. The whistle, bell and gong shall comply with the specifications in Annex III to these Rules (33 CFR part 86). The bell or gong or both may be replaced by other equipment having the same respective sound characteristics, provided that manual sounding of the prescribed signals shall always be possible.

(b) Vessels of less than 12 meters in length. A vessel of less than 12 meters in length shall not be obliged to carry the sound signaling appliances prescribed in paragraph (a) of this Rule but if she does not, she shall be provided with some other means of making an efficient sound signal.

§ 83.34 Maneuvering and warning signals (Rule 34).

(a) Whistle signals. When power-driven vessels are in sight of one another and meeting or crossing at a distance within half a mile of each other, each vessel underway, when maneuvering as authorized or required by these Rules:

(i) Shall indicate that maneuver by the following signals on her whistle: one

1. One short blast to mean “I intend to leave you on my port side”; two

2. Two short blasts to mean “I intend to leave you on my starboard side”; and three

3. Three short blasts to mean “I am operating astern propulsion”.

(ii) Upon hearing the one or two blast signal of the other shall, if in agreement, sound the same whistle signal and take the steps necessary to effect a safe passing. If, however, from any cause, the vessel doubts the safety of the proposed maneuver, she shall sound the danger signal specified in paragraph (d) of this Rule and each vessel shall take appropriate precautionary action until a safe passing agreement is made.

(b) Light signals. A vessel may supplement the whistle signals prescribed in paragraph (a) of this Rule by light signals:

(i) These signals shall have the following significance: one

1. One flash to mean “I intend to leave you on my port side”; two
A vessel of less than 12 meters in length shall not be obliged to give the above-mentioned signals but, if she does not, shall make some other efficient sound signal at intervals of not more than 2 minutes, one prolonged blast. This signal shall be answered with a prolonged blast made by the overtaking vessel.

When in sight of one another:

(i) A power-driven vessel intending to overtake another power-driven vessel shall indicate her intention by the following signals on her whistle:

(1) One short blast to mean “I intend to overtake you on your starboard side”; and
(2) Two short blasts to mean “I intend to overtake you on your port side”;

(ii) The power-driven vessel about to be overtaken shall, if in agreement, sound a similar sound signal. If in doubt she shall sound the danger signal prescribed in paragraph (d) of this Rule.

(ii) The power-driven vessel about to be overtaken shall, if in agreement, sound a similar sound signal. If in doubt she shall sound the danger signal prescribed in paragraph (d) of this Rule.

(iii) The power-driven vessel about to be overtaken shall, if in agreement, sound a similar sound signal. If in doubt she shall sound the danger signal prescribed in paragraph (d) of this Rule.

§ 83.35 Sound signals in restricted visibility (Rule 35).

In or near an area of restricted visibility, whether by day or night, the signals prescribed in this Rule shall be used as follows:

(a) A power-driven vessel making way through the water shall sound, at intervals of not more than 2 minutes, one prolonged blast.

(b) A power-driven vessel underway but stopped and making no way through the water shall sound, at intervals of not more than 2 minutes, two prolonged blasts in succession, with an interval of about 2 seconds between them.

(c) A vessel not under command, vessels restricted in her ability to maneuver, sailing vessels, vessels engaged in fishing, vessels engaged in towing or pushing. A vessel not under command; a vessel restricted in her ability to maneuver, whether underway or at anchor; a sailing vessel; a vessel engaged in fishing, whether underway or at anchor; and a vessel engaged in towing or pushing another vessel shall, instead of the signals prescribed in paragraphs (a) or (b) of this Rule, sound, at intervals of not more than 2 minutes, three blasts in succession, namely, one prolonged blast followed by two short blasts.

(d) Vessels engaged in special anchorage areas.

(e) A vessel towed or if more than one vessel is towed the last vessel of the tow, if manned, shall at intervals of not more than 2 minutes sound four blasts in succession, namely, one prolonged followed by three short blasts. When practicable, this signal shall be made immediately after the signal made by the towing vessel.

(f) A vessel aground shall give the bell signal and if required the gong signal prescribed in paragraph (f) of this Rule and shall, in addition, give three separate and distinct strokes on the bell immediately before and after the rapid ringing of the bell. A vessel aground may in addition sound an appropriate whistle signal.

(g) Vessels engaged in special anchorage areas.

(h) Vessels of less than 12 meters in length.

(i) A vessel of 12 meters or more but less than 20 meters in length shall not be obliged to give the bell signals prescribed in paragraphs (g) and (h) of this Rule. However, if she does not, she shall make some other efficient sound signal at intervals of not more than 2 minutes.

(j) A vessel of less than 12 meters in length shall not be obliged to give the above-mentioned signals but, if she does not, shall make some other efficient sound signal at intervals of not more than 2 minutes.

(k) A pilot vessel when engaged on pilotage duty may, in addition to the signals prescribed in paragraphs (a), (b) or (e) of this Rule, sound an identity signal consisting of four short blasts.

(l) The following vessels shall not be required to sound signals as prescribed in paragraph (e) of this Rule when anchored in a special anchorage area designated by the Secretary of the Coast Guard:

(i) A vessel of less than 20 meters in length; and
(ii) A barge, canal boat, scow, or other nondescript craft.
§ 83.36  Signals to attract attention (Rule 36).
If necessary to attract the attention of another vessel, any vessel may make light or sound signals that cannot be mistaken for any signal authorized elsewhere in these Rules, or may direct the beam of her searchlight in the direction of the danger, in such a way as not to embarrass any vessel.

§ 83.37  Distress signals (Rule 37).
When a vessel is in distress and requires assistance she shall use or exhibit the signals described in Annex IV to these Rules. (33 CFR part 87).

Subpart E—Exemptions

§ 83.38  Exemptions (Rule 38).
Any vessel or class of vessels, the keel of which was laid or which was at a corresponding stage of construction before December 24, 1980, provided that she complies with the requirements of—
(a) The Act of June 7, 1897 (30 Stat. 96), as amended (33 U.S.C. 154–232) for vessels navigating the waters subject to that statute;
(b) Section 4233 of the Revised Statutes (33 U.S.C. 301–356) for vessels navigating the waters subject to that statute;
(c) The Act of February 8, 1895 (28 Stat. 645), as amended (33 U.S.C. 241–295) for vessels navigating the waters subject to that statute; or
(d) Sections 3, 4, and 5 of the Act of April 25, 1940 (54 Stat. 163), as amended (46 U.S.C. 526b, c, and d) for motorboats navigating the waters subject to that statute;
shall be exempted from compliance with the technical Annexes to these Rules (33 CFR parts 84 through 88) as follows:
(i) The installation of lights with ranges prescribed in Rule 22, until 4 years after the effective date of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591), except that (§ 83.22), vessels of less than 20 meters in length are permanently exempt;
(ii) The installation of lights with color specifications as prescribed in Annex I to these Rules, until 4 years after the effective date of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591), except that (33 CFR part 84), vessels of less than 20 meters in length are permanently exempt;
(iii) The repositioning of lights as a result of conversion to metric units and rounding off measurement figures, are permanently exempt; and
(iv) The horizontal repositioning of masthead lights prescribed by Annex I to these Rules:
(a) On vessels of more than 150 meters in length, are permanently exempt; and
(b) On vessels of 150 meters or more in length, until 9 years after the effective date of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591).
(5) The restructuring or repositioning of all lights to meet the prescriptions of Annex I to these Rules, until 9 years after the effective date of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591);
(6) Power-driven vessels of 12 meters or more but less than 20 meters in length are permanently exempt from the provisions of Rule 23(a)(4) and (iv) (§ 83.23(a)(4) and (iv)) provided that, in place of these lights, the vessel exhibits a white light aft visible all around the horizon; and
(7) The requirements for sound signal appliances prescribed in Annex III to these Rules, until 9 years after the effective date of the Inland Navigational Rules Act of 1980 (Pub. L. 96–591).
PART 84—ANNEX I: POSITIONING AND TECHNICAL DETAILS OF LIGHTS AND SHAPES

Section Contents Sec.
§ 84.01 Definitions.
§ 84.03 Vertical positioning and spacing of lights.
§ 84.05 Horizontal positioning and spacing of lights.
§ 84.07 Details of location of direction-indicating lights for fishing vessels, dredgers and vessels engaged in underwater operations.
§ 84.09 Screens.
§ 84.11 Shapes.
§ 84.13 Color specification of lights.
§ 84.15 Intensity of lights.
§ 84.17 Horizontal sectors.
§ 84.19 Vertical sectors.
§ 84.21 Intensity of non-electric lights.

§ 84.01 Definitions.
(a) The term height above the hull means height above the uppermost continuous deck. This height shall be measured from the position vertically beneath the location of the light.
(b) High-speed craft means a craft capable of maximum speed in meters per second (m/s) equal to or exceeding: 3.7\(\frac{\text{cubic meters}}{\text{displacement}}\); where\(\sigma\) = displacement corresponding to the design waterline (meters\(^3\)/cubic meters).
Note to paragraph (b): The same formula expressed in pounds and knots is maximum speed in knots (kts) equal to exceeding 1.98 (lbs) 3.7\(\frac{\text{displacement}}{\text{cubic meters}}\); where\(\sigma\) = displacement corresponding to design waterline in pounds.
(c) The term practical cut-off means, for vessels 20 meters or more in length, 12.5 percent of the minimum luminous intensity (Table 84.45(b)) corresponding to the greatest range of visibility for which the requirements of Annex I (33 CFR part 84) are met.

§ 84.03 Vertical positioning and spacing of lights.
(a) On a power-driven vessel of 20 meters or more in length the masthead lights shall be placed as follows:

_i_ (i) The forward masthead light, or if only one masthead light is carried, then that light, at a height above the hull of not less than 5 meters, and, if the breadth of the vessel exceeds 5 meters, then at a height above the hull not less than such breadth, so however that the light need not be placed at a greater height above the hull than 8 meters.

_ii_ When two masthead lights are carried the after one shall be at least 2 meters vertically higher than the forward one.

(b) The vertical separation of the masthead lights of power-driven vessels shall be such that in all normal conditions of trim the after light will be seen over and separate from the forward light at a distance of 1000 meters from the stem when viewed from water level.

(c) The masthead light of a power-driven vessel of 12 meters but less than 20 meters in length shall be placed at a height above the gunwale of not less than 2.5 meters.

(d) The masthead light, or the all-round light described in Rule 23(ed)(§ 83.23(d) of this chapter), of a power-driven vessel of less than 12 meters in length shall be carried at least one meter higher than the sidelights.

(e) One of the two or three masthead lights prescribed for a power-driven vessel when engaged in towing or pushing another vessel shall be placed in the same position as either the forward masthead light or the after masthead light, provided that the lowest after masthead light shall be at least 2 meters vertically higher than the highest forward masthead light.

(f) (i) The masthead light or lights prescribed in Rule 23(a) (§ 83.23(a) of this chapter) shall be so placed as to be above and clear of all other lights and obstructions except as described in paragraph (f)(2) of this section.

(ii) When it is impracticable to carry the all-round lights prescribed in Rule 27(b)(i)(§ 83.27(b)(i) of this chapter) below the masthead lights, they may be carried above the after masthead light(s) or vertically in between the forward masthead light(s) and after masthead light(s), provided that in the latter case the requirement of § 84.03(d) shall be complied with.

(g) The sidelights of a power-driven vessel shall be placed at least one meter lower than the forward masthead light. They shall not be so low as to be interfered with by deck lights.

(b) [Reserved]

(i) When the Rules in this subchapter E prescribe two or three lights to be carried in a vertical line, they shall be spaced as follows:

(1) On a vessel of 20 meters in length or more such lights shall be spaced not less than 1 meter apart, and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 4 meters above the hull;

(ii) On a vessel of less than 20 meters in length such lights shall be spaced not less than 1 meter apart and the lowest of these lights shall, except where a towing light is required, be placed at a height of not less than 2 meters above the gunwale;

(iii) When three lights are carried they shall be equally spaced.

(j) The lower of the two all-round lights prescribed for a vessel when engaged in fishing shall be a height above the sidelights not less than twice the distance between the two vertical lights.
(k) The forward anchor light prescribed in Rule 30(a)(ii) (§ 83.30(a)(ii)), when two are carried, shall not be less than 4.5 meters above the after one. On a vessel of 50 meters or more in length this forward anchor light shall be placed at a height or not less than 6 meters above the hull.

§ 84.03 Horizontal positioning and spacing of lights.

(a) Except as specified in paragraph (e) of this section, when two masthead lights are prescribed for a power-driven vessel, the horizontal distance between them must not be less than one quarter of the length of the vessel but need not be more than 50 meters. The forward light must be placed not more than one half of the length of the vessel from the stem.

(b) On a power-driven vessel of 20 meters or more in length the sidelights shall not be placed in front of the forward masthead lights. They shall be placed at or near the side of the vessel.

(c) When the lights prescribed in Rule 27(b)(i) (§ 83.27(b)(i) of this chapter) are placed vertically between the forward masthead light(s) and the after masthead light(s), these all-round lights shall be placed at a horizontal distance of not less than 2 meters from the fore and aft centerline of the vessel in the athwartship direction.

(d) When only one masthead light is prescribed for a power-driven vessel, this light must be exhibited forward of amidships. For a vessel of less than 20 meters in length, the vessel shall exhibit one masthead light as far forward as is practicable.

(e) On power-driven vessels 50 meters but less than 60 meters in length operated on the Western Rivers, and those waters specified in § 89.25 of this chapter, the horizontal distance between masthead lights shall not be less than 10 meters.

§ 84.04 Details of location of direction-indicating lights for fishing vessels, dredgers and vessels engaged in underwater operations.

(a) The light indicating the direction of the outlying gear from a vessel engaged in fishing as prescribed in Rule 26(c)(ii) (§ 83.26(c)(ii) of this chapter) shall be placed at a horizontal distance of not less than 2 meters and not more than 6 meters away from the two all-round red and white lights. This light shall be placed not higher than the all-round white light prescribed in Rule 26(c)(i) (§ 83.26(c)(i) of this chapter) and not lower than the sidelights.

(b) The lights and shapes on a vessel engaged in dredging or underwater operations to indicate the obstructed side and/or the side on which it is safe to pass, as prescribed in Rule 27(d)(i) and (ii) (§ 83.27(d)(i) and (ii) of this chapter), shall be placed at a maximum practical horizontal distance, but in no case less than 2 meters, from the lights or shapes prescribed in Rule 27(b)(i) and (ii)(§ 83.27(b)(i)and (ii) of this chapter). In no case shall the upper of these lights or shapes be at a greater height than the lower of the three lights or shapes prescribed in Rule 27(b)(i) and (ii) (§ 83.27(b)(i) and (ii) of this chapter).

§ 84.05 Screens.

(a) The sidelights of vessels of 20 meters or more in length shall be fitted with matt black inboard screens and meet the requirements of § 84.17. On vessels of less than 20 meters in length, the sidelights, if necessary to meet the requirements of § 84.15, shall be fitted with matt black inboard screens. With a combined lantern, using a single vertical filament and a very narrow division between the green and red sections, external screens need not be fitted.

(b) On power-driven vessels less than 12 meters in length constructed after July 31, 1983, the masthead light, or the all-round light described in Rule 23(c) (§ 83.23(c) of this chapter) shall be screened to prevent direct illumination of the vessel forward of the operator's position.

§ 84.06 Shapes.

(a) Shapes shall be black and of the following sizes:

(1) A ball shall have a diameter of not less than 0.6 meter.

(2) A cone shall have a base diameter of not less than 0.6 meters and a height equal to its diameter.

(3) A diamond shape shall consist of two cones (as defined in paragraph (a)(2) of this section) having a common base.

(b) The vertical distance between shapes shall be at least 1.5 meters.

(c) In a vessel of less than 20 meters in length shapes of lesser dimensions but commensurate with the size of the vessel may be used and the distance apart may be correspondingly reduced.

§ 84.13 Color specification of lights.

(a) The chromaticity of all navigation lights shall conform to the following standards, which lie within the boundaries of the area of the diagram specified for each color by the International Commission on Illumination (CIE), in the “Colors of Light Signals”, which is incorporated by reference. It is Publication CIE No. 2.2. (TC-1.6), 1975, and is available from the Illumination Engineering Society, 345 East 47th Street, New York, NY 10017 and is available for inspection at the Coast Guard, Ocean Engineering Division/Infrastructure Logistics Center, Aids to Navigation and Marine Environmental Response Product Line (CG-432), 2703 Martin Luther King, Jr. Ave, Mailstop 7714, Washington, DC 20593–7901. It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to:

http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. This incorporation by reference was approved by the Director of the Federal Register.

(b) The boundaries of the area for each color are given by indicating the corner co-ordinates, which are as follows:

(1) White:

\[ \begin{align*}
& x \begin{pmatrix} 0.525 \ 0.525 \ 0.452 \ 0.310 \ 0.310 \ 0.443 \end{pmatrix} \\
& y \begin{pmatrix} 0.382 \ 0.440 \ 0.440 \ 0.348 \ 0.283 \ 0.382 \end{pmatrix}
\end{align*} \]

(2) Green:

\[ \begin{align*}
& x \begin{pmatrix} 0.028 \ 0.009 \ 0.300 \ 0.203 \end{pmatrix} \\
& y \begin{pmatrix} 0.385 \ 0.723 \ 0.511 \ 0.356 \end{pmatrix}
\end{align*} \]

(3) Red:

\[ \begin{align*}
& x \begin{pmatrix} 0.350 \ 0.350 \ 0.350 \ 0.350 \ 0.350 \end{pmatrix} \\
& y \begin{pmatrix} 0.350 \ 0.350 \ 0.350 \ 0.350 \ 0.350 \end{pmatrix}
\end{align*} \]
§ 84.15  Intensity of lights.
(a) The minimum luminous intensity of lights shall be calculated by using the formula:
\[ I = 3.43 \times 10^6 \times T \times D^2 \times K \]
where
\( I \) is luminous intensity in candelas under service conditions,
\( T \) is threshold factor \( 2 \times 10^{-7} \) lux,
\( D \) is range of visibility (luminous range) of the light in nautical miles,
\( K \) is atmospheric transmissivity. For prescribed lights the value of \( K \) shall be 0.8, corresponding to a meteorological visibility of approximately 13 nautical miles.
(b) A selection of figures derived from the formula is given in the following table (Table 84.15(b)).

Table 84.15(b)

§ 84.17  Horizontal sectors.
(a)(ii) In the forward direction, sidelights as fitted on the vessel shall show the minimum required intensities. The intensities shall decrease to reach practical cut-off between 1 and 3 degrees outside the prescribed sectors.
(ii) For sternlights and masthead lights and at 22.5 degrees abaft the beam for sidelights, the minimum required intensities shall be maintained over the arc of the horizon up to 5 degrees within the limits of the sectors prescribed in Rule 21. (§ 83.21 of this chapter). From 5 degrees within the prescribed sectors the intensity may decrease by 50 percent up to the prescribed limits; it shall decrease steadily to reach practical cut-off at not more than 5 degrees outside the prescribed sectors.
(b) All-round lights shall be so located as not to be obscured by masts, topmasts or structures within angular sectors of more than 6 degrees, except anchor lights prescribed in Rule 30, (§ 83.30 of this chapter), which need not be placed at an impracticable height above the hull, and the all-round white light described in Rule 23(d)(e) (§ 83.23(e) of this chapter), which may not be obscured at all.
(c) If it is impracticable to comply with paragraph (b) of this section by exhibiting only one all-round light, two all-round lights shall be used suitably positioned or screened to appear, as far as practicable, as one light at a minimum distance of one nautical mile.

Note to paragraph (c): Two unscreened all-round lights that are 1.28 meters apart or less will appear as one light to the naked eye at a distance of one nautical mile.

§ 84.19  Vertical sectors.
(a) The vertical sectors of electric lights as fitted, with the exception of lights on sailing vessels underway and on unmanned barges, shall ensure that:
(i) At least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;
(ii) At least 60 percent of the required minimum intensity is maintained from 7.5 degrees above to 7.5 degrees below the horizontal.
(b) In the case of sailing vessels equipped with electric lights, the vertical sectors of electric lights, as fitted, shall ensure that:
(i) At least the required minimum intensity is maintained at all angles from 5 degrees above to 5 degrees below the horizontal;
(ii) At least 50 percent of the required minimum intensity is maintained from 25 degrees above to 25 degrees below the horizontal.
(c) In the case of unmanned barges the minimum required intensity of electric lights as fitted shall be maintained on the horizontal.
(d) In the case of lights other than electric lights these specifications shall be met as closely as possible.

§ 84.21  Intensity of non-electric lights.
Non-electric lights shall so far as practicable comply with the minimum intensities, as specified in the Table given in §84.15.14(b).

§ 84.22  Maneuvering light.
Notwithstanding the provisions of § 84.03(f), the maneuvering light described in Rule 34(b)(§ 83.34(b) of this chapter) shall be placed approximately in the same fore and aft vertical plane as the masthead light or lights and, where practicable, at a minimum height of one-
half meter vertically above the forward masthead light, provided that it shall be carried not less than one-half meter vertically above or below the after masthead light. On a vessel where only one masthead light is carried the maneuvering light, if fitted, shall be carried where it can best be seen, not less than one-half meter vertically apart from the masthead light.

§ 84.219 High-speed craft.
(a) The masthead light of high-speed craft with a length to breadth ratio of less than 3.0 may be placed at a height related to the breadth of the craft lower than that prescribed in § 84.03(a)(1), provided that the base angle of the isosceles triangle formed by the sidelong lights and masthead light, when seen in end elevation is not less than 27 degrees as determined by the formula in paragraph c.
(b) On high-speed craft of this section.
(b) The minimum height of masthead light above sidelong lights is to be 50 meters or more in length, the vertical separation between foremast and mainmast light of 4.5 meters required by §84.02(k) may be modified provided that such distance shall not be less than the value determined by the following formula: 
\[
y = \frac{(a + 17\Psi)C}{1000} + 2;
\]
where 
\[y\] is the horizontal distance between height of the sidelong lights and mainmast light above the foremast light in meters;
\[a\] is the height of the forward masthead light above the water surface in service condition in meters;
\[\Psi\] is the trim in service condition in degrees;
\[C\] is the horizontal separation of masthead lights in meters.

§ 84.20 Approval.
The construction of lights and shapes and the installation of lights on board the vessel must satisfy the Commandant, U.S. Coast Guard.
§ 85.1 General.
The lights mentioned herein shall, if exhibited in pursuance of Rule 26(d), be placed where they can best be seen. They shall be at least 0.9 meter apart but at a lower level than lights prescribed in Rule 26(b)(i) and (c)(i) contained in the Inland Navigational Rules Act of 1980, as amended (33 U.S.C. 2001 et seq.). The lights shall be visible all around the horizon at a distance of at least 1 mile but at a lesser distance from the lights prescribed by these Rules for fishing vessels.

§ 85.3 Signals for trawlers.
(a) Vessels when engaged in trawling, whether using demersal or pelagic gear, may exhibit:
   (1) When shooting their nets: two white lights in a vertical line;
   (2) When hauling their nets: one white light over one red light in a vertical line;
   (3) When the net has come fast upon an obstruction: two red lights in a vertical line.
(b) Each vessel engaged in pair trawling may exhibit:
   (1) By night, a searchlight directed forward and in the direction of the other vessel of the pair;
   (2) When shooting or hauling their nets or when their nets have come fast upon an obstruction, the lights prescribed in paragraph (a) of this section.

§ 85.5 Signals for purse seiners.
Vessels engaged in fishing with purse seine gear may exhibit two yellow lights in a vertical line. These lights shall flash alternately every second and with equal light and occultation duration. These lights may be exhibited only when the vessel is hampered by its fishing gear.

Source: CGD 81–009, 46 FR 61848, Dec. 21, 1981, unless otherwise noted.

Subpart A—

§ 86.01 Whistles.

(a) Frequencies and range of audibility. The fundamental frequency of the signal shall lie within the range 70–525 Hz–700 Hz. The range of audibility of the signal from a whistle shall be determined by those frequencies, which may include the fundamental and/or one or more higher frequencies, which lie within the frequency range of 180–700Hz (+/-1%) for a vessel of 20 meters or more in length, or 180–2100Hz (+/-1%) for a vessel of less than 20 meters in length and which provide the sound pressure levels specified in §86.05 paragraph (c) of this section.

(b) Limits of fundamental frequencies.

To ensure a wide variety of whistle characteristics, the fundamental frequency of a whistle shall be between the following limits:

(i) 70–200 Hz, for a vessel 200 meters or more in length;

(ii) 130–350 Hz, for a vessel 75 meters but less than 200 meters in length;

(iii) 250–525 Hz, for a vessel less than 75 meters in length.

§ 86.05 Sound signal intensity and range of audibility.

A whistle fitted in a vessel shall provide, in the direction of the forward axis, maximum intensity of the whistle and at a distance of 1 meter from it, a sound pressure level in at least one 1/3rd-octave band of not less than the appropriate figure given in Table 86.05 within the following frequency ranges (±1 percent):

(a) 130–1200 Hz, range of frequencies 180–700Hz (+/-1%) for a vessel of 20 meters or more in length;

(b) 250–1600 Hz, or 180–2100Hz (+/-1%) for a vessel 20 meters but less than 25 meters in length;

(c) 250–2100 Hz, for a vessel 12 meters but of less than 20 meters in length. Note. The range of audibility in the table above is for information and is approximately the approximate range at which a whistle may usually be heard on its forward axis with 90% probability in conditions of still air on board a vessel having average background noise level at the listening posts (taken to be 68 dB in the octave band centered on 250 Hz and 63 dB in the octave band centered on 500 Hz). It is shown for information purposes only. In practice, the range at which a whistle may be heard is extremely variable and depends critically on weather conditions; the values given can be regarded as typical but under conditions of strong wind or high ambient noise level at the listening post the range may be much reduced.

$^1$ When the measured frequencies lie within the range 180-450Hz

$^2$ When the measured frequencies lie within the range 450-800Hz

$^3$ When the measured frequencies lie within the range 800-2100Hz

(d) **Directional properties.**

The sound pressure level of a directional whistle shall be not more than 4 dB below the sound pressure level, specified in §86.05 paragraph (c) of this section, in any direction in the horizontal plane within ±45 degrees of the forward axis. The sound pressure level of the whistle in any other direction in the horizontal plane shall not be more than 10 dB less than the sound pressure level specified for the forward axis, so that the range of audibility in any direction will be at least half the range required on the forward axis. The sound pressure level shall be measured in that one-third 1/3-octave band which determines the audibility range.
(e) Positioning of whistles.

(i) When a directional whistle is to be used as the only whistle on the vessel and is permanently installed, it shall be installed with its forward axis directed forward.

(ii) A whistle shall be placed as high as practicable on a vessel, in order to reduce interception of the emitted sound by obstructions and also to minimize hearing damage risk to personnel. The sound pressure level of the vessel’s own signal at listening posts shall not exceed 110 dB(A) and so far as practicable should not exceed 100 dB(A).

(f) Fitting of more than one whistle.
If whistles are fitted at a distance apart of more than 100 meters, they shall not be sounded simultaneously.

(g) Combined whistle systems.

(i) A combined whistle system is a number of whistles (sound emitting sources) operated together. For the purposes of the Rules of Subchapter E a combined whistle system is to be regarded as a single whistle.

(ii) The whistles of a combined system shall:

1. Be located at a distance apart of not more than 100 meters;
2. Be sounded simultaneously;
3. Each have a fundamental frequency different from those of the others by at least 10 Hz; and
4. Have a tonal characteristic appropriate for the length of vessel which shall be evidenced by at least two-thirds of the whistles in the combined system having fundamental frequencies falling within the limits prescribed in §86.03 paragraph (b) of this section, or if there are only two whistles in the combined system, by the higher fundamental frequency falling within the limits prescribed in §86.03 paragraph (b) of this section.

Notes to paragraph (g): If, due to the presence of obstructions, the sound field of a single whistle or of one of the whistles referred to in §86.11 paragraph (f) of this section is likely to have a zone of greatly reduced signal level, a combined whistle system should be fitted so as to overcome this reduction.

(h) Towing vessel whistles.
A power-driven vessel normally engaged in pushing ahead or towing alongside may, at all times, use a whistle whose characteristic falls within the limits prescribed by §86.03 paragraph (b) of this section for the longest customary composite length of the vessel and its tow.

Subpart B—Bell or Gong

§ 86.21 (a) Intensity of signal.
A bell or gong, or other device having similar sound characteristics shall produce a sound pressure level of not less than 110 dB at 1 meter.

§ 86.23 (b) Construction.
Bells and gongs shall be made of corrosion-resistant material and designed to give a clear tone. The diameter of the mouth of the bell shall be not less than 300 mm for vessels of more than 20 meters or more in length, and Where practicable, a power-driven bell striker is recommended to ensure constant force but manual operation shall be not less than 200 mm for vessels of 12 to 20 meters in length possible. The mass of the striker shall be not less than 3 percent of the mass of the bell. The striker shall be capable of manual operation. Note: When practicable, a power-driven bell striker is recommended to ensure constant force.

Subpart C—Approval

§ 86.31 Approval. [Reserved]
PART 87—ANNEX IV: DISTRESS SIGNALS

Section Contents Sec.
§87.1 Need of assistance.
§87.3 Exclusive use.
§87.5 Supplemental signals.

§ 87.101 Need of assistance.
The following signals, used or exhibited either together or separately, indicate distress and need of assistance:
(a) A gun or other explosive signal fired at intervals of about a minute;
(b) A continuous sounding with any fog-signaling apparatus;
(c) Rockets or shells, throwing red stars fired one at a time at short intervals;
(d) A signal made by radiotelegraphy or by any other signaling method consisting of the group . . . — — — . . . (SOS) in the Morse Code;
(e) A signal sent by radiotelephony consisting of the spoken word “Mayday”;
(f) The International Code Signal of distress indicated by N.C.;
(g) A signal consisting of a square flag having above or below it a ball or anything resembling a ball;
(h) Flames on the vessel (as from a burning tar barrel, oil barrel, etc.);
(i) A rocket parachute flare or a hand flare showing a red light;
(j) A smoke signal giving off orange-colored smoke;
(k) Slowly and repeatedly raising and lowering arms outstretched to each side;
(l) The radiotelegraph alarm signal;
(m) The radiotelephone alarm signal;
(n) A distress alert by means of digital selective calling (DSC) transmitted on:
(i) VHF channel 70, or
(ii) MF/HF on the frequencies 2187.5 kHz, 8414.5 kHz, 4207.5 kHz, 6312 kHz, 12577 kHz or 16804.5 kHz;
(m) A ship-to-shore distress alert transmitted by the ship’s Inmarsat or other mobile satellite service provider ship earth station;
(n) Signals transmitted by emergency position-indicating radio beacons;
(o) Signals transmitted by radiocommunication systems, including survival craft radar transponders meeting the requirements of 47 CFR 80.1095; and
(p) A high intensity white light flashing at regular intervals from 50 to 70 times per minute.

§ 87.102 Exclusive use.
The use or exhibition of any of the foregoing signals except for the purpose of indicating distress and need of assistance and the use of other signals which may be confused with any of the above signals is prohibited.

§ 87.103 Supplemental signals.
Attention is drawn to the relevant sections of the International Code of Signals, the Merchant Ship International Aeronautical and Maritime Search and Rescue Manual, Volume III, the International Telecommunication Union Radio Regulations and the following signals:
(a) A piece of orange-colored canvas with either a black square and circle or other appropriate symbol (for identification from the air);
(b) A dye marker.
PART 88—ANNEX V: PILOT RULES

§ 88.01 Purpose and applicability.
This part applies to all vessels operating on United States inland waters and to United States vessels operating on the Canadian waters of the Great Lakes to the extent there is no conflict with Canadian law.

§ 88.03 Definitions.
The terms used in this part have the same meaning as the terms defined in the Inland Navigational Rules Act, part 83 of this subchapter.

§ 88.05 Copy of rules.
The operator of each self-propelled vessel 12 meters or more in length shall carry on board and maintain for ready reference a copy of the Inland Navigational Rules.
[USCG–2005–21531, 70 FR 66349, June 23, 2005]

§ 88.09 Temporary exemption from light and shape requirements when operating under bridges.
A vessel's navigation lights and shapes may be lowered if necessary to pass under a bridge.

§ 88.11 Law enforcement vessels.
(a) Law enforcement vessels may display a flashing blue light when engaged in direct law enforcement or public safety activities. This light must be located so that it does not interfere with the visibility of the vessel's navigation lights.
(b) The blue light described in this section may be displayed by law enforcement vessels of the United States and the States and their political subdivisions.

§ 88.12 Public safety activities.
(a) Vessels engaged in government sanctioned public safety activities, and commercial vessels performing similar functions, may display an alternately flashing red and yellow light signal. The identification light signal must be located so that it does not interfere with the visibility of the vessel's navigation lights. The identification light signal may be used only as an identification signal and conveys no special privilege. Vessels using the identification light signal during public safety activities must abide by the Inland Navigational Rules, and must not presume that the light or the exigency gives them precedence or right of way.
(b) Public safety activities include but are not limited to patrolling marine parades, regattas, or special water celebrations; traffic control; salvage; firefighting; medical assistance; assisting disabled vessels; and search and rescue.

§ 88.13 Lights on moored barges.
(a) The following barges shall display at night if practicable in periods of restricted visibility the lights described in paragraph (b) of this section:
(1) Every barge projecting into a buoyed or restricted channel.
(2) Every barge so moored that it reduces the available navigable width of any channel to less than 80 meters.
(3) Barges moored in groups more than two barges wide or to a maximum width of over 25 meters.
(4) Every barge not moored parallel to the bank or dock.
(b) Barges described in paragraph (a) of this section shall carry two unobstructed all-round white lights of an intensity to be visible for at least 1 nautical mile and meeting the technical requirements as prescribed in §84.15 of this chapter.
(c) A barge or group of barges at anchor or made fast to one or more mooring buoys or other similar device, in lieu of the provisions of Inland Navigation Rule 30, may carry unobstructed all-round white lights of an intensity to be visible for at least 1 nautical mile that meet the requirements of §84.15 of this chapter and shall be arranged as follows:
(1) Any barge that projects from a group formation, shall be lighted on its outboard corners.
(2) On a single barge moored in water where other vessels normally navigate on both sides of the barge, lights shall be placed to mark the corner extremities of the barge.
(3) On barges moored in group formation, moored in water where other vessels normally navigate on both sides of the group, lights shall be placed to mark the corner extremities of the group.
(d) The following are exempt from the requirements of this section:
(1) A barge or group of barges moored in a slip or dock used primarily for mooring purposes.
(2) A barge or group of barges moored behind a pierhead.

(3) A barge less than 20 meters in length when moored in a special anchorage area designated in accordance with §109.10 of this chapter.

(e) Barges moored in well-illuminated areas are exempt from the lighting requirements of this section. These areas are as follows:

- Chicago Sanitary Ship Canal
  - Mile 202.3 to 203.9
  - Mile 205.3 to 206.4
  - Mile 207.5 to 207.8
  - Mile 208.8 to 208.9
  - Mile 209.6 to 209.8
  - Mile 293.9 to 294.4
  - Mile 303.3 to 304.5
  - Mile 305.3 to 306.9
  - Mile 305.7 to 305.8
  - Mile 310.7 to 310.9
  - Mile 314.4 to 314.4
  - Mile 314.8 to 315.3
  - Mile 315.7 to 316
  - Mile 316.8 to 318.8
  - Mile 318.9 to 319.0
  - Mile 320.3 to 320.3
  - Mile 322.2 to 322.3
  - Mile 322.9 to 322.9

- Calumet Sag Channel
  - Mile 314.8

- Little Calumet River
  - Mile 321.3
  - Mile 322.3

- Calumet River
  - Mile 328.5 to 328.7
  - Mile 329.3 to 329.4
  - Mile 330 west bank to 330.2
  - Mile 334.4 to 334.6
  - Mile 332.2 to 332.4
  - Mile 332.9 to 332.9

- Cumberland River
  - Mile 426.8
  - Mile 494

§ 88.15 Lights on dredge pipelines.

Dredge pipelines that are floating or supported on trestles shall display the following lights at night and in periods of restricted visibility:

(a) One row of yellow lights. The lights must be:
  - Flashing 50 to 70 times per minute,
  - Visible all around the horizon,
  - Visible for at least 2 miles on a clear dark night,
  - Not less than 1 and not more than 3.5 meters above the water,
  - Approximately equally spaced, and
  - Not more than 10 meters apart where the pipeline crosses a navigable channel. Where the pipeline does not cross a navigable channel the lights must be sufficient in number to clearly show the pipeline's length and course.

(b) Two red lights at each end of the pipeline, including the ends in a channel where the pipeline is separated to allow vessels to pass (whether open or closed). The lights must be:
  - Visible all around the horizon, and
  - Visible for at least 2 miles on a clear dark night, and
  - One meter apart in a vertical line with the lower light at the same height above the water as the flashing yellow light.
