PUBLIC NOTICE 09-03-23

All interested parties are herein notified that the Commander, Ninth Coast Guard District, has received application materials dated 10 May 2023 from the New York State Department of Transportation ("NYSDOT") for approval of location and plans for the replacement of a bridge across a navigable waterway of the United States.

BRIDGE, WATERWAY AND LOCATION: U.S. Route 11 Bridge, Bridge E-64, across the Erie Canal, mile 150.58, between the Cicero, Onondaga County, and Hastings, Oswego County, New York. This Erie Canal section is also referred to as the Oneida River and the Barge Canal.

CHARACTER OF WORK: NYSDOT proposes to replace the existing three-span fixed bridge with another three-span bridge with updated features. The existing bridge is 377.50-feet long from abutment-to-abutment, has an out-to-out width of 56.75-feet, and provides vertical and horizontal clearances as described below. The proposed replacement bridge would be another three-span structure located on the same alignment and footprint as the existing structure. It would be 413.50-feet long from abutment-to-abutment, have an out-to-out width of at least 57.25-feet over the navigation channel pending final design, and provide vertical and horizontal clearances as noted below. The purpose and need of the proposed project is to replace the current structure which is deteriorating and has exceeded its original design life.

In addition to proposing a permanent replacement structure, NYSDOT also proposes construction of a temporary bridge that would be located approximately on the same alignment as the existing structure and approximately 50.00-feet west. It would provide a detour to land traffic and removed upon completion of construction of the replacement structure. Existing piers would be removed to the mudline and replaced, existing abutments would be removed to finish ground, and the existing superstructure would be removed and replaced.

MINIMUM NAVIGATIONAL CLEARANCES:

The proposed permanent bridge increases the horizontal clearance and matches the existing bridge’s vertical clearance. The temporary bridge matches the existing bridge’s clearances.

Datum: Elevations referenced to Low Water Datum, 342.00-feet, Barge Canal Datum ("BCD").
ENVIRONMENTAL CONSIDERATIONS:

The Federal Highway Administration ("FHWA") is the lead Federal agency for satisfying the requirements of the National Environmental Policy Act (NEPA). NYSDOT has recommended that FHWA classify the project as a Categorical Exclusion for Federal-aided highway projects. FHWA's determination is forthcoming. The U.S. Coast Guard has tentatively determined that the proposed action will not have a significant impact for the purposes of NEPA for the project.

The need for water quality certification ("WQC") in accordance with Section 401 of the Clean Water Act, as amended, is to be determined by the New York State Department of Environmental Conservation ("NYSDEC"). NYSDEC's determination is forthcoming.

NYSDOT's permit application indicates that no wetlands will be taken or affected by this project. The Coast Guard defers to the U.S. Army Corps of Engineers ("USACE") regarding wetlands impact determinations. Their determination is forthcoming.

The bridge is located in the floodplain. The 100-year flood elevation is 374.20-feet, while elevation of the low member of the navigation span is 394.50-feet. Elevations are referenced to Barge Canal Datum.

SOLICITATION OF COMMENTS:

Mariners are requested to comment on the proposed navigation clearances, placement of a bridge protective system and other navigational safety issues, including need for clearance gauges and extent of nighttime navigation to determine the need for bridge lighting. Interested parties are requested to express their views, in writing, on the proposed bridge project including its possible impacts to navigation.

We will forward comments of an environmental nature such as those regarding wildlife refuges, public parks, historic sites, wetlands, floodplain issues, air, water quality, environmental justice, etc. to FHWA. Comments will be received for the record at the address noted in the header or via email to michael.o.walker2@uscg.mil through August 11, 2023.
