SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

GPS Testing

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". Canceled charts do not meet USCG carriage requirements. A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: <https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which

may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

NEW MERCHANT MARINER CREDENTIAL (MMC)

The U.S. Coast Guard has announced a new merchant mariner credential (MMC). This milestone marks the first comprehensive revision of the mariner credential in nearly a decade and is strategically designed to enhance both quality of service and security within the Marine Transportation System (MTS). U.S. Coast Guard Marine Safety Information Bulletin (MSIB) 01-24, Merchant Mariner Credential Passport Booklet, has been posted on the U.S. Coast Guard's Deputy Commandant for Operations MSIB Site and was announced on the U.S. Coast Guard National Maritime Center Homepage. Mariners should reference the resources below for more information on the credential.

FL/AL/GA - APALACHICOLA, CHATTAHOOCHEE, AND FLINT (ACF) RIVER SYSTEM

In accordance with Section 7-11 of the Apalachicola, Chattahoochee, and Flint (ACF) Master Water Control Manual and the Jim Woodruff Lock and Dam and Lake Seminole Water Control Manual (Appendix A), dated March 2017, a 7 foot navigation channel will be supported via water releases on the ACF during the months of January 2024 through May 2024, when the composite storage for the system is in Zones 1 and 2. Below is a link to a graphic showing the ACF composite storage in Zone 1, indicating sufficient water is available to continue supporting navigation. The composite storage graphic, which is updated weekly, can be viewed at the following website:

<https://water.sam.usace.army.mil/ACFconstorage.pdf>

A 7.4 foot Blountstown Gauge is needed to provide a 7 foot channel on the Apalachicola River. River stages for the ACF system can be viewed at:

https://water.sam.usace.army.mil/forecast_acf_plots.htm

The Jim Woodruff Lock is closed to marine traffic through May 31, 2024, for lock valve and upper miter gate repairs. The lock will be available at intermittent times for critical and emergency locking. The George W. Andrews and Walter F. George Locks remain closed due to mechanical failures. The USACE will issue Navigation Bulletins on a monthly and as-needed basis throughout the navigation season in reference to the lock closures and any waterway restrictions. For additional information, mariners may contact Herbert Bullock with the USACE Mobile District, at (251) 694-3703.

LNM: 06-24

AL/MS - DEMOPOLIS LOCK CLOSURE, MILE 213.2 - USACE Waterway User Calls

Continuing until further notice, the Demopolis Lock on the Tombigbee River, Mile 213.2, is closed to marine traffic for emergency repairs to the upper miter gate. The lock closure affects navigation on the Black Warrior/Tombigbee Rivers and the Tennessee-Tombigbee Waterway.

Construction and repairs will continue in the area with an estimated completion date of May 30, 2024, or sooner. Various vessels, barges, cranes, and construction equipment will be in the area throughout operations. Vessels should avoid the area for the duration of the closure. Updates on the status of the Demopolis Lock will be discussed by the U.S. Army Corps of Engineers on reoccurring waterway user calls, hosted every Wednesday at 2:30 p.m. (CST). Interested parties can join the waterway user calls on Teams or via phone at:

TX - HOUSTON SHIP CHANNEL - Channel Dimensions/Navigation Advisory

The Houston Ship Channel widening project is complete between Houston Ship Channel Light 53 (LLNR-24180) through Houston Ship Channel Light 62 (LLNR-24260), approximately Eagle Point to South Boat Cut Channel. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep. The U.S. Coast Guard Aids to Navigation Team has set temporary lighted buoys, based on the new channel dimensions, to replace all aids to navigation from HSC Lights 53 to 62. Mariners are advised to proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) between HSC Lights 61 (LLNR-24255) and 62 (LLNR-24260) and HSC Lights 63 (LLNR-24295) and 64 (LLNR-24300). Houston Ship Channel Lighted Buoy 61A and 62A have been temporarily established to aid in navigating the transitioning channel, in the following positions:

Houston Ship Channel Lighted Buoy 61A: 29-32-31.38N 094-54-17.64W

Houston Ship Channel Lighted Buoy 62A: 29-32-37.02N 094-54-06.84W

To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners should reference U.S. Coast Guard Sector Houston-Galveston Marine Safety Information Bulletins 06-24 and 07-24 at: <https://homeport.uscg.mil/my-homeport/safety-Notifications/MSIB?cotpid=28>

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

TX - GIWW, MILE 400.8, WHL - BRAZOS RIVER FLOODGATES - Floodgate Condition

Continuing until further notice, mariners are advised to proceed with caution when transiting through the Brazos River Floodgates along the GIWW, in the vicinity of Freeport, TX. Recent investigations indicate degraded and damaged conditions to the floodgate structures, creating a snag hazard for vessels that use the longwalls to guide themselves through the locks. A washed out portion of the western longwall has been identified as particularly hazardous. Vessels making multiple passes through the locks while building their tow have an increased risk of an allision with the damaged structure and should transit with extreme caution. Additionally, the south sector gate is unable to fully open into the recess and is sticking into the channel by approximately 5 inches. Vessels should hug the northside of the chamber while transiting through the West Brazos Floodgates. All vessels should transit the area with extreme caution and monitor conditions at the locks by contacting the Lockmaster, at (979) 402-2888.
