SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

GPS Testing

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, https://www.navcen.uscg.gov. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". Canceled charts do not meet USCG carriage requirements. A comprehensive list of all canceled NOAA charts is available at: http://www.charts.noaa.gov/MCD/Dole.shtml. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html

An online NOAA Custom Chart application at: https://devgis.charttools.noaa.gov/pod is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

NEW MERCHANT MARINER CREDENTIAL (MMC)

The U.S. Coast Guard has announced a new merchant mariner credential (MMC). This milestone marks the first comprehensive revision of the mariner credential in nearly a decade and is strategically designed to enhance both quality of service and security within the Marine Transportation System (MTS). U.S. Coast Guard Marine Safety Information Bulletin (MSIB) 01-24, Merchant Mariner Credential Passport Booklet, has been posted on the U.S. Coast Guard's Deputy Commandant for Operations MSIB Site and was announced on the U.S. Coast Guard National Maritime Center Homepage. Mariners should reference the resources below for more information on the credential.

Chart 11352 LNM: 21-24

SPECIAL NOTICE - HURRICANE SEASON 2024

The hurricane season extends from June 1, 2024 through November 30, 2024. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.
- (f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM Weather Channel for National Weather Service Broadcasts.

During the hurricane season, drawbridges, locks, and navigation structures along the coast may deviate from normal operating procedures. Some structures may be unable to open because of high winds, high water levels, or to facilitate evacuation of land traffic. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may close on short notice and well in advance of the storm. Mariners should anticipate these closures and are urged to seek safe harbor as soon as possible.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico and surrounding waters may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position, as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation System marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner, unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) Region B and follow the traditional 3R rule of red, right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation, is generally considered as moving westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest U.S. Coast Guard unit.

LNM: 21-24

SPECIAL NOTICE - HURRICANE SEASON 2024 - PORT CONDITIONS

To promote the safety of life, the environment, and the viability of the Marine Transportation System, all potentially affected U.S. Coast Guard Captains of the Port will issue a series of Port Conditions prior to the arrival of a hurricane or tropical activity. Port Conditions are issued on a set timeline prior to the arrival of gale force winds associated with a tropical activity and identify the status of the port. Timelines associated with each port condition are subject to local modifications based upon circumstances, but are typically issued as follows:

Port Condition WHISKEY: Set 72 hours prior to the arrival of gale force winds.

Port Status: OPEN to all commercial traffic.

Port Condition X-RAY: Set 48 hours prior to the arrival of gale force winds.

Port Status: OPEN to all commercial traffic.

Port Condition YANKEE: Set 24 hours prior to the arrival of gale force winds. Port Status: RESTRICTED, with vessel traffic control measures in effect. Port Condition ZULU: Set 12 hours prior to the arrival of gale force winds.

Port Status: CLOSED to all vessel traffic, except for movements or activities specifically authorized by the COTP.

Additional requirements or actions to address port-specific safety concerns will be issued by the COTP in conjunction with each Port Condition. After the passing of a hurricane, local COTPs will issue updates regarding the port status via Broadcast Notice to Mariners and MSIBs. Mariners should closely monitor Port Conditions, hurricane preparation safety requirements, and port status updates for their port at: https://homeport.uscq.mil/

SPECIAL NOTICE - USACE NEW ORLEANS DISTRICT HURRICANE SEASON 2024

In the event of a tropical storm or hurricane, locks and navigation structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe. The structures are then closed in accordance with hurricane procedures. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may be closed on short notice and well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible. Mariners should consult the respective agency listed below for updates regarding the following structures:

TX - HOUSTON SHIP CHANNEL - Channel Dimensions/Navigation Advisory

The Houston Ship Channel widening project is complete between Houston Ship Channel Light 53 (LLNR-24180) through Houston Ship Channel Light 62 (LLNR-24260), approximately Eagle Point to South Boat Cut Channel. Recent surveys confirm the channel dimensions have been extended to 700 ft wide by 46 ft deep in the main channel, with additional barge lanes on either side measuring 235 ft wide by 12 ft deep. The U.S. Coast Guard Aids to Navigation Team has set temporary lighted buoys, based on the new channel dimensions, to replace all aids to navigation from HSC Lights 53 to 62. Mariners are advised to proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) between HSC Lights 61 (LLNR-24255) and 62 (LLNR-24260) and HSC Lights 63 (LLNR-24295) and 64 (LLNR-24300). Houston Ship Channel Lighted Buoy 61A and 62A have been temporarily established to aid in navigating the transitioning channel, in the following positions: Houston Ship Channel Lighted Buoy 61A: 29-32-31.38N 094-54-17.64W

Houston Ship Channel Lighted Buoy 62A: 29-32-37.02N 094-54-06.84W

To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners should reference U.S. Coast Guard Sector Houston-Galveston Marine Safety Information Bulletins 06-24 and 07-24 at: https://homeport.uscg.mil/my-homeport/safety-Notifications/MSIB?cotpid=28

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections. This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

Vessels making multiple passes through the locks while building their tow have an increased risk of an allision with the damaged structure and should transit with extreme caution. Additionally, the south sector gate is unable to fully open into the recess and is sticking into the channel by approximately 5 inches. Vessels should hug the northside of the chamber while transiting through the West Brazos Floodgates.
