As part of the sea-to-shore transition of the export cable, Sunrise Wind will install a temporary pier at Smith Point Park Intercoastal Waterway. Pier construction has begun and will take about a month to complete. Sunrise Wind will use several transport barges to move equipment to and from Smith Point Marina to the temporary pier. Work in Sunrise Wind's nearshore cable landfall area will be located approximately 1,320 feet off the shoreline. A liftboat and a support vessel will work in the nearshore area from as early as November 15th thru January 2025. Crews will use a common technique known as horizontal directional drilling (HDD) that allows us to drill deep under the beach without disturbing its surface. It also allows us to maintain public access to the beach throughout the construction process. The temporary pier will be removed on or about May 1, 2025. Sunrise Wind will install a temporary pier near Smith Point Park. Pier construction will begin on or about 09/03/2024 and be completed on or about 09/15/25. The temporary pier will be removed on or about 05/01/2025. |  |

Hours of operations are from Monday to Friday between 6:30 a.m. to midnight. There will be waterborne equipment blocking one draw of a swing bridge at a time and the other draw will be free and clear of any equipment for the passage of vessels. Mariners can contact one of the three (3) provided telephone numbers/emails or via marine radio VHF-FM CH 13/16 advising of travel through the channel (including possible return trips): 1. Ernest Hamilton – Main Span Superintendent – (904) 451-2979, ehamilton@traylor.com 2. Martir Ortez – Main Span Project Manager – (562) 307-4916, mortez@traylor.com 3. Jim Hummel – Main Span Area Lead - (917) 417-4885, Jim.Hummel@skanska.com Skanska Traylor PNB JV has been awarded the construction of the New Portal North Bridge Project (NJT Contract No. 20-083X, WBS No. GC.02) with a Notice to Proceed of April 7, 2022. Specific to the Hackensack River work, mile 5.0, the project consists of constructing two bridge piers, demolition of the existing center pier north fender, erecting three tied-arch spans of approximately 400 LF (1,200 LF overall), and demolition of the existing bridge once railroad traffic is switched to the new bridge. The current status of the channels is below: East Channel – Open, To Close On or About January 31, 2025 West Channel – Closed, To Open On or About January 31, 2025 Portal Bridge Waterway Closure: --The Coast Guard is establishing a temporary safety zone for certain waters of the Hackensack River. This action is necessary to provide for the safety of life on these navigable waters near the Portal Bridge during construction between November 2024 and December 2025. When enforced, entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port New York or a designated representative. --The date for the first of three 14-day windows of full waterway closures has passed. The anticipated dates for the second and third, 14-day windows of full waterway closures are January 17, 2025, through January 31, 2025; and February 16, 2025, through March 2, 2025. Additionally, a 90-day comment period will run concurrently with this temporary interim rule to ensure that the regulation is both workable and reasonable. Once the Temporary Interim Rule and request for comments has been published we will be accepting comments at <a href="https://www.regulations.gov">https://www.regulations.gov</a> , and type USCG-2024-0404 in the search box and click "Search". This project will be completed by October 22, 2027. Please be advised that the existing Portal Bridge east channel horizontal clearance (temporary fender) will be maintained at approx. 88ft and west channel horizontal clearance at 91ft until it's demolished. Mariners are advised to exercise caution when transiting the area. | Lat: 40° 45' 12"<br>Lon: -074° 05' 44" |

| Main Channel - Hudson River/General/Bridges/Rehabilitation | Bridges     | General/Bridges/Rehabilitation From: 2024-09-03 To: 2026-06-30 Location: 42.5094° N / 73.77315° W Bridge Name: Castleton Highway Bridge Bridge Rehabilitation – Construction to the Castleton on Hudson Bridge across Hudson River at mile 135.7 will commence on September 3, 2024. Hours of operation are from 7 a.m. and 7 p.m. Temporary safe span platforms will be installed under the tram rail steel (over navigation channel) which will reduce vertical clearance by approximately 6 feet. A minimum of 210 feet east side of navigation channel (between L24' and L17') will be cleared of obstruction at all times for safe passage of vessels. In addition, a 25 feet of buffer will be maintained each side of the channel marker. A safety boat will be operated IVO the bridge. Hot work will be performed during construction. Mariners requiring full horizontal clearance can contact the contractor/operator via marine radio VHF-FM CH 13 or call 518-857-9215. For all construction related questions, please contact Tim Mastro at 518-337-7231. This project is to be completed by June 30, 2026. Mariners are advised to exercise caution when transiting the area.   | Lat: 42° 30' 34"<br>Lon: -073° 46' 23" |

The HDPE pipe fusing Marine support operations will be fabricating and fusing 12" HDPE pipe for the Cementon HDD beginning adjacent to 41-15.653N, 073-58.699W. The fused pipe length will extend into the water along the embankment and extend to 41-16.049N, 073-58.573W. The fused HDPE pipe will be marked along the embankment with white spherical marker buoys. Each anchor buoy will be equipped with high visibility reflective tape and illuminated with fixed white lights with a visible range of 2 nautical miles. Additional lights will be placed at intervals on the HDPE pipe between the buoys. On or about October 13, 2024, the 2,300-foot length of HDPE pipe will be towed to Cementon to 42-08.351N, 073-54.569W, under the escort of a tugboat and tending sentry vessels. Equipment on the scene will be a Support Tug: 'Austin' (25ft 6" length x 14ft beam) AIS equipped, Crew Transfer/Work Vessels: 'Patty C' (26ft length x 10ft beam), 'Little Johnny' (26ft length x 10ft beam), 'Maren' (32ft length x 10ft beam). Monitoring Hailing Channel VHF CH13 and CH16, Working Channel VHF CH73. Wide berth requested. Transit of the HDPE pipe will be coordinated with Vessel Traffic prior to and during the movement   |                                     |
| Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Survey Operations  | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Survey Operations Caldwell Marine International, LLC will be in operations in support of the Congers Horizontal Directional Drill, on the Hudson River at Congers, seven days a week, 24 hours per day, from November 20, 2024 to January 31, 2025. The marine support operation will include a crane support barge and a drill rig barge on spuds and a four point-anchor moor at N41 degrees, 09.675 minutes, Long W73 degrees, 55.151 minutes. The support assets will be paired and remain stationary throughout the entire operation. Mobilization of the assets will originate from Greens Cove at N41 degrees, 14.827 minutes, Long W73 degrees, 57.287 minutes. All anchor positions, once stationary, will be marked with white spherical marker buoys. Each anchor buoy will be equipped with high visibility reflective tape and illuminated with fixed white lights with a visible range of 2 nautical miles. Barge positions will be maintained with spuds and breasting piles. Sentry vessels will be utilized as part as the construction project. Each barge will be equipped with a light tower that will be continuously illuminated through off-shift and nighttime hours. The light towers will be shielded to not interfere with navigation and ATON. Equipment on scene will be the CMI Crane Support Barge: 'Alexandra' (120ft length x 55ft beam), CMI Marine Drill Rig Barge 'U 806' Barge (180ft length x 54ft beam), Support Tug: 'Austin' (25ft 6" length x 14ft beam) AIS equipped, Crew Transfer/Work Vessel: 'Maren' (32ft length x 10ft beam), 'Lil' Johnny' (26ft length x 9ft beam). Monitoring Hailing Channel VHF CH13 and CH16, Working Channel VHF CH73. Marine assembly will remain stationary for the entire scheduled work period. There will also be a vertical pile support system and a horizontal steel casing pipe in place for the duration of the construction period. The barge will be moored by driven breasting piles.  |                                     |
| Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Boring and Core Samples                                    | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Dredging From: 2024-11-24 To: 2027-01-20 Location: 40.7531° N / 74.00982° W Weeks Marine will conduct soil mixing within a 110' Wide x 600' Long cofferdam for the Hudson River Ground Stabilization Program located West of Pier 66 from October 10th, 2024, to January 20th, 2027. The four corners of the cofferdam structures will be marked with flashing white lights at 4S. Additional white flashing lights will be added at every 30 feet of the structure. White reflective tape 6" Wide x 4' Long Minimum will be installed above the MHHW marker every 50 feet on the structure. Hours of operation are currently 12 HRS x 5 Days a week Monday through Friday. The Weeks 283 barge will be on the southern side outside of the cofferdam to dig for obstructions within the cofferdam and to support the drilling operations within. The Weeks 283 barge has limited maneuverability and requires a tugboat to move the vessel. 24 Hour Minimum notice is required to facilitate the barge move. Weeks Marine is requesting all Mariners to use extreme caution and transit the working area at their slowest safe speed and use the western side of the navigable channel. Marine VHF Channel 13 / 16 / 67 will be monitored while onsite. Class A AIS will be set up on the Weeks Marine 283 Barge: AIS Vessel Name (WEEKS 283). 1 Dump Scow will be onsite tied up alongside the Weeks 28. The 283 Barge and Dump Scow will be marked with Steady White Lights on all four corners of the barge. Starting on January 14, 2025, the WEEKS 575 will be picking and relocating a moveable wall pipe girder. The Weeks 575 will start working on the inside of the cofferdam then relocate to the east side. The WEEKS 568 barge will be assisting to disassemble and then reassemble the mobile wall. The Weeks 568 will work from the south side of the cofferdam. Hours of operation are 12 HRS x 5 Days a week Monday through Friday. The Weeks 575 and Weeks 568 Derrick Crane barges have limited maneuverability and a require a Tugboat to move the vessel. A 24-Hour Minimum notice is required to facilitate the barge moves. Class A AIS is set up on the Weeks Marine 575 Crane Barge: AIS Vessel Name (WEEKS 575) as well as the Weeks Marine 568 Crane Barge: AIS Vessel Name (WEEKS 568). 2 Material barges – the Weeks 162 and the Weeks 282 – will be onsite tied up alongside the Weeks 568. The 568 Crane Barge, Weeks 575 Crane Barge, and Material Barges will be marked with Steady White Lights on all four corners of the barge. Weeks Marine is requesting all Mariners to use extreme caution and transit the working area at their slowest safe speed and use the western side of the navigable channel. Marine VHF Channel 13 /16/ 67 will be monitored while onsite for the Weeks 568 and Weeks 575. |                                     |

| Ambrose Channel - Main Channel/General/Bridges/Rehabilitation   | Bridges                                 | General/Bridges/Rehabilitation From: 2023-09-11 To: 2025-12-30 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge Lower – Level Deck Rehab – Repairs to the Verrazano Narrows Bridge over New York Harbor at mile 0.0 will commence on September 11, 2023. This project includes milling, paving, cleaning, painting, steel repairs/replacement, and miscellaneous drainage/utility work throughout the bridge. From April 1, 2024 and November 30, 2024, a bridge traveler will be operated under the main span to perform repairs (weekends from 11 pm Friday night to 5 am Monday morning) and weekdays for inspection. The traveler will be moved out of the navigable channel after work hours or when not in use. Installation of safespan shielding will be installing under the approach span between Brooklyn Tower and Brooklyn Anchorage on or about February 29, 2024 through November 30, 2024. The safespan shielding will not reduce the vertical clearance by more than 5ft below the low steel or below the existing catwalks. Mariners requiring full vertical clearance in the main navigation channel with one hour advance notice can contact Scott Valente via marine radio VHF-FM Ch. 13/16 or call 732-337-7576. Any questions regarding the construction can contact resident engineer Jeff Sawyer at 317-439-0978. This project is to be completed by December 30, 2025. Mariners are advised to exercise caution when transiting the area. | Lat: 40° 36' 22"<br>Lon: -074° 02' 44" |

## Middle Channel

### Additional MSI Categories

| TITLE  | SUBCATEGORY  | DESCRIPTION   | LOCATION |
|--|--------------|---|----------|
| New Rochelle Harbor North Approach - Middle Channel/General/Safety Zones/COPT Restrictions | Safety Zones | General/Safety Zones/COPT Restrictions From: 2024-12-16 To: 2027-05-31 The Coast Guard is establishing a temporary safety zone for certain waters of Long Island Sound in the vicinity of the Glen Island Approach Bridge, New Rochelle, NY, for construction vessels and machinery involved in the rehabilitation project of the bridge. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with the bridge construction between December 2, 2024, through May 27, 2027. When enforced, this regulation prohibits persons and vessels from being in the safety zone unless authorized by the Captain of the Port New York or a designated representative. DATES: This rule is effective without notice from December 3, 2024, through 5 p.m. on May 27, 2027. For the purposes of enforcement, actual notice will be used from midnight on December 2, 2024, until December 3, 2024. This rule will only be enforced during periods when construction operations at the bridge are in progress. Comments and related material must be received by the Coast Guard on or before March 3, 2025. ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to <a href="https://www.regulations.gov">https://www.regulations.gov</a> , type USCG-2024-0956 in the search box and click "Search." Next, in the Document Type column, select "Supporting & Related Material." FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Jeffrey Yunker, Waterways Management Division, U.S. Coast Guard Sector New York; telephone 718-354-4195, email Jeffrey.M.Yunker@uscg.mil. IV. Discussion of the Rule This rule establishes a safety zone from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The anticipated dates for the windows of full channel closures are from 7 a.m. on December 2, 2024, through 5 p.m. on December 20, 2024; from 7 a.m. on February 3, 2025, through 5 p.m. on May 22, 2025; and from 7 a.m. on October 2, 2025, through 5 p.m. on April 29, 2026. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in advance of these scheduled closures. All these dates are tentative and subject to change due to weather, supply chain delays, or other unforeseen circumstances. This rule remains effective through May 27, 2027, in case the project is delayed due to unforeseen circumstances. The area regulated by the safety zone will encompass the waters around the Glen Island Bridge and will cover all navigable waters, from surface to bottom, within the area formed by connecting the following latitude and longitude points in the following order: 40°53'18.58" N 73°46'56.26" W; thence to 40°53'22.08" N 73°46'59.39" W; thence north along the shore to 40°53'23.8" N 73°46'57.51" W; thence to 40°53'19.15" N 73°46'52.54" W and thence south along the shore back to the point of origin. This area is intended for the vessels and machinery being used by personnel for the Glen Island Bridge rehabilitation project. The duration of the zone is intended to ensure the safety of personnel, vessels, and these navigable waters during the bridge construction. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition. |          |

| Quantuck Canal - Moriches Bay/General/Hazards To Navigation/Shoaling Reported | Hazards To Navigation | General/Hazards To Navigation/Shoaling Reported From: 2024-09-13 To: 2039-12-28 NY-SHINNECOCK BAY TO EAST ROCKAWAY INLET (Chart 12352)-MORICHES BAY-Update 2/8/22 Severe shoaling is present in Moriches Bay along the Long Island Intracoastal Waterway in the vicinity of Moriches Bay Buoys 21, 24, 26, 27, 28, and 29 extending the entire width of the channel at nearly all tide levels. The area from Buoys 24 to 29 is only navigable at the operator's risk. The most severe area of shoaling can be found between buoys 26 and 28 and is less than half the charted channel depth in some areas. Mariners should be aware that the Aids to Navigation in these areas are unreliable due to shoaling and mariners are strongly advised to seek alternate routes. Moriches Bay dredging has been completed. Shoaling has been reported in Moriches Bay along the Long Island Intercoastal Waterway in the vicinity of Moriches Bay Buoy 17, 18, 21, 26, 27, 28 and 29 extending the entire width of the channel and at any tide level. The most severe area of shoaling can be found between buoys 26 and 27 and is less than 3 ft. Shoaling is also reported in Moriches Inlet in the vicinity of Moriches Inlet East Cut Buoys 3E and 5E. Mariners should be aware that the Aids to Navigation in these areas have been deemed unreliable due to shoaling and mariners are advised to seek alternate routes. If transiting these areas, do so only at high tide and proceed slowly and with extreme caution. In addition, shoaling exists west of Moriches Bay Buoy 23 and East of Moriches Bay Buoy 27. | Long Island Sound Eastern Part - New London Harbor/General/Bridges/Repairs, Painting, Or Fender Replacement   | Bridges                                 | From April 1 2022 to June 25, 2025, between 6 a.m. and 5:30 p.m., the Connecticut Department of Transportation will conduct repairs on the Gold Star I-95 Northbound Bridge over the Thames River, mile 3.1. Work will be performed from hanging platforms on the bridge structure. The platforms will extend over the river approximately 420 feet from the shoreline on the New London side and 290 feet from the shoreline on the Groton side and will not be over federal channel. The reduction in vertical clearance caused by the platforms will not exceed 3 feet below the current bridge vertical clearances of 135 feet (MHW). A safety boat will be in the water and will monitor VHF Channel 16 when work is performed over the water. Questions may be addressed to Scott Thompson, Project Manager Aetna Bridge Company, at 401-663-6052 or Keith Schoppe, CT DOT, at 860-213-2360. Chart 13213   | Lat: 41° 21' 51"<br>Lon: -072° 05' 16" |

Equipment n scene will be a dredge barge and soil barge, monitoring VHF-FM CH 13.  | Lat: 41° 21' 25"<br>Lon: -072° 05' 07" |
| Long Island Sound Eastern Part - New London Harbor/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-01-08 To: 2025-01-31 Location: 41.33874° N / 72.08182° W On or about January 8th, 2025, Cashman Dredging and Marine Contracting Company, LLC will begin mobilizing equipment into New London Harbor, Connecticut for installing marine plate anchors contracted by General Dynamics Electric Boat. The marine plate anchor installation for the project is expected to begin on or about January 10th, 2025. Marine plate anchor installation and anchor pull-test operations will occur adjacent to Electric Boat's South Yard in Groton, CT. The installation locations are east of the Federal Navigation Channel in the Thames River. Equipment for the project will include the following: "CAPE MAY" crane spud barge, "SEI-41" deck barge, "C Girls" crewboat, "Survey 5" survey boat, and the tugboat "JAMES CHARLES" for barge movements and anchor handling. Please note that the "CAPE MAY" will be configured with a six-point anchor system and two anchors are anticipated to encroach approximately 100-feet into the 500-foot wide Federal Channel on the eastern side of the Federal Channel by Electric Boat's Facility. Each anchor mooring buoy will have reflective tape and white lights marking the location of the anchors. In the event a vessel requires the full width of the Federal Channel please radio the "CAPE MAY" and/ or tugboat "JAMES CHARLES" with at least a 15-minute advance notice or more, if possible, to move the anchors. The "CAPE MAY" and tugboat will be monitoring VHF Channels 13 and 16 and Working VHF Channel 78. The "CAPE MAY" and other listed assets, will operate 7 days a week, 12 hours a day (6AM to 6PM). The work is scheduled to be completed on or about January 31, 2025. | Lat: 41° 20' 19"<br>Lon: -072° 04' 55" |
| Long Island Sound Eastern Part - New London Harbor/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-02-03 To: 2025-02-16 Location: 41.3475° N / 72.08444° W A barge, of approximate dimensions 500' x 105', will be undocked from Electric Boat Graving Dock No. 3., in the vicinity of Buoy 11 and general anchorage A, from February 11, 2025, to February 16, 2025. The operation is subject to restricted maneuvering due to the Barge and Graving Dock No. 3 configurations as well as tidal restrictions. This will result in a blockage of the Thames River Channel for a period of approximately 4 hours. Equipment on scene will be a 500' X 105' barge, a 140 X 40' barge, a crane barge, and miscellaneous tugs, monitoring VHF-FM CH 13 and 16. Please note that a barge (approx. 100'x 40') will be placed in an east/west orientation in way of Electric Boat Graving Dock No. 3 entrance to assist in maneuvering. This barge is estimated to be in place for period of approximately 48 hours, which will partially impede the channel.  | Lat: 41° 20' 51"<br>Lon: -072° 05' 04" |
| Long Island Sound Eastern Part - New London Harbor/General/Marine Construction (Excluding Bridges)/Dredging   | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Dredging From: 2024-10-01 To: 2025-01-31 CT-NEW LONDON HARBOR On or about September 25th, 2024, Cashman Dredging and Marine Contracting Company, LLC will begin mobilizing equipment into New London Harbor Connecticut for dredging work contracted by General Dynamics Electric Boat. Dredging for the project is expected to begin on or about October 1st, 2024. Dredging operations will occur adjacent to Electric Boat's South Yard in Groton, CT, in position 41-20-19.48N, 072-4-54.56W. The dredging template is east of the Federal Navigation Channel in the Thames River. Equipment for the project will include the following: "DALE PY A TT" clamshell dredge, "AF MARRESE" crane barge, 3-4 Seminole style material hopper barges, "MERC" and "KURT" dump scows, "CAPE ELIZABETH" survey/crew vessel, and associated tugboats. Tugboats on the project will be transporting material hopper barges from New London Harbor in Groton, CT to Upper Bay in Jersey City, NJ. In addition, tugboats will also be transporting material dump scows from the Groton, CT project site to the Eastern Long Island Sound Disposal Site. A mooring will be placed in New London Harbor Anchorage A and or Anchorage B. This will be used to stage barges throughout the life of the project. ariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution past the dredging site. The dredge(s) will operate 7 days a week, 24 hours a day. The work is scheduled to be completed on or about January 31, 2025. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.  |  |

Beginning June 1, 2023 to March 1, 2026. Extension from the previous LNM sent on 08/26/24, from 01/01/25 until 03/31/25 at Walk Bridge over the Norwalk River at mile 0.1, multiple work boats & barges will be in one channel (either East or West) at a time leaving the unoccupied side available for mariners to transit with assistance of Norwalk Marine Police and six changeable message signs installed on either the North Side or South Side of Walk Bridge to direct marine traffic accordingly to the open channel. Mariners are advised to exercise caution and reduce wake when transiting the area as barges may move between the channels at times throughout the day. Mariners with questions or concerns can contact the contractor via marine radio VHF-FM Ch 13/16 or call Ashlynn Efferding (410) 913-5559 or Jason Rourke (860) 250-1020.            | Lat: 41° 06' 02"<br>Lon: -073° 24' 56" |

| Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported | Hazards To Navigation | Shoaling exists in Plum Island Sound between Plum Island Sound Entrance buoy 4 (LLNR 9310) and Plum Island Sound Entrance buoy 6 (LLNR 9320), aids are not properly marking best water. Mariners are advised to use caution while navigating this area. All of Plum Island is particularly susceptible to shoaling, the area between 4 and 6 being the worst at the mouth of the channel. Last year the unit partnered with the harbor Master moving the aids to mark the best water. Even though the aids are in the best possible locations that water is still shallow at low tide and mariners should use caution while navigating in this area |          |
| Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported | Hazards To Navigation | Newburyport Harbor and Plum Island Sound – Plum Island Sound Entrance has experienced an increase in shoaling between Plum Island Sound Entrance Buoy 6 and 8. The shoaling was observed in approx. position 42-41.365N /070-45.169W and extends 100 yards west following the channel. Mariners are advised that at MLLW depths of 3' could be seen. Mariners without local knowledge are advised to transit with extreme caution and monitor tidal stations prior to transiting.   |          |

| Sector Southeastern New England, Submerged Lands Act (SLA) - Sakonnet River/General/Marine Construction (Excluding Bridges)/Boring and Core Samples | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Boring and Core Samples From: 2024-10-25 To: 2025-01-31 SouthCoast Wind will be conducting localized geophysical and geotechnical survey operations in state waters of Rhode Island and Massachusetts from approximately October 25th to January 31st. The 32' survey vessel Jim Cole, NJ3356HM, will be conducting shallow water geophysical surveys utilizing towed survey gear. The spud barge, Top Cat 2005, 1169940, and associated work boats will be utilized to conduct geotechnical boreholes in the area. Operations will be conducted during daylight only, and the crew will be continuously monitoring VHF-FM Channels 13 & 16. Mariners are asked to minimize wake, maintain a safe passing distance to the survey vessels, and transit the area with caution. The planned survey areas in vicinity of Boyd's Lane and Montaup Country Club in Portsmouth, RI and Brayton Point in Somerset, MA are shown in the attached chartlets. For more information or comments contact, SouthCoast Wind's Fisheries Liaison, Sam Ascì at 857-260-4116 or Samuel.asci@southcoastwind.com or check <a href="https://southcoastwind.com/fishermen/">https://southcoastwind.com/fishermen/</a> for further project updates. |          |

The lander is approximately 1m x 2m x 2/3 m (W x L x Height off bottom). Landers were deployed near known wrecks to minimize risk to trawlers (and the instrument). Mariners are urged avoid anchoring in this area.  |  |
| Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Marine Construction (Excluding Bridges)/Survey Operations | Marine Construction (Excluding Bridges) | From: 2024-11-13 To: 2025-01-31 Location: 41.06255° N / 70.47438° W Vineyard Wind will be utilizing the F/V BEAST OF BURDEN to deploy one Passive Acoustic Monitoring (PAM) device as part of the University of New Hampshire multi-year study to record ambient sound and marine mammal species vocalizations in OCS-A 501 lease area, in position 41-3-45.18N 070-28-27.768W from January 2023 to 2025. The PAM device is approximately 2 meters high and 1.7 meters wide and weighs 800 kg with anchor. The device consists of the body and four arms that extend vertically to a central lift point. The device is connected via acoustic releases to the anchor, which consists of a steel triangle assembly with five 20 kg weight plates on each point of the triangle. The BEAST OF BURDEN will be monitoring VHF-FM CH 16 for any concerned traffic. More information about this project can be found on the following link: PASSIVE ACOUSTIC MONITORING DEVICE DEPLOYMENT — Vineyard Wind  | Lat: 41° 03' 45"<br>Lon: -070° 28' 28" |
| Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Naval Activity/Naval Testing (Surface/Underwater)         | Naval Activity                          | General/Naval Activity/Naval Testing (Surface/Underwater) From: 2024-10-07 To: 2025-07-31 RI-RI SOUND-COX'S LEDGE The United States Navy Operations will be conducting research and development operations in Cox's Ledge, Rhode Island Sound, in position 41-4-19.200N, 071-3-37.080W, from October 7, 2024, to July 31, 2025. Equipment on scene will be a 50' crew boat, 30'rigid hull inflatable boat, and 4 spar buoys, marking the diameter of the test site and will be monitoring VHF-FM CH 72 for any concerned traffic. The equipment will be on scene for up to two days a month for 6 hours at a time and mariners are requested to avoid the area during testing operations.  |  |
| Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Safety Zones/Temporary Regulated Navigation Zones         | Safety Zones                            | General/Safety Zones/Temporary Regulated Navigation Zones From: 2025-01-22 To: 2025-01-28 A 500-meter Safety Zone will be enforced around Vineyard Wind, LLC., operations from 8:00am, January 22, 2025, to 8:00am, January 29, 2025, Mariners are to avoid transiting within 500-meters of the following positions: AM37: 41-07-12.22N, 070-29-06.60W; AW38: 40-58-12.86N, 070-27-36.71W; AN39: 41-06-14.17N, 070-26-27.96W; AP41: 41-05-16.09N, 070-23-47.93W; AS40: 41-02-15.00N, 070-25-03.42W; AU39: 41-00-13.93N, 070-26-20.10W; AP39 41-05-14.14N, 070-26-26.65W. Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance from construction vessels and associated equipment when not located within one of the above-mentioned safety zone locations. Construction vessels include SEA INSTALLER. Construction will be supported by support vessels – CADE CANDIES, C PIONEER, C FIGHTER, GO LIBERTY, WINDEA ENTERPRISE, WINDEA COURAGEOUS, WINDEA INTREPID, GATEWAY ENDEAVOR, WINDSERVE FRONTIER, PATRIOT LEADER, tugs NICOLE FOSS, HAWAII FOSS, & EARL REDD, and the barges PREVAILING WIND and MARMAC 400. Additionally, the CLV CONNECTOR will be conducting pull-in operations for the remaining inter-array cables. The trenching support vessel SYMPHONY will be conducting cable trenching and burial works, and the ADHEMAR DE SAINT VENANT will be conducting rock stabilization operations on inter-array cables. These operations will be supported by the WINDSERVE SPARTAN, C-PIONEER. There will be several safety and scout vessels from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel and their equipment as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels. To view a diagram of the active safety zones and current construction progress, please visit: <a href="https://www.vineyardwind.com/offshore-wind-mariner-updates">https://www.vineyardwind.com/offshore-wind-mariner-updates</a>  |  |
| Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Safety Zones/COPT Restrictions                            | Safety Zones                            | General/Safety Zones/COPT Restrictions From: 2025-01-22 To: 2025-01-28 A 500-meter Safety Zone will be enforced around Revolution Wind, operations from 8:00am, January 22, 2025, to 8:00am, January 29, 2025, Mariners are to avoid transiting within 500-meters of the following positions: AF08: 41-12-36.216N, 071-7-41.536W, AL11: 41-7-40.476N, 071-3-33.696W; AL18: 41-07-50.034N, 070-54-17.981W; AM18: 41-06-50.006N, 070-54-16.312W; AJ14: 41-09-44.895N, 070-59-39.234W, AL21: 41-07-53.195N, 070-50-23.203W; AM21: 41-06-54.213N, 070-50-19.486W Revolution Wind Lease Area For all areas of cable installation and burial, Mariners should consult Ørsted Mariners Briefing or radio the safety vessels and fisheries liaison officers (FLOs) on VHF16 for up-to-date areas where cables are buried, and where bottom contacting activities are not at risk from/risk to potentially exposed cable. Jack-Up Vessel LEVIATHAN is commissioning Offshore Substation AF08. J.D. ASSISTER is burying the remaining installed cables and is Restricted in Ability to Maneuver. One or more safety vessels will monitor unburied or potentially unburied cables; mariners should avoid bottom contact activity in these locations. The Wind Turbine Installation Vessel (WTIV) SCYLLA is installing turbine towers, nacelles, and blades via a feeder barge system from New London. Barge 455-8 and Tugs SAM and OCEAN WIND will support. PAUL CANDIES will support commissioning works. USCG SAFETY ZONES may be enforced around the turbine location undergoing installation, continuing into Spring 2025. Revolution Wind Export Cables For all areas of cable installation and burial, Mariners should consult Ørsted Mariners Briefing and/or radio the safety vessels and fisheries liaison officers (FLOs) on VHF16 for up-to-date areas where cables are buried, and where bottom contacting activities are not at risk from/risk to potentially exposed cable. The Cable Laying Vessels (CLV) AURORA and SKAGERRAK have completed their scopes of work. Barge 4132, Tug BUCKY and Tug KODIAK are installing post-lay and remedial mattresses from Quonset to Dutch Island. A safety zone may be in effect. Trenching Vessel (TV) DEEP CYGNUS is installing post-lay mattresses, trenching and surveying the export cable north of Beavertail. Multiple passes of trenching and remedial work, such as mattresses, may be required Research Vessel YETI is conducting as-trenched surveying in the Narragansett Bay. The following cables have been laid and buried. Surveying and cable protection work may still be underway. • The Interlink Cable (between AF08 and AL11), • Far-shore Export Cable 1 and 2 from south of Brenton Reef Anchorage to AF08 • Mid-shore Export Cable 1 from south of Brenton Reef to Dutch Island • Nearshore Export Cable 1 and 2 from Quonset to Dutch Island LEASE 500: SHEARWATER is conducting a geotechnical scope in Lease 500 and along the proposed export cable route, both offshore and in Narragansett Bay. BELLA MARIE is conducting a geophysical survey in Narragansett Bay and OCEAN MARLIN is conducting a geophysical survey offshore, in Lease 500. These vessels may be Restricted in Ability to Maneuver. Please note, there is a potential hazard on the seabed near position 41.29N- 71.064W. The hazard extends vertically from the sea bottom about 30 feet. Additional information can be found at Offshore Wind Farm Information for Mariners |  |

| Sector Southeastern New England, Exclusive Economic Zone (EEZ) - Sector Southeastern New England, Territorial Sea/General/Marine Construction (Excluding Bridges)/Survey Operations | Marine Construction (Excluding Bridges) | General/Marine Construction (Excluding Bridges)/Survey Operations From: 2024-09-15 To: 2025-01-31 TM Diligence will conduct survey of foundations in mid-September 2024. Commencing mid-September 2024 through January 2025 planned maintenance will be undertaken at Block Island Windfarm Tower 5, 41-06-23.05N 71-32-15.54W. The Jack Up vessel RAM XII will be lifted with its legs on the seabed. For both the RAM XII's safety and that of the public, it is imperative that vessels not pass under the jacked-up vessel, and vessels should not allide with the legs of RAM XII. RAM XII will be serving as an accommodation vessel for work on B5, with a risk of dropped objects as tools and large equipment are moved. The vessel will monitor VHF 16/13. |  |

|--|-----------------------|---|--|
| Raritan Bay - Shrewsbury River/General/Bridges/Modification                    | Bridges               | General/Bridges/Modification From: 2022-06-01 To: 2025-03-17 Location: 40.36579° N / 73.975614° W Bridge Name: Shrewsbury River 32 State Route Bridge Bridge Replacement – Installation of temporary trestle to the S-32 (Rumson Road) Bridge over Shrewsbury River at mile 4.0 is in progress. There will be barge equipment operating IVO the bridge. For barge placement details, please contact David Nyarko, Resident Engineer at 646-334-2431 or via marine radio VHF-FM CH 13/16. The USCG has approved the revised waterway restriction schedule during the erection of the bascule span girders, counterweight boxes, and four floor beams. A barge will be placed in the channel blocking the full channel width during these dates/times. Vessels and individuals are not authorized within the federal navigation channel during the full waterway closures during these dates/times. The full waterway closure schedule is as follows: September 16th at 6 a.m. to September 20th, 2024 at 6 p.m. – West Span October 21, 2024 at 6 a.m. to October 25, 2024 at 7 p.m. – East Span (weather permitting). November 4th at 6 a.m. to November 8th, 2024 at 6 p.m. – East Span (contingency plan for weather delays, etc.). For the remaining bascule span work, the Shrewsbury River navigational channel will be partially/half closed. The partial/half channel closure schedule is as follows: Full width (75ft) with no restrictions from 4 p.m. on October 14, 2024 to 6 a.m. on November 20, 2024 (open to Marine Traffic). November 20, 2024 at 6 a.m. to January 3, 2025 at 6 p.m. – (West Half Closed, East Half Open to Marine Traffic). January 3, 2025 at 6 p.m., to May 2, 2025 at 6 p.m. – (East Half Closed, West Half Open to Marine Traffic). During the partial/half channel closure, a barge will be within the federal navigation channel under the span being erected, the width of the channel will be reduced to 37'-6", which is half the channel width. At that time, an advanced warning sign with a directional arrow stating "CAUTION CHANNEL WIDTH REDUCED TO 37.5 FT" will be posted. The dates/times for this work may change due to weather delays and other unforeseen circumstances. Updates will be provided, as they are available, in the D1 LNM and on the project website at <a href="https://www.rumsonseabrightbridge.com">https://www.rumsonseabrightbridge.com</a> and click on the Travel Advisory or Channel Info links at the top of the page. To receive e-mail updates for this project select the "Contact Us" tab, then "E-mail List Sign Up" from the drop-down menu. Mariners are advised to exercise caution when transiting the area. The project will be completed by March 17, 2025. | Lat: 40° 21' 57"<br>Lon: -073° 58' 32" |

# FIRST DISTRICT

## OFFSHORE WIND SUPPLEMENTAL **LNM 04/25**

**Updated 1/21/2025**

**New information highlighted in Yellow.**

This guidance is for Private Aids to Navigation (AtoN) applicants requesting Coast Guard approval to provide navigational markings on offshore wind energy area structures in First District-area waters. The following structure label identification, lighting, sound, and Automatic Identification System (AIS) signals are strongly recommended, to be included in the USCG/BOEM/BSEE-accepted Marking Labeling and Signaling Plan (ML&SP). Applicants should plan to apply for one Private Aid Permit per structure (to include all labels, light(s), sound and AIS signals per the accepted ML&SP). Private AtoN Permit applications should be submitted using the “as designed” position, between 60 and 30 days prior to the start of construction, when they will be processed. Additional specific recommendations, **to allow sufficient time for vessel operators to detect and make any necessary course or speed alterations, include:**

### **Tower/Electrical Service Platform (ESP) Identification:**

- The foundation base of all towers should be painted yellow, RAL 1023, all around from the level of Mean Higher High Water (MHHW) to 50 ft above MHHW.
- Uniquely lettered and numbered in an organized pattern as near to rows and columns as possible to enable quick recognition and reference by mariners and agencies for search and rescue, law enforcement, and other purposes.
- (Tower) Letters and numbers, visible at night, labelled uniformly to at **least 2.5 m (8.2 ft) and as close to 3 m (9.8 ft) in height as possible**, rendered through use of retro-reflective or high contrast black, comparable to MilSpec #17038 or RAL 9005, to maximize visual range for nearby mariners.
- (ESP) Letters and numbers labelled to 1 meter high to maximize visual range for nearby mariners.
- The bottom of the 2.5m to 3m alphanumeric characters should be located at least 30 ft above MHHW and should be visible above any service platforms throughout a 360-degree arc from the water’s surface. If feasible, each unique alphanumeric designation should be duplicated below any servicing platform.
- It is strongly recommended to use retro-reflective paint and lettering/numbering materials to enhance visibility at night, and that an all-around band, retro-reflective material (white, yellow, or silver), visible through a 360-degree arc, at least 2 feet high, be applied to structures no less than 30 ft above MHHW.

### **Lighting:**

- Located on all structures, preferably on the servicing platform, visible throughout a 360-degree arc from the water’s surface.
- Corner Towers/Significant Peripheral Structures (SPSs): Quick flashing yellow (QY), visible at a 5 nautical mile range.
- Intermediate Perimeter Structures (IPS) are those located along a wind energy facility’s outside boundary between SPSs: 2.5 sec flashing yellow (Fl Y 2.5s), visible at a 3 nautical mile range.
- Interior Towers, those inside the line of IPS and SPS towers: 6 second or 10 second flashing yellow (Fl Y 6/Fl Y 10), visible at a 2 nautical mile range.

### Encl 3

- All lights serving the same function (SPS, IPS, inner boundary, etc.) should be synchronized within the field of structures.

*Note:* All base, tower and construction components preceding the final structure completion must be marked with Quick Flashing Yellow (QY) obstruction lights visible throughout 360 degrees at a 5 nautical mile range. **These interim lights do not require additional PATON applications and will be accounted for by the First District Waterways staff through BOEM/USCG/BSEE acceptance of the Marking, Labeling and Signaling Plan.** Coast Guard notification is *required* when a structure is first lighted, with a QY after it breaks the water's surface, and again when the final ML&SP is operational.

#### **Sound Signals:**

- All SPS should be fitted with a Mariner Radio Activated Sound Signal (MRASS) which when activated--by multiple (5x) keying on VHF channel 83A within 10 seconds--should sound every 30 seconds (4s Blast, 26s off) and audible for at least 2 NM, for 45 minutes from its last VHF activation.

#### **Automated Information System (AIS) Transponder Signals:**

- At a minimum, FCC-certified AIS Aids to Navigation signals should mark all SPS or other significant locations within the wind energy facility. **The structures may be marked with either physical or synthetic AIS message 21 as circumstances warrant.**
- **AIS broadcasts should be made at sufficient antenna height and power to provide a relatively uniform coverage strongly recommended to extend at least 8 nautical miles beyond the periphery of the wind farm.**

*Note:* AIS stations must be FCC type-certified and granted appropriate FCC licensing prior to broadcasting. See our USCG AIS Frequently Asked Questions #21 for more information and additional instructions on submitting an AIS PATON application.

AIS FAQ#21: <https://www.navcen.uscg.gov/ais-frequently-asked-questions#21> PATON Application Website: <http://www.usharbormaster.com/>

**ATLANTIC OCEAN-OFFSHORE MASSACHUSETTS-VINEYARD WIND 1 WIND FARM PROJECT AREA – SAFETY ZONE(S) ENFORCEMENT NOTIFICATION UPDATE-Update 01/12/2025**

A 500-meter Safety Zone will be enforced around Vineyard Wind, LLC., operations **from 8:00am, January 22, 2025, to 8:00am, January 29, 2025**, Mariners are to avoid transiting within 500-meters of the following positions:

**AM37: 41-07-12.22N, 070-29-06.60W; AW38: 40-58-12.86N, 070-27-36.71W; AN39: 41-06-14.17N, 070-26-27.96W; AP41: 41-05-16.09N, 070-23-47.93W; AS40: 41-02-15.00N, 070-25-03.42W; AU39: 41-00-13.93N, 070-26-20.10W; AP39 41-05-14.14N, 070-26-26.65W.**

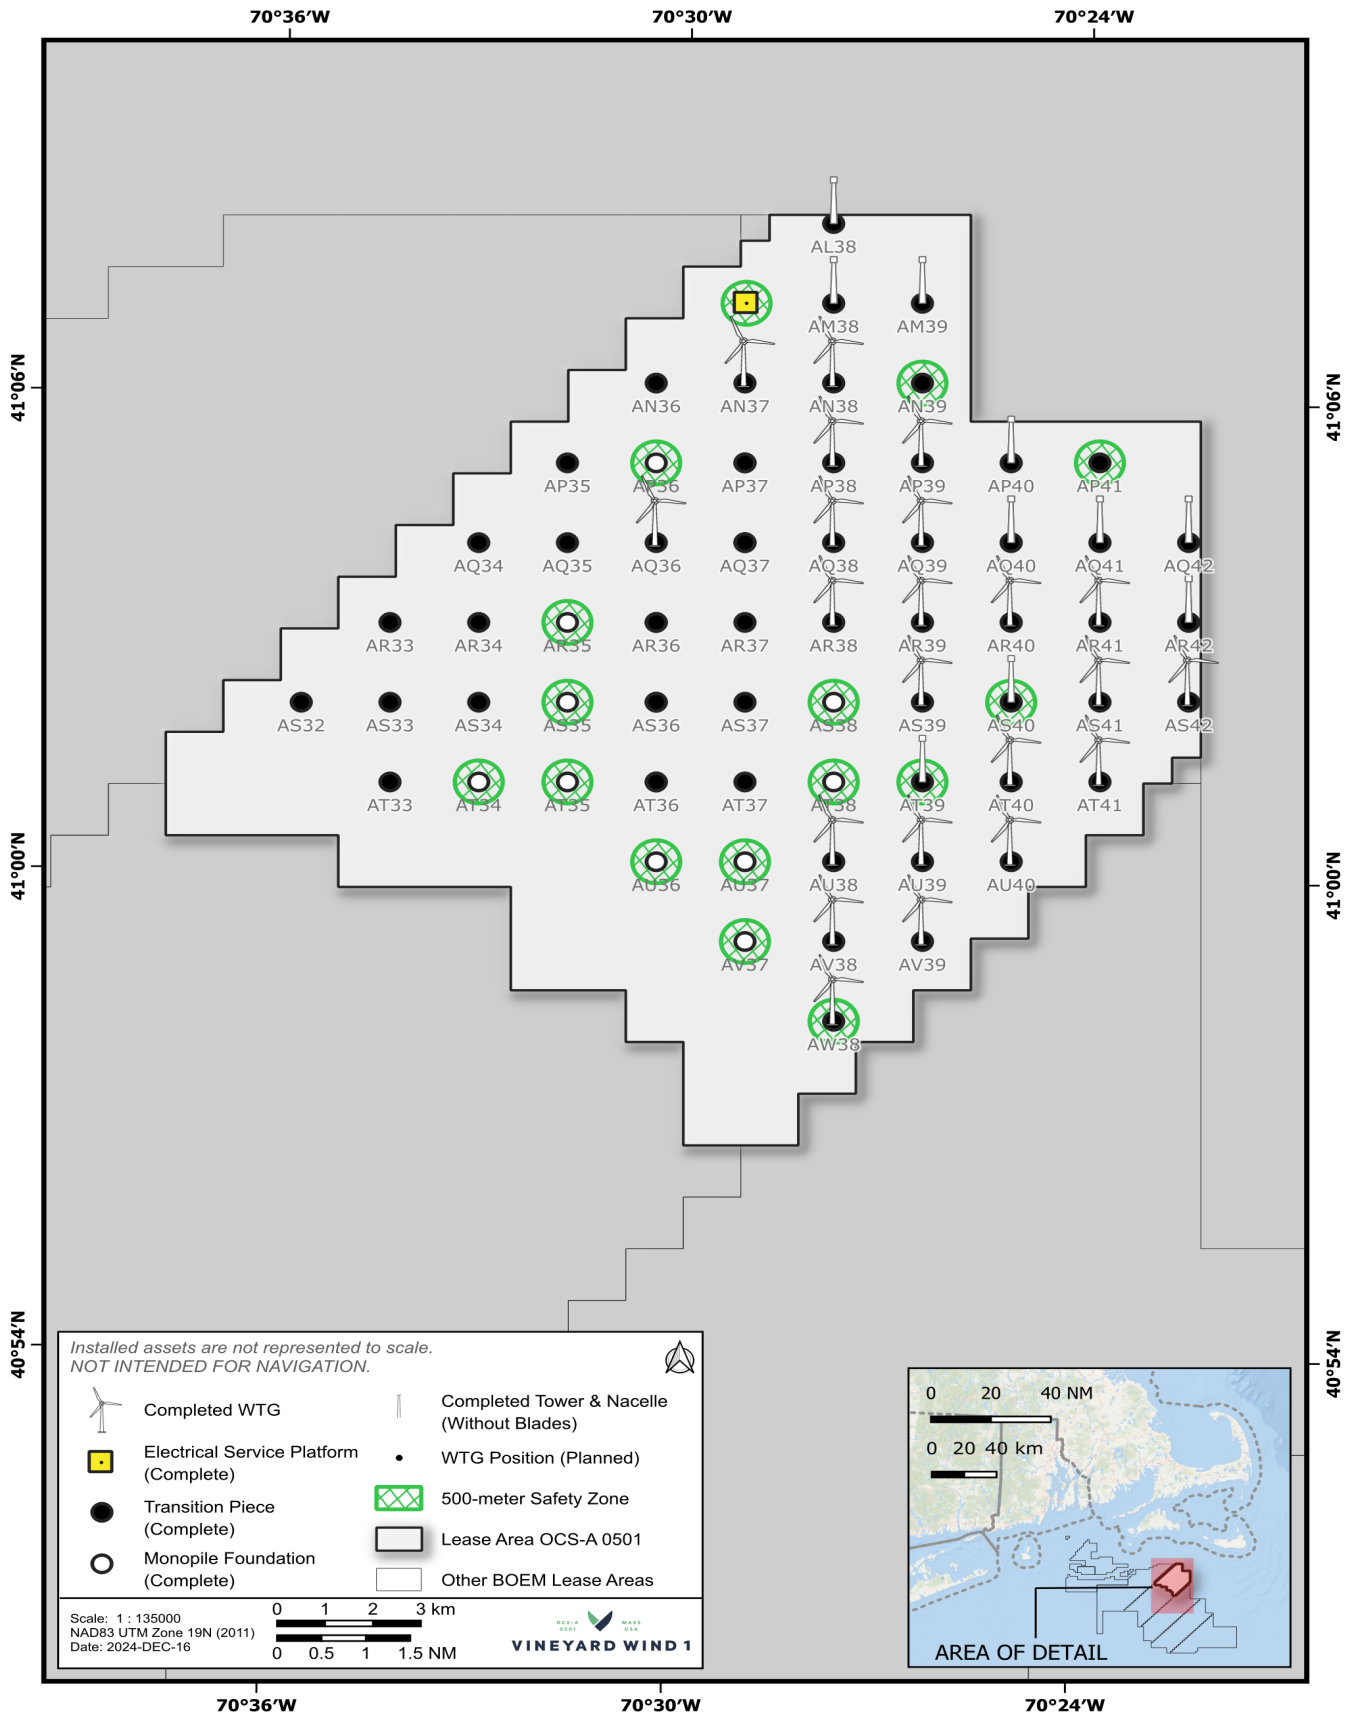

Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance from construction vessels and associated equipment when not located within one of the above-mentioned safety zone locations. Construction vessels include SEA INSTALLER. Construction will be supported by support vessels – CADE CANDIES, C PIONEER, C FIGHTER, GO LIBERTY, WINDEA ENTERPRISE, WINDEA COURAGEOUS, WINDEA INTREPID, GATEWAY ENDEAVOR, WINDSERVE FRONTIER, PATRIOT LEADER, tugs NICOLE FOSS, HAWAII FOSS, & EARL REDD, and the barges PREVAILING WIND and MARMAC 400.

Additionally, the CLV CONNECTOR will be conducting pull-in operations for the remaining inter-array cables. The trenching support vessel SYMPHONY will be conducting cable trenching and burial works, and the ADHEMAR DE SAINT VENANT will be conducting rock stabilization operations on inter-array cables. These operations will be supported by the WINDSERVE SPARTAN, C-PIONEER.

There will be several safety and scout vessels from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel and their equipment as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels.

To view a diagram of the active safety zones and current construction progress, please visit:  
<https://www.vineyardwind.com/offshore-wind-mariner-updates>

LNM 04/25

## ATLANTIC OCEAN-OFFSHORE MASSACHUSETTS-REVOLUTION WIND; FARM PROJECT AREA – SAFETY ZONE(S) ENFORCEMENT NOTIFICATION UPDATE-Update 01/21/2025

A 500-meter Safety Zone will be enforced around Revolution Wind, operations from **8:00am, January 22, 2025, to 8:00am, January 29, 2025**, Mariners are to avoid transiting within 500-meters of the following positions:

AF08: 41-12-36.216N, 071-7-41.536W, AL11: 41-7-40.476N, 071-3-33.696W; AL18: 41-07-50.034N, 070-54-17.981W; AM18: 41-06-50.006N, 070-54-16.312W; AJ14: 41-09-44.895N, 070-59-39.234W, AL21: 41-07-53.195N, 070-50-23.203W; AM21: 41-06-54.213N, 070-50-19.486W

### Revolution Wind Lease Area

For all areas of cable installation and burial, Mariners should consult Ørsted Mariners Briefing or radio the safety vessels and fisheries liaison officers (FLOs) on VHF16 for up-to-date areas where cables are buried, and where bottom contacting activities are not at risk from/risk to potentially exposed cable.

Jack-Up Vessel LEVIATHAN is commissioning Offshore Substation AF08. J.D. ASSISTER is burying the remaining installed cables and is Restricted in Ability to Maneuver. One or more safety vessels will monitor unburied or potentially unburied cables; mariners should avoid bottom contact activity in these locations. The Wind Turbine Installation Vessel (WTIV) SCYLLA is installing turbine towers, nacelles, and blades via a feeder barge system from New London. Barge 455-8 and Tugs SAM and OCEAN WIND will support. PAUL CANDIES will support commissioning works. USCG SAFETY ZONES may be enforced around the turbine location undergoing installation, continuing into Spring 2025.

### Revolution Wind Export Cables

For all areas of cable installation and burial, Mariners should consult Ørsted Mariners Briefing and/or radio the safety vessels and fisheries liaison officers (FLOs) on VHF16 for up-to-date areas where cables are buried, and where bottom contacting activities are not at risk from/risk to potentially exposed cable.

The Cable Laying Vessels (CLV) AURORA and SKAGERRAK have completed their scopes of work. Barge 4132, Tug BUCKY and Tug KODIAK are installing post-lay and remedial mattresses from Quonset to Dutch Island. A safety zone may be in effect. Trenching Vessel (TV) DEEP CYGNUS is installing post-lay mattresses, trenching and surveying the export cable north of Beavertail. Multiple passes of trenching and remedial work, such as mattresses, may be required

Research Vessel YETI is conducting as-trenched surveying in the Narragansett Bay.

The following cables have been laid and buried. Surveying and cable protection work may still be underway.

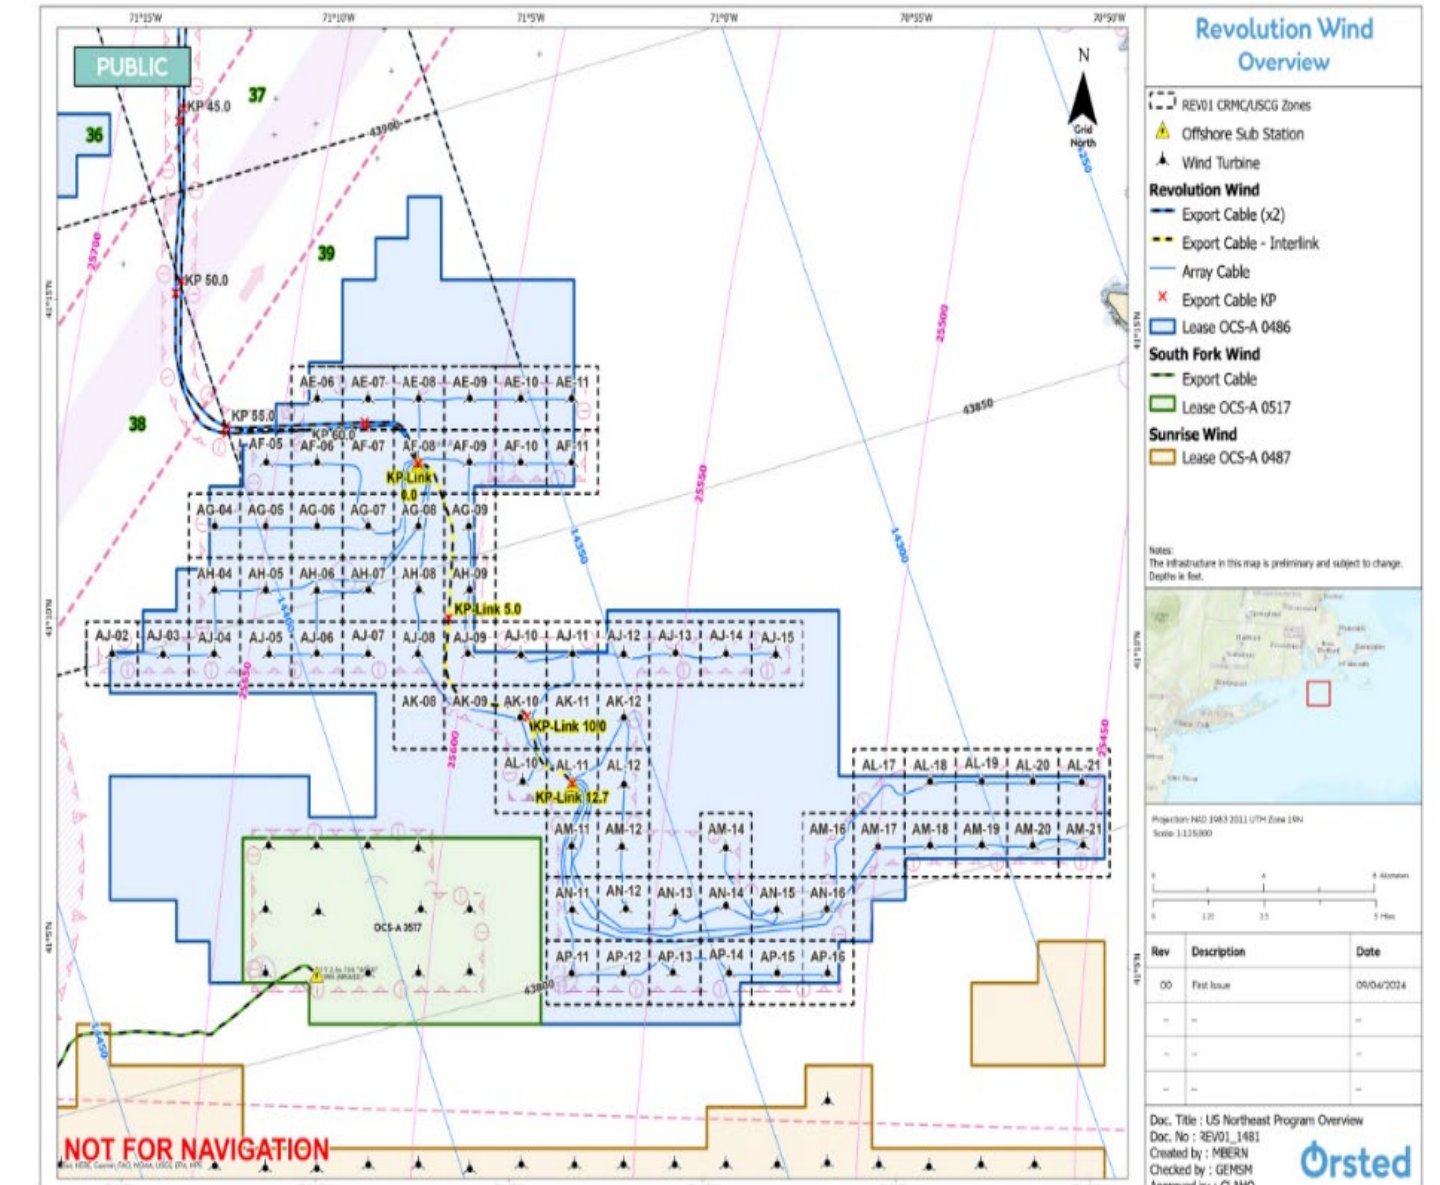

- The Interlink Cable (between AF08 and AL11),
- Far-shore Export Cable 1 and 2 from south of Brenton Reef Anchorage to AF08
- Mid-shore Export Cable 1 from south of Brenton Reef to Dutch Island
- Nearshore Export Cable 1 and 2 from Quonset to Dutch Island

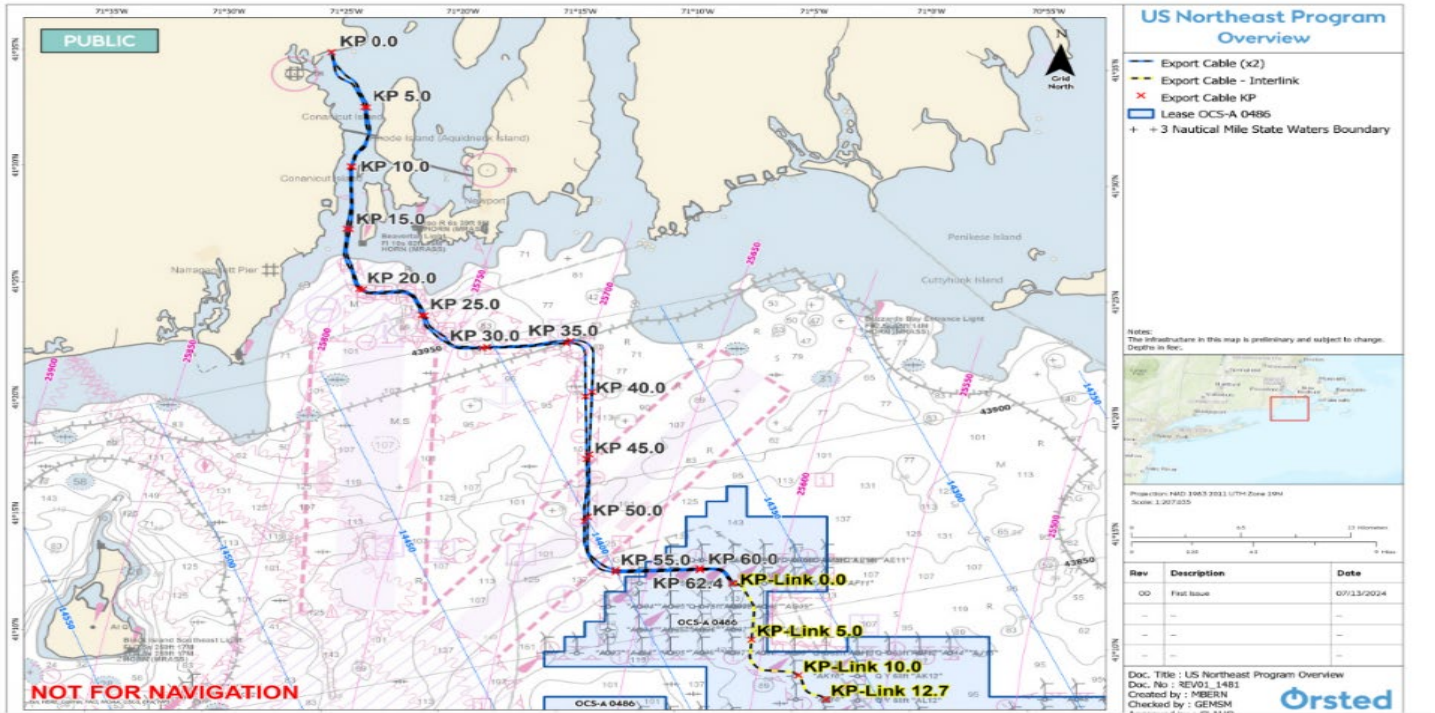

### LEASE 500:

SHEARWATER is conducting a geotechnical scope in Lease 500 and along the proposed export cable route, both offshore and in Narragansett Bay. BELLA MARIE is conducting a geophysical survey in Narragansett Bay and OCEAN MARLIN is conducting a geophysical survey offshore, in Lease 500. These vessels may be Restricted in Ability to Maneuver.

Please note, there is a potential hazard on the seabed near position 41.29N- 71.064W. The hazard extends vertically from the sea bottom about 30 feet.

Additional information can be found at [Offshore Wind Farm Information for Mariners](#)

LNM 04/25

**SUNRISE WIND-Update 8/19/2024**

Sunrise Wind (SRW) is installing a temporary pier at Smith Point County Park in the Intercoastal Waterway. Pier construction will be completed in approximately one month. Sunrise Wind is mobilizing up to five transport barges including and similar to the Flexifloat™ S-70 Sectional Barge (pictured below) to move equipment in excess of 15 tons to and from Smith Point Marina to the temporary pier. A liftboat and a support vessel will work in the nearshore area from as early as **November 15th thru January 2025**. Crews will use a common technique known as horizontal directional drilling (HDD) that allows us to drill deep under the beach without disturbing its surface. It also allows us to maintain public access to the beach throughout the construction process. The temporary pier will be removed on or about **May 1, 2025**.

LNM 35/24

Encl 3

## BLOCK ISLAND WINDFARM-Update 10/1/2024

TM Diligence will conduct survey of foundations in mid-**October 2024**. Commencing mid-**October 2024 through January 2025** planned maintenance will be undertaken at Block Island Windfarm Tower 5, 41-06-23.000N 71-32-15.540W. The Jack Up vessel ARIES MARINE RAM XII will be lifted with its legs on the seabed. For both the ARIES MARINE RAM XII's safety and that of the public, it is imperative that vessels not pass under the jacked-up vessel, and vessels should not allide with the legs of RAM XII. RAM XII will be serving as an accommodation vessel for work on B5, with a risk of dropped objects as tools and large equipment are moved. The vessel will monitor VHF 16/13.

LNM 35/23

## ATLANTIC OCEAN-RI-MA

Marine Acoustics Inc will be conducting underwater, passive, acoustic monitoring, from **August 12, 2023, to August 12, 2025**. The monitoring will be conducted in five locations offshore RI and southern Massachusetts in Atlantic Ocean (29 to 49 nautical miles from nearest land and islands in the following positions:

40-52-17.358N, 071-9-37.609W; 40-50-33.595N, 070-48-30.675W; 40-48-37.668N, 069-58-42.642W; 40-40-8.467N, 070-42-15.473W; 40-39-16.272N, 070-28-7.774W. Equipment on scene will be passive acoustic recording moorings (each includes acoustic recorder, acoustic release, buoy, line, anchor, and shackles); top of each mooring is 27 feet above seafloor. Mariners are advised to us caution when operating in the area.

LNM 39/23

## MA- SOUTHEAST OF MARTHA'S VINEYARD-SOUTHWEST OF NANTUCKET- OCS-A-501

Vineyard Wind will be utilizing the F/V BEAST OF BURDEN to deploy one Passive Acoustic Monitoring (PAM) device as part of the University of New Hampshire multi-year study to record ambient sound and marine mammal species vocalizations in OCS-A 501 lease area, in position 41-3-45.18N 070-28-27.768W from **January 2023 to 2025**. The PAM device is approximately 2 meters high and 1.7 meters wide and weighs 800 kg with anchor. The device consists of the body and four arms that extend vertically to a central lift point. The device is connected via acoustic releases to the anchor, which consists of a steel triangle assembly with five 20 kg weight plates on each point of the triangle. The BEAST OF BURDEN will be monitoring VHF-FM CH 16 for any concerned traffic. More information about this project can be found on the following link: [PASSIVE ACOUSTIC MONITORING DEVICE DEPLOYMENT — Vineyard Wind](#)

Chart 12300 LNM 02/24

### NY-NEW YORK BAY-NEW YORK HARBOR-EMPIRE WIND LEASE AREA

Monmouth University will be deploying, fish monitoring, oceanographic instruments in New York Harbor and New York Bay, (see chart below). The instruments will be weighted to the ocean floor. Mariners are advised to use caution when transiting the area.
