The USV will be launched from Pamet Harbor in Truro, MA and will be escorted by a support vessel to a departure location approximately 1nm offshore. At this point Uncrewed JASCO SP-48 will be turned over to the remote pilot who will monitor and control the boat as it heads west offshore to the study site. Uncrewed JASCO SP-48 will run a grid pattern to collect the data - when complete, it will be piloted back to Pamet where it will meet the escort vessel for the nearshore transit back to the recovery location. The SP-48 is a 4.8 meter long, solar powered, USV that is intended to operate persistently for up to months at a time for the purpose of data collection and monitoring applications. The USV weighs ~650 lbs and has a cruising speed of 3 kts and a top speed of 5 kts. The USV is equipped with an AIS transceiver (MMSI 338525495), running lights, and a yellow signal flag to aid in observability, and is also marked with "Uncrewed" on the transom to clearly indicate the absence of personnel onboard. The pilot has real-time access to 360-degree cameras on board the USV for situational awareness which can be accessed through redundant communications links (2 cellular and 2 satellite) for command and control of the vehicle.

Based on the latest available surveys conducted by the Army Corps of Engineers, November 4, 2024, shoaling has occurred in the channel. There will be barge equipment operating IVO the bridge. For barge placement details, please contact David Nyarko, Resident Engineer at 646-334-2431 or via marine radio VHF-FM CH 13/16. The scaffold will be re-located to the channel side of the east leaf to accommodate the installation of the toe joint, similar to what was performed at the west leaf, through April 15, 2025. This scaffold will reduce horizontal clearance at the street level to 35ft. Constant red burning lights will be located at each end of the scaffold. For the bascule span work, the Shrewsbury River navigational channel will be partially/half closed. The partial/half channel closure schedule is as follows: February 17, 2025 at 6 a.m. to February 21, 2025 at 6 p.m. – (both east and west span will not open to marine traffic). February 21, 2025 at 6 p.m. to February 24, 2025 at 6 a.m., - channel is fully open to marine traffic. February 24, 2025 at 6 a.m. to May 2, 2025 at 6 p.m. – (East Half Closed, West Half Open to Marine Traffic). During the partial/half channel closure, a barge will be within the federal navigation channel under the span being erected, the width of the channel will be reduced to 37'-6", which is half the channel width. At that time, an advanced warning sign with a directional arrow stating "CAUTION CHANNEL WIDTH REDUCED TO 37.5 FT" will be posted. The dates/times for this work may change due to weather delays and other unforeseen circumstances.
