TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-07-22 To: 2026-09-16 INSPIRE Environmental will conduct a Remotely Operated Vehicle (ROV) video survey to monitor hard bottom habitats as part of the Empire Wind 1 and Empire Wind 2 projects, including the Empire 1 Export Cable Route. The survey is scheduled to take place offshore New York between July 31 and August 15, 2026, though the timeline may shift depending on weather conditions. Operations will occur within Lease Area OCS-A 0512 and at select cable mattress protection areas along the export cable route, with specific locations identified by precise coordinates. The survey vessel, M/V Precision, will be on scene and equipped with an ROV system, conducting deployments at five stations within the lease area and two stations along the cable route. Each deployment will last between one and four hours, during which the vessel will be stationary and have reduced maneuverability due to equipment in the water. Survey operations are planned for seven days a week, twelve hours per day, with remaining time spent on standby or repositioning as needed. For maritime safety, the vessel will monitor VHF channels 16 and 13 to coordinate with other mariners, and passing arrangements should be made to avoid impeding navigation during survey activities.	
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-09-10 To: 2026-09-20 Curtin Maritime Corporation will be conducting planned maintenance dredging in the Hudson River Federal Navigation Project at Haverstraw Bay, New York, under USACE Contract No. W912DS26CA020. The work is scheduled to begin on or about September 10, 2026, and conclude on or about September 19, 2026. Operations are expected to occur 24 hours per day, seven days per week. The project will involve mechanical clamshell dredging within existing federal navigation channels in Haverstraw Bay. Dredged material will be loaded into split-hull scows and transported offshore for placement as remediation material at the Historic Area Remediation Site in the Atlantic Ocean. Curtin Maritime's planned fleet includes the mechanical dredge DB Avalon, three split-hull scows, Crown Point, Stony Point, and Rincon Point, and four towing or support vessels, Alice C, Kimberly C, Comet, and David Winslow. Manned vessels will monitor VHF-FM Channels 13 and 16. Mariners are advised to proceed with caution in the vicinity of operations and to make passing arrangements in advance and are requested to transit at their slowest safe speed and asks for one hour of notice to move vessels so as not to impede navigation.	
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-09-08 To: 2026-12-14 Location: 40-28-07.320N/074-15-20.268W 40-31-25.392N/073-51-43.092W S. T. Hudson Engineers, Inc. plans to conduct geophysical survey operations aboard the M/V BELLA MARIE in the Raritan Bay area from September 8 through December 13, 2026. The work will occur during daylight hours only, seven days per week, and will not be conducted during hazardous sea or weather conditions. Survey activity will extend from Cheesequake Creek across the Raritan, Chapel Hill, and Ambrose channels, with the survey area beginning near 40° 28' 07.352" N, 074° 15' 20.287" W and ending near 40° 31' 25.423002" N, 073° 51' 43.105434" W. The M/V BELLA MARIE is a 40-foot power catamaran survey vessel. During operations, the vessel will tow survey equipment behind and beneath it, including equipment that may extend up to 250 feet astern, which will restrict the vessel's maneuverability. Mariners operating near the survey vessel should use caution, maintain a safe distance, and proceed at reduced speed. The vessel will continuously monitor VHF Channels 13 and 16 and will check in daily with New York/New Jersey Vessel Traffic Service. The vessel will also maintain a listening watch on VHF Channel 12 or 14 as required by location. The designated shoreside point of contact is Joe Wozniak, HSE & Marine Compliance Manager, S. T. Hudson Engineers, Inc., at 609-412-1242 or jwozniak@sthe.com.

Raritan River Cutoff Channel - Arthur Kill/General/Bridges/Maintenance	Bridges	General/Bridges/Maintenance On February 16, 2026, between 7:00 am and 3:30 pm on weekdays, bridge maintenance will be performed on the New Jersey Turnpike (99.70ANI) IVO Interchange 13) over Elizabeth River, mile .61 to the mouth of Elizabeth Reach, in Elizabeth, Union County, New Jersey. This work will be completed in 5 non-consecutive days. A 15 ft skiff and a 60 ft X 160 ft platform will be in the waterway intermittently. Mariners requiring full horizontal clearance can contact Matt Becker at (201) 304-3045. The project is to be completed by December 31, 2026. Mariners are advised to exercise caution when transiting the area. From: 2026-02-12 To: 2027-01-01 Location: 40-38-44.052N/074-12-14.508W Bridge Name: 99 67 Interstate95 Expressway Southbound Bridge	Lat: 40° 38' 44" Lon: -074° 12' 15"
Raritan River Cutoff Channel - Arthur Kill/General/Bridges/Inspection	Bridges	General/Bridges/Inspection From: 2026-06-14 To: 2026-11-01 Location: 40-31-29.310N/074-14-49.110W Bridge Name: Outerbridge Crossing From June 15, 2026 – October 31, 2026, Monday-Friday, between 7:00 a.m. and 5:00 p.m., a biennial bridge inspection using a combination of a bucket truck, manlift, and tethered climbing will be conducted on the Outerbridge Crossing over Arthur Kill at mile 2.0. Vertical clearance will not be reduced by more than 5 feet below low steel due to this inspection. Additionally, there will be a dive inspection of the bridge piers periodically during this time period. Mariners requiring full vertical or horizontal clearance can contact VTS New York or contact the contractor via marine radio VHF-FM Ch. 13/16 or by calling Rudy Baliga (862) 345-4670. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 31' 29" Lon: -074° 14' 49"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
North Channel Saybrook To New Haven - Connecticut River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2025-05-08 To: 2029-12-31 Location: 41.31087778° N / 72.34920833° W Bridge Name: Amtrak Railroad Bridge CONNECTICUT – CONNECTICUT RIVER – From July 7, 2025, through December 30, 2029, AMTRAK will have moored barges in place during the construction and demolition of the Amtrak Connecticut River Bridge. Due to the placement of a temporary fendering system, the horizontal clearance of the bridge in the navigation channel will be reduced to 115 feet. Similarly, the placement of temporary signal cables overhead of the navigation channel will reduce vertical clearance to 100 feet above MHW when the bridge is in the open position. From October 1, 2025 to November 15, 2025, contractors will be performing dive operations to remove submarine cables from 0630-1830 Monday through Friday. From October 30, 2025 through October 31, 2025, dive operations are scheduled to take place in the navigational channel. Barges will be placed along the bridge fenders blocking the channel. Mariners are encouraged to avoid the channel while dive operations are taking place. However, mariners requiring passage must contact Michael King at (617) 653-7987 with a 2 hour advance notice to arrange transit through the work area. Mariners are advised to exercise caution and reduce wake when transiting the area. Mariners with questions or concerns can contact the contractor via marine radio VHF-FM Ch 13/16 or call Patrick Finley at (860) 806-2365 or Bob Nardi at (203) 496-7353. Main Channel - East River Main Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2026-05-26 To: 2026-09-30 This Local Notice to Mariners (LNM) Information Form, submitted to the U.S. Coast Guard District Northeast, details a marine construction project by C.A.C. Industries, managed by Michal Mludzik. The project involves timber pile repair, dive work, and concrete infill under the esplanade at Bobby Wagner Walk, New York, NY (just north of the E 90th Street ferry and south of DSNY 91st Street MTS), with precise coordinates at 40°46'41.2"N, 73°56'33.4"W. Operations are scheduled to begin May 27, 2026, and continue through September 2028, taking place Monday through Friday from 0600 to 1600 hours, dependent on tidal conditions. The site will utilize a 120x55 deck barge equipped with an MLC-150 crane, and marine radio communications will be available via channel 16 (hail) and channel 78 (monitor). The barge will be stationed along the bulkhead to minimize navigation impact.

Approaches To New York Nantucket Shoals To Five Fathom Bank - Fire Island Inlet/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2024-09-12 To: 2039-11-14 Location: 40.63186° N / 73.3053° W 40.63094° N / 73.29678° W 40.62873° N / 73.29154° W 40.6278° N / 73.27761° W 40.62674° N / 73.27757° W 40.62762° N / 73.29276° W 40.62948° N / 73.29692° W 40.63016° N / 73.30538° W 40.62915° N / 73.3204° W 40.62306° N / 73.3237° W 40.62391° N / 73.33134° W 40.63165° N / 73.32152° W 40.63186° N / 73.3053° W NY-FIRE ISLAND INLET Shoaling has been identified in Fire Island Inlet in the area between buoys 3, 7, 13, and 15. Mariners are urged to use caution while transiting the area.	
Fire Island Inlet/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-09-08 To: 2027-03-31 Great Lakes Dredge & Dock Company, LLC will be conducting dredging operations covering the Fire Island Inlet and Shores Westerly to Jones Inlet, New York Beach Erosion Control and Navigation Project. The project involves placing approximately 1.5 million cubic yards of beach fill along the Gilgo Beach shoreline, with material dredged from Fire Island Inlet and deposition basins. Work is scheduled to begin September 8, 2026, and continue through March 2027, operating 24 hours per day, seven days per week. The contractor will use the cutter suction dredge Illinois, three booster pump plants, including two on land, and submerged pipeline to hydraulically pump dredged material to the placement area. Supporting waterside equipment includes the Booster Plant Jack, Survey Vessel Cooper River, Crew Boat Saginaw River, Derrick 184, Anchor Barges 114 and 115, Fuel Barge 1003, and several tug vessels. All vessels and pipelines will be lighted in accordance with U.S. Coast Guard regulations. Marine VHF Channels 13 and 16 will be monitored continuously during operations. The submission includes coordinates for the staging area, submerged pipeline route, and borrow area associated with the dredging and beach fill work. The contractor notes that a booster is located between pipeline points ML-2 and ML-3. Mariners transiting the area are urged to exercise extreme caution due to ongoing dredging activity, submerged pipeline, vessel operations, and related construction equipment. Project contacts identified in the request are Project Manager Mike Hungerford and Site Manager Cameron Scheid. The document is marked confidential and proprietary by Great Lakes Dredge & Dock Company.

9/9/26, 11:22 AMMaritime Safety Information Products Navigation Center			
Sector Northern New England, Submerged Lands Act (SLA) - Frenchman Bay/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2026-05-18 To: 2028-03-31 L Beginning May 18, 2026, and continuing until March 02, 2028, a Crane Barge along with an attendant plant will be operating at various locations in and around the Bar Harbor Breakwater located adjacent to Bald Porcupine Island and the Porcupine Dry Ledge. Materials will be delivered to this Crane Barge via Tug transit. The work zone in general extends approximately 300 feet on either the north or south sides of the existing breakwater rock structure. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution when travelling near the work area. When construction vessels are to navigate to the Bar Harbor breakwater they shall follow a designated haul route to minimize any disruptions to local marine traffic or fishermen. Vessels shall enter the harbor on a course of 343°. Upon reaching vertex of N 264340.78, E 1069401.28 (northeast of Bald Porcupine Island) they shall alter course to a heading of 270°. They will then continue at this heading until reaching a vertex of N264340.78, E 1067401.28 where they shall set a heading of 210° and maintain this heading to enter the work zone. The work zone in general extends approximately 300 feet on either the north or south sides of the existing breakwater rock structure. Its vertices are: Northeast corner: N 262830.48, E 1066588.92, Southeast corner: N 262354.34, E 1066858.96, Northwest corner: N 261413.24, E 1064383.15, Southwest corner: N 260917.96, E 1064721.87. When leaving the work zone any vessels shall navigate the course described above with opposite headings. Should any construction vessels need to leave the work zone for safe harbor they shall exit the work zone at its northeast corner (N 262830.48, E 1066588.92) on a course heading of 0° until reaching a vertex of N 268623.87, E 1066472.54 and start a heading of 45°. A safe harbor point shall be N 269679.20, E 1067527.92 which is west of Burnt Porcupine Island. An alternate safe harbor spot shall continue on the same course until reaching vertex N 270669.19, E 1068517.87 and then alter course to heading 148° until reaching safe harbor at N 269494.97, E 1070376.68. This safer harbor location is between Burnt Porcupine Island and Long Porcupine Island, east of Rum Key. Vessels may leave this safe harbor location on a heading of 210° back into the work zone. The above described safe harbor locations may be reached in the opposite direction if chosen. The Crane Barge will not be sitting in the federally marked navigation channel while repairing the breakwater. Should any construction vessels need to leave the work zone for safe harbor they shall exit the work zone and travel across the navigation channel to a designated safe harbor point that is located west of Burnt Porcupine Island. An alternate designated safe harbor point is located between Burnt Porcupine Island and Long Porcupine Island, east of Rum Key. The crew will be working Monday through Friday during daylight hours. The Crane and attendant plant will both monitor marine VHF Channel 16. Mariners are urged to use extreme caution and transit the area at a safe speed. If you have any questions or require additional information, please contact me via e-mail at mlayton@agatenj.com or via telephone at (609) 364-2078.

Hours of operation are from 6 a.m. to 4 p.m. weekdays. There will be a safety boat operating IVO the bridge. A 84ft navigation channel free of obstruction will be maintained at all times. For construction details please contact Jed Fitz, superintendent at 267-907-5932 or via marine radio VHF-FM 13/16. This project is to be completed by February 8, 2027. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 47' 60" Lon: -074° 04' 33"
Newark Bay - Hackensack River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2024-05-24 To: 2027-10-22 Location: 40.75346° N / 74.095153° W Bridge Name: Portal (N) Bridge Portal (N) Bridge Bridge replacement to the Portal Bridge North, across Hackensack River at mile 5.04 is in progress. Hours of operations are from Monday to Friday between 6:30 a.m. to midnight. There will be waterborne equipment blocking one draw of a swing bridge at a time and the other draw will be free and clear of any equipment for the passage of vessels. Mariners can contact one of the three (3) provided telephone numbers/emails or via marine radio VHF-FM CH 13/16 advising of travel through the channel (including possible return trips): 1. Martir Ortiz – Main Span Project Manager – (562) 307- 4916, mortez@traylor.com 2. Jack Phillips – Main Span Superintendent – (347) 924- 5635, john.h.phillips@skanska.com 3. Jim Hummel – Main Span Area Lead - (917) 417- 4885, Jim.Hummel@skanska.com Skanska Traylor PNB JV has been awarded the construction of the New Portal North Bridge Project (NJT Contract No. 20-083X, WBS No. GC.02) with a Notice to Proceed of April 7, 2022. Specific to the Hackensack River work, mile 5.0, the project consists of constructing two bridge piers, demolition of the existing center pier north fender, erecting three tied-arch spans of approximately 400 LF (1,200 LF overall), and demolition of the existing bridge once railroad traffic is switched to the new bridge. The current status of the channels: East Channel – Open West Channel – Close The Coast Guard is modifying the operating schedule that governs the Amtrak Portal Bridge across the Hackensack River, mile 5.0, at Little Snake Hill, New Jersey. This action is necessary to facilitate the construction of the new replacement Portal Bridge North, as designed by Amtrak as the owner of the bridge, adjacent to the current Amtrak Portal Bridge. This final rulemaking limits the extent of the opening of the Amtrak Portal Bridge in the horizontal position to prevent the swing span from striking the new Portal Bridge North during construction as follows: The draw shall only open to 55 feet horizontal clearance in the east channel and the west channel will be closed to all navigation while the draw is open. Whenever any bridge opening is needed, contact one of the three (3) provided telephone numbers/emails above with 24-hour advance notice to allow the removal of any waterborne equipment from the East Channel that restricts the horizontal clearance to less than 55 feet. The draw need not open for the passage of vessel traffic from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. Additional bridge openings shall be provided for tide restricted commercial vessels between 7 a.m. and 8 a.m. and between 5 p.m. and 6 p.m., if at least a two-hour advance notice is given by calling the number posted at the bridge. At all other times the bridge shall open on signal if at least a 2-hour advance notice is given. Please be advised that the existing Portal Bridge east channel horizontal clearance (temporary fender) will be maintained at approx. 55ft and west channel horizontal clearance at 91ft until it's demolished, both with a closed swing bridge vertical clearance of 23ft. With a swing bridge opening, the vertical clearance increases to 50ft with the existing Portal Bridge east channel horizontal clearance (temporary fender) being maintained at approx. 55ft and west channel being closed. Mariners are advised to exercise caution when transiting the area. This project will be completed by October 22, 2027.	Lat: 40° 45' 12" Lon: -074° 05' 43"
Newark Bay - Hackensack River/General/Bridges/Maintenance	Bridges	General/Bridges From: 2026-01-30 To: 2027-01-02 Location: 40.83963, -74.01879 Bridge Name: New Jersey Interstate 95 Turnpike Northbound Bridge On February 16, 2026, between 7:00 am and 3:30 pm on weekdays, in-water bridge maintenance will be performed on the New Jersey Turnpike (117.6 NO) IVO Pier One Overpeck Creek, mile .73 in Ridgefield, Bergen County, New Jersey. This work will be completed in three non-consecutive weeks. A 15 ft skiff and a 60 ft X 160 ft platform will be in the waterway intermittently. Hackensack River/General/Bridges/Removal	Bridges	General/Bridges From: Tentative 2026-09-01 through 2026-12-28 (to start) To: Project will take approximately 8 weeks Location: 40.75343, -74.09542 Bridge Name: Amtrak Portal Bridge This is a preliminary notice. STJV is tentatively scheduled to start demolition of the existing Portal North bridge as early as September 1, 2026, but could start as late as end of December 28, 2026. The actual start date will be provided in future updates and is dependent on moving remaining existing rail traffic onto the new bridge. Upon making the rail traffic switch, the power to the swing bridge will be cut, making the existing bridge inoperable and commencing demolition activities. The demolition of the existing bridge will require eight (8) continuous weeks of full channel closures (Both Channels) for the safety of the public and for the successful completion of the work. The bridge demolition will NOT use explosives, instead sections of steel well be cut and removed with a crane on a barge. Once the steel beams are removed, cofferdams will be installed, the concrete piers will be demolished along with the timber fendering. Mariners are advised to plan accordingly and exercise caution when transiting the area.	Lat: 40° 45' 12" Lon: -074° 05' 44"

Hackensack River/General/Bridges	Bridges	Hackensack River/General/Bridges From: 2026-10-08 To: 2027-01-22 Location: 40.75343, -74.09542 Bridge Name: Amtrak Portal Bridge Demolition of the Amtrak Portal Drawbridge across Hackensack River at mile 5.0 will commence on October 9, 2026. To accommodate the demolition of the drawbridge superstructure, the Coast Guard has issued a temporary deviation from the regulation governing the operation of the moveable bridge. Under this temporary deviation, the bridge may remain in the closed position from October 9, 2026, until superstructure demolition over the navigable channel is complete on or about January 6, 2027. Mariners are also advised that a full channel closure in the vicinity of the bridge will take effect from approximately November 2, 2026, through January 6, 2027. Channel closure dates will be updated as demolition activities progress. Vessels that can make passage without a bridge opening request may do so until channel closures take effect. Mariners are advised to exercise caution and reduce wake when transiting the area.	Lat: 40° 45' 12" Lon: -074° 05' 44"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/General/LAA/RNA/Temporary Regulated Navigation Zone	LAA/RNA	General/LAA/RNA/Temporary Regulated Navigation Zone From: 2025-07-08 To: 2030-12-31 The Coast Guard is establishing a temporary regulated navigation area (RNA) and a safety zone on the Hampton River at the inlet to Hampton Harbor, Hampton, NH, in response to hazardous conditions created by construction activities for the Neil R. Underwood Seabrook-Hampton Harbor Bridge replacement project. This rule is necessary to provide for the safety of life in the areas undergoing demolition and construction. The RNA will be enforced from July 1, 2025, through December 31, 2030, and will establish the following operating restrictions on vessels: Nothing in this regulation relieves any vessel, owner, operator, charterer, master, or person directing the movement of a vessel, from the consequences of any neglect to comply with this part or any other applicable law or regulation (i.e. the International Regulations for Prevention of Collisions at Sea, 1972 (72 COLREGS) or 33 CFR part 84—Subchapter E, Inland Navigation Rules) or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case. Entry and movement within the RNA is subject to a “Slow-No Wake” speed limit. All vessels may not produce a wake and may not attain speeds greater than five (5) knots unless a higher minimum speed is necessary to maintain bare steerageway. Any vessel transiting through the RNA must make a direct passage. No vessel may stop, fish, moor, anchor, or loiter within the RNA at any time. Vessels may not pass (overtake) another vessel within the RNA. Only one vessel is permitted to pass through the center span navigational channel at any given time. Except when transiting through the center span navigation channel, no vessel or craft may operate within 20 feet of the bridge(s). The operator of any vessel transiting in the RNA must comply with all lawful directions given to them by the COTP or the COTP’s on-scene representative. viii) One-way traffic will flow northbound between the eastern side of the shallow waters and the Seabrook-Hampton Harbor Bridge. The northern side of the shallow area will accommodate one-way traffic moving west. The Safety Zone, includes all navigable waters within a 50-yard radius of the center point of the bridge, will be effective from July 1, 2025, through Decmber 31, 2030, but will only be enforced during active construction within the main span navigational channel or other instances which may cause a hazard to navigation as determined by the COTP. The COTP will make notification of the exact dates and times in advance of each closure period of the safety zone to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency. The complete rulemaking is available under Federal Register docket number USCG-2025-0389 and can be accessed through the federal portal at https://www.regulations.gov/document/USCG-2025-0389-0001 We invite your comments on this rulemaking. To submit your comment online, go to https://www.regulations.gov, and insert “USCG-2025-0389” in the “search box”. Click “Search” and then click “Comment.” We will consider all comments received on or before October 6, 2025. If the project is completed before December 31, 2030, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/msi. For questions regarding this Marine Safety Information Bulletin contact Mr. Craig Lapiejko, Waterways Management at First Coast Guard District, telephone (571) 607-6314, e-mail: craig.d.lapiejko@uscg.mil. Main Channel - Hudson River/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2024-09-03 To: 2027-06-30 Location: 42-30-33.840N/073-46-23.340W Bridge Name: Castleton Highway Bridge Bridge Rehabilitation – Construction to the Castleton Highway Bridge across Hudson River at mile 135.7 is extended from June 30, 2026 to June 30, 2027. Hours of operation are from 7 a.m. and 7 p.m. Temporary safe span platforms will be installed under the tram rail steel (over navigation channel) which will reduce vertical clearance by approximately 6 feet. A minimum of 210 feet east side and the west side of the navigation channel will be cleared of obstruction at all times for safe passage of vessels. In addition, 25 feet of buffer will be maintained on each side of the channel marker. A safety boat will be operated IVO the bridge. Hot work will be performed during construction. Mariners requiring full horizontal clearance can contact the contractor/operator via marine radio VHF-FM CH 13 or call 518-857-9215. For all construction related questions, please contact Tim Mastro at 518-337-7231. This project is to be completed by June 30, 2027. Mariners are advised to exercise caution when transiting the area.	Lat: 42° 30' 34" Lon: -073° 46' 23"
Main Channel - Hudson River/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2024-05-01 To: 2029-12-31 Location: 40.851559° N / 73.9522° W Bridge Name: George Washington Bridge Rehabilitation of Lower Level Structural Steel, Painting and Replacement of Maintenance Travelers – Construction to the rehabilitation at the George Washington Bridge across the Hudson River at mile 11.0 will commence on May 1, 2024. Temporary work platform will be installed under the entire length of the bridge. The temporary work platform will reduce the vertical clearance by 3ft 9in plus 2ft sag max. below the low steel. Welding (hot work) may be performed during working hours. A 26 ft safety boat will be operating in the vicinity of the bridge. Mariners requiring full horizontal clearance can contact Michael Androsiglio 914-447-7513 or via marine radio. The resident engineer or contractor will be equipped with a VHF-FM marine radio and will be monitoring Channel 13/16 during hours of operation. Mariners can contact Marc Helman at 212-435-6112 or 551-220-8853 or Henry Chiang at 201-346-8921 for construction details. This project is to be completed by December 31, 2029. Mariners are advised to exercise extreme caution when transiting the area.	Lat: 40° 51' 06" Lon: -073° 57' 08"
Main Channel - Hudson River/General/Bridges/Construction	Bridges	General/Bridges From: 2025-08-18 To: 2029-02-29 Location: 42.65434° N / 73.74177° W Bridge Name: Livingston Avenue Railroad Bridge Bridge Replacement – Construction and demolition of existing railroad structures and facilities of the Livingston Avenue Railroad Bridge over the Hudson River at mile 146.2 between Albany and Rensselaer commenced on 18 August 2025. Work hours are Monday through Saturday between 6a.m. and 6 p.m. through September 30, 2026. There will be a safety boat operating IVO the bridge. For construction details please contact Jack Phillips at 347 924-5635 or via marine radio VHF-FM 13/16. Mariners are advised to exercise caution when transiting the area.	Lat: 42° 39' 16" Lon: -073° 44' 30"
General/Bridges/Closure (Scheduled Or Emergency)	Bridges	The Broadway Bridge at mile 6.8 in the Harlem River is unable to open for marine traffic until further notice, due to ongoing rehabilitation of its electrical and mechanical systems. The vertical clearance of the bridge in the closed position is 24 feet above MHW. Vessels that under the bridge in the closed position may do so at any time. Mariners are advised to use caution when transiting the area.	Lat: 40° 52' 25" Lon: -073° 54' 40"
Main Channel - Hudson River/General/Bridges/Construction	Bridges	Cable anchorage retrofits of the Governor Mario M. Cuomo Bridge across the Hudson River at mile 27.0 will commence on March 15, 2026. Temporary work platform will be installed in four locations underneath the bridge. The temporary work platform will extend 6 feet beneath the deck girders but remain above the traveler handrails, not impacting the vertical clearance of the bridge. Welding (hot work) may be performed during working hours. Work hours are 7:00 a.m. to 5:30 p.m. Monday through Friday. A safety boat will be operating in the vicinity of the bridge. The resident engineer or contractor will be equipped with a VHF-FM marine radio and will be monitoring Channel 13/16 during hours of operation. Mariners can contact Phillip Mirabella at 732-306-4135 or Rafik Moawad at 848-235-1281 for construction details. This project is scheduled to be completed by September 27, 2027. Mariners are advised to exercise caution when transiting the area.	Lat: 41° 04' 13" Lon: -073° 54' 27"
Main Channel - Hudson River/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2024-09-12 To: 2039-12-01 Location: 42.07223° N / 73.92927° W 42.07103° N / 73.92916° W 42.07132° N / 73.93048° W 42.07204° N / 73.92998° W 42.07223° N / 73.92927° W NY-HUDSON RIVER-CATSKILL CREEK-ESOPUS CREEK-ROUNDOUT CREEK Significant shoaling has been reported at the mouth of Catskill Creek, that may impact commercial traffic, along the southern portion of the channel. In Esopus Creek, shoaling has occurred faster than anticipated at the mouth of the creek when passing between Saugerties Lighthouse and Hudson River Lighted Buoy 93. In Roundout Creek, there is shoaling at the mouth of the creek. Mariners should exercise caution when navigating these areas.	
Main Channel - Hudson River/General/LAA/RNA/Safety Zone	LAA/RNA	General/LAA/RNA/Safety Zone § 165.T01-0336 Safety Zone; Hudson River, Manhattan, NY (a) Location. The following area is a safety zone: All waters of the Hudson River from surface to bottom, encompassed by a line connecting the following points beginning at 40°45'20.32" N, 074°00'23.84" W; thence to 40°45'23.34" N, 074°00'30.60" W; thence to 40°45'24.03" N, 074°00'40.85" W; thence to 40°45'18.89" N, 074°00'48.18" W; thence to 40°45'13.80" N, 074°00'48.64" W; thence to 40°45'08.03" N, 074°00'46.44" W; thence to 40°45'07.51" N, 074°00'37.61"W; thence to 40°45'09.18" N, 074°00'36.37" W; thence to 40°45'06.70" N, 074°00'30.78"W; thence returning along the Manhattan shoreline to the beginning point. These coordinates are based on the World Geodetic System (WGS 84) / North American Datum 83 (NAD 83). (b) Definitions. As used in this section, designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer with law enforcement authority designated by or assisting the Captain of the Port New York (COTP) in the enforcement of the safety zone. (c) Regulations. (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative. (2) To seek permission to enter, contact the COTP or the COTP's representative on VHF-FM channel 16 or by telephone at (718) 354-4353. Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative. (3) Hudson River Community Sailing Vessels and Human Powered Vessels transiting directly to or from the Pier 66 area may transit through the southern area of the safety zone to the east of the Hudson River Cofferdam Lighted Hazard Buoy D (LLNR 37663.3) unless otherwise directed by the COTP or the COTPs designated representative. (d) Enforcement period. This section will be subject to enforcement from 12:01 a.m. on May 1, 2026, to 11:59 p.m. on January 20, 2029. If the project is completed before January 20, 2029, enforcement of the safety zone will be suspended, and notice given via Local Notice to Mariners. The Coast Guard Northeast District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/maritime-safety-information .	

Main Channel - Hudson River/General/LAA/RNA/Safety Zone	LAA/RNA	General/LAA/RNA/Safety Zone From: 2026-09-18 To: 2026-09-19 Location: POUGHKEEPSIE, NY - HUDSON RIVER – FIREWORKS SAFETY ZONE Mariners are advised that a safety zone will be enforced for a barge-based fireworks display, scheduled to be held on the Hudson River, September 18th, 2026, from 8:00 p.m. until 10:00 p.m. The fireworks barge will be in approximate position 41° 42' 32" N, 73° 56' 38" W and the Safety Zone encompasses all waters within a 150 yard radius from the barge. Vessels may not enter, remain in, or transit through the Safety Zone during the enforcement period unless authorized by the Coast Guard Captain of the Port. Other Federal, State and local agencies may assist these personnel in the enforcement of the Safety Zone.	
Main Channel - Hudson River/General/LAA/RNA/Safety Zone	LAA/RNA	General/LAA/RNA/Safety Zone From: 2026-09-07 To: 2026-09-07 Location: HYDE PARK, NY - HUDSON RIVER – FIREWORKS SAFETY ZONE Mariners are advised that a safety zone will be enforced for a barge-based fireworks display, scheduled to be held on the Hudson River near the Culinary Institute of America in Hyde Park, NY on September 7, 2026 from 8:00p.m. until 10:00p.m with a rain date of September 9, 2026. The fireworks barge will be in approximate position 41° 44' 39.49" N, 73° 56' 17.09" W and the Safety Zone encompass all waters within a 450-foot radius from the barge. Vessels may not enter, remain in, or transit through the Safety Zone during the enforcement period unless authorized by the Coast Guard Captain of the Port. Other Federal, State and local agencies may assist these personnel in the enforcement of the Safety Zone.	
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-06-16 To: 2027-06-25 Location: 40.77075° N / 73.99841° W Reicon Group, LLC will be conducting pile repairs at Pier 94 from June 16, 2025, to June 25, 2027, Monday through Friday, between 7:00am to 3:30pm. Equipment on scene will be the RTC 330, monitoring VHF-FM CH 13 and will require a 24-hour notice for all vessel movement requests.	Lat: 40° 46' 15" Lon: -073° 59' 54"
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-11-03 To: 2026-10-31 Location: 40-42-06.984N/074-02-02.364W PKF-Mark III, Inc will be conducting marine construction operations on the Hudson River, at Liberty State Park, in position 40-42-7.000N, 074-02-02.370W, from November 3, 2025, to October 31, 2026, Monday through Friday from 6:00am to 5:00pm. Equipment on scene will be multiple floating barges, crane barges, and material barges.	Lat: 40° 42' 25" Lon: -074° 02' 01"
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2026-02-17 To: 2031-01-29 Location: 41-59-01.284N/073-57-06.408W Bank Stabilization operations will be conducted north of the Kingston Rhinecliff Bridge off the west side of the Hudson River in position 41-59-1.240N, 073-57-9.794W, from February 17, 2026, to January 28, 2031. Work will be conducted withing the Town of Ulster allowable work hours between 7:00 am to 10:00 pm. Equipment on scene will be, Long reach excavators from upland at first and possibly on a barge if necessary. All work will be within the existing cove. The work will be within the existing cove off the Hudson River and will not interfere with the channel. The installation of a 44-foot by 8-foot floating pier, attached to a bulkhead by a 36-foot by 4-foot gangway. Three (3) finger piers, approximately 36-feet by 6-feet each, will extend from the main floating pier. The entire pier assembly will be held in place by five (5) plastic, 16-inch-diameter piles, each installed by vibratory hammer. The dredging of a total of approximately 1,429 cubic yards of material, over an area of approximately 12,500 square feet. All dredged material will be disposed of within a contained upland disposal area on the property.	Lat: 41° 59' 01" Lon: -073° 57' 06"
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-08-17 To: 2026-10-10 Location: 40-46-01.920N/074-00-05.832W Donjon Marine Co., Inc. submitted a Local Notice to Mariners information form for FY27 maintenance dredging at the Manhattan Cruise Terminal berths in New York. Work is scheduled to begin on September 14, 2026, with an estimated completion date of October 10, 2026, and will occur 24 hours per day, seven days per week. The operation will take place inside the Manhattan Cruise Terminal berths near latitude 40°45'57.9384"N and longitude 73°59'57.03"W. Equipment on scene is expected to include one dredge, either Oyster Bay or Delaware Bay, three dump scows, one tending tug, and two towing-to-sea tugs. The project will operate as a "move on demand" dredging operation, with a tending tug maintained on site at all times to move vessels as needed to avoid impeding navigation. Vessels may be contacted on working channel 78 and will monitor channels 13 and 16.	Lat: 40° 46' 02" Lon: -074° 00' 06"
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-08-28 To: 2027-12-31 Location: 42-29-01.464N/073-47-14.784W Carver Companies will conduct maintenance dredging operations at the Port of Coeymans on the Hudson River, New York, at approximate position 42°29'01.45"N, 073°47'14.78"W (42.483737N, 73.787440W). Operations are scheduled to begin September 1, 2026, and continue through December 31, 2027, operating 24 hours per day, 7 days per week. Vessels may contact the operation on VHF-FM channels 13 and 81A. Mariners should contact the tending tug CMT PIKE via VHF for passing arrangements and coordination to avoid impeding navigation.	Lat: 42° 29' 01" Lon: -073° 47' 15"
Main Channel - Hudson River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2026-01-06 To: 2027-01-21 From November 24, 2024, through January 20, 2027, Weeks Marine and Frontier-Kemper Tutor Perini JV will conduct marine construction in the Hudson River on behalf of the Hudson Tunnel Project. The construction area is bounded by the following positions off the Manhattan bulkhead: 40-45-20.32N 074-00-23.84W; 40-45-18.89N, 074-00-48.18W; 40-45-13.80N 074-00-48.64W; 40-45-12.40N. 074-00-28.47W. The USCG has established a Safety Zone, 33 CFR 165.T01-0336 Safety Zone; Hudson River, Manhattan, NY. Mariners transiting west of the safety zone should proceed at a speed to minimize potential wake or surge damage to the vessels working the construction area. There are two distinct jobsites within the construction area. The first jobsite, which is operated by Weeks Marine, is west of Pier 66. Within this jobsite, Weeks Marine is conducting soil mixing within a 110' wide x 600' long cofferdam for the Hudson River Ground Stabilization (HRGS) Project. Work hours are approximately 7AM – 7PM, Monday through Saturday. The cofferdam is marked with FL W 4s lights at each corner and at 30 ft intervals, and with white retro-reflective tape 6" high and at least 4' long is installed above the MHHW mark every 50 feet on the cofferdam. The Weeks 61 barge (AIS - WEEKS 61 Barge) will move between the south and north sides of the cofferdam to excavate spoils within the cofferdam. The Weeks 61 barge monitors VHF-FM channels 13 / 16 / 82. The Weeks 263 barge (AIS- WEEKS 263) and material barges will be on the southern side outside of the cofferdam to support drilling operations within the cofferdam. The Weeks 263 barge monitors VHF-FM channels 13 / 16 / 67. The Weeks 526 barge (AIS - WEEKS 526) will remove piles from the west end, lay them down on barges, shift east, and reinstall them. The Weeks 526 barge monitors VHF-FM channels 13 / 16 / 66. The second jobsite, which is north of Pier 66 in close proximity to the Manhattan bulkhead and near position 40-45-15.270N, 074-0-28.007W, is operated by Frontier-Kemper Tutor Perini JV. Within this jobsite, Posillico Civil has constructed a 200 ft x 150 ft temporary marine structure to facilitate grouting and freezing operations to stabilize the ground beneath the Manhattan bulkhead in preparation for tunnel boring. The 150 ft x 50 ft Joseph D barge with a 184 ft crane on deck will be moored along the west face of the temporary marine structure. The 150 ft x 150 ft scow Angela will be moored on west side of the Joseph D barge. All barges require tug assistance for a movement and a minimum notice of 24 hours via VHF radio is required for any barge relocation. All moored barges display fixed white lights in accordance with the Inland Navigation Rules. Four seasonal white lighted buoys have been reset. Two (LLNR 37663, 37663.1) are upriver of the construction area, and two (LLNR 37663.2, 37663.3) are downriver. All four lighted buoys exhibit FL W 2.5s characteristics. From September 1 to September 30, Normandeau Associates, Inc. will be on site within the Safety Zone conducting monitoring for Atlantic and shortnose sturgeon. As part of this monitoring activity, the vessel Parker will be on scene. Work hours are approximately 7AM – 7PM, Monday through Saturday. Parker monitors VHF-FM channels 13 / 16.	

Main Channel - Hudson River/General/Marine Events/Swim	Marine Events	LNM NY - EAST RIVER - HARLEM RIVER - HUDSON RIVER – Swim Mariners are advised that multiple swim events are scheduled from June 13, 2026, through October 13, 2026, navigating counterclockwise around Manhattan, NY. Approximately two to five participating swimmers will be assisted by a lead safety vessel in addition to one escort vessel and one escort kayak per every one to two swimmers. The swim events will start at either Pier A in Battery Park or Mill Rock, near East 90th St., Manhattan. They will proceed up the East River, through the Harlem River, and down the Hudson River, concluding back at the start position. Interested mariners may contact the Principal Swim Safety Officer on VHF channel 6. Main Channel - Kill Van Kull/General/Marine Construction (Excluding Bridges)/Boring and Core Samples	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Boring and Core Samples From: 2026-0-01 T8o: 2026-10-31 Location: 40-38-37.428N/074-08-45.132W Amy Ruta of Parsons submitted a Local Notice to Mariners (LNM) Information Form for sediment core boring operations scheduled from August 1, 2026, to October 31, 2026, in Newark Bay and Kill Van Kull, New Jersey, near the Bayonne Bridge at coordinates 40°38'37.435"N, 74°8'45.144"W. The work will be conducted using barge-mounted sediment drilling equipment and samplers, operating five days per week from 7 am to 5 pm. Vessels involved can be contacted on VHF Channel 16, and passing arrangements require a 30-minute notice to move vessels located within the side slopes of the navigation channel, though no work will occur within the channel itself.	Lat: 40° 38' 37" Lon: -074° 08' 45"
Main Channel - Kill Van Kull/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-07-27 To: 2026-09-14 Location: 40-38-44.412N/074-10-46.200W The U.S. Army Corps of Engineers (USACE) will conduct a maintenance dredging project in the Arthur Kill 35' Reach Channel, a vital federal navigation route between New York and New Jersey. The project, managed by Donjon Marine Co., LLC, is designed to maintain safe and efficient passage for commercial and maritime traffic in this busy waterway. Work is scheduled to begin on July 27, 2026, and conclude by September 14, 2026, with operations running seven days a week for twelve hours each day. The project site is located at latitude 40° 38' 44.2428" N and longitude 74° 10' 46.2036" W. On-site equipment will include a dredge, a tending tug, hopper scows, a towing tug for loaded scows, and a crew boat. For safety and coordination, vessels involved in the project will operate on radio channel 78 and monitor channels 13 and 14. To minimize impacts on navigation, the project will follow a "move on demand" approach, with a tending tug available to relocate the dredge and scows as needed to avoid impeding other vessels. Mariners are encouraged to coordinate passing arrangements with the project team to ensure safe and efficient transit through the area. For ongoing updates and guidance, the Local Notice to Mariners (LNM) will provide official information to the maritime community. Questions or concerns can be directed to Brian P. Henry at Donjon Marine Co., LLC via email at brian.henry@donjon.com or by phone at 908-413-3003.	Lat: 40° 38' 44" Lon: -074° 10' 46"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Piscataqua River - Little Bay/General/Bridges/Removal	Bridges	Demolition activities have commenced to the General Sullivan Bridge across Little Bay, mile 0.1, between Newington and Dover NH and will continue through March 31, 2027. Work trestles have been constructed adjacent to the bridge from both banks, reducing the navigable channel to a width of 160 feet. A temporary work platform will be suspended from the bridge over the navigable channel on or about April 1, 2026. This work platform will not reduce the vertical clearance of the General Sullivan Bridge further than the clearance of the adjacent Spaulding Turnpike Bridge. Between April 1, 2026, and August 28, 2026, there will be short duration navigable channel closures to facilitate the removal of the bridge deck and superstructure over the navigable channel. The Coast Guard will announce these closures via Broadcast Notice to Mariners and updates to the Local Notice Mariners. Work hours for this project are 6:00 a.m. to 6:00 p.m. Monday through Friday. Mariners can contact on-scene project managers via VHF-FM channels 13/16 or by calling (207) 841-1902. Mariners are advised to exercise caution when transiting this area.	Lat: 43° 07' 05" Lon: -070° 49' 35"
Piscataqua River - Little Bay/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2026-06-05 To: 2026-11-20 Location: 43-07-05.196N/070-49-34.608W Bridge Name: General Sullivan Bridge Reed & Reed Inc. will be conducting bridge removal and temporary trestle construction operations in Little Bay, between Dover and Newington, NH, in position 43-07-04.56N, 070-49-34.59W. Construction will run from June 5, 2026, to November 20, 2026, Monday through Saturday, between 6:30am to 6:30 pm, local time. Equipment on scene will be (2) 250-ton cranes, (1) 90-ton Rough Terrian Crane, (2) forklifts, (1) dump truck, (1) excavator, (1) loader, (2) safety boats, (2) work boats, (2) 90' manlifts, monitoring VHF-FM CH 13 & 16. Vessels will be directed through a temporarily reduced 160-foot-wide navigational channel marked by tow temporary red and two temporary green buoys. Navigation through the work zone will be maintained during normal operations whenever safe to do so. The channel is expected to be restricted from June 5, 2026, through November 20, 2026, due to construction of the final Newington trestle span. In addition, short-term channel closures of up to 4 hours will be required during Span 5 superstructure removal, currently scheduled between August 3, 2026, and August 31, 2026. Outside of active closure periods, passage through the work zone will be accommodated subject to site conditions and construction activity.	Lat: 43° 07' 05" Lon: -070° 49' 35"

Ambrose Channel - Main Channel/General/Bridges/Rehabilitation	Bridges	From April 1, 2026, through September 30, 2026, contractors will be installing main cable access platforms above the roadways of the Verrazzano Narrows Bridge, mile 0.0 across New York Harbor. The safety boat RHIANNON will be stationed below active work on this project during the hours of 7:00 a.m. and 3:30 p.m., as well from 10:00 p.m. to 6:00 a.m. The safety boat will move upon request by contacting the vessel directly on VHF-FM Channels 13 or 16. For more information regarding this project contact Eric Dovak at (347) 860-2399.	Lat: 40° 36' 22" Lon: -074° 02' 44"
Ambrose Channel - Main Channel/General/Bridges/Construction	Bridges	General/Bridges/Construction From June 1, 2026 – October 31, 2026, daily between 7:00 a.m. and 5:00 p.m., a biennial bridge inspection using an UBIU and traveler will be conducted on the Verrazano Bridge. In August, main cable inspection using rappelled ropes will also be conducted. Mariners requiring the UBIU or traveler to move to provide full vertical clearance can contact VTS New York, or contact the contractor via marine radio VHF-FM Ch. 13/16 or by calling 646-996-0634 or 646-634-3390. Mariners are advised to exercise caution when transiting the area. Middle Channel

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION

New Rochelle Harbor North Approach - Middle Channel/General/LAA/RNA/Temporary Regulated Navigation Zone	LAA/RNA	New Rochelle, NY - Long Island Sound – Safety Zone – Bridge Construction Mariners are advised that a safety zone will be enforced for construction work on the Glen Island Approach Bridge. The safety zone will be enforced from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The Safety Zone encompasses all waters within a line beginning at 40° 53' 18.58"N 73° 46' 56.26"W; thence to 40° 53' 22.08"N 73° 46' 59.39"W; thence north along the shore to 40° 53' 23.8"N 73°46' 57.51"W; thence to 40° 53' 19.15"N 73° 46' 52.54"W and thence south along the shore back to the point of origin (WGS 84). You may not enter, remain in, or transit through the Safety Zone during the enforcement period unless authorized by the Coast Guard Captain of the Port. Other Federal, State and local agencies may assist these personnel in the enforcement of the Safety Zone. Mariners are urged to exercise caution while in the area. The anticipated dates for the windows of full channel closures: Date December 2, 2024, through December 20, 2024 February 3, 2025, through May 22, 2025 October 2, 2025 through 12 p.m. on May 22, 2026; from 7 a.m. on May 26, 2026, through 5 p.m. on May 29, 2026; and from 7 a.m. on June 22, 2026, through 5 p.m. on June 26, 2026.	
New Rochelle Harbor North Approach - Middle Channel/General/LAA/RNA/COTP Restriction	LAA/RNA	General/LAA/RNA/COTP Restriction From: 2024-12-16 To: 2027-05-31 The Coast Guard is establishing a temporary safety zone for certain waters of Long Island Sound in the vicinity of the Glen Island Approach Bridge, New Rochelle, NY, for construction vessels and machinery involved in the rehabilitation project of the bridge. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with the bridge construction between December 2, 2024, through May 27, 2027. When enforced, this regulation prohibits persons and vessels from being in the safety zone unless authorized by the Captain of the Port New York or a designated representative. DATES: This rule is effective without notice from December 3, 2024, through 5 p.m. on May 27, 2027. For the purposes of enforcement, actual notice will be used from midnight on December 2, 2024, until December 3, 2024. This rule will only be enforced during periods when construction operations at the bridge are in progress. Comments and related material must be received by the Coast Guard on or before March 3, 2025. ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to https://www.regulations.gov , type USCG-2024-0956 in the search box and click "Search." Next, in the Document Type column, select "Supporting & Related Material." FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Jeffrey Yunker, Waterways Management Division, U.S. Coast Guard Sector New York; telephone 718-354-4195, email Jeffrey.M.Yunker@uscg.mil . IV. Discussion of the Rule This rule establishes a safety zone from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The anticipated dates for the windows of full channel closures are from 7 a.m. on December 2, 2024, through 5 p.m. on December 20, 2024; from 7 a.m. on February 3, 2025, through 5 p.m. on May 22, 2025; and from 7 a.m. on October 2, 2025, through 5 p.m. on April 29, 2026. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in advance of these scheduled closures. All these dates are tentative and subject to change due to weather, supply chain delays, or other unforeseen circumstances. This rule remains effective through May 27, 2027, in case the project is delayed due to unforeseen circumstances. The area regulated by the safety zone will encompass the waters around the Glen Island Bridge and will cover all navigable waters, from surface to bottom, within the area formed by connecting the following latitude and longitude points in the following order: 40°53'18.58" N 73°46'56.26" W; thence to 40°53'22.08" N 73°46'59.39" W; thence north along the shore to 40°53'23.8" N 73°46'57.51" W; thence to 40°53'19.15" N 73°46'52.54" W and thence south along the shore back to the point of origin. This area is intended for the vessels and machinery being used by personnel for the Glen Island Bridge rehabilitation project. The duration of the zone is intended to ensure the safety of personnel, vessels, and these navigable waters during the bridge construction. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition.

Narrows Bay/General/Bridges	Bridges	Narrows Bay/General/Bridges From: 2026-09-03 To: 2027-08-01 Location: 40.7382, -72.8687 Bridge Name: Smith Point Bridge Suffolk County has begun the construction of the Smith Point Bridge replacement across Narrow Bay at mile point 6.1, between Mastic Beach and Smith Point, NY. A 20' x 50' Poseidon sectional barge is onsite and will be moored on the southern end of the north trestle initially. 20' x 8' Aluminum Work Skiff is onsite, moored in the marina and assisting around site during the day. Barges will be in the waterway until August 1, 2027. All barges will be positioned outside of the navigational channel. Mariners with any questions or concerns may contact Nicholas laboni at (516) 551-7879. Mariners that can pass without a bridge opening may do so and are advised to exercise caution when transiting the area.	Lat: 40° 44' 18" Lon: -072° 52' 07"

NAVAREA IV/General/Hazards To Navigation/Obstructions	Hazards To Navigation	General/Hazards To Navigation/Obstructions From: 2026-08-24 To: 2026-11-30 Location: 39-44-52.008N/072-25-06.708W The Wildlife Conservation Society submitted a Notice to Mariners regarding planned acoustic monitoring work near the Hudson Canyon. The project involves deploying four small, fully submerged acoustic recorders at four sites near the northern end of Hudson Canyon to detect vocalizing cetacean species and characterize the ambient underwater noise environment. The equipment consists of compact acoustic recording units suspended approximately two meters above the seafloor between an anchor and a small sub-surface float. The design has no surface expression and uses an acoustic release system intended to leave no equipment or mooring on the seafloor after recovery. The listed monitoring sites are located at approximately 39°44'52.02" N, 072°25'6.72" W; 39°37'26.33" N, 072°28'26.67" W; 39°36'47.57" N, 072°17'9.68" W; and 39°28'44.31" N, 072°32'56.1" W. Initial deployment is planned for August 26, 2026, with retrieval and redeployment anticipated in October or November. Work will occur during daylight hours, generally between 7:00 a.m. and 7:00 p.m. Operations will use a small research vessel, approximately 6 to 10 meters in length, along with acoustic receivers, anchors, rope, sub-surface buoys, and related deployment equipment. The recorders and floats will be placed approximately 80 meters below the surface, with no surface equipment, which is intended to avoid interference with vessel traffic. Marine radio channel 16 is listed for communications, and no disposal site is associated with the activity.	Lat: 39° 44' 52" Lon: -072° 25' 07"

The equipment consists of compact acoustic recording units suspended approximately two meters above the seafloor between an anchor and a small sub-surface float. The design has no surface expression and uses an acoustic release system intended to leave no equipment or mooring on the seafloor after recovery. The listed monitoring sites are located at approximately 39°44'52.02" N, 072°25'6.72" W; 39°37'26.33" N, 072°28'26.67" W; 39°36'47.57" N, 072°17'9.68" W; and 39°28'44.31" N, 072°32'56.1" W. Initial deployment is planned for August 26, 2026, with retrieval and redeployment anticipated in October or November. Work will occur during daylight hours, generally between 7:00 a.m. and 7:00 p.m. Operations will use a small research vessel, approximately 6 to 10 meters in length, along with acoustic receivers, anchors, rope, sub-surface buoys, and related deployment equipment. The recorders and floats will be placed approximately 80 meters below the surface, with no surface equipment, which is intended to avoid interference with vessel traffic. Marine radio channel 16 is listed for communications, and no disposal site is associated with the activity.	Lat: 39° 36' 48" Lon: -072° 17' 10"
NAVAREA IV/General/Hazards To Navigation/Obstructions	Hazards To Navigation	General/Hazards To Navigation/Obstructions From: 2026-08-24 To: 2026-11-30 Location: 39-28-44.292N/072-32-56.076W The Wildlife Conservation Society submitted a Notice to Mariners regarding planned acoustic monitoring work near the Hudson Canyon. The project involves deploying four small, fully submerged acoustic recorders at four sites near the northern end of Hudson Canyon to detect vocalizing cetacean species and characterize the ambient underwater noise environment. The equipment consists of compact acoustic recording units suspended approximately two meters above the seafloor between an anchor and a small sub-surface float. The design has no surface expression and uses an acoustic release system intended to leave no equipment or mooring on the seafloor after recovery. The listed monitoring sites are located at approximately 39°44'52.02" N, 072°25'6.72" W; 39°37'26.33" N, 072°28'26.67" W; 39°36'47.57" N, 072°17'9.68" W; and 39°28'44.31" N, 072°32'56.1" W. Initial deployment is planned for August 26, 2026, with retrieval and redeployment anticipated in October or November. Work will occur during daylight hours, generally between 7:00 a.m. and 7:00 p.m. Operations will use a small research vessel, approximately 6 to 10 meters in length, along with acoustic receivers, anchors, rope, sub-surface buoys, and related deployment equipment. NAVAREA IV/General/Hazards To Navigation/Hazards	Hazards To Navigation	General/Hazards To Navigation/Hazards From: 2026-07-31 To: 2027-03-31 Location: 41-35-29.724N/070-28-00.696W 41-35-29.688N/070-27-58.320W 41-35-26.340N/070-27-57.312W 41-35-26.340N/070-27-58.824W 41-35-29.724N/070-28-00.696W South Cape Oyster Co. will be conducting shellfish aquaculture operation in Ockway Bay, Mashpee, Massachusetts, located on the eastern side of the entrance from Popponesset Bay, west of Daniels Island. The work is associated with existing oyster farm operations and a request for Nationwide Permit 48 verification. The operation is listed as year-round, with floating gear deployed approximately April 1 through November 30 and lowered for overwintering from December 1 through March 31 and during storms. Site visits occur several times per week during the operating season and as needed in winter, generally during daytime hours. Equipment on scene includes a 21-foot Carolina Skiff work boat, floating vinyl-coated wire mesh cages, grow bags, bottom trays, yellow 16-inch marker balls, line, and approximately 56 helical screw anchors. The vessel may monitor VHF Channel 16 while underway. The form states that the aquaculture grant is outside navigable channels and mooring fields, in shallow water of approximately 2 feet at mean low water and 6 feet at mean high water. The site is marked year-round with six yellow aquaculture marker balls, and the applicant states that the fixed gear does not impede navigation. No vessel relocation is anticipated, and the work skiff will yield to transiting traffic.	
NAVAREA IV/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-08-03 To: 2026-10-20 Location: 44-21-08.640N/067-22-59.880W Woods Hole Oceanographic Institution submitted a Local Notice to Mariners (LNM) Information Form to the U.S. Coast Guard First District for a project focused on harmful algal bloom surveillance in the Gulf of Maine. The operation will deploy sensors aboard a SeaTrac SP-48 uncrewed surface vehicle (USV) at the coordinates 44.3524° N, -67.3833° W. The project is scheduled to run continuously, 24 hours a day, seven days a week, from August 3rd to October 20th. The USV will operate in the designated area, and vessels are requested to provide two hours' notice for passing arrangements to avoid navigation interference.	Lat: 44° 21' 09" Lon: -067° 22' 60"
NAVAREA IV/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-08-18 To: 2026-11-16 Location: 40-40-05.376N/074-00-02.916W Cashman Dredging and Marine Contracting Co., will be conducting work associated with the EPA Superfund Gowanus Canal Environmental Remediation Project in Brooklyn, New York. The operation involves transferring sediment and debris from smaller hopper barges to larger hopper barges for delivery to the Clean Earth Claremont Processing Facility in Jersey City, New Jersey, or directly loading material into trucks for over-the-road transport to an offsite disposal facility. The work is planned for the Gowanus Canal approximately 100 feet south of the 659 Smith Street property, across the channel from the New York City Department of Sanitation facility. Operations are scheduled to begin August 31, 2026, and continue through November 15, 2027, with work hours from 0700 to 1800, Monday through Friday. Equipment expected on scene includes one 40-by-140-foot excavator deck barge, one 37-by-150-foot material barge, one 30-by-60-foot hopper barge, and one 600-horsepower tugboat. Vessels may be contacted on VHF channels 13 and 16. The applicant states that passing arrangements can be made within approximately 30 minutes and that the barges will have a full-time tender available to move them on demand to avoid impeding navigation. The form identifies NOAA Chart US5NYCDG/12334 for the area and includes a site layout showing the temporary dock, containment boom, hopper barges, transloader, spill tarp, gangway, and water treatment system	Lat: 40° 40' 05" Lon: -074° 00' 03"
NAVAREA IV/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-09-02 To: 2026-09-26 Aqua Survey, Inc. submitted a Local Notice to Mariners information form for planned sediment sampling operations in the Gowanus Canal, Brooklyn, NY, between the 4th and 11th Street Turning Basins. Work is scheduled for September 2 through September 25, 2026, Monday through Friday, from 0800 to 1600. The vessels expected on scene are R/V Schuykill, R/V Packanack, and R/V Jon II. Vessels may be contacted on VHF Channels 13 and 16. The project team indicated that vessels can move on demand and will not impede navigation. The listed point of contact is Lisa Pipolo of Aqua Survey, Inc., reachable at 908-788-8700 or pipolo@aquasurvey.com. Location: 40-40-14.052N/073-59-56.544W	Lat: 40° 40' 14" Lon: -073° 59' 57"
NAVAREA IV/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-08-01 To: 2026-10-01 Curtin Maritime Corporation will begin maintenance dredging operations in the New York and New Jersey Channels—specifically the Seguire, Ward, and Outerbridge reaches—on or about August 1, 2026, with completion expected by October 1, 2026. The project, conducted under USACE contract W912DS25CA011, involves 24/7 dredging within existing federal navigation channels to maintain safe passage for maritime traffic. Dredged material will be transported offshore and placed as remediation material at the Historic Area Remediation Site (HARS) in the Atlantic Ocean. The operation will utilize one mechanical dredge (DB Avalon) and three split hull scows, supported by four towing vessels. All manned equipment will monitor VHF-FM Channels 13 and 16 for maritime safety. Mariners are advised to proceed with caution and coordinate passing arrangements. The project site plan, coordinates, and operational notes are provided, with specific restrictions on dredging activities in certain shoaled areas from October 1 to November 30. The survey and mapping data meet US Army Corps of Engineers standards and are referenced to the US State Plane Coordinate System (NAD 1983). For further information, Project Manager Robert Collaro is the point of contact.

The vehicle will be deployed daily from August 31, 2026, through September 14, 2026. The UAV will be deployed, recovered daily, and monitored via the on-scene support vessels M/V Encourager, and Quincy Harbor Master. Mariners may contact the on-scene support vessels via VHF-FM CH 13/16. For more information, mariners may contact Mr. Steve Torpey at (949) 486-1263 or Ms. Kami Bucholz at (949) 392-9216. Mariners are advised to use caution when transiting the area.	
NAVAREA IV/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-09-20 To: 2026-11-01 Mariners are advised that the National Oceanic and Atmospheric Administration will conduct hydrographic survey operations offshore of the New York Traffic Separation Scheme from September 20, 2026, through October 31, 2026. Operations are scheduled to occur 24 hours per day within an area bounded by approximate positions 39.9584°N, 073.5035°W; 40.2864°N, 073.6958°W; 40.5565°N, 073.4719°W; and 40.4162°N, 072.9241°W. Applicable chart numbers include US3NY1AE and US3NY1AF. Survey operations will involve the use of a Moving Vessel Profiler, an underwater towfish deployed approximately 30 to 50 meters astern of the survey vessel. Mariners transiting the area are requested to exercise caution, maintain a safe passing distance, and avoid impeding survey operations. Vessels involved in the operation may be contacted on VHF-FM channels 16 and 13. For additional information, contact LT Abby Letts, National Oceanic and Atmospheric Administration, at 626-660-8744 or ops.ferdinand.hassler@noaa.gov.	
NAVAREA IV/General/Miscellaneous	Miscellaneous	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-08-24 To: 2026-10-01 Location: 41-49-59.988N/070-15-00.000W Sedna Robotics plans to conduct small autonomous surface vessel testing and water-quality profiling in Cape Cod Bay, Massachusetts, from August 24 through September 30, 2026. The work will support the Massachusetts Lobstermen’s Association and will involve dissolved oxygen, temperature, and salinity data collection near the approximate center point of 41°50'00"N, 70°15'00"W, on Chart 13246. Operations are scheduled to occur 24 hours a day, seven days a week. The vessel, named "Warden," is a 7-foot autonomous surface vessel with a yellow hull and "Uncrewed / Research Vessel" markings. It will transmit as "Uncrewed" on AIS and will display a flashing amber beacon at night. The vessel may remain stationary for sampling or move at approximately 2 knots between sampling locations during the day. It is not fishing gear and is not intended to interfere with traps, buoys, or lines. Mariners are advised not to approach closely, as the vessel may begin moving without warning. Sedna Robotics can be contacted at any time at 617-506-9177, which is also written on the vessel. If needed to avoid impeding navigation, the vessel can be repositioned within 30 minutes of a phone call to Sedna operations.

Main Channel - New Jersey Pierhead/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2025-02-13 To: 2027-02-28 Claremont Terminal Channel Shoaling – The Harbor Safety, Operations and Navigation Committee of the Port of NY and NJ – Deep Draft Working Group: The need to immediately restrict the deep draft of vessels transiting Claremont Terminal Channel has come to our attention. Based on the latest available surveys conducted by the Army Corps of Engineers, November 4, 2024, shoaling has occurred in the channel. The shoaling has minimized the available depth of water to 15 feet near the centerline of the channel. Based on this data, vessels will be restricted to a draft of 13 feet, plus the rise in tide, with a maximum draft of 18 feet. On 11/04/2024, the shoal area was bound by the following approximate coordinates: 40° 41'11"N, 074° 04' 41"W; thence to 40° 41' 17"N, 074° 04' 33"W; thence to 40° 40' 14"N, 074° 03' 06"W; thence to 40° 40' 10"N, 074° 03' 13"W.

The work is expected to commence and be completed in October 2026, within the regulatory dredging window of October 1 through December 31. Operations will involve mechanical maintenance dredging of approximately 65,600 cubic yards of material over an area of approximately 21 acres. Dredging will be conducted to a depth of minus 15.5 feet mean low water, with 1 foot of allowable overdepth, in the Barge Basin, and to a depth of minus 17 feet mean low water, with 1 foot of allowable overdepth, in the Access Channel. Dredged material will be disposed of at the Central Long Island Sound Disposal Site. The approximate central coordinates of the work are 41.264630°N, 72.765910°W. The activity is not located in the vicinity of a federal navigation channel, and no temporary buoys, lights, ranges, or markers are proposed to be established, moved, or discontinued in association with the project. Mariners transiting the area are requested to exercise caution and avoid interfering with dredging operations. For questions or additional information, contact William Heiple at wheiple@tritonenvironmental.com or 203-631-7563.	Lat: 41° 15' 53" Lon: -072° 45' 57"

Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Shoaling exists in Plum Island Sound between Plum Island Sound Entrance buoy 4 (LLNR 9310) and Plum Island Sound Entrance buoy 6 (LLNR 9320), aids are not properly marking best water. Mariners are advised to use caution while navigating this area. All of Plum Island is particularly susceptible to shoaling, the area between 4 and 6 being the worst at the mouth of the channel. Last year the unit partnered with the harbor Master moving the aids to mark the best water. Even though the aids are in the best possible locations that water is still shallow at low tide and mariners should use caution while navigating in this area	
Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Newburyport Harbor and Plum Island Sound – Plum Island Sound Entrance has experienced an increase in shoaling between Plum Island Sound Entrance Buoy 6 and 8. The shoaling was observed in approx. position 42-41.365N /070-45.169W and extends 100 yards west following the channel. Mariners are advised that at MLLW depths of 3’ could be seen. Mariners without local knowledge are advised to transit with extreme caution and monitor tidal stations prior to transiting.

Swash Channel - Raritan Bay/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-08-01 To: 2026-10-01 Curtin Maritime, represented by Project Manager Robert Collaro, will conduct mechanical clamshell dredging in the New York and New Jersey Channels—specifically the Seguine, Ward, and Outerbridge reaches—from August 1, 2026, to October 1, 2026. Operations will run continuously, 24 hours per day, seven days a week. The equipment on scene will include the DB Avalon dredge, three scows (Crown Point, Rincon Point, and Stony Point), three towing tugs, and one assist tug. All vessels will monitor VHF-FM Channels 13 and 16 for communications. Mariners are advised that passing arrangements require a “Slow Bell” request and one hour’s notice to move vessels out of the channel to avoid impeding navigation. For further information, Robert Collaro can be contacted at 772-643-0784 or rcollaro@curtinmaritime.com. The Local Notice to Mariners should be submitted to the U.S. Coast Guard First District two weeks prior to the start of operations, and publication does not constitute project approval. Coordination with the appropriate Coast Guard Sector is required before publication.	
Swash Channel - Raritan Bay/General/Marine Events/Regatta (Race)	Marine Events	General/Marine Events/Regatta (Race) From: 2026-05-06 To: 2026-11-02 NY/NJ– LOWER NY BAY – RARITAN BAY – Sailing Regatta Mariners are advised that regattas are scheduled to be held on Raritan Bay. Races will take place every Wednesday, Friday, most Saturdays, some Sundays and Holidays from May 5, 2026 through January 7, 2027 at various times stipulated in the table below. Approximately 30 sailboats 12-45 feet in length will participate in short-distance courses. Interested mariners may contact the Principal Race Officer on marine band radio channel 9 or 71 VHF-FM or via telephone at 203-509-1469.	
Swash Channel - Raritan Bay/General/Marine Events/Regatta (Race)	Marine Events	General/Marine Events/Regatta (Race) 1. NARRATIVE: THE RARITAN YACHT CLUB WILL HOLD REGATTAS IN THE RARITAN BAY FROM MAY 6, 2026 AND CONTINUING UNTIL JANUARY 7, 2026. THESE REGATTAS WILL INCLUDE APPROXIMATELY 30 SAILBOATS 15-45 FEET IN LENGTH. 2. NEW JERSEY - RARITAN BAY - A REGATTA WILL TAKE PLACE EVERY WEDNESDAY, FRIDAY, MOST SATURDAYS, SOME SUNDAYS AND HOLIDAYS FROM JUNE 10, 2026 THROUGH DECEMBER 26, 2026 APPROXIMATELY 30 SAILING VESSELS 15-45 FEET IN LENGTH WILL PARTICIPATE IN RACES THROUGHOUT THE RARITAN BAY. VARIOUS MOTORIZED VESSELS WILL BE ASSISTING WITH THE EVENT. INTERESTED MARINERS MAY CONTACT THE PRINCIPAL RACE OFFICER ON CHANNEL 9 OR 71 VHF-FM OR VIA TELEPHONE AT 203-509-1469. 3. TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Raritan River Cutoff Channel - Raritan River/General/Bridges/Public Notice	Bridges	The TIR published in the Federal Register at https://www.govinfo.gov/content/pkg/FR-2026-05-05/pdf/2026-08733.pdf . Comments and related material must be received by the Coast Guard on or before August 3, 2026. This establishes a RNA from 12:01 a.m. on April 15, 2026, until 11:59 p.m. on June 30, 2030. ADDRESSES: You may submit comments at https://www.regulations.gov . See the “Public Participation and Request for Comments” portion of the SUPPLEMENTARY INFORMATION section for further instructions on submitting comments. To view available documents go to https://www.regulations.gov and search for USCG–2026–0149. --165.T01-0149 Regulated Navigation Area (RNA): (a)Location. See MSI LNM Layer. (c) In addition to the general RNA regs in § 165.13, the following regs apply to the RNA. (1) Nothing in this regulation relieves any vessel, owner, operator, charterer, master, or person directing the movement of a vessel, from the consequences of any neglect to comply with this part or any other applicable law or regulation (i.e. the International Regulations for Prevention of Collisions at Sea, 1972 (72 COLREGS) or 33 CFR part 84-Subchapter E, Inland Navigation Rules) or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case. (2) Entry and movement within the RNA is subject to a “Slow-No Wake” speed limit. All vessels may not produce a wake and may not attain speeds greater than five (5) knots unless a higher minimum speed is necessary to maintain bare steerageway. (3) No vessel is permitted to transit through the south span navigational channel of the bridge(s) at any given time. (4) Any vessel transiting through the RNA must make a direct passage. No vessel may stop, fish, moor, anchor, or loiter within the RNA at any time. (5) Vessels may not pass (overtake) another vessel within the RNA. (6) Only one vessel is permitted to pass through the north span navigational channel of the bridge(s) at any given time. (7) Except when transiting through the north span navigation channel, no vessel or craft may operate within 20 feet of the bridge(s). (8) The operator of any vessel transiting in the RNA must comply with all lawful directions given to them by the COTP or the COTP’s on-scene representative. (9) When a full enforcement period of the regulated area is activated, only vessel authorized by COTP may enter or remain within the RNA. (d) Enforcement. The following enforcement periods and requirements apply to this RNA. (1) This section enforced from 12:01 a.m. on 15Apr2026, to 11:59 p.m. on 30Jun2030. (2) The “Slow-No Wake” speed limit, south channel closure, and other restrictions-except for the limited full enforcement period prohibiting vessels from entering the regulated area-will be enforced throughout the entire enforcement period. (3) Full enforcement periods of the regulated area, prohibiting all vessel entry, will be enforced only during hazardous construction operations involving multiple tugs and large barges maneuvering in and obstructing the navigable channel for heavy lift, construction, or demolition activities. The USCG will issue information on full enforcement periods through LNM’s, the CG Navigation Center at https://www.navcen.uscg.gov/msi , and BNM’s via VHF CH 16 as soon as practicable. (4) Persons or vessels seeking to deviate from the restrictions described in section (c) of this section or to enter the regulated area during a full enforcement period must request authorization from the COTP or COTP’s on-scene designated representative on VHF-16 or via (718) 354-4353. Enforcement periods prohibiting vessels from entering the RNA planned during the following approx. dates (subject to change): Jul-Aug2026, two separate 1-day full-chnl closures Jul2027-Jun2028, three, 7-day full chnl closures Jan-Sep2028, one 30-day full chnl closure Jul-Sep2029, one 14-day full chnl closure Dates/times provided when available.

Sector New York, Submerged Lands Act (SLA)/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2026-09-09 To: 2026-09-18 INSPIRE Environmental will be conducting bottom trawl fisheries survey operations conducted by in support of the Empire Wind project off New York. The work is scheduled in two September 2026 survey legs: September 9 to 11, 2026, and September 15 to 17, 2026. Each leg is expected to last approximately three days, with operations conducted up to 12 hours per day. Exact dates may change, and an update is expected if either survey leg shifts. Survey activities will occur within Lease Area OCS-A 0512, generally between approximately 40° 20' 50.7834" N, 73° 32' 0.3618" W and 40° 19' 38.7798" N, 73° 20' 1.053" W, as well as at an adjacent reference area located near 40° 33' 32.4282" N, 72° 51' 45.2736" W. The survey vessel will tow bottom trawl gear at four stations within the lease area and conduct four additional tows at the reference site. Each tow is expected to last approximately 20 minutes. The vessel identified for the work is F/V Susan L, using bottom trawl net equipment. The vessel can be contacted on VHF channels 16 and 13. During trawling operations, the vessel will be moving at approximately 4 knots or less and will have reduced maneuverability. Mariners operating in the area should use caution, maintain awareness, and make passing arrangements as needed to avoid impeding the survey vessel. Project contact information is provided for Brian Gervelis of INSPIRE Environmental/Venterra Group.	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-12-10 To: 2030-09-30 North American Aggregates, LLC, will be conducting maintenance dredging for the purpose of sand mining At the eastern end of Ambrose Federal Navigation Channel, bounded by the following positions: Southeast Corner: 40o28'38.09N, 073o53'40.95W; Northeast Corner: 40o28.56.01N, 073o53'29.99W; Northwest Corner: 40o30'03.63N, 073o56'23.56W; Southwest Corner: 40o29'53.98N, 073o56'55.75W. Work Start & Stop dates and Hours of Operation: 24/7 365-days per year (weather dependent) Equipment of scene: Dredge Eleanor & Associated Notched Tug the vessel is able to move on demand for traffic And will be monitoring VHF Radio Channel Monitored: 13, 14, 65. Disposal Site/Alternative Use Determination North American Aggregates, LLC, 1250 State Street, Perth Amboy, New Jersey 08861.

The project, led by Jenna Hare from the University of New Hampshire, involves the deployment of a small instrumented lander measuring 3 meters on each side and 3 meters tall. The lander will be placed on the seafloor offshore from Rye Harbor State Park, New Hampshire, at coordinates 42° 59' 44.64" N, 070° 43' 44.34" W, in approximately 18 meters of water depth. The operation will run continuously, 24 hours a day, seven days a week, from June 24, 2026, through October 18, 2026. No radio frequency or passing arrangements are required, as the equipment is stationary and does not impede navigation. Mariners are advised to be aware of the presence of this research equipment in the area during the specified period.	Lat: 42° 59' 45" Lon: -070° 43' 44"

There may also be safety and scout vessels from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel and their equipment as they are extremely limited in their ability to maneuver. Passing arrangements can be made via VHF with any construction vessels. To view mariner notices and project mapping, please visit: https://www.vineyardwind.com/offshore-wind-mariner-updates .

Work will occur in the Thames River adjacent to Naval Submarine Base New London/Pier 31in position 41°24'01.720"N, 72°05'47.050"W and is expected to continue through January 31, 2027, operating 24 hours per day, seven days per week. The project is authorized under U.S. Army Corps of Engineers Permit No. NAE-2023-00668. Equipment may include the dredge Icarus, split-hull dump scows Joe V and Eddie C, a survey boat, tugboats, and other support equipment. Project vessels will monitor VHF Channels 16 and 13, with a working channel to be determined. Mariners transiting the area should proceed with caution, maintain a safe distance from dredging equipment, and coordinate passing arrangements by VHF radio. Dredged material will be transported to the U.S. Navy Confined Aquatic Disposal Cell Center. Mariners requiring passage through the work area are encouraged to provide advance notice when practicable, as clearing the navigation area may take approximately 30 minutes depending on conditions. Buzzards Bay Main Channel - Weweantic River/General/Bridges/Construction	Bridges	Massachusetts Department of Transportation (MassDOT) will conduct bridge demolition and replacement operations on the Route 6 Bridges over the Weweantic River in Marion and Wareham, MA. Beginning May 1, 2026 through September 10, 2028, multiple work boats, barges, cranes, and support equipment will be operating in the vicinity of the bridges. Construction activities may occur within multiple spans and channels; however, a navigable channel will remain open at all times. Construction equipment, including barges, cofferdams, and work platforms, will be present within and adjacent to the navigable channel. Short-term channel restrictions may occur during active construction operations, including pile driving, sheeting, and erection activities, and will be limited to periods when such operations are in progress. Mariners are advised to exercise caution and reduce wake when transiting the area. Mariners with questions or concerns may contact the contractor via VHF-FM Channels 13/16 or call Don Smith (413) 262-3687 or Jay Krutiak (413) 770-1723.	Lat: 41° 44' 17" Lon: -070° 44' 48"
Buzzards Bay Main Channel - Weweantic River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-06-17 To: 2026-10-01 Location: 41-44-57.768N/070-42-18.216W AGM Marine Contractors, will be conducting dredging operations in the Wareham River, Wareham, Massachusetts, in position 41-44-57.75N, 070-42-18.21W. The project is scheduled to run from July 1, 2026, through September 31, 2026, and will operate continuously, seven days a week, 24 hours per day. The equipment involved includes the Dredge Triton, crane, scow, and tugs. To ensure safe navigation, vessels in the area can contact the operation on radio frequency 66 and are advised to provide a 15-minute notice for passing arrangements, with the dredging vessel remaining out of the channel when necessary.
