LOCAL NOTICE TO MARINERS

District: 1

Week: 38/23

COASTAL WATERS FROM EASTPORT, MAINE TO SHREWSBURY, NEW JERSEY

* Unless otherwise indicated, missing and destroyed structures are presumed to be in the immediate vicinity of assigned position. Mariners should proceed with caution.

* The Local Notice to Mariners is a weekly edition.

* Inquiries, published articles or Information: mail to: D01-SMB-LNM@uscg.mil.

* The U.S. Coast Pilot supplements the navigational information shown on nautical charts.

* The Coast Pilot, along with its corrections, are available online at <https://nauticalcharts.noaa.gov/publications/coast-pilot/index.html>.

* The Local Notice to Mariners is available online at <https://navcen.uscg.gov/local-notice-to-mariners-by-cg-district>

* Updated Light List is available online: <https://navcen.uscg.gov/light-lists>.

* Weekly updates to all Light Lists: <https://navcen.uscg.gov/weekly-light-lists>

* Information on Private Aids to Navigation is available at: <http://www.usharbormaster.com/>

* Reports of Channel conditions can be found at the Army Corps of Engineers website at:
<http://www.nan.usace.army.mil/Missions/Navigation/ControllingDepthReports.aspx>.

* NOAA Chart Corrections and Chart Viewer: <https://www.nauticalcharts.noaa.gov>

* NOAA Tides and Currents can be found at: <http://www.tidesandcurrents.noaa.gov/>.

* Weather: <https://www.weather.gov/>

* The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). NANU notices can be obtained via email subscription through the USCG Navigation Center website: <https://navcen.uscg.gov/nanu-information>. In addition, the NIS investigates all reports of degradation or loss of GPS, DGPS or AIS service. Users are encouraged to report all degradation or loss of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900, mail to: tis-sg-nisws@uscg.mil, or on the internet at: <https://navcen.uscg.gov/>.

PLEASE IMMEDIATELY REPORT DISCREPANCIES IN AIDS TO NAVIGATION TO THE NEAREST COAST GUARD UNIT

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NATIONAL NAVIGATION SAFETY ADVISORY COMMITTEE; VACANCIES

The U.S. Coast Guard seeks applications to fill two member vacancies on the National Navigation Safety Advisory Committee (Committee). This Committee advises the Secretary of Homeland Security and the Coast Guard on matters relating to maritime collisions, allisions, and groundings; Inland Rules of the Road; International Rules of the Road; navigation regulations and equipment, routing measures, marine information, and aids to navigation systems. DATES: Completed applications should reach the U.S. Coast Guard on or before October 6, 2023. ADDRESSES: Applications must include: (a) a cover letter expressing interest in an appointment to the National Navigation Safety Advisory Committee, (b) a resume detailing the applicant's relevant experience for the position applied for, and (c) a brief biography. Applications should be submitted via email with subject line "NNAVSAC Committee Application" to George.H.Detweiler@uscg.mil. FOR FURTHER INFORMATION CONTACT: Mr. George Detweiler, Alternate Designated Federal Officer of the National Navigation Safety Advisory Committee; telephone 202-372-1566 or email at George.H.Detweiler@uscg.mil. Additional information is available in the Federal Register Notice here (<https://www.govinfo.gov/content/pkg/FR-2023-08-07/pdf/2023-16749.pdf>).

CAUTION TO BE USED IN RELIANCE UPON AIDS TO NAVIGATION

The aids to navigation depicted on charts comprise a system of fixed and floating aids with varying degrees of reliability. Therefore, prudent mariners will not rely solely on any single aid to navigation, particularly a floating aid. With respect to buoys, the buoy symbol is used to indicate the approximate position of the buoy body and the sinker, which secures the buoy to the seabed. The approximate position is used because of practical limitations in positioning and maintaining buoys and their sinkers in precise geographical locations. These limitations include, but are not limited to, inherent imprecision's in position fixing methods, prevailing atmospheric and sea conditions, the slope of and the material making up the seabed, the fact that buoys are moored to sinkers by varying lengths of chain, and the fact that buoy body and/or sinker positions are not under continuous surveillance but are normally checked only during periodic maintenance visits which often occur more than a year apart. The position of the buoy body can be expected to shift inside and outside the charting symbol due to the forces of nature. The mariner is also cautioned that buoys are liable to be carried away, shifted, capsized, sunk, etc. Lighted buoys may be extinguished or sound signals may not function as the result of ice, running ice or other natural causes, collisions, or other accidents. For the foregoing reasons, a prudent mariner must not rely completely upon the position or operation of floating aids to navigation, but will also utilize bearings from fixed objects and aids to navigation on shore. Further, a vessel attempting to pass close aboard always risks collision with a yawing buoy or with the obstruction the buoy marks.

INTERFERENCE WITH AIDS TO NAVIGATION

14 USC 543. It shall be unlawful for any person, or public body, or instrumentality, excluding the armed forces, to remove, change the location of, obstruct, willfully damage, make fast to, or interfere with any aid to navigation established, installed, operated, or maintained by the Coast Guard pursuant to section 541 of this title, or with any aid to navigation lawfully maintained under authority granted by the Coast Guard pursuant to section 542 of this title, or to anchor any vessel in any of the navigable waters of the United States so as to obstruct or interfere with range lights maintained therein. Whoever violates the provisions of this section shall be guilty of a misdemeanor and shall be fined not more than \$1,500 for each offense. Each day during which such violation shall continue shall be considered as a new offense.

U.S. COAST GUARD AUXILIARY – PUBLIC EDUCATION CLASSES – FIND BY ZIPCODE

The National Public Education Calendar Database provides a single, unified national database that holds and displays all public education courses taught by our various flotillas nationwide. In addition, a Zip Code search permits members of the general public to enter a Zip Code of interest, and find all public education courses being taught within a selected distance from that Zip Code.

****** CANCELLATION OF NOAA PAPER AND RASTER NAUTICAL CHARTS******

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction." A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: <https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LNM: 11/21

SAFETY NOTICE - NAVIGATIONAL RANGE AND SECTOR LIGHTS ON ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that the Range and Sector Light Characteristic labels are not displayed on Electronic Navigational Charts (ENCs) when used in an Electronic Chart Display and Information System (ECDIS) due to limitations of the S-52 ECDIS display specification. Mariners may query the ENC data directly within ECDIS or refer to the Light List for complete information on Range and Sector Light Characteristics.

NOTICE TO ALL PRIVATE BOATS AT SEA

United States laws and regulations require that ALL private boats arriving from a foreign port or place MUST report to the Bureau of Customs and Border Protection IMMEDIATELY upon their arrival into the United States. Every person entering the United States must be seen in person for immigration purposes by a Customs and Border Protection officer, except those participating in the I-68 -Canadian Border Boat Landing Program. However, holders of form I-68 are still required to report their arrival into the United States to the Bureau of Customs and Border Protection. Masters and passengers must provide proof of citizenship or legal immigration status, and be in possession of a valid passport and visa, if required. Citizens of countries that are participants in the Visa Waiver Program are not eligible to seek admission to the United States under that program via private vessel. Once your boat is anchored or tied, you are considered to have entered the United States. No one may leave the vessel until Customs and Border Protection grants permission. The only exception to this requirement is to report arrival. In order to fulfill the requirement to immediately report a private boat arrival, the master of the vessel must contact the nearest Customs and Border Protection

Office, or if the arrival occurs after business hours, the nearest 24 hour port of entry. Upon reporting, you may be required to proceed to a staffed port for inspection by Customs and Border Protection. Failure to comply with these requirements could result in serious criminal and civil penalties, including seizure of the boat. International mariners are urged to report any suspicious or illegal activity to the Bureau of Customs and Border Protection at 1-800-BE-ALERT.

US NOTICE TO MARINERS (NTM)

The US Notice to Mariners provides timely marine safety information for the correction of all US Government navigation charts and publications from a wide variety of sources both foreign and domestic. To ensure the safety of life at sea, the information published in the Notice to Mariners is designed to provide for the correction of unclassified nautical charts, the Unclassified NGA/DLIS Catalog of Hydrographic Products, United States Coast Pilots, NGA List of Lights, USCG Light Lists, and other related nautical publications produced by NGA, NOS and the U.S. Coast Guard. The US Notice to Mariners will contain only those chart corrections of interest to ocean going vessels. It is available online at http://msi.nga.mil/NGAPortal/MSI.portal?_nfpb=true&_pageLabel=msi_portal_page_61. NTM 01 – Special Paragraphs includes information on: America's Waterway Watch program asking those who work, live, or recreate on or near the water to be aware of suspicious activity, The Prudent Mariner and the use of floating Aids to Navigation, and Northern Right Whales.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

(Temp) ADD	NATIONAL DOCK CHANNEL BUOY 3				CGD01	074-02-48.001W
	Green can					
Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

MAINE GENERAL NOTICES

Information for Mariners using the Waterways of the State of Maine.

COBSCOOK BAY

Ocean Renewable Power Company (ORPC) will be removing its tidal energy test device and associated barge at the end of September 2023. Following device removal, ORPC will conduct lease area maintenance activities including replacement of all four-lease area corner marker buoys. Maintenance activities will occur periodically from September 20, 2023, to December 21, 2023, in position 44-54-35.884N and 067-02-39.951W, between 6:00am to 6:00pm. Equipment on scene will be a surface barge, underwater device and work boats, monitoring VHF-FM CH 10, for and concerned traffic. Mariners are advised to use caution and transit at slow speed to minimize wake when transiting the area.

LNM: 38/23

ME-WESTERN GULF OF MAINE-PORTLAND-CASCO BAY

SAILDRONE, INC. in collaboration with NOAA, is conducting aquaculture survey/research with two, Uncrewed Surface Vehicles (USVs), called "SAILDRONE VOYAGERS" in the Eastern third of US waters within the Gulf of Maine, from August 24, 2023, to November 17, 2023. The two vehicles will be towed from Portland, Maine and deployed in the vicinity of Pine Tree Ledge prior to beginning their transit to the survey area. SAILDRONE VOYAGERS are 33 ft in length, 21 ft tall, orange in color, have a tri-color light on top of the wing, transmitting AIS message "SD 2022 Unspecified MMSI: 338434815 and SD 2023 Unspecified MMSI: 338434837" and are marked "SAILDRONE". SAILDRONE VOYAGERS are primarily wind propelled USVs, equipped with an electric thruster used for survey operations, operating at 2 to 4 knots. The vehicles will have limited maneuverability during operations. Mariners are requested to remain greater than 500 meters away from the research equipment. Questions regarding this notice can be directed to SAILDRONE Mission Control at missioncontrol@saildrone.com or via phone at (510) 722-6070.

SUMMARY OF SHOALING REPORTED

New, updated or very important information in this enclosure will be highlighted in yellow.

MAINE SHOALING

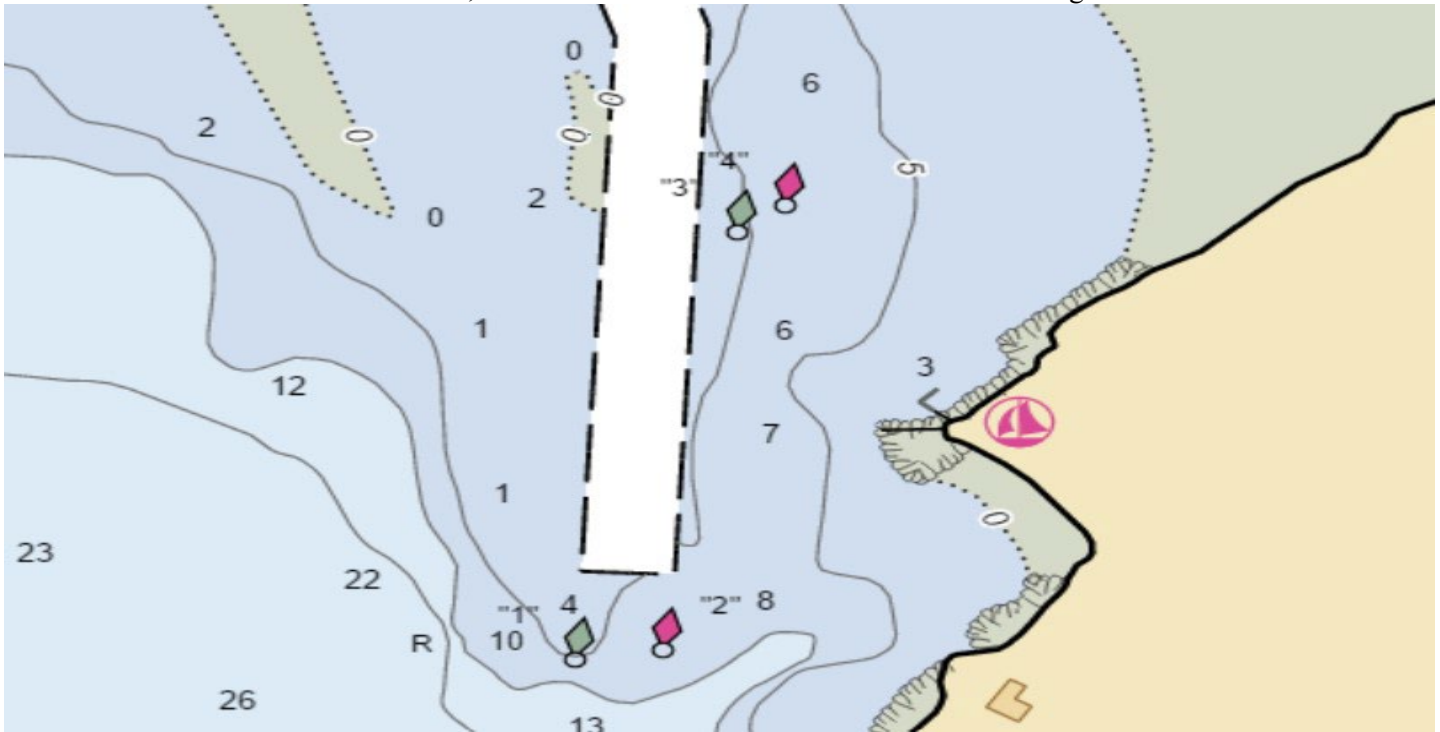

ME-CASCO BAY -PORTLAND-SOUTH PORTLAND-Update 6/23/23

Shoaling has been reported in the inner harbor of Casco Bay's federal channel. Shoaling could impede the approach to the Gulf Oil Terminal in South Portland, and significantly reduces the available channel where large passenger ships regularly maneuver on and off berths in Portland. Deep draft vessels are advised to use caution when transiting the area.

ME-SACO BAY AND VICINITY (Chart 13287) –RICHMOND ISLAND HARBOR–PROUTS NECK-SCARBOROUGH RIVER-Updated 2/8/22

Dredging is completed at the entrance to the Scarborough River. Aids to navigating have been repositioned to mark best water. As the channel continues to shift, mariners are advised to use caution when transiting the area.

MA–CAPE COD CANAL–CAPE COD CANAL DEEP DRAFT UPDATE

The maximum deep draft for transiting the Cape Cod Canal has been restored to 32 feet, effective September 21, 2022. Due to sand shoaling in two locations, vessels drawing greater than 25 feet should consult well in advance with the Marine Traffic Controller on duty at 978-318-8500. One sand shoal at 30 feet MLLW is located at station 05, east entrance of the Canal in the vicinity of GC “7” and one at 29 feet MLLW is located at station 155, ¼ mile west of the Sagamore Bridge. Mariners are advised to continue to monitor the Local Notice to Mariners for updates.

MA-WESTPORT CHANNEL

Westport Channel has experienced increase shoaling, with considerable narrowing of the channel. Aids to navigation have been relocated outside the federal channel, to mark best water. Mariners are advised that shoaling has been identified and extends the entire width of the channel, affecting both commercial and recreational vessels. Mariners should proceed with caution while transiting the area.

Chart 13228 LNM 30/22

MA-ESSEX BAY

Essex Bay entrance has experienced increased shoaling from Essex Bay Buoy 3 in approximate position 42-40.4N 070-42.7W to Essex Bay Buoy 3A in approximate position 42-40.3N 070-43.3W. Mariners are advised that shoaling has been identified and extends the entire width of the channel to a least depth of 2 feet mean low water (MLW). Mariners without local knowledge are advised to transit with extreme caution and only during plus tides.

Essex Bay Channel Buoy 16 has been reported having increased shoaling. Mariners are urged to use caution while transiting the area.

MA-NEWBURYPORT HARBOR AND PLUM ISLAND SOUND-SHOALING

Shoaling exists in Plum Island Sound between Plum Island Sound Entrance buoy 4 (LLNR 9310) and Plum Island Sound Entrance buoy 6 (LLNR 9320), aids are not properly marking best water. Mariners are advised to use caution while navigating this area. All of Plum Island is particularly susceptible to shoaling, the area between 4 and 6 being the worst at the mouth of the channel. Last year the unit partnered with the harbor Master moving the aids to mark the best water. Even though the aids are in the best possible locations that water is still shallow at low tide and mariners should use caution while navigating in this area.

Newburyport Harbor and Plum Island Sound – Plum Island Sound Entrance has experienced an increase in shoaling between Plum Island Sound Entrance Buoy 6 and 8. The shoaling was observed in approx. position 42-41.365N /070-45.169W and extends 100 yards west following the channel. Mariners are advised that at MLLW depths of 3' could be seen. Mariners without local knowledge are advised to transit with extreme caution and monitor tidal stations prior to transiting.

NY-STATEN ISLAND-RARITAN BAY

Weeks Marine will be constructing 8 rubble mound breakwaters, north of Ward Point, East Reach approximately halfway between the shipping channel and the shoreline, in position 40-29-37.9841N 074-14-48.6976W and 40-29-54.3500N, 074-13-56.6352W. Equipment and construction activities are anticipated onsite until **June 2024**, Mon-Friday 5:00am to 5:00 pm. Equipment on scene will be W537 (250'x64'x16'), W70 (150'x80'x13'), W201-205 (130'x40'x11') W291/W293 (180'x54'x14'), W297 (250'x75'x16'), W263 (160'x 54'x12'), LISA D. Crew boat (47'x13'x4'), JESSE O. Workboat (25'x11'x6'). The barges will remain on scene overnight and on weekends and will be properly marked and lit. W537 and W263 may be on anchors or spuds, W70 will be on spuds and all other barges will be moored alongside. Mariners operating or transiting in the area, are requested to give a 0.5 nautical mile closest point of approach and are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made with the dredge. All vessels will be monitoring VHF CH 16 and 82.

Mariners are advised to use caution and transit at slow speed to minimize wake when transiting the area.

NJ-SHREWSBURY RIVER-SEA BRIGHT

Dredgit Corporation will be conducting maintenance dredging utilizing a 16" suction-cutter dredge. Dredging and associated pipeline will be in the vicinity of Barely Point Reach (coordinates below). Dredge sediments will be carried via an 18" floating pipeline approximately 30,000 LF to the Sea Bright Beach area, where the dredged material will be used as beach fill material, from **October 1, 2023, to November 5, 2023**, 24 hours a day, seven days a week.

Point 1: 40°23'17.20N, 073°58'39.26W; Point 2: 40°22'54.96N, 073°58'46.35W, Point 3: 40°23'12.51N, 074°0'53.78W, Point 4: 40°22'44.46N, 074°0'36.87W. Equipment on scene will be, 16" Ellicott Dredge with Idler Barge & Swing Anchors, 16" Ellicott Booster Pump with flex hoses, 18" Dredge Pipeline, Flanges, Bolts & Gaskets – Approximately 30,000 feet tug boat, and a work boat, monitoring VHF FM CH 7 and 8, for any concerned traffic. Vessels need to exercise extreme caution when navigating near and around the dredge. All Mariners should consider the dredge area a NO WAKE ZONE. Mariners are urged to use extreme caution and transit the dredge area at their slowest safe speed to create minimum wake. Mariners are encouraged to utilize the vessels navigational aids, navigational lights and day shapes to determine safest passage. The dredge pipeline will be clearly marked with floats and amber blinking lights. The dredge will minimize interference with the use of the channel. Dredgit will shift or move the dredge and interrupt dredging operations to accommodate the movement of vessels and floating equipment, if necessary.

NJ-RARITAN BAY

Rioux Engineering LLC., will be conducting maintenance dredging for the New Jersey Department of Transportation, in Waackaack Creek Channel & Thorns Creek Channel, Keansburg, New Jersey, in position 40-25-55.87N and 074-08-49.97W, from **July 19, 2023, to November 25, 2023**, between 6:00am to 6:00pm. Equipment on scene will be a Dredge #1 (20' wide x 73' cutter suction dredge), Dredge #1 will work outside of the flood gate approximately until **September 1, 2023** and then demobilize, on or about **September 6, 2023** Dredge # 3 will be brought to the site, to work inside of the flood gate within Waackaack Creek and Thorns Creek, Dredge #3 (20' wide x 70' long cutter suction dredge), tugboat "Richie", 1 small work skiff and a 30'x60' barge with an excavator. All equipment will be monitoring VHF-FM CH 13 and 16 for any concerned traffic. Typically, movement of the dredge to allow for passage will require a minimum of 45 minutes. Outside of the flood gate, vessels will typically be required to pass along the west side (Starboard side) of the Dredge #1. A discharge pipeline will extend from the dredge southward to beach along the east side of the channel. When Dredge #1 is working close to the tide gate, the channel will be closed to vessel movements. When Dredge #3 is working inside of the flood gate, vessels will typically be required to pass along the east side (Starboard side) of the Dredge #3. A discharge pipeline will extend from the dredge along the west side of the channels and cross the channels near the tide gate. The pipeline will then cross over the east bulkhead and proceed on land. Mariners are advised to use caution and transit at slow speed to minimize wake when transiting the area.

NJ- UNION BEACH, RARITAN BAY-SANDY HOOK BAY

Weeks Marine will be conducting submerged pipeline operations in Union Beach, Raritan Bay and Sandy Hook Bay, as part of the New Jersey Coastal Storm Risk Management Project, from **July 1, 2023 to July 31, 2023**, pipeline will be mobilized in the vicinity of Sandy Hook Bay, in the following positions: 40°25'46.28"N, 74° 0'53.74"W, 40°25'21.32"N, 074° 0'24.38"W; 40°25'14.95"N, 074° 0'33.26"W; 40°25'40.074"N, 74° 1'2.30"W and, Anchorage Area 49F: 40°27'10.50"N, 074° 1'29.72"W; 40°27'11.48"N, 074° 1'15.36"W; 40°26'49.43"N, 074° 1'11.03"W; 40°26'48.38"N, 074° 1'26.91"W.

From approximately **11 July 2023 and continuing until approximately 26 July 2023**, Weeks Marine will install a submerged dredge pipeline for the above referenced project. The pipeline corridor will be bound by the following approximate positions: 40°27'18.80"N, 074°10'29.90"W; 40°26'51.63"N, 074° 9'50.46"W; 40°27'17.67"N, 074° 9'28.75"W; 40°30'2.61"N, 074° 8'37.45"W; 40°30'10.40"N, 074° 9'16.35"W; 40°27'40.68"N, 074°10'4.37"W.

Starting approximately **27 July 2023 and continuing until approximately 1 November 2023**, Hopper Dredge "R.B. Weeks" will be operating 1.5 Nautical Miles offshore of South Beach (Sandy Hook Area). The borrow area will be bound by the following approximate positions: 40°24'6.03"N, 73°57'49.50"W; 40°24'5.74"N, 73°56'48.70"W; 40°23'53.88"N, 73°56'48.69"W; 40°23'54.17"N, 73°57'49.59"W.

Dredged material will be transported from the borrow area to a pump out station located 3 nautical miles offshore of Union Beach placement site. Dredged material will be pumped out to placement sites through a combination of floating and submerged lines reaching over 3 miles offshore of the beach placement sites. Weeks "3302 Booster" will be located near GPS position: 40°29'23.96"N, 074° 9'12.64"W. Operations will continue on a twenty-four (24) hours per day, seven days per week basis. Dredge, Tugs and vessels will monitor marine VHF channels 13 and 16 Pipeline and equipment will have all required U.S. Coast Guard lighting for night operations. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

OFFSHORE WIND ENERGY/ONGOING WORK

Updated 9/18/2023.

New information highlighted in Yellow.

This guidance is for Private Aids to Navigation (AtoN) applicants requesting Coast Guard approval to provide navigational markings on offshore wind energy area structures in First District-area waters. The following structure label identification, lighting, sound, and Automatic Identification System (AIS) signals are strongly recommended, to be included in the USCG/BOEM/BSEE-accepted Marking Labeling and Signaling Plan (ML&SP). Applicants should plan to apply for one Private Aid Permit per structure (to include all labels, light(s), sound and AIS signals per the accepted ML&SP). Private AtoN Permit applications should be submitted using the “as designed” position, between 60 and 30 days prior to the start of construction, when they will be processed. Additional specific recommendations, **to allow sufficient time for vessel operators to detect and make any necessary course or speed alterations, include:**

Tower/Electrical Service Platform (ESP) Identification:

- The foundation base of all towers should be painted yellow, RAL 1023, all around from the level of Mean Higher High Water (MHHW) to 50 ft above MHHW.
- Uniquely lettered and numbered in an organized pattern as near to rows and columns as possible to enable quick recognition and reference by mariners and agencies for search and rescue, law enforcement, and other purposes.
- (Tower) Letters and numbers, visible at night, labelled uniformly to at **least 2.5 m (8.2 ft) and as close to 3 m (9.8 ft) in height as possible**, rendered through use of retro-reflective or high contrast black, comparable to MilSpec #17038 or RAL 9005, to maximize visual range for nearby mariners.
- (ESP) Letters and numbers labelled to 1 meter high to maximize visual range for nearby mariners.
- The bottom of the 2.5m to 3m alphanumeric characters should be located at least 30 ft above MHHW and should be visible above any service platforms throughout a 360-degree arc from the water’s surface. If feasible, each unique alphanumeric designation should be duplicated below any servicing platform.
- It is strongly recommended to use retro-reflective paint and lettering/numbering materials to enhance visibility at night, and that an all-around band, retro-reflective material (white, yellow, or silver), visible through a 360-degree arc, at least 2 feet high, be applied to structures no less than 30 ft above MHHW.

Lighting:

- Located on all structures, preferably on the servicing platform, visible throughout a 360-degree arc from the water’s surface.
- Corner Towers/Significant Peripheral Structures (SPSs): Quick flashing yellow (QY), visible at a 5 nautical mile range.
- Intermediate Perimeter Structures (IPS) are those located along a wind energy facility’s outside boundary between SPSs: 2.5 sec flashing yellow (Fl Y 2.5s), visible at a 3 nautical mile range.
- Interior Towers, those inside the line of IPS and SPS towers: 6 second or 10 second flashing yellow (Fl Y 6/Fl Y 10), visible at a 2 nautical mile range.
- All lights serving the same function (SPS, IPS, inner boundary, etc.) should be synchronized within the field of structures.

Encl 3

Note: All base, tower and construction components preceding the final structure completion must be marked with Quick Flashing Yellow (QY) obstruction lights visible throughout 360 degrees at a 5 nautical mile range. **These interim lights do not require additional PATON applications and will be accounted for by the First District Waterways staff through BOEM/USCG/BSEE acceptance of the Marking, Labeling and Signaling Plan.** Coast Guard notification is *required* when a structure is first lighted, with a QY after it breaks the water's surface, and again when the final ML&SP is operational.

Sound Signals:

- All SPS should be fitted with a Mariner Radio Activated Sound Signal (MRASS) which when activated--by multiple (5x) keying on VHF channel 83A within 10 seconds--should sound every 30 seconds (4s Blast, 26s off) and audible for at least 2 NM, for 45 minutes from its last VHF activation.

Automated Information System (AIS) Transponder Signals:

- At a minimum, FCC-certified AIS Aids to Navigation signals should mark all SPS or other significant locations within the wind energy facility. **The structures may be marked with either physical or synthetic AIS message 21 as circumstances warrant.**
- **AIS broadcasts should be made at sufficient antenna height and power to provide a relatively uniform coverage strongly recommended to extend at least 8 nautical miles beyond the periphery of the wind farm.**

Note: AIS stations must be FCC type-certified and granted appropriate FCC licensing prior to broadcasting. See our USCG AIS Frequently Asked Questions #21 for more information and additional instructions on submitting an AIS PATON application.

Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance from construction vessels and associated equipment when not located within one of the above-mentioned safety zone locations. Construction vessels at the substation location include accommodations vessels – CADE CANDIES & SEACOR HAWK. Construction vessels at Monopile locations AP38, AR39, AS41, AV38, AQ36, AV39 will include ORION, NORTHSTAR COMMANDER and ATLANTIC OCEANIC. Construction vessel at Monopile position AT40 will include SEA INSTALLER.

Additionally, the Cable Laying Vessel ISAAC NEWTON will be conducting cable laying operations for the inter-array cables, beginning with array cable lines five and six. These operations will be supported by the trenching support vessel ADHEMAR DE SAINT-VENANT and the C-PIONEER and will continue through mid-October.

There will be several safety and scout vessel from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels.

ATLANTIC OCEAN-OFFSHORE RHODE ISLAND-SOUTH FORK WIND FARM PROJECT -Update 9/19/2023

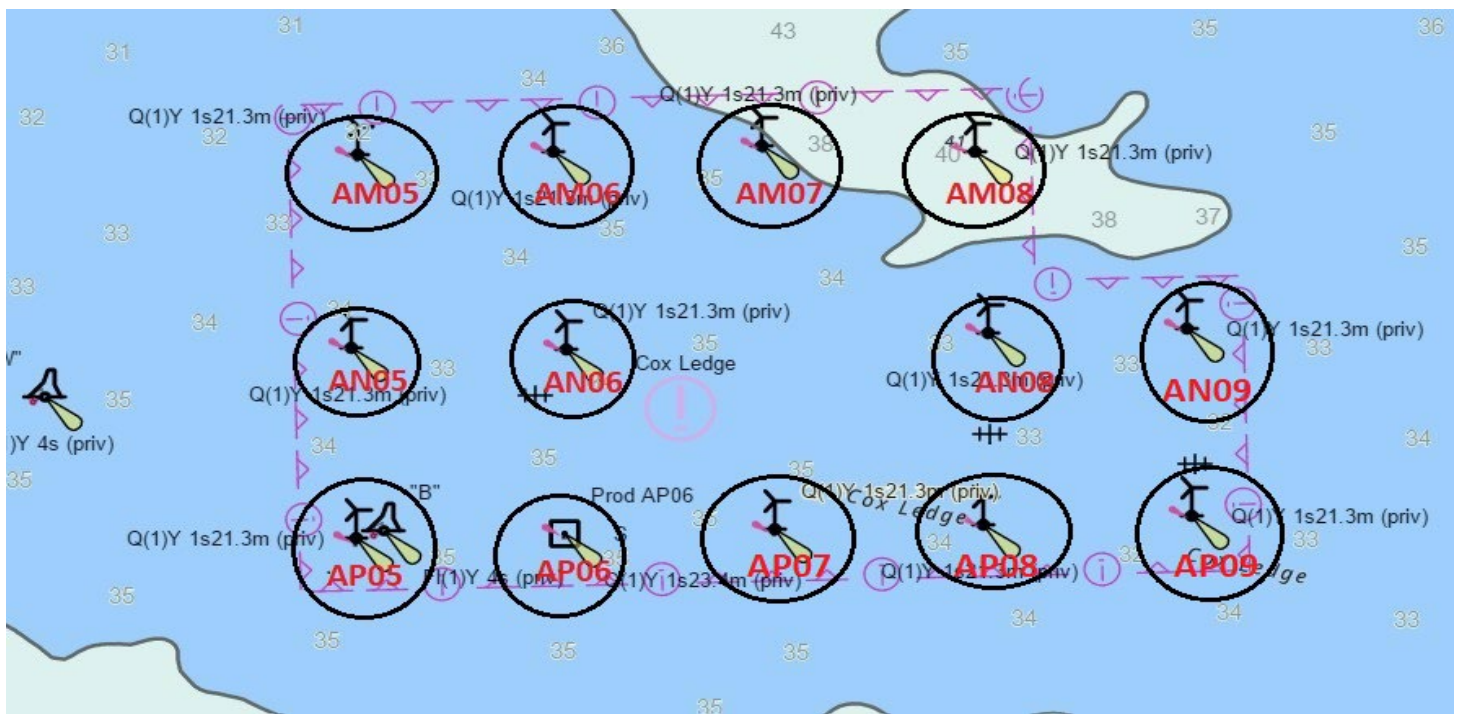

South Fork Wind is actively engaged in construction within the lease area. The project's 13 foundations have been installed and include navigation lights. Construction activity including work aboard the towers and Offshore substation. Safety Vessels are standing by to inform mariners on-scene.

The substation location (AP06) may see a concentration of vessels which will be on scene until approx. mid December. Mariners should proceed with caution in this area.

Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance, 0.5 NM wide berth to the construction vessel as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels.

South Fork Wind export electrical cable is complete, with one small areas of cable requiring secondary protection. Pending survey results and protection, safety vessels are on scene.

Charted features: South Fork Wind Towers and the near shore half of the export cable are on the NOAA chart. Mariners are encouraged to update their charting software. Plotter files with up-to-date information (including future tower locations) are available free at us.orsted.com/mariners/. Available chart types include Loran-C coordinates, Garmin, TimeZero, P-SEA Windplot, and others.

RI-BLOCK ISLAND WIND FARM

Orsted, will be conducting offshore wind operations at the Block Island Wind Farm (BIWF), in position 41-06.882N, 071-31.269W; and 41-06.380N, 071-32.257W, from **September 5, 2023 to October 15, 2023**, between 7:00am to 4:00pm. Equipment on scene will be BIWF Roped access maintenance blades and platform work is occurring on BIWF B3 and B5: the public should not transit or linger under this work. Working vessels will be monitoring VHF-FM CH 13 and 16, for any concerned traffic.

LNM 37/23

ATLANTIC OCEAN-NEW YORK-NEW JERSEY COAST

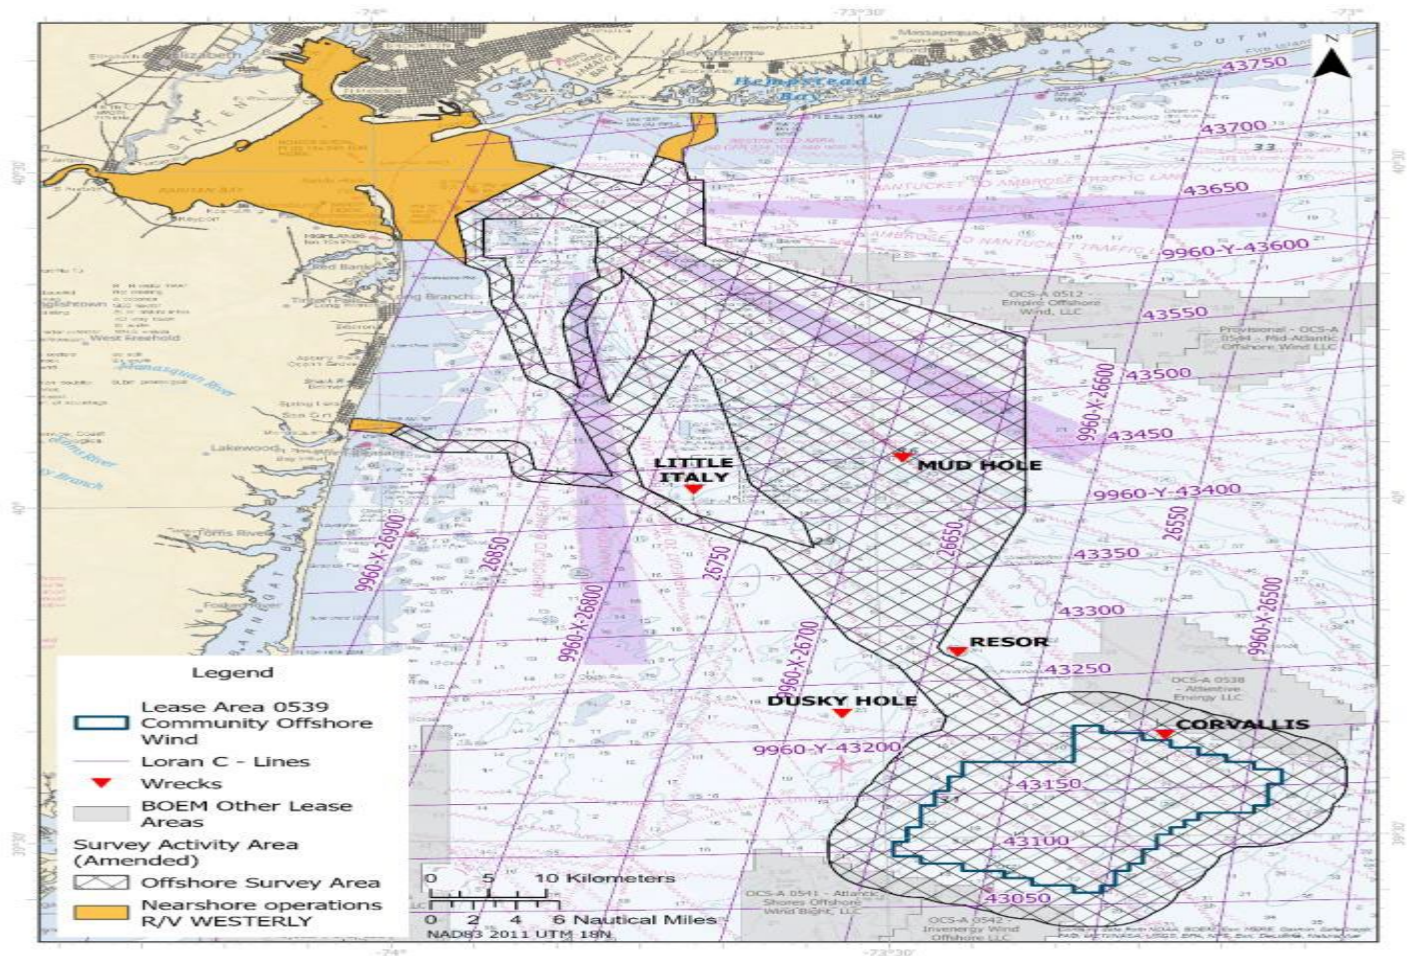

TDI Brooks International, Inc, will be conducting geophysical operations offshore New York / New Jersey from approximately **September 5th to Dec 31st, 2023**, weather permitting, 24 hours a day, seven days a week. Geophysical data will be collected along potential export cable routes from the OCS-A 0538 lease area to the fed-state boundary in support of the project. Equipment on scene will be the research vessel, MARCELLE BORDELON, monitoring VHF-FM CH 16 for any concerned traffic. The vessel will be working with restricted/limited maneuverability with Geophysical equipment being towed astern. The master requests a CPA of 0.5 – 1.0 mile to accommodate operations.

LNM 37/23

ATLANTIC OCEAN-NEW YORK-NEW JERSEY

Petroleum Geo-Services, Inc. will be conducting marine remote sensing operations in the OCS-A 0539 lease area, approximately 32 nautical miles offshore Little Egg Harbor, NJ, from **September 20, 2023, to May 15, 2024**. Equipment on scene will be the survey vessel SANCO SWIFT, operating with multibeam bathymetry and ultra-high-resolution 3D seismic and will be monitoring VHF-FM CH 16 for any concerned traffic. Average vessel speed will be 4 knots with towed sensors up to 1300 feet (400 m) behind vessel and 390 feet (120 m) wide. Maximum vessel speed is 12 knots during transits when not towing sensors. The vessel will be restricted in its ability to maneuver when towing and approaching vessels are requested to pass at a closest point of approach of 1 nautical mile.

LNM 37/23

RI-QUONSET

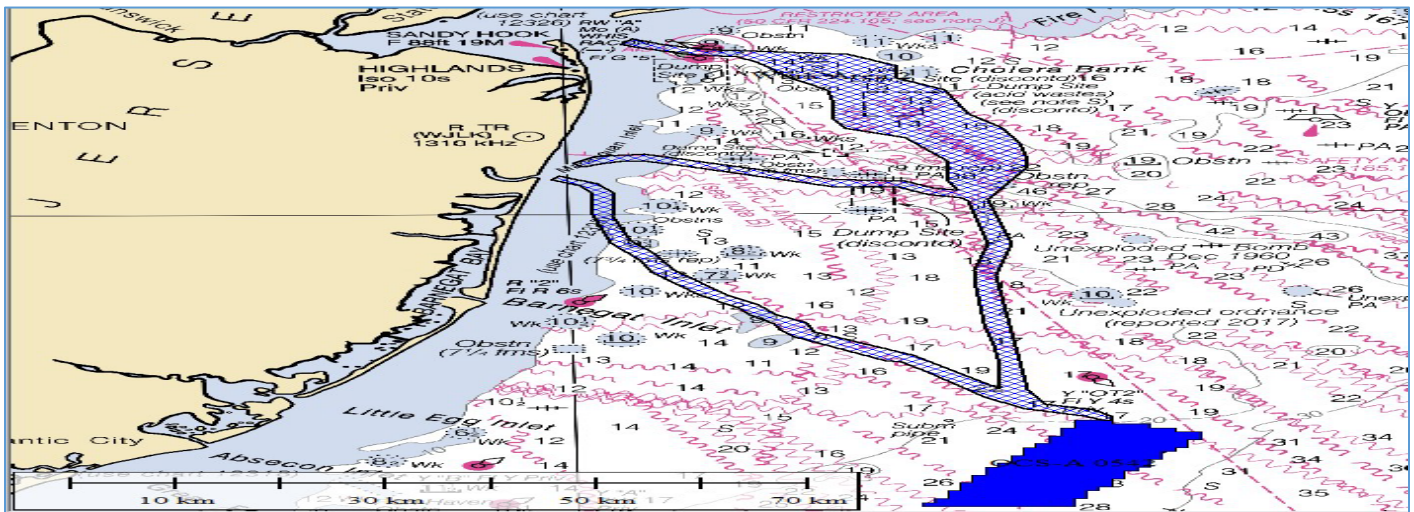

REVOLUTION Wind will commence its construction, pending permit issuance, at its cable's landfall near Quonset, RI, in early October 2023. Construction activity will run for several months and will include dredging work and the tow and install of tow conduit pipes in a process known as horizontal directional drilling. The center point of work will be: 41-34-55.2N and 071-25-48.7W approx. 1000 feet SSE of Quonset Point, .6NM east of the Wickford North Jetty.

Work is anticipated to start **October 6, 2023**. Vessels on scene will be broadcasting on AIS and may be reached on VHF-FM CH 13 and 16. As divers and other sensitive underwater work is being performed, mariners are required to provide a wide berth and no wake in the vicinity.

Blue Point Wind will be conducting geophysical survey activities from the TIME & TIDE survey vessel within an offshore and nearshore survey area, between lease area OCS-A 0537 and nearshore waters of New Jersey and New York, from **April 1 to September 30, 2023**, the TIME & TIDE will operate during daylight hours, only. Equipment on scene will be monitoring VHF-FM CH 16 and will be operating with Sidescan sonar (SSS), multibeam bathymetry echo sounder (MBES), cesium vapor magnetometer (MAG), parametric sub-bottom profiler (SBP), single channel seismic boomer (S-UHRS) and ultra-short base line (USBL) acoustic transceiver. Vessels will have restricted maneuverability during survey operations when towing equipment. Mariners, please transit the area with extreme caution and transit at slow speed to minimize wake when transiting the area.

ATLANTIC OCEAN-WIND LEASE AREA OCS-A 0537-Updated 6/5/2023.

TerraSond will be conducting geophysical survey activities within offshore waters including Lease Area OCS-A-0537 and nearshore waters of NY and NJ, from **March 1 through September 30, 2023**, 24 hours a day, seven days a week. Equipment on scene will be the GO Adventurer survey vessel, utilizing side scan sonar (SSS), multibeam bathymetry echo sounder (MBES), cesium vapor magnetometer (MAG), parametric sub bottom profiler (SBP) and ultrashort base line (USBL) acoustic transceiver, and marine multi-tip sparker seismic system (MCS). In addition, the vessel will be towing an ultra-high-resolution streamer. GO Adventurer will have restricted maneuverability during survey operations when towing equipment. Mariners, please transit the area with extreme caution and transit at slow speed to minimize wake when transiting the area. GO Adventurer will be monitoring VHF-FM CH 16 for any concerned traffic. ATLANTIC OCEAN-COMMONWEALTH WIND-OSC-A 0534

Avangrid Renewables was informed by its contractor that an 11 m length of coiled rod, seismic cone, and 2 sections of casing were lost in the seafloor, in position 40-52-59.905N 070-43-19.333W. The loss occurred on **August 23, 2022**, while performing routine geotechnical surveys (cone penetration testing) in Lease OCS-A 0534. The available evidence suggests that the marine debris is 0.78 m below the seabed. There are no hazardous materials or oil within the debris. Therefore, the lost gear is not reasonably recoverable and should not interfere with other OCS uses or the environment.

MA- SOUTHEAST OF MARTHA'S VINEYARD-SOUTHWEST OF NANTUCKET- OCS-A-501

Vineyard Wind will be utilizing the F/V BEAST OF BURDEN to deploy one Passive Acoustic Monitoring (PAM) device as part of the University of New Hampshire multi-year study to record ambient sound and marine mammal species vocalizations in OCS-A 501 lease area, in position 41-3-45.18N 070-28-27.768W from **January 2023 to 2025**. The PAM device is approximately 2 meters high and 1.7 meters wide and weighs 800 kg with anchor. The device consists of the body and four arms that extend vertically to a central lift point. The device is connected via acoustic releases to the anchor, which consists of a steel triangle assembly with five 20 kg weight plates on each point of the triangle. The BEAST OF BURDEN will be monitoring VHF-FM CH 16 for any concerned traffic. Acoustic Monitoring of Highly Migratory Fish Species in RI/MA Wind Energy Areas

The New England Aquarium and INSPIRE Environmental are conducting research on the movements of highly migratory fish species (sharks, tunas, and marlins) in the southern New England wind energy area. Part of this research requires acoustic receivers to be placed on the sea floor in the locations shown as colored circles in the below map. To reduce the risk of entangling protected species, receivers have no surface buoys and are connected to a mooring system weighing approximately 75 pounds that extends 2 to 3 meters (6 to 9 feet) off the sea floor, as shown in the below photo. To reduce risk of interaction with mobile fishing gear, receivers have been placed near obstructions to the extent possible. All receivers will be deployed in these locations until December 15, 2023.

For more information on the research, please contact the New England Aquarium or INSPIRE Environmental. For information on activities in a particular offshore wind lease area, please contact the developer staff listed below.

LAKE CHAMPLAIN – VERMONT – NEW YORK – RIVIERE RICHELIEU TO SOUTH HERO ISLAND – Bridge Construction – Demolition and construction work on the VT Route 2 bridge between North Hero Island and South Alburg, VT will be conducted from March 29 through **October 11, 2023**. During this time, the vertical clearance of the bridge will be reduced by 1.5 feet and the horizontal clearance will be reduced by 8.7 feet. Work will be conducted during daylight hours only Monday through Saturday. Two barges and attending workboats will be on scene conducting the demolition and repair work. Workboats can be contacted on VHF Channel 13 to arrange passage if needed. The on-scene superintendent for the Kubricky Construction Company is Cale Gleason at 518-378-9619. Mariners are advised to proceed at slow speed and exercise caution.

MASSACHUSETTS – BOSTON INNER HARBOR – MYSTIC RIVER – Bridge Repairs – Repairs will be conducted at the Tobin Bridge, mile 0.1, across the Mystic River between Boston and Chelsea through **December, 2023**. Working hours are from 0600 to 1500 and from 1900 to 0400, Monday through Friday. Work will be conducted outside of the 600 foot navigation channel with the exception of Under Bridge Inspection Units which will reduce the vertical clearance over the 600 foot navigation channel by approximately 10 feet for two to three weeks at the beginning of the project and for two to three weeks at the end of the project. Coast Guard Sector Boston will coordinate with the pilots and SPS New England so the Under Bridge Inspection Units are not operating over the navigation channel during the passage of deep draft vessels. Temporary scaffolding and work platforms will at times be installed around the bridge piers and lighted with constant red lights. Except when barges are relocated, barges will operate outside of the 600 foot channel. The barges will be lit with constant burning white lights on all four corners. Barge operators will monitor VHF channels 13/16. Questions may be directed to Darren Saunders, Project Manager for SPS New England at 508-982-4652; Patrick Blais, Project Superintendent for SPS New England at 978-994-2741 or Tim Chase, Coast Guard Sector Boston at 617-447-1620. CONNECTICUT – NEW LONDON HARBOR - Bridge Repairs – From April 1, 2022 to **June 25, 2025**, between 7 a.m. and 5:30 p.m., the Connecticut Department of Transportation will conduct repairs on the Gold Star I-95 Northbound Bridge over the Thames River, mile 3.1. Work will be performed from hanging platforms on the bridge structure. The platforms will extend over the river approximately 420 feet from the shoreline on the New London side and 290 feet from the shoreline on the Groton side and will not be over federal channel. The reduction in vertical clearance caused by the platforms will not exceed 3 feet below the current bridge vertical clearances of 135 feet (MHW). A safety boat will be in the water and will monitor VHF Channel 16 when work is performed over the water. Questions may be addressed to Scott Thompson, Project Manager Aetna Bridge Company, at 401-663-6052 or Keith Schoppe, CT DOT, at 860-213-2360.

CONNECTICUT – CONNECTICUT RIVER DEEP RIVER TO BODKIN ROCK – CONNECTICUT RIVER - Notice of Temporary Deviation - The Coast Guard has issued a temporary deviation from the regulation governing the operation of the East Haddam Route 82 Bridge across the Connecticut River at mile 16.8, to perform bridge deck replacement. Under this temporary deviation, the Route 82 Bridge may stay in the closed position September 25, 2023 through **September 26, 2023**. A work platform has been installed which has reduced the vertical clearance at the navigational channel by 3'. To minimize further structural and mechanical damage under permanent repairs that are scheduled to be performed in November 2023, the Rte 82 East Haddam Swing Bridge will be operating under the following schedule from July 17, 2023 through **October 31, 2023**:

- Monday through Thursday at 10 am, 1 pm, and 4 pm.
- Friday through Sunday at 10 am, 1pm, 4pm, and 6pm

Due to steel fabrication delays the below channel closure schedule is likely to not occur until at least December 2023 or later. Updates will be provided, as they are available, in the D1 LNM and on the project website at <https://www.rumsonseabrightbridge.com>. The following requested full and half channel closure schedule has been delayed as a result:

The bridge owner has **requested the following full closures** of the Federal navigation channel at the Rumson-Sea Bright Bridge during the following dates/times:

- First channel closure: From 6 am on Mon, 09/25/2023 through 5pm on Fri, 09/29/2023. The contingency date for this channel closure is from 6 am on Mon, 10/02/2023 through 5pm on Fri, 10/06/2023.
- Second channel closure: From 6 am on Mon, 11/13/2023 through 5pm on Fri, 11/17/2023. The contingency date for this channel closure is from 6 am on Mon, 11/20/2023 through 5pm on Mon, 11/27/2023.

During these times a 180’ x 64’ crane barge will be spudded down within the Federal navigation channel immediately south of the existing Rumson-Sea Bright Bridge. Four heavy lift operations will be conducted each week at the new bridge. Vessels and individuals would not be authorized within the federal navigation channel during these dates/times. **The USCG published a Notice of Proposed Rulemaking (NPRM) in the Federal Register and is reviewing comments submitted at <https://www.regulations.gov>.**

Partial/Half Channel Closure: The bridge owner has also requested a partial channel closure (Monday-Friday) when the available channel width is reduced from 75 feet to 37 feet 6 inches from 6 am Monday through 5pm Friday during the following dates/times:

- October 2nd, 2023, to November 10th, 2023 (West Half Closed, East Half Open to Marine Traffic)

Encl 4

- November 20th, 2023, to March 8th, 2024 (East Half Closed, West Half Open to Marine Traffic)
- March 11th, 2024, to May 16th, 2024 (West Half Closed, East Half Open to Marine Traffic)

During the partial/half channel closure, a barge will be within the federal navigation channel under the span being erected and the other half of the channel will be open to marine vessels. The dates/times for this work may change due to weather delays and other unforeseen circumstances.

Mariners are advised to exercise caution when transiting the area. Additional information is available at <https://www.rumsonseabrightbridge.com>. To receive e-mail updates for this project select the “Contact Us” tab, then “E-mail List Sign Up” from the drop-down menu. The project will be completed by March 17, 2025.

REPORTED UNEXPLODED ORDNANCES (UXO)

Updated 9/19/2023.

New information highlighted in Yellow.

The Coast Guard advertises this information through local, Sector Broadcast Notice to Mariners (BNMs) and through the weekly, First Coast Guard District LNM. BNMs are additionally available directly to mariners by email sign-up at the CG Navigation Center Web Site ([Subscribe to Our RSS Feeds | Navigation Center \(uscg.gov\)](#)). Once identified NOAA will then chart the UXO location so they are available on electronic navigation chart updates. Information on proper reporting and safety procedures for UXOs can be found [here](#).

Commercial Fishing Vessel Drills and Safety Training

The purpose of this bulletin is to ensure that documented commercial fishing vessels that operate beyond the boundary line shall be conducting safety drills and maintaining safety equipment in accordance with applicable requirements. A review of recent safety data shows that over the last 10 years there were 41 reported man overboard incidents resulting in the deaths of 23 commercial fishermen. These results show that man overboard accidents continue to be one of the leading causes of death among the First Coast Guard District commercial fishing fleet. Many of these deaths may have been prevented if the victims were wearing a personal floatation device (PFD) while working on deck.

The First Coast Guard District is seeking to educate commercial fishermen of the dangers of not wearing PFDs, along with the importance of maintaining situational awareness and conducting safety drills on a regular basis to reduce man overboard situations and aid in recovery. During boardings and exams, First Coast Guard District commercial fishing vessel examiners and unit boarding officers will be reminding commercial fishermen of the lifesaving importance to wear their PFDs as well as the many ways to reduce existing dangers on the decks and maintain situational awareness of their working environment.

Below are steps commercial fishermen and crews can take to prevent a man overboard from occurring.

1. Keep decks clear of obstructions and tripping hazards and use nonskid in appropriate areas on the deck.
2. Know where all essential safety gear is stored and be able to use/deploy it.
3. Avoid being on deck alone without notifying others.

Below are steps commercial fishermen and crews can take to aid in recovering a man overboard.

1. Wear PFDs while on deck (recommended/encouraged, but not mandatory).
2. Train in man overboard recovery procedures and equipment (mandatory).
3. Participate in monthly man overboard drills (mandatory).
4. Know how to use man overboard retrieval equipment (life rings/life slings) onboard (mandatory).
5. Wear Personal Locator Beacons (PLB; recommended/encouraged, but not mandatory).

To obtain more information on methods of compliance, please contact the nearest Coast Guard office listed below. You can review the safety guidelines and requirements of a commercial fishing vessel safety examination through a link on the www.fishsafewest.info website.

NOTICE OF ARRIVAL REQUIREMENTS

In recent months, some Offshore Supply Vessels (OSVs) greater than 300 gross tonsⁱ arriving from outside of the First Coast Guard District have failed to submit a Notice of Arrival (NOA). The purpose of this Bulletin is to remind the commercial vessel industry of their obligation to submit a Notice of Arrival as required by Title 33 of the Code of Federal Regulations (CFR), Part 160.212(a).

All commercial vessels greater than 300 gross tons, measured under either domestic or international tonnage, shall submit an electronic NOAⁱⁱ via the National Vessel Movement Center's website in accordance with the timetable below prior to entering a new Captain of the Port zone.

If your voyage time is—

1. 96 hours or more; Then you must submit an NOA at least 96 hours before arriving at the port or place of destination.
2. Less than 96 hours, then you must submit an NOA before departure but at least 24 hours before arriving at the port or place of destination.

Failure to submit a Notice of Arrival as required may result in a Notice of Violation (NOV), Letter of Warning (LOW), or Denial of entry into port.

Local Captain of the Port Zones can be contacted directly at the following:
