Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Hazards To Navigation/Hazards	Hazards To Navigation	General/Hazards To Navigation/Hazards From: 2025-08-14 To: 2025-09-30 Location: 40.57122° N / 74.02011° W Deployment of up to 2 export cable tone buoys to support temporary connection of survey equipment to submarine export cables for lease area OCS-A 0512. The buoys will be deployed within the submarine export cable corridor, approximately 2500 feet West of Coney Island. The vessel completing the initial deployment of these buoys will be Enterprise II. Once deployed, the buoys will remain on site until they are retrieved. Buoys will be retrieved periodically for servicing and then redeployed in the same location.	Lat: 40° 34' 16" Lon: -074° 01' 12"
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Hazards To Navigation/Hazards	Hazards To Navigation	General/Hazards To Navigation/Hazards From: 2025-08-06 To: 2025-09-30 Location: 40.57109° N / 74.01953° W Deployment of up to 2 export cable tone buoys to support temporary connection of survey equipment to submarine export cables for lease area OCS-A 0512. The buoys will be deployed within the submarine export cable corridor, approximately 2500 feet West of Coney Island. The vessel completing the initial deployment of these buoys will be Enterprise II. Once deployed, the buoys will remain on site until they are retrieved. Buoys will be retrieved periodically for servicing and then redeployed in the same location.	Lat: 40° 34' 16" Lon: -074° 01' 10"
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/General/Hazards To Navigation/Wrecks	Hazards To Navigation	General/Hazards To Navigation/Wrecks From: 2025-08-19 To: 2026-02-15 Location: 40.5058° N / 73.95065° W NEW YORK - LOWER BAY - AMBROSE CHANNEL BUOY #8 - MARINERS ARE ADVISED THAT A VESSEL IS SUBMERGED IN THE VICINITY OF AMBROSE CHANNEL BUOY #8. THE VESSEL IS REPORTED TO BE 195 FEET OUTSIDE OF THE CHANNEL IN APPROXIMATE POSITION 40 30' 20.88" N, 73 57' 02.35" W AND IS MARKED WITH A FLASHING STROBE AND TWO WHITE FENDERS. ALL MARINERS ARE ADVISED TO TRANSIT THE AREA WITH CAUTION.	Lat: 40° 30' 21" Lon: -073° 57' 02"
Sector New York, Submerged Lands Act (SLA) - Ambrose Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 40.52428° N / 73.9997° W Aid Name: Ambrose Channel Lighted Buoy 12A LLNR: 34855 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICCOMMENTS@USCG.MIL). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Blue Hill Bay Approach - Bass Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 44.22062° N / 68.33358° W Aid Name: Bass Harbor Head Bell Buoy EB LLNR: 2340 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed. Coast Guard is modernizing and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, Best maintain the most critical risk reducing buoys for the long-term, and Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICComments@uscg.mil	Lat: 44° 13' 14" Lon: -068° 20' 01"

We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigational critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Cape Cod Canal Approach/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 41.78495° N / 70.46847° W Aid Name: Cape Cod Canal Approach Lighted Buoy 1 LLNR: 13045 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed below. Coast Guard is modernizing and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested Mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICComments@uscg.mil.	Lat: 41° 47' 06" Lon: -070° 28' 06"

Hog Island Channel - Cape Cod Canal Eastern Entrance/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.78048° N / 70.48814° W Aid Name: Cape Cod Canal Eastern Entrance Lighted Buoy 4 LLNR: 13065 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). Main Channel - Claremont Terminal Channel/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2025-02-12 To: 2026-01-01 Location: 40° 41'11"N, 074° 4' 41"W 40° 41' 17", 074° 4' 33"W 40° 40' 14"N, 074° 03' 06"W 40° 40' 10"N, 074° 03' 13"W Based on the latest available surveys conducted by the Army Corps of Engineers, November 4, 2024, shoaling has occurred in Claremont Terminal Channel. The shoaling has minimized the available depth of water to 15 feet near the centerline of the channel. Based on this data, vessels will be restricted to a draft of 13 feet, plus the rise in tide, with a maximum draft of 18 feet.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION

Buzzards Bay Main Channel - Cleveland Ledge Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.62156° N / 70.69905° W Aid Name: Cleveland Ledge Channel Lighted Buoy 4 LLNR: 16105 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Beverly Channel - Danvers River/General/Bridges/Temp Deviation	Bridges	MASSACHUSETTS – DANVERS RIVER – KERNWOOD BRIDGE – Notice of Temporary Deviation The Coast Guard has issued a temporary deviation from the drawbridge operating regulation that governs the Kernwood Swing Bridge across the Danvers River between Salem and Beverly, MA. The deviation is needed to conduct maintenance. Under this temporary deviation, the Massachusetts Department of Transportation (MassDOT) is authorized to not open for vessels on an as-needed basis from 9 p.m. to 5 a.m. on June 1, 2025, through October 31, 2025. These bridge closures will occur on Sunday(s) night through Thursday(s) night; there will be no interruption to services on weekends. During each bridge closure, a 100-yard Safety Zone will be established to close the channel. MassDOT shall notify Coast Guard Sector Boston, and the Salem, Danvers, and Beverly Harbormasters at least 72 hours prior to any closure and at the beginning and end of each closure period. Questions may be directed to Mr. Elias Demissie of MassDOT at (781) 570-6051 or Mr. Alex MacDonald of SPS New England at (978) 992-1704.	Lat: 42° 32' 35" Lon: -070° 53' 54"

East Penobscot Bay - Deer Island Thorofare/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 44.1765° N / 68.55072° W Aid Name: Potato Ledge Buoy 5 LLNR: 2995 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Main Channel - East River Main Channel/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2024-07-01 To: 2027-12-31 Location: 40.77988889° N / 73.92682778° W Bridge Name: Triboro Bridge Structural Rehabilitation –Construction at the RFK Bridge across East River at mile 7.8 will commence on July 1, 2024. Hours of operation are during daylight hours. A temporary platform will be installed under the entire length and width of suspended span. The platform will reduce the vertical clearance by 4 feet plus 2 feet sag allowance (6 feet total). There will hot work/welding during construction. Any questions regarding this project can contact Andre Markarian via marine radio VHF-FM Ch. 13/16 or 510-774-2198. This project is to be completed by December 31, 2027. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 46' 48" Lon: -073° 55' 37"
Main Channel - East River Main Channel/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	General/Bridges/Repairs From: 2024-10-18 To: 2025-11-02 Location: 40.80166667° N / 73.82953889° W Bridge Name: Bronx Whitestone Bridge Electrical Conduit Installation – Repairs to the Bronx Whitestone Bridge over East River at mile 13.8 is in progress. Hours of operation are from 7 a.m. to 3:30 p.m. A traveler will be operating under the main span and will reduce vertical clearance by approximately 13ft-6in. A safety boat will be operating IVO the bridge. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call Tom Ginnane at 646-243-7274 or Sean Goberdhan at 914-513-7603 with one hour in advance notice. This project is to be completed by November 2, 2025. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 48' 06" Lon: -073° 49' 46"

Equipment on scene will be the 38' x 100' Dredge "Joseph D'Arco, 38' x 110' Flat Deck Crane Barge "#16", 56' x 17' Tugboat "Dana Alexa", 25' x 14' Clydesdale Pushboat "Pushillico" & Aluminum Work Skiffs, monitoring VHF-FM CH 13, 16, and 66, and will require a 30-minute notice, for all vessel movement requests. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.	

Sector New York, Submerged Lands Act (SLA) - East Rockaway Inlet/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 40.5714° N / 73.76362° W Aid Name: East Rockaway Inlet Lighted Bell Buoy ER LLNR: 31495 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Sector Boston, Submerged Land Act (SLA) - Essex Bay/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Essex Bay entrance has experienced increased shoaling from Essex Bay Buoy 3 in approximate position 42-40.4N 070-42.7W to Essex Bay Buoy 3A in approximate position 42-40.3N 070-43.3W. Mariners are advised that shoaling has been identified and extends the entire width of the channel to a least depth of 2 feet mean low water (MLW). Mariners without local knowledge are advised to transit with extreme caution and only during plus tides. Essex Bay Channel Buoy 16 has been reported having increased shoaling. Mariners are urged to use caution while transiting the area.	
Sector Boston, Submerged Land Act (SLA) - Essex Bay/General/Marine Events/Regatta (Race)	Marine Events	MA – IPSWICH BAY – IPSWICH RIVER – LABOR IN VAIN, IPSWICH ILLUMINATION FESTIVAL PADDLE – PADDLE RACE – The Town of Ipswich MA is hosting the 2025 Ipswich illuminations Festival and the Labor in Vain Paddle Race on November 1, 2025, from 11:00 AM to 4:00 PM from Pavilion Beach to the Ipswich Town Wharf on the Ipswich River. The event will consist of a paddle race with approximately 50 kayak, canoe and Stand Up Paddle Boards ranging from 5'-14' feet in length. The person responsible for on scene safety can be reached at 978-356-4343. For more information, please contact LT Jon Hubbard at 978-356-4343.	
Sector Boston, Submerged Land Act (SLA) - Essex Bay/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 42.68006° N / 70.70482° W Aid Name: Essex Bay Entrance Lighted Bell Buoy 1 LLNR: 9480 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed below. Coast Guard is modernization and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested Mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICCOMMENTS@USCG.MIL .	Lat: 42° 40' 48" Lon: -070° 42' 17"

Fire Island Inlet/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 40.60225° N / 73.3314° W Aid Name: Fire Island Inlet Lighted Whistle Buoy FI LLNR: 29110 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Martin Ortez – Main Span Project Manager – (562) 307-4916, mortez@taylor.com 2. Jack Phillips – Main Span Superintendent – (347) 924-5635, john.h.phillips@skanska.com 3. Jim Hummel – Main Span Area Lead - (917) 417-4885, Jim.Hummel@skanska.com Skanska Traylor PNB JV has been awarded the construction of the New Portal North Bridge Project (NJT Contract No. 20-083X, WBS No. GC.02) with a Notice to Proceed of April 7, 2022. Specific to the Hackensack River work, mile 5.0, the project consists of constructing two bridge piers, demolition of the existing center pier north fender, erecting three tied-arch spans of approximately 400 LF (1,200 LF overall), and demolition of the existing bridge once railroad traffic is switched to the new bridge. The current status of the channels: East Channel – Open West Channel – Close The Coast Guard is modifying the operating schedule that governs the Amtrak Portal Bridge across the Hackensack River, mile 5.0, at Little Snake Hill, New Jersey. This action is necessary to facilitate the construction of the new replacement Portal Bridge North, as designed by Amtrak as the owner of the bridge, adjacent to the current Amtrak Portal Bridge. This final rulemaking limits the extent of the opening of the Amtrak Portal Bridge in the horizontal position to prevent the swing span from striking the new Portal Bridge North during construction as follows: The draw shall only open to 55 feet horizontal clearance in the east channel and the west channel will be closed to all navigation while the draw is open. Whenever any bridge opening is needed, contact one of the three (3) provided telephone numbers/emails above with 24-hour advance notice to allow the removal of any waterborne equipment from the East Channel that restricts the horizontal clearance to less than 55 feet. The draw need not open for the passage of vessel traffic from 5 a.m. to 10 a.m. and from 3 p.m. to 8 p.m. Additional bridge openings shall be provided for tide restricted commercial vessels between 7 a.m. and 8 a.m. and between 5 p.m. and 6 p.m., if at least a two-hour advance notice is given by calling the number posted at the bridge. At all other times the bridge shall open on signal if at least a 2-hour advance notice is given. Please be advised that the existing Portal Bridge east channel horizontal clearance (temporary fender) will be maintained at approx. 55ft and west channel horizontal clearance at 91ft until it's demolished, both with a closed swing bridge vertical clearance of 23ft. With a swing bridge opening, the vertical clearance increases to 50ft with the existing Portal Bridge east channel horizontal clearance (temporary fender) being maintained at approx. 55ft and west channel being closed. Mariners are advised to exercise caution when transiting the area. This project will be completed by October 22, 2027.	Lat: 40° 45' 12" Lon: -074° 05' 43"

Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2025-04-29 To: 2026-04-29 Location: 42.899° N / 70.8203° W 42.89746° N / 70.81608° W 42.89488° N / 70.80814° W 42.89251° N / 70.81105° W 42.89471° N / 70.817° W 42.8953° N / 70.82135° W 42.899° N / 70.8203° W Bridge Name: Hampton River New Hampshire 1A State Route Bridge Mariners are urged to exercise extreme caution when exiting or entering Hampton Harbor. All vessel traffic is restricted to the center span of the bridge due to work trestles which have been constructed alongside the existing Hampton Harbor Bridge, blocking the side channels. Mariners should anticipate strong currents in the marked navigation channel coupled with very shallow water just outside the marked channel and plan their transits accordingly. One way vessel traffic is strongly recommended with vessels transiting with the tidal current having priority. Larger vessels will be limited in their maneuverability and once committed to the passage will not be able to stop. Mariners unfamiliar with the area are encouraged to contact the Harbor Master on VHF-FM Channel 16 for transit guidance, as well as making a radio broadcast of their transit to facilitate safest passage.	

Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 42.90162° N / 70.78377° W Aid Name: Outer Sunk Rocks Buoy 2 LLNR: 8905 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . For more Proposal details with other navigation information, view through the Coast Guard's Local Notice to Mariners interactive tool at: https://www.navcen.uscg.gov/msi .	Lat: 42° 54' 06" Lon: -070° 47' 02"
Sector Northern New England, Submerged Lands Act (SLA) - Hampton Harbor/General/Safety Zones/Temporary Regulated Navigation Zones	Safety Zones	General/Safety Zones/Temporary Regulated Navigation Zones From: 2025-07-08 To: 2030-12-31 The Coast Guard is establishing a temporary regulated navigation area (RNA) and a safety zone on the Hampton River at the inlet to Hampton Harbor, Hampton, NH, in response to hazardous conditions created by construction activities for the Neil R. Underwood Seabrook-Hampton Harbor Bridge replacement project. This rule is necessary to provide for the safety of life in the areas undergoing demolition and construction. The RNA will be enforced from July 1, 2025, through December 31, 2030, and will establish the following operating restrictions on vessels: Nothing in this regulation relieves any vessel, owner, operator, charterer, master, or person directing the movement of a vessel, from the consequences of any neglect to comply with this part or any other applicable law or regulation (i.e. the International Regulations for Prevention of Collisions at Sea, 1972 (72 COLREGS) or 33 CFR part 84—Subchapter E, Inland Navigation Rules) or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case. Entry and movement within the RNA is subject to a "Slow-No Wake" speed limit. All vessels may not produce a wake and may not attain speeds greater than five (5) knots unless a higher minimum speed is necessary to maintain bare steerageway. Any vessel transiting through the RNA must make a direct passage. No vessel may stop, fish, moor, anchor, or loiter within the RNA at any time. Vessels may not pass (overtake) another vessel within the RNA. Only one vessel is permitted to pass through the center span navigational channel at any given time. Except when transiting through the center span navigation channel, no vessel or craft may operate within 20 feet of the bridge(s). The operator of any vessel transiting in the RNA must comply with all lawful directions given to them by the COTP or the COTP's on-scene representative. viii) One-way traffic will flow northbound between the eastern side of the shallow waters and the Seabrook-Hampton Harbor Bridge. The northern side of the shallow area will accommodate one-way traffic moving west. The Safety Zone, includes all navigable waters within a 50-yard radius of the center point of the bridge, will be effective from July 1, 2025, through December 31, 2030, but will only be enforced during active construction within the main span navigational channel or other instances which may cause a hazard to navigation as determined by the COTP. The COTP will make notification of the exact dates and times in advance of each closure period of the safety zone to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency. The complete rulemaking is available under Federal Register docket number USCG-2025-0389 and can be accessed through the federal portal at https://www.regulations.gov/document/USCG-2025-0389-0001 We invite your comments on this rulemaking. To submit your comment online, go to https://www.regulations.gov , and insert "USCG-2025-0389" in the "search box". Click "Search" and then click "Comment." We will consider all comments received on or before October 6, 2025. If the project is completed before December 31, 2030, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/msi . For questions regarding this Marine Safety Information Bulletin contact Mr. Craig Lapiejko, Waterways Management at First Coast Guard District, telephone (571) 607-6314, e-mail: craig.d.lapiejko@uscg.mil . There will not be any obstruction in the Channel. Welding (hot work) may be performed during working hours. The resident engineer or contractor will be equipped with a VHF-FM marine radio and will be monitoring Channel 13/16 during hours of operation. Mariners can contact Marc Helman at 212-435-6112 for construction details. This project is to be completed by February 15, 2026. Mariners are advised to exercise extreme caution when transiting the area.	Lat: 40° 51' 06" Lon: -073° 57' 08"

Main Channel - Hudson River/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2024-05-01 To: 2029-12-31 Location: 40.851559° N / 73.9522° W Bridge Name: George Washington Bridge Rehabilitation of Lower Level Structural Steel, Painting and Replacement of Maintenance Travelers – Construction to the rehabilitation at the George Washington Bridge across the Hudson River at mile 11.0 will commence on May 1, 2024. Temporary work platform will be installed under the entire length of the bridge. The temporary work platform will reduce the vertical clearance by 3ft 9in plus 2ft sag max. below the low steel. Welding (hot work) may be performed during working hours. A 26 ft safety boat will be operating in the vicinity of the bridge. Mariners requiring full horizontal clearance can contact Michael Androsiglio 914-447-7513 or via marine radio. The resident engineer or contractor will be equipped with a VHF-FM marine radio and will be monitoring Channel 13/16 during hours of operation. Mariners can contact Marc Helman at 212-435-6112 or 551-220-8853 or Henry Chiang at 201-346-8921 for construction details. This project is to be completed by December 31, 2029. Mariners are advised to exercise extreme caution when transiting the area.	Lat: 40° 51' 06" Lon: -073° 57' 08"
Main Channel - Hudson River/General/Bridges/Construction	Bridges	General/Bridges From: 2025-08-18 To: 2025-11-30 Location: 42.65434° N / 73.74177° W Bridge Name: Livingston Avenue Railroad Bridge Bridge Replacement – Construction and demolition of existing railroad structures and facilities of the Livingston Avenue Railroad Bridge over the Hudson River at mile 146.2 between Albany and Rensselaer. Mobilization of barges and equipment will commence on 18 August 2025. Work hours are Monday through Saturday between 6a.m. and 6 p.m. through November 30, 2025. There will be a safety boat operating IVO the bridge. For construction details please contact Jack Phillips at 347 924-5635 or via marine radio VHF-FM 13/16. Mariners are advised to exercise caution when transiting the area.	Lat: 42° 39' 16" Lon: -073° 44' 30"
Main Channel - Hudson River/General/Bridges/Maintenance	Bridges	Navigation light repairs the Macombs Dam Bridge across the Harlem River at mile 3.2 will commence on August 11, 2025. Hours of operation are from 9 a.m. to 2 p.m. A barge with a manlift will be operated in the navigational channel. Mariners requiring full horizontal clearance can contact the site supervisor at 929-687-2807 and via marine radio VHF-FM CH 13 / 16. This project will be completed by September 30, 2025. Mariners are advised to use caution and reduce wake when transiting the area.	Lat: 40° 49' 41" Lon: -073° 56' 02"
Main Channel - Hudson River/General/Bridges/Construction	Bridges	General/Bridges/Construction From: 2025-08-18 To: 2025-09-15 Location: 40.86277778° N / 73.915° W Bridge Name: University Heights Bridge From September 22, 2025, until November 21, 2025, NYCDOT will be performing bridge washing. One work barge and one tug will be deployed and mounted with a man-lift. Mariners requiring full horizontal clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call (917) 597-5821 or (917) 417-4949. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 51' 46" Lon: -073° 54' 54"
Main Channel - Hudson River/General/Bridges/Closure (Scheduled Or Emergency)	Bridges	The Coast Guard has issued a temporary deviation from the regulation governing the operation of the University Heights Bridge across the Harlem River at mile 6.0 to allow for emergency repairs. Under this temporary deviation, the University Heights Bridge may remain in the closed position until 8:00 a.m. on October 1, 2025. Mariners are advised to exercise caution when transiting the area. TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
West Penobscot Bay - Inner Bay Ledges/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 44.09822° N / 69.00331° W Aid Name: West Penobscot Bay Entrance Lighted Gong Buoy PB LLNR: 4120 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed below. Coast Guard is modernization and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service—manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested Mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPublicComments@uscg.mil .	Lat: 44° 05' 54" Lon: -069° 00' 12"

Isle Au Haut Bay

Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Northern New England, Submerged Lands Act (SLA) - Isle Au Haut Bay/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 44.00557° N / 68.67489° W Aid Name: The Washers Buoy 2 LLNR: 3320 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Northern New England, Submerged Lands Act (SLA) - Jericho Bay/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 44.15056° N / 68.5712° W Aid Name: Saddleback Island Bell Buoy SI LLNR: 2760 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Main Channel - Little Harbor/General/MSIB	MSIB	General/MSIB From: 2025-06-02 To: 2025-11-30 Effective June 1, 2025, The Sector Southeastern New England Command Center has fully transferred all phone communications to (866) 819-9128. The old telephone number, (508) 457-3211, will not be in service after August 1, 2025. Please ensure your contact information has been updated. We will continue to monitor VHF Channel 16. If you have any questions, please contact the command center at (866) 819-9128 or SECSENE@uscg.mil. Waterway restrictions and other decisions affecting the port are based upon weather forecasts, risk assessments, and preparations being made by port partners. In most cases, given ample warning of an approaching hurricane or tropical storm, vessels may be advised to put to sea or directed to an appropriate anchorage. In addition, cargo or fuel oil transfers are likely also to be suspended for brief periods. As necessary, Sector Southeastern New England will contact port partners to share information regarding pre-storm preparedness and post-storm response. As your organization reviews its plans, please feel free to contact the Waterways Management Division at SENEWWM@uscg.mil if there are questions about the Coast Guard's role, plans, or policies regarding navigation restrictions or port closures during hurricanes and heavy weather. Near-real-time information regarding tropical weather, storms, and hurricanes can be obtained through the National Hurricane Center's (NHC's) Facebook page, Twitter account, and official website. Visit https://www.nhc.noaa.gov/ for more information and periodical updates. For immediate assistance during an actual hurricane, severe weather event, or other maritime emergency, contact the Sector Southeastern New England Command Center at (866) 819-9128.

Equipment on scene will be the Dredge #410, Scow #143, Scow #144, Pushboat Miss Sarah, Tugboat Mulberry, monitoring VHF-FM CH 13 for any concerned traffic.	Lat: 41° 15' 54" Lon: -072° 45' 12"
Block Island Sound And Gardiners Bay - Long Island Sound Eastern Part/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.2595° N / 72.13924° W Aid Name: Bartlett Reef Lighted Buoy 4 LLNR: 21065 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Ambrose Channel - Main Channel/General/Bridges/Rehabilitation	Bridges	General/Bridges/Rehabilitation From: 2023-09-11 To: 2025-12-30 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge Lower - Level Deck Rehab - Repairs to the Verrazzano Narrows Bridge over New York Harbor at mile 0.0 will commence on September 11, 2023. This project includes milling, paving, cleaning, painting, steel repairs/replacement, and miscellaneous drainage/utility work throughout the bridge. From April 1, 2024 and November 30, 2024, a bridge traveler will be operated under the main span to perform repairs (weekends from 11 pm Friday night to 5 am Monday morning) and weekdays for inspection. The traveler will be moved out of the navigable channel after work hours or when not in use. Installation of safespan shielding will be installing under the approach span between Brooklyn Tower and Brooklyn Anchorage on or about February 29, 2024 through November 30, 2024. The safespan shielding will not reduce the vertical clearance by more than 5ft below the low steel or below the existing catwalks. Mariners requiring full vertical clearance in the main navigation channel with one hour advance notice can contact Scott Valente via marine radio VHF-FM Ch. 13/16 or call 732-337-7576. Any questions regarding the construction can contact resident engineer Jeff Sawyer at 317-439-0978. This project is to be completed by December 30, 2025. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 36' 22" Lon: -074° 02' 44"
Ambrose Channel - Main Channel/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	General/Bridges/Painting From: 2024-04-01 To: 2025-04-30 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge Tower Painting - Painting to the Staten Island and Brooklyn Towers of the Verrazzano Narrows Bridge over New York Harbor at mile 0.0 will commence on April 1, 2024. From April 1, 2024 to April 30, 2025, a 165ft by 54ft barge and a 120ft by 55ft barge bridge will be operating IVO Staten Island Tower. From May 1, 2025 to March 31, 2026, a 165ft by 54ft barge and a 120ft by 55ft barge will be operating IVO Brooklyn Tower. No equipment will be in the navigation channel at any times. Any questions regarding the barge placement can contact resident engineer Abdi Hedayati at 347-885-8613. This project is to be completed by March 31, 2026. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 36' 22" Lon: -074° 02' 44"
Ambrose Channel - Main Channel/General/Bridges/Maintenance	Bridges	General/Bridges/Maintenance From: 2025-04-01 To: 2026-05-06 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge Preventive maintenance (inspection, maintenance and repairs) to the Verrazzano Crossing Bridge at mile 0.0 across New York Harbor (Narrows Bay) will commence on April 1, 2025. Hours of operation are during daylight hours. A bridge traveler will be operated under the Verrazzano Narrows Bridge to perform bridge maintenance. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call 917-806-5874 or 973-390-9770 or 731-500-6177. The traveler platform will be moved out of the navigable channel after work hours or when not in use. This project is to be completed by May 6, 2026. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 36' 22" Lon: -074° 02' 44"
Ambrose Channel - Main Channel/General/Bridges/Inspection	Bridges	General/Bridges/Inspection From: 2025-05-15 To: 2025-11-11 Location: 40.60625° N / 74.04544444° W Bridge Name: Verrazano Narrows Bridge On May 16, 2025 between 6 a.m. and 2 p.m., a bridge traveler will be operated under the Verrazzano Bridge over New York Harbor at mile 0.0 to perform bridge maintenance. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call Marc Tainow at 908-339-1354. The traveler platform will be moved out of the navigable channel after work hours or when not in use. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 36' 22" Lon: -074° 02' 44"
Ambrose Channel - Main Channel/General/Bridges/Inspection	Bridges	General/Bridges/Inspection From June 16, 2025-October 31, 2025, between 7:00 a.m. and 5:00 p.m., the biennial inspection of the Verrazano Narrows Bridge over New York Harbor at mile 0 shall take place. A diving inspection and fathometric survey shall take place at both bridge tower bases within the fender rip rap and the main channel. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call 646-996-0634 or 646-634-3390. Mariners are advised to exercise caution when transiting the area. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call 646-872-2967 or 917-306-0215. The motorboat will be moved out of the navigable channel after work hours or when not in use. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 40' 41" Lon: -073° 59' 21"
Ambrose Channel - Main Channel/General/Bridges/Inspection	Bridges	General/Bridges/Inspection From: 2025-09-08 To: 2025-12-01 Location: 40.679475° N / 73.98835833° W Bridge Name: Union St Bridge From September 8, 2025, to November 30, 2025, between 9:00 a.m. and 3:00 p.m., a motorboat with scaffolding will be operated under Union Street Bridge over Gowanus Canal at mile 2.1 to perform inspections. Mariners requiring full vertical clearance can contact the contractor via marine radio VHF-FM Ch. 13/16 or call 646-872-2967 or 917-306-0215. The motorboat will be moved out of the navigable channel after work hours or when not in use. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 40' 46" Lon: -073° 59' 18"
Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-03-10 To: 2025-12-31 Location: 40.63944° N / 74.0725° W JT Cleary Inc. will be conducting demolition and reconstruction operations at the Bay Street Landing Esplanade, New York Harbor, Upper Bay, Tompkinsville, Staten Island, from March 10, 2025, to December 31, 2025, Monday through Friday, between 7:00am to 3:30pm. Equipment on scene will be a Crane Barge #1- 50' x 140', Crane Barge #2- 54' x 250', Material Barge #1- 40' x 120', Material Barge #2- 35' x 195', monitoring VHF-FM CH 13 and 69 for any concerned traffic. Push boat will be on site and can move the barges within 2-3 hours during the work week and within 12hrs of notice on weekends.	Lat: 40° 38' 22" Lon: -074° 04' 21"
Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2025-07-01 To: 2026-03-31 Location: 40.70569° N / 74.03438° W PKF-Mark III, Inc. will conducting marine construction at Liberty State Park, Jersey City, NJ, in position 40-42-20.51N, 074-2-3.77W, from July 1, 2025, to March 31, 2027, Monday through Friday, between 6:00am to 5:00pm. Equipment on scene will be multiple floating barges, crane barges, and material barges. Mariners are advised to transit the area with caution and minimize their wake while operations are present.	Lat: 40° 42' 20" Lon: -074° 02' 04"
Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-05-30 To: 2025-09-30 RPS/Tetra Tech will be conducting water quality monitoring studies from approximately May 30, 2025, through September 30, 2025, along the New York harbor Export Cable corridor in the Lower Hudson River and the Raritan Bay. Equipment on scene will be the R/V STREAK, monitoring VHF-FM CH 16 throughout the survey. During the current survey the vessel will be operating at slow speeds along a specified survey line and will have limited ability to alter course. When the vessel is stationary deploying tethered equipment to collect water samples below the vessel, it will not be able to move off station with the equipment deployed. Mariners are advised to use caution when transiting near the survey vessel and give a wide berth and slow bell.	
Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-06-24 To: 2025-09-30 RPS/Tetra Tech will be conducting water quality monitoring studies from approximately June 24, 2025, through September 30, 2025, along the Empire Wind 1 Export Cable corridor in the Lower Hudson River and the Raritan Bay area. Equipment on scene will be the WESTERLY, monitoring VHF-FM CH 16 throughout the survey. The Westerly is a 48 ft aluminum hulled catamaran style vessel equipped with an A-frame. As part of the work, the vessel will be conducting current measurements along survey lines near the equipment involved in the cable lay operations. In addition, the Westerly will periodically be stopping and deploying equipment directly below the vessel to collect measurements and water samples. During these sampling events the Westerly will be limited in ability to maneuver. Mariners are advised to use caution when transiting near the Westerly and give a wide berth and slow bell.	

Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Survey Operations From: 2025-06-24 To: 2025-09-30 Installation of submarine export cables and seabed route preparation. K10031 (cable lay barge with mooring system) will be conducting cable installation operations from the State water boundary, North of the Ambrose Chanle to Lower New York Bay, from June 24, 2025, to September 30, 2025, seven days a week, 24 hours a day. The cable corridor will start in position, 40° 29' 29.29"N, 73° 53' 43.08"W and end at, 40° 34' 22.20"N, 74° 01' 08.25"W. K10031 will also perform cable jointing operations at approximately the cable corridor end location where it will be stationary on anchors for approximately 1 week. TSM TEXEL will perform pre-survey work and seabed route preparation along export cable corridor ahead of the arrival of K10031 and other supporting vessel. K10031 will be supported by KOOLE 53 (long distance tug), NEPTUN FURY (anchor handling tug), and TSM TEXEL (anchor handling tug). K10031 (cable lay barge with mooring system) will be restricted in its ability to maneuver and will have anchor lines extending up to 3300 feet (1000m) meters from the barge within the 3000 feet (915m) anchoring corridor as illustrated in Figure 1. Anchor lines may utilize mid-line buoys. Mariners are advised to use caution when transiting near K10031 and supporting vessels and give a wide berth and slow bell.	
Ambrose Channel - Main Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-08-04 To: 2025-12-31 The vessels DEEP CYGNUS and ENTERPRISE II will be conducting jet trenching of submarine export cables with remotely operated jet trencher vehicles, survey operations, and concrete mattress installation. The work will be performed along the entire Lease Area OCS-A 0512 submarine export cable corridor between Gowanus Bay in New York Harbor and the lease area in the New York/New Jersey Bight. A portion of the work will be performed in the Narrows east of the Ambrose/Anchorage channel in proximity to the Verrazano-Narrows bridge tower. Outside of New York Harbor, the work is performed adjacent to the Ambrose channel, within the precautionary area for traffic, within a traffic separation zone, and crossing the Ambrose to Nantucket Traffic Lane. Operations will commence on or about August 4, 2025, until approximately December 31, 2025 and will be conducted 7 days per week, 24 hours per day. The vessels will be restricted/limited in their ability to maneuver. During jet trenching operations, the remotely operated jet trencher vehicles may operate as far as 150m (500 feet) away from their host vessel with a power and communications umbilical running between the vessel and the remote vehicle.

Ambrose Channel - Main Channel/General/Marine Events/Swim	Marine Events	General/Marine Events/Swim From: 2025-06-14 To: 2025-10-10 NY - EAST RIVER - HARLEM RIVER - HUDSON RIVER – Swim Mariners are advised that multiple swim events are scheduled from June 20, 2025, through October 10, 2025, navigating around Manhattan, NY. Approximately two to five participating swimmers will be assisted by a power-driven vessel and a kayak assigned to each swimmer. The swim events will begin at Pier A in Battery Park and Mill Rock, Manhattan, proceed up the East River, Harlem River down the Hudson River and end their perspective start positions. Interested mariners may contact the Principal Swim Safety Officer on marine band radio channels 6 VHF-FM. See list of dates and times below: Date Start Time Finish Time Location A. 6/21/2025 4:01 PM 12:01 AM Pier A B. 6/23/2025 5:58 PM 1:58 AM Pier A C. 6/24/2025 11:00 PM 7:00 AM Mill Rock D. 6/28/2025 10:13 AM 6:13 PM Pier A E. 6/29/2025 11:02 AM 7:02 PM Pier A F. 7/11/2025 8:28 PM 4:28 AM Pier A G. 7/12/2025 9:14 PM 5:14 AM Pier A H. 7/15/2025 10:55 AM 6:55 PM Pier A I. 7/16/2025 11:44 AM 7:44 PM Pier A J. 7/17/2025 12:37 PM 8:37 PM Pier A K. 7/19/2025 2:39 PM 10:39 PM Pier A L. 7/20/2025 3:45 PM 11:45 PM Pier A M. 7/26/2025 9:00 AM 5:00 PM Pier A N. 7/27/2025 9:44 AM 5:44 PM Pier A O. 8/9/2025 7:33 AM 3:33 PM Pier A P. 8/10/2025 8:14 AM 4:14 PM Pier A Q. 8/11/2025 8:56 AM 4:56 PM Pier A R. 8/12/2025 9:39 AM 5:39 PM Pier A S. 8/13/2025 10:26 AM 6:26 PM Pier A T. 8/15/2025 12:16 PM 8:16 PM Pier A U. 8/16/2025 1:18 PM 9:18 PM Pier A V. 8/17/2025 2:23 PM 10:23 PM Pier A W. 8/23/2025 7:48 AM 3:48 PM Pier A X. 8/24/2025 8:32 AM 4:32 PM Pier A Y. 9/7/2025 9:29 AM 5:29 PM Mill Rock Z. 9/10/2025 9:15 AM 5:15 PM Pier A AA. 9/11/2025 10:05 AM 6:05 PM Pier A BB. 9/12/2025 11:01 AM 7:01 PM Pier A CC. 9/13/2025 12:01 PM 8:01 PM Pier A DD. 9/14/2025 1:03 PM 9:03 PM Pier A EE. 9/20/2025 9:03 AM 5:03 PM Mill Rock FF. 9/21/2025 6:30 AM 3:00 PM Pier A GG. 10/7/2025 7:17 AM 3:17 PM Pier A HH. 10/8/2025 8:06 AM 4:06 PM Pier A II. 10/09/2025 8:57 AM 4:57 PM Pier A JJ. 10/10/2025 9:50 AM 5:50 PM Pier A	
Ambrose Channel - Main Channel/General/Marine Events/Regatta (Race)	Marine Events	NY/NJ – UPPER BAY – Sailing Regatta Mariners are advised that a weekly reoccurring regatta is scheduled on the Upper Bay of New York Harbor, every Tuesday, Wednesday and Thursday from May 13, 2025, until October 16, 2025, at 6:30 pm until 8:30 pm. Approximately 15 sailing vessels will maneuver on various courses on the Upper Bay, between Ellis Island and Governors Island. Interested mariners may contact the race coordinator on VHF-FM Channel 68 during the scheduled regattas for further information.	
Sector Southeastern New England, Submerged Lands Act (SLA) - Main Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.50539° N / 70.64529° W Aid Name: Nobska Point Lighted Bell Buoy 26 LLNR: 15555 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . For more Proposal details with other navigation information, view through the Coast Guard's Local Notice to Mariners interactive tool at: https://www.navcen.uscg.gov/msi . Sector Southeastern New England, Submerged Lands Act (SLA) - Main Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.39605° N / 70.96288° W Aid Name: Sow and Pigs Buoy 34 LLNR: 15617 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. New Rochelle Harbor North Approach - Middle Channel/General/Safety Zones/Temporary Regulated Navigation Zones	Safety Zones	New Rochelle, NY - Long Island Sound – Safety Zone – Bridge Construction. Mariners are advised that a safety zone will be enforced for construction work on the Glen Island Approach Bridge. The safety zone will be enforced from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The Safety Zone encompasses all waters within a line beginning at 40° 53' 18.58"N 73° 46' 56.26"W; thence to 40° 53' 22.08"N 73° 46' 59.39"W; thence north along the shore to 40° 53' 23.8"N 73° 46' 57.51"W; thence to 40° 53' 19.15"N 73° 46' 52.54"W and thence south along the shore back to the point of origin (WGS 84). Vessels may not enter, remain in, or transit through the Safety Zone during the enforcement period unless authorized by the Coast Guard Captain of the Port. Other Federal, State and local agencies may assist these personnel in the enforcement of the Safety Zone. Mariners are urged to exercise caution while in the area. The anticipated dates for the windows of full channel closures: Date December 2, 2024, through December 20, 2024 February 3, 2025, through May 22, 2025 October 2, 2025, through April 29, 2026 Tentative Full Channel Closure Dates August 11, 2026, through August 17, 2026 October 2, 2026, through October 29, 2026	
New Rochelle Harbor North Approach - Middle Channel/General/Safety Zones/COPT Restrictions	Safety Zones	General/Safety Zones/COPT Restrictions From: 2024-12-16 To: 2027-05-31 The Coast Guard is establishing a temporary safety zone for certain waters of Long Island Sound in the vicinity of the Glen Island Approach Bridge, New Rochelle, NY, for construction vessels and machinery involved in the rehabilitation project of the bridge. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with the bridge construction between December 2, 2024, through May 27, 2027. When enforced, this regulation prohibits persons and vessels from being in the safety zone unless authorized by the Captain of the Port New York or a designated representative. DATES: This rule is effective without notice from December 3, 2024, through 5 p.m. on May 27, 2027. For the purposes of enforcement, actual notice will be used from midnight on December 2, 2024, until December 3, 2024. This rule will only be enforced during periods when construction operations at the bridge are in progress. Comments and related material must be received by the Coast Guard on or before March 3, 2025. ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to https://www.regulations.gov , type USCZ-2024-0956 in the search box and click "Search." Next, in the Document Type column, select "Supporting & Related Material." FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email Jeffrey Yunker, Waterways Management Division, U.S. Coast Guard Sector New York; telephone 718-354-4195, email Jeffrey.M.Yunker@uscg.mil . IV. Discussion of the Rule This rule establishes a safety zone from 7 a.m. until 5 p.m. each day starting on midnight December 2, 2024, through May 27, 2027. The safety zone will only be enforced during periods when construction operations at the Glen Island Bridge rehabilitation project are in progress. The anticipated dates for the windows of full channel closures are from 7 a.m. on December 2, 2024, through 5 p.m. on December 20, 2024; from 7 a.m. on February 3, 2025, through 5 p.m. on May 22, 2025; and from 7 a.m. on October 2, 2025, through 5 p.m. on April 29, 2026. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in advance of these scheduled closures. All these dates are tentative and subject to change due to weather, supply chain delays, or other unforeseen circumstances. This rule remains effective through May 27, 2027, in case the project is delayed due to unforeseen circumstances. The area regulated by the safety zone will encompass the waters around the Glen Island Bridge and will cover all navigable waters, from surface to bottom, within the area formed by connecting the following latitude and longitude points in the following order: 40°53'18.58"N 73°46'56.26"W; thence to 40°53'22.08"N 73°46'59.39"W; thence north along the shore to 40°53'23.8"N 73°46'57.51"W; thence to 40°53'19.15"N 73°46'52.54"W and thence south along the shore back to the point of origin. This area is intended for the vessels and machinery being used by personnel for the Glen Island Bridge rehabilitation project. The duration of the zone is intended to ensure the safety of personnel, vessels, and these navigable waters during the bridge construction. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The Coast Guard will make notice of the safety zone via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency or hazardous condition.

Niantic Bay And Vicinity - Millstone Security Zone/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.30637° N / 72.17471° W Aid Name: Millstone Power Plant CG Mooring Buoy LLNR: 22279.1 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). The area from Buoys 24 to 29 is only navigable at the operator's risk. The most severe area of shoaling can be found between buoys 26 and 28 and is less than half the charted channel depth in some areas. Mariners should be aware that the Aids to Navigation in these areas are unreliable due to shoaling and mariners are strongly advised to seek alternate routes. Moriches Bay dredging has been completed. Shoaling has been reported in Moriches Bay along the Long Island Intercoastal Waterway in the vicinity of Moriches Bay Buoy 17, 18, 21, 26, 27, 28 and 29 extending the entire width of the channel and at any tide level. The most severe area of shoaling can be found between buoys 26 and 27 and is less than 3 ft. Shoaling is also reported in Moriches Inlet in the vicinity of Moriches Inlet East Cut Buoys 3E and 5E. Mariners should be aware that the Aids to Navigation in these areas have been deemed unreliable due to shoaling and mariners are advised to seek alternate routes. If transiting these areas, do so only at high tide and proceed slowly and with extreme caution. In addition, shoaling exists west of Moriches Bay Buoy 23 and East of Moriches Bay Buoy 27. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . President Roads - Mystic River/General/Bridges/Temp Deviation	Bridges	General/Bridges/Temp Deviation From: 2025-08-21 To: 2025-11-01 Bridge Name: Malden Bridge The U.S. Coast Guard has issued a temporary deviation from the regulation governing the Alford Street Bridge over the Mystic River in Boston, MA at mile 1.4. From August 21st, 2025-October 31st, 2025, between 10:00 p.m. and 7:00 a.m., the Alford Street Bridge over will be requiring a two-hour advanced notice for openings. This deviation is needed to allow manual, timely operation of West Lock #2. The navigable channel will not be impacted. Vessels able to pass beneath the bridge in the closed position are free to do so. Mariners can contact the bridge at 617-635-7519 or via marine radio channel 13.	Lat: 42° 23' 22" Lon: -071° 04' 16"

Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Main Channel - New Jersey Pierhead/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	General/Hazards To Navigation/Shoaling Reported From: 2025-02-13 To: 2027-02-28 Claremont Terminal Channel Shoaling – The Harbor Safety, Operations and Navigation Committee of the Port of NY and NJ – Deep Draft Working Group: The need to immediately restrict the deep draft of vessels transiting Claremont Terminal Channel has come to our attention. Based on the latest available surveys conducted by the Army Corps of Engineers, November 4, 2024, shoaling has occurred in the channel. The shoaling has minimized the available depth of water to 15 feet near the centerline of the channel. Based on this data, vessels will be restricted to a draft of 13 feet, plus the rise in tide, with a maximum draft of 18 feet. On 11/04/2024, the shoal area was bound by the following approximate coordinates: 40° 41'11"N, 074° 04' 41"W; thence to 40° 41' 17"N, 074° 04' 33"W; thence to 40° 40' 14"N, 074° 03' 06"W; thence to 40° 40' 10"N, 074° 03' 13"W.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Long Island Sound Eastern Part - New London Harbor/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	CONNECTICUT – NEW LONDON HARBOR - Bridge Repairs – From April 1, 2025 to November 1, 2025, between 6 a.m. and 5:30 p.m., the Connecticut Department of Transportation will conduct repairs on the Gold Star I-95 Southbound Bridge over the Thames River, mile 3.1. Work will be performed from hanging platforms on the bridge structure. The platforms will extend over the full width of the river from the shoreline on the New London side to the shoreline on the Groton side. The reduction in vertical clearance caused by the activities will not exceed 3 feet below the current bridge vertical clearances of 135 feet (MHW). There will be no impacts to navigation other than the 3-foot reduction of vertical clearance. A safety boat will be in the water and will monitor VHF Channel 16 when work is performed over the water. Questions may be addressed to Patrick Mahoney, Project Manager Aetna Bridge Company, at 401-378-7225 or Patrick McNamara, CT DOT, at 860-608-9175.	Lat: 41° 21' 51" Lon: -072° 05' 16"

The event will take place on Friday, September 26, through Sunday September 28, 2025, from 9:00 a.m. to 5:00 p.m. Expect up to 25 vessels, 22-56 ft in length. Mariners are advised to transit the area with extreme caution. Mariners may contact the person in charge by phone at (312) 402-2105.	
East Passage - Newport Harbor/General/Marine Events/Regatta (Race)	Marine Events	RI – NARRAGANSETT BAY – JAMESTOWN YACHT CLUB WEEKLY RACING SERIES FALL 2025 – RACE/REGATTA Mariners are advised that the Jamestown Yacht Club Weekly Racing Series Fall 2025 is scheduled to be held in the vicinity of Goat Island, Narragansett Bay, RI. The event will take place weekly from Sunday, September 07, through Sunday, October 05, 2025, from 12:30 p.m. to 5:00 p.m. each day. Expect up to 40 vessels, 20-60 ft in length. Mariners are advised to transit the area with extreme caution. Mariners may contact the person in charge by phone at (401) 782-7271 or by VHF Channel 72.	

Niantic Bay And Vicinity**Additional MSI Categories**

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Long Island Sound Eastern Part - Niantic Bay And Vicinity/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.29595° N / 72.1415° W Aid Name: Bartlett Reef North End Buoy 1 LLNR: 22255 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Shoaling exists in Plum Island Sound between Plum Island Sound Entrance buoy 4 (LLNR 9310) and Plum Island Sound Entrance buoy 6 (LLNR 9320), aids are not properly marking best water. Mariners are advised to use caution while navigating this area. All of Plum Island is particularly susceptible to shoaling, the area between 4 and 6 being the worst at the mouth of the channel. Last year the unit partnered with the harbor Master moving the aids to mark the best water. Even though the aids are in the best possible locations that water is still shallow at low tide and mariners should use caution while navigating in this area	
Portsmouth To Cape Ann - Plum Island Sound/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Newburyport Harbor and Plum Island Sound – Plum Island Sound Entrance has experienced an increase in shoaling between Plum Island Sound Entrance Buoy 6 and 8. The shoaling was observed in approx. position 42-41.365N /070-45.169W and extends 100 yards west following the channel. Mariners are advised that at MLLW depths of 3' could be seen. Mariners without local knowledge are advised to transit with extreme caution and monitor tidal stations prior to transiting.

Boston North Channel - President Roads/General/MSIB	MSIB	General/MSIB From: 2025-06-03 To: 2025-11-30 2025 HURRICANE SEASON AND SEVERE WEATHER PLANNING The 2025 North Atlantic hurricane season commences on June 1 and continues through November 30. The National Oceanic and Atmospheric Administration (NOAA) forecasts an above average hurricane season for 2025, with 13-19 named storms and 6-10 hurricanes predicted with 3-5 of those being major hurricanes. As in past years, the Coast Guard Captain of the Port, Sector Boston will set port conditions in advance of an approaching hurricane or tropical storm. I encourage you to review and update your hurricane and severe weather plans. This includes internal and external communication procedures, methods of minimizing storm damage and environmental risk (e.g. securing transfers, ballasting down storage tanks, draining transfer lines), and reconstitution procedures. As a hurricane or tropical storm approaches, Coast Guard Sector Boston will contact the maritime community to establish communications and coordinate preparations. The Captain of the Port seeks to be as transparent as possible when making decisions that will impact commercial vessel and facility operations. Waterway restrictions and other decisions affecting the port are based upon weather forecasts, risk assessments, and preparations being made by port partners. In most cases, given ample warning of an approaching hurricane or tropical storm, vessels may be advised to put to sea or directed to an appropriate anchorage. In addition, cargo or fuel oil transfers may be suspended for brief periods. As necessary, Sector Boston will contact port partners to share information regarding pre-storm preparedness and post-storm response. As your organization reviews its plans, please feel free to contact the Coast Guard Sector Boston Command Center at (833) 449-0539, or the Waterways Management Division Chief LCDR Jessica Hull at (617) 512-9615 email at SECBOSWaterways@uscg.mil if there are questions about the Coast Guard's role, plans, or policies regarding navigation restrictions or port closures during hurricanes and heavy weather. Sector Boston may also be available should your organization choose to hold a tabletop exercise to test portions of your plan. The Coast Guard is no longer utilizing Homeport for the distribution of Marine Safety Information Broadcast or for relaying Port Condition and Port Status changes. Mariners are advised to utilize the Coast Guard Navigation center site for the most recent updates https://www.navcen.uscg.gov NOAA provides near-real-time information regarding tropical weather, storms, and hurricanes through the National Hurricane Center's (NHC's) Facebook page, Twitter account, and official website. Visit https://www.nhc.noaa.gov for more information and check in periodically for updates. The "NOAA NWS National Hurricane Center" page provides updates about the NHC outreach and education campaign and other items that might be of interest to the public throughout the year. During the hurricane season, the site contains a daily tropical weather update as well as alerts regarding any tropical cyclone activity as needed. The NHC Facebook page is http://www.facebook.com/US.NOAA.NationalHurricaneCenter.gov . For maritime emergencies during an actual hurricane or severe weather event, contact the Sector Boston Command Center at (833) 449-0539 or VHF-FM Channel 16 for immediate assistance.

Sector Northern New England, Submerged Lands Act (SLA) - Prospect Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 44.36401° N / 67.93859° W Aid Name: Moulton Ledge Lighted Bell Buoy ML LLNR: 1775 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). TITLE	SUBCATEGORY	DESCRIPTION	LOCATION

Buzzards Bay Main Channel - Quicks Hole/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 41.44637° N / 70.84909° W Aid Name: Felix Ledge Buoy 3 LLNR: 15920 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed. Coast Guard is modernizing and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPublicComments@uscg.mil.	Lat: 41° 26' 47" Lon: -070° 50' 57"

Hours of operation are Monday to Friday between 6 A.M. and 2:30 P.M. One JT Cleary 112ft by 52ft crane barge and one 30ft by 90ft material barge will be operating IVO of fender system. Contractor will maintain a minimum of 75 ft navigation channel at all times. Mariners requiring full horizontal clearance can contact Christian Peter at 201-400-2318 or via marine radio VHF-FM Ch 13/16. This project is to be completed by December 31, 2025. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 46' 55" Lon: -073° 53' 18"
East River Main Channel - Rikers Island Channel/General/Bridges/Inspection	Bridges	General/Bridges/Inspection From: 2025-08-01 To: 2025-12-31 Location: 40.800475° N / 73.92817222° W Bridge Name: 125th St Bridge Inspection to the 125th Street Bridge across Harlem River at mile 1.3 will commence on August 1, 2025. Hours of operation are from 7 A.M. to 4 P.M. Daily. A barge with an 80-foot manlift will be operating under the lift span and will remain free of obstructions. After work hours, the boat will be moored outside the navigational channel. Mariners requiring full horizontal clearance can contact the contractor via marine radio VHF-FM Ch 13/16 or 732-585-3737. This project is to be completed by December 31, 2025. Mariners are advised to exercise caution when transiting the area.	Lat: 40° 48' 02" Lon: -073° 55' 41"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Northern New England, Submerged Lands Act (SLA) - Saco River/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 43.4653° N / 70.3384° W Aid Name: Saco River Approach Bell Buoy SA LLNR: 7940 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Sector New York, Submerged Lands Act (SLA) - Sandy Hook Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 40.44245° N / 73.91683° W Aid Name: Scotland Lighted Whistle Buoy S LLNR: 35085 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICCOMMENTS@USCG.MIL). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). ALL MARINERS ARE ADVISED TO EXERCISE CAUTION IF TRAWLING OR FISHING ALONG THE SEAFLOOR IN THIS AREA.	Lat: 41° 08' 52" Lon: -071° 03' 33"
Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/MSIB	MSIB	General/MSIB From: 2025-06-11 To: 2025-12-08 The Coast Guard is establishing 85 temporary safety zones around the construction of individual wind energy facilities during the development of the Sunrise Wind Farm project area. The project area lies within Federal waters on the Outer Continental Shelf, specifically in the Bureau of Ocean Energy Management Renewable Energy Lease Area OCS-A 0487, approximately 16 nautical miles south of Martha's Vineyard, MA. This action protects life, property, and the environment during construction of each facility. When a safety zone is being enforced, only attending vessels and vessels with authorization are permitted to enter or remain in the safety zone. This action is necessary to provide for the safety of life, property, and the environment during the planned construction of each facility's foundation and subsequent installation of the wind turbine generators and offshore substations from June 1, 2025, through May 31, 2028. When enforced, only attending vessels and those vessels specifically authorized by the First Coast Guard District Commander, or a designated representative, are permitted to enter or remain in the temporary safety zones. Again, each safety zone will only be enforced during active major construction, which could occur at several locations, sometimes simultaneously. The First Coast Guard District Commander will make notification of the exact dates and times in advance of each enforcement period to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF-FM) as soon as practicable in response to an emergency. If the project is completed before May 31, 2028, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: https://www.navcen.uscg.gov/msi . The complete Temporary Interim Rule regulatory text can be found at the following link: https://www.navcen.uscg.gov/sites/default/files/pdf/lnms/D01_LNM_Special_Note_Temporary_Interim_Safety_Zone_Sunrise_Wind.pdf	

Sector Southeastern New England, Exclusive Economic Zone (EEZ)/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.10802° N / 71.6697° W Aid Name: Southwest Ledge Lighted Whistle Buoy 2 LLNR: 650 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Safety Zones/Temporary Regulated Navigation Zones	Safety Zones	General/Safety Zones/Temporary Regulated Navigation Zones From: 2025-09-17 To: 2025-09-24 A 500-meter Safety Zone will be enforced around Vineyard Wind, LLC., operations from 8:00am, September 17, 2025, to 8:00am, September 24, 2025. Mariners are to avoid transiting within 500-meters of the following positions: AM37: 41-07-12.22N, 070-29-06.60W; AR33: 41-02-07.80N, 070-34-18.47W; AU37: 41-00-11.93N, 070-28-58.61W; AT35: 41-01-09.89N, 070-31-38.50W; AQ36: 41-04-11.05N, 070-30-23.34W; AR39: 41-03-14.06N, 070-26-24.03W; AQ39: 41-04-14.10N, 070-26-25.34W; AT41: 41-01-15.93N, 070-23-42.86W; AN38: 41-06-13.17N, 070-27-47.33W. Mariners are strongly encouraged to operate with extreme caution and to maintain a safe distance from construction vessels and associated equipment when not located within one of the above-mentioned safety zone locations. Construction vessels include SEA INSTALLER and WIND PACE. Construction will be supported by support vessels – CADE CANDIES, C FIGHTER, C-PIONEER, GO LIBERTY, WINDEA ENTERPRISE, WINDEA COURAGEOUS, WINDEA INTREPID, GATEWAY ENDEAVOR, WINDSERVE FRONTIER, PATRIOT LEADER, tugs NICOLE FOSS, HAWAII FOSS, & EARL REDD, and the barges PREVAILING WIND and MARMAC 400. There will be several safety and scout vessels from the local fishing fleet operating in the area, all monitoring VHF FM CH 13 and 16 for any concerned traffic. All Mariners are requested to give a 0.5 NM wide berth to the construction vessel and their equipment as they are extremely limited in their ability to maneuver. Passing arrangement can be made via VHF with any construction vessels.	

Sector Southeastern New England, Exclusive Economic Zone (EEZ)/General/Safety Zones/COPT Restrictions	Safety Zones	General/Safety Zones/COPT Restrictions From: 2025-09-17 To: 2025-09-24 A 500-meter Safety Zone will be enforced around Ørsted Northeast Program operations from 8:00am, September 17, 2025, to 8:00am, September 24, 2025. Mariners are to avoid transiting within 500 meters of the following positions: Sunrise Wind Lease Area 487 Foundations (FOU): AT12: 41-00-41.732N, 071-02-1.39W ; AT09: 41-00-38.851N, 071-06-0.558W ; AT07: 41-00-34.549N, 071-08-37.567W, AU03: 40-59-28.468N, 071-13-57.285W ; AT10: 41-00-38.904N, 071-04-39.866W ; AU02: 40-59-26.987N, 071-15-11.101W ; AT19: 41-00-51.151N, 070-52-46.677W. AU08: 40-59-36.26160N, 071-07-16.95360W, Ørsted Northeast Program Revolution Wind, LLC, is complying with the Stop Work Order issued by the Bureau of Ocean Energy Management (BOEM) on Friday, August 22, 2025, and safely halting activities on the outer continental shelf related to the Revolution Wind project. The Stop Work Order states that "it does not apply to activities that are necessary to respond to emergency situations; to prevent impacts to health, safety and the environment; or to comply with the conditions of approval" for the project. Accordingly, a limited number of vessels may be in the Revolution Wind lease area for certain limited activities, in compliance with the Order. HARVEY SUBSEA is positioned to complete electrical systems protection measures on a limited number of turbines to prevent potential safety impacts, in compliance with the Stop Work Order. ROCKPIPER is conducting seabed work and may be on site this week to complete the placement of rock for purposes of scour protection and cable protection systems stabilization at limited locations, pursuant to the conditions of approval for the project and in compliance with the Stop Work Order. BOKALIFT 2 and supporting vessels are installing foundations in Sunrise Wind. Mariners should exercise extreme caution in the vicinity. Many sound-monitoring buoys, environmental monitoring vessels, and support craft will operate at the foundation installation location out to 5000 meters; a wide berth from these activities is requested. Some monitoring operations move ahead of BOKALIFT 2 relocation. BOKALIFT 1 and supporting vessels will be installing secondary steel on installed foundations. GPO SAPPHIRE, HL S7000 and supporting vessels have installed the offshore converter station at AU08. LEVIATHAN is positioned for offshore converter station commissioning. The USCG may enforce a temporary 500-meter Safety Zone around construction operations. Sound monitoring buoys (SeaPickets) are located at: SP5 40-59-12.905N, 071-3-45.238W. SP4 40-58-48.5616N, 070-53-12.033W SP3 41-1-55.344N, 070-53-30.156W SP1 40-58-17.228N, 071-13-22.006W SP2 41-0-34.452N, 071-13-21.259W Please be advised, there is a circular seafloor obstruction approximately 9' off the seafloor and over 30' in diameter at 41-07-41.1478N, 071-03-32.5954W. There are temporary mattresses installed at the Sunrise Wind Exit Pit off Smith Point Park within a 60-meter radius of 40-43-54.18N, 072-50-38.94W. A nearshore metocean buoy was installed at 40-43-52.3092N, 072-50-57.5376W. This buoy will be in place for around fifteen months. Sector Southeastern New England, Territorial Sea - Sector Southeastern New England, Submerged Lands Act (SLA)/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.57889° N / 70.23529° W Aid Name: Bishop And Clerks Lighted Bell Buoy 1 LLNR: 14485 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Sector Southeastern New England, Exclusive Economic Zone (EEZ) - Sector Southeastern New England, Territorial Sea/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.21017° N / 71.53386° W Aid Name: Block Island Northeast Whistle Buoy 5 LLNR: 19685 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Sector Southeastern New England, Exclusive Economic Zone (EEZ) - Sector Southeastern New England, Territorial Sea/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 41.14039° N / 71.59561° W Aid Name: Black Rock Point Buoy 2 LLNR: 19730 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed. Coast Guard is modernizing and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICComments@uscg.mil.	Lat: 41° 08' 25" Lon: -071° 35' 44"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Blue Hill Bay Approach - Somes Sound Approach/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 44.261° N / 68.20662° W Aid Name: Harding Ledge Buoy 7 LLNR: 2060 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPublicComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Main Channel - Stonington Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.31282° N / 71.91372° W Aid Name: Stonington Harbor Approach Gong Buoy 3 LLNR: 20165 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Gardiners Bay South Entrance - Threemile Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 41.04427° N / 72.18852° W Aid Name: Threemile Harbor Entrance Lighted Bell Buoy TM LLNR: 27775 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed below. Coast Guard is modernization and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested Mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICComments@uscg.mil .	Lat: 41° 02' 39" Lon: -072° 11' 19"

Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend. Refer to Project No. 01-25-015 and submit directly in the body of the email (in lieu of .pdf/excel attachments) to maximize analysis effectiveness (D01-SMB-DPWPUBLICComments@uscg.mil). A visual CBMP Update summary can be viewed at: https://uscoastguard.maps.arcgis.com/apps/webappviewer/index.html?id=ec177e10b27843579411b18639a46e46 . Sector Northern New England, Submerged Lands Act (SLA) - West Penobscot Bay/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change From: 2025-04-03 To: 2026-10-03 Location: 44.01901° N / 69.00535° W Aid Name: West Penobscot Bay Entrance Lighted Gong Buoy PA LLNR: 4050 Action: DISCONTINUE The Coast Guard First District Commander seeks public input on AtoN changes Proposed below. Coast Guard is modernization and rightsizing the buoy constellation, whose designs mostly predate Global Navigation Satellite Systems (GNSS), Electronic Navigation Charts (ENC), and Electronic Charting Systems (ECS), for long-term reliability and serviceability. This effort will result in the most sustainable navigation risk reduction to support and complement modern mariners, today's much larger ships, ECS system availability and requirements, and powerful smartphone navigation subscription apps affordably accessible to virtually all waterway users. The Proposed buoy constellation changes are intended to: • Support the navigational needs of the 21st century prudent mariner, vice mid-20th century (pre-GPS, AIS, e-charts, mobile device apps, improved radar, etc.), • Deliver effective, economical service--manage vessel transit risk to acceptable levels at acceptable cost, • Best maintain the most critical risk reducing buoys for the long-term, and • Provide resilience against AtoN discrepancies, GNSS disruptions/ECS failures. Interested Mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and are requested prior to 13 June 2025 to complete the process. To most effectively consider your feedback and improve the data collection, when responding to this proposal, please include size and type of vessel, recreational or commercial, and distance from aid that you start looking for it, and if and how you use the signal. Please do not call the Coast Guard via telephone or other means, only written responses to this proposal will be accepted. Refer to Project No. 01-25-015. E-mail can be sent to: D01-SMB-DPWPUBLICComments@uscg.mil .	Lat: 44° 01' 08" Lon: -069° 00' 19"

West Passage - Wickford Harbor/ATON/Proposed Notice of Change	Proposed Notice of Change	ATON/Proposed Notice of Change Location: 41.57357° N / 71.43541° W Aid Name: Wickford Harbor Gong Buoy 2 LLNR: 19140 Action: DISCONTINUE The spring/summer Coastal Buoy Modernization Proposal (CBMP) received nearly 3,000 public comments enabling the Coast Guard to adjust Proposed changes. We are extremely appreciative for the significant engagement from the maritime public. Detailed, specific input is a critical part of the Coast Guard's determination processes supporting management of the Northeast's 5,600 federal buoys and beacons. Physical aids to navigation will always remain a key part of the nation's Marine Transportation System. Thanks to the comprehensive public feedback, the course of action changed for more than half of the original CBMP buoys: 121 aids were removed from proposed discontinuation, 71 aids remain proposed for discontinuation with supporting changes to nearby buoys (relocations, lighting, sound signal additions and/or AIS virtual AtoNs), and 162 buoys remain proposed for discontinuation without additional proposed changes. The CBMP's main objectives remain to ensure long-term buoy system sustainability at the most navigationally critical locations for mariners while better understanding how navigation practices are changing through tools like GPS location, radar, AIS, electronic charts, and navigation apps. The CBMP Update seeks to balance the use of physical aids with other navigation tools. Interested mariners are strongly encouraged to comment on this in writing, either personally or through their organization. All comments will be carefully considered and requested prior to the Comment end date (November 15, 2025) to complete the process. To best align feedback to the Proposal Update data needs, please include: the formal aid name (with LLNR – listed below), your vessel type (recreational or commercial), and how you use the specific signal to locate good water in relation to hazards, shifting shoals, strong currents, narrow passages/entrances or reduced visibility, along with any additional nearby buoy signal changes you recommend.
