**SECTION I - SPECIAL NOTICES**

This section contains information of special concern to the Mariner.

---

**NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS**

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

**NOTICE OF 2024 LIGHT LIST AVAILABILITY**

2024 Light Lists are available on the USCG Navigation Center's website at: <https://www.navcen.uscg.gov/light-list-annual-publication>

Coast Guard Light Lists are a means for communicating aids to navigation information to the maritime public. The last government printed Light Lists were the 2014 editions. While the Light Lists are no longer available in government printed form, commercial reproductions may be available for purchase from maritime service providers. Local Notice to Mariners will continue to advertise Light List corrections and NAVCEN will continue to publish a compilation of corrections. Complete versions of the 2024 Light Lists are updated weekly on the NAVCEN website.

- Mariners should download applicable Light List copies and updates as needed at: <https://www.navcen.uscg.gov/weekly-light-lists>
- A summary of 2024 Light List corrections are available at: <https://www.navcen.uscg.gov/light-list-summary-of-corrections>
- Guidance for use of electronic navigation publications onboard U.S. vessels can be found at: [http://www.uscg.mil/hq/cgcv/cvc/policy/policy\\_letters/543/CG-543\\_pol10-05.pdf](http://www.uscg.mil/hq/cgcv/cvc/policy/policy_letters/543/CG-543_pol10-05.pdf)

The Local Notice to Mariners, Light List, and Summary of Corrections are in Portable Document Format (PDF) and viewing them requires a PDF reader. PDF readers are readily available on the internet, generally free of charge. For questions regarding this message, please contact the USCG Navigation Center at: <https://www.navcen.uscg.gov/contact/contact-us>, and use "LNMs, Charts, Chart Corrections, or Light Lists" as the Subject from the dropdown menu.

**Publication of NVIC 03-23 Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations**

The Coast Guard has published Navigation and Vessel Inspection Circular (NVIC) 03-23: Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations (OREI), to highlight considerations when planning and undertaking voyages in the vicinity of offshore renewable energy installations (OREI) in U.S. waters. The prudent mariner should review and utilize this NVIC to make an informed risk assessment prior to

navigating within or in the vicinity of an OREI. Important maritime safety information relating to OREIs is distributed by Local or Broadcast Notices to Mariners (LNM or BNM) promulgated by Coast Guard Districts. Marine Safety Information Bulletins (MSIB) released by the local Captain of the Port may be issued to provide supplemental information. Interested parties should contact the Office of Navigation Systems at CGNAV@uscg.mil, with any questions or feedback.

To access NVIC 03-23, mariners can visit the following website: <https://www.dco.uscg.mil/Our-Organization/NVIC/Year/2020/>

For a full list of all U.S. Coast Guard NVICs, mariners can visit the following website: <https://www.dco.uscg.mil/Our-Organization/NVIC/>

### **GPS Testing**

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

LNM: 07-19

### **U.S. Coast Guard eDelivery of Broadcast Notice to Mariners (eBNMs)**

The U.S. Coast Guard has announced a new manner of delivering Broadcast Notice to Mariners (BNMs). Traditionally, the Coast Guard has relied solely on transmitting these notices via voice transmissions on maritime VHF-FM frequencies. As part of the Coast Guard's commitment to harnessing technology for safer navigation, we have augmented the required VHF-FM radio delivery method to provide real-time information directly to registered devices. U.S. Coast Guard Sectors and Districts are now actively transmitting BNMs online and through an email subscription service. Mariners are encouraged to subscribe to receive Broadcast Notice to Mariners via email at the following website:

<https://www.navcen.uscg.gov/subscribe-email-rss-feeds>

To access, search and retrieve BNMs online for an area of interest, mariners should visit:

<https://www.navcen.uscg.gov/broadcast-notice-to-mariners>

### **SUNSET OF NOAA PRINTED CHARTS - UPDATE**

\*\*\*\* Cancellation of NOAA Paper and Raster Nautical Charts \*\*\*\*

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". Canceled charts do not meet USCG carriage requirements. A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

<https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

**LA - GULF OF MEXICO - Uncrewed Surface Vehicle Operation**

Continuing until February 29, 2024, SeaTrac Systems, Inc., has deployed an Uncrewed Surface Vehicle (USV), the SP-48, to conduct ocean data collection. The uncrewed surface vehicle will operate approximately 100 nautical miles southeast of Freshwater Bayou, as it collects oceanographic information via onboard sensors. The operational data collection area is located within the South Marsh Island, Eugene Island, Green Canyon, Garden Banks, and Vermillion Areas, and will be bound by the following approximate positions:

- 28-11-00N 092-20-50W,
- 28-11-00N 091-40-00W,
- 27-34-00N 091-40-00W and
- 27-34-00N 092-20-50W.

The SP-48 is a solar powered 4.8 meter USV, with a cruising speed of 3 kts and a top speed of 5 kts. The USV is marked with "UNCREWED" on the transom and is equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability. For further information, mariners may contact the project manager, at (978) 578-6645, or at: HBoeschstein@SeaTrac.com. Attached as an enclosure to this LNM is additional project information and graphics of the USV SP-48.

**LA - MISSISSIPPI RIVER - Saltwater Intrusion Operations**

Persistent drought conditions throughout the Mississippi River Valley has reduced the flow of freshwater into the Lower Mississippi River (LMR), allowing for an intrusion of saltwater from the Gulf of Mexico to make its way upriver. Efforts to mitigate the impacts of saltwater intrusion are ongoing along the LMR and will occur 24-hours a day, 7-days a week. Activities include construction and alterations of water intakes and infrastructure along the riverbanks, the transporting of fresh river water by barges and other vessels, and other yet to be identified efforts. Mariners are advised to operate with caution in the vicinity of the locations listed below until further notice.

**Location, River Mile (AHOP)**

- Port Sulphur, 49.2, RDB
- Pointe A La Hache, 49.7, LDB
- Belle Chasse, 75.5, RDB
- Dalcour, 80.9, LDB
- St. Bernard, 88.0, LDB
- New Orleans Algiers, 95.7, RDB
- Gretna, 96.7, RDB
- West Jefferson, 99.1, RDB
- New Orleans Carrollton, 104.7, LDB
- East Jefferson, 105.4, LDB

The USCG will provide updates of locations with active mitigation efforts via industry wide email. Vessel operators working in support of mitigation efforts at or near these locations should maintain a proper lookout and notify passing traffic when precautions, such as transiting at slowest safe speed, may be needed. Communications should be made on VHF-FM Channel 12, with VHF-FM Channel 67 as a backup. For information on the construction to raise the Saltwater Barrier Sill at Mile 63.8, AHOP, mariners may reference U.S. Coast Guard Sector New Orleans MSIB Vol XXIII Issue 056 (<https://homeport.uscg.mil/Lists/Content/DispForm.aspx?ID=82492&Source=/Lists/Content/DispForm.aspx?ID=82492>). For additional information, mariners should contact the U.S. Coast Guard VTS-LMR on VHF-FM Channels 5A, 12 and 67, or at (504) 365-2514.

**SECTION IV - CHART CORRECTIONS**

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections. This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97

	Corrective Action	Green can	Object of Corrective Action		at 40-41-09.001N	
					Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

The confined channel is marked at the corners by two gated pairs of lighted green and red buoys supplemented with AIS capabilities. The southern-most gated pair has a flash characteristic of 2.5 seconds, and the northern-most gated pair has a flash characteristic of 4 seconds.
2. Vessels with a draft less than 25 feet are not required to utilize the temporary channel along the LDB, and are encouraged to transit the Mississippi River Channel between the temporary lighted green buoys and Alliance Anchorage.
3. The lower 2,700 feet of Alliance Anchorage, between Mile 63.7 to Mile 64.3, AHOP, is closed.
4. All vessels shall transit at their slowest safe speed between Mile 63.5 to Mile 65.5, AHOP.

**TX - GIWW, MILE 401.0, WHL - BRAZOS RIVER - Lock Condition**

Continuing until further notice, mariners are advised to proceed with caution when transiting through the Brazos River Floodgates along the GIWW, in the vicinity of Freeport, TX. Recent investigations indicate degraded and damaged conditions to the floodgate structures, creating a snag hazard for vessels that use the longwalls to guide themselves through the locks. A washed out portion of the western longwall has been identified as particularly hazardous. Vessels making multiple passes through the locks while building their tow have an increased risk of an allision with the damaged structure and should transit with extreme caution. All vessels should monitor conditions at the locks and transit with caution. ## SeaTrac Uncrewed Surface Vehicle (USV) Deployment Notice

### Summary

SeaTrac Systems intends to deploy its Uncrewed Surface Vehicle (USV), the SP-48, in the Gulf of Mexico for the purpose of ocean data collection between 01/13/2024 and 02/29/2024. The USV will be launched from LUMCON in Cocodrie, LA and will be escorted by a support vessel to a departure location in the vicinity of Cat Island Pass. At this point the SP-48 will be turned over to the remote pilot who will monitor and control the boat as it heads offshore to its operating area ~100 nm SW (27.9N, 92W). Once on station, the SP-48 will be primarily holding station while collecting metocean data from its onboard sensors.

The SP-48 will be monitored and controlled remotely from the SeaTrac office located at 100 Hoods Lane, Marblehead, MA 01945. The SP-48 is shown in the images below for reference.

## Operational Area

The operational area is indicated in the image below, with the marker locations specified by latitude and Longitude. The SP-48 will be primarily station keeping in this approximate area to collect metocean data.

- Marker 1: 28 : 11 : 00 , -92 : 20 : 50
- Marker 2: 28 : 11 : 00 , -91 : 40 : 00
- Marker 3: 27 : 33 : 60 , -91 : 40 : 00
- Marker 4: 27 : 33 : 60 , -92 : 20 : 50

## Operating Dates

The system will be deployed in the operating area during the following dates:

**01/13/2024 – 02/29/2024**

## Vehicle Description

The SP-48 is a 4.8 meter long, solar powered, USV that is intended to operate persistently for up to months at a time for the purpose of data collection and monitoring applications. The USV weighs ~650 lbs and has a cruising speed of 3 kts and a top speed of 5 kts. The USV is equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability, and is also marked with "Uncrewed" on the transom to clearly indicate the absence of personnel onboard. The pilot has real-time access to 360-degree cameras on board the USV for situational

awareness which can be accessed through redundant communications links (2 cellular and 2 satellite) for command and control of the vehicle.

Subject: Notice to Mariners

Dear Sir or Madam:

Continuing until approximately 31 August 2024, dredging operations will be conducted in the vicinity of the Houston Ship Channel (HSC) between station 16+000 (Lat 29°38'27.13"N, Long 94°57'56.81"W) and station 57+000 (Lat 29°32'35.11"N, Long 94°54'12.37"W).

Cutterhead dredge "C.R. McCaskill" and attendant plant are currently operating between R-LT "76" (LLNR 24390) and R-LT "82" (LLNR 24530).

Dredged material will be transported through a combination of floating and submerged pipeline to Three Bird Island Marsh (TBIM) placement site.

**Starting approximately 25 December 2023 and continuing until further notice, Weeks' Bucket Dredge J.C. Deville and Material Barge" will be operating in the vicinity of the TBIM placement site.**

Work limits for TBIM placement site and PL corridor will be bound by the following approximate positions:

Lat 29°36'37.95"N, Long 94°56'52.29"W

Lat 29°35'1.38"N, Long 94°55'45.03"W

Lat 29°37'3.73"N, Long 94°52'4.92"W

Lat 29°38'22.76"N, Long 94°53'6.79"W

Work limits for the BSC/Bayport Flare, staging area(s) for pipeline and equipment will be bound by the following approximate positions:

Lat 29°36'55.32"N, Long 95° 1'17.04"W

Lat 29°36'41.49"N, Long 95° 1'16.47"W

Lat 29°36'21.86"N, Long 94°57'11.06"W

Lat 29°37'14.98"N, Long 94°57'30.53"W

Weeks' "189 Booster" is located near GPS position: Lat 29°36'37"N, Long 94°57'2.34"W.  
Weeks' "3301 Booster" is located near GPS position: Lat 29°36'40.35"N, Long 94°55'37.62"W.

Work limits for the HSC, equipment staging area(s) and subline crossing will be bound by the following approximate positions:

Lat 29°38'24.44"N, Long 94°58'52.78"W  
Lat 29°38'44.69"N, Long 94°57'37.17"W  
Lat 29°36'46.01"N, Long 94°56'45.45"W  
Lat 29°32'35.38"N, Long 94°53'48.26"W  
Lat 29°32'7.22"N, Long 94°54'31.74"W  
Lat 29°35'29.92"N, Long 94°58'52.09"W

A dredge subline leak is located approximately 1,200-feet East of the Houston Ship Channel and approximately 50-feet North of 5-Mile Cut Channel near the following GPS position:  
Lat 29°36'36.77"N, Long 94°56'52.20"W.

Approximately 290 Cys of misplaced dredged material that built up to an elevation of 6-feet from natural bottom has reduced water depths in the area to approximately 4-feet. The artificial shoal has been marked with 4 danger buoys to alert the boaters. Small vessels traveling through 5-Mile Cut Channel are urged to take caution when transiting this area.

A second mound of material has been reported near the following GPS position: 29°36'56.65"N, 94°57'12.58"W. The mound is out of the channel and has been marked with danger buoys.

Additional mounds of material have been reported near the following GPS positions:

- Small mound: Lat 29°37'31.03"N, Long 94°57'25.32"W
- Mound of material: Lat 29°36'39.64"N, Long 94°55'39.30"W
- Mound and pipe joint connection sticking out of the water:  
Lat 29°36'44.55"N, Long 94°57'6.46"W
- Multiple mounds of material bound by the following GPS positions:  
Lat 29°36'38.32"N, Long 94°57'4.43"W  
Lat 29°36'35.75"N, Long 94°57'3.20"W  
Lat 29°36'36.36"N, Long 94°56'50.82"W  
Lat 29°36'37.50"N, Long 94°56'50.83"W  
Lat 29°36'39.48"N, Long 94°57'1.59"W  
Lat 29°36'42.64"N, Long 94°55'1.26"W and  
Lat 29°36'43.05"N, Long 94°54'56.22"W

The mounds are outside of the channel(s) and have been marked with danger buoys.

Weeks Marine is requesting a slow bell for all the vessels transiting the Houston Ship Channel (HSC) between Green Light "73" and Green Light "81". Mariners are urged to use extreme caution and transit this area at their slowest safe speed to create minimum wake after passing arrangements have been made.

A partially suspended section of pipe has been found underwater near G-LT "81" (LLNR 24525), outside of the HSC. A red buoy has been placed at approx. gps coordinates: Lat 29°38'5.00"N, Long 94°57'57.00"W, to mark the location of the pipe and alert the boaters of the potential hazard.

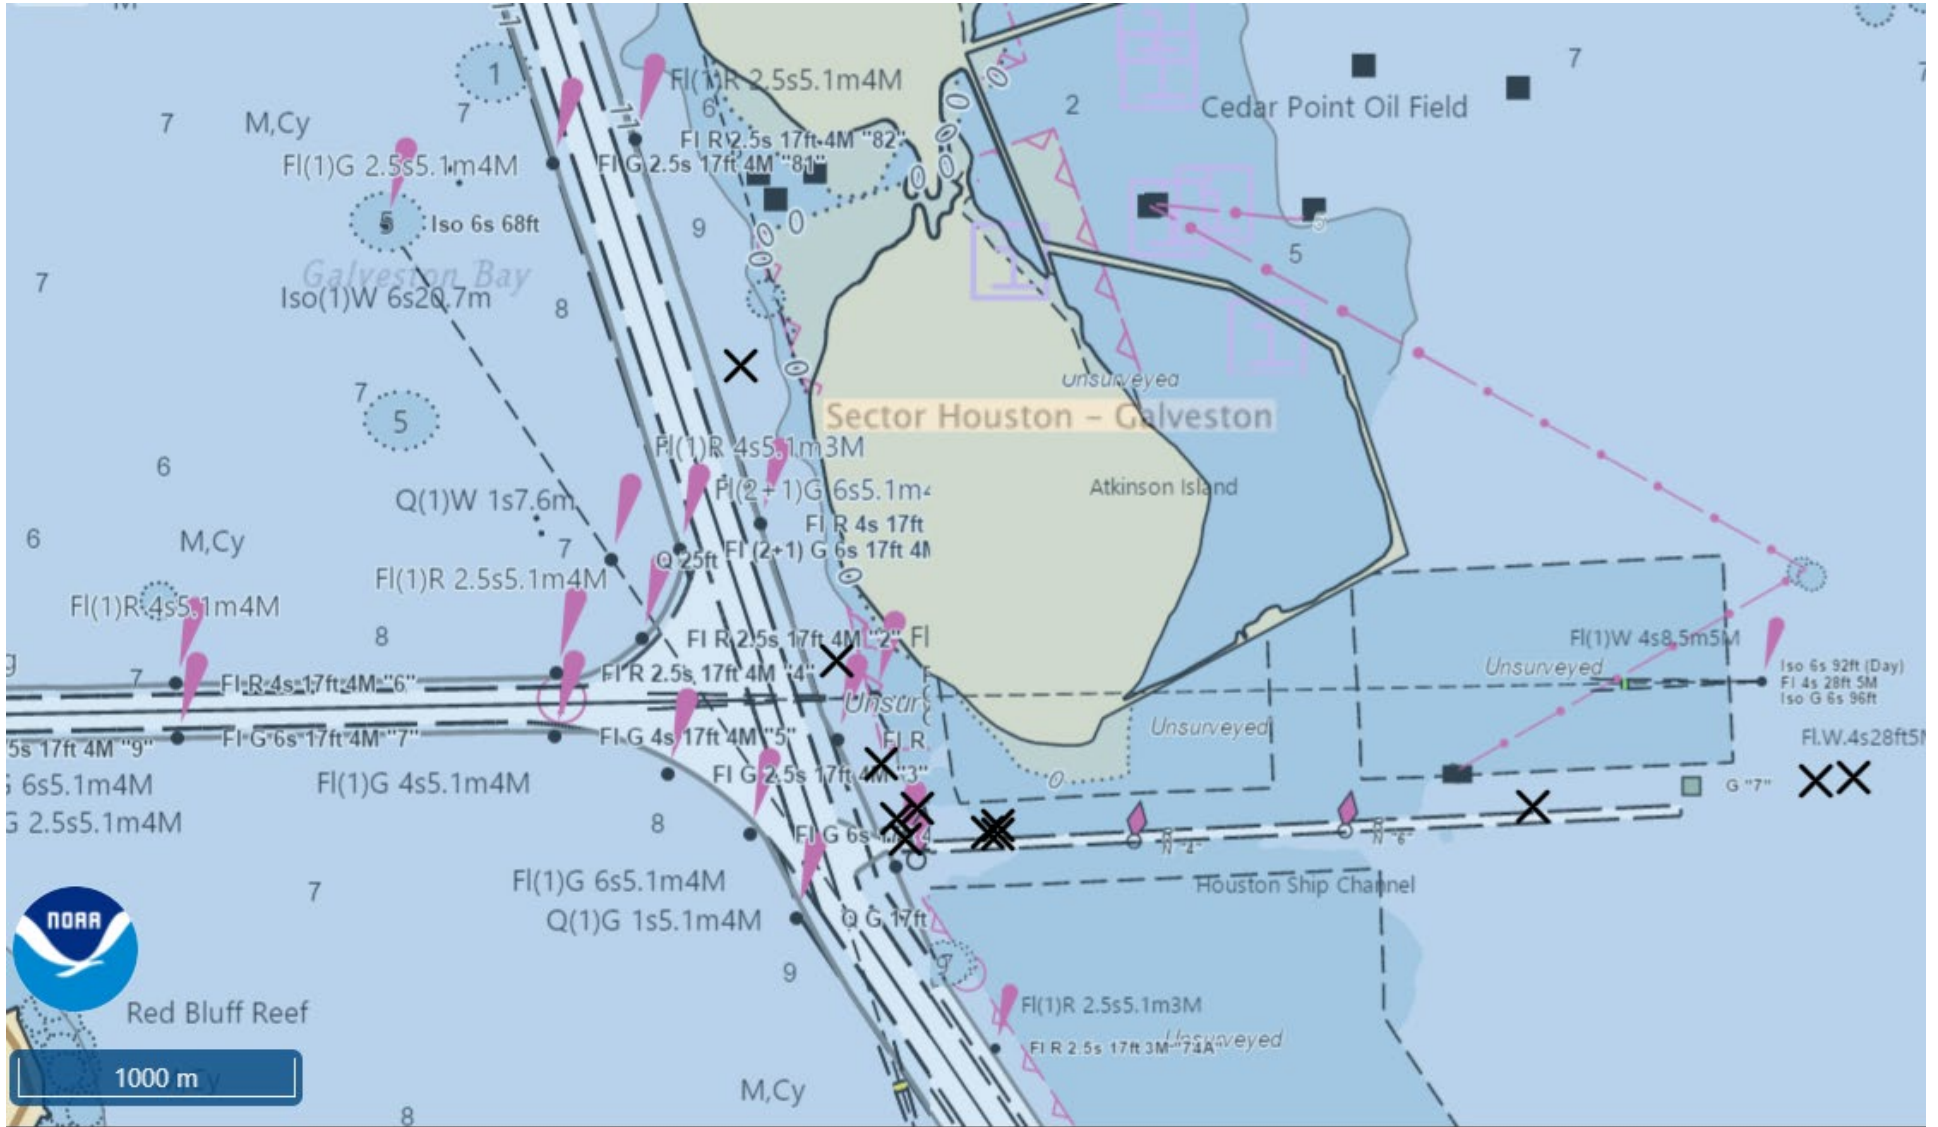

Dredging operations will continue on a twenty-four (24) hours per day, seven (7) days per week basis. Dredge, pipeline(s) and equipment will have all required Coast Guard lighting for night operations. Dredge, tugs and boats will monitor marine VHF channels 13, 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.
