All passing vessels, including tour boats, fishing vessels, and recreational vessels, should remain in the channel and away from shipbreaking activity due to potential hazards associated with overhead industrial work. POC: (956) 831-2299, Email: arnie.tyler@internationalshipbreaking.com or daniel.l.richardson20.civ@us.navy.mil	
Laguna Madre Channel - Brownsville Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brownsville Ship Channel - Brazos Island Harbor Channel - Dredge Operation --- From: 2024-11-27 To: 2026-05-04 --- The Dredge GENERAL MACARTHUR is conducting dredging operations in the Brownsville Ship Channel. The dredge will work 24-hours a day, 7-days a week. On-scene vessels and equipment will include barges, tugboats, survey boats, skiffs, and floating and submerged pipeline. Vessels should coordinate passing arrangements with the dredge 1-hour in advance. Mariners are urged to transit the area at their slowest safe speed and proceed with caution. VHF-FM Channels: 13 and 72, POC: USACE (956) 638-2026	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Brazos Santiago Pass - Brownsville Channel - Laguna Madre Channel - Dredge Operation --- From: 2024-08-28 To: 2026-05-02 --- Dredging is taking place in the Brownsville Channel and Brazos Santiago Pass Entrance Channel for the Brazos Island Harbor Channel Improvement and Rio Grande LNG Dredge Project. Operations will be conducted 24-hours a day, 7-days a week. The Cutter Suction Dredge OHIO is currently working in the Brownsville Channel and the Dredge CAROLINA is currently working in the Laguna Madre Channel. Dredge spoils will be pumped from the dredge/channel to the Upland Placement Areas located adjacent and south of the channel. Dredged material will be pumped through varying lengths of floating hose, submerged pipeline, pontoon pipeline and shore pipeline. Submerged pipeline has been installed along the south side of the ship channel between Laguna Madre Channel Lighted Buoy 5 (LLNR-29545) and Brownsville Channel Light 41 (LLNR-29940). Additional project equipment along the channel includes: • A subline channel crossing west of the Dredge OHIO near Brownsville Channel E Range Front Light (LLNR-43020). • The Booster JESSIE, staged west of Brownsville Channel Light 37 (LLNR-29915). • A spud barge with a floating dock located along the green side of the channel near Laguna Madre Channel Light 29 (LLNR-29606). • The BOOSTER 9, staged southwest of Laguna Madre Channel Light 15 (LLNR-29575). • A shallow water subline near the entrance to South Bay, between Laguna Madre Channel Light 15 (LLNR-29575) and Laguna Madre Channel Light 27 (LLNR-29600). • Equipment and pipeline staging areas along the ship channel and within the Port Isabel Channel. Additional support vessels/equipment include the Booster CAPT. BARNEY, auxiliary equipment, pipe rafts, barges and towing vessels. Mariners should transit the project area with extreme caution and coordinate passing arrangements in advance. VHF-FM Channels: 10, 12 and 16, POC: (252) 342-4971 or (630) 207-3593	
General/MSIB	MSIB	MSIB 99-25 - Brownsville Ship Channel Outbound Sector Range Light E Lighting Discrepancies --- The newly constructed Outbound Sector Range Light E in the Brownsville Ship Channel is being tested and is not displaying proper lighting characteristic. The light has been aimed down the rangeline; however, it has not been verified that the fixed white light is marking the channel centerline. When transiting outbound on the starboard (southern) side of the channel, a green light should be seen, and when on the port (northern) side of the channel, a red light should be seen. This orientation is currently inverted. A red light is currently displayed on the starboard side of the channel, and a green light is currently displayed on the port side of the channel. All vessels should exercise extreme caution transiting this area. Mariners attempting to utilize this aid for navigational purposes are doing so at their own risk and are advised to use it in conjunction with other navigational equipment to verify their position. Parties with urgent concerns can contact the U.S. Coast Guard Sector Corpus Christi Command Center at (800) 874-2143; or for non-urgent questions and concerns, email: CCWaterways@uscg.mil.	Lat: 26° 01' 51" Lon: -097° 13' 54"

General/MSIB	MSIB	MSIB 18-25 --- North Calcasieu River Navigational Considerations --- Due to several documented near miss situations investigated by U.S. Coast Guard MSU Lake Charles, this Marine Safety Information Bulletin (MSIB) is to bring heightened awareness to all commercial vessels with anticipated voyages to the unique waterway features in the north Calcasieu Ship Channel. Specifically, the northeast sections of Mile Marker 16.0, and the area southeast of the Calcasieu Saltwater Barrier leading to applicable commercial waterfront facilities. Mariners are advised that this waterway features sharp winding turns, shoaling along the banks, and the presence of private docks and residential structures along the shoreline. These characteristics, particularly near the Saltwater Barrier and southward, may present navigational challenges for transiting vessels and tows. For all commercial vessels transiting through this area, consideration should be given to the voyage plan and navigational assessments, provision of suitable lookouts, and awareness of shoals, private docks and residential structures. Consider the assessment of safe speed to enable timely and effective maneuvers to mitigate the risks of collision, allision, or grounding. These considerations are not exhaustive and do not supersede navigation rules, sound mariner judgment, or good seamanship. Compliance with a vessel's Towing Safety Management System (TSMS), where applicable, remains essential. All commercial vessel operators are strongly encouraged to share this MSIB with their vessel crews during voyage planning for transits through this area. For questions about this MSIB, mariners should contact the MSU Lake Charles Casualty Investigations Division inbox at: LakeCharlesIO@uscg.mil.

South Pass - Head Of Passes To New Orleans/General/MSIB	MSIB	Low Water Safety Advisory: Mile 0.0 to Mile 167.0, AHOP --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to 232.0, AHOP, when the Baton Rouge River Gauge reads 16 ft and below and the Carrollton Gauge reads 2.5 ft and below. Mariners are reminded the sailing line between Miles 0.0 and 232.0 follows a path through naturally deep water connected by twelve marked channels known as "crossings." Low water conditions have significantly reduced water depths in areas of the river outside the sailing line where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit. (1) Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water, to ensure the safe and efficient movement of vessels. (2) Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship's wake. (3) Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. (4) Aids to Navigation discrepancies should be reported to the Sector New Orleans Command Center. (5) Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. • Reporting: Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. • To see the National Weather Service Extended Streamflow Prediction for LMR please use the following link: https://forecast.weather.gov/product.php?site=NWS&issuedby=ORN&product=ESP&format=txt&version=1&glossary=0 • US Army Corps Navigation Conditions Surveys can be found at: https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/	Lat: 29° 53' 33" Lon: -089° 54' 20"

Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dredge Operation --- From: 2026-01-26 To: 2026-07-20 --- Mechanical maintenance dredging will be conducted in the Houston Ship Channel, from the Barbours Cut Terminal to Boggy Basin. Operations will be conducted 24-hours a day, 7-days a week. The dredge is currently operating between Houston Ship Channel Light 127 (LLNR-25695) and Houston Ship Channel Light 133 (LLNR-25740). Dredged material will be transported in scows to the east side of Lost Lake where an offloading barge will pump dredge spoils inside the island. On-scene vessels will include the Dredge DB CATALINA, T/Vs CORRINE C., MABEL C., COLUMBIA, and KAREN KOBY, three scows, the Crew Boat MISS LEIGHTYN and MONICA C., a survey vessel, and an offloading barge. The dredge will work within the channel and may reduce the channel limits by approximately 150 ft. Vessels should coordinate with the dredge 30-minutes in advance. Mariners are urged to transit at their slowest safest speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channel: 81, POC: (619) 992-5392
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Barbours Terminal Channel - Marine Construction and Dredging --- From: 2025-04-07 To: 2027-07-01 --- Dredging and marine construction will be taking place along the Houston Ship Channel and the Barbours Terminal Channel, 24-hours a day, 7-days a week. Dredging and demolition will take place along Morgans Point and transition into concrete bulkhead construction. An additional bulkhead wall will be built along Spilmans Island. Dive operations may take place intermittently throughout the project. On-scene vessels will include the T/Vs MOONEY and EVERLINE, the Work Boat SCULLY, the Crane Barge CB01 and the Barge GD-2013. Mariners are urged to transit the area at their slowest safe speed, observe all day shapes and dive flags, and proceed with caution. VHF-FM Channels: 13 and 16
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2026-01-05 To: Until Further Notice --- Dock construction is being conducted along the Houston Ship Channel at City Docks 13 and 14. Operations will be conducted from 7:00 a.m. to 5:00 p.m., daily. Mariners should transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 12, 21 and 66A, POC: (713) 249-7118
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2025-09-04 To: Until Further Notice --- Dock construction is being conducted along the Houston Ship Channel at City Docks 20 and 21. Work will consist of demolishing and rebuilding of the fendering system and bulkhead construction. Workers will operate at the waterline and under the dock on skiffs. Divers may be present intermittently throughout the project. Mariners should transit the area with caution and at their slowest safe speed to minimize wake. POC: (832) 926-2215
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Barbours Terminal Channel - Dredge Operation --- From: 2025-12-19 To: Until Further Notice --- The Dredge GENERAL BRADLEY will conduct dredging along the Houston Ship Channel near the Barbours Cut flare. Work will take place from 6:00 a.m. to 6:00 p.m., 7-days a week. A submerged pipeline is crossing the channel near Houston Ship Channel Lights 91 (LLNR-24595) and 92 (LLNR-24600). The dredge will connect to the subline and pump material to the CM Land Booster located north of the Cedar Bayou Channel near Hog Island. Additional on-scene vessels may include the CM2006 Anchor Barge, the CM Land Booster Barge, and the T/Vs GUAM and CAPT BRENNAN. The dredge requests 1-hour advance notice for vessels entering/exiting the Barbours Terminal Channel due to floating pipeline crossing the channel entrance. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 20A and 68, POC: (912) 508-1351
Galveston Bay Entrance Channel - Houston Ship Channel/General/Miscellaneous	Miscellaneous	San Jacinto Bay Barge Channel - USI Canal - Aid to Navigation Discontinuation --- Reported: 2025-08-19 --- The private aids to navigation marking the San Jacinto Bay Barge Channel (USI Canal), from San Jacinto Bay Barge Channel Daybeacon 5 (LLNR-25120) to San Jacinto Bay Barge Channel Daybeacon 28 (LLNR-25200) have been discontinued. Vessels should avoid meeting or overtaking throughout the channel and should exercise extreme caution when transiting at night or during reduced visibility. Mariners accustomed to utilizing these private aids when navigating the San Jacinto Bay Barge Channel (USI Canal) should transit the area with caution.
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Morgans Point - VTS USI Canal/San Jacinto Bay Channel Directive --- The USI Canal/San Jacinto Bay Channel has become increasingly trafficked over the last 2 years. For various reasons, many tows attempt to reconfigure between Morgans Point and Exxon to go into or come out of the USI Canal. This practice has resulted in several near miss situations between Morgans Point and the Exxon Terminal in the Houston Ship Channel. In order to fulfill the VTS mission of reducing risk of collision, allision, damage, pollution, and injury, the following Directive is in effect and will be written as policy in documentation updates to the U.S. Coast Guard VTS Houston-Galveston User Guide: • Vessel Traffic Service Houston-Galveston Directs no barge work in the Houston Ship Channel between Morgans Point and Exxon for purposes of going into/out of the USI Canal. •
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Channel Dimensions Navigation Advisory (MSIB 11-25) --- The Houston Ship Channel dimensions have changed, impacting channel dimensions between Houston Ship Channel (HSC) Light 83 (LLNR-24535) and Houston Ship Channel Light 92 (LLNR-24600). The red side barge lane now ends at HSC Light 92. The green side barge lane remains the same, beginning at HSC Light 89 (LLNR-24565). Surveys have been successfully completed, extending the channel from Houston Ship Channel Light 83 to Houston Ship Channel Light 90 (LLNR-24575) to the following dimensions: 700 ft wide by 46 ft deep in the main channel and barge lanes measuring 235 ft wide by 12 ft deep on either side of the main channel. The aids to navigation along the Houston Ship Channel have been relocated based on the new channel dimensions. Mariners should proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) near HSC Lights 89/90. To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes. For additional information, mariners can contact the U.S. Coast Guard Sector Houston-Galveston Waterways Management Department at houstonwwm@uscg.mil.

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
New Orleans To Baton Rouge - Lower Mississippi River/General/MSIB	MSIB	Low Water Safety Advisory: Mile 167.0 To Mile 303.0, AHOP (12 ft and Falling) -- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued a low water safety advisory for all waters of the Lower Mississippi River (LMR) from Mile 167.0 to Mile 303.0, AHOP. This safety advisory is effective immediately with the following provisions, in accordance with the Waterways Action Plan Baton Rouge Annex: • LMR Miles 167.0 - 303.0: (1) Commercial vessel operators shall be aware of falling river-level conditions and monitor Coast Guard safety broadcasts announcing known navigation hazards. (2) Tow sizes and vessel drafts from cargo loading should be adjusted as necessary to meet decreasing channel depths. (3) Pilots and Masters of oceangoing vessels should review facility docking procedures prior to arrival in port. (4) All vessels should transit within the charted navigational channel, to the greatest extent possible. (5) All vessels should consider staffing vessels with their most experienced crews. (6) Missing aids to navigation should be reported to the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2209. • 81 Mile Point, LMR Miles 177.0 - 179.0: (1) In accordance with 33 CFR 161.65(e), all vessels moving or intending to move in the 81 Mile Point VTS Special area shall comply with the reporting requirements detailed in the VTS LMR User Manual or in 33 CFR 161.65 by contacting "New Orleans Traffic" on VHF-FM Channel 05A. (2) Mariners are advised of the increased possibility of shoaling in this area and should use extreme caution while transiting. • College Town Light, LMR Miles 225.0 - 228.3: (1) All towing vessels are advised to keep flat on the bank and provide a wide berth to deep-draft vessel traffic. General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mobile River - Dock Construction --- From: 2025-11-18 To: January 2026 --- Dock repairs and construction will be conducted along the Mobile River near River B. A 54 ft x 120 ft crane barge will be positioned riverside, while crews will work from a small pontoon moored alongside the barge. During daylight hours, the barge will sit perpendicular to the dock. After hours, the barge will be moored parallel with the dock. All vessels transiting this area should proceed at a slow bell and with caution. VHF-FM Channel: 13, POC: (228) 342-2742	Lat: 30° 42' 29" Lon: -088° 02' 23"
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mobile River - Marine Demolition --- From: 2026-01-08 To: 2026-03-08 --- Demolition and removal operations will be conducted along the Mobile River, at the MARRS Facility. Operations will include the removal of a 130 ft x 18 ft dry dock access ramp, ten associated steel pilings, a 165 ft x 3 ft walkway leading to the west mooring cell, four mooring dolphins and one mooring pile. Work will take place Monday through Saturday, from 7:00 a.m. to 4:00 p.m. Mariners are urged to transit the area with caution.	Lat: 30° 40' 24" Lon: -088° 02' 15"
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mobile River - Mobile Channel - Dredge Operation --- From: 2026-01-16 To: 2026-02-15 --- The Dredge FREDRICK PAUP will conduct maintenance dredging operations in the Mobile Harbor and the Upper Mobile Bay portions of the Mobile Channel. The dredge will transport dredged material to the Ocean Dredge Material Disposal Site, located south of Dauphin Island, AL. Mariners should coordinate passing arrangements with the dredge in advance and exercise extreme caution when transiting this area. VHF Channels: 13 and 16, POC: USACE (251) 957-6019	Lat: 30° 41' 10" Lon: -088° 02' 10"
General/Miscellaneous	Miscellaneous	Mobile River - Aids to Navigation Discrepancies --- Reported: 2025-11-03 To: Until Further Notice --- The U. S. Coast Guard has received reports of missing Inland Aids to Navigation (ATON) along the Mobile River. These aids have likely been displaced due to seasonal river conditions. Mariners are urged to exercise caution when transiting this area.	
Mobile Channel - Mobile River/General/Miscellaneous	Miscellaneous	Mobile River - Twelve Mile Island - Private Aid to Navigation Established --- On: 2025-02-21 --- Four danger marker lights with a flashing white light at night have been established along the LDB of the Mobile River near the Twelve Mile Island split.

New Orleans Port Arthur/General/Hazards To Navigation/Wrecks	Hazards To Navigation	Bayou Terrebonne - Partially Submerged F/V --- Reported: 2025-11-04 --- A fishing vessel has been reported partially submerged and partially obstructing the channel in Bayou Terrebonne, approximately .10 miles south of the GIWW intersection, near approximate position 29-35-55.6N 090-42-25.9W. The vessel is reportedly not marked. Mariners are urged to avoid this area.	Lat: 29° 35' 55" Lon: -090° 42' 26"
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Offloading Operation --- From: 2026-01-15 To: 2026-05-15 --- Material offloading will be conducted along the GIWW near approximate Mile 242.0, WHL. Hopper barges and tugboats will be in the area and operating 24-hours a day, 7-days a week. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. POC: (225) 347-4339 or (337) 519-2759	Lat: 30° 05' 07" Lon: -093° 19' 52"
New Orleans Port Arthur/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Atchafalaya River - Avoca Island Cutoff - Bayou Chene - Bayou Boeuf - Bayou Black - Dredge Operation --- From: 2024-12-09 To: 2026-03-31 --- The Dredge MIKE HOOKS and attendant plant will conduct dredging and disposal operations in the area, 24-hours a day, 7-days a week. Floating and submerged line will be in the project area connecting and leading to multiple disposal sites. All vessels requiring the majority of the channel to navigate safely should contact the dredge 1-hour in advance. VHF-FM Channels: 13 and 16, POC: (337) 485-5121 or (337) 909-9041	
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Devils Elbow - Staging Area --- From: 2025-11-24 To: 2027-02-15 --- A staging area for dredge pipe and equipment will be located along the GIWW, Mile 240.7, WHL. All pipe will be marked with buoys and lights. Mariners are urged to use caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made.	
General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	GIWW - Stone Placement --- From: 2025-11-22 To: 2026-02-15 --- M & C Oilfield Services will be placing stone along the north bank of the GIWW, between Miles 254.0 and 259.0, WHL. On-scene vessels will include tugboats and material barges. Vessels will operate in a zone approximately 65 ft north of the channel centerline and extend towards the north bank. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.	
New Orleans Port Arthur/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Subline Installation and Dredging --- From: 2026-01-31 To: 2026-02-07 --- Dredging/excavating will be conducted in the GIWW, between Miles 249.0 and 250.0, WHL, to facilitate the installation of a dredge subline beneath the channel. Work will start on the south side of the channel and progress to the north side of the channel. Coordinated channel closures and operating restrictions may be in place during the operation. Channel closures and re-openings will be announced via VHF-FM radio 30-minutes prior to, 15-minutes prior to, and at the time of the closure/re-opening. One-way traffic restrictions will be in place at all times for vessels within 1,000 ft of the work site. Work will take place from 6:00 a.m. to 6:00 p.m., daily, with the following additional channel restrictions: • Half of the channel will be obstructed on the side opposite of the current work area. • The channel will have an opening for vessels 75 ft or less in width. • Between 11:00 a.m. to 12:00 p.m., daily, dredging will pause and vessels exceeding 75 ft in width will be permitted to pass. • On-scene vessels and equipment will include a spud barge, a barge mounted excavator, the T/V ROSLYN, floating dredge pipe, a marsh excavator, and a crew boat. Project vessels will be restricted in their ability to maneuver. Mariners are requested transit the area with extreme caution at their slowest safe speed, arrange transits around the closure schedule, and coordinate passing arrangements with the project vessels. VHF-FM Channels: 13 and 16, POC: (630) 247-6207 or (630) 484-3270	
New Orleans Port Arthur/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Subline Installation --- From: 2026-01-24 To: 2026-02-07 --- Submerged pipeline will be placed on the north bank of the GIWW, between Miles 245.0 and 249.5, WHL. Barges and vessels are requested to avoid staging on north bank in this area.

New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Low Water Safety Advisory: Mile 0.0 to Mile 167.0, AHOP --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to 232.0, AHOP, when the Baton Rouge River Gauge reads 16 ft and below and the Carrollton Gauge reads 2.5 ft and below. Mariners are reminded the sailing line between Miles 0.0 and 232.0 follows a path through naturally deep water connected by twelve marked channels known as "crossings." Low water conditions have significantly reduced water depths in areas of the river outside the sailing line where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit. (1) Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water, to ensure the safe and efficient movement of vessels. (2) Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship's wake. (3) Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. (4) Aids to Navigation discrepancies should be reported to the Sector New Orleans Command Center. (5) Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. • Reporting: Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. • To see the National Weather Service Extended Streamflow Prediction for LMR please use the following link: https://forecast.weather.gov/product.php?site=NWS&issuedby=ORN&product=ESP&format=txt&version=1&glossary=0 • US Army Corps Navigation Conditions Surveys can be found at: https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/	Lat: 30° 01' 46" Lon: -090° 28' 29"
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Low Water Safety Advisory: Mile 167.0 To Mile 303.0, AHOP (12 ft and Falling) -- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued a low water safety advisory for all waters of the Lower Mississippi River (LMR) from Mile 167.0 to Mile 303.0, AHOP. This safety advisory is effective immediately with the following provisions, in accordance with the Waterways Action Plan Baton Rouge Annex: • LMR Miles 167.0 - 303.0: (1) Commercial vessel operators shall be aware of falling river-level conditions and monitor Coast Guard safety broadcasts announcing known navigation hazards. (2) Tow sizes and vessel drafts from cargo loading should be adjusted as necessary to meet decreasing channel depths. (3) Pilots and Masters of oceangoing vessels should review facility docking procedures prior to arrival in port. (4) All vessels should transit within the charted navigational channel, to the greatest extent possible. (5) All vessels should consider staffing vessels with their most experienced crews. (6) Missing aids to navigation should be reported to the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2209. • 81 Mile Point, LMR Miles 177.0 - 179.0: (1) In accordance with 33 CFR 161.65(e), all vessels moving or intending to move in the 81 Mile Point VTS Special area shall comply with the reporting requirements detailed in the VTS LMR User Manual or in 33 CFR 161.65 by contacting "New Orleans Traffic" on VHF-FM Channel 05A. (2) Mariners are advised of the increased possibility of shoaling in this area and should use extreme caution while transiting. • College Town Light, LMR Miles 225.0 - 228.3: (1) All towing vessels are advised to keep flat on the bank and provide a wide berth to deep-draft vessel traffic.	Lat: 30° 05' 31" Lon: -090° 54' 39"

New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	Mississippi River - Highway 190 Bridge - Low Water Advisory --- As a result of the Baton Rouge gauge expected to read 12 ft and continue to fall, the U.S. Coast Guard COTP New Orleans has issued the following low water safety advisory for the Upper Baton Rouge (HWY 190) Bridge: Mariners should refer to the U.S. Army Corps of Engineers' Lower Mississippi River Chart No. 73 which states, the Port Allen span is navigable when the Baton Rouge River gauge is above 15 ft. Current river levels do not support using this span.	Lat: 30° 30' 28" Lon: -091° 11' 51"

Sector Mobile, Submerged Land Act (SLA) - Pensacola Bay/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Pensacola Bay - Bayou Grande - Davenport Bayou - Dredge/Marsh Restoration Operation --- From: 2025-04-01 To: 2026-02-21 --- Hydraulic dredging operations will be conducted in Pensacola Bay, at the mouths of Bayou Grande and Davenport Bayou. A 1,350 ft access channel will be created to facilitate rock barge operations. Dredged material will be transported via pipeline to marsh fill areas for the creation of eight marsh islands and 33.64 acres of marsh planting. Additional project activities will include the construction of five breakwaters, ranging from 259 ft to 366 ft in length, the placement of 14 rock piles, and the construction of five submerged rock reefs, ranging from 276 ft to 438 ft in length, for habitat restoration and navigational safety enhancements. Eight danger markers will be installed to mark the project work zones. Work will take place during daylight hours only. Vessels are requested to maintain a safe distance from the dredge, pipelines and support vessels. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with extreme caution. VHF-FM Channels: 13 and 16	Lat: 30° 22' 34" Lon: -087° 16' 06"

General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Port Mansfield Channel - Shoaling --- Reported: 2025-03-12 --- Extreme shallow water and shoaling has been reported throughout the Mansfield Cut/Port Mansfield Channel. Mariners should exercise caution when navigating through this area and pay close attention to tide levels when departing and returning through the cut.	
Sector Corpus Christi, Submerged Land Act (SLA) - Port Mansfield Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Port Mansfield Channel - Dredge Operation --- From: 2026-01-19 To: 2027-02-11 --- The Dredges GENERAL BRADLEY and GENERAL MARSHALL will conduct dredging operations in the Port Mansfield Channel, from just east of the jetties, through the entire inland portion of the Port Mansfield Channel, and into the Port Mansfield Harbor. The Dredge GENERAL MARSHALL will start working near Port Mansfield Channel Daybeacon 18 (LLNR-29360) with anchors set on either side of the channel. A combination of steel and HDPE pipeline will be used with floating rubber hose, floating pipe, submerged pipe and shore pipe leading to the placement areas at Bird Island and along the Padre Island Beach. Submerged pipelines will be placed across the channel in locations that provides sufficient depth and will be marked with lights and buoys. No fishing or trolling activities should take place along or within the area of pipeline, to avoid damage to nets, vessels, and the dredge equipment. Mariners are requested to coordinate passing arrangements 1-hour in advance and transit the area with extreme caution. VHF-FM Channels: 13 and 79, POC: Dredge (409) 739-6508

General/Miscellaneous	Miscellaneous	Alabama River - In accordance with Section 7-11 of the ACT Master Water Control Manual dated April 2022, full navigation channel availability on the Alabama River is dependent upon seasonal flow conditions and channel maintenance. Based on a profile survey conducted on 04JUN2024, a 10 ft tailwater elevation at Claiborne Lock is required to provide a 9 ft channel on the Alabama River to Montgomery, AL. A modified depth of 7.5 ft can be provided with a tailwater elevation of 8.5 ft at Claiborne Lock. The tailwater elevations at Claiborne have been consistently below the 8.5 ft elevation, providing a modified navigation depth due to no substantial rainfall events impacting the ACT Basin. Channel availability is typically higher during the months of December through May; however, with the seasonal outlook for the winter expected to be mild, below normal conditions may persist. Water Management provides multiple weekly Claiborne tailwater forecasts to stakeholders for navigation and other purposes. To be added to the distribution list for the Alabama River forecasts, mariners can contact: water-sam@usace.army.mil. Tailwater elevations below Claiborne Lock and Dam can be viewed at the following web address: https://waterdata.usgs.gov/monitoring-location/USGS-02428401	Lat: 31° 36' 54" Lon: -087° 33' 06"
General/Miscellaneous	Miscellaneous	Gulf of America - Aquaculture Platform Installation --- From: 2025-11-24 To: 2029-08-30 --- An aquaculture platform with a mooring system will be deployed as a temporary demonstration project in approximate position 30-12-06.73N 087-57-53.89W. The platform will feature yellow lights at night, with yellow mooring buoys deployed nearby marking the subsea moorings. Occasionally, the Vessel SPINNER will be on site for feeding and aquaculture operations. Mariners are urged to transit the area with caution. POC: (256) 415-3534	

Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Mississippi Sound - Gulf of America - Autonomous Vessel Testing --- From: 2026-02-02 To: 2026-02-13 --- The crewed autonomous vessel R/V SEA INNOVATOR will run daily tests in the Mississippi Sound and Gulf of America. Operations will take place east of the Gulfport Ship Channel, extend east towards Biloxi, MS, and south to the Ship Island Pass to Horn Island Pass Safety Fairway. Small craft vessels may be present in the operating area throughout the tests. Mariners are requested to transit the area with caution. VHF-FM Channel: 16	
General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2025-09-03 To: 2026-02-28 --- The U.S. Navy will operate an unmanned surface vehicle (USV) towing underwater equipment in the Gulf of America, in the offshore waters of Panama City Beach, FL. The operating area will be bound by approximate positions: 30-07-58.59N 085-55-19.54W, 30-07-58.63N 085-50-42.76W, 30-03-56.30N 085-50-42.75W and 30-03-56.27N 085-55-19.44W. Two U.S. Naval support vessels will be on-scene during the USV operation. Mariners should maintain a wide berth from all U.S. Naval craft and are requested to avoid the area. VHF-FM Channel: 16

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Tennessee-Tombigbee River - Shoaling/Channel Restrictions --- Reported: 2025-10-01 --- Shoaling has developed near the center of the navigation channel at Mile 262.9, Demopolis Lake. The shoal is located adjacent to the contract barge loading area at disposal area D33. The channel is restricted from the left descending bank to the channel centerline, with average depths less than 9 ft. The navigation channel is 215 ft wide with full project depth from the centerline to the right descending bank. Virtual aids to navigation have been posted to electronic navigation charts. Traffic is requested to navigate this area with caution due to channel restriction and barge loading activities. POC: (662) 245-5486	
Tennessee Tombigbee River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Tennessee-Tombigbee River - Placement Area Maintenance --- From: 2025-09-23 To: 2026-02-10 --- Maintenance will be conducted at the placement areas located along the Tennessee-Tombigbee River, Mile 263.0, Demopolis Lake. Placement area material will be removed from the site by vessels along the river access points. Work is not expected to interfere with commercial traffic. Mariners should transit this area with caution. POC: (662) 245-5500	
Tennessee Tombigbee River/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Tennessee-Tombigbee River - Lock Closures --- From: 2026-01-26 To: 2026-01-28 --- All ten locks located on the Tennessee-Tombigbee River will be open during daylight hours only for the next two days. Machinery and electronics systems issues are causing unreliable lock operations due to extreme weather conditions. This situation creates an unsafe operating environment for the user and the operator. The locks will be closed during the following times and will return to normal service once the temporary closures have expired: • 6:00 p.m., 26JAN2026 - 6:00 a.m., 27JAN2026 • 6:00 p.m., 27JAN2026 - 6:00 a.m., 28JAN2026 • For additional information, mariners can contact the USACE at (662) 245-5500.
