SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtfts, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: 02-19

WESTERN RIVERS FLOATING AIDS TO NAVIGATION

The U.S. Coast Guard is responsible for placing and maintaining all aids to navigation. Buoys are set to mark project depths taking into consideration the prevailing river stages and obstructions. Buoy positions on the Inland Electronic Navigation Chart (IENC) are approximate, and subject to change depending on prevailing river stages and obstructions.

Buoys should always be given as wide a berth in passing as possible, consistent with the length and width of the vessel or tow and the width of the bend or crossing.

Buoys should always be used with caution. They may be carried off position by high water, accumulation of drift, ice, or sunk by collision or other causes. In those circumstances buoy marks will remain on the IENC and indicate the last known position of the buoy. Presence of a buoy mark on the IENC does not necessarily mean a buoy will be physically on position. When buoys are missing they will be replaced as soon as possible.

LNM: 16-19

GPS TESTING

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

LNM: 07-19

HIGH/LOW WATER FLOW CONDITIONS

During periods of high/low water flow conditions on the Mississippi River System, Captains of the Port, will issue Safety Advisories for their specific areas of responsibility via Broadcast Notice to Mariners. Mariners are encouraged to monitor the Sector Broadcast Notice to Mariners to ensure they are receiving the most up-to-date information.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: <https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>.

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LNM: 10-21

UPPER MISSISSIPPI RIVER/ILLINOIS WATERWAY - BARGE/RAIL COLLISION RISK

Attached as an enclosure to this LNM is U.S. Coast Guard Sector Upper Mississippi River MSIB 08-21, regarding barge/rail collision risk on the Upper Mississippi River and Illinois Waterway.

LNM: 15-23

SAFETY NOTICE - NAVIGATIONAL RANGE AND SECTOR LIGHTS ON NOAA ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that the Range and Sector Light Characteristic labels are not displayed on Electronic Navigational Charts (ENCs) when used in an Electronic Chart Display and Information System (ECDIS), due to limitations of the S-52 ECDIS, display specification. Mariners may query the ENC data directly within ECDIS or refer to the Light List for complete information on Range and Sector Light Characteristics.

LNM: 39-22

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

U.S. COAST GUARD

Sector Upper Mississippi River

November 22, 2021

Marine Safety Information Bulletin # 08-21

This bulletin is used purely for informational purposes to assist the maritime community within the Sector Upper Mississippi River Area of Responsibility. Its purpose is to advise relevant parties of emerging information and situations that may impact our Marine Transportation System as well as to facilitate cooperation among the involved parties regarding actions that we may be taking and/or that you may need to employ in the interest of safety/security.

Barge/Rail Collision Risk

This bulletin is in effect from November 22, 2021 until cancelled by the Captain of the Port.

Sector Upper Mississippi River (UMR) received multiple reports of barges encroaching on railroad right of ways (tracks, rail beds) in 2019. This was further documented in Sector UMR MSIB 01-20 and the Waterway Action Plan (WAP). Approximately 45 known areas on the UMR and Illinois River pose a risk for barge/rail collisions due to the close proximity between the rail right of ways and the river bank. Where rails are located near the river's edge, vessels are able to push in to an extent that part of the vessel/tow is in dangerous proximity to the rail. Barge encroachment poses a serious risk to both vessels, trains, crews, the environment, and nearby communities. On November 14, 2021, during normal water conditions, an incident between rail and barge resulted in a train derailment, oil spill, and damage to rail and vessel equipment.

This risk can be mitigated by vessel operators being vigilant when selecting where they push vessels into the river bank during all water conditions. The approximately 45 known areas of concern (see attached consolidated graphic) are marked with caution areas on both printed and electronic versions of the Inland River Electronic Navigation Charts (IENC). These caution areas are accompanied by a warning noting the risk of collision between trains and vessels, and/or rail bed embankment erosion due to the close proximity between the railroad tracks and the waterway.

Sector UMR urges all vessel operators to review the IENC and the WAP for their intended operating areas to identify river bank locations to avoid pushing in at, as well as other potential hazards, as part of their voyage planning procedures prior to operation.

Operators are reminded that Title 33 Code of Federal Regulations (CFR) § 207.300(m)(2)(ii) directly prohibits the mooring of craft directly to railroad tracks or the riverbank in vicinity of railroad tracks. Violation of this regulation can result in enforcement action being taken against the operator's Merchant Mariner Credential as well as a civil penalty against the operating company.

To receive the latest information, mariners should monitor marine VHF channels 14 and 16, and the Sector UMR Port Directory at [https://homeport.uscg.mil/port-directory/upper-mississippi-river-\(st-louis\)](https://homeport.uscg.mil/port-directory/upper-mississippi-river-(st-louis)) for this and other MSIBs and port advisories. Hazardous conditions and marine casualties should immediately be reported to the Western Rivers Command Center via VHF channel 16 or by phone at (314) 269-2332 or (314) 269-2463 – these numbers are continuously monitored 24 hours a day. Questions about this MSIB may be directed to the Waterways Management staff at sumrwaterways@uscg.mil.
