Lower Old River - Atchafalaya River/General/Bridges/Temp Deviation	Bridges	Atchafalaya River - Bridge Repairs --- From: 2025-09-02 To: 2026-06-30 --- The Krotz Springs Railroad Bridge crossing the Atchafalaya River, Mile 41.5, is undergoing repairs to the swing span and eastern fixed span of the bridge. While repairs are conducted, the Union Pacific Railroad Drawbridge will have scheduled closures and operational deviations (see below for the 2026 schedule). The western fixed spans of the bridge will remain open for vessel traffic throughout construction. The bridge operator can be contacted at (337) 566-3713 or on VHF-FM Channel 13. The bridge will operate with the following schedule: • 01JAN2026 – 30JUN2026: 6-hours notice will be required for vessels transiting the area between 6:30 p.m. and 6:30 a.m., the following day. The bridge will operate as normal between 6:30 a.m. and 6:30 p.m. Mariners are urged to plan accordingly and transit the area with caution.	Lat: 30° 32' 20" Lon: -091° 44' 46"
Lower Old River - Atchafalaya River/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Atchafalaya River - Stouts Pass - Channel Conditions --- Reported: 2026-05-22 --- Shoaling has been reported in the vicinity of Stouts Pass, Atchafalaya River Miles 113.0 to 117.0. While the Stouts Pass navigation channel is open to all vessel traffic without restrictions, mariners are urged to use extreme caution for tows drafting more than 9 ft. The U.S. Coast Guard has been notified of 5 groundings in the last 2 weeks on the Right Descending Bank at Mile 116.0. Mariners are reminded that Little Island Pass, Middle Island Pass, and Riverside Pass remain closed to commercial vessel traffic due to active underwater exposed pipelines and shallow water. Conducting proper navigation assessments/voyage planning is critical for mariners to be aware of known hazards that may be encountered during a voyage. Mariners are encouraged to contact U.S. Coast Guard Vessel Traffic Service (VTS) Berwick Bay at Mile 110.0 on the Atchafalaya River for assistance with navigation conditions. The U.S. Coast Guard sets advisories based on the information obtained from the hydrographic surveys conducted by the U.S. Army Corps of Engineers. Hydrographic surveys show water depths at the time of the survey. It should be noted the river condition changes daily. USACE surveys should be considered during voyage planning and can be found under, Missions > Navigation > Channel Surveys, at the following website: https://www.mvn.usace.army.mil/ . All mariners transiting through Morgan City should report any hazards to navigation to U.S. Coast Guard Marine Safety Unit Morgan City Waterways Management Division at (985) 397-3300 or VTS Berwick Bay at (985) 380-5322.	
Atchafalaya Channel - Atchafalaya River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Atchafalaya River - Berwick Bay Harbor - Dredge Operation --- From: 2026-06-08 To: 2026-06-30 --- The Dredge CAPTAIN FRANK will be working in the Atchafalaya River Channel in Berwick Bay, between Miles 119.5 and 121.0. The dredge will work 24-hours a day, 7-days a week. Pipeline and equipment will be located along the LDB between the Conrad Dock and the SR Railroad Bridge. A staging area will be located along the RDB, near the Berwick Lock Forebay Channel. Dredged material will be disposed of in open water into a sandpit location in approximate position 29-43-03.05N 091-12-52.88W. Various work/support vessels and pipeline associated with this dredging operation will be in the project area. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (224) 277-1566 or (504) 858-5308	
Atchafalaya Channel - Atchafalaya River/General/Miscellaneous	Miscellaneous	Atchafalaya River - Bayou Chene - Bayou Black - Dead Ship Tow --- On: 2026-06-25 --- Commencing at 6:00 a.m., the DRY DOCK 7 will be dead ship towed by the T/V MARS LOKI through the Atchafalaya River, Bayou Chene and Bayou Black, ending at the MARS Recycling Facility in Gibson, LA. Vessels should coordinate passing arrangements with the towing vessels in advance and transit with caution in the vicinity of the tow. For further information, mariners can contact the U.S. Coast Guard Morgan City Waterways Management Division at (985) 397-3300.	
Lower Old River - Atchafalaya River/General/Miscellaneous	Miscellaneous	Atchafalaya River - Little Island Pass - Stouts Pass - Temporary ATON Discontinuation --- Reported: 2026-05-18 --- Little Island Pass has undergone a phased discontinuation as a transitable waterway. The pass is utilized as a dredged material placement area and has extremely shallow water. The two temporary white buoys at the north and south entrances to Little Island Pass have been permanently removed from the waterway. Two virtual AIS aids to navigation will remain in the area until July 20, 2026. Mariners are advised that the water depths for Little Island Pass may not be accurately reflected on the NOAA ENCs. Little Island Pass should not be utilized by any vessel. Mariners are urged to follow the federally marked channel through the Atchafalaya River/Stouts Pass when transiting the area.

Work will take place from 6:00 a.m. to 6:00 p.m., on a 12-days on and 2-days off rotation. On-scene vessels will include the T/V MUDD TUG 15, the Crane Barge RG415, and the Deck Barges MC-1 and MC-4. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution. VHF-FM Channel: 13, POC: (337) 391-9296	Lat: 29° 47' 34" Lon: -093° 19' 24"
Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Calcasieu Channel - Material Offloading --- From: 2026-03-15 To: 2027-03-15 --- Material offloading will be conducted along the west side of the Calcasieu Channel near Mile 0.3. On-scene vessels will include hopper barges and towing vessels. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. POC: (337) 247-1071 or (337) 519-1163	Lat: 29° 46' 20" Lon: -093° 20' 49"
Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Calcasieu Channel - Calcasieu Loop - Dredge Operation --- From: 2025-01-25 To: 2027-02-01 --- The Dredges GENERAL ARNOLD and GENERAL BRADLEY will be conducting dredging along the Calcasieu Channel near the Calcasieu Loop. The dredge will operate along Monkey Island and pump dredged material via subline to the Booster Barge CAL 2109, located in the northeast portion of the Calcasieu Loop. A combination of steel and HDPE pipeline, floating rubber hoses, submerged pipe and shore pipe will be used in the project area. Additional on-scene vessels will include the T/Vs CHARLES J. CENAC and GYSGT BASILONE, Barge CALLAN 2111, Anchor Barge CALLEN 2104, Crane Barge CBR768, Survey Vessel CONSTITUTION I, and the Crew Boat LOWYNN MARIE. Vessels are requested to avoid fishing or trawling within the area of the dredge pipeline, to avoid damage to nets, vessels, and project equipment. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution. VHF-FM Channel: 13, POC: (630) 207-5196	

Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Calcasieu Channel - GIWW - Dredge Operation --- From: 2026-03-10 To: 2026-09-26 --- The Dredge OHIO will be dredging along the Calcasieu River near the intersection with the GIWW, approximate River Mile 22.5, for the Louisiana Woodside LNG project. Approximately 8.5 miles of pipeline and booster pumps have been installed and staged from the dredging area along the Calcasieu Channel, routed through Choupique Bayou, and into the GIWW, along the northern edge and outside of the navigable limits. Floating and submerged pipelines along with a series of Boosters are located between GIWW Miles 241.0 and 252.0, WHL. A subline crossing is located between GIWW Miles 249.0 and 250.0, WHL, near the Booster ERIN. On-scene vessels include the Boosters TEXAS JR, JESSIE, BUSTER, REGGIE, CAPTAIN BARNEY, and ERIN C, Anchor Barges 112 and 120, Derrick Barges 66 and 72, T/Vs SMITH BUCCANEER, KJ LEBOEUF, CAPTAIN EDDIE, and EMILY A HERBERT, and the Crew Vessels TARPON 1, TARPON 3, JOHN NEWMAN, and COLUMBIA RIVER. All dredge pipeline will be marked with buoys and lighted accordingly. Barges and vessels are requested to avoid staging on the north side of the GIWW between the project limits. Mariners are urged to use caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (630) 247-6207	
Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Calcasieu Channel - Material Offloading --- From: 2026-06-01 To: 2027-06-30 --- Material offloading will be conducted along the Calcasieu Channel in the vicinity of Mile 23.0, RDB. Work will take place Monday through Saturday, during daylight hours. On-scene vessels will include the T/V REPENTANCE, deck barges, and hopper barges. Mariners are requested to transit the area at their slowest safe speed to minimize wake or wash, and proceed with caution between Miles 22.0 and 23.0 due to LALNG Marine Construction activities. South Pass - Head Of Passes To New Orleans/General/LAA/RNA/Security Zone	LAA/RNA	Mississippi River - Southwest Pass - Security Zone --- From: 2026-05-24 To: 2026-06-01 --- To ensure security for visiting vessels during the Sail 250 New Orleans events, the Captain of the Port (COTP) New Orleans has designated all Sail 250 participating vessels as Vessels of Particular Interest or U.S. Naval Vessels. Under the authority of the Ports and Waterways Safety Act (USCG-2026-0592), the COTP is enforcing moving Security Zones around these vessels from 12:01 a.m., on May 24, 2026, through 11:59 p.m., on June 1, 2026. These moving Security Zones apply to all navigable waters from the Southwest Pass Entrance Lighted Buoy SW (LLNR-12680) to Mississippi River Mile 96.0, AHOP. All vessels and spectators are strictly prohibited from entering the following areas unless explicitly granted permission: • Within a 500-yard radius of U.S. Naval Vessels. • Within a 300-yard radius of all Vessels of Particular Interest. Vessels requesting permission to transit through these moving zones must contact the pilot onboard a Vessel of Particular Interest/U.S. Naval Vessel to make passing arrangements. A full list of all Sail 250 New Orleans participating vessels can be found at: www.sail250neworleans.com. For additional information, mariners can contact one of the following U.S. Coast Guard Departments: Vessel Traffic Service-LMR (24 Hour): (504) 365-2514 or VHF-FM Channels 1005 (05A), 12, or 67, Sector New Orleans Command Center (24 hour): (504) 365-2545, or Sector New Orleans Waterways Management: WWMNOLA@uscg.mil

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Galveston Bay Entrance Channel - Houston Ship Channel/General/Bridges/Construction	Bridges	Houston Ship Channel - Bridge Construction --- From: 2025-07-24 To: 2026-11-01 --- The Harris County Toll Road Authority (HCTRA) and a contractor will commence over-the-water construction of the new Beltway 8 (Sam Houston Tollway Ship Channel Bridge) over the Houston Ship Channel. Overhead construction on areas outside the navigable channel will continue through approximately July 2026. The U.S. Coast Guard Captain of the Port Houston-Galveston has established Safety Zones for the waters outside the federal channel surrounding the existing pillars. Vessels transiting this area are directed to utilize the marked federal channel and should remain clear of transiting beneath the overhead work. Channel closures to support work over the federal channel are expected to commence July 2026. Overnight closures, likely in the 8 to 10 hour range, every other night for a week will be needed. Following a round of overnight closures, the U.S. Coast Guard VTS will schedule 2-3 hour blocks of no traffic in daylight hours to allow for deck placement. A pattern of these closures are expected to continue for 3-4 months. Additional planning meetings focused on minimizing disruptions will be held with Port Partners as the closure dates approach. Mariners are urged to transit this area with extreme caution and check updated notices regarding closures prior to transiting the area.	Lat: 29° 44' 10" Lon: -095° 08' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Houston Ship Channel - Shoaling --- Reported: 2024-12-11 To: Until Further Notice --- Shoaling has been reported in the Upper Houston Ship Channel, reducing water depths from the red side of the channel to the center line, between the Texas Beltway 8 Toll Bridge and a quarter mile above Houston Ship Channel Light 146 (LLNR-25790). Deep draft vessels are advised to proceed with caution. Vessels with a draft of 35 feet or greater should avoid the red side of the channel in this area. USACE surveys can be found at the following: https://www.swg.usace.army.mil/Missions/Navigation/Hydrographic-Surveys/	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2026-06-03 To: 2026-11-13 --- Construction for a new barge dock will take place along the Houston Ship Channel near Houston Ship Channel Lighted Buoy 145 (LLNR-25785.01). Operations will be conducted 10-hours a day, 5-days a week. On-scene vessels will include two 150 ft x 60 ft crane barges, two material barges, four towing vessels, and a work raft. Mariners are urged to transit the area with caution. VHF-FM Channel: 16	Lat: 29° 44' 04" Lon: -095° 08' 28"
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	Houston Ship Channel - Survey Operation --- From: 2026-06-15 To: 2026-07-06 --- The R/V KOACH KLINE will conduct geophysical surveys in the Houston Ship Channel near Brady Island in approximate position 29-43-38.51N 095-16-29.76W. Work will take place daily, during daylight hours. Research vessels will be restricted in their maneuverability due to the use of side scan sonar, a sub-bottom profiler, a magnetometer, and multi beam equipment. Mariners are urged to transit with caution and at their slowest safe speed to minimize wake in the vicinity of the survey vessels. Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Barbours Terminal Channel - Marine Construction and Dredging --- From: 2025-04-07 To: 2027-07-01 --- Dredging and marine construction will be taking place along the Houston Ship Channel and the Barbours Terminal Channel, 24-hours a day, 7-days a week. Dredging and demolition will take place along Morgans Point and transition into concrete bulkhead construction. An additional bulkhead wall will be built along Spilmans Island. Dive operations may take place intermittently throughout the project. On-scene vessels will include the T/Vs MOONEY and EVERLINE, the Work Boat SCULLY, the Crane Barge CB01 and the Barge GD-2013. Mariners are urged to transit the area at their slowest safe speed, observe all day shapes and dive flags, and proceed with caution. VHF-FM Channels: 13 and 16	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Bayport Ship Channel - Dredge Operation --- From: 2026-05-01 To: 2026-10-01 --- The Dredge MAGDALEN will be working in the Houston Ship Channel and Bayport Flare, between Houston Ship Channel Light 50 (LLNR-24125) and Houston Ship Channel Light 92 (LLNR-24600). The T/V BREAK OF DAWN will conduct drag bar operations in the Bayport Flare work area through June 30, 2026. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be deposited in the ocean dredged material disposal site (ODMDS) charted west of the Galveston Entrance Channel. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (985) 237-9667 or (985) 705-1477	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dredge Operation --- From: 2026-05-08 To: Until Further Notice --- The Dredge CONSTELLATION is working in the Houston Ship Channel from the Barbours Terminal Channel to the Lynchburg Ferry Landing. The dredge is currently working between Houston Ship Channel Light 116 (LLNR-25390) and Houston Ship Channel Light 118 (LLNR-25425). Operations will be conducted 24-hours a day, 7-days a week. Staged floating pipeline is located outside of the channel in vicinity of Houston Ship Channel Light 126 (LLNR-25515) and subline has been laid across the bottom of the San Jacinto River. The dredge will utilize floating pipe and subline to discharge dredged material to placement sites at Alexander Island and Lost Lake. Additional on-scene vessels include the T/Vs DAVID LUNDIN, CHARLIE B, and COMMODORE, a supply barge, two anchor barges, a crane barge, the Crew Boat CHAMPION, and the Survey Vessel GALILEO. The dredge will swing into the channel to conduct in channel work and requests no meeting or overtaking and wake/surge considerations in the area. Additionally, tows are requested to coordinate with the dredge 30-minutes in advance and ships are requested to coordinate 1-hour in advance. Mariners are urged to transit the area with caution. VHF-FM Channels: 13, 17 and 79, POC: (713) 913-7208	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Houston Ship Channel - Dock Construction --- From: 2025-09-04 To: Until Further Notice --- Dock construction is being conducted along the Houston Ship Channel at City Docks 20 and 21. Work will consist of bulkhead construction and the demolishing and rebuilding of the fendering system. Operations will be conducted Monday through Friday. Workers will operate at the waterline and under the dock on skiffs. Divers may be present intermittently throughout the project. Mariners should transit the area with caution and at their slowest safe speed to minimize wake. POC: (832) 926-2215	
Galveston Bay Entrance Channel - Houston Ship Channel/General/Miscellaneous	Miscellaneous	San Jacinto Bay Barge Channel - USI Canal - Aid to Navigation Discontinuation --- Reported: 2025-08-19 --- The private aids to navigation marking the San Jacinto Bay Barge Channel (USI Canal), from San Jacinto Bay Barge Channel Daybeacon 5 (LLNR-25120) to San Jacinto Bay Barge Channel Daybeacon 28 (LLNR-25200) have been discontinued. Vessels should avoid meeting or overtaking throughout the channel and should exercise extreme caution when transiting at night or during reduced visibility. Mariners accustomed to utilizing these private aids when navigating the San Jacinto Bay Barge Channel (USI Canal) should transit the area with caution.	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Morgans Point - VTS USI Canal/San Jacinto Bay Channel Directive --- The USI Canal/San Jacinto Bay Channel has become increasingly trafficked over the last 2 years. For various reasons, many tows attempt to reconfigure between Morgans Point and Exxon to go into or come out of the USI Canal. This practice has resulted in several near miss situations between Morgans Point and the Exxon Terminal in the Houston Ship Channel. In order to fulfill the VTS mission of reducing risk of collision, allision, damage, pollution, and injury, the following Directive is in effect and will be written as policy in documentation updates to the U.S. Coast Guard VTS Houston-Galveston User Guide: • Vessel Traffic Service Houston-Galveston Directs no barge work in the Houston Ship Channel between Morgans Point and Exxon for purposes of going into/out of the USI Canal. •	
Galveston Bay Entrance Channel - Houston Ship Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	In order to provide a more efficient and effective Aids to Navigation signal, the Coast Guard is proposing the following Aid to Navigation Change: Change Houston Ship Channel Lighted Buoy 26 (23960) in approximate position 29-22-08.394N/094-47-59.235W to a Synthetic AIS Aid with assigned MMSI 993682061. Comments will be taken until July 09, 2026. Please email comments regarding this proposal to: D08-SMB-District-LocalNoticeFeedback@uscg.mil	Lat: 29° 22' 08" Lon: -094° 47' 59"

Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Inner Harbor Navigation Canal - GIWW - Lock Schedule --- Reported: 2026-05-30 --- The Inner Harbor Navigation Canal Lock will be closed to marine traffic from 11:00 p.m. to 6:00 a.m., daily, and open to all vessel traffic from 6:00 a.m. to 11:00 p.m., each day. Mariners should plan accordingly and can monitor lock status updates at the following website: https://www.mvn.usace.army.mil/LockStatus/ , or by calling the Lockmaster at (504) 945-2157.	Lat: 29° 57' 55" Lon: -090° 01' 37"
Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Inner Harbor Navigation Canal - GIWW - Sewer Line Repairs and Dive Operations --- From: 2026-04-20 To: Until Further Notice --- The damaged sewer main that was discharging sewage into the Gulf Intracoastal Waterway has been temporarily repaired. While the immediate health threat has been mitigated, the sewer main is currently undergoing a multi-week repair process. Daily daylight dive assessments of the damaged sewage line are being conducted, from 8:00 a.m. to 7:00 p.m. Divers will access the work location from shore and will need an approximate 70-foot work area from the bank. The dive operations will take place in approximate position 29-58-49.18N 090-01-21.60W. The U.S. Coast Guard Captain of the Port New Orleans lifted the Emergency Safety Zone in the area; however, the COTP recommends all vessels transit at their slowest safe speed and avoid meeting or overtaking between GIWW Miles 6.5 and 10.0, EHL. The on-scene dive operations supervisor may be contacted via VHF-FM Channel 67 or at (985) 273-1756. For further information, mariners can contact the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2545 or the Waterways Management Division at wmmnola@uscg.mil .	
General/Miscellaneous	Miscellaneous	Inner Harbor Navigation Canal Lock - USACE Navigation Bulletin Reissue --- * MARINERS ARE ADVISED THAT THIS POLICY NOTICE FOR THE INNER HARBOR NAVIGATION CANAL (IHNC) LOCK REMAINS IN EFFECT INDEFINITELY. * Due to the limited mooring space between the Florida Avenue Bridge and the Inner Harbor Navigation Canal Lock, it is required that all tows contact the Lock on VHF-FM Channel 14 for locking information prior to navigating through the Florida Avenue Bridge. Towboat Captains are reminded that if a tow has to be broken for locking operations, this shall be done prior to coming through the Florida Avenue Bridge and the barges shall not be left unattended in the canal for any reason. Towboat Captains must use the mooring buoys and tend the wheelhouse at all times. To prevent bank erosion, Tow Captains are also reminded not to push the head of their tow into the banks on the river or canal end of the lock for any reason while waiting for their locking. The Lockmaster, Richard McKinzie, can be reached at 504-945-2157. The points of contact with the New Orleans District are Robert Swayze at 504-862-2060, Jesse Adams at 504-862-1061 and Brandon Keck at 504-862-2630.	Lat: 29° 57' 53" Lon: -090° 01' 38"

Mobile Channel - Mobile River/General/Bridges/Temp Deviation	Bridges	Three Mile Creek - Bridge Remote Testing --- From: 2026-06-22 To: 2026-09-14 --- The U.S. Coast Guard will be conducting tests on the CSX Railroad Drawbridge across Three Mile Creek, near the Telegraph Road Bridge. During the tests, CSX will operate the drawbridge remotely from the CSX Train Yard located in Mobile, AL. The bridge will be manned and can be operated onsite, if necessary. These tests will evaluate CSX's capabilities to operate drawbridges from remote locations. Mariners will continue to contact each bridge to signal openings according to the regulations and procedures already set. The Coast Guard will publish a Notice of Proposed Rulemaking (NPRM) in the Federal Register for each tested bridge. Mariners and the public can make comments on these tests through the Federal Register at: www.regulations.gov	Lat: 30° 43' 26" Lon: -088° 03' 33"

Head Of Passes To New Orleans - New Orleans Harbor/General/MSIB	MSIB	MSIB Vol XXVI Issue 017 - Mississippi River - Carrollton Gauge at 8 Ft and Rising --- From: 2026-06-05 To: Until Further Notice --- When the Carrollton Gauge reads 8 ft and rising, the following operating requirements will be in effect: • For all vessels operating in the Lower Mississippi River below Mile 233.9, AHOP, including South Pass and Southwest Pass, additional high-water requirements are found in 33 CFR 165.810. • All deep draft vessels, including ocean-going towing vessels, should have three means of holding position unless moored to shore or a mooring buoy. These vessels are strongly advised to be equipped with a fitted anchor if carrying or intending to carry any dangerous cargo. If no anchor is fitted, vessels should pre-arrange fleet space prior to entering the river, if not proceeding directly to berth or unable to be pushed into the bank. The use of at least one assist/escort tug with suitable horsepower and capability is strongly encouraged for vessels without a fitted anchor. • Downbound ocean-going towing vessels towing on the hawser should consult with the appropriate pilot association to determine the need for assist tugs. • A "tail" tug is recommended when towing loaded barges and dead ships southbound in Southwest Pass. • Tandem tows northbound and southbound are strongly discouraged. A tandem tow is such that more than one barge or vessel is being towed independently from astern a single towing vessel. • Towing vessels should review MSIB Vol XIX Issue 007 titled Towing Vessel Safety Advisory During High Water, issued January 15, 2019, for additional provisions. This referenced MSIB is attached and is also available on the WWM NOLA Linktree: https://linktr.ee/WWMNOLA . • When the Carrollton Gauge reads 9 ft and falling, the above operating requirements are no longer in effect. For further information, mariners can contact the following: Vessel Traffic Service (24-hours): (504) 365-2514, VHF-FM Channels 1005, 12, or 67, or the U.S. Coast Guard Sector New Orleans Command Center (24-hours): (504) 365-2545. Head Of Passes To New Orleans - New Orleans Harbor/General/MSIB	MSIB	MSIB Vol XXVI Issue 017 - Mississippi River - Algiers Point VTS Special Area - Vessel Operating Requirements --- From: 2026-06-05 To: Until Further Notice --- When the Carrollton Gauge reads 8 ft and rising, the following operating requirements will be in effect, in addition to the requirements contained in 33 CFR 161.13, and apply to vessels transiting through or within the Algiers Point VTS Special Area: a) No vessel shall enter or get underway without prior approval from the U.S. Coast Guard VTS-LMR and must abide by any direction or measures issued by the VTS. b) A vessel awaiting a VTS direction to proceed must keep clear of other vessels transiting. c) Vessels shall not enter the Special Area if a hazardous vessel operating condition or circumstance exists, as defined in 33 CFR161.2, without prior approval from the COTP. d) Vessels shall not meet, cross, or overtake any other vessel in the Special Area without prior approval from the VTS. If the VTS approves the maneuver, before executing the maneuver, vessels shall communicate on the designated bridge-to-bridge radiotelephone frequency intended navigation movements and any other information necessary in order to make safe passing arrangements. • Tug and barges are prohibited from transiting VTS special areas if the vessel lacks sufficient power to permit ready maneuverability and safe handling.

New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Port Allen Canal - Port Allen Lock - Lock Restrictions/Special Instructions --- From: April 2021 To: Until Further Notice --- The following westbound restrictions are in place regarding the Port Allen Lock's northeast floating guide wall: • All tows with more than one barge are required to use an assist vessel with a line attached at the head of the tow. • Single barge tows will be permitted to lock westbound without an assist vessel. • Vessels should not attempt to "pivot" on the guide wall; therefore, vessels must flatten-out before contacting the guide wall. For additional information, mariners can contact the Port Allen Lockmaster at (225) 343-3752.	Lat: 30° 25' 51" Lon: -091° 12' 30"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River - Dredging --- From: 2026-06-12 To: 2026-06-26 --- The Dredge BELLA ROSE will be conducting dredging at Mile 124.5, AHOP, approximately 500 ft off the RDB. Work will take place 24-hours a day, 7-days a week. Mariners are requested to transit the area with caution. VHF-FM Channel: 67, POC: (504) 225-2036 or (504) 858-2925	Lat: 29° 58' 31" Lon: -090° 23' 59"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River Deep Draft Crossings - Dredge Operation --- From: 2026-05-25 To: Until Further Notice --- The Dredge WALLACE McGEORGE will be working at the Mississippi River Deep Draft Crossings, Mile 115.0 to Mile 235.0, AHOP, between Baton Rouge and New Orleans, LA. Dredging will take place 24-hours a day, 7-days a week. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River Deep Draft Crossings - Dredge Operation --- From: 2026-06-10 To: Until Further Notice --- The Dredge JADWIN will be working at the Mississippi River Deep Draft Crossings between Baton Rouge and New Orleans, LA. The dredge will start working at Alhambra Crossing, Mile 190.5, AHOP. Dredging will take place 24-hours a day, 7-days a week. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	MSIB Vol XXVI Issue 017 - Mississippi River - Carrollton Gauge at 8 Ft and Rising --- From: 2026-06-05 To: Until Further Notice --- When the Carrollton Gauge reads 8 ft and rising, the following operating requirements will be in effect: • For all vessels operating in the Lower Mississippi River below Mile 233.9, AHOP, including South Pass and Southwest Pass, additional high-water requirements are found in 33 CFR 165.810. • All deep draft vessels, including ocean-going towing vessels, should have three means of holding position unless moored to shore or a mooring buoy. These vessels are strongly advised to be equipped with a fitted anchor if carrying or intending to carry any dangerous cargo. If no anchor is fitted, vessels should pre-arrange fleet space prior to entering the river, if not proceeding directly to berth or unable to be pushed into the bank. The use of at least one assist/escort tug with suitable horsepower and capability is strongly encouraged for vessels without a fitted anchor. • Downbound ocean-going towing vessels towing on the hawser should consult with the appropriate pilot association to determine the need for assist tugs. • A "tail" tug is recommended when towing loaded barges and dead ships southbound in Southwest Pass. • Tandem tows northbound and southbound are strongly discouraged. A tandem tow is such that more than one barge or vessel is being towed independently from astern a single towing vessel. • Towing vessels should review MSIB Vol XIX Issue 007 titled Towing Vessel Safety Advisory During High Water, issued January 15, 2019, for additional provisions. This referenced MSIB is attached and is also available on the WWM NOLA Linktree: https://linktr.ee/WWMNOLA . • When the Carrollton Gauge reads 9 ft and falling, the above operating requirements are no longer in effect. For further information, mariners can contact the following: Vessel Traffic Service (24-hours): (504) 365-2514, VHF-FM Channels 1005, 12, or 67, or the U.S. Coast Guard Sector New Orleans Command Center (24-hours): (504) 365-2545. TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sabine Pass - Port Arthur Canal/General/LAA/RNA/Security Zone	LAA/RNA	Port Arthur Canal - Security Zone Reminder --- With the resumption of marine operations at Golden Pass LNG in Sabine Pass, Texas, mariners are reminded that a federal permanent Security Zone is established in accordance with 33 CFR § 165.819. As stated in 33 CFR § 165.819, when a LNG carrier is moored at the Golden Pass LNG mooring basin, a security zone is activated for all waters south of a line connecting the following coordinates: 29-45-58.0N 093-55-40.0W, east to 29-45-52.8N 093-55-20.8W, and bearing 120° T to the shoreline at 29-45-50.0N 093-55-17.0W. Entry into or remaining within the security zone is prohibited for all vessels except: 1. Commercial vessels operating at waterfront facilities within the zone. 2. Commercial vessels transiting directly to or from waterfront facilities within the zone. 3. Vessels providing direct operational or logistical support to commercial vessels within the zone. 4. Vessels operated by the appropriate port authority or by facilities located within the zone. 5. Vessels operated by Federal, State, county, or municipal law enforcement agencies. All other persons or vessels must request permission to enter the security zone from the Captain of the Port or their designated representative. To request permission, vessels can contact U.S. Coast Guard Vessel Traffic Service Port Arthur on VHF-FM Channel 01A or 65A, or by telephone at (409) 719-5070. For more information, mariners should refer to 33 CFR § 165.819 for the full regulatory text and additional details.

General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Port Mansfield Channel - Shoaling --- Reported: 2025-03-12 --- Extreme shallow water and shoaling has been reported throughout the Mansfield Cut/Port Mansfield Channel. Mariners should exercise caution when navigating through this area and pay close attention to tide levels when departing and returning through the cut.	

Sector Corpus Christi, Submerged Land Act (SLA) - Port Mansfield Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Port Mansfield Channel - Dredge Operation --- From: 2026-01-19 To: 2027-02-11 --- The Dredges GENERAL BRADLEY and GENERAL MARSHALL will conduct dredging operations in the Port Mansfield Channel, from just east of the jetties, through the entire inland portion of the Port Mansfield Channel, and into the Port Mansfield Harbor. The Dredge GENERAL MARSHALL will start working near Port Mansfield Channel Daybeacon 18 (LLNR-29360) with anchors set on either side of the channel. A combination of steel and HDPE pipeline will be used with floating rubber hose, floating pipe, submerged pipe and shore pipe leading to the placement areas at Bird Island and along the Padre Island Beach. Submerged pipelines will be placed across the channel in locations that provides sufficient depth and will be marked with lights and buoys. No fishing or trawling activities should take place along or within the area of pipeline, to avoid damage to nets, vessels, and the dredge equipment. Mariners are requested to coordinate passing arrangements 1-hour in advance and transit the area with extreme caution. VHF-FM Channels: 13 and 79, POC: Dredge (409) 739-6508	
Sector Corpus Christi, Submerged Land Act (SLA) - Port Mansfield Channel/General/Miscellaneous	Miscellaneous	Port Mansfield Channel - Temporary Buoy --- From: 2026-05-25 To: 2026-09-30 --- The U.S. Army Corps of Engineers deployed a temporary lighted yellow buoy outside of the Port Mansfield Channel, in the vicinity of Port Mansfield Entrance Light 3 (LLNR-29275). The buoy is located in approximate position 26-33-46.464N 097-16-17.143W. The M/V RGV-25 will remove the buoy on September 30, 2026, during daylight hours. Mariners are requested to transit the area at their slowest safe speed to minimize wake and coordinate passing arrangements in advance on the buoy retrieval date. VHF-FM Channels: 12 and 16	Lat: 26° 33' 46" Lon: -097° 16' 17"
Sector Corpus Christi, Submerged Land Act (SLA) - Port Mansfield Channel/General/Miscellaneous	Miscellaneous	Port Mansfield Channel - Temporary Buoy --- From: 2026-05-25 To: 2026-09-30 --- The U.S. Army Corps of Engineers deployed a temporary lighted yellow buoy outside of the Port Mansfield Channel, east of Port Mansfield Entrance Light 3 (LLNR-29275). The buoy is located in approximate position 26-33-44.24N 097-15-59.64W. The M/V RGV-25 will remove the buoy on September 30, 2026, during daylight hours. Sector Mobile, Exclusive Economic Zone (EEZ)/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	Gulf of America - USV Survey Operation --- From: 2026-06-22 To: 2026-08-31 --- Surveys and data collection will take place in the Gulf of America by the Unmanned Surface Vehicles (USV) LR30-6 and MC29 in an area bound by approximate positions: 29-22-47N 085-35-24W, 29-06-35N 086-00-36W, 28-52-12N 084-59-23W and 28-30-36N 085-31-11W. The USVs are approximately 30 ft long with a yellow hull, a top speed of 7 knots, and the following AIS Data: Vessel Name: LR30-6 (UNMANNED, MMSI: 368109230) and MC29 (UNMANNED, MMSI: 368337510). Each USV is equipped with navigation lights and will be continuously monitored and operated 24/7 with live visual and thermal cameras, radar, AIS, and VHF-FM radio communications. Mariners are requested to maintain a wide berth from the USVs while in operation. VHF-FM Channels: 13 and 16, POC: (337) 362-4791	

Sector Mobile, Exclusive Economic Zone (EEZ)/General/MSIB	MSIB	<p>Marine Safety Alert 02-24 - Inspections and Compliance Directorate --- DANGEROUS BYCATCH FROM DISCARDED MUNITIONS REMAINS A PRESENT DAY HAZARD --- This Safety Alert is being issued to raise awareness of lurking hazards caused by discarded munitions, which often contain active explosives or chemical agents. Although the practice of dumping munitions into the sea ceased in 1970, a significant amount remains hidden in coastal waters, posing a safety hazard to commercial fisherman, dredge operators, and others who trawl and work the ocean floor. Recently, a deckhand on a clamming vessel was severely burned when a canister was dredged up and brought onboard with clams and other debris. The canister likely contained mustard gas or another blistering agent, but did not display any obvious visual, audible, or odor indicators of discharging content. A member of the crew discovered the canister and threw it back overboard. Several hours later he developed a severe rash that required professional medical treatment. Mustard gas is a chemical weapon developed during World War I. Millions of pounds of this product, other chemical weapons, bombs, torpedoes, artillery shells, and munitions were routinely disposed of and remain in U.S. coastal waters. Although many munition dump areas are well marked on navigation charts, numerous areas where munitions were discarded remain unmarked. There is also evidence suggesting that munitions were frequently "short dumped," meaning dumped outside of the designated areas by contractors hired to take them to the intended locations. The Coast Guard previously issued Safety Alert 11-16 and Safety Alert 6-10 on this same topic and continues to strongly recommend that persons involved in the fishing and dredging industries: Review their navigational charts to ensure the areas in which they are trawling or dredging are not near labeled "Explosives Dumping Areas." Such areas must be given wide berth and seafarers should recognize that surface bottoms change and that objects can move significant distances from their original disposal areas. Review and follow recommendations from the Maritime Industry 3Rs Explosive Safety Guide. Carefully record the position of any munitions encountered and returned to the sea. Immediately report discovery to the National Response Center, at (800) 424-8802 to ensure a proper response and potential recovery. Alternatively, the local U.S. Coast Guard unit may be notified via VHF-FM Channel 16. This Safety Alert is provided for informational purposes only and does not relieve any domestic or international safety, operational, or material requirement. Developed by the Office of Commercial Vessel Compliance (CG-CVC) and distributed by the Office of Investigations and Casualty Analysis (CG-INV). Questions may be submitted to HQS-SMB-CGINV@uscg.mil.</p>
Sector Mobile, Exclusive Economic Zone (EEZ)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	<p>Gulf of America - U.S. Navy Live Ordnance Operation --- From: 2026-06-30 To: 2026-07-02 --- The U.S. Navy will be conducting live ordnance operations in the Gulf of America, from 6:00 a.m. to 6:00 p.m., daily. The operating area will be bound by approximate positions: 29-06-28.32N 085-25-42.36W, 29-06-08.16N 084-58-54.12W, 28-43-04.80N 084-58-54.12W and 28-43-24.66N 085-25-42.36W. Ten naval support craft will be on-scene during the operation. All vessels should maintain at least a 1-mile closest point of approach from the operating area and should take all direction from the on-scene naval support craft. VHF-FM Channels: 13, 16, 81 and 82</p>

The platform will feature yellow lights at night with yellow mooring buoys deployed nearby marking the subsea moorings. The M/V SPINNER will be on site intermittently for feeding and aquaculture operations. Mariners are urged to transit the area with caution. POC: (256) 415-3534	
Sector Mobile, Submerged Land Act (SLA) - Mississippi Sound/General/Miscellaneous	Miscellaneous	The Department of the Air Force will enforce the charted Restricted Area found in 33 CFR 334.730. This area includes certain navigable waters of Santa Rosa Sound, the GIWW (Miles 204.6 to 216.4, WHL), and the Gulf of America (Gulf of Mexico) adjacent to Eglin Air Force Base Property. All entry, transit, anchoring or drifting within the restricted area for any reason is not allowed without permission from the U.S. Air Force (96 TW/CC), except to navigate the Gulf Intracoastal Waterway. Such vessels and other watercraft shall confine their movements to the waters within the limits of the GIWW and shall make the passage as promptly as possible under normal vessel speed. Other permitted access to the Restricted Area may be granted, in certain circumstances, by contacting the 96 TW/CC at (850) 882-2000.	Lat: 30° 23' 03" Lon: -086° 48' 24"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-10-09.2N 088-01-18.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 10' 09" Lon: -088° 01' 19"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Horn Island Pass - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-11-42.5N 088-32-38.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 11' 42" Lon: -088° 32' 39"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Alabama River - In accordance with Section 7-11 of the ACT Master Water Control Manual dated April 2022, full navigation channel availability on the Alabama River is dependent upon channel maintenance, seasonal flow conditions, and basin status. Flows for navigation are most needed in the unregulated portion of the lower Alabama River below Claiborne Lock and Dam. Alabama Power Company (APC) operates its reservoirs on the Coosa and Tallapoosa Rivers to provide a minimum navigation flow target in the Alabama River at Montgomery, Alabama. Basin status criteria are correlated to APC Drought Operations (ADROP) updates which monitors drought triggers related to basin inflow, state line flow on the Coosa River between Georgia and Alabama, as well as composite storage availability within the APC projects. These updates are provided monthly on the first and third Tuesday. Below is the most recent ADROP update provided by Alabama Power Company on June 16, 2026: *ADROP UPDATE* - Low Basin Inflow: FALSE - - Low State Line Flow: FALSE - - Low Composite Storage: FALSE - - Montgomery Flow Target: 8,648 cfs daily average - - Current Operations: Support 9-foot Navigation Channel - Currently, based on profile survey conducted on 04JUN2024, a 10 ft tailwater elevation near Claiborne Lock is required to provide a 9 ft navigation channel on the lower Alabama River. A modified depth of 7.5 ft navigable draft can be provided with a tailwater elevation of 8.5 ft at the Claiborne Lock and Dam. Commercial mariners should check water levels daily and schedule lockage appointments by calling the Claiborne Lock Supervisor at (251) 282-4575. Tailwater elevations below Claiborne Lock and Dam can be viewed at: https://waterdata.usgs.gov/monitoring-location/USGS-02428401	Lat: 31° 36' 54" Lon: -087° 33' 06"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/MSIB	MSIB	MSIB 32-26 - Potential Unexploded Ordnance (UXO) Hazard Gulf of America - Fort Pickens, FL --- The U.S. Army Corps of Engineers (USACE) is conducting feasibility studies under the CERCLA process to assess hazards associated with historical munitions to include potential unexploded ordnance (UXO) in the vicinity of Fort Pickens, Pensacola, FL. Due to historical usage of this area, the U.S. Coast Guard advises mariners of potential UXOs located within the Gulf of America and Pensacola Bay, near Santa Rosa Island, Fort Pickens, FL. UXOs should be considered extremely dangerous. If touched, moved, or disturbed, these items may detonate, causing severe injury, death, or property damage. Mariners are strongly urged not to anchor or conduct any bottom-disturbing activities within High Use Areas (HUA) and should exercise caution when conducting activities in the Low Use Areas (LUA). Reference diagrams, provided in the hard copy version of MSIB 32-26, identify Low Use Areas (LUA) in green and High Use Areas (HUA) in orange. If a mariner encounters a UXO, please contact 911 to report the location that it was found. Concerned parties may report any hazardous conditions to the U.S. Coast Guard Sector Mobile Command Center at (251) 266-5888. Additional information is available at: https://www.saj.usace.army.mil/FortPickens/	
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2025-09-03 To: 2026-08-31 --- The U.S. Navy will operate an unmanned surface vehicle (USV) towing underwater equipment in the Gulf of America, in the offshore waters of Panama City Beach, FL. The operating area will be bound by approximate positions: 30-07-58.59N 085-55-19.54W, 30-07-58.63N 085-50-42.76W, 30-03-56.30N 085-50-42.75W and 30-03-56.27N 085-55-19.44W. Two U.S. Naval support vessels will be on-scene during the USV operation. Mariners should maintain a wide berth from all U.S. Naval craft and are requested to avoid the area. VHF-FM Channel: 16	

Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Testing --- From: 2026-06-22 To: 2026-06-26 --- The U.S. Navy and contractors will be conducting surface and subsurface tests in the Gulf of America. Operations will be conducted from 8:00 a.m. to 6:00 p.m., daily. White buoys with a yellow light will be temporarily installed to mark the four corners of the operating area, which will be bound by the following approximate positions: 30-05-32.4N 085-41-26.8W, 30-05-26.8N 085-41-14.8W, 30-04-28.1N 085-42-10.3W and 30-04-23.1N 085-41-51.9W. On-scene vessels will include the M/V REEF RUNNER, F/V REEL LADY, and a 40 ft naval support vessel. Mariners should maintain a 0.5 mile closest point of approach from the operating area. VHF-FM Channel: 16, POC: (850) 247-6691	
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Gunnery Exercises	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2026-05-27 To: 2026-06-30 --- The U.S. Navy will be conducting live ordnance and dive operations in the Gulf of America, approximately 4 miles west of Saint Andrew Point, FL. Operations will be conducted between the hours of 5:00 a.m. and 8:00 p.m., on select days from May 27, 2026 through June 30, 2026. U.S. Naval tests will take place near approximate position 29-58-51N 085-36-45W. Naval support craft will be on-scene during the scheduled mission periods. All vessels should maintain at least a 2-mile closest point of approach from the operating area and take all direction from the on-scene naval support craft. Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Bridges/Construction	Bridges	Bayou Lafourche - Bridge Construction --- From: 2026-05-08 To: 2026-07-08 --- Bridge construction continues on the new Airport Corridor Road Bridge in Galliano, LA, located at 29-25-28.55N 090-17-31.38W. Sealevel Construction will be completing and periodically testing the lift span installation. Lift span operations will be conducted Monday through Saturday, between 7:00 a.m. and 5:00 p.m. During these working hours, construction vessels, barges, and equipment may be stationed in the main channel. Upon request, equipment will be moved to allow boats to pass through the work site. At the end of each work day, equipment will be moved from the channel. Mariners should contact (985) 414-4618 at least 1-hour in advance to make passing arrangements.	Lat: 29° 25' 28" Lon: -090° 17' 31"
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Hazards To Navigation/Hazards	Hazards To Navigation	Gulf of America - East Bay --- Reported: 2025-04-01 --- Multiple aid to navigation discrepancies (lights and fog horns) have been reported on platforms located in the South Pass Area, Blocks 27 and 28. Mariners are urged to transit this area with extreme caution.	
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Hazards To Navigation/Obstructions	Hazards To Navigation	Scofield Bay – Uncharted and Unlit Platforms --- Reported: 2026-05-22 --- Uncharted, unlit platforms and piles have been reported in Scofield Bay, on May 22, 2026. Mariners are urged to avoid this area.	
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Hazards To Navigation/Hazards	Hazards To Navigation	Caminada Bay - Bay St Honore - Partially Submerged Obstruction --- Reported: 2026-06-10 --- A partially submerged obstruction has been reported protruding above the water line, in approximate position 29-13-01.20N 90-02-54.96W. The partially submerged obstruction is reportedly not marked. Mariners are urged to avoid this area.	Lat: 29° 13' 01" Lon: -090° 02' 55"
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Grand Lake - Dredging and Marsh Creation --- From: 2025-09-15 To: 2026-07-31 --- Amphibious and barge mounted excavators will be building marsh creation areas on the southern shoreline of Grand Lake. Dredges will pump material from the middle of Grand Lake into five marsh creation sites. Work will take place 24-hours a day, 7-days a week. On-scene vessels include the Dredges GRAND TERRE and GRAND GOSIER, tugs and barges. Three dredge pipeline segments will be floating in the area, with 1,000 ft sections submerged and marked. Access dredging may take place in Grand Lake and in the surrounding bodies of water, including Bayou Gentilly, Petit Lake and Alligator Pass. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. VHF-FM Channels: 16 and 71	
Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Schooner Bayou Control Structure - Transit Instructions --- From: 2026-03-06 To: 2026-08-01 --- From 6:00 a.m. until 6:00 p.m., each day, mariners are urged to take extra precautions when locking through the Schooner Bayou Control Structure, due to a contractor removing existing timber guidewalls and installing new timber guidewalls. All vessels should contact the Schooner Bayou Control Structure on VHF-FM Channel 14 to make arrangements on which side of the channel to navigate when locking through the structure. Leland Bowman Lock can be used as an alternate route. For up-to-date information, the Lockmaster can be reached at (337) 737-2470 or (337) 316-3662.	

Sector New Orleans, Territorial Sea - Sector New Orleans, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	Pass A Loutre - Survey Operation --- From: 2026-04-30 To: July 2026 --- T. Baker Smith will be conducting surveys in Pass A Loutre. Work will take place daily, during daylight hours only. On-scene vessels will include dual-outboard survey vessels and airboats. At times, survey vessels may be towing survey equipment behind them, and field crews may be working outside of the vessels in shallow-water areas. Due to towing and shallow-water operations, project vessels may occasionally be slow-moving, temporarily stationary, or have limited maneuverability. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake.

Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Hazards To Navigation/Hazards	Hazards To Navigation	Gulf of America - Platform Removal --- From: 2025-08-30 To: Until Further Notice --- Platform removal and demolition is taking place in the Gulf of America, South Pass Area, Block 60, in approximate position 29-03-51.58N 088-57-19.40W. Portions of the platform have been removed and moved offsite. Full site clearance for platform F has not been completed. Two piles remain in the area, reducing the water depth to approximately 180 ft. An orange and white buoy with a flashing 2.5 second white light has been established in approximate position 29-03-49.406N 088-57-21.531W. The buoy will remain on location to mark the South Pass Block 60 Complex until site clearance is complete. Mariners are urged to avoid the area.	Lat: 29° 03' 52" Lon: -088° 57' 19"
Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Hazards To Navigation/Hazards	Hazards To Navigation	Gulf of America - Platform Removal --- From: 2025-08-30 To: Until Further Notice --- Platform removal and demolition is taking place in the Gulf of America, South Pass Area, Block 60, in approximate position 29-03-50.43N 088-57-21.49W. The upper and lower jacket of platform C have been removed. Full site clearance has not been completed. Two piles remain in the area, reducing the water depth to approximately 180 ft. An orange and white buoy with a flashing 2.5 second white light has been established in approximate position 29-03-49.406N 088-57-21.531W, and will remain on location to mark the South Pass Block 60 Complex until site clearance is complete. Mariners are urged to avoid the area.	Lat: 29° 03' 50" Lon: -088° 57' 21"
Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Hazards To Navigation/Obstructions	Hazards To Navigation	Gulf of America - Exposed Pipeline --- Reported: 2026-05-25 --- An exposed pipeline has been reported protruding above the waterline in the South Timbalier Area, Block 21, on May 25, 2026. The pipeline is reportedly not marked. Mariners are urged to transit the area with extreme caution.	Lat: 28° 59' 30" Lon: -090° 16' 12"
Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Hazards To Navigation/Hazards	Hazards To Navigation	Gulf of America - Platform Removal and Buoy Deployment --- From: 2025-08-21 To: Until Further Notice --- Platform removal and demolition is being conducted in the Gulf of America, South Pass Area, Block 60, in approximate position 29-03-24.31N 088-57-51.36W. An orange and white buoy with a flashing 2.5 second white light will be established in approximate position 29-03-18.088N 088-58-13.362W and will remain on location to mark any remaining portions of Platform G as the project is conducted in phases. Mariners should avoid the area.	Lat: 29° 03' 25" Lon: -088° 57' 52"
Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Marine Construction (Excluding Bridges)/Survey Operations	Marine Construction (Excluding Bridges)	Gulf of America - Survey Operation --- From: 2026-06-04 To: 2026-06-25 --- Geophysical and geotechnical surveys will be conducted in the Gulf of America in the Ship Shoal Area. The survey area will be bound by approximate positions: 28-57-14.4N 090-32-21.6W, 28-56-52.4N 091-09-16.8W, 28-51-54.0N 090-31-32.4W and 28-52-15.0N 091-08-54.6W. Operations will be conducted from 6:00 a.m. to 6:00 p.m., daily. The Survey Vessel DONAL OLSEN ELEVATOR will have deployed and towed survey equipment and will be restricted in maneuverability. Passing arrangements can be coordinated through the survey vessel. Mariners should maintain a wide berth from the M/V DONAL OLSEN ELEVATOR to avoid entanglement with survey equipment and to reduce impacts to survey data quality. VHF-FM Channel: 13 and 16	
Sector New Orleans, Exclusive Economic Zone (EEZ) - Sector New Orleans, Territorial Sea/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Gulf of America - Platform Decommissioning/Removal --- From: 2026-06-15 To: 2026-07-28 --- Three platforms will be removed from the Gulf of America, South Pass Area, Block 60. The platforms will be removed in stages, with the topsides removed first, followed by the subsea jackets. The platforms will be removed following the below approximate timelines: • South Pass, Block 60, Platform G (SP60-G): Topside Removal 15JUN2026, Jacket Removal 26JUN2026. • South Pass, Block 60, Platform A (SP60-A): Topside Removal 16JUN2026, Jacket Removal 24JUL2026. • South Pass, Block 60, Platform D (SP60-D): Topside Removal 15JUL2026, Jacket Removal 28JUL2026. A buoy will be deployed approximately 2,000 ft from the worksites in approximate position 29-03-18.904N 088-58-13.511W. Subsea near surface hazards may exist throughout different stages of the project. Mariners are urged to maintain a wide berth from the buoy and worksites until the project is complete.

Head Of Passes To New Orleans - New Orleans Harbor/General/MSIB	MSIB	MSIB Vol XXVI Issue 017 - Mississippi River - Carrollton Gauge at 8 Ft and Rising --- From: 2026-06-05 To: Until Further Notice --- When the Carrollton Gauge reads 8 ft and rising, the following operating requirements will be in effect: • For all vessels operating in the Lower Mississippi River below Mile 233.9, AHOP, including South Pass and Southwest Pass, additional high-water requirements are found in 33 CFR 165.810. • All deep draft vessels, including ocean-going towing vessels, should have three means of holding position unless moored to shore or a mooring buoy. These vessels are strongly advised to be equipped with a fitted anchor if carrying or intending to carry any dangerous cargo. If no anchor is fitted, vessels should pre-arrange fleet space prior to entering the river, if not proceeding directly to berth or unable to be pushed into the bank. The use of at least one assist/escort tug with suitable horsepower and capability is strongly encouraged for vessels without a fitted anchor. • Downbound ocean-going towing vessels towing on the hawser should consult with the appropriate pilot association to determine the need for assist tugs. • A "tail" tug is recommended when towing loaded barges and dead ships southbound in Southwest Pass. • Tandem tows northbound and southbound are strongly discouraged. A tandem tow is such that more than one barge or vessel is being towed independently from astern a single towing vessel. • Towing vessels should review MSIB Vol XIX Issue 007 titled Towing Vessel Safety Advisory During High Water, issued January 15, 2019, for additional provisions. This referenced MSIB is attached and is also available on the WWM NOLA Linktree: https://linktr.ee/WWMNOLA . • When the Carrollton Gauge reads 9 ft and falling, the above operating requirements are no longer in effect. For further information, mariners can contact the following: Vessel Traffic Service (24-hours): (504) 365-2514, VHF-FM Channels 1005, 12, or 67, or the U.S. Coast Guard Sector New Orleans Command Center (24-hours): (504) 365-2545.
