SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtfts, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

LNM: 02-19

WESTERN RIVERS FLOATING AIDS TO NAVIGATION

The U.S. Coast Guard is responsible for placing and maintaining all aids to navigation. Buoys are set to mark project depths taking into consideration the prevailing river stages and obstructions. Buoy positions on the Inland Electronic Navigation Chart (IENC) are approximate, and subject to change depending on prevailing river stages and obstructions.

Buoys should always be given as wide a berth in passing as possible, consistent with the length and width of the vessel or tow and the width of the bend or crossing.

Buoys should always be used with caution. They may be carried off position by high water, accumulation of drift, ice, or sunk by collision or other causes. In those circumstances buoy marks will remain on the IENC and indicate the last known position of the buoy. Presence of a buoy mark on the IENC does not necessarily mean a buoy will be physically on position. When buoys are missing they will be replaced as soon as possible.

LNM: 16-19

GPS TESTING

At times, throughout our area or responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

<https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>.

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LNM: 10-21

MISSOURI RIVER - CHANNEL CONDITION/COTP ADVISORY

The following reaches are in the high water watch phase in accordance with the Western Rivers WAP Annex:

Jefferson Reach (Mile 200.0 – Mile 100.0) and

Washington Reach (Mile 100.0 – Mile 0.0).

Towboat operators should be experienced in high water operations, exercise caution in all passing and meeting situations and be mindful of all charted bridge navigational clearances. Drift and debris may pose navigation obstructions. Buoys may have been dragged off station, so remain cautious while transiting.

LNM: 23-22

UPPER MISSISSIPPI RIVER CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

Water levels have dropped, the COTP Upper Mississippi River Safety Advisory for Zone 28 has been cancelled.

LNM: 25-22

UPPER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY

The following area is in the high water watch phase IAW the Western Rivers WAP Annex:

Zone 24 (Mile 301.1 – Mile 273.4).

Towing vessels are advised to favor the center of the channel and proceed at their slowest safe speed to minimize their wake, based on prevailing conditions, to minimize wake damage to personal property. Towboat operators should be experienced in high water operations, exercise caution in all passing and meeting situations and be mindful of all charted bridge navigational clearances. Downstreaming operations are not recommended. Drift and debris may pose navigation obstructions. Buoys may have been dragged off station, so remain cautious while transiting.

LNM: 23-22

UPPER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY - UPDATE

Water levels have dropped, the COTP Upper Mississippi River Safety Advisory for Zone 29 has been cancelled.

LNM: 25-22

OHIO RIVER - L/D'S CLOSURES/MAINTENANCE

Attached as an enclosure to this LNM, is a USACE Huntington District Notice to Navigation Interests 22-09, regarding L/D's closures/maintenance operations.

LNM: 17-22

UPPER MISSISSIPPI RIVER - AIDS TO NAVIGATION

Multiple can and nun buoys have been reported not properly marking the channel between approximate Miles 631.0 and 379.4. Mariners are urged to exercise caution in the area.

LNM: 24-22

TENNESSEE RIVER - AIDS TO NAVIGATION

The U.S. Coast Guard has removed all pending Aids to Navigation changes for the Tennessee River, from Section V, Advanced Notices, previously posted in Local Notice to Mariners week 22/22. Pending further review, these changes may be entered into future volumes of the U.S. Coast Guard District 8, Mississippi River System, Local Notice to Mariners and Light List Volume V.

LNM: 23-22

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION V - ADVANCE NOTICES

This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas.

SUMMARY OF ADVANCED APPROVED PROJECTS

<u>Approved Project(s)</u>	<u>Project Date</u>	<u>Ref. LNM</u>
None		

Advance Notice(s)**UPPER MISSISSIPPI RIVER**

The Coast Guard will make the following Aid to Navigation Change after July 26, 2022:
Discontinue Sabula Lower Light (LLNR-14445) at mile 533.6, Right Descending Bank, in approximate position 42-02-34.260N/090-10-02.383W.
LNM: 22/22

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

TENTATIVE MAINTENANCE SCHEDULE FOR 2022

HUNTINGTON DISTRICT

Reference Notice to Navigation Interests 22-06, dated 04 March 2022. The following is specific information supplementing the tentative maintenance schedule for 2022

Starting on 30 April 2022, repairs will begin on the main lock chamber at Belleville Locks and Dam, Ohio River, mile 203.9. These repair activities will require the closure of the main chamber. In addition to the main chamber being closed, the auxiliary chamber will be closed on 02 May 2022 to 04 May 2022, and 22 June 2022 to 24 June 2022. Resulting in a total river closure on these dates.

Starting on 02 May 2022, repairs will begin on the main lock chamber at Greenup Locks and Dam, Ohio River, mile 341.0. These repair activities will require the closure of the main chamber. The auxiliary chamber will be available for lockage during this timeframe.

Mariners are urged to contact the lockmaster via marine channel 13 for more information.

All other pertinent information remains the same.

For your convenience, the following is from Notice to Navigation Interests 22-06:

It is anticipated that major maintenance and repairs will be performed at the following locations during calendar year 2022. This notice may require periodic revision. It is given so that industrial and recreational waterway users may have a general knowledge of the lock outages and can plan their operations accordingly. Factors which may affect this schedule are the delivery of materials, repairs required but not anticipated, emergency repairs as a result of accidents, and funding.

<u>PROJECT</u>	<u>REPAIRS</u>	<u>DATES</u>	<u>REMARKS</u>
Belleville L&D	Repair Upper Main Chamber Miter Gates and Filling and Emptying Culvert System Wire Rope Replacements	2 May - 24 Jun	Main Chamber Closure

GREEN RIVER SCHEDULE OF OPERATIONS:

LOCK 1 (GREEN RIVER MILE 9.1)

LOCK 2 (GREEN RIVER MILE 63.1)

Green River Lock 1 (Green River Mile 9.1): Effective 5 June 2022, Green River Lock 1 will commence lock operations at a lower Inland Marine Transportation System (IMTS) level of service. New hours of operation will be 0700 – 1700 and 1700 – 0300, 7 days per week. During the hours of 0300 – 0700 the chamber will be unavailable for service. Vessels that arrive during this time will be locked in the order they arrive once the chamber has been prepared for operation for that day.

Green River Lock 2 (Green River Mile 63.1): Effective 5 June 2022, Green River Lock 2 will commence lock operations at a lower IMTS level of service. New hours of operation will be 0700 – 1700, 7 days per week. During the hours of 1700 – 0700 the chamber will be unavailable for service. Vessels that arrive during this time will be locked in the order they arrive once the chamber has been prepared for operation for that day.

Vessels must arrive at the lock so that their lockage can be completed prior to the end of normal hours of operation.

Commercial operators are urged to coordinate their movement on the Green River accordingly. Outside normal hours of operation the locks may be placed into service if an emergency warrants, or arrangements have been made in advance.

ALTERNATE NAVIGATION CHANNEL

RIVER MILES 924-927

Ohio River Miles 924-927: The navigation channel between Ohio River Miles 926 and 927 has shoaling which has resulted in vessel groundings in the past week.

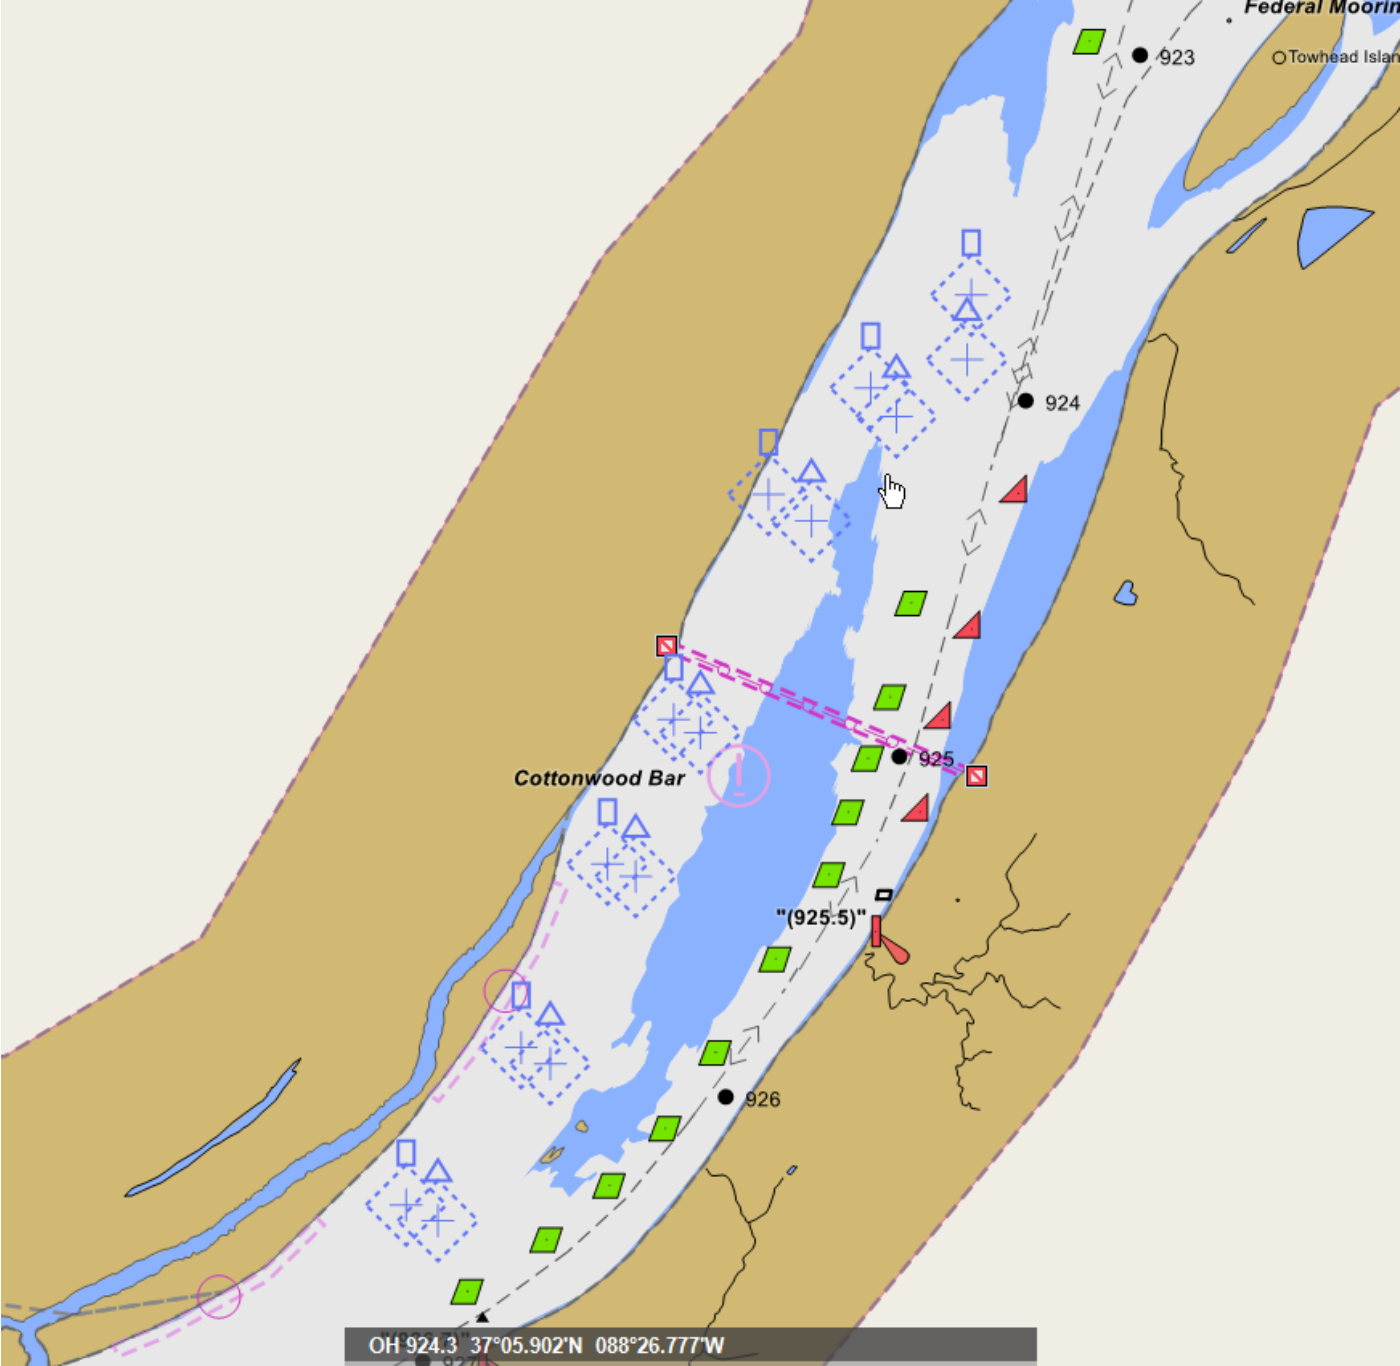

The physical buoys on the main navigation channel have been moved toward the left descending bank, as shown in the attached file titled “Notice 2022-016 OH_LD_OLM_20220621_CS_924_927_SORT.pdf”. This attachment also shows channel depths. Furthermore, this attachment shows channel depths and locations of physical buoys for an alternate navigation channel between Ohio River Miles 924 and 927 along the Illinois side of the river. The depths in this drawing correspond to a Smithland Locks and Dam lower gage of 12.0, and represent conditions found during surveys performed on 21 June 2022.

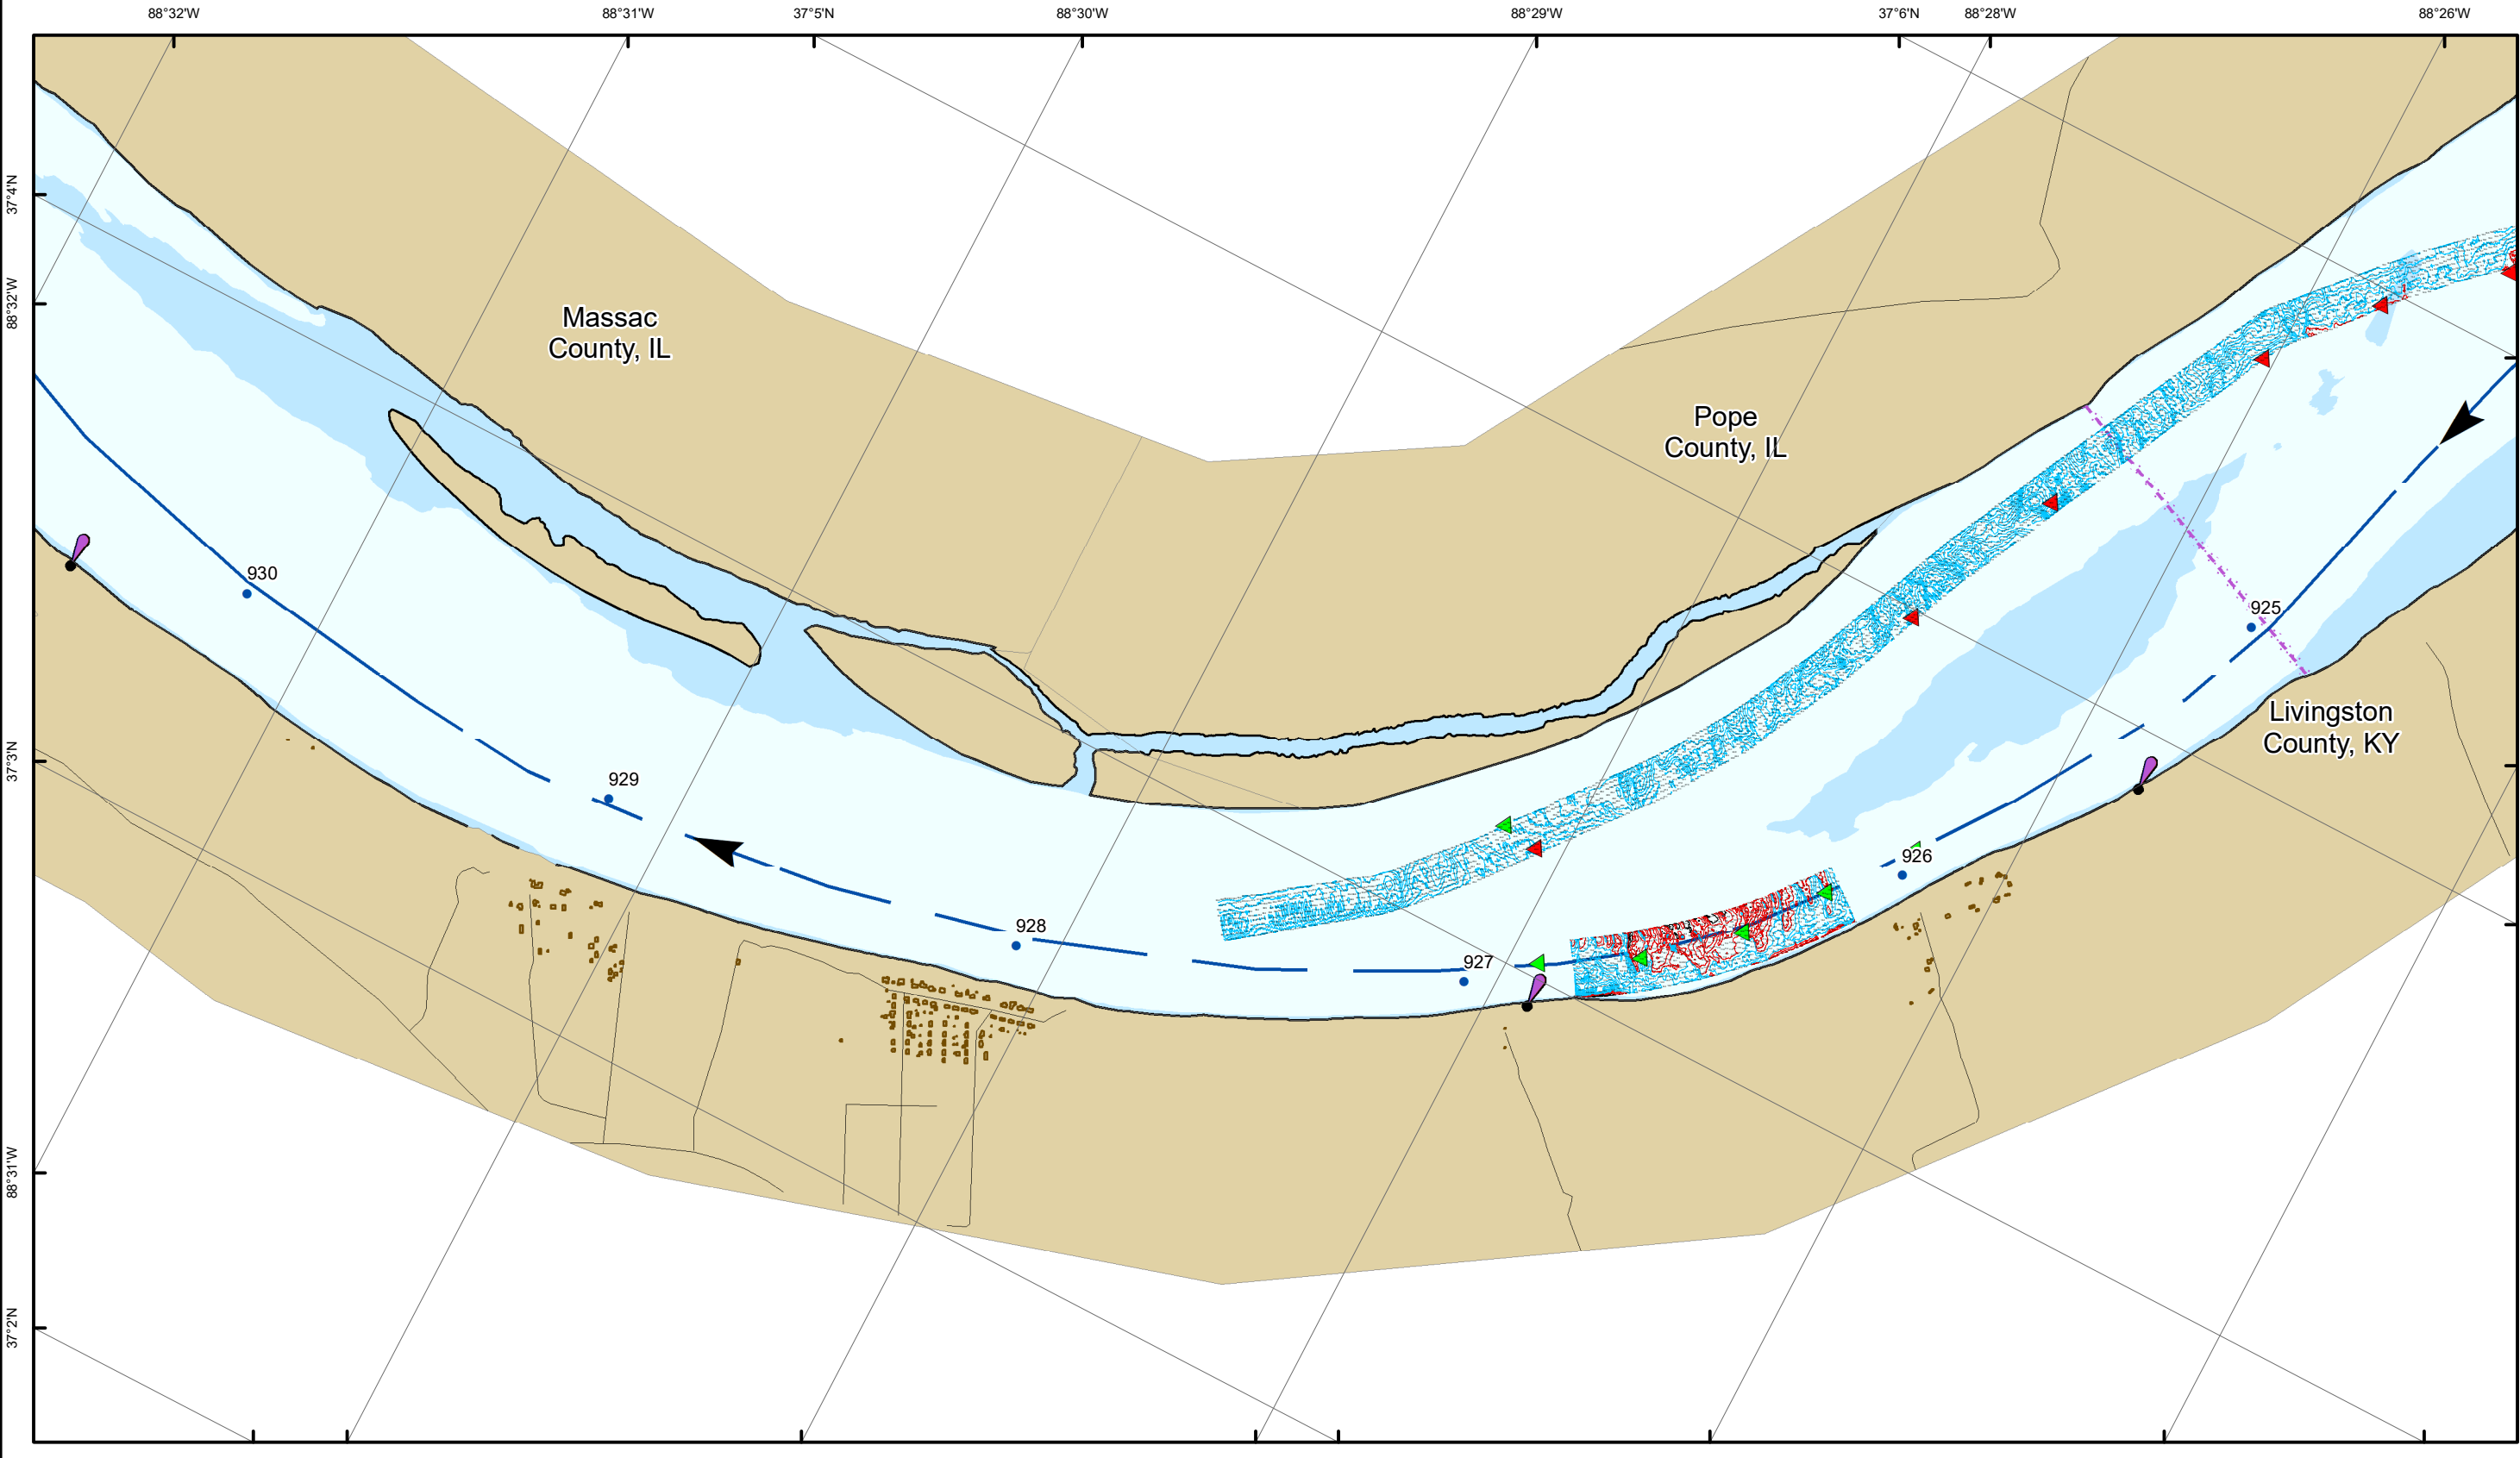

The alternate navigation channel has also been marked with AIS AToN’s (electronic buoys). The attached file titled “Notice 2022-016 AIS Buoy Mile 924-927_RosePoint.pdf” shows how these electronic buoys appear on RosePoint.

Mariners should make note of conditions and exercise caution when transiting the area.

LOCKS AND DAM 53

TRAFFIC RESTRICTIONS AND NAVIGATION LANE CHANGE FOR DEMOLITION BLASTING

OHIO RIVER

The Corps of Engineers' contractor, CJ Mahan, will be working on the demolition of Locks and Dam 53 (Ohio River Mile 962.6) for the entire low water season of 2022. Explosives will be used for the demolition. Blasting will begin on or after 21 June 2022 and is expected to take place during periods when the river stage is below 26 feet on the Olmsted Locks and Dam Headwater gage. A blast may take place up to once every day (Monday – Saturday), conditions permitting. It will be necessary to close the river to traffic around L&D 53 while the contractor is in the process of loading the explosives and detonating the blast. These closures are expected to be 4 hours or less and will typically occur between 1000 and 1400 Central Time. The plan is to conduct the blast at approximately 1200 noon Central Time, after all vessels and personnel have cleared the blast area. A US Coast Guard safety zone will be enforced during loading and blasting activities. The exact details for each day that blasting will occur will be broadcast by the US Coast Guard in a Broadcast Notice to Mariners. Blasting is estimated to end late August 2022.

During this time, vessels will take all direction of the Olmsted Locks and Dam Control Tower.

Northbound vessels will be stopped at Olmsted Locks and Dam (Ohio River Mile 964.6) and southbound vessels at Ohio River Mile 961 upstream of L&D 53 so that there will be no vessels in the vicinity of L&D 53 when the blast is scheduled to occur. CJ Mahan will be operating 1 patrol boat upstream of L&D 53 when wickets are raised at Olmsted L&D and 2 patrol boats when wickets are lowered at Olmsted L&D. See attached drawing for the blasting safety zone. Once the blast has been completed and the all clear issued, the traffic will be released.

In the event that a misfire occurs, and the closure will extend beyond 4 hours, an immediate email notification will be sent out to industry representatives notifying them. A second email notification will be sent as soon as the misfire is cleared and traffic is released.

The navigation lane at L&D 53 (Ohio River Mile 962.6) will be approximately 850 feet in the center of the Navigation Pass to facilitate demolition activities as shown in the attached drawing.

All mariners must exercise caution when transiting. The contractor's vessel M/V Chris M. will be working in the area and can be reached on Marine Radio Channel 13.
