GPS TESTING

HT - Heiaht

SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

The U.S. Coast Guard is responsible for placing and maintaining all aids to navigation. Buoys are set to mark project depths taking into

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jttfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH. INM:02-19

consideration the prevailing river stages and obstructions. Buoy positions on the Inland Electronic Navigation Chart (IENC) are approximate, and

WESTERN RIVERS FLOATING AIDS TO NAVIGATION

HIGH/LOW WATER FLOW CONDITIONS

subject to change depending on prevailing river stages and obstructions. Buoys should always be given as wide a berth in passing as possible, consistent with the length and width of the vessel or tow and the width of

the bend or crossing. Buoys should always be used with caution. They may be carried off position by high water, accumulation of drift, ice, or sunk by collision or other causes. In those circumstances buoy marks will remain on the IENC and indicate the last known position of the buoy. Presence of a buoy mark on the IENC does not necessarily mean a buoy will be physically on position. When buoys are missing they will be replaced as soon as possible. LNM: 16-19

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, https://www.navcen.uscg.gov. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

During periods of high/low water flow conditions on the Mississippi River System, Captains of the Port, will issue Safety Advisories for their specific areas of responsibility via Broadcast Notice to Mariners. Mariners are encouraged to monitor the Sector Broadcast Notice to Mariners to ensure they are receiving the most up-to-date information.

operations. LNM: 03-23

DISCREPANCIES (FEDERAL AIDS)

Attached as an enclosure to this LNM is U.S. Coast Guard Sector Upper Mississippi MSIB 02-23, July notice of marine events and planned river closures.

SUNSET OF NOAA PRINTED CHARTS **** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart[™] PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: http://www.charts.noaa.gov/MCD/Dole.shtml.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at: https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html.

An online NOAA Custom Chart application at: https://devgis.charttools.noaa.gov/pod is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

The U.S. Coast Guard COTP Lower Mississippi River has issued a low water Safety Advisory between approximate Miles 869.0 and 303.0. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation. The U.S. Coast Guard COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, recommend the following limits for tows:

Transiting between Miles 869.0 and 725.0.

Drafts no greater than 11 feet and

Barges to be configured no more than 7 wide.

Transiting between Miles 725.0 and 303.0.

Drafts no greater than 11.6 feet and Barges to be configured no more than 7 wide.

Barges currently in the system, with drafts greater than the advised depths, should be placed as near to the center of the tow as possible. Mariners are requested to contact U.S. Coast Guard Sector Western Rivers Command Center via VHF-FM Channel 16 or at (866) 777-2784, to

UPPER MISSISSIPPI RIVER/ILLINOIS WATERWAY - BARGE/RAIL COLLISION RISK

LOWER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

report areas of shoaling, hazardous conditions or missing aids to navigation.
LNM: 30-23
LOWER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY

The U.S. Coast Guard COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, has placed a tow restriction from Mile 782.0 to Mile 777.0. All southbound tows are restricted to no more than 20 barges, after daylight hours. Mariners are requested to contact U.S. Coast Guard Sector Western Rivers Command Center via VHF-FM Channel 16 or at (866) 777-2784, to report areas of shoaling, hazardous conditions or missing aids to navigation.

Attached as an enclosure to this LNM is U.S. Coast Guard Sector Upper Mississippi River MSIB 08-21, regarding barge/rail collision risk on the Upper Mississippi River and Illinois Waterway.

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

SECTION V - ADVANCE NOTICES This section contains advance notice of approved projects, changes to aids to navigation, or upcoming temporary changes such as dredging, etc. Mariners are advised to use caution while transiting these areas. SUMMARY OF ADVANCED APPROVED PROJECTS pproved Project(s) one Mariners are advised to use caution while transiting these areas. SECTION VI - PROPOSED CHANGES Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the Distric office unless otherwise noted (see banner page for address). PROPOSED WATERWAY PROJECTS OPEN FOR PUBLIC COMMENT	Name	Status	Position	BNM Ref.	LNM St	LNM En

ALLEGHENY RIVER MILE 0.6 - BRIDGE MAINTENANCE Sixth Street Bridge; A containment system is installed below low steel and follows the contour of the bridge. Vertical clearance is reduced

affect navigation. Mariners are advised to transit the bridge with extreme caution.

Commencing July 24, 2023, and continuing through July 27, 2023, mariners may expect a delay at WD Mayo L/D Nr. 14, as workers conduct inspections. Work will be conducted daily, from 7:00 a.m. until 5:30 p.m. Mariners are advised to contact L/D Nr. 14, for the latest information and should schedule their activities around this notice. Mariners may contact Mr. Robert Steiner, Navigation Operation Manager, at (918) 775-4475 ext. 5833 or Mr. Jacob Simpson, Navigation Field Engineer, at (918) 430-4783, for additional information.

Continuing until further notice, concrete and deck repairs will be conducted on the I-64 Bridge. All vessels are directed to use the main navigation channel. Mariners may contact the I-64 Bridge crew on VHF-FM Channel 13 or 16, for further information.

Continuing until further notice, concrete and deck repairs will be conducted on the I-540 Bridge. All vessels are directed to use the main navigation channel. Mariners may contact the I-540 Bridge crew on VHF-FM Channel 13 or 16, for further information.

The upstream left descending pier protection cell at the Clinton Presidential Park Bridge in the vicinity of Mile 118.2, is damaged and leaning into the left descending bridge pier. Mariners are urged to exercise caution in the area. Mariners may contact the USACE Little Rock District Office at (501) 324-5096 or via e-mail at: ceswl-op-om@usace.army.mil, for additional information.

MILE 9.0 - MILE 0.0 - DREDGE OPERATION Continuing until approximately August 20, 2023, channel maintenance dredging is being conducted from Mile 9.0 to Mile 0.0. Dredging will begin at the mouth, Mile 0.0, and proceed to upstream locations ending at Mile 9.0. Operations will take place from 6:00 a.m. to midnight, Monday through Saturday. Disposal operations will take place at an approved site located on the Ohio River, between approximate Mile 321.0 and Mile 322.0, RDB. The contractor's floating plant consists of the M/V FLORENCE T., M/V BUS BROWN, two barge mounted cranes and six material barges. During non-working hours, the contractor's floating plant will be moored at the worksite and lighted accordingly. The M/V BUS BROWN will be used to transport material barges between the dredge site and the disposal area. The M/V FLORENCE T., will operate in the vicinity of the dredge site and should be contacted for passing arrangements. On-scene vessels will monitor VHF-FM Channel 13. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

To receive the latest information, monitor marine VHF channels 14 and 16, the SUMR Port Directory at <u>https://homeport.uscg.mil/port-directory/upper-mississippi-river-(st-louis)</u>. Questions may be directed to the Western Rivers Command Center at (314) 269-2332 or (314) 269-2463 – these numbers are continuously monitored. Or contact the Waterways Management staff at <u>SUMRwaterways@uscg.mil</u>.

Sincerely,

KI

R. G. Cherkauer Chief, Waterways Management Division U. S. Coast Guard By Direction

U.S. COAST GUARD Sector Upper Mississippi River

November 22, 2021 Marine Safety Information Bulletin # 08-21

Barge/Rail Collision Risk

This bulletin is in effect from November 22, 2021 until cancelled by the Captain of the Port.

Sector Upper Mississippi River (UMR) received multiple reports of barges encroaching on railroad right of ways (tracks, rail beds) in 2019. This was further documented in Sector UMR MSIB 01-20 and the Waterway Action Plan (WAP). Approximately 45 known areas on the UMR and Illinois River pose a risk for barge/rail collisions due to the close proximity between the rail right of ways and the river bank. Where rails are located near the river's edge, vessels are able to push in to an extent that part of the vessel/tow is in

This risk can be mitigated by vessel operators being vigilant when selecting where they push vessels into the river bank during all water conditions. The approximately 45 known areas of concern (see attached consolidated graphic)

are marked with caution areas on both printed and electronic versions of the Inland River Electronic Navigation Charts (IENC). These caution areas are accompanied by a warning noting the risk of collision between trains and vessels, and/or rail bed embankment erosion due to the close proximity between the railroad tracks and the waterway.

Sector UMR urges all vessel operators to review the IENC and the WAP for their intended operating areas to identify river bank locations to avoid pushing in at, as well as other potential hazards, as part of their voyage planning procedures prior to operation.

Operators are reminded that Title 33 Code of Federal Regulations (CFR) § 207.300(m)(2)(ii) directly prohibits the mooring of craft directly to railroad tracks or the riverbank in vicinity of railroad tracks. Violation of this regulation can result in enforcement action being taken against the operator's Merchant Mariner Credential as well as a civil penalty against the operating company.

To receive the latest information, mariners should monitor marine VHF channels 14 and 16, and the Sector UMR Port Directory at <u>https://homeport.uscg.mil/port-directory/upper-mississippi-river-(st-louis)</u> for this and other MSIBs and port advisories. Hazardous conditions and marine casualties should immediately be reported to the Western Rivers Command Center via VHF channel 16 or by phone at (314) 269-2332 or (314) 269-2463 – these numbers are continuously monitored 24 hours a day. Questions about this MSIB may be directed to the Waterways Management staff at <u>sumrwaterways@uscg.mil</u>.

Sincerely,

IC

R.M. SCOTT Captain of the Port U.S. Coast Guard
