SECTION I - SPECIAL NOTICES This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures. LNM: DPW/PRIV AIDS

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, https://www.navcen.uscg.gov. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report. INM: 07-19

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart[™] PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: http://www.charts.noaa.gov/MCD/Dole.shtml. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html

An online NOAA Custom Chart application at: https://devgis.charttools.noaa.gov/pod is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

SPECIAL NOTICE - HURRICANE SEASON 2023

The hurricane season extends from June 1, 2023 through November 30, 2023. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.

(f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM Weather Channel for National Weather Service Broadcasts.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico and surrounding waters may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position, as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation System marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) Region B and follow the traditional 3R rule of red, right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation, is generally considered as moving westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest Coast Guard unit.

During the hurricane season, drawbridges along the coast may deviate from normal operating procedures. Some bridges may be unable to open because of high winds. Others may have authorized extended closed periods to facilitate evacuation of land traffic. Mariners should anticipate bridge closures by listening to the National Weather Service and Coast Guard Broadcasts on hurricane conditions. Because of the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

Locks and Navigation Structures are operated to pass navigation, until such time that water levels and wind conditions warrant operations unsafe. The structures are then closed in accordance with hurricane preparation procedures. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may close on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

SPECIAL NOTICE - USACE NEW ORLEANS DISTRICT HURRICANE SEASON 2023

The hurricane season extends from June 1, 2023 through November 30, 2023. Locks and Navigation Structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe. The structures are then closed in accordance with Hurricane procedures. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible. General information for the New Orleans District can be found at: https://www.mvn.usace.army.mil

LA - PLAQUEMINES PARISH - JEFFERSON PARISH - LAFOURCHE PARISH - Partially Exposed Pipelines As a result of recent depth of cover surveys, multiple partially exposed pipelines on the Harvest Midstream pipeline system have been discovered in the inlets to the Gulf of Mexico, in Plaquemines Parish, Jefferson Parish and Lafourche Parish, LA. The pipelines remain underwater and vary from exposure at the mudline to approximately -4 inches below the mudline. The partially exposed pipelines are marked with cane poles and permanent PVC pipeline markers. Locations affected include, but are not limited to, the following areas and marshes/tributaries near: Bay Jacques, Plaquemines Parish, LA,

Bayou Jacques, Plaquemines Parish, LA, Spanish Pass, Plaquemines Parish, LA, Pass Abel, Plaquemines Parish, LA, Lake Washington, Plaquemines Parish, LA, Barataria Pass, Jefferson Parish, LA, Barataria Waterway, Jefferson Parish, LA, Caminada Pass, Lafourche Parish, LA, Bayou Fifi, Lafourche Parish, LA, Bayou Moreau, Lafourche Parish, LA, Catfish Lake, Lafourche Parish, LA and Cutoff Canal, Lafourche Parish, LA.

Included as an Enclosure to this LNM are positions and lengths for the partially exposed pipelines. Mariners should keep clear of all pipeline markers, transit these areas with caution, and refrain from fishing, trawling or anchoring in these areas.

The Old River Lock emergency bulkhead lowering carriage machinery has been repaired. Continuing through August 31, 2023, mariners may experience delays for up to 4-hours at Old River Lock, as removable building sheds are installed and demobilization occurs. Delays will take place during daylight hours only. For additional information, mariners may contact the Lockmaster, at (225) 492-3333. The project point of contact with the USACE New Orleans District is Russell Beauvais, at (225) 492-2169.

The Houston Ship Channel (HSC) widening project is complete between Houston Ship Channel Entrance Lighted Buoy 18 (LLNR-23900) and Houston Ship Channel Light 52 (LLNR-24175). The new main channel width between these aids is 700 ft, with additional barge lanes on either side of the channel measuring 235 ft wide by 12 ft deep. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) between HSC Lights 51 (LLNR-24170) and 52 (LLNR-24175) and HSC Lights 53 (LLNR-24180) and 54 (LLNR-24185). Hydrodynamic effects resulting in negative vessel interactions between HSC Lights 51/52 and HSC Lights 53/54 have been reported. Mariners should take into account the new channel dimensions, tapering of the channel between HSC Lights 51/52 and 53/54, location of the new aids to navigation, and their vessel's Electronic Chart Display and Information Systems (ECDIS) as they maneuver, meet, and overtake vessels in this area. In accordance with Section 7-11 of the Alabama-Coosa-Tallapoosa River Water Control Manual, dated May 2015, full navigation channel availability on the Alabama River is dependent upon seasonal flow conditions and channel maintenance. Due to lower flows in the summer and fall, channel availability is decreased during the months of June through November. Currently, a 13.9-foot tailwater elevation near Claiborne Lock is required on the Alabama River to provide a 9-foot channel to Montgomery, AL. Tailwater elevations near Claiborne Lock are updated daily and

The Dredge C.R. McCASKILL will be positioned perpendicular in the channel, with a floating hose crossing the Bayport Ship Channel from the red to the green side. During this period, the dredge will be able to move to accommodate the passage of small boats, barges and tugboats with radio coordination on VHF-FM Channel 72. All seagoing ships and deep draft vessels should coordinate passing arrangements at least 1-hour in advance, to allow the dredge to relocate and position itself outside the channel on the red side, west of Bayport Ship Channel Light 8 (LLNR-24500). Continuing until approximately December 31, 2023, the 262 BUCKET DREDGE will conduct dredge operations in the vicinity of Berth 7 and Three Bird Island Marsh. The Weeks Marine, Inc., 268 BOOSTER will remain on location for the project in position 29-36-57.17N 094-59-28.17W. All dredging operations are being conducted 24-hours a day, 7-days a week. Dredge, pipelines and equipment have all required U.S. Coast Guard lighting for night operations. Dredge, tugs and on-scene vessels will monitor VHF-FM Channels 13 and 16. Mariners should use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Attached as an enclosure to this LNM is additional information on the project, including placement site work limits, staging areas and subline crossing locations. Chart 11328

TX - HOUSTON SHIP CHANNEL - FIVE MILE CUT - Shoaling An artificial shoal consisting of misplaced dredged material has been reported near the Houston Ship Channel/Five Mile Cut Junction, approximately 50-feet north of the Five Mile Cut channel, in approximate position 29-36-36.77N 094-56-52.20W. The accumulation of dredged material has reduced water depths in the area to approximately 4-feet. Four danger buoys have been temporarily established to mark the shoal. Mariners are urged to use extreme caution when transiting the area.

Continuing through approximately January 2024, the Dredge GENERAL MACARTHUR will be conducting dredging operations in the Houston Ship Channel, from the Exxon Terminal near Baytown Bend to Morgan's Point, and also Barbours Cut. Dredging operations will begin upstream near the Exxon Terminal and proceed downstream. Dredged material will be placed in the Alexander Island Disposal Area. Occasional submerged pipeline crossings will be installed to facilitate dredging on the red side of the channel. All other submerged pipelines will be installed along the green side of the channel. All channel crossings and submerged pipelines will be marked per U.S. Coast Guard regulations. During dredging operations, the dredge will position along the outer portion of the channel, near either the red or green side, to reduce impacts to channel navigation. Additional on-scene vessels and equipment will include the M/Vs SEA OAK, SEA OTTER AND MR. ROLAND, a crane barge, an anchor barge and the Crewboat CALVARY SCOUT. All vessels will monitor VHF-FM Channel 13. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made. Continuing until further notice, dredging mobilization is taking place in the vicinity of the CEMEX Channelview DeZavala Cement Terminal, along the Houston Ship Channel. A submerged line associated with the project will be installed at the CEMEX Cement Terminal dredge site and follow Carpenters Bayou to a placement area west of the Sheldon Road Bridge. Time: 1736

NOAA Electronic Nautical Chart Update

The Captain of the Port (COTP) Houston-Galveston is notifying mariners of the recent updates made by NOAA for nautical charts within the lower Houston Ship Channel (HSC) from HSC Lighted Buoy 18 to the narrowing channel transition Lights 53 and 54. Mariners are advised to update their electronic charting devices to reflect current chart updates.

With the dredging suspended, surveys completed and Aids to Navigation (AtoN) set in this area, these new dimensions are available for use, however Mariners are advised to proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form: https://www.navcen.uscg.gov/?pageName=atonOutageReport

Please contact Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at 281-464-4851 if you have any questions.

Aids to Navigation Change in Houston Ship Channel

The Captain of the Port (COTP) is advising mariners of a change in channel dimensions within the lower Houston Ship Channel from Lighted Buoys 25 through Light 52, approximately Bolivar Roads to Redfish:

New Project 11 Channel dimensions are in effect for a section of the Houston Ship Channel from Lighted Buoy 25/26 (Station 128+000) to Lighted Buoys 51/52 (Station 79+000), known as Segment 1A.

Surveys have been successfully completed extending the width of the main channel to 700 feet wide with additional barge lanes on either side measuring 235 feet wide by 12 feet deep. Depths are based on Mean Lower Low Water in this section. USCG Aids to Navigation (AtoN) Teams have set all aids to navigation from Lighted Buoy 25 to Light 52 according to the new channel dimensions.

Currently NOAA charts "do not" reflect the new AtoN positions, however, USCG is actively working with NOAA to make chart corrections as soon as possible.

With the dredging suspended, surveys completed and AtoN set in this area, these new dimensions are available for use, however Mariners are advised to proceed with vigilance as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form: https://www.navcen.uscg.gov/?pageName=atonOutageReport

- <u>Current Operations</u>: Project work consists of dredging beach compatible sand from an offshore borrow area, transporting, and placing the excavated material along the beach extending from just southeast of Phillips Inlet to just northwest of St. Andrews Inlet. The TSHDs will dredge material from a permitted offshore borrow area, S1, that is located approximately 1.9 nautical miles southeast of St. Andrews Inlet. The TSHDs will pump the material to the beaches through 9 sublines situated along the length of the project.

A trawling vessel TBD will trawl simultaneously as the dredge(s) dig. Dredging and trawling operations will continue 24 hrs per day and 7 days per week.

The survey vessel Sun Fighter will conduct survey operations of the offshore borrow areas and pipeline corridors during daylight hours/7 days per week.

A turbidity vessel Ocean Runner will work to collect water samples within the vicinity of the dredge and the discharge location. Waterside equipment will be staged and stored in St. Andrews Bay as depicted in the attached drawings. A crew transfer vessel Sun Fighter will transfer crew between the shoreside boarding location at Bristol Harbor Marina and the equipment in the waterside staging area.

All equipment will be lighted as per USCG requirements.

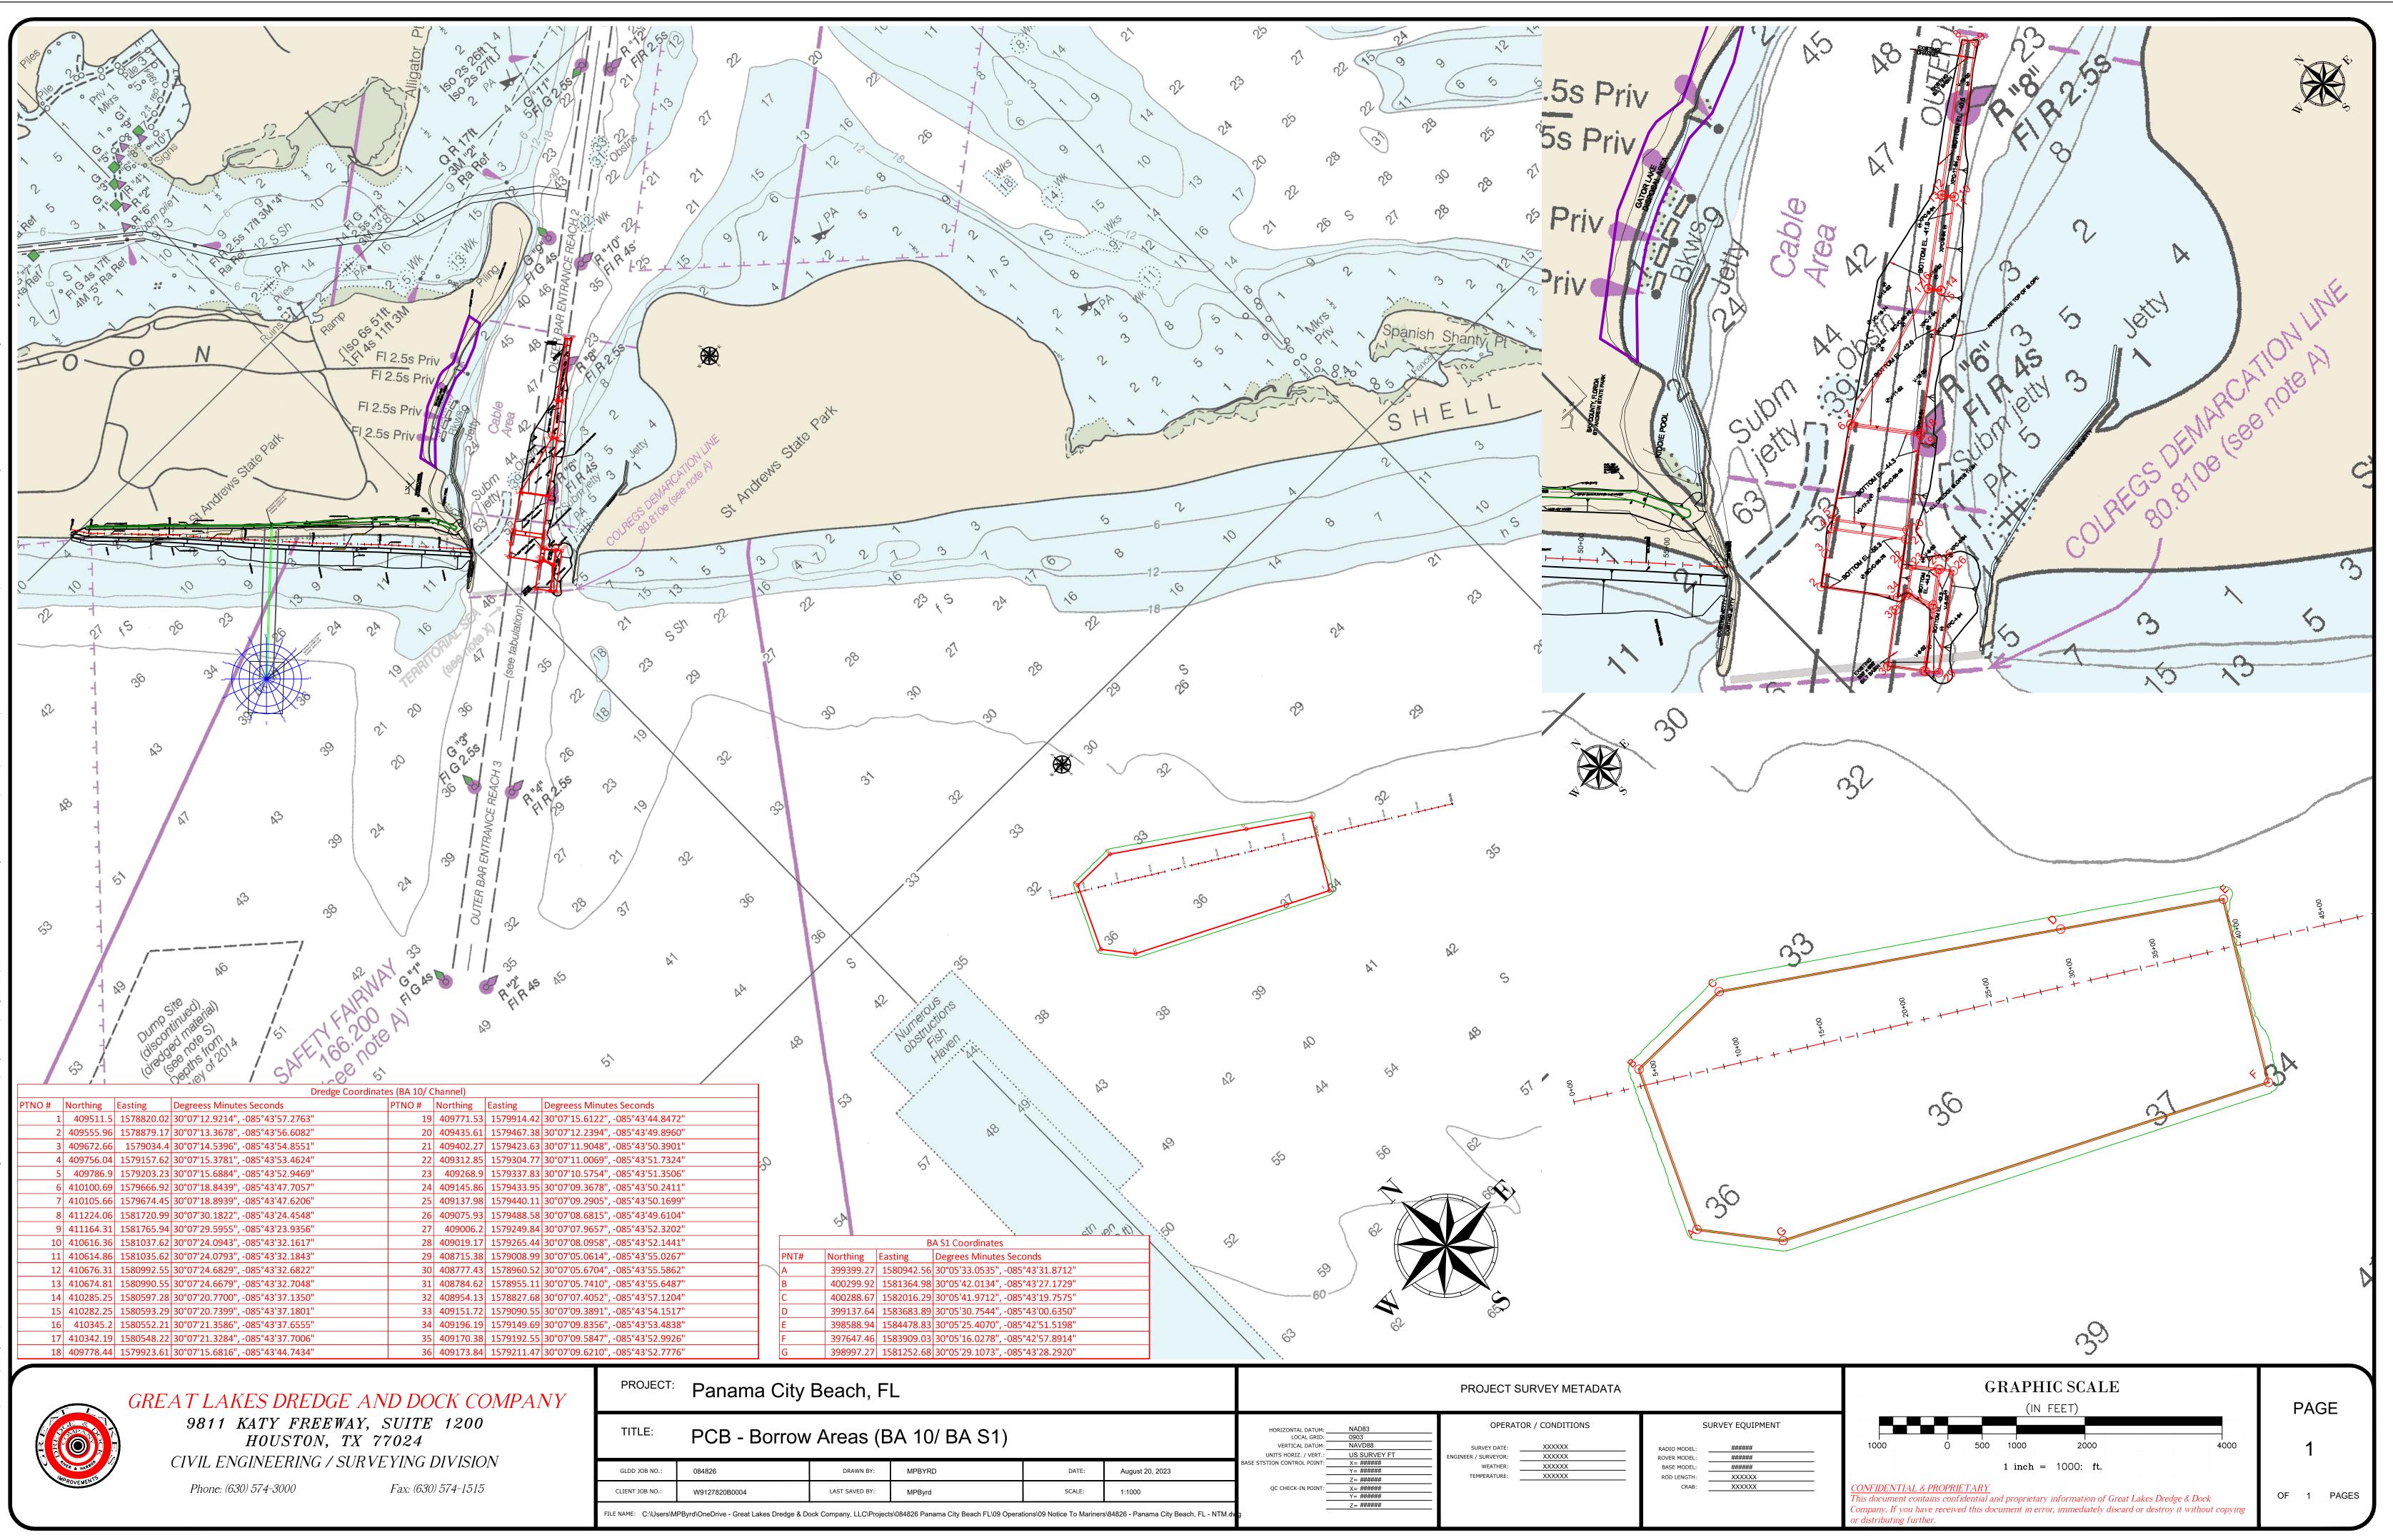

<u>Dredging Locations</u>: The attached maps indicate the current forecasted work areas including coordinates.

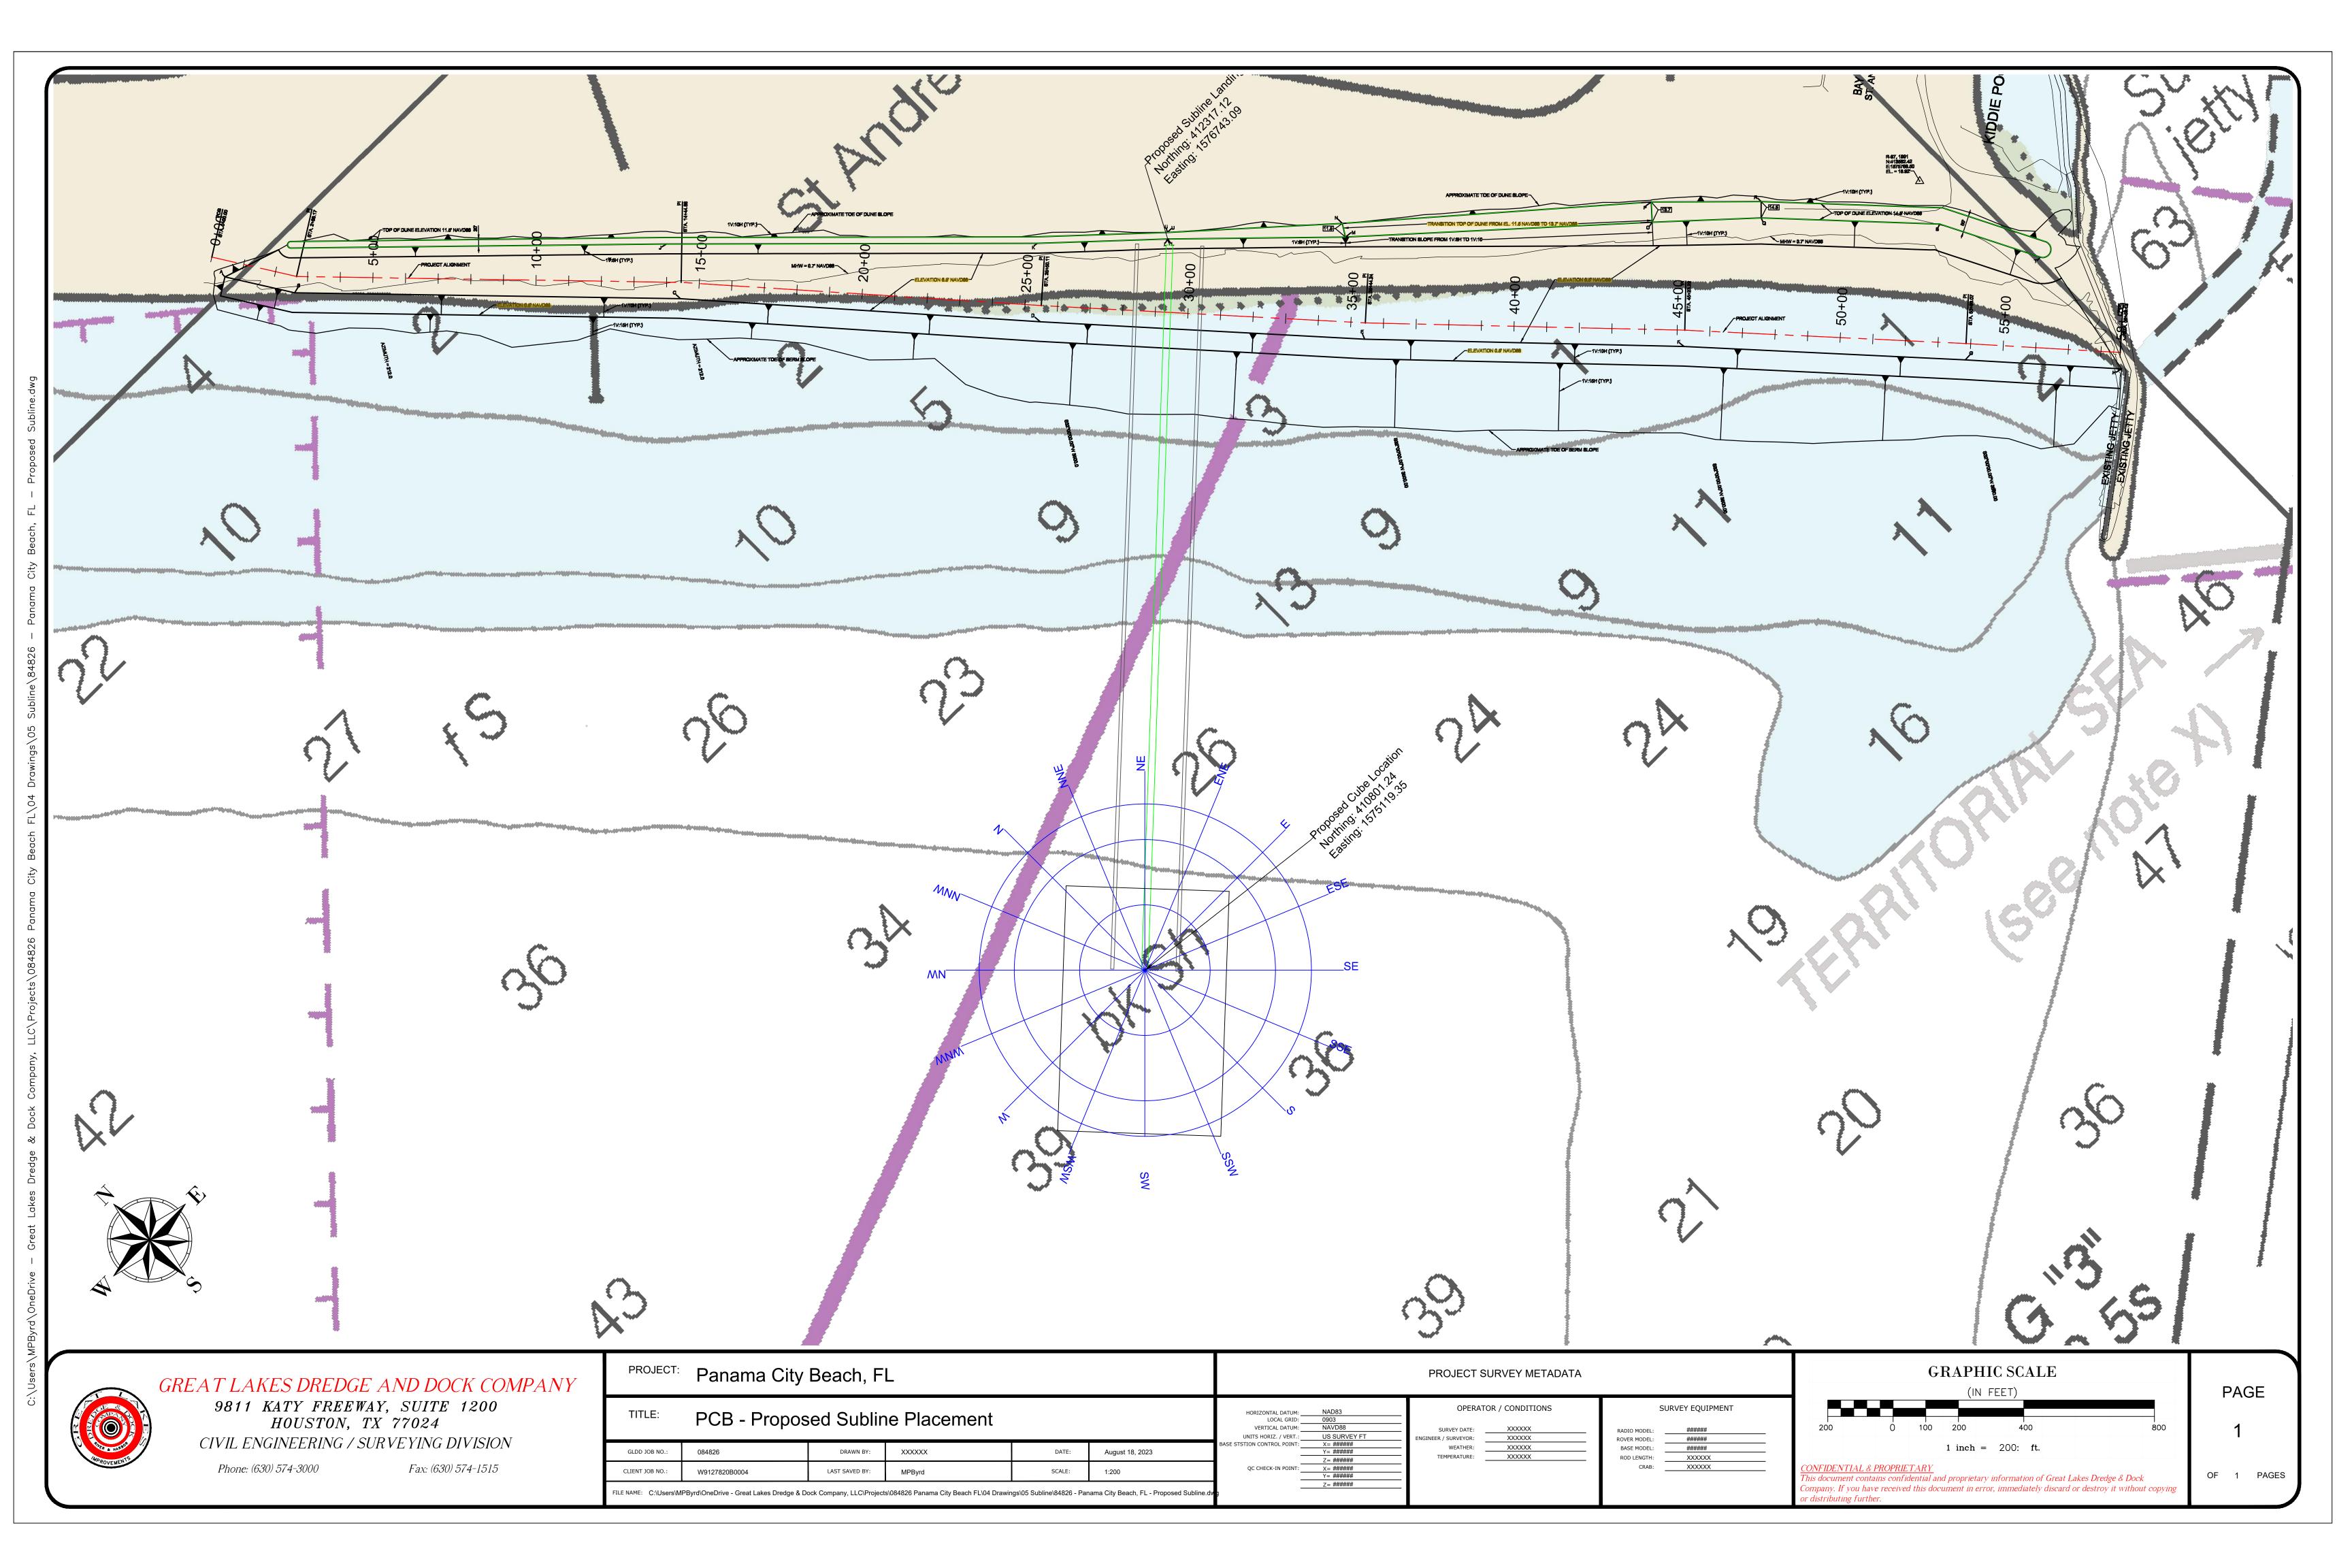

We will report project updates on status and changes in operations throughout the duration of the project via e-mail and/or phone. Should you have any questions concerning this project, please contact us immediately.

Subject: Notice to Mariners

Dear Sir or Madam:

Dredging operations will occur until approximately 31 December 2023. Dredge(s) and equipment will be operating in the vicinity of the HSC between station 16+000 (Lat 29°38'27.13"N, Long 94°57'56.81"W) and station 57+000 (Lat 29°32'35.11"N, Long 94°54'12.37"W) and in the BSC between station 42+08 (Lat 29°36'49.62"N, Long 95° 1'8.30"W) and station 239+22.31(Lat 29°36'57.31"N, Long 94°57'26.03"W).

Temporary Channel Obstruction in the Bayport Ship Channel: Starting approximately 10 August 2023 and continuing until approximately 30 September 2023, Weeks Marine "Weeks" hydraulic dredge "C.R. McCaskill" and attendant plant will be operating between the following GPS coordinates: Lat 29°36'50.00"N, Long 95° 1'3.00"W Lat 29°36'43.00"N, Long 95° 1'2.00"W Lat 29°36'46.00"N, Long 95° 0'30.00"W Lat 29°36'50.00"N, Long 95° 0'33.00"W

The C.R. McCaskill will be positioned perpendicular in the channel and the float hose will be crossing the BSC from the red to the green side. During this period, the dredge will be able to move to accommodate the passage of small boats, barges, and tugboats with radio coordination on VHF channel 72.

Additionally, the dredge will relocate and be positioned outside the channel on the red side, (west of R-LT "8"), to allow safe navigation for incoming/outgoing sea vessels or ships with a minimal notice of 1 hour. Weeks is requesting all vessel operators to exercise caution when transiting this area and follow any instructions or guidance provided by the dredge crew during this time.

Dredged material will be transported through a combination of floating and submerged pipeline to Three Bird Island Marsh (TBIM) placement site.

Work limits for placement site (TBIM) and PL corridor will be bound by the following approximate positions:

Lat 29°36'37.95"N, Long 94°56'52.29"W Lat 29°35'1.38"N, Long 94°55'45.03"W Lat 29°37'3.73"N, Long 94°52'4.92"W Lat 29°38'22.76"N, Long 94°53'6.79"W

Starting approximately 15 August 2023 and continuing until approximately 31 December 2023, Weeks' "262 Bucket Dredge" will be operating in the vicinity of Berth 7 and Three Bird Island Marsh.

Work limits for the BSC/Bayport Flare, staging area(s) for pipeline and equipment will be bound by the following approximate positions: Lat 29°36'55.32"N, Long 95° 1'17.04"W Lat 29°36'41.49"N, Long 95° 1'16.47"W Lat 29°36'21.86"N, Long 94°57'11.06"W Lat 29°37'14.98"N, Long 94°57'30.53"W

Weeks' "268 Booster" is located near GPS position: Lat 29°36'57.17"N, Long 94°59'28.17"W.

Work limits for the HSC, equipment staging area(s) and subline crossing will be bound by the following approximate positions:

Lat 29°38'24.44"N, Long 94°58'52.78"W Lat 29°38'44.69"N, Long 94°57'37.17"W Lat 29°36'46.01"N, Long 94°56'45.45"W Lat 29°32'35.38"N, Long 94°53'48.26"W Lat 29°32'7.22"N, Long 94°54'31.74"W Lat 29°35'29.92"N, Long 94°58'52.09"W

Weeks has reported a dredge subline leak located approximately 1,200-feet East of the Houston Ship Channel and approximately 50-feet North of 5-Mile Cut Channel near the following GPS positions: Lat 29°36'36.77"N, Long 94°56'52.20"W.

Approximately 290 cys of misplaced dredged material that built up to an elevation of 6-feet from natural bottom has reduced water depths in the area to approximately 4-feet. The artificial shoal has been marked with 4 danger buoys to alert the boaters. Small vessels traveling through 5-Mile Cut Channel are urged to take caution when transiting this area.

Weeks Marine is requesting a slow bell for all the vessels transiting the Houston Ship Channel (HSC) between Green Light "73" and Green Light "81". Mariners are urged to use extreme caution and transit this area at their slowest safe speed to create minimum wake after passing arrangements have been made.

Dredging operations will continue on a twenty-four (24) hours per day, seven days per week basis. Dredge, pipeline(s) and equipment will have all required Coast Guard lighting for night operations. Dredge, tugs and boats will monitor marine VHF channels 13, 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.
