SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC.

More information is available at the U.S. Coast Guard Navigation Center Website, https://www.navcen.uscq.gov. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart[™] PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: http://www.charts.noaa.gov/MCD/Dole.shtml. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html

An online NOAA Custom Chart application at: https://devgis.charttools.noaa.gov/pod is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

GPS TESTING

LNM: 07-19

LNM: DPW/PRIV AIDS

SPECIAL NOTICE - HURRICANE SEASON 2023

The hurricane season extends from June 1, 2023 through November 30, 2023. Tropical storms and hurricanes often develop with little warning. Extensive damage to small craft often results in loss of life. All mariners, particularly operators of small fishing vessels, are reminded that advanced planning which might prevent loss of vessel and crew should include:

- (a) Instruction of crew and passengers in location of emergency equipment and emergency procedures.
- (b) Presailing check of vessel, machinery, and equipment for seaworthiness.
- (c) Installation of strong ground tackle.
- (d) Review of storm center evacuation procedures.
- (e) Knowledge of nearest hurricane shelter or port.

(f) Constant radio watch on VHF-FM Channel 16 and frequent monitoring of VHF-FM Weather Channel for National Weather Service Broadcasts.

Due to tropical storms and hurricanes, mariners should be aware that aids to navigation along the coasts of Florida, Alabama, Mississippi, Louisiana and Texas, and on structures in the Gulf of Mexico and surrounding waters may have been damaged or destroyed. Lighted and unlighted buoys may have been moved from charted position, damaged, sunk, extinguished, or otherwise made inoperative. Mariners should not rely completely upon the position or operation of an aid to navigation, but should also employ such other methods of determining position, as may be available. Wrecks and submerged obstructions may have been moved from charted locations and pipelines may become uncovered or moved due to the force of storm surges. Storm surge and winds may create shoals in affected waters. The U.S. Aids to Navigation System marking wrecks and obstructions is intended for use with nautical charts. The exact meaning of a particular aid to navigation may not be clear to the mariner unless the appropriate nautical chart is consulted. Virtually all U.S. lateral marks are located in International Association of Marine Aids to Navigation and Lighthouse Authorities (IALA) Region B and follow the traditional 3R rule of red, right, returning. In U.S. waters, returning from seaward and proceeding toward the head of navigation, is generally considered as moving westerly along the Gulf Coast. Mariners should exercise caution and report aid to navigation discrepancies and hazards to navigation to the nearest Coast Guard unit.

During the hurricane season, drawbridges along the coast may deviate from normal operating procedures. Some bridges may be unable to open because of high winds. Others may have authorized extended closed periods to facilitate evacuation of land traffic. Mariners should anticipate bridge closures by listening to the National Weather Service and Coast Guard Broadcasts on hurricane conditions. Because of the uncertainty of hurricane movements and bridge closures, mariners are urged to seek passage through drawbridges well in advance of the arrival of gale force winds.

Locks and Navigation Structures are operated to pass navigation, until such time that water levels and wind conditions warrant operations unsafe. The structures are then closed in accordance with hurricane preparation procedures. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may close on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible.

LNM: 21-23

SPECIAL NOTICE - USACE NEW ORLEANS DISTRICT HURRICANE SEASON 2023

The hurricane season extends from June 1, 2023 through November 30, 2023. Locks and Navigation Structures operated by the U.S. Army Corps of Engineers will attempt to pass navigation until such time that water levels and wind conditions render operations unsafe. The structures are then closed in accordance with Hurricane procedures. Mariners will be given as much notice as possible when structures are to be closed; however, these structures may be closed on short notice well in advance of the actual storm. Mariners are advised to seek safe harbor as soon as possible. General information for the New Orleans District can be found at: https://www.mvn.usace.army.mil

Mariners using the following structures should consult the respective agency listed below for updates:

- GIWW Sector Gate (on the Inner Harbor Navigation Canal Surge Barrier) - Southeast Louisiana Flood Protection Authority-East

- Bayou Bienvenue Floodgate - Southeast Louisiana Flood Protection Authority-East

- Bayou Bienvenue Lift Gate Southeast Louisiana Flood Protection Authority-East
- Seabrook Sector Gate Southeast Louisiana Flood Protection Authority-East
- Bayou Dupre Floodgate Southeast Louisiana Flood Protection Authority-East

Information for the Southeast Louisiana Flood Protection Authority-East can be found at: https://www.floodauthority.org/

- Harvey Canal Sector Gate - Southeast Louisiana Flood Protection Authority-West

- GIWW West Closure Complex (WCC) - Southeast Louisiana Flood Protection Authority-West

- Bayou Segnette Sector Gate - Southeast Louisiana Flood Protection Authority-West

Information for the Southeast Louisiana Flood Protection Authority-West can be found at: https://slfpaw.org

- Bayou Verret Floodgate (also known as the Sellers Canal Floodgate) – St. Charles Parish Information for St. Charles Parish Government can be found at: https://www.stcharlesparish.gov/residents/emergency-preparedness

- Hero Canal Stoplog Gate - Plaquemines Parish

- Empire Lock - Plaquemines Parish

- Ostrica Lock – Plaquemines Parish

- Empire Floodgate - Plaquemines Parish

Information for Plaquemines Parish Government can be found at: https://plaqueminesparish.com/183/Homeland-Security-Emergency-Preparedness

- Larose Floodgate – Lafourche Parish

- Leon Theriot Lock (Golden Meadow) - Lafourche Parish

Information for Lafourche Parish Government can be found at: https://www.lafourchegov.org/emergency-information

- Bubba Dove Floodgate - Terrebonne Parish Information for status of the Bubba Dove Floodgate can be found at: https://tlcd.org/mobile/

LNM: 21-23

Mariners making plans to transit offshore Tallahassee, Panama City and Pensacola, Florida, are advised of frequent rocket activity and associated hazardous re-entry areas which may include, free-falling debris and/or descending vehicles or vehicle components, under various means of control. For additional information, mariners may contact U.S. Coast Guard Sector Mobile, at (251) 441-5940. Specific scheduled information and Marine Safety Information Bulletins (MSIB) can be found at the following website: https://homeport.uscg.mil/port-directory/jacksonville. Upcoming information and hazardous areas are also posted on the Patrick Air Force Base website: https://www.patrick.af.mil, or can be obtained by calling (800) 470-7232. Offshore Pensacola hazardous area, bound by the following approximate positions: 29-59-27.0N 087-30-00.0W, 29-48-00.0N 087-16-51.0W, 29-36-32.0N 087-30-00.0W and 29-48-00.0N 087-43-08.0W. Offshore Panama City hazardous area, bound by the following approximate positions: 29-54-25.0N 086-10-58.0W, 29-42-57.0N 085-57-50.0W, 29-31-29.0N 086-10-58.0W and 29-42-57.0N 086-24-07.0W. Offshore Tallahassee hazardous area, bound by the following approximate positions: 29-28-26.0N 084-12-00.0W, 29-16-58.0N 083-58-55.0W, 29-05-31.0N 084-12-00.0W and

LNM: 37-23

FL - GULF OF MEXICO - PENSACOLA - PANAMA CITY - TALLAHASSEE - Hazardous Operations

29-16-58.0N 084-25-04.0W. LNM: 20-23 AL - ALABAMA RIVER - Navigation Advisory In accordance with Section 7-11 of the Alabama-Coosa-Tallapoosa River Water Control Manual, dated May 2015, full navigation channel availability on the Alabama River is dependent upon seasonal flow conditions and channel maintenance. Due to lower flows in the summer and fall, channel availability is decreased during the months of June through November. Currently, a 13.9-foot tailwater elevation near Claiborne Lock is required on the Alabama River to provide a 9-foot channel to Montgomery, AL. Tailwater elevations near Claiborne Lock are updated daily and can be viewed at: https://water.weather.gov/ahps2/hydrograph.php?wfo=mob&gage=clba1.

Commercial mariners should check water levels daily and schedule lockage appointments by calling the Claiborne Lock Supervisor, at (251) 282-4575. Navigation Bulletins will be issued on an as-needed basis throughout the navigation season. For further information, mariners may contact Chad Brumelow or Anthony Perkins at the BWT/ Alabama-Coosa Project Management Office, at (205) 752-3571.

LA/MS/AL/FL - Uncrewed Surface Vehicle Operations Commencing September 19, 2023 and continuing until November 1, 2023, SeaTrac Systems, Inc., will deploy an Uncrewed Surface Vehicle (USV), the SP-48, to conduct ocean data collection. The uncrewed surface vehicle will operate in the waters offshore of Louisiana, Mississippi, Alabama and Florida, as it collects ocean current migration data from the loop current and the associated eddies. The USV will launch from the LUMCON Facility in Cocodrie, LA., and will be escorted by a support vessel to an area near Timbalier Island. The USV will then head south, under the supervision and control of the remote piloting team, to intersect the loop current in the Gulf of Mexico. The operational data collection area will be bound by the following approximate positions:

28-45-00N 092-00-00W, 28-45-00N 086-00-00W, 25-00-00N 086-00-00W and 25-00-00N 092-00-00W.

The SP-48 is a solar powered 4.8 meter long USV, with a cruising speed of 3 knots and a top speed of 5 knots. The USV is equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability, and is also marked with "UNCREWED" on the transom. Mariners are requested to avoid interfering with the USV data collection and to transit the area with caution. For further information, mariners may contact the project manager, at (978) 578-6645, or at: HBoeschenstein@SeaTrac.com. Attached as an enclosure to this LNM is additional project information and graphics of the USV SP-48.

LA - PLAQUEMINES PARISH - JEFFERSON PARISH - LAFOURCHE PARISH - Partially Exposed Pipelines

As a result of recent depth of cover surveys, multiple partially exposed pipelines on the Harvest Midstream pipeline system have been discovered in the inlets to the Gulf of Mexico, in Plaquemines Parish, Jefferson Parish and Lafourche Parish, LA. The pipelines remain underwater and vary from exposure at the mudline to approximately -4 inches below the mudline. The partially exposed pipelines are marked with cane poles and permanent PVC pipeline markers. Locations affected include, but are not limited to, the following areas and marshes/tributaries near: Bay Jacques, Plaquemines Parish, LA,

Bayou Jacques, Plaquemines Parish, LA, Spanish Pass, Plaquemines Parish, LA, Pass Abel, Plaquemines Parish, LA, Lake Washington, Plaquemines Parish, LA, Barataria Pass, Jefferson Parish, LA, Barataria Waterway, Jefferson Parish, LA, Caminada Pass, Lafourche Parish, LA, Bayou Fifi, Lafourche Parish, LA, Bayou Moreau, Lafourche Parish, LA, Catfish Lake, Lafourche Parish, LA and Cutoff Canal, Lafourche Parish, LA. Included as an Enclosure to this LNM are positions and lengths for the partially exposed pipelines. Mariners should keep clear of all pipeline markers, transit these areas with caution, and refrain from fishing, trawling or anchoring in these areas.

TX - HOUSTON SHIP CHANNEL - Channel Dimensions/Navigation Advisory

The Houston Ship Channel (HSC) widening project is complete between Houston Ship Channel Entrance Lighted Buoy 18 (LLNR-23900) and Houston Ship Channel Light 52 (LLNR-24175). The new main channel width between these aids is 700 ft, with additional barge lanes on either side of the channel measuring 235 ft wide by 12 ft deep. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) between HSC Lights 51 (LLNR-24170) and 52 (LLNR-24175) and HSC Lights 53 (LLNR-24180) and 54 (LLNR-24185). Hydrodynamic effects resulting in negative vessel interactions between HSC Lights 51/52 and HSC Lights 53/54 have been reported. Mariners should take into account the new channel dimensions, tapering of the channel between HSC Lights 51/52 and 53/54, location of the new aids to navigation, and their vessel's Electronic Chart Display and Information Systems (ECDIS) as they maneuver, meet, and overtake vessels in this area. Attached as an enclosure to this LNM are U.S. Coast Guard Sector Houston-Galveston's Marine Safety Information Bulletins (MSIBs) 13-23 and 19-23, with additional information on the HSC dimensions.

LNM: 30-23

SECTION II - DISCREPANCIES

This section lists all reported and corrected discrepancies related to Aids to Navigation in this edition. A discrepancy is a change in the status of an aid to navigation that differs from what is published or charted.

14.979N/093-51-16.539W, showing Q R, 3NM, red.

Charts: 11331 11343

The Coast Guard will be making the following Aids to Navigation changes after October 3, 2023: Change Chocolate Bay B Range Front Light (LLNR-37340) in approximate position 29-08-35.391N/095-09-46.867W, showing Q W, KRW-I on tower, for westbound traffic visible all around higher intensity on range line, to show Q W, KRW-I on tower, visible 1.5 degrees each side of range line.

Change Chocolate Bay B Range Rear Light (LLNR-37345) in approximate position 29-08-24.504N/095-10-04.832W, showing Iso W 6s, KRW-I on skeleton tower on piles, visible all around higher intensity on range line, to show Iso W 6s, KRW-I on skeleton tower on piles, visible 1.5 degrees each side of range line. Chart 11322

Relocate Neches River Lighted Buoy 2 (LLNR-23295) in approximate position 29-58-14.519N/093-51-18.144W, showing Q R, to position 29-58-

SECTION VI - PROPOSED CHANGES Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District

FL - GULF OF MEXICO - Temporary Research Buoys

Continuing through January 10, 2024, three lighted yellow research buoys have been temporarily established in the Gulf of Mexico, between 2 and 3 nautical miles offshore from Pensacola, Fort Walton Beach and Panama City Beach, FL. Each location will have mooring configurations that include one floating research buoy and two marker buoys. The research buoys will display a flashing 2.5 second yellow light at night and are located in the following approximate positions: Pensacola: 30-17-56.40N 087-08-00.67W

All vessels are required to remain clear of the hazard area during the mission periods. Hot range advisories and broadcast notice to mariners will be transmitted via VHF-FM Channel 16 and on HF Upper Sideband 2182 KHZ, by the Eqlin Joint Test and Training Operations Control Center (call sign:

area will be offshore in the Gulf of Mexico and in portions of Santa Rosa Sound, and is bound by the following approximate positions:

approximately 75 nautical miles south of Destin, FL. The hazard area will be bound by the following approximate positions:

FL - GULF OF MEXICO - U.S. Navy Operations On September 28 and 29, 2023, from 7:30 a.m. to 12:00 p.m., each day, the U.S. Navy will be conducting weapons testing in the Gulf of Mexico,

FL - GULF OF MEXICO - SANTA ROSA SOUND - U.S. Air Force Operation On September 21, 2023, from 1:00 p.m. to 5:00 p.m., the U.S. Air Force will be conducting munition launches off Santa Rosa Island, FL. The hazard

Charts: 11382 11385 11388 FL - GULF OF MEXICO - SANTA ROSA ISLAND - Naval Test Operations Continuing through September 30, 2023, the U.S. Navy will be conducting test operations off of Santa Rosa Island, approximately 15 nautical miles west of Destin Pass. The test area will be bound by the following approximate positions:

30-20-57.0N 086-47-18.0W. The test area will have equipment on the ocean floor and/or moored near the surface that may be hazardous. Testing equipment will extend from the beach out to approximately 50 feet of water depth. Deployed U.S. Navy equipment will be guarded and/or buoyed and will remain in the area for the duration of the operation. Helicopter operations associated with the testing will also take place within the test area. The Support Vessel TYSON B., will be on-scene and monitoring VHF-FM Channel 16. Mariners should transit the area with caution, heed all given instructions and maintain at least a 1 nautical mile closest point of approach from the test area.

All vessels are required to remain clear of the hazard area during the mission period. Hot range advisories and broadcast notice to mariners will be transmitted via VHF-FM Channel 16 and on HF Upper Sideband 2182 KHZ, by the Eglin Joint Test and Training Operations Control Center (call sign:

Charts: 11360 11382 11385 LNM: 28-23 FL - GULF OF MEXICO - ST. ANDREW BAY ENTRANCE CHANNEL - Beach Nourishment/Dredge Operation Continuing through approximately September 20, 2023, the mobilization of beach nourishment and dredging equipment will take place near Panama City, FL. The project staging area will be located in St. Andrew Bay along the GIWW, near Mile 288.0, EHL, and will be bound by the

following approximate positions:

30-09-27.41N 085-43-02.29W and 30-09-29.14N 085-42-54.78W.

Commencing on approximately September 21, 2023 and continuing through January 8, 2024, dredging and trawling will be conducted near Panama City Beach, FL. Dredging and trawling operations will be conducted offshore approximately 1.9 nautical miles southeast of St. Andrew Pass, in Borrow Area S1, and along the St. Andrew Bay Entrance Channel, in Borrow Area S10, from approximate position 30-07-05.74N 085-43-55.65W to 30-07-29.60N 085-43-23.94W. Dredged material will be transported through submerged lines and placed on the beaches from Phillips Inlet to St. Andrew State Park. Operations will be conducted 24-hours a day, 7-days a week. The Dredges PADRE ISLAND and DODGE ISLAND may work simultaneously or rotate assignments throughout the duration of the project. Additional on-scene vessels and equipment will include the Anchor Barge GL119, the Derrick Barge GL65, the Survey Vessel OCEAN RUNNER, two towing vessels, a crew boat, a trawling vessel, pontoon tanks and floating and submerged pipelines. All barges and equipment will have all required U.S. Coast Guard lighting for night operations. On-scene vessels will monitor VHF-FM Channels 05, 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Attached as an enclosure to this LNM is additional information for the project with illustrations of the

Operations will take place 24-hours a day, 7-days a week. Spoil areas for the project are marked with temporary lighted danger buoys. On-scene vessels will monitor VHF-FM Channels 13, 16 and 67. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made. Attached as an enclosure to this LNM is additional information associated with the project and positions for work areas, temporary lighted danger buoys and pipeline markings. Charts: 11352 11365

LA - MISSISSIPPI RIVER - GRAND PASS - Dredging Mobilization - UPDATE Continuing until approximately September 30, 2023, Weeks Marine, Inc., is mobilizing dredge pipelines and equipment for a Mississippi River-Head of Passes dredge project. Two staging areas are located in Grand Pass, Venice, LA., and are bound by the following approximate positions: Staging Area 1:

29-15-47.91N 089-21-02.55W. 29-15-48.83N 089-20-59.28W, 29-15-02.94N 089-20-41.91W and 29-15-02.04N 089-20-45.17W. Staging Area 2: 29-15-27.13N 089-21-02.19W, 29-15-21.89N 089-20-54.54W, 29-14-34.92N 089-20-39.66W and 29-14-33.85N 089-20-44.41W. The Borrow Site and Head of Passes staging area is bound by the following approximate positions: 29-09-43.09N 089-15-15.03W, 29-08-52.07N 089-15-15.17W, 29-08-06.53N 089-14-50.56W, 29-09-00.97N 089-13-58.51W, 29-10-15.81N 089-15-16.50W and 29-10-13.24N 089-15-27.48W. For the current staging and mobilization operation, the Dredge CAPTAIN FRANK will be operating in the Head of Passes work site. Operations will

be conducted during daylight hours only, 12-hours a day, 7-days a week. The dredge, equipment and pipelines will have all required U.S. Coast Guard lighting for night operations. The dredge and attendant plant will monitor VHF-FM Channels 13, 16 and 67. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Charts: 11360 11366 LNM: 37-23

LA - MISSISSIPPI RIVER, MILE 0.0 TO MILE 12.0, AHOP - Temporary Waterway Closure - UPDATE The VTS measures and waterway closures previously scheduled from September 10, 2023 through September 14, 2023, on the Mississippi River,

from Mile 0.0 to Mile 2.0, AHOP, and Mile 10.0 to Mile 12.0, AHOP, have been postponed. The revised schedule and future dates will be advertised by the U.S. Coast Guard VTS-Lower Mississippi River. Chart 11366 LNM: 37-23

LA - MISSISSIPPI RIVER, MILE 11.0, AHOP - Pipeline Removal/Temporary Waterway Restrictions - UPDATE Continuing through October 23, 2023, pipeline removal operations are being conducted in the Mississippi River, Mile 11.0, AHOP. Throughout the project, anchors will be placed in or near the navigation channel and will be adjusted between work phases. Pipeline removal operations will include intermittent dive operations; as well as, multiple vessels and anchored barges operating in or near the channel, which may impact navigation. The U.S. Coast Guard Vessel Traffic Service-Lower Mississippi River will establish a series of VTS measures for the waters of the Lower Mississippi River at Mile 11.0, AHOP. All vessels shall check-in with the Contact Pilot onboard the M/V BB-80 via VHF-FM Channel 67 for the most up-to-date sailing instructions. Check-in locations are as follows:

Southbound Traffic: Mile 22.0, AHOP (Bolivar Point)

Northbound Traffic: Mile 2.0, AHOP (Pilottown)

The pipeline removal operations schedule and associated VTS measures are as follows:

September 13, 2023 – September 19, 2023

Operating Hours: 24-hours a day, 7-days a week

29-32-08.57N 089-50-48.28W 29-32-01.63N 089-51-22.15W and 29-32-03.10N 089-51-23.07W.

Restrictions:

- Vessels shall transit the area at their slowest safe speed.
- Boothville Anchorage, south of Mile 14.0, AHOP, will be closed to all vessels.

- Vessels shall check-in with the Contact Pilot on the M/V BB-80 via VHF-FM Channel 67 at the check-in locations listed above.

September 20, 2023 – September 28, 2023

Operating Hours: 5:00 p.m. – 7:00 a.m. (in the channel) Restrictions:

- Vessels are limited to one way traffic.
- During operating hours, vessels with a draft greater than 35 feet are prohibited from transiting the area.
- During operating hours, vessels must use the bypass channel along the LDB.
- Boothville Anchorage, south of Mile 14.0, AHOP, will be closed to all vessels.

Vessels shall check-in with the Contact Pilot on the M/V BB-80 via VHF-FM Channel 67 at the check-in locations listed above.

For additional information, mariners may contact the Project Manager, Jake Voisine, at (337) 296-6467, or U.S. Coast Guard VTS-Lower Mississippi River on VHF-FM Channels 05A, 12 and 67.

LNM: 31-23

LA - MISSISSIPPI RIVER, RDB, MILE 48.0 TO MILE 52.0, AHOP - Temporary Waterway Restrictions Continuing until further notice, U.S. Coast Guard Vessel Traffic Service (VTS) Lower Mississippi River has established a series of VTS measures for all waters of the Lower Mississippi River, RDB, from Mile 48.0 to Mile 52.0, AHOP. In order to reduce the hazards associated with multiple dredging

operations, the following measures are in effect: 1. Point Celeste Anchorage, between Mile 49.8 to Mile 51.5, is closed to all vessels. Approximately 2,000 feet of the most northern portion of the anchorage is open for use.

2. Vessels seeking to anchor in the open portion of the Point Celeste Anchorage shall coordinate with Dredge J.S. CHATRY on VHF-FM Channel 16 or 67, or via phone at (985) 237-5041.

3. All vessels transiting between Mile 48.0 to Mile 52.0 should coordinate passing arrangements with the on-scene dredges, J.S. CHATRY and VIRGINIA WOOD, on VHF-FM Channel 16 or 67.

4. Mariners should transit the area at their slowest safe speed.

LA - MISSISSIPPI RIVER, MILE 53.0 TO MILE 55.0, AHOP - Construction Operations Continuing until approximately June 30, 2024, Weeks Marine and Massman Construction Co., are conducting construction operations for Venture Global at Mile 53.0, AHOP to Mile 55.0, AHOP, RDB, Lower Mississippi River. Operations will be conducted from 6:00 a.m. to 6:00 p.m., each day. The on-scene vessel, Tug ELIZABETH and supporting vessels, will be monitoring VHF-FM Channels 16, 65 and 67. Mariners are urged to transit at their slowest safe speed to minimize wake, provide a wide berth and proceed with caution after passing arrangements have been made. For additional information, mariners can contact Tug ELIZABETH, at (908) 436-7160 or Mark Spezia, at (314) 402-0658.

Continuing through October 31, 2023, the Dredge GEORGIA is conducting dredging operations in the Mississippi River, RDB, Mile 56.6, AHOP. Operations will be conducted 24-hours a day, 7-days a week. The dredge will monitor VHF-FM Channels 10 and 67. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

LA - MISSISSIPPI RIVER, LDB, MILE 98.0, AHOP - SEVENTH STREET WHARF - Dive Operation Continuing until approximately October 12, 2023, dive operations are being conducted at Seventh Street Wharf in the Mississippi River, LDB, Mile 98.0, AHOP. Operations will be conducted from 7:00 a.m. to 5:00 p.m., daily. On-scene vessels include the Barge SUPERIOR PURPOSE and a 25 ft utility boat. Dive operations will not impede or impact vessel traffic. On-scene vessels will monitor VHF-FM Channels 12 and 67. Mariners are urged to transit the area at their slowest safe speed to minimize wake, observe all day shapes and diving flags, and proceed with caution. For additional information, mariners may contact the on-scene project manager, at (504) 462-1717.

LA - GIWW - Belle Chase Bridge and Tunnel Replacement Project - UPDATE Continuing until February 2025, the Belle Chasse Bridge and Tunnel Replacement Project is being conducted in approximate position 29-52-18.7N operations will be conducted Monday through Saturday, during daylight hours only. The M/V DUTCHMAN will be on-scene monitoring VHF-FM Channel 16. Mariners are advised to use caution when transiting the area.

to open to vessel traffic from 6:00 a.m. to 8:30 a.m., and from 3:30 p.m. to 7:00 p.m., Monday through Friday, except on federal holidays. For

LA - RIGOLETS PASS, MILE 0.0 - CSX RAILROAD SWING BRIDGE - Modified Bridge Schedule Continuing through November 24, 2023, the CSX Railroad Swing Bridge, crossing Rigolets Pass, Mile 0.0, will undergo repairs and rehabilitation.

11:00 a.m. through 12:00 p.m., 2:00 p.m. through 3:30 p.m., and

5:30 p.m. through 8:29 a.m.

following times:

On the weekends and on holidays, the bridge will operate in accordance with regulations. For additional information on the project status, mariners should contact the CSX bridge tender via VHF-FM Channel 13. Chart 11367

During this time, the bridge will operate under a modified scheduled. The bridge will open on signal for vessels, Monday through Friday, at the

LA - LAKE PONTCHARTRAIN - SOUTHSHORE BUCKTOWN HARBOR - Construction Operation Continuing until approximately January 31, 2024, Luhr Crosby, LLC., is constructing riprap breakwater dikes off the south shoreline in Lake Pontchartrain, from the Bonnabel Boat Launch to the Bucktown Harbor Marina. Operations will be conducted during daylight hours only. A spud barge, fleeting rock loads, will be located in the work area throughout operations. Dredge pipeline and equipment are located at the south shore work site and extend approximately 1.4 nautical miles west of the Lake Pontchartrain Causeway. Eleven temporary lighted danger buoys have been established along the breakwater construction site in approximate positions:

The M/V JAMES CHRISTOPHER will monitor VHF-FM Channels 16 and 72. Mariners should transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information, mariners may contact Darwyn Jarrell, at

location and marked with temporary buoys displaying a flashing 2.0 second white light at night. The RIG 51B will monitor VHF-FM Channel 16. All vessels are requested to maintain a 500 ft closest point of approach and refrain from crossing the temporary buoy lines. Mariners are urged to

the Amite River. Operations will be conducted 24-hours a day, 7-days a week. On-scene vessels and equipment will include floating dredge pipeline, the Barge WILCO II, various work boats, and a Mud Tug. Dredged material will be transported via black floating pipelines, marked every 60 feet with an orange buoy and every 100-200 feet with an amber flashing light. An additional temporary 500 foot subline will be installed across the mouth of the Blind River to facilitate dredging in Dutch Bayou. On-scene vessels will monitor VHF-FM Channels 8 and 13. Mariners are requested to avoid the dredging work site, if possible, and to transit the area at their slowest safe speed to minimize wake. Attached as an enclosure to this LNM

LA - MISSISSIPPI RIVER, MILE 167.5, AHOP - SUNSHINE BRIDGE - Bridge Repair Continuing until approximately September 15, 2023, repairs are being made to the pier 4 bridge protection system on the Sunshine (SR 70) Bridge,

crossing the Mississippi River, Mile 167.5, AHOP, near Donaldsonville, LA. Operations will be conducted from 6:00 a.m. to 6:00 p.m., Monday through Friday. Repair work will be conducted on both sides of the pier. On-scene vessels will include the M/V RUDY T., and two work barges. The barges will extend approximately 100 feet from the pier into the channel. After hours, equipment associated with the project will be secured on the LDB. The M/V RUDY T., will monitor VHF-FM Channel 16. Mariners are urged to proceed with caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made. Charts: 11352 11370

Continuing through February 28, 2024, bridge fender replacement operations will be conducted on the I-10 Bridge crossing the Mississippi River, Mile 229.3, AHOP. Operations will be conducted Monday through Saturday, from 6:00 a.m. to 7:00 p.m. At times during the project, fender replacement operations may extend into the channel and cause delays. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution. For on-scene information, mariners may contact Ryan Finnie, at (321) 501-3936, or on VHF-FM Channel 21. Chart 11370

Continuing through July 31, 2024, dredging and debris removal operations will be conducted in Baton Rouge, LA., in University Lake, City Park Lake, and Lake Erie. Operations will be conducted Monday through Saturday, from 6:00 a.m. through 6:30 p.m. Dredged material will be placed in designated areas along the shorelines. Equipment on-scene will include a hydraulic dredge, two modular work barges, various shallow draft work boats, a push boat, a pontoon excavator, and 10-inch dredge pipelines. Mariners are urged to transit the area with caution. Chart 11354 LNM: 24-23

LA - BARATARIA WATERWAY - BAYOU DUPONT - Marsh Creation Demobilization - UPDATE Weeks Marine has completed operations for the Barataria Marsh Creation, Upper Barataria Component, in Jefferson and Plaquemines Parish, LA. Demobilization will continue until approximately October 21, 2023, in the vicinity of the Barataria Waterway and Bayou Dupont. Demobilization operations will take place 24-hours a day, 7-days a week. On-scene tugs will monitor VHF-FM Channels 13, 16 and 67. All barges and equipment will have all required U.S. Coast Guard lighting for night operations. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made.

Continuing until approximately March 17, 2024, Sunland Construction will be installing two elevated platforms and 42-inch diameter natural gas pipelines in the vicinity of Wilkinson Bay, LA., bound by the following approximate positions:

29-35-12.84N 089-54-17.87W, 29-26-14.07N 089-55-36.55W, 29-25-19.49N 089-52-22.95W 29-28-20.65N 090-00-18.91W, 29-28-24.64N 089-59-54.61W, 29-27-22.83N 089-59-05.97W, 29-26-56.06N 089-58-09.20W, 29-26-05.93N 089-57-11.93W 29-25-22.45N 089-56-04.46W, 29-25-25.03N 089-55-53.08W and

Charts: 11352 11365

Operations will be conducted 7-days a week, from 7:00 a.m. until 7:00 p.m. There will be 4 dredges, 4 tugs and 4 barges on-scene. The on-scene vessels will monitor VHF-FM Channels 16 and 65. Mariners are urged to use caution when transiting the area. Charts: 11352 11355 11358 11365

Continuing until approximately October 1, 2024, bridge construction operations are taking place on Bayou Lafourche, in Galliano, LA., approximately 1 mile south of the Galliano Pontoon Bridge, in position 29-25-28.0N 090-17-31.0W. Construction operations will occur between 7:00 a.m. and 5:00 p.m., Monday through Friday. Due to the staging of barges and construction equipment, the channel width will be reduced to approximately 59 feet. Vessels with a beam of 50 feet or greater should coordinate passing arrangements at least 24-hours in advance, by contacting Sea Level Construction, at (985) 870-1018. Work boats and construction crews will monitor VHF-FM Channel 13. Mariners are urged to proceed with caution and transit at their slowest safe speed to minimize wake. Charts: 11352 11365

LA - PORT FOURCHON - FLOTATION CANAL - Dredge Operation Continuing until February 2024, maintenance dredging operations are being conducted in the Port Fourchon Flotation Canal, between approximate positions 29-08-36.1N 090-13-11.6W and 29-09-16.2N 090-11-09.6W. Operations will be conducted 24-hours a day, 7-days a week. On-scene vessels will monitor VHF-FM Channel 13. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

Continuing until October 31, 2023, Bollinger Houma Shipyards, LLC., is conducting dredging operations on the southwest portion of the Houma Navigation Canal, between Mile 34.5 and Mile 35.0. Operations will be conducted during daylight hours only. Dredge JMS-3 will monitor VHF-FM Channels 16 and 69. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

LA - UPPER ATCHAFALAYA RIVER, RDB, MILE 42.0 - Stone Placement Continuing through November 30, 2023, Rigid Constructors, LLC., will be conducting stone placement operations on the Upper Atchafalaya River, near Mile 42.0, RDB, in Krotz Springs, LA. Operations will be conducted 12-hours a day, 7-days a week. On-scene vessels will include one spud

All of the red and green channel marker buoys on the Atchafalaya River, from Mile 50.0 to Mile 52.0, have been reported missing. Mariners should

mounted excavator barge, two towing vessels, two hopper barges and a crew boat. At times during the operation, vessels and equipment may partially obstruct the channel. Vessels will monitor VHF-FM Channel 10. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Chart 11354

Continuing until approximately November 30, 2023, the U.S. Government Contract Cutterhead Dredge SUSAN CROSBY is conducting dredging operations in Bayou Chene. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be deposited through a floating pipeline into disposal areas located along Bayou Chene. Dredging equipment, pipelines, work boats and support vessels will remain in the area throughout operations. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. The point of contact with the USACE New Orleans District is Tim Connell, at (504) 862-2630 or Anh Nguyen, at (504) 862-2153.

LA - GIWW - PORT ALLEN ALTERNATE ROUTE - BAYOU SORREL LOCK - Lock Closure and Construction Continuing through March 1, 2024, major marine construction activities are being conducted on the southwest guidewall and dolphin at Bayou Sorrel Lock. The lock will be closed to navigation from 7:00 a.m. to 4:00 p.m., Monday through Friday. During the scheduled closure times, opportunities to allow the passage of vessels may occur and will be utilized when possible. Mariners should enter with caution along the north side of the lock and avoid making contact with the southwest side construction activities. All northbound mariners with vessels greater than 35 feet wide are highly encouraged to use an assist boat faced-up on the bow of the lead barge acting as a bow thruster, when entering the lock from the south. All southbound mariners shall use extreme caution and maintain a slow bell while exiting the lock and until clear of the construction zone. Passage of vessels will be allowed during all other times, and queues will be managed by lock personnel to ensure the efficient reduction of vessel queues. For up-to-date information, mariners can contact the Lockmaster, Nicholas Bryant, at (225) 659-2581. The points of contact with the USACE New Orleans District are Tim Connell, at (504) 862-2360 and Anh Nguyen, at (504) 862-2153.

LA - PORT OF IBERIA - Dredge Operation Continuing until approximately April 2024, Crosby Dredging, LLC., will be conducting dredging operations at the Port of Iberia, in the Acadiana Navigation Canal, Commercial Canal and Rodere Canal. Dredging operations will take place between approximate position 29-51-10.80N 091-50-12.96W and 29-56-46.71N 091-51-05.64W. Operations will take place 24-hours a day, 7-days a week. Dredged material will be deposited through floating pipelines into a disposal area located along Commercial Canal. On-scene vessels and equipment will include the Dredges CROSBY DREDGER

and CROSBY 2, dredge pipeline and various support vessels. Mariners are requested to coordinate passing arrangements 2-hours in advance to allow the movement of dredges and equipment. On-scene vessels will monitor VHF-FM Channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Chart 11350 LNM: 34-23

LA - VERMILLION RIVER - Wreck A partially submerged vessel has been reported in the Vermillion River, approximately .25 nautical mile south of the Highway 14 Bypass Bridge in Abbeville, LA., in approximate position 29-58-18.0N 092-08-30.0W, on September 3, 2023. The vessel is reportedly not marked. Mariners are urged to transit the area with extreme caution. Chart 11350 LNM: 36-23

Continuing until approximately July 15, 2024, Luhr Crosby will be constructing a foreshore dike in Freshwater Bayou, approximately 1.3 to 2.3 nautical miles south of the GIWW junction in Intercoastal City, LA. A spud barge, fleeting rock loads, will be located in the same area throughout operations. Operations will be conducted during daylight hours only. The M/V CAPT WEBSTER and M/V DIAMOND BACK will be on-scene monitoring VHF-FM Channels 13, 16 and 72. Mariners are urged to transit the area at their slowest safe speed to minimize their wake and proceed with caution after passing arrangements have been made. For more information, mariners may contact Darwyn Jarrell, at (504) 628-0846. Charts: 11345 11349 INM: 20-23

Continuing through September 16, 2023, construction operations are being conducted on the Freshwater Bayou Lock approach walls and dolphins in Freshwater Bayou Canal. Operations will be conducted 24-hours a day, 7-days a week. Mariners are requested to coordinate passing arrangements at least 1-hour in advance with the Lockmaster on VHF-FM Channel 13, or with the project manager, at (504) 247-2648. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Charts: 11345 11349 11350 LNM: 37-23

Continuing through approximately January 28, 2024, the Dredge E. STROUD and attendant plant will be conducting dredging operations in the Freshwater Bayou Channel, from the channel entrance, in approximate position 29-28-30.0N 092-19-11.9W, to the Freshwater Bayou Locks, in approximate position 29-33-07.2N 092-18-18.0W. Operations will be conducted 24-hours a day, 7-days a week. Throughout operations, there will be various sections of connected submerged and floating pipeline leading to the disposal area. All pipelines will have all required U.S. Coast Guard lighting and markings for night operations. Mariners requiring movement of any dredge equipment are requested to coordinate passing arrangements at least 1-hour in advance. The dredge will monitor VHF-FM Channels 13 and 16, and can be contacted, at (337) 529-2081. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Charts: 11349 11350 LNM: 35-23

Mermentau Basin. The structure will reopen when water levels in the basin rise and salinity levels drop. All vessels and tows should use Leland Bowman Lock as an alternate route. For up-to-date information, mariners may contact the Lockmaster, at (337) 737-2470 or (337) 316-3662. The project point of contact with the USACE New Orleans District is Tracy Falk, at (504) 862-2971. Charts: 11349 11350 LNM: 33-23

Continuing until further notice, the Catfish Point Control Structure will go into a restricted locking procedure due to low water and high salinity in Grand Lake. The restricted procedures consist of locking vessels at the top of every hour, from 6:00 a.m. to 6:00 p.m., daily. For more information, mariners may contact Steven Vance, at (337) 540-3160. The project point of contact with the USACE New Orleans District is Tracy Falk, at (504) 862-2971.

Continuing until approximately January 15, 2024, water control systems maintenance and installation and shoreline protection operations are being conducted in the southern portions of Calcasieu Lake and West Cove. Operations will take place in the vicinity of Rabbit Island, Mangrove Bayou, Grand Bayou, Lambert Bayou and No Name Bayou. On-scene vessels will include two tugs and a barge that will remain in West Cove throughout the project, in approximate position 29-50-58.0N 093-21-14.0W. Vessels will monitor VHF-FM Channels 13 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution. For additional information, mariners may contact the project manager, at (337) 485-9953.

Continuing through March 19, 2024, dredging and material offloading operations will be conducted at Driftwood LNG in Sulphur, LA. Dredging operations will take place along the Calcasieu Ship Channel, near Mile 23.0, between approximate positions 30-06-10.76N 093-19-46.48W and 30-06-02.63N 093-19-43.67W. Additional dredging will take place along the GIWW, near Mile 241.5, WHL, between approximate positions 30-05-15.36N 093-19-45.74W and 30-05-06.82N 093-19-52.27W. Operations will be conducted from 6:00 a.m. to 5:00 p.m., Monday through Friday. On-scene vessels will include two towing vessels, a dredge barge, a disposal barge, two crew boats and four scow barges. Towing vessels will transport dredged material to disposal area BUDM 8, along the GIWW in approximate position 30-03-30.72N 093-29-29.89W. On-scene vessels will monitor VHF-FM Channels 11 and 16. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Attached as an enclosure to this LNM, are illustrations of the dredging areas and the disposal area. Charts: 11331 11339 11347 11348 INM: 32-23

The barge will cross the safety fairway utilizing a 7-point anchor spread with an anchor handling assist tug. Each safety fairway crossing will take approximately 4 days. On-scene vessels will monitor VHF-FM Channel 16. Mariners should use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Charts: 1116A 11330

Continuing until approximately September 4, 2024, Bechtel Energy, Inc., is conducting marine construction activities at the Port Arthur LNG Pioneer Dock 1, along the Port Arthur Canal, in approximate position 29-48-12.8N 093-57-20.1W. Offloading of construction equipment and materials for the marine terminal and shore facility will continue until approximately August 9, 2025. Operations will be conducted from 7:00 a.m. to 7:00 p.m., Monday through Saturday, with occasional Sundays. On-scene vessels will include the crane barge GALVESTON, T/Vs MISS TERRI and UNCLE GEORGE, and a survey boat. Vessels will monitor VHF-FM Channels 13 and 16. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution.

Continuing through approximately December 15, 2023, the Dredge KINGFISHER is conducting dredging operations in the vicinity of the Texaco Island intersection on the Sabine Neches Canal/GIWW, Mile 288.5, WHL. Dredging operations will be bound by the following approximate positions: 29-49-17.89N 093-57-23.10W, 29-49-19.20N 093-57-15.12W, 29-49-27.72N 093-57-14.21W and

Operations will be conducted 24-hours a day, 7-days a week. There will be approximately 800 ft of floating rubber pipe behind the dredge, and approximately 3,200 ft of submerged pipeline located at the project site. Dredged material will be disposed of in Placement Area 9A, located west of the Highway 87 Bridge. On-scene vessels will include two anchor barges, a supply barge, a fuel barge, and the T/Vs GLEN K., JESUS F., and SIDNEY B. The Dredge KINGFISHER requests a 1-hour advance notice from ship traffic and 30-minutes advance notice from inland tow traffic. The dredge will monitor VHF-FM Channels 3 and 13, and can be reached, at (361) 487-6470. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

Continuing until approximately October 31, 2023, Callan Marine is conducting dredging operations in the vicinity of Beaumont Riverfront Park, on the Neches River, north of the Neches River Railroad Bridge (Kansas City Southern Railroad Bridge). Dredge spoils will be transported by barge to Placement Area 26 on the Neches River. The dredge will monitor VHF-FM Channels 13 and 65A. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution. Chart 11343

TX - GALVESTON BAY ENTRANCE CHANNEL - Channel Condition Shoaling has been reported in the Galveston Bay Entrance Channel, reducing water depths to approximately 42 feet in the area. The shoal is approximately 3,000 yards long and located on the red side of the channel edge, near Galveston Bay Entrance Channel Lighted Buoy 4 (LLNR-23705). Galveston Bay Entrance Channel Lighted Buoys 1 through 9 have been set approximately 400 feet outside of the channel limit. Mariners are advised to utilize their Electronic Chart Display Information System (ECDIS) to confirm the plotted channel limits when transiting the area. USACE contracted dredging projects are underway to resolve the channel conditions. TX - GALVESTON HARBOR CHANNEL - Channel Condition/VTS Measures

In order to accommodate dredging operations, the U.S. Coast Guard has temporarily established Virtual Automatic Identification System (AIS) Aids to Navigation in the Houston Ship Channel for the following federal aids: Houston Ship Channel Light 55 (LLNR-24225) in approximate position 29-30-46.633N 094-52-55.789W, Houston Ship Channel Light 56 (LLNR-24230) in approximate position 29-30-52.076N 094-52-46.451W, Houston Ship Channel Light 57 (LLNR-24235) in approximate position 29-31-19.456N 094-53-21.117W, Houston Ship Channel Light 58 (LLNR-24240) in approximate position 29-31-24.882N 094-53-11.604W, Houston Ship Channel Light 59 (LLNR-24245) in approximate position 29-31-52.356N 094-53-46.341W, Houston Ship Channel Light 60 (LLNR-24250) in approximate position 29-31-57.748N 094-53-36.861W, Houston Ship Channel Light 61 (LLNR-24255) in approximate position 29-32-23.190N 094-54-10.153W, Houston Ship Channel Light 62 (LLNR-24260) in approximate position 29-32-28.735N 094-54-00.619W, Houston Ship Channel Light 63 (LLNR-24295) in approximate position 29-32-58.047N 094-54-36.877W, Houston Ship Channel Light 64 (LLNR-24300) in approximate position 29-33-03.463N 094-54-27.392W, Houston Ship Channel Light 65 (LLNR-24305) in approximate position 29-33-30.943N 094-55-02.132W, Houston Ship Channel Light 66 (LLNR-24310) in approximate position 29-33-36.282N 094-54-52.584W, Houston Ship Channel Light 67 (LLNR-24315) in approximate position 29-34-03.780N 094-55-27.409W, Houston Ship Channel Light 68 (LLNR-24320) in approximate position 29-34-09.147N 094-55-17.872W, Houston Ship Channel Light 69 (LLNR-24325) in approximate position 29-34-36.538N 094-55-52.603W, Houston Ship Channel Light 70 (LLNR-24330) in approximate position 29-34-41.855N 094-55-43.055W, Houston Ship Channel Light 71 (LLNR-24365) in approximate position 29-35-09.369N 094-56-17.905W, Houston Ship Channel Light 72 (LLNR-24370) in approximate position 29-35-14.726N 094-56-08.401W, Houston Ship Channel Light 73 (LLNR-24375) in approximate position 29-35-42.359N 094-56-43.291W, Houston Ship Channel Light 74 (LLNR-24380) in approximate position 29-35-47.726N 094-56-33.781W, Houston Ship Channel Light 74A (LLNR-24382) in approximate position 29-36-11.344N 094-56-51.235W, Houston Ship Channel Light 75 (LLNR-24385) in approximate position 29-36-26.609N 094-57-18.036W, Houston Ship Channel Light 76 (LLNR-24390) in approximate position 29-36-32.543N 094-57-04.620W, Houston Ship Channel Light 78 (LLNR-24520) in approximate position 29-37-12.541N 094-57-22.719W, Houston Ship Channel Light 81 (LLNR-24525) in approximate position 29-37-54.418N 094-57-50.431W and Houston Ship Channel Light 82 (LLNR-24530) in approximate position 29-37-57.318N 094-57-39.631W. Mariners are advised to exercise caution when transiting the area.

Chart 11326

Chart 11326

TX - HOUSTON SHIP CHANNEL - Dredge Operation Continuing through October 15, 2023, dredging operations will be conducting in the Houston Ship Channel, from Houston Ship Channel Light 52

TX - HOUSTON SHIP CHANNEL - BAYPORT SHIP CHANNEL - Dredge Operation

Continuing until approximately December 31, 2023, the Hydraulic Dredge C.R. McCASKILL and attendant plant are conducting dredging operations in the Houston Ship Channel and Bayport Ship Channel. The dredge and attendant plant will temporarily obstruct portions of the Bayport Ship Channel, until September 30, 2023, while operating between the following positions:

29-36-50.00N 095-01-03.00W, 29-36-43.00N 095-01-02.00W.

29-36-46.00N 095-00-30.00W and

29-36-50.00N 095-00-33.00W.

The Dredge C.R. McCASKILL will be positioned perpendicular in the channel, with a floating hose crossing the Bayport Ship Channel from the red to the green side. During this period, the dredge will be able to move to accommodate the passage of small boats, barges and tugboats with radio coordination on VHF-FM Channel 72. All seagoing ships and deep draft vessels should coordinate passing arrangements at least 1-hour in advance, to allow the dredge to relocate and position itself outside the channel on the red side, west of Bayport Ship Channel Light 8 (LLNR-24500) Continuing until approximately December 31, 2023, the 262 BUCKET DREDGE will conduct dredge operations in the vicinity of Berth 7 and Three Bird

LNM: 36-23

(LLNR-24175) to Houston Ship Channel Light 76 (LLNR-24390). Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be transported to a permitted offshore disposal site. On-scene vessels will monitor VHF-FM Channels 11, 12 and 13. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

Island Marsh. The Weeks Marine, Inc., 268 BOOSTER will remain on location for the project in position 29-36-57.17N 094-59-28.17W. All dredging operations are being conducted 24-hours a day, 7-days a week. Dredge, pipelines and equipment have all required U.S. Coast Guard lighting for night operations. Dredge, tugs and on-scene vessels will monitor VHF-FM Channels 13 and 16. Mariners should use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Attached as an enclosure to this LNM is additional information on the project, including placement site work limits, staging areas and subline crossing locations.

An artificial shoal consisting of misplaced dredged material has been reported near the Houston Ship Channel/Five Mile Cut Junction, approximately 50-feet north of the Five Mile Cut channel, in approximate position 29-36-36.77N 094-56-52.20W. The accumulation of dredged material has reduced water depths in the area to approximately 4-feet. Four danger buoys have been temporarily established to mark the shoal. Mariners are urged to use extreme caution when transiting the area.

Continuing through approximately January 2024, the Dredge GENERAL MACARTHUR will be conducting dredging operations in the Houston Ship Channel, from the Exxon Terminal near Baytown Bend to Morgan's Point, and also Barbours Cut. Dredging operations will begin upstream near the Exxon Terminal and proceed downstream. Dredged material will be placed in the Alexander Island Disposal Area. Occasional submerged pipeline crossings will be installed to facilitate dredging on the red side of the channel. All other submerged pipelines will be installed along the green side of the channel. All channel crossings and submerged pipelines will be marked per U.S. Coast Guard regulations. During dredging operations, the dredge will position along the outer portion of the channel, near either the red or green side, to reduce impacts to channel navigation. Additional on-scene vessels and equipment will include the M/Vs SEA OAK, SEA OTTER AND MR. ROLAND, a crane barge, an anchor barge and the Crewboat CALVARY SCOUT. All vessels will monitor VHF-FM Channel 13. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made.

TX - HOUSTON SHIP CHANNEL - CARPENTERS BAYOU - Dredge Operation Continuing until further notice, the Dredge EMIL KRUTZ is conducting dredging operations at the CEMEX Channelview DeZavala Cement Terminal, along the Houston Ship Channel, in approximate position 29-45-42.0N 095-05-29.0W. A submerged line associated with the project has been installed at the CEMEX Cement Terminal dredge site and follows Carpenters Bayou to a placement area west of the Sheldon Road Bridge. The onscene vessels will monitor VHF-FM Channels 3 and 13. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information, mariners may contact U.S. Coast Guard VTS Houston-Galveston, at (281) 464-4837.

The GIWW Galveston-Freeport F Range Front Light (LLNR-36645) has been reported as destroyed with wreckage on-scene along the GIWW, near position 29-17-24.939N 094-55-04.455W. The wreckage has been marked channelward with a white buoy displaying a guick flashing white light at night. Mariners should transit the area with extreme caution.

Continuing through December 31, 2023, the Dredges GENERAL PATTON and GENERAL MARSHALL are conducting dredging operations in Chocolate Bayou, from the Chocolate Bayou/GIWW junction to approximate position 29-14-08.3N 095-13-06.2W. Operations will be conducted 24-hours a day, 7-days a week. During dredging operations, the dredges will be located along the outer portion of the waterway and rotate into the channel via anchors set on either side of the channel. Dredged material will be transported via pipeline to placement areas located along the channel. Equipment will consist of steel pipe, floating rubber hoses, floating pipes and submerged pipelines. Sublines will be installed across the GIWW at sufficient depths so as not to interfere with navigation. All subline crossings will be lit and marked with buoys. All other pipeline routes will have all required U.S. Coast Guard markings and lighting for night operations. The dredges will monitor VHF-FM Channels 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made. Attached as an enclosure to this LNM is an illustration of the dredging project area.

Continuing through May 15, 2024, the Dredge MIKE HOOKS will be conducting dredging operations in the Matagorda Ship Channel, from Matagorda Ship Channel Light 19 (LLNR-27205), in approximate position 28-38-38.4N 096-33-18.0W, north to the Point Comfort Turning Basin, in approximate position 28-26-52.8N 096-21-21.6W. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be transported through floating and submerged pipelines to multiple disposal areas located near the project site. Dredge pipelines will have all required markings and U.S. Coast Guard required lighting for night operations. Vessels are requested to coordinate passing arrangements at least 1-hour in advance with the M/V MIKE HOOKS on VHF-FM Channels 13 or 16. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information, mariners may contact the dredge, at (337) 489-6793. Charts: 11300 11319 LNM: 36-23

Continuing through October 8, 2023, the Dredge NIMITZ will be conducting dredging operations in the GIWW, between Mile 470.0 and Mile 471.0, WHL. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be deposited in the open water placement area on the north side of the channel. On-scene equipment will include approximately 12,000 ft of dredge pipe, a supply barge, an anchor barge, a crane barge and three tending vessels. On-scene vessels will monitor VHF-FM Channels 16 and 79. The Dredge NIMITZ can also be reached via phone, at (713) 913-7207. Vessels are requested to avoid meeting or overtaking in the vicinity of the dredge operation. Mariners should transit at their slowest safe speed to minimize wake after passing arrangements have been made.

TX - COPANO BAY - FM-136 BRIDGE - Overhead Obstruction Utility lines hanging below the bridge deck have been reported on the FM-136 Bridge crossing the eastern corner of Copano Bay, in approximate position 28-04-23.933N 097-13-14.023W. The charted vertical clearance for the bridge may be reduced. Mariners are urged to transit under the bridge with extreme caution.

TX - ARANSAS BAY - BLACKJACK POINT - Oyster Farm Temporary Lights Blackjack Point Oyster Company has established an aquaculture farm marked with temporary special flashing 2.5 second yellow lights (FLY2.5s), in approximate position 28-06-48.63N 096-56-44.80W. All mariners are requested to avoid or navigate around this area. LNM: 19-23

Continuing through approximately October 10, 2023, dredging operations are being conducted in the Corpus Christi Ship Channel, from the Corpus Christi Channel Entrance, in approximate position 27-47-36.17N 096-57-47.52W, to the Port Aransas Ferry Terminal, in approximate position 27-50-29.62N 097-04-16.89W. Operations will be conducted 24-hours a day, 7-days a week. Dredged material will be transported to the Homeport Ocean Dredged Material Disposal Site. On-scene vessels will include the Dredge NEWPORT, M/V SPEEDY and the Trawler CAPT WICK. Vessels will monitor VHF-FM Channels 13, 16 and 66. Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. Charts: 11307 11309 11314

The Bay Yacht Club 2023 Pursuit Series will take place in Corpus Christi Bay from 9:00 a.m. through 3:00 p.m., on the following days: September 16, 2023 and October 21, 2023.

27-45-36.0N 097-19-04.0W and then return to the starting point. The participants will be monitoring VHF-FM Channel 68. Mariners should expect to see an increase in small vessel traffic on race days and during race hours and are urged to proceed with caution. Charts: 11307 11309 11311 LNM: 20-23

Continuing through October 15, 2023, dredging operations will be conducted in the Corpus Christi Inner Harbor near Avery Point Oil Dock 3, in approximate position 27-49-12.11N 097-25-57.94W. Operations will be conducted 24-hours a day, 7-days a week. On-scene vessels may include towing vessels, barges, crew boats and survey vessels. Vessels will monitor VHF-FM Channels 12 and 13. Mariners are urged to transit the area at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made.

TX - BROWNSVILLE SHIP CHANNEL - Dismantle and Disposal of Former U.S. Naval Vessels Continuing until December 31, 2024, the International Shipbreaking Limited, LLC., Brownsville will be dismantling and disposing of 2 U.S. Navy vessels in Brownsville, TX. The west boundary will be in approximate position 25-57-50.8N 097-21-50.0W and the east boundary will be in approximate position 25-57-57.8N 097-21-27.0W. All commercial vessels, tour vessels, and pleasure/fishing craft, should remain within the channel while passing the International Shipbreaking facilities. There will be overhead industrial work in progress which can pose a hazard to vessels in the vicinity of the facility. For additional information mariners can contact Arnie Tyler, Facility Security Officer, ISL, at (956) 831-2299, email at Arnie.tyler@internationalshipbreaking.com or Dan Richardson, U.S. Navy On-Site Representative (OSR), at (202) 489-1761, email Daniel.Richardson@supshipba.navy.mil.

LA/MS/AL/FL - Uncrewed Surface Vehicle Operations

SeaTrac 🗩

SeaTrac Uncrewed Surface Vehicle (USV) Deployment Notice

Summary

SeaTrac Systems intends to deploy its Uncrewed Surface Vehicle (USV), the SP-48, in the Gulf of Mexico for the purpose of ocean data collection between 09/19/2023 and 11/01/2023. The USV will be launched from LUMCON in Chauvin, LA and will be escorted by a support vessel to a departure location in the vicinity of Timbalier Island. At this point the SP-48 will be turned over to the remote pilot who will monitor and control the boat as it heads offshore to its operating area in the vicinity of the loop current or one of the associated Eddy's. Once on station, the SP-48 will run transects with the loop current and associated Eddy's to map and monitor the migration of the ocean currents and provide valuable real time data to help improve situational awareness and improve forecasting models.

The SP-48 will be monitored and controlled remotely from the SeaTrac office located at 100 Hoods Lane, Marblehead, MA 01945. The SP-48 is shown in the images below for reference.

The operational area is indicated in the image below, with the marker locations specified by latitude and Longitude. The SP-48 will be conducting work in and around the loop current (or Eddy's that split off from it), so the specific mission waypoints will vary based on environmental parameters but will be contained within the bounding box specified below.

Marker 1:	28:45:00,	-92 : 00 : 00
Marker 2:	28:45:00,	-86 : 00 : 00
Marker 3:	25:00:00,	-86 : 00 : 00
Marker 4:	25:00:00,	-92 : 00 : 00

Operating Dates

The system will be deployed in the operating area during the following dates:

09/19/2023 - 11/01/2022

Vehicle Description

The SP-48 is a 4.8 meter long, solar powered, USV that is intended to operate persistently for up to months at a time for the purpose of data collection and monitoring applications. The USV weighs ~650 lbs and has a cruising speed of 3 kts and a top speed of 5 kts. The USV is equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability, and is also marked with "Uncrewed" on the transom to clearly indicate the absence of personnel onboard. The pilot has real-time access to 360-degree cameras on board the USV for situational

awareness which can be accessed through redundant communications links (2 cellular and 2 satellite) for command and control of the vehicle.

Coast Guard Sector Houston-Galveston Marine Safety Information Bulletin 19-23

Time: 1736

NOAA Electronic Nautical Chart Update

The Captain of the Port (COTP) Houston-Galveston is notifying mariners of the recent updates made by NOAA for nautical charts within the lower Houston Ship Channel (HSC) from HSC Lighted Buoy 18 to the narrowing channel transition Lights 53 and 54. Mariners are advised to update their electronic charting devices to reflect current chart updates.

With the dredging suspended, surveys completed and Aids to Navigation (AtoN) set in this area, these new dimensions are available for use, however Mariners are advised to proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form: https://www.navcen.uscg.gov/?pageName=atonOutageReport

Please contact Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at 281-464-4851 if you have any questions.

Coast Guard Sector Houston-Galveston Marine Safety Information Bulletin 13-23

Date: 03/10/23

Time: 1358

Aids to Navigation Change in Houston Ship Channel

The Captain of the Port (COTP) is advising mariners of a change in channel dimensions within the lower Houston Ship Channel from Lighted Buoys 25 through Light 52, approximately Bolivar Roads to Redfish:

New Project 11 Channel dimensions are in effect for a section of the Houston Ship Channel from Lighted Buoy 25/26 (Station 128+000) to Lighted Buoys 51/52 (Station 79+000), known as Segment 1A.

Surveys have been successfully completed extending the width of the main channel to 700 feet wide with additional barge lanes on either side measuring 235 feet wide by 12 feet deep. Depths are based on Mean Lower Low Water in this section. USCG Aids to Navigation (AtoN) Teams have set all aids to navigation from Lighted Buoy 25 to Light 52 according to the new channel dimensions.

Currently NOAA charts "do not" reflect the new AtoN positions, however, USCG is actively working with NOAA to make chart corrections as soon as possible.

With the dredging suspended, surveys completed and AtoN set in this area, these new dimensions are available for use, however Mariners are advised to proceed with vigilance as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form: https://www.navcen.uscg.gov/?pageName=atonOutageReport

Please contact Sector Houston-Galveston WWM Division via houstonwwm@uscg.mil or the Command Center at 281-464-4851 if you have appressions.

L

RE: Local Notice to Mariners / Notice of Intent to Dredge

- Designation: USACE Contract No. W9127821C0007 Rehabilitation Effort for the Panama City Beaches Coastal Storm Risk Management Project United States Army Corps of Engineers
- <u>Contractor</u>: Great Lakes Dredge & Dock Company, LLC 9811 Katy Freeway, Suite 1200 Houston, TX 77024

Equipment:

TSHD Dodge Island TSHD Padre Island Survey Vessel/Turbidity Ocean Runner Derrick GL65 Anchor Barge GL119 Tug Mr Connor Tug TBD Trawler TBD Crew Transfer Vessel TBD

- <u>Contract Duration</u>: Contract Commencement Date: 08/31/2023 Contract Completion Date: 01/08/2024
- <u>Communications</u>: Marine VHF channels 05 and 13/16 Vessel Phone(s): TSHD Dodge Island – (305) 798-8540 TSHD Padre Island – (630) 303-9819
- <u>Current Operations</u>: Project work consists of dredging beach compatible sand from an offshore borrow area, transporting, and placing the excavated material along the beach extending from just southeast of Phillips Inlet to just northwest of St. Andrews Inlet. The TSHDs will dredge material from a permitted offshore borrow area, S1, that is located approximately 1.9 nautical miles southeast of St. Andrews Inlet. The TSHDs will pump the material to the beaches through 9 sublines situated along the length of the project.

A trawling vessel TBD will trawl simultaneously as the dredge(s) dig. Dredging and trawling operations will continue 24 hrs per day and 7 days per week.

The survey vessel Sun Fighter will conduct survey operations of the offshore borrow areas and pipeline corridors during daylight hours/7 days per week.

A turbidity vessel Ocean Runner will work to collect water samples within the vicinity of the dredge and the discharge location. Waterside equipment will be staged and stored in St. Andrews Bay as depicted in the attached drawings. A crew transfer vessel Sun Fighter will transfer crew between the shoreside boarding location at Bristol Harbor Marina and the equipment in the waterside staging area.

All equipment will be lighted as per USCG requirements.

<u>Dredging Locations</u>: The attached maps indicate the current forecasted work areas including coordinates.

We will report project updates on status and changes in operations throughout the duration of the project via e-mail and/or phone. Should you have any questions concerning this project, please contact us immediately.

WMI Serial Letter No.: 12220088-37

Reference: Grande Cheniere Ridge Marsh Creation Project (BA-0240) Plaquemines Parish, Louisiana

Subject: Notice to Mariners

Dear Sir or Madam,

Continuing until approximately 1 November 2023, hydraulic dredge "J.S. Chatry" will be operating in the Point Celeste Anchorage Area, Lower Mississippi River between Mile Marker (MM) 48 and MM 52, Above Head of Passes (AHP). The borrow area will be bound will be bound by the following approximate positions: 29°35'46.96"N, 89°50'28.13"W 29°36'0.70"N, 89°50'17.92"W 29°34'35.80"N, 89°48'36.05"W 29°34'50.27"N, 89°48'25.84"W

Point Celeste Temporary Anchorage Restrictions:

Point Celeste Anchorage, between MM 49.8 to MM 51.5, is closed to all vessels. Approximately 2,000 feet of the most northern portion of the anchorage is open for use. Vessels seeking to anchor in the open portion shall coordinate with the on-scene CG Designated Representative, Dredge "J.S. Chatry", on VHF channels 16 or 67 or via phone: (985) 237-5041. Vessels anchoring in Point Celeste Area shall provide a minimum of one-half mile buffer between their anchored position and the on-scene Dredge "J.S. Chatry" and/or Weeks Marine equipment, unless a deviation is authorized by the Designated Representative.

A submerged line is installed on the right descending bank (RDB) of the Mississippi River between MM 48 and MM 52 (AHP). The pipeline corridor will be bound by the following approximate positions: 29°35'13.19"N, 89°49'26.56"W 29°35'9.12"N, 89°49'29.35"W 29°34'21.01"N, 89°48'5.77"W 29°34'25.68"N, 89°48'2.73"W

Work limits for Marsh Creation Area(s) will be bound by the following approximate positions: 29°33'57.64"N, 90° 2'20.51"W 29°34'22.90"N, 89°48'5.91"W

29°30'46.29"N, 89°47'29.36"W 29°31'48.04"N, 90° 2'20.17"W

Starting 1 August 2023 until further notice, a canal located between the GPS coordinates provided below, will be closed due to marine construction to local and commercial vessel traffic: 29°32'11.84"N, 89°50'51.19"W 29°32'8.57"N, 89°50'48.28"W 29°32'1.63"N, 89°51'22.15"W 29°32'3.10"N, 89°51'23.07"W

Signs "Danger Marine Construction – No Throughway Canal Closed" will be installed to mark this area.

Dredging operations will continue on a twenty-four (24) hours per day, seven days per week basis. Dredge and attendant plant will monitor marine VHF channels 67,13 and 16. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made. Dredge(s) and equipment will each have all required U.S. Coast Guard lighting for night operations.

Reference: Houston Ship Channel (HSC) Expansion Channel Improvement Project (ECIP) Project 11: Redfish to Bayport HSC Sta 78+844 to HSC Sta 16+000 & Bayport Ship Channel (BSC) - Alternate B

Subject: Notice to Mariners

Dear Sir or Madam:

Dredging operations will occur until approximately 31 December 2023. Dredge(s) and equipment will be operating in the vicinity of the HSC between station 16+000 (Lat 29°38'27.13"N, Long 94°57'56.81"W) and station 57+000 (Lat 29°32'35.11"N, Long 94°54'12.37"W) and in the BSC between station 42+08 (Lat 29°36'49.62"N, Long 95° 1'8.30"W) and station 239+22.31(Lat 29°36'57.31"N, Long 94°57'26.03"W).

Temporary Channel Obstruction in the Bayport Ship Channel: Starting approximately 10 August 2023 and continuing until approximately 30 September 2023, Weeks Marine "Weeks" hydraulic dredge "C.R. McCaskill" and attendant plant will be operating between the following GPS coordinates: Lat 29°36'50.00"N, Long 95° 1'3.00"W Lat 29°36'43.00"N, Long 95° 1'2.00"W Lat 29°36'46.00"N, Long 95° 0'30.00"W Lat 29°36'50.00"N, Long 95° 0'33.00"W

The C.R. McCaskill will be positioned perpendicular in the channel and the float hose will be crossing the BSC from the red to the green side. During this period, the dredge will be able to move to accommodate the passage of small boats, barges, and tugboats with radio coordination on VHF channel 72.

Additionally, the dredge will relocate and be positioned outside the channel on the red side, (west of R-LT "8"), to allow safe navigation for incoming/outgoing sea vessels or ships with a minimal notice of 1 hour. Weeks is requesting all vessel operators to exercise caution when transiting this area and follow any instructions or guidance provided by the dredge crew during this time.

Dredged material will be transported through a combination of floating and submerged pipeline to Three Bird Island Marsh (TBIM) placement site.

Work limits for placement site (TBIM) and PL corridor will be bound by the following approximate positions:

Lat 29°36'37.95"N, Long 94°56'52.29"W Lat 29°35'1.38"N, Long 94°55'45.03"W Lat 29°37'3.73"N, Long 94°52'4.92"W Lat 29°38'22.76"N, Long 94°53'6.79"W

Starting approximately 15 August 2023 and continuing until approximately 31 December 2023, Weeks' "262 Bucket Dredge" will be operating in the vicinity of Berth 7 and Three Bird Island Marsh.

Work limits for the BSC/Bayport Flare, staging area(s) for pipeline and equipment will be bound by the following approximate positions: Lat 29°36'55.32"N, Long 95° 1'17.04"W Lat 29°36'41.49"N, Long 95° 1'16.47"W Lat 29°36'21.86"N, Long 94°57'11.06"W Lat 29°37'14.98"N, Long 94°57'30.53"W

Weeks' "268 Booster" is located near GPS position: Lat 29°36'57.17"N, Long 94°59'28.17"W.

Work limits for the HSC, equipment staging area(s) and subline crossing will be bound by the following approximate positions:

Lat 29°38'24.44"N, Long 94°58'52.78"W Lat 29°38'44.69"N, Long 94°57'37.17"W Lat 29°36'46.01"N, Long 94°56'45.45"W Lat 29°32'35.38"N, Long 94°53'48.26"W Lat 29°32'7.22"N, Long 94°54'31.74"W Lat 29°35'29.92"N, Long 94°58'52.09"W

Weeks has reported a dredge subline leak located approximately 1,200-feet East of the Houston Ship Channel and approximately 50-feet North of 5-Mile Cut Channel near the following GPS positions: Lat 29°36'36.77"N, Long 94°56'52.20"W.

Approximately 290 cys of misplaced dredged material that built up to an elevation of 6-feet from natural bottom has reduced water depths in the area to approximately 4-feet. The artificial shoal has been marked with 4 danger buoys to alert the boaters. Small vessels traveling through 5-Mile Cut Channel are urged to take caution when transiting this area.

Weeks Marine is requesting a slow bell for all the vessels transiting the Houston Ship Channel (HSC) between Green Light "73" and Green Light "81". Mariners are urged to use extreme caution and transit this area at their slowest safe speed to create minimum wake after passing arrangements have been made.

Dredging operations will continue on a twenty-four (24) hours per day, seven days per week basis. Dredge, pipeline(s) and equipment will have all required Coast Guard lighting for night operations. Dredge, tugs and boats will monitor marine VHF channels 13, 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.

TX - GIWW - CHOCOLATE BAYOU - Dredge Operation
