Additional MSI Categories

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Via Mississippi River And Harvey Canal - Algiers Alternate Route/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Algiers Canal – GIWW – Lock Precautions --- From: 2026-06-23 To: Until Further Notice --- Mariners are to avoid making contact with the canal end long guidewall at Algiers Lock, due to deteriorating timbers and wall instability. Additionally, Algiers Lock is experiencing surges in the lock chamber due to the low water in the Mississippi River and the Algiers Canal. Tows are to navigate with extreme caution while entering and exiting the lock and at slow safe speeds to avoid the canal long guidewall area entirely. If mariners experience a surge, it is recommended that they back out slowly while maintaining control to allow the surge to settle. For up-to-date information, the Lockmaster at Algiers Lock can be reached at (504) 354-1795 or the Lockwall can be contacted at (504) 354-1861.

Harlingen-Port Isabel - Arroyo Colorado Cutoff Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Arroyo Colorado River - Dredge Operation --- From: 2026-09-04 To: 2027-01-31 --- The Dredge RANGER will conduct dredging operations from the mouth of the Arroyo Colorado River Cutoff Channel to Rio Hondo, approximate Mile 20.0. Dredging will start near the mouth of the river and proceed west towards the Port of Harlingen. Operation will take place 24-hours a day, 7-days a week. On-scene vessels and equipment will include approximately 15,000 linear ft of pipe, two supply barges, one anchor barge, one crane barge, a fuel barge, and three tender boats. The Dredge RANGER requests vessels transiting this stretch of the river coordinate passing arrangements at least 45-minutes in advance. Mariners are requested to avoid meeting or overtaking in the area and should transit at their slowest safe speed to minimize wake. VHF-FM Channels; 13 and 16, POC: (713) 913-7205

Mariners are urged to transit the area at their slowest safe speed to minimize wake. VHF-FM Channel: 13, POC: (630) 207-5196	Lat: 29° 47' 49" Lon: -093° 19' 44"
Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Calcasieu Channel - Material Offloading --- From: 2026-03-15 To: 2027-03-15 --- Material offloading will be conducted along the west side of the Calcasieu Channel near Mile 0.3. On-scene vessels will include hopper barges and towing vessels. Mariners are urged to transit the area with caution and at their slowest safe speed to minimize wake. POC: (337) 247-1071 or (337) 519-1163	Lat: 29° 46' 20" Lon: -093° 20' 49"

Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Calcasieu Channel - GIWW - Dredge Operation --- From: 2026-03-10 To: 2026-09-26 --- The Dredge OHIO will be dredging along the Calcasieu River near the intersection with the GIWW, approximate River Mile 22.5, for the Louisiana Woodside LNG project. Approximately 8.5 miles of pipeline and booster pumps have been installed and staged from the dredging area along the Calcasieu Channel, routed through Choupique Bayou, and into the GIWW along the northern edge and outside of the navigable limits. Floating and submerged pipelines along with a series of Boosters are located between GIWW Miles 241.0 and 252.0, WHL. A subline crossing is located between GIWW Miles 249.0 and 250.0, WHL, near the Booster ERIN. On-scene vessels include the Boosters TEXAS JR, JESSIE, BUSTER, REGGIE, CAPTAIN BARNEY, and ERIN C, Anchor Barges 112 and 120, Derrick Barges 66 and 72, T/Vs SMITH BUCCANEER, KJ LEBOEUF, CAPTAIN EDDIE, and EMILY A HERBERT, and the Crew Vessels TARPON 1, TARPON 3, JOHN NEWMAN, and COLUMBIA RIVER. All dredge pipeline will be marked with buoys and lighted accordingly. Barges and vessels are requested to avoid staging on the north side of the GIWW between the project limits. Mariners are urged to use caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (630) 247-6207	
Sector Houston-Galveston, Submerged Land Act (SLA) - Calcasieu Channel/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Calcasieu Channel - Material Offloading --- From: 2026-06-01 To: 2027-06-30 --- Material offloading will be conducted along the Calcasieu Channel in the vicinity of Mile 23.0, RDB. Work will take place Monday through Saturday, during daylight hours. On-scene vessels will include the T/V REPENTANCE, deck barges, and hopper barges. Mariners are requested to transit the area at their slowest safe speed to minimize wake or wash, and proceed with caution between Miles 22.0 and 23.0 due to LA-LNG marine construction activities. South Pass - Head Of Passes To New Orleans/General/MSIB	MSIB	MSIB Vol XXVI Issue 027 - Mississippi River - Low Water Safety Advisory --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to Mile 303.0, AHOP, when the Baton Rouge River gauge reads 16 ft and below and the Carrollton gauge reads 2.5 ft and below: A. Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water to ensure the safe and efficient movement of vessels. B. Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship’s wake. C. Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. D. Aids to Navigation discrepancies should be reported to the U.S. Coast Guard Sector New Orleans Command Center. E. Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. F. Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. -- Mariners are reminded the sailing line, between Miles 0.0 and 232.0, follows a path through naturally deep water connected by twelve marked channels known as “crossings.” Low water conditions have significantly reduced water depths in areas of the river outside the sailing line, where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit at the following: https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/?utm_medium=email&utm_source=govdelivery	Lat: 29° 10' 30" Lon: -089° 15' 53"

Galveston Bay Entrance Channel - Houston Ship Channel/General/Bridges/Construction	Bridges	Houston Ship Channel - Bridge Construction --- From: 2025-07-24 To: February 2027 --- The Harris County Toll Road Authority (HCTRA) and a contractor will commence over-the-water construction of the new Beltway 8 (Sam Houston Tollway Ship Channel Bridge) over the Houston Ship Channel. Overhead construction on areas outside the navigable channel will continue through approximately September 2026. The U.S. Coast Guard Captain of the Port Houston-Galveston has established Safety Zones for the waters outside the federal channel surrounding the existing pillars. Vessels transiting this area are directed to utilize the marked federal channel and should remain clear of transiting beneath the overhead work. Channel closures to support work over the federal channel are expected to commence mid-October 2026. Overnight closures, likely in the 8 to 10 hour range, every other night for a week will be needed. Following a round of overnight closures, the U.S. Coast Guard VTS will schedule 2-3 hour blocks of no traffic in daylight hours to allow for deck placement. A pattern of these closures are expected to continue for 3-4 months. Additional planning meetings focused on minimizing disruptions will be held with Port Partners as the closure dates approach. Mariners are urged to transit this area with extreme caution and check updated notices regarding closures prior to transiting the area.	Lat: 29° 44' 10" Lon: -095° 08' 45"
Galveston Bay Entrance Channel - Houston Ship Channel/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Houston Ship Channel – Shoaling --- Reported: 2026-08-04 --- The U.S. Army Corps of Engineers Galveston District recent surveys indicate shoaling to 40 ft from the green side of the channel to centerline, between Houston Ship Channel Light 109 (LLNR-25250) and Houston Ship Channel Light 111 (LLNR-25275). Vessel operators should pay due regard to the survey and transit the area with extreme caution. The USACE will be taking immediate action for dredging operations to remove the shoal and return the area to the authorized depth. The USACE survey report is available at the following: https://www.swg.usace.army.mil/Portals/26/Missions/Operations/Navigation/HydroSurveyData/02_GTCH/HS/HS_04_MPE.pdf

Work will take place with crews working under the docks at various times during daylight hours. Mariners should transit the area with caution and at their slowest safe speed to minimize wake. POC: (281) 806-6004	
Galveston Bay Entrance Channel - Houston Ship Channel/General/MSIB	MSIB	Houston Ship Channel - Morgans Point - VTS USI Canal/San Jacinto Bay Channel Directive --- The USI Canal/San Jacinto Bay Channel has become increasingly trafficked over the last 2 years. For various reasons, many tows attempt to reconfigure between Morgans Point and Exxon to go into or come out of the USI Canal. This practice has resulted in several near miss situations between Morgans Point and the Exxon Terminal in the Houston Ship Channel. In order to fulfill the VTS mission of reducing risk of collision, allision, damage, pollution, and injury, the following Directive is in effect and will be written as policy in documentation updates to the U.S. Coast Guard VTS Houston-Galveston User Guide: • Vessel Traffic Service Houston-Galveston Directs no barge work in the Houston Ship Channel between Morgans Point and Exxon for purposes of going into/out of the USI Canal. •	
Galveston Bay Entrance Channel - Houston Ship Channel/ATON/Proposed Notice of Change	Proposed Notice of Change	In order to provide a more efficient and effective Aids to Navigation signal, the Coast Guard is proposing the following Aids to Navigation Change: Change Upper Galveston Bay Outer Range Front Light (LLNR-24205) in position 29-28-55.260N/094-51-23.512W from showing Q G, 39ft, KRW on skeleton tower on piles, visible 2° each side of rangeline to show Q G, 39ft, KRW on skeleton tower on piles, visible all around; higher intensity 1.5° each side of rangeline. Comments will be taken until November 10, 2026. Please email comments regarding this proposal to: D08-SMB-District-LocalNoticeFeedback@uscg.mil	Lat: 29° 28' 55" Lon: -094° 51' 24"

Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Inner Harbor Navigation Canal - GIWW - Lock Special Instructions --- Reported: 2024-09-09 --- While entering and exiting the Inner Harbor Navigation Canal (IHNC) Lock, mariners shall use EXTREME CAUTION, especially when navigating along the long guide walls on the river and canal ends of the structure. Tows are to approach the structure at a SLOW BELL SPEED. For additional information, mariners can contact the USACE/Lockmaster.	Lat: 29° 57' 55" Lon: -090° 01' 37"
Head Of Passes To New Orleans - Inner Harbor Navigation Canal/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Inner Harbor Navigation Canal - GIWW - Sewer Line Repairs and Dive Operations --- From: 2026-04-20 To: 2026-09-30 --- The damaged sewer main that was discharging sewage into the Gulf Intracoastal Waterway has been temporarily repaired. While the immediate health threat has been mitigated, the sewer main is currently undergoing a multi-week repair process. Daily daylight dive assessments of the damaged sewage line are being conducted, from 8:00 a.m. to 7:00 p.m. Divers will access the work location from shore and will need an approximate 70-foot work area from the bank. The dive operations will take place in approximate position 29-58-49.18N 090-01-21.60W. The U.S. Coast Guard Captain of the Port New Orleans lifted the Emergency Safety Zone in the area; however, the COTP recommends all vessels transit at their slowest safe speed and avoid meeting or overtaking between GIWW Miles 6.5 and 10.0, EHL. The on-scene dive operations supervisor may be contacted via VHF-FM Channel 67 or at (985) 273-1756. For further information, mariners can contact the U.S. Coast Guard Sector New Orleans Command Center at (504) 365-2545 or the Waterways Management Division at wwmnola@uscg.mil.	
General/Miscellaneous	Miscellaneous	Inner Harbor Navigation Canal Lock - USACE Navigation Bulletin Reissue --- * MARINERS ARE ADVISED THAT THIS POLICY NOTICE FOR THE INNER HARBOR NAVIGATION CANAL (IHNC) LOCK REMAINS IN EFFECT INDEFINITELY. * Due to the limited mooring space between the Florida Avenue Bridge and the Inner Harbor Navigation Canal Lock, it is required that all tows contact the Lock on VHF-FM Channel 14 for locking information prior to navigating through the Florida Avenue Bridge. Towboat Captains are reminded that if a tow has to be broken for locking operations, this shall be done prior to coming through the Florida Avenue Bridge and the barges shall not be left unattended in the canal for any reason. Towboat Captains must use the mooring buoys and tend the wheelhouse at all times. To prevent bank erosion, Tow Captains are also reminded not to push the head of their tow into the banks on the river or canal end of the lock for any reason while waiting for their locking. The Lockmaster, Richard McKinzie, can be reached at 504-945-2157. The points of contact with the New Orleans District are Robert Swayze at 504-862-2060, Jesse Adams at 504-862-1061 and Brandon Keck at 504-862-2630.	Lat: 29° 57' 53" Lon: -090° 01' 38"

NAVAREA IV/Space Operations/Hazardous Warning Area/Commercial (Hazardous)	Hazardous Warning Area	Gulf of America - Caribbean Sea --- Space launch operations, which may be hazardous to surface vessels, will be conducted within portions of the following hazard areas for Starship Flight 14: A. High Risk Hazard Area: 25-12-00N 092-58-00W, 25-31-00N 093-52-00W, 25-42-00N 095-24-00W, 26-02-00N 096-32-00W, 26-04-00N 096-49-00W, 26-04-00N 097-04-00W, 26-04-00N 097-10-00W, 26-02-00N 097-13-00W, 25-58-00N 097-13-00W, 25-48-00N 097-05-00W, 25-41-00N 096-47-00W, 25-02-00N 095-05-00W, 24-29-00N 094-08-00W, 24-20-00N 093-32-00W, 24-25-00N 092-52-00W and 24-45-00N 092-43-00W. B. Hazard Area: 25-58-00N 097-13-00W, 26-02-00N 097-13-00W, 26-04-00N 097-10-00W, 26-04-00N 097-04-00W, 26-04-00N 096-49-00W, 26-01-00N 096-17-00W, 26-01-00N 095-12-00W, 25-59-00N 094-36-00W, 25-59-00N 094-05-00W, 25-25-00N 093-06-00W, 25-31-00N 091-46-00W, 23-32-00N 088-52-00W, 23-04-00N 088-33-00W, 22-03-00N 086-24-00W, 21-38-00N 084-59-00W, 20-59-00N 082-38-00W, 20-43-00N 081-42-00W, 20-07-00N 079-44-00W, 19-46-00N 078-47-00W, 19-23-00N 078-04-00W, 19-19-00N 078-18-00W, 19-34-00N 079-19-00W, 19-44-00N 079-44-00W, 20-12-00N 081-13-00W, 20-43-00N 083-13-00W, 21-06-00N 084-54-00W, 21-43-00N 086-42-00W, 21-59-00N 087-26-00W, 22-39-00N 089-10-00W, 22-45-00N 089-41-00W, 22-58-00N 092-36-00W, 24-18-00N 095-02-00W, 25-38-00N 096-49-00W and 25-48-00N 097-05-00W. Primary and backup launch day hazard periods include: • 28/1215Z Sep 26 to 28/1414Z Sep 26 • 29/1215Z Sep 26 to 29/1414Z Sep 26 • 30/1215Z Sep 26 to 30/1414Z Sep 26 • 01/1215Z Oct 26 to 01/1414Z Oct 26 • 02/1215Z Oct 26 to 02/1414Z Oct 26 • 03/1215Z Oct 26 to 03/1414Z Oct 26 • 04/1215Z Oct 26 to 04/1414Z Oct 26 • Navigation hazards within the hazard areas may include free falling debris and/or descending vehicles or vehicle components under various means of control. Free falling rocket launching components will land within the high risk hazard area. Mariners should avoid waters within the defined hazard areas during the scheduled launch window. The high risk hazard area should be avoided three hours prior to the earliest launch to ensure range clearance. For additional information, contact the U.S. Coast Guard Sector Corpus Christi Command Center at (800) 874-2143.

New Orleans Port Arthur/General/Bridges/Temp Deviation	Bridges	GIWW - Modified Bridge Schedule --- From: 2026-06-24 To: September 2026 --- The Grand Lake Bridge on the GIWW at Mile 231.4, WHL, will temporarily operate with a modified schedule. The schedule is as follows: - 5:00 a.m. to 8:00 a.m.: Closed to marine traffic. - 8:00 a.m. to 8:00 p.m.: Normal bridge operations. - 8:00 p.m. to 5:00 a.m.: Marine traffic will have priority. Open for vehicle traffic but operating at a reduced rate. - Emergency services will always have priority for bridge crossing. Mariners are urged to coordinate with the bridge tender in advance and plan accordingly.	Lat: 29° 00' 40" Lon: -093° 13' 41"
New Orleans Port Arthur/General/Bridges/Lighting and Other Signals	Bridges	GIWW - Bridge Lighting Discrepancy --- Reported: 2026-07-06 --- The bridge lighting on the Black Bayou Bridge has been reported partially extinguished due to a recent bridge allision. Bridge lights on the south side of the bridge are operating properly. The northwest portion of the bridge lights have been temporarily replaced with solar powered navigation lights. The northeast portion of bridge lights and the pontoon/bridge deck lights are extinguished until further notice. The bridge is currently in the open to navigation position and will remain open until the bridge has been repaired. Mariners are urged to transit the bridge with extreme caution.	Lat: 30° 04' 58" Lon: -093° 17' 09"
New Orleans Port Arthur/General/Bridges/Construction	Bridges	GIWW - Bridge Construction --- From: 2026-05-04 To: 2026-11-02 --- Scheduled structural repairs will take place on the Houma Twin Span Bridges (SR 24 Bridges) over the GIWW, Mile 57.6 and 57.7, WHL. Scaffolding will be placed under the bridge each Monday at 7:00 a.m., and will be removed no later than 7:00 p.m., each Friday. The scaffolding will lower the bridge's vertical clearance by no more than 5 ft. There will be no scaffolding located under the bridge outside of the scheduled work period. Mariners should plan accordingly, take into account reduced air drafts, and transit the area with caution. VHF-FM Channel: 16	Lat: 29° 35' 55" Lon: -090° 42' 37"
New Orleans Port Arthur/General/Hazards To Navigation/Hazards	Hazards To Navigation	GIWW - Bridge Damage --- Reported: 2026-07-01 --- The Grand Lake Swing Bridge at Mile 231.4, WHL, experienced an allision, causing damage to the northeast bridge fendering system. The fendering system is currently ineffective to defend against further allisions. Mariners should avoid contact with the bridge and any portions of the fendering system and transit with extreme caution.	Lat: 30° 00' 39" Lon: -093° 13' 41"
New Orleans Port Arthur/General/Hazards To Navigation/Hazards	Hazards To Navigation	GIWW - Bridge Damage/Temporary Buoy --- Reported: 2026-07-01 --- The Black Bayou Bridge at Mile 237.5, WHL, experienced an allision, causing damage to the northeast bridge fendering system. The fendering system is currently ineffective to defend against further allisions. A temporary unlighted orange buoy has been placed near the damaged fender on the east side of the bridge. Mariners should avoid the buoy and transit the bridge with extreme caution to avoid further serious damage to the bridge.	Lat: 30° 04' 58" Lon: -093° 17' 07"

New Orleans Port Arthur/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	GIWW, Mile 238.5, WHL - Calcasieu Lock - Lock Closure --- From: 2026-05-18 To: 2026-10-30 --- The Calcasieu Lock will be closed to navigation from 7:00 a.m. until 7:00 p.m., Monday through Friday, for north chamber wall repairs. Mariners should avoid contact with the northeast longwall dolphin due to continued degradation of the structural sheet pile that supports the dolphin. For up-to-date information regarding the lock closure, mariners can contact the Lockmaster at (337) 477-1482. POC: USACE (504) 862-2060, (504) 862-1061 and (504) 862-2630	Lat: 30° 05' 16" Lon: -093° 17' 36"
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Devils Elbow - Staging Area --- From: 2025-11-24 To: 2027-02-15 --- A staging area for dredge pipe and equipment will be located along the GIWW, Mile 240.7, WHL. All pipe will be marked with buoys and lights. Mariners are urged to use caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made.	
New Orleans Port Arthur/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	GIWW - Calcasieu Channel - Dredge Operation --- From: 2026-03-10 To: 2026-09-26 --- The Dredge OHIO will be dredging along the Calcasieu Channel, near Mile 22.5, for the Louisiana Woodside LNG project. Approximately 8.5 miles of pipeline and booster pumps have been installed and staged from the dredging area along the Calcasieu Channel, routed through Choupique Bayou, and into the GIWW, along the northern edge and outside of the navigable limits. Floating and submerged pipelines along with a series of Boosters are located between GIWW Miles 241.0 and 252.0, WHL. A subline crossing is located between GIWW Miles 249.0 to 250.0, WHL, near the Booster ERIN C. On-scene vessels include the Boosters TEXAS JR, JESSIE, BUSTER, REGGIE, CAPTAIN BARNEY, and ERIN C, Anchor Barges 112 and 120, Derrick Barges 66 and 72, T/Vs SMITH BUCCANEER, KJ LEBOEUF, CAPTAIN EDDIE, and EMILY A HERBERT, and the Crew Vessels TARPON 1, TARPON 3, JOHN NEWMAN, and COLUMBIA RIVER. All dredge pipeline will be marked with buoys and lighted accordingly. Barges and vessels are requested to avoid staging on the north side of the GIWW, between the project limits. Mariners are urged to use caution in the area and transit at their slowest safe speed to minimize wake after passing arrangements have been made. VHF-FM Channels: 13 and 16, POC: (630) 247-6207	
New Orleans Port Arthur/General/MSIB	MSIB	--- MSIB 19-26: Calcasieu Lock GIWW Navigational Considerations --- Due to a collision with the Black Bayou Bridge causing significant structural damage, and several documented near-miss situations at the Grand Lake Bridge investigated by MSU Lake Charles, this Marine Safety Information Bulletin (MSIB) brings heightened awareness to all commercial vessels with anticipated voyages in the GIWW east of the Calcasieu Locks, specifically between Miles 229.0 and 239.0, WHL. Mariners are advised that this waterway features a narrow channel, two swing bridges, and the Calcasieu Lock, which is currently undergoing maintenance and is closed to marine traffic from 7:00 a.m. to 7:00 p.m., Monday through Friday, through September 2026. These characteristics may present navigational challenges for transiting vessels and tows. Furthermore, mariners are advised that contact with the fendering systems of the Grand Lake Bridge should be avoided at all costs. Damage to these fenders could result in enforcement action by U.S. Coast Guard MSU Lake Charles. For all commercial vessels transiting this area, consideration should be given to voyage planning, navigational assessments, posting suitable lookouts, and maintaining a safe speed to allow for timely and effective maneuvers. These considerations are not exhaustive and do not supersede navigation rules, sound mariner judgment, or good seamanship. Compliance with a vessel's Towing Safety Management System (TSMS), where applicable, remains essential. All commercial vessel operators are strongly encouraged to share this MSIB with their vessel crews during voyage planning for transits through this area. For questions about this MSIB, mariners can contact the U.S. Coast Guard MSU Lake Charles Waterways Department at: msulcwwm@uscg.mil.	
New Orleans Port Arthur/General/MSIB	MSIB	GIWW, Mile 238.5, WHL - Calcasieu Lock - Lock Hazard Advisory --- From: 2026-07-23 To: Until Further Notice --- Surveys have indicated corrosion and degradation of the structural sheetpile skin plate existing below the waterline of the northeast longwall dolphin at the Calcasieu Lock. Therefore, mariners are to use extreme caution in the vicinity of the lock and avoid contact with the northeast longwall dolphin. POC: (337) 477-1482 or (504) 862-2060

New Orleans Harbor - New Orleans To Baton Rouge/General/Hazards To Navigation/Hazards	Hazards To Navigation	Mississippi River, Mile 120.3 to 120.5 – Riverbank Degradation --- Reported: 2026-07-02 --- Mariners shall avoid pushing vessels into the riverbank along the RDB of the Mississippi River, between Mile 120.3 and 120.5, AHOP. Repeated barge contact against the riverbank has severely compromised this reach, which is now degraded and encroaching on the Mississippi River Levee System. Mariners and fleet operators are not to push into the riverbank and must proceed at their slowest rate of speed in this area in order to minimize wake and subsequent damage to flood protection systems. Mariners should secure their vessels and barges in a manner that ensures there will be no contact with the levees or revetments and that barges are no closer than 180 ft from the centerline of the levee. Vessel owners or other persons responsible for any vessel or barges making contact with the levees or revetments in any way may be charged as provided for in the River and Harbor Act, and its amendments, as codified in 33 CFR 401, 408 and 412. In addition to federal regulations regarding vessel operation, mariners are reminded to comply with related State laws, including LA RS 38:225.	
New Orleans Harbor - New Orleans To Baton Rouge/General/Hazards To Navigation/Shoaling Reported	Hazards To Navigation	Mississippi River - Shoaling --- Reported: 2026-08-17 --- Shoaling due to low water has been reported along the LDB just below College Point, Mile 156.0, AHOP. The virtual aid to navigation, College Point Shoal (MMSI: 993682269), has been established to mark the shoaled area in approximate position 29-58-59.940N 090-48-54.120W. Mariners are urged to avoid the area and transit Mile 156.0 with caution.	
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Pump Station Construction --- From: 2025-11-28 To: 2026-12-13 --- Pump station construction will be conducted along the Mississippi River, Mile 175.5, RDB, AHOP, Smoke Bend Crossing. Work will be conducted from 6:30 a.m. to 5:00 p.m., 6-days a week. Operations will include pile driving, excavation, and pipe installation. On-scene vessels will include a crane barge, a material barge, a towing vessel, and a crew boat. Mariners are requested to transit the area at a slow bell so as not to interfere with ongoing construction and proceed with caution. VHF-FM Channel: 67	Lat: 30° 06' 33" Lon: -090° 59' 23"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Material Offloading --- From: 2026-05-08 To: 2026-11-30 --- Material offloading will be conducted along the Mississippi River, RDB, near Claiborne Landing, Mile 188.0, AHOP. Work will take place 24-hours a day, 7-days a week. On-scene vessels will include hopper barges, towing vessels and a crane spud barge. Mariners are requested to transit the area at their slowest safe speed to minimize wake. POC: (337) 772-8945 or (337) 323-9373	Lat: 30° 12' 23" Lon: -091° 04' 16"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Port Allen Canal - Port Allen Lock - Lock Restrictions/Special Instructions --- From: April 2021 To: Until Further Notice --- The following westbound restrictions are in place regarding the Port Allen Lock's northeast floating guide wall: • All tows with more than one barge are required to use an assist vessel with a line attached at the head of the tow. • Single barge tows will be permitted to lock westbound without an assist vessel. • Vessels should not attempt to "pivot" on the guide wall; therefore, vessels must flatten-out before contacting the guide wall. For additional information, mariners can contact the Port Allen Lockmaster at (225) 343-3752.	Lat: 30° 25' 51" Lon: -091° 12' 30"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Marine Construction --- From: 2026-08-12 To: 2027-02-28 --- Marine construction will be conducted at CF Industries Blue Point, near Mile 184.4, RDB, AHOP, for the construction of a heavy haul bridge. Work will take place during daylight hours, 7-days a week. On-scene vessels will include a Bo-Mac Crane Barge and multiple deck barges. Mariners are requested to transit the area at their slowest safe speed to minimize wake. VHF-FM Channel: 68, POC: (985) 634-7031	Lat: 30° 11' 16" Lon: -091° 01' 19"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Mississippi River - Marine Construction --- From: 2026-09-03 To: 2027-05-28 --- Construction will take place at the Port of Baton Rouge, near Mile 230.0, RDB, AHOP, for petroleum dock expansion. Operations will be conducted daily, from dusk until dawn. Work will consist of pile driving, welding, and demolition. Mariners are requested to give the work site a wide berth and transit at their slowest safe speed to minimize wake.	Lat: 30° 26' 39" Lon: -091° 12' 00"
New Orleans Harbor - New Orleans To Baton Rouge/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Mississippi River - Dredge Operation --- Dredging will be conducted in the Mississippi River deep draft navigation channel from Mile 113.0 to Mile 234.0, AHOP, between Baton Rouge and New Orleans, LA. Dredging will take place 24-hours a day, 7-days a week. The following dredges will be working in the area, with the following schedule: • Dredge WALLACE McGEORGE: 24JUN2026 - Until Further Notice, near Baton Rouge Harbor (Mile 229.5 - 234.0, AHOP). • Dredge HURLEY: 12SEP2026 - Until Further Notice, near Sardine Point Crossing (Mile 219.0, AHOP). • Mariners are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. VHF-FM Channels: 16 and 67, POC: USACE (504) 862-1253	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	MSIB Vol XXVI Issue 027 - Mississippi River - Low Water Safety Advisory --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR from Mile 0.0 to Mile 303.0, AHOP, when the Baton Rouge River gauge reads 16 ft and below and the Carrollton gauge reads 2.5 ft and below: A. Industry representatives should coordinate closely with River Pilot organizations, giving due consideration for the extreme low water to ensure the safe and efficient movement of vessels. B. Pilots should maintain safe speeds when transiting in the vicinity of docks, fleeting areas, and other transiting vessels to minimize adverse impacts from the ship's wake. C. Ports and facilities are strongly encouraged to monitor water depths at both their docks and approaches. Adjustments to docking procedures or loading and transit parameters should be closely coordinated with and communicated to vessel operators. D. Aids to Navigation discrepancies should be reported to the U.S. Coast Guard Sector New Orleans Command Center. E. Mariners should pay close attention to Broadcast Notice to Mariners for information on specific hazards along their planned route. F. Ports and Facilities are requested to report impacted operations due to low water conditions (e.g. reduced drafts, interruptions to mid-stream operations, etc.) to facilitiesnola@uscg.mil. -- Mariners are reminded the sailing line, between Miles 0.0 and 232.0, follows a path through naturally deep water connected by twelve marked channels known as "crossings." Low water conditions have significantly reduced water depths in areas of the river outside the sailing line, where mariners in the past had sufficient water depth to navigate. In accordance with 33 CFR Part 164, mariners are required to conduct proper navigation assessments. Mariners should pay particular attention to route planning and water levels and should closely review the U.S. Army Corps of Engineers Navigation Condition Surveys prior to their transit at the following: https://www.mvn.usace.army.mil/Missions/Navigation/Channel-Surveys/?utm_medium=email&utm_source=govdelivery	Lat: 30° 06' 09" Lon: -090° 54' 47"

New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	MSIB Vol XXVI Issue 027 - Mississippi River - Low Water Safety Advisory --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for 81 Mile Point, from Mile 177.0 to Mile 179.0, AHOP, when the Baton Rouge River gauge reads 16 ft and below and the Carrollton gauge reads 2.5 ft and below: • In accordance with 33 CFR 161.65(e), all vessels moving or intending to move into 81 Mile Point (Miles 177.0 - 179.0) must complete the appropriate check-in procedures with the U.S. Coast Guard VTS LMR prior to transiting. • Mariners are also advised of the increased possibility of shoaling in this area and should use extreme caution while transiting.	
New Orleans Harbor - New Orleans To Baton Rouge/General/MSIB	MSIB	MSIB Vol XXVI Issue 027 - Mississippi River - Low Water Safety Advisory --- The National Weather Service forecasts low river stages. Lower Mississippi River (LMR) users should prepare for extreme low water conditions. The following low water safety precautions are in effect for all waters of the LMR at College Town Light, from Mile 225.0 to Mile 228.3, AHOP: • All towing vessels are advised to keep flat on the bank and provide a wide berth to deep-draft vessel traffic.	
New Orleans Harbor - New Orleans To Baton Rouge/ATON/Proposed Notice of Change	Proposed Notice of Change	In order to provide a more efficient and effective Aids to Navigation signal, the Coast Guard is proposing the following Aids to Navigation Changes: Change Old Hermitage Range Front Light (LLNR-15210) in position 30-18-38.823N/091-09-56.731W, from showing Iso R 2s, KRW on skeleton tower, visible all around; higher intensity on rangeline. Lighted nighttime only to show Iso R 2s, KRW on skeleton tower, visible all around. Comments will be taken until October 27, 2026. Please email comments regarding this proposal to: D08-SMB-District-LocalNoticeFeedback@uscg.mil	Lat: 30° 18' 39" Lon: -091° 09' 57"

Sector Corpus Christi, Exclusive Economic Zone (EEZ)/Space Operations/Hazardous Warning Area/Commercial (Hazardous)	Hazardous Warning Area	Gulf of America - Hazardous Space Operations --- On September 28, 2026, between 1215Z and 1414Z, rocket launching operations are scheduled to take place near Boca Chica, TX. Back-up launch dates and times include the following: • 291215Z SEP 26 to 291414Z SEP 26 • 301215Z SEP 26 to 301414Z SEP 26 • 011215Z OCT 26 to 011414Z OCT 26 • 021215Z OCT 26 to 021414Z OCT 26 • 031215Z OCT 26 to 031414Z OCT 26 • 041215Z OCT 26 to 041414Z OCT 26 • Navigation hazards from rocket launching activity may include free falling debris and/or descending vehicles or vehicle components under various means of control. Vessels should operate in a heightened state of awareness during the launch time and avoid all waters within rocket flight trajectories originating from the launch site near Boca Chica/Starbase, Texas, and extending across the Gulf of America. Free falling rocket launching components will land within the indicated high-risk hazard area. To ensure range clearance, mariners are requested to avoid the high-risk hazard area three hours prior to the launch window. For additional information regarding the launch, mariners can contact the U.S. Coast Guard Sector Corpus Christi Command Center at (800) 874-2143 or access: www.navcen.uscg.gov/msi

Sector Mobile, Exclusive Economic Zone (EEZ)/General/Autonomous Vessel Operations	Autonomous Vessel Operations	Gulf of America - Vessel Testing Operation --- From: 2026-07-20 To: 2026-09-30 --- The M/V OCEAN WARRIOR will undergo autonomous system testing in the Gulf of America in an area bound by approximate positions: 30-10-18.48N 087-31-33.84W, 30-10-18.48N 087-02-38.78W, 29-45-18.48N 087-02-46.04W and 29-45-18.48N 087-31-33.84W. Tests will be conducted daily, for 6-hours each day. On-scene assist vessels will include the F/Vs BAD FISH and FATSON. At times during testing, the M/V OCEAN WARRIOR may be restricted in maneuverability. Mariners are urged to avoid the testing area. VHF-FM Channel: 16, POC: (228) 669-9795	
Sector Mobile, Exclusive Economic Zone (EEZ)/General/Autonomous Vessel Operations	Autonomous Vessel Operations	Gulf of America - Autonomous Vessel Operation --- From: 2026-09-15 To: 2026-10-31 --- An autonomous ocean glider will conduct survey and ocean data collection in the Gulf of America, in an area bound by approximate positions: 29-22-36.62N 087-24-41.36W, 29-53-58.30N 086-55-55.00W and 29-30-13.63N 086-32-57.29W. Operations will be conducted 24-hours a day, 7-days a week. The ocean glider will operate at a max speed of 0.5 knots and will primarily work underwater, surfacing every three hours for approximately three to four minutes before continuing subsea work. Mariners are urged to transit the area with caution and provide a wide berth when the glider has temporarily surfaced.	
Sector Mobile, Exclusive Economic Zone (EEZ)/General/MSIB	MSIB	Marine Safety Alert 02-24 - Inspections and Compliance Directorate --- DANGEROUS BYCATCH FROM DISCARDED MUNITIONS REMAINS A PRESENT DAY HAZARD --- This Safety Alert is being issued to raise awareness of lurking hazards caused by discarded munitions, which often contain active explosives or chemical agents. Although the practice of dumping munitions into the sea ceased in 1970, a significant amount remains hidden in coastal waters, posing a safety hazard to commercial fisherman, dredge operators, and others who trawl and work the ocean floor. Recently, a deckhand on a clamming vessel was severely burned when a canister was dredged up and brought onboard with clams and other debris. The canister likely contained mustard gas or another blistering agent, but did not display any obvious visual, audible, or odor indicators of discharging content. A member of the crew discovered the canister and threw it back overboard. Several hours later he developed a severe rash that required professional medical treatment. Mustard gas is a chemical weapon developed during World War I. Millions of pounds of this product, other chemical weapons, bombs, torpedoes, artillery shells, and munitions were routinely disposed of and remain in U.S. coastal waters. Although many munition dump areas are well marked on navigation charts, numerous areas where munitions were discarded remain unmarked. There is also evidence suggesting that munitions were frequently "short dumped," meaning dumped outside of the designated areas by contractors hired to take them to the intended locations. The Coast Guard previously issued Safety Alert 11-16 and Safety Alert 6-10 on this same topic and continues to strongly recommend that persons involved in the fishing and dredging industries: Review their navigational charts to ensure the areas in which they are trawling or dredging are not near labeled "Explosives Dumping Areas." Such areas must be given wide berth and seafarers should recognize that surface bottoms change and that objects can move significant distances from their original disposal areas. Review and follow recommendations from the Maritime Industry 3Rs Explosive Safety Guide. Carefully record the position of any munitions encountered and returned to the sea. Immediately report discovery to the National Response Center, at (800) 424-8802 to ensure a proper response and potential recovery. Alternatively, the local U.S. Coast Guard unit may be notified via VHF-FM Channel 16. This Safety Alert is provided for informational purposes only and does not relieve any domestic or international safety, operational, or material requirement. Developed by the Office of Commercial Vessel Compliance (CG-CVC) and distributed by the Office of Investigations and Casualty Analysis (CG-INV). Questions may be submitted to HQS-SMB-CGINV@uscg.mil.

Operations will consist of the placement of riprap to create a 9,300 ft overlapping segmented breakwater on the southeast shoreline of Coffee Island (Isle aux Herbes). On-scene vessels will include, but are not limited to, push boats, barges, material handlers, and transport vessels. Mariners are requested to transit the area at no-wake speed. VHF-FM Channels: 12 and 16, POC: (251) 751-4127 and 251-895-6378	Lat: 30° 20' 04" Lon: -088° 15' 08"
Sector Mobile, Submerged Land Act (SLA) - Mississippi Sound/General/Miscellaneous	Miscellaneous	The Department of the Air Force will enforce the charted Restricted Area found in 33 CFR 334.730. This area includes certain navigable waters of Santa Rosa Sound, the GIWW (Miles 204.6 to 216.4, WHL), and the Gulf of America (Gulf of Mexico) adjacent to Eglin Air Force Base Property. All entry, transit, anchoring or drifting within the restricted area for any reason is not allowed without permission from the U.S. Air Force (96 TW/CC), except to navigate the Gulf Intracoastal Waterway. Such vessels and other watercraft shall confine their movements to the waters within the limits of the GIWW and shall make the passage as promptly as possible under normal vessel speed. Other permitted access to the Restricted Area may be granted, in certain circumstances, by contacting the 96 TW/CC at (850) 882-2000.	Lat: 30° 23' 03" Lon: -086° 48' 24"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-10-09.2N 088-01-18.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 10' 09" Lon: -088° 01' 19"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Horn Island Pass - Research Buoy --- Established: 2025-09-24 --- A lighted yellow Ocean Data Acquisition System (ODAS) research buoy will be established in position 30-11-42.5N 088-32-38.8W. The buoy is 3.9 ft tall and features a flashing yellow light at night (FI(5)Y 20s). Mariners are urged to transit the area with caution.	Lat: 30° 11' 42" Lon: -088° 32' 39"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Alabama River - In accordance with Section 7-11 of the ACT Master Water Control Manual dated April 2022, full navigation channel availability on the Alabama River is dependent upon channel maintenance, seasonal flow conditions, and basin status. Flows for navigation are most needed in the unregulated portion of the lower Alabama River below Claiborne Lock and Dam. Alabama Power Company (APC) operates its reservoirs on the Coosa and Tallapoosa Rivers to provide a minimum navigation flow target in the Alabama River at Montgomery, Alabama. Basin status criteria are correlated to APC Drought Operations (ADROP) updates which monitors drought triggers related to basin inflow, state line flow on the Coosa River between Georgia and Alabama, as well as composite storage availability within the APC projects. These updates are provided monthly on the first and third Tuesday. Below is the most recent ADROP update provided by Alabama Power Company on September 15, 2026: *ADROP UPDATE* - Low Basin Inflow: TRUE - - Low State Line Flow: TRUE - - Low Composite Storage: FALSE - - Montgomery Flow Target: 4,200 cfs daily average - - Current Operations: Drought Intensity Level 2 - Currently, based on profile survey conducted on 04JUN2024, a 10 ft tailwater elevation near Claiborne Lock is required to provide a 9 ft navigation channel on the lower Alabama River. A modified depth of 7.5 ft navigable draft can be provided with a tailwater elevation of 8.5 ft at the Claiborne Lock and Dam. Commercial mariners should check water levels daily and schedule lockage appointments by calling the Claiborne Lock Supervisor at (251) 282-4575. Tailwater elevations below Claiborne Lock and Dam can be viewed at: https://waterdata.usgs.gov/monitoring-location/USGS-02428401	Lat: 31° 36' 54" Lon: -087° 33' 06"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Miscellaneous	Miscellaneous	Gulf of America - Temporary Buoy --- From: 2026-08-15 To: 2027-08-14 --- A temporary SOFAR spotter buoy will be established in the Gulf of America in approximate position 30-19-13.12N 087-08-26.41W. The buoy will feature a 2.5 second flashing amber light at night. Mariners should transit the area with caution.	Lat: 30° 19' 13" Lon: -087° 08' 26"

Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/MSIB	MSIB	MSIB 32-26 - Potential Unexploded Ordnance (UXO) Hazard Gulf of America - Fort Pickens, FL --- The U.S. Army Corps of Engineers (USACE) is conducting feasibility studies under the CERCLA process to assess hazards associated with historical munitions to include potential unexploded ordnance (UXO) in the vicinity of Fort Pickens, Pensacola, FL. Due to historical usage of this area, the U.S. Coast Guard advises mariners of potential UXOs located within the Gulf of America and Pensacola Bay, near Santa Rosa Island, Fort Pickens, FL. UXOs should be considered extremely dangerous. If touched, moved, or disturbed, these items may detonate, causing severe injury, death, or property damage. Mariners are strongly urged not to anchor or conduct any bottom-disturbing activities within High Use Areas (HUA) and should exercise caution when conducting activities in the Low Use Areas (LUA). Reference diagrams, provided in the hard copy version of MSIB 32-26, identify Low Use Areas (LUA) in green and High Use Areas (HUA) in orange. If a mariner encounters a UXO, please contact 911 to report the location that it was found. Concerned parties may report any hazardous conditions to the U.S. Coast Guard Sector Mobile Command Center at (251) 266-5888. Additional information is available at: https://www.saj.usace.army.mil/FortPickens/	
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2026-09-07 To: 2026-10-02 --- The U.S. Navy will be conducting surface and subsurface unmanned vessel operations in the Gulf of America, near approximate position 30-03-09.4N 085-41-12.8W. Operations will be conducted Monday through Friday, from 8:00 a.m. to 3:00 p.m. On-scene vessels will include low profile unmanned craft and naval support vessels. Mariners are urged to transit the area with caution and maintain a wide berth from the operating area. VHF-FM Channel: 16	Lat: 30° 03' 09" Lon: -085° 41' 13"
Sector Mobile, Territorial Sea - Sector Mobile, Submerged Land Act (SLA)/General/Naval Activity/Naval Testing (Surface/Underwater)	Naval Activity	Gulf of America - U.S. Navy Operation --- From: 2025-09-03 To: 2026-10-31 --- The U.S. Navy will operate an unmanned surface vehicle (USV) towing underwater equipment in the Gulf of America, in the offshore waters of Panama City Beach, FL. The operating area will be bound by approximate positions: 30-07-58.59N 085-55-19.54W, 30-07-58.63N 085-50-42.76W, 30-03-56.30N 085-50-42.75W and 30-03-56.27N 085-55-19.44W. Two U.S. Naval support vessels will be on-scene during the USV operation. Mariners should maintain a wide berth from all U.S. Naval craft and are requested to avoid the area. VHF-FM Channel: 16

Sector New Orleans, Exclusive Economic Zone (EEZ)/General/Autonomous Vessel Operations	Autonomous Vessel Operations	Gulf of America - Uncrewed Surface Vessel Operation --- From: 2026-09-10 To: 2026-09-30 --- Surveys and data collection will be conducted in the Gulf of America by the Unmanned Surface Vessel (USV) MC-40 in support of work taking place at the Thunder Horse platform, located in Mississippi Canyon Area, Block 778. The USV will be surveying the eddy current Hurlburt and will operate within 20 miles of approximate position 28-11-27.59N 088-29-45.59W. The USV is 39 ft long with a yellow hull, a top speed of 7 knots, and the following AIS Data: AIS: MC40-5 (UNMANNED), MMSI: 368412730. The USV will be continuously monitored and operated 24-hours a day, 7-days a week, and is equipped with live visual and thermal cameras, radar, AIS, an automatic anchor system, and navigation lights. The vessel will depart from Port Fourchon, LA, and will be escorted into and out of the port with a chase boat. Crew boat services will be available for rapid intervention offshore, if required. Mariners are requested to maintain a wide berth from the USV while in operation. VHF-FM Channels: 13 and 16, POC: (337) 362-4791	Lat: 28° 11' 28" Lon: -088° 29' 46"
Sector New Orleans, Exclusive Economic Zone (EEZ)/General/Autonomous Vessel Operations	Autonomous Vessel Operations	Gulf of America - Uncrewed Surface Vessel Operation --- From: 2026-09-10 To: 2026-09-20 --- SeaTrac Systems, Inc., will deploy an Uncrewed Surface Vessel (USV), the SP-48, to conduct ocean data collection approximately 45 miles southeast of Southwest Pass. The USV will collect oceanographic information via onboard sensors from an operational data collection site bound by the following approximate positions: 28-20-25N 089-24-28W, 28-20-25N 088-51-18W, 27-47-07N 088-51-18W and 27-47-07N 089-24-28W. The USV will launch from the LUMCON Facility in Cocodrie, LA, and will be escorted by a support vessel to an area near Cat Island Pass. The USV will then head south, under the supervision and control of the remote piloting team, to the data collection area. Once on-site, the SP-48 will spend approximately 24-hours in the data collection area. After data collection is complete, the USV will be remotely piloted back to LUMCON and meet with an escort vessel for the nearshore transit inland. The SP-48 is a solar powered 4.8 meter USV, with a cruising speed of 3 kts and a top speed of 5 kts. The USV is equipped with an AIS transceiver, running lights, a yellow signal flag to aid in observability, and is marked with "UNCREWED" on the transom. Mariners are requested to maintain a wide berth from the operating USV. POC: (978) 578-6645 or HBoeschenstein@SeaTrac.com
