SECTION I - SPECIAL NOTICES

This section contains information of special concern to the Mariner.

DEPARTMENT OF HOMELAND SECURITY SUSPICIOUS ACTIVITY

The Department of Homeland Security (DHS) encourages the maritime public to report information concerning suspicious activity to the local Federal Bureau of Investigation Joint Terrorism Task Force (JTTF) Office, http://www.fbi.gov/about-us/investigate/terrorism/terrorism_jtfs, or to other appropriate authorities. The U.S. Coast Guard reminds the maritime industry that they may also report information concerning suspicious activity to the www.AmericasWaterwayWatch.org, the National Response Center (NRC) 1-800-424-8802 or 1-877-24WATCH.

WESTERN RIVERS FLOATING AIDS TO NAVIGATION

The U.S. Coast Guard is responsible for placing and maintaining all aids to navigation. Buoys are set to mark project depths taking into consideration the prevailing river stages and obstructions. Buoy positions on the Inland Electronic Navigation Chart (IENC) are approximate, and subject to change depending on prevailing river stages and obstructions.

Buoys should always be given as wide a berth in passing as possible, consistent with the length and width of the vessel or tow and the width of the bend or crossing.

Buoys should always be used with caution. They may be carried off position by high water, accumulation of drift, ice, or sunk by collision or other causes. In those circumstances buoy marks will remain on the IENC and indicate the last known position of the buoy. Presence of a buoy mark on the IENC does not necessarily mean a buoy will be physically on position. When buoys are missing they will be replaced as soon as possible.

LNM: 16-19

GPS TESTING

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

SUNSET OF NOAA PRINTED CHARTS

**** Cancellation of NOAA Paper and Raster Nautical Charts ****

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

<https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>.

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

LOWER MISSISSIPPI RIVER - CHANNEL CONDITION/SAFETY ADVISORY - UPDATE

The COTP Lower Mississippi River has issued a low water Safety Advisory between approximate Miles 869.0 and 303.0. The USACE maintained depths and widths, may not be attainable on all buoy lines. It is recommended that mariners monitor all gauge readings, for safe navigation.

The COTP Lower Mississippi River with the concurrence of the Lower Mississippi River Committee, recommend the following limits for tows:

Transiting between Miles 869.0 and 303.0.

Drafts no greater than 9 feet and

Barges to be configured no more than 5 wide.

Barges currently in the system, with drafts greater than the advised depths, should be placed as near to the center of the tow as possible.

Mariners are requested to contact U.S. Coast Guard Sector Western Rivers Command Center via VHF-FM Channel 16 or at (866) 777-2784, to report areas of shoaling, hazardous conditions or missing aids to navigation.

LNM: 42-22

UPPER MISSISSIPPI RIVER - CHANNEL CONDITIONS/SAFETY ADVISORY

The following area is in the extreme low water watch phase IAW the Western Rivers WAP Annex:

Mile 185.4 – Mile 109.9.

The river stage is currently at (-) 2.5 feet and falling. Mariners SHALL NOT transit this area with any vessel drafting greater than 9 feet.

Operators who transport vessels drafting greater than 9 feet, may be subject to enforcement actions, including action against merchant mariner credentials and/or civil penalties. Mariners are urged to transit the area with caution and to report areas of shoaling or other hazardous conditions to U.S. Coast Guard Sector Upper Mississippi River via VHF-FM Channel 16 or at (314) 269-2332.

LNM: 42-22

MOBILE RIVER - WAMS

The U.S. Coast Guard is conducting a Waterways Analysis and Management System (WAMS) study of the Mobile River to the junction of Alabama/Tombigbee Rivers. The study focuses on the areas aids to navigation system, waterborne commerce, marine casualty information, port/harbor resources, emergency response plans, routine and emergency communication capabilities and future development projects. Any interested company or individual wishing to provide comments or participate in a user survey should contact:

U.S. Coast Guard Aids to Navigation Team Mobile,

ARKANSAS RIVER - USACE L/D LOCKAGE/QUEUE MANAGEMENT PLAN

Attached as an enclosure to this LNM, is USACE Little Rock District Navigation Notice 22-47, regarding vessel lockage and queue management at L/D 2, in the vicinity of Mile 13.3, Norrell L/D 1, in the vicinity of Mile 10.3 and Montgomery Point L/D, in the vicinity of Mile 0.5.

LNM: 37-22

SAFETY NOTICE - NAVIGATIONAL RANGE AND SECTOR LIGHTS ON NOAA ELECTRONIC CHARTS

The U.S. Coast Guard has become aware that the Range and Sector Light Characteristic labels are not displayed on Electronic Navigational Charts (ENCs) when used in an Electronic Chart Display and Information System (ECDIS), due to limitations of the S-52 ECDIS, display specification. Mariners may query the ENC data directly within ECDIS or refer to the Light List for complete information on Range and Sector Light Characteristics.

LNM: 39-22

UPPER MISSISSIPPI RIVER - LOWER MISSISSIPPI RIVER - CHANNEL CONDITIONS/SAFETY ADVISORY

The U.S. Coast Guard Marine Safety Unit Paducah, has issued a Safety Advisory for low water conditions between approximate Mile 109.0, on the Upper Mississippi River, near Chester, Il., extending to Mile 869.0, on the Lower Mississippi River, near Tiptonville, Tn. Mariners are advised to exercise extreme caution when transiting this area and shall review current USACE surveys, prior to transiting.

SECTION VII - GENERAL

This section contains information of general concern to the Mariners. Mariners are advised to use caution while transiting these areas.

ALABAMA RIVER

MILE 133.0 - DREDGE OPERATION

Continuing until further notice, Construction Solutions International Inc., is conducting dredging operations of small boat access channels on the William (Bill) Dannelly Reservoir. Work will progress upstream of the Millers Ferry L/D, in the vicinity of Mile 133.0. Due to the equipment required to perform this work, access to the river may be restricted, causing temporary closures of boat ramps along the river, until the work is completed. Work will be conducted during daylight hours only and will be fleeting within the work locations overnight, with barges lighted as appropriate. The dredge will monitor VHF-FM Channel 13 or 16. Traffic is requested to notify the dredge, prior to approaching the area and transit the area at their slowest safe speed to minimize their wake. Mariners may contact Chad Brumelow or Derek Kendrick at the BWT/Alabama-Coosa Project Management Office at (205) 752-3571. For boat ramp closures, contact Jason Haynes at the Millers Ferry Resource Office at (334) 682-4244, ext. 104.

LNM: 34-22

MILE 0.6 - BRIDGE MAINTENANCE

Sixth Street Bridge; A containment system is installed below low steel and follows the contour of the bridge. Vertical clearance is reduced approximately 1-foot for the middle, 100 feet of the navigation span. A work barge will be located outside of the navigation channel and will not affect navigation. Mariners are advised to transit the bridge with extreme caution.

LNM: 38-22

ARKANSAS RIVER

MILE 400.5 - MILE 400.1 - CHANNEL CONDITION

MILE 222.4 - MILE 221.4 - CHANNEL CONDITION/USACE SAILING INSTRUCTION

Shoaling has been reported between approximate Miles 222.4 and 221.7. The USACE recommends both up-bound and down-bound tows "run the red line" at Mile 221.4 and to "run the green line" from Mile 222.4 to Mile 221.7. The USACE reports that the navigation channel width narrows to approximately 180 feet, within this area, therefore no passing is advised from Mile 222.4 to Mile 221.4. Over the next several weeks, the navigation pool will be drawn down toward lower limits, at times. This action is due to power demands and water conservation measures in the upper reservoirs related to dry conditions. This will potentially create an increase in shoaling hazards within this reach. Mariners are requested to continue to report in-channel bumps or groundings experienced during their transit, to the next lock. Mariners may contact the USACE Little Rock District Office, at (501) 324-5096 or e-mail ceswl-op-om@usace.army.mil, for additional information.

LNM: 41-22

MILE 179.0 - MILE 178.5 - CHANNEL CONDITION/AID TO NAVIGATION/USACE SAILING INSTRUCTION

Mariners may contact the USACE Little Rock District Office, at (501) 324-5096 or via e-mail at ceswl-op-om@usace.army.mil, for additional information.

Shoaling has been reported in the vicinity of Mile 10.3, Norrell L/D Nr. 1. The USACE Little Rock District has issued sailing instructions advising vessels to "run the centerline of the navigation channel" both up-bound and down-bound. The long range forecast indicated decreasing tailwater elevations. Vessels are advised to draft no more than 7 feet, when transiting the White River Entrance Channel. Mariners may contact the USACE Little Rock District Office at (501) 324-5096 or via email at: ceswl-op-om@usace.army.mil, for additional information.

MONTGOMERY POINT LOCK (NM 0.5)

MCCLELLAN-KERR ARKANSAS RIVER NAVIGATION SYSTEM

Lock 1 operators will establish and distribute a lockage/queue management plan daily for Lock 2, Norrell Lock (No.1) and Montgomery Point Lock. This plan will manage condensed traffic during the open hours of operation through Lock 1 (Reference Navigation Notice 22-38).

Mariners will be required to call Lock 1 at 501-324-7341 or by marine radio on Channel 16 to establish their place in the daily queue.

Downbound tows:

The check-in location for all downbound traffic shall be the Pendleton Bridge (NM 22.6). After a downbound vessel has been set in queue, the vessel should wait near the designated waiting location (NM 15-17 or NM 19-20), until instructed to advance to Lock 2. Each afternoon, the next downbound vessel in queue may be locked through Lock 2 where it will be allowed to tie up to the downstream long wall at Lock 2 prepared for its turn at Lock 1.

Upbound tows:

The check-in location for all upbound traffic shall be Victoria Bend (on the Mississippi River). After an upbound vessel has been set in queue, it will be locked through Lock 1 in that order except during emergencies or other extenuating circumstances. Lock 1 operators will instruct upbound tows set in queue to proceed through the navigation pass (or lock through) at Montgomery Point Lock & Dam (MPLD) when space becomes available on the WREC for staging. Waiting locations for upbound vessels that have been instructed to proceed upstream of MPLD will be NM 3, Benzal Bridge (NM 7) or NM 9. Vessels staged at these locations are requested to remain in sequence and to

advance to the next waiting location when the vessel ahead of them departs that location. Each afternoon the next upbound vessel in queue should be secured at NM 9 and prepared to approach Lock 1 when instructed.

Lock 1 operators will e-mail each evening's lockage/queue management plan by 3pm daily. Anyone interested in receiving this daily e-mail should call Lock 1 and provide their email address. Requests may also be sent to the Lock 1 Supervisor, JD Hayes at James.D.Hayes@usace.army.mil.

Lock 1 will contact Lock 2 and MPLD as necessary to maintain order of the vessels to be locked. Helper boats (and changes thereto) must be coordinated with Lock 1 so the queue is not misdirected.

The landside/long wall coffer boxes are scheduled to be installed downstream and upstream of the miter gate recesses at Norrell Lock (No. 1) NM 10.3, beginning Aug 22. Mariners are advised to avoid contact with the coffer boxes. All up-bound tows must stop along the long wall, no further than the last ladder recess before the downstream coffer box and transition to the river side/short wall prior to lockage. All downbound tows must stop along the long wall, no further than the last ladder recess before the upstream coffer box and transition to the river side/short wall prior to lockage. All vessels are to exercise caution to safely transit by the coffer boxes. These locking instructions replace the locking instructions specified in Nav Notice SWL 22-36 and will remain in place until further notice.

LOCKS AND DAM 53

TRAFFIC RESTRICTIONS AND NAVIGATION LANE CHANGE FOR DEMOLITION BLASTING

OHIO RIVER

The Corps of Engineers' contractor, CJ Mahan, will be working on the demolition of Locks and Dam 53 (Ohio River Mile 962.6) for the entire low water season of 2022. Explosives will be used for the demolition. Blasting will begin on or after 21 June 2022 and is expected to take place during periods when the river stage is below 26 feet on the Olmsted Locks and Dam Headwater gage. A blast may take place up to once every day (Monday – Saturday), conditions permitting. It will be necessary to close the river to traffic around L&D 53 while the contractor is in the process of loading the explosives and detonating the blast. These closures are expected to be 4 hours or less and will typically occur between 1000 and 1400 Central Time. The plan is to conduct the blast at approximately 1200 noon Central Time, after all vessels and personnel have cleared the blast area. A US Coast Guard safety zone will be enforced during loading and blasting activities. The exact details for each day that blasting will occur will be broadcast by the US Coast Guard in a Broadcast Notice to Mariners. Blasting is estimated to end late August 2022.

During this time, vessels will take all direction of the Olmsted Locks and Dam Control Tower.

Northbound vessels will be stopped at Olmsted Locks and Dam (Ohio River Mile 964.6) and southbound vessels at Ohio River Mile 961 upstream of L&D 53 so that there will be no vessels in the vicinity of L&D 53 when the blast is scheduled to occur. CJ Mahan will be operating 1 patrol boat upstream of L&D 53 when wickets are raised at Olmsted L&D and 2 patrol boats when wickets are lowered at Olmsted L&D. See attached drawing for the blasting safety zone. Once the blast has been completed and the all clear issued, the traffic will be released.

In the event that a misfire occurs, and the closure will extend beyond 4 hours, an immediate email notification will be sent out to industry representatives notifying them. A second email notification will be sent as soon as the misfire is cleared and traffic is released.

The navigation lane at L&D 53 (Ohio River Mile 962.6) will be approximately 850 feet in the center of the Navigation Pass to facilitate demolition activities as shown in the attached drawing.

All mariners must exercise caution when transiting. The contractor's vessel M/V Chris M. will be working in the area and can be reached on Marine Radio Channel 13.

OHIO RIVER

RIVER MILES 967-975

LOW WATER CONDITIONS

DRAFT ADVISORY

Ohio River Miles 967-975: The navigation channel between Ohio River Miles 967 and 975 is experiencing unusually low water conditions. Mariners must take note of the conditions to determine the allowable draft depth at various gage readings.

The depths of water in this stretch of river, as indicated in a survey performed on October 12, 2022, are shown in the attached file titled “Notice 2022-049, Mile967-975_based on 6 Cairo gage and 8 Olmsted Lower Gage. _Survey Date 12 Oct 2022”. The depths in this drawing correspond to an assumed straight line slope in the river between a Cairo gage of 6.0 and Olmsted Locks and Dam Tailwater gage of 8.0. (Note that these gage levels are different from the customary gages used to generate maps in this stretch of the river; previous maps have used Cairo gage of 7.5 and Olmsted Locks and Dam Tailwater gage of 9.0.)

The table below shows approximate depths of water at the shallowest points in this stretch of river (around mile 968-969) for the corresponding gages listed. This is based on the attached survey results from October 12, 2022. Draft advisory is for 1’ of clearance under the keel. Actual gages and slope in the river may vary, and more refined interpolations for various combinations of variables may be possible, but this table provides an approximation only.

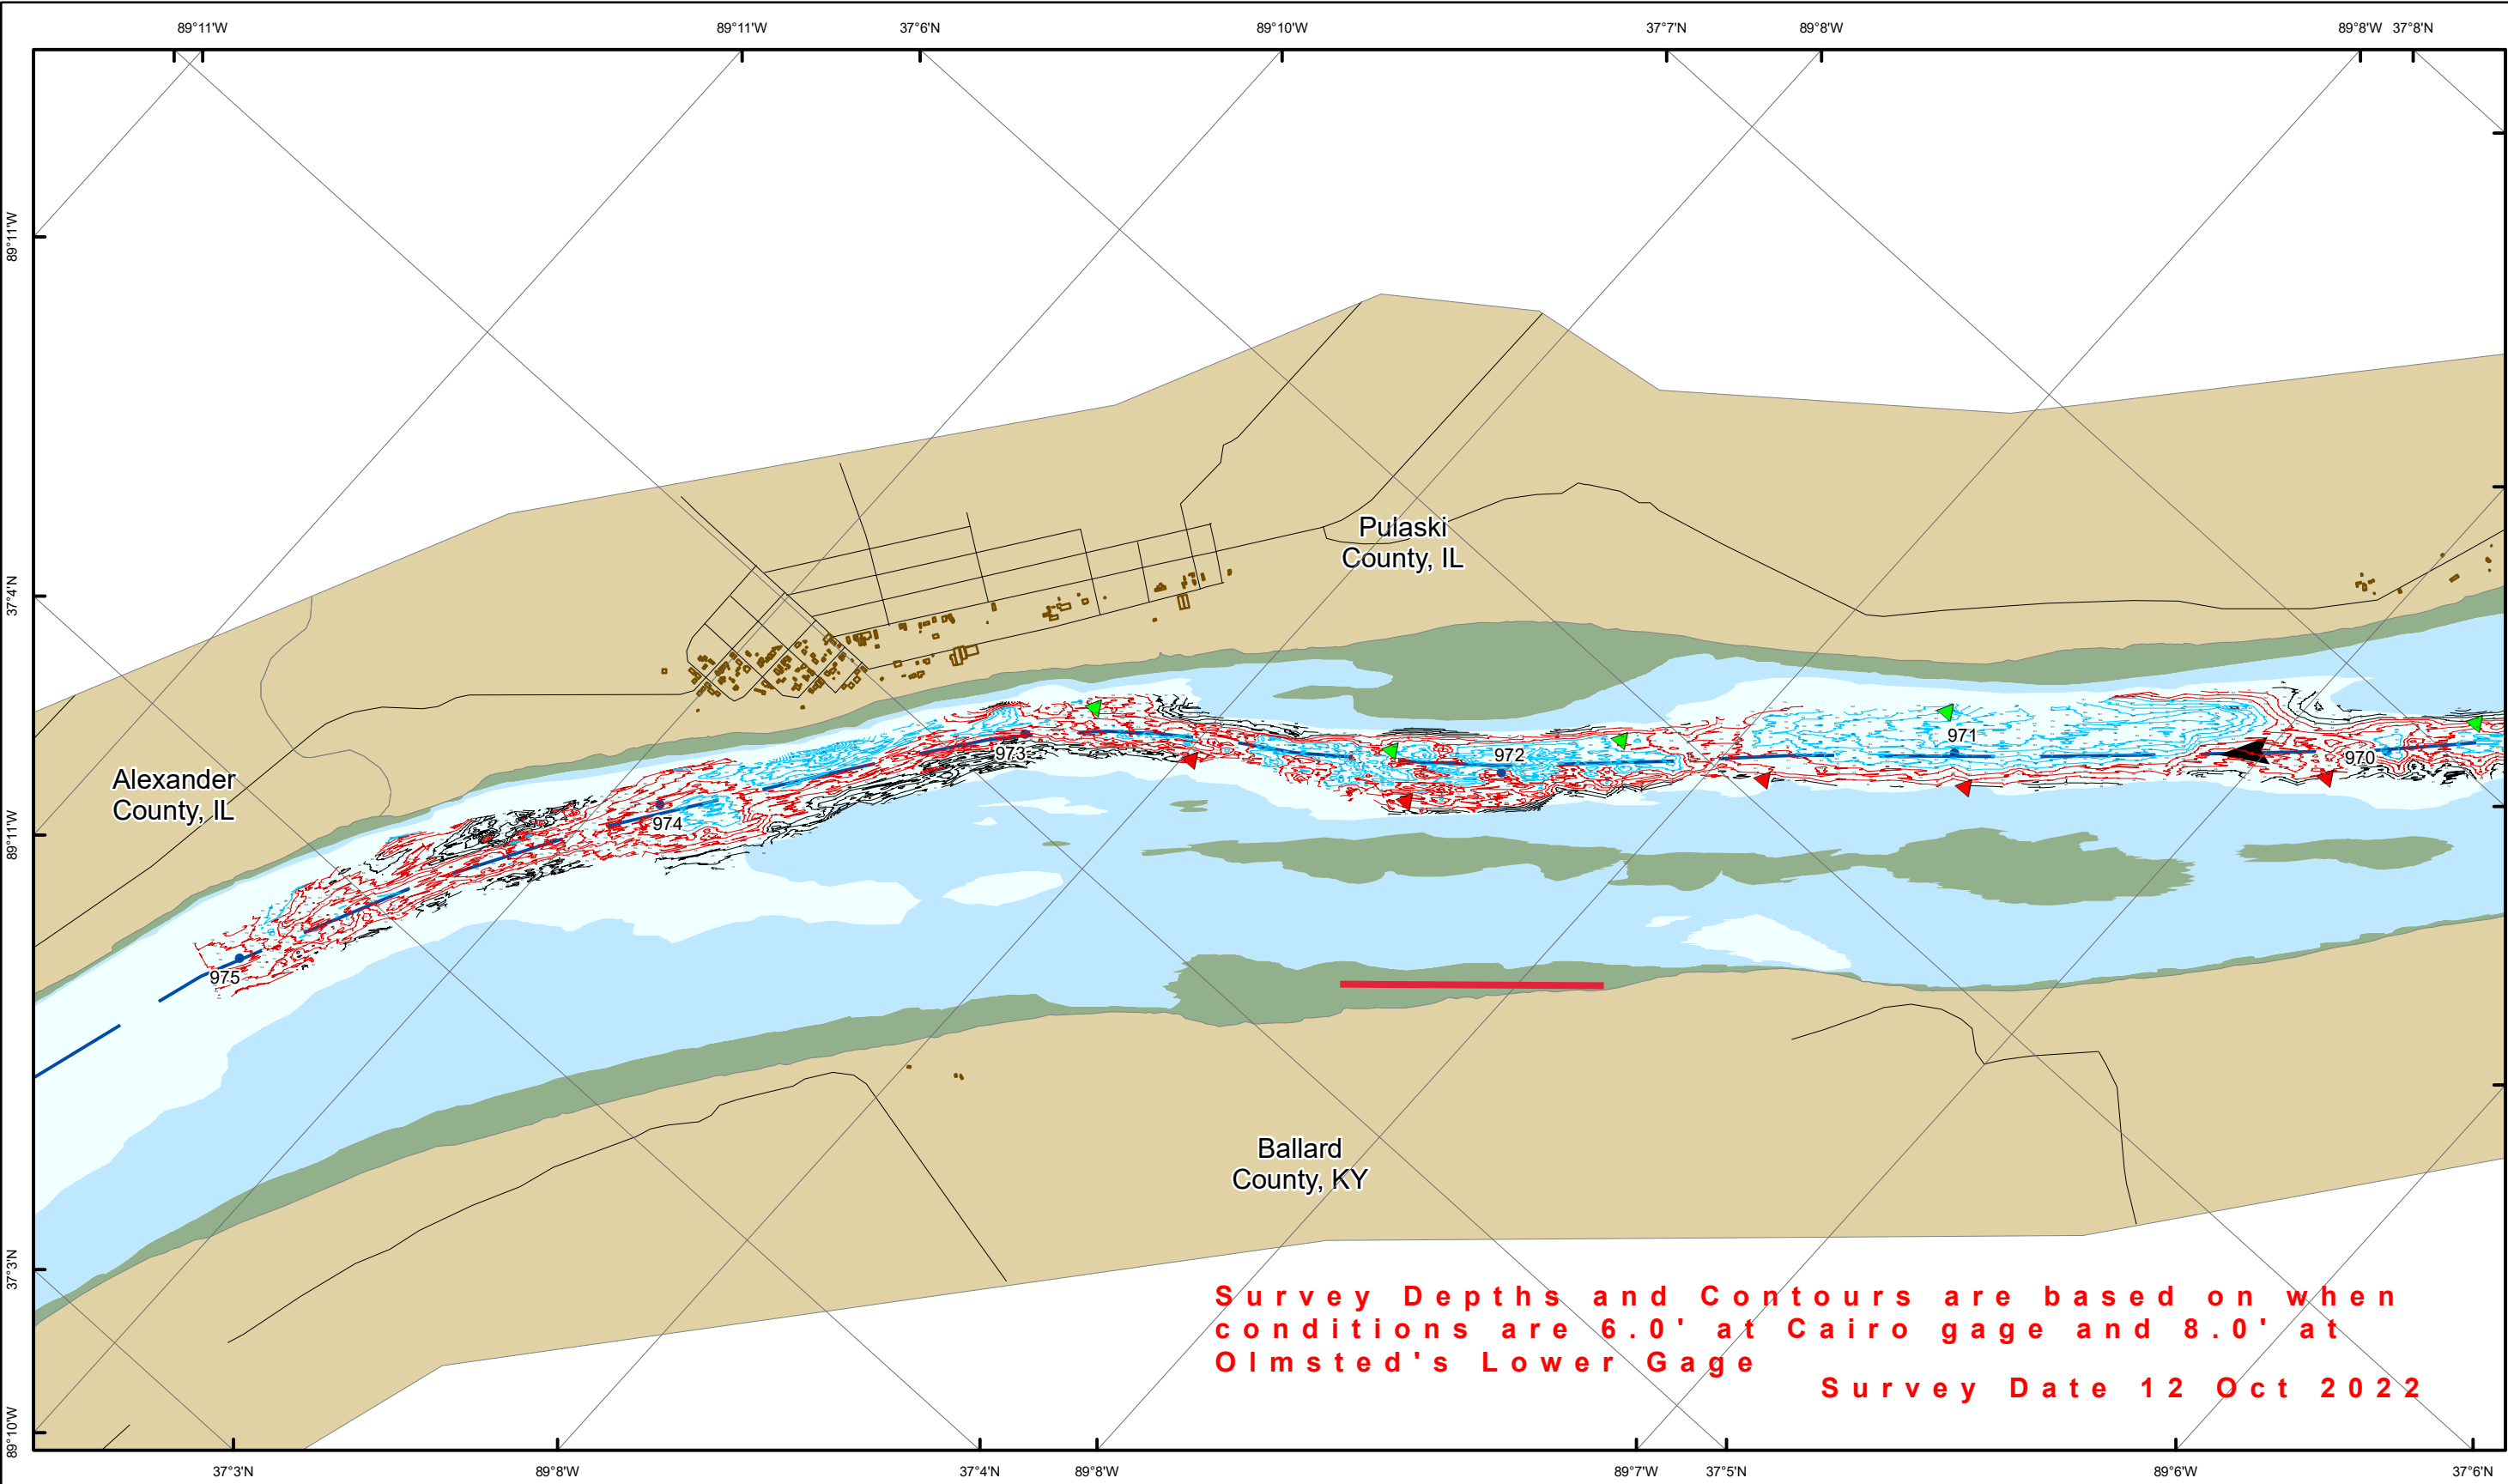

Cairo Gage	Olmsted Tailwater Gage	Depth of Water in stretch between miles 967 and 975	Draft Advisory (1' clearance under keel)
9.0 ft	11.0 ft	11.5 ft	10.5 ft
8.5 ft	10.5 ft	11.0 ft	10.0 ft
8.0 ft	10.0 ft	10.5 ft	9.5 ft
7.5 ft	9.5 ft	10.0 ft	9.0 ft
7.0 ft	9.0 ft	9.5 ft	8.5 ft
6.5 ft	8.5 ft	9.0 ft	8.0 ft
6.0 ft	8.0 ft	8.5 ft	7.5 ft
5.5 ft	7.5 ft	8.0 ft	7.0 ft
5.0 ft	7.0 ft	7.5 ft	6.5 ft
4.5 ft	6.5 ft	7.0 ft	6.0 ft
4.0 ft	6.0 ft	6.5 ft	5.5 ft
3.5 ft	5.5 ft	6.0 ft	5.0 ft
3.0 ft	5.0 ft	5.5 ft	4.5ft
2.5 ft	4.5 ft	5.0 ft	4.0 ft
2.0 ft	4.0 ft	4.5 ft	3.5 ft

Mariners should make note of conditions and exercise caution when transiting the area.

Information updates will be provided as dredging progresses and updated condition surveys become available.
