## **SECTION I - SPECIAL NOTICES**

This section contains information of special concern to the Mariner.

---

### **NOTICE OF PLATFORMS, DRILL RIGS AND ATTENDANT VESSELS**

The drill rigs and vessels that have been temporarily established will display lights and sound signals, according to size or class, during periods of darkness and reduced visibility. Numerous large anchor buoys which may be lighted displaying a white 4-seconds characteristic light and unlighted buoy may be established up to 2,000 or more yards from the vessel or rig site. Mariners should avoid passing close aboard the rigs or vessels. Offshore structures that have been established will display lights and a fog signal sounding 1 blast (2-sec. blast) every 20-seconds. Mooring buoys (white with blue band) may be located within 500 yards of the structure for mooring attendant vessels and/or barges. Mariners should avoid passing close aboard structures.

### **Publication of NVIC 03-23 Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations**

The Coast Guard has published Navigation and Vessel Inspection Circular (NVIC) 03-23: Guidance on Navigational Safety In and Around Offshore Renewable Energy Installations (OREI), to highlight considerations when planning and undertaking voyages in the vicinity of offshore renewable energy installations (OREI) in U.S. waters. The prudent mariner should review and utilize this NVIC to make an informed risk assessment prior to navigating within or in the vicinity of an OREI. Important maritime safety information relating to OREIs is distributed by Local or Broadcast Notices to Mariners (LNM or BNM) promulgated by Coast Guard Districts. Marine Safety Information Bulletins (MSIB) released by the local Captain of the Port may be issued to provide supplemental information. Interested parties should contact the Office of Navigation Systems at CGNAV@uscg.mil, with any questions or feedback.

To access NVIC 03-23, mariners can visit the following website: <https://www.dco.uscg.mil/Our-Organization/NVIC/Year/2020/>

For a full list of all U.S. Coast Guard NVICs, mariners can visit the following website: <https://www.dco.uscg.mil/Our-Organization/NVIC/>

### **GPS Testing**

At times, throughout our area of responsibility, multiple U.S. Government Agencies conduct GPS testing. These tests vary in duration, affected range from the test site and potential impact to the maritime user as they may affect systems that rely on GPS such as E-911, AIS and DSC. More information is available at the U.S. Coast Guard Navigation Center Website, <https://www.navcen.uscg.gov>. During these periods, GPS users are encouraged to report any GPS outages that they may experience, to the Navigation Information Service (NIS) by calling (703) 313-5900 or by using the NAVCEN Website to submit a GPS problem report.

LNM: 07-19

### **U.S. Coast Guard eDelivery of Broadcast Notice to Mariners (eBNMs)**

The U.S. Coast Guard has announced a new manner of delivering Broadcast Notice to Mariners (BNMs). Traditionally, the Coast Guard has relied solely on transmitting these notices via voice transmissions on maritime VHF-FM frequencies. As part of the Coast Guard's commitment to harnessing technology for safer navigation, we have augmented the required VHF-FM radio delivery method to provide real-time information

directly to registered devices. U.S. Coast Guard Sectors and Districts are now actively transmitting BNMs online and through an email subscription service. Mariners are encouraged to subscribe to receive Broadcast Notice to Mariners via email at the following website:

<https://www.navcen.uscg.gov/subscribe-email-rss-feeds>

To access, search and retrieve BNMs online for an area of interest, mariners should visit:

<https://www.navcen.uscg.gov/broadcast-notice-to-mariners>

#### **U.S. MARITIME ALERTS AND ADVISORIES SUBSCRIPTION**

Current and future subscribers of the U.S. Maritime Alerts and Advisories are advised that the legacy manner of subscribing for U.S. Maritime Alerts and Advisories via email has been replaced by a new GovDelivery self-subscription system. Those interested in receiving U.S. Maritime Alerts and Advisories, including those currently/previously registered under the legacy email subscription system, must self-register online. Only subscribers registered through the new self-subscription system will receive newly published U.S. Maritime Alerts and Advisories via email. Mariners can visit the following website to register for the new alert system:

<https://public.govdelivery.com/accounts/USDOTMARAD/signup/34916>. Additional information on the U.S. Maritime Alerts and Advisories subscription service can be found at the following: <https://www.maritime.dot.gov/msci/us-maritime-alerts-and-advisories-subscriptions>.

#### **SUNSET OF NOAA PRINTED CHARTS**

\*\*\*\* Cancellation of NOAA Paper and Raster Nautical Charts \*\*\*\*

The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer. Six months notice of the intent to cancel a specific chart is provided in a "Last Edition" notice. The final cancellation of a chart is made in a "Canceled" notice. Both types of notices will appear in LNM Section IV, "Chart Correction". A comprehensive list of all canceled NOAA charts is available at: <http://www.charts.noaa.gov/MCD/Dole.shtml>. Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA's electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to mariners. More information about NOAA's program to sunset traditional paper charts is on the NOAA Coast Survey website at:

<https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html>

An online NOAA Custom Chart application at: <https://devgis.charttools.noaa.gov/pod> is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

#### **LA - GULF OF MEXICO - Uncrewed Surface Vehicle Operations**

SeaTrac Systems, Inc., has deployed two Uncrewed Surface Vehicles (USV), model SP-48, to conduct ocean data collection in the Gulf of Mexico. The USVs will launch with an escort vessel from the LUMCON Facility in Cocodrie, LA., and transit to the secondary offshore launch location near Cat Island Pass. From there, the USVs will transit to their respective data collection areas under the supervision and control of a remote piloting team. The SP-48s are solar powered 4.8 meter USVs, with a cruising speed of 3 kts and a top speed of 5 kts. The USVs are marked with "UNCREWED" on the transom and are equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability. The USV mission dates and operational data collection areas are as follows:

##### **USV 1:**

Will primarily stay on station while collecting data via onboard sensors.

Operation Dates: November 27, 2023 - December 20, 2023

#### **LA - MISSISSIPPI RIVER - Saltwater Intrusion Operations**

Persistent drought conditions throughout the Mississippi River Valley has reduced the flow of freshwater into the Lower Mississippi River (LMR), allowing for an intrusion of saltwater from the Gulf of Mexico to make its way upriver. Efforts to mitigate the impacts of saltwater intrusion are ongoing along the LMR and will occur 24-hours a day, 7-days a week. Activities include construction and alterations of water intakes and infrastructure along the riverbanks, the transporting of fresh river water by barges and other vessels, and other yet to be identified efforts. Mariners are advised to operate with caution in the vicinity of the locations listed below until further notice.

##### **Location, River Mile (AHOP)**

Port Sulphur, 49.2, RDB  
Pointe A La Hache, 49.7, LDB  
Belle Chasse, 75.5, RDB  
Dalcour, 80.9, LDB  
St. Bernard, 88.0, LDB

Gretna, 96.7, RDB  
West Jefferson, 99.1, RDB  
New Orleans Carrollton, 104.7, LDB  
East Jefferson, 105.4, LDB

The USCG will provide updates of locations with active mitigation efforts via industry wide email. Vessel operators working in support of mitigation efforts at or near these locations should maintain a proper lookout and notify passing traffic when precautions, such as transiting at slowest safe speed, may be needed. Communications should be made on VHF-FM Channel 12, with VHF-FM Channel 67 as a backup. For information on the construction to raise the Saltwater Barrier Sill at Mile 63.8, AHOP, mariners may reference U.S. Coast Guard Sector New Orleans MSIB Vol XXIII Issue 056 (<https://homeport.uscg.mil/Lists/Content/DispForm.aspx?ID=82492&Source=/Lists/Content/DispForm.aspx?ID=82492>). For additional information, mariners should contact the U.S. Coast Guard VTS-LMR on VHF-FM Channels 5A, 12 and 67, or at (504) 365-2514.

#### **LA - PLAQUEMINES PARISH - JEFFERSON PARISH - LAFOURCHE PARISH - Partially Exposed Pipelines**

As a result of recent depth of cover surveys, multiple partially exposed pipelines on the Harvest Midstream pipeline system have been discovered

in the inlets to the Gulf of Mexico, in Plaquemines Parish, Jefferson Parish and Lafourche Parish, LA. The pipelines remain underwater and vary from exposure at the mudline to approximately -4 inches below the mudline. The partially exposed pipelines are marked with cane poles and permanent PVC pipeline markers. Locations affected include, but are not limited to, the following areas and marshes/tributaries near:

Bay Jacques, Plaquemines Parish, LA,  
 Bayou Jacques, Plaquemines Parish, LA,  
 Spanish Pass, Plaquemines Parish, LA,  
 Pass Abel, Plaquemines Parish, LA,  
 Lake Washington, Plaquemines Parish, LA,  
 Barataria Pass, Jefferson Parish, LA,  
 Barataria Waterway, Jefferson Parish, LA,  
 Caminada Pass, Lafourche Parish, LA,  
 Bayou Fifi, Lafourche Parish, LA,  
 Bayou Moreau, Lafourche Parish, LA,  
 Catfish Lake, Lafourche Parish, LA and  
 Cutoff Canal, Lafourche Parish, LA.

Included as an Enclosure to this LNM are positions and lengths for the partially exposed pipelines. Mariners should keep clear of all pipeline markers, transit these areas with caution, and refrain from fishing, trawling or anchoring in these areas.

#### TX - HOUSTON SHIP CHANNEL - Channel Dimensions/Navigation Advisory

The Houston Ship Channel (HSC) widening project is complete between Houston Ship Channel Entrance Lighted Buoy 18 (LLNR-23900) and Houston Ship Channel Light 52 (LLNR-24175). The new main channel width between these aids is 700 ft, with additional barge lanes on either side of the channel measuring 235 ft wide by 12 ft deep. The new HSC width (700 ft) tapers into the previous existing channel width (530 ft) between HSC Lights 51 (LLNR-24170) and 52 (LLNR-24175) and HSC Lights 53 (LLNR-24180) and 54 (LLNR-24185). Hydrodynamic effects resulting in negative vessel interactions between HSC Lights 51/52 and HSC Lights 53/54 have been reported. Mariners should take into account the new channel dimensions, tapering of the channel between HSC Lights 51/52 and 53/54, location of the new aids to navigation, and their vessel's Electronic Chart Display and Information Systems (ECDIS) as they maneuver, meet, and overtake vessels in this area. Attached as an enclosure to this LNM are U.S. Coast Guard Sector Houston-Galveston's Marine Safety Information Bulletins (MSIBs) 13-23 and 19-23, with additional information on the HSC dimensions.

## SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections.

This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

Chart Number	Chart Edition	Edition Date	Last Local Notice to Mariners	Horizontal Datum Reference	Source of Correction	Current Local Notice to Mariners
12327	91st Ed.	19-APR-97	Last LNM: 26/97	NAD 83		27/97
Chart Title: NY-NJ-NEW YORK HARBOR - RARITAN RIVER

(Temp)	ADD	NATIONAL DOCK CHANNEL BUOY 3			CGD01 at 40-41-09.001N	074-02-48.001W
	Green can					
Corrective Action	Object of Corrective Action				Position	

(Temp) indicates that the chart correction action is temporary in nature. Courses and bearings are given in degrees clockwise from 000 true. Bearings of light sectors are toward the light from seaward. The nominal range of lights is expressed in nautical miles (NM) unless otherwise noted.

**TX - GIWW - CHOCOLATE BAYOU - Dredge Operation**

Continuing through December 31, 2023, the Dredge GENERAL PATTON is conducting dredging operations in Chocolate Bayou, from the Chocolate Bayou/GIWW junction to approximate position 29-14-08.3N 095-13-06.2W. Operations will be conducted 24-hours a day, 7-days a week. During dredging operations, the dredge will be located along the outer portion of the waterway and rotate into the channel via anchors set on either side of the channel. Dredged material will be transported via pipeline to placement areas located along the channel. Equipment will consist of steel pipe, floating rubber hoses, floating pipes and submerged pipelines. Sublines will be installed across the GIWW at sufficient depths so as not to interfere with navigation. All subline crossings will be lit and marked with buoys. All other pipeline routes will have all required U.S. Coast Guard markings and lighting for night operations. The dredge will monitor VHF-FM Channels 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to minimize wake after passing arrangements have been made. Attached as an enclosure to this LNM is an illustration of the dredging project area.

## Uncrewed Surface Vehicle (USV) Deployment Notice

### Summary

SeaTrac Systems intends to deploy its Uncrewed Surface Vehicles (USV), the SP-48, in the Gulf of Mexico for the purpose of ocean data collection between 11/27/2023 and 12/20/2023 and 12/05/2023 and 12/15/2023. The USVs will be launched from LUMCON in Cocodrie, LA and will be escorted by a support vessel to a departure location in the vicinity of Cat Island Pass. At this point the SP-48 will be turned over to the remote pilot who will monitor and control the boat as it heads offshore to its operating area specified below. The SP-48 will be monitored and controlled remotely from the SeaTrac office located at 100 Hoods Lane, Marblehead, MA 01945. The SP-48 is shown in the images below for reference.

### Vehicle Description

The SP-48 is a 4.8 meter long, solar powered, USV that is intended to operate persistently for up to months at a time for the purpose of data collection and monitoring applications. The USV weighs ~650 lbs and has a cruising speed of 3 kts and a top speed of 5 kts. The USV is equipped with an AIS transceiver, running lights, and a yellow signal flag to aid in observability, and is also marked with "Uncrewed" on the transom to clearly indicate the absence of personnel onboard. The pilot has real-time access to 360-degree cameras on board the USV for situational awareness which can be accessed through redundant communications links (2 cellular and 2 satellite) for command and control of the vehicle.

### NOAA Electronic Nautical Chart Update

The Captain of the Port (COTP) Houston-Galveston is notifying mariners of the recent updates made by NOAA for nautical charts within the lower Houston Ship Channel (HSC) from HSC Lighted Buoy 18 to the narrowing channel transition Lights 53 and 54. Mariners are advised to update their electronic charting devices to reflect current chart updates.

With the dredging suspended, surveys completed and Aids to Navigation (AtoN) set in this area, these new dimensions are available for use, however Mariners are advised to proceed with caution as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form:

### Aids to Navigation Change in Houston Ship Channel

The Captain of the Port (COTP) is advising mariners of a change in channel dimensions within the lower Houston Ship Channel from Lighted Buoys 25 through Light 52, approximately Bolivar Roads to Redfish:

New Project 11 Channel dimensions are in effect for a section of the Houston Ship Channel from Lighted Buoy 25/26 (Station 128+000) to Lighted Buoys 51/52 (Station 79+000), known as Segment 1A.

Surveys have been successfully completed extending the width of the main channel to 700 feet wide with additional barge lanes on either side measuring 235 feet wide by 12 feet deep. Depths are based on Mean Lower Low Water in this section. USCG Aids to Navigation (AtoN) Teams have set all aids to navigation from Lighted Buoy 25 to Light 52 according to the new channel dimensions.

Currently NOAA charts “do not” reflect the new AtoN positions, however, USCG is actively working with NOAA to make chart corrections as soon as possible.

With the dredging suspended, surveys completed and AtoN set in this area, these new dimensions are available for use, however Mariners are advised to proceed with vigilance as they accustom themselves to the new dimensions and note where the old channel dimensions meet the new channel dimensions. The new channel width (700') tapers into the previous channel width (530') between Lights 51/52 and Lights 53/54.

To promote safety, mariners are highly encouraged to update electronic charting systems on a regular basis to ensure chart accuracy and visibility of new changes.

Any discrepancies to AtoN to include knockdown of lights should be reported to the USCG as soon as possible as noted in MSIB 02-22. Reports of discrepant aids may be made to the USCG via Channel 16 or via the online AtoN Discrepancy Report Form:

Work limits for the HSC, equipment staging area(s) and subline crossing will be bound by the following approximate positions:

Lat 29°38'24.44"N, Long 94°58'52.78"W

Lat 29°38'44.69"N, Long 94°57'37.17"W

A dredge subline leak is located approximately 1,200-feet East of the Houston Ship Channel and approximately 50-feet North of 5-Mile Cut Channel near the following GPS position:

Lat 29°36'36.77"N, Long 94°56'52.20"W.

Approximately 290 Cys of misplaced dredged material that built up to an elevation of 6-feet from natural bottom has reduced water depths in the area to approximately 4-feet. The artificial shoal has been marked with 4 danger buoys to alert the boaters. Small vessels traveling through 5-Mile Cut Channel are urged to take caution when transiting this area.

A second mound of material has been reported near the following GPS position: 29°36'56.65"N, 94°57'12.58"W. The mound is out of the channel and has been marked with danger buoys.

Weeks Marine is requesting a slow bell for all the vessels transiting the Houston Ship Channel (HSC) between Green Light "73" and Green Light "81". Mariners are urged to use extreme caution and transit this area at their slowest safe speed to create minimum wake after passing arrangements have been made.

A partially suspended section of pipe has been found underwater near G-LT "81" (LLNR 24525), outside of the HSC. A red buoy has been placed at approx. gps coordinates: Lat 29°38'5.00"N, Long 94°57'57.00"W, to mark the location of the pipe and alert the boaters of the potential hazard.

Dredging operations will continue on a twenty-four (24) hours per day, seven (7) days per week basis. Dredge, pipeline(s) and equipment will have all required Coast Guard lighting for night operations. Dredge, tugs and boats will monitor marine VHF channels 13, 16 and 72. Mariners are urged to use extreme caution and transit the area at their slowest safe speed to create minimum wake after passing arrangements have been made.
