TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
SAGINAW BAY - Au Gres Harbor/General/MSIB	MSIB	General/MSIB From: 2026-07-24 To: 2026-09-07 The NOAA Great Lakes Environmental Research Laboratory (GLERL) will be conducting multiple scientific instrumentation deployments, including some Autonomous Surface Vessel (ASV) deployments between July 29 and September 4, 2026, in the area crosshatched in yellow on the attached map. The vessel will be on the water three days or less per week during that time period responding to weather driven events (heat waves, high precipitation, etc.). The ASV is a 16-foot single hull SeaTrac that operates on the water surface. Mariners are asked to keep a minimum distance of 200 feet away from the ASV. The vessel will be clearly marked with the word "SeaTrac" and the NOAA logo and will display navigation lights for a powered vessel of its size. The vessel will carry AIS and broadcast its position under the name "UNCREWED NOAA SP48" with an MMSI number of 338555458. The R4107, R4108, or the R2604 may be on scene during some operations and may be hailed on VHF-FM channel 16. For additional information, contact NOAA GLERL Marine Instrumentation Laboratory at 734-741-2235 or email oar.glerl.mil-team@noaa.gov.

The buoy hull will remain on station year-round, with the lantern seasonally removed during the winter months versus replacement with a steel ice hull. The change provides both greater flexibility in the seasonal availability of a lighted signal, but also an improved radar signature during unlit off-season periods. The lighted characteristics of the aid and the assigned seasonal dates published in the Light List will remain unchanged. Any questions or comments can be sent to Mr. Brian Hawkins, the Federal Aids to Navigation Manager at the Coast Guard Great Lakes District via email at Brian.D.Hawkins2@uscg.mil. The buoy hull will remain on station year-round, with the lantern seasonally removed during the winter months versus replacement with a steel ice hull. While the change will marginally reduce the visual and radar range of the physical hull, the benefits of greater flexibility in availability of a lighted signal in nearshore areas and the proximity of fixed aids to navigation, were taken into consideration. The lighted characteristics of the aid and the assigned seasonal dates published in the Light List will remain unchanged. Any questions or comments can be sent to Mr. Brian Hawkins, the Federal Aids to Navigation Manager at the Coast Guard Great Lakes District via email at Brian.D.Hawkins2@uscg.mil. The buoy hull will remain on station year-round, with the lantern seasonally removed during the winter months versus replacement with a steel ice hull. The change provides both greater flexibility in the seasonal availability of a lighted signal, but also an improved radar signature during unlit off-season periods. The lighted characteristics of the aid and the assigned seasonal dates published in the Light List will remain unchanged. Any questions or comments can be sent to Mr. Brian Hawkins, the Federal Aids to Navigation Manager at the Coast Guard Great Lakes District via email at Brian.D.Hawkins2@uscg.mil. LAKE HURON - SAGINAW BAY/General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes From: 2026-05-06 To: 2026-11-27 Location: 43-44-10.068N/083-27-38.124W Hardman Construction is conducting steel sheet pile and embankment work along the south shore of the Sebewaing River in Sebewaing, MI. Operations are scheduled to conclude on November 27, 2026. Standard work hours are Monday through Friday from 7:00 AM to 5:00 PM, with Saturday operations occurring on an as-needed basis. The project does not employ any temporary aids to navigation or buoys, and no VHF channels are actively monitored by the work crews. Mariners are advised to use extra caution and transit at a slow speed when approaching the stretch of the Sebewaing River between the Sebewaing River Railroad Bridge and the N Center Street Bridge. For additional information, mariners may contact Dave DeClerck at 231-852-4011.	Lat: 43° 44' 10" Lon: -083° 27' 38"
LAKE HURON - SAGINAW BAY/General/MSIB	MSIB	General/MSIB From: 2026-07-24 To: 2026-09-07 The NOAA Great Lakes Environmental Research Laboratory (GLERL) will be conducting multiple scientific instrumentation deployments, including some Autonomous Surface Vessel (ASV) deployments between July 29 and September 4, 2026, in the area crosshatched in yellow on the attached map. The vessel will be on the water three days or less per week during that time period responding to weather driven events (heat waves, high precipitation, etc.). The ASV is a 16-foot single hull SeaTrac that operates on the water surface. Mariners are asked to keep a minimum distance of 200 feet away from the ASV. The vessel will be clearly marked with the word "SeaTrac" and the NOAA logo and will display navigation lights for a powered vessel of its size. The vessel will carry AIS and broadcast its position under the name "UNCREWED NOAA SP48" with an MMSI number of 338555458. The R4107, R4108, or the R2604 may be on scene during some operations and may be hailed on VHF-FM channel 16. For additional information, contact NOAA GLERL Marine Instrumentation Laboratory at 734-741-2235 or email oar.glerl.mil-team@noaa.gov.

Vessels able to pass under the bridge without an opening may do so at any time. Additionally, six barges 80x190-foot or smaller will be working under the bridge, and they will move if a 3-hour advance notice is provided by calling 608-475-8851, or 608-610-9374, or 989-293-5892. Trestles will be installed extending outward from shore approximately 50-feet. Flashing yellow lights will warn mariners of the trestle's location. Heel girders will be installed on the four corners of the bridge to enable the new drawspan to be opened during construction. These girders will extend an additional 2-feet into the channel reducing the horizontal clearance to approximately 136-feet. During the winter, the ice will degrade due to the movement of barges and the ice under the bridge should be considered unsafe for pedestrians or vehicles. Keweenaw Waterway - Torch Lake Canal/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2026-06-01 To: 2026-10-31 U.S. Environmental Protection Agency Great Lakes National Program Office (GLNPO) will commence on or about June 01, 2026, in Torch Lake adjacent to the Lake Linden Recreation Area in the Village of Lake Linden, Houghton County, Michigan. The work area is a 3.2-acre dredge footprint covering approximately 1,300 LF along the Northwestern shoreline of Torch Lake from approximately 47°11'20.7371"N 088°24'25.0909"W to 47°11'16.2637"N 088°24'20.8101"W and a sediment processing/unloading dock located at approximately 47°10'35.0189"N 088°25'10.1927"W. Loaded and unloaded hopper barges will be towed approximately 1.2 miles between the Dredging Area and Sediment Area Processing Dock as needed. Three turbidity monitoring buoys will be deployed in support of the work. Four (4) No Wake/No Entry buoys will be installed in the immediate vicinity of dredging work areas. Brennan will also install approximately 550 linear feet of temporary sheet piling along the western edge of the dredge area to facilitate near-shore dredge cuts. Buoys will be marked with navigation lights pursuant to 33 CFR 62.45 to indicate the work areas and project equipment. Inside the Dredging Area, Barge Lane, and Sediment Processing Dock Area, equipment consisting of the Tug Debra Mary, the JFB 4400 (Dean Barge), the BMI 102 and BMI 103 material barges, the JFB 4477 spud barge, the Alton Barge, four S-50 sectional barges, the JFB 7771 survey vessel, push boats, and small skiffs will operate from approximately 6:00 AM to 6:00 PM, Monday-Saturday. See the attached drawings to show the project location and operations areas. All vessels and crew will monitor VHF channel 16 during the project execution. On-water operations are expected to commence June 1, 2026. Mechanical dredging is currently scheduled from approximately July 1, 2026 through August 19, 2026, with backfill and demobilization continuing through October 19, 2026 (on-site construction complete date) and final project close-out by December 31, 2026. Hours of operation are from 0600-1800 7 days a week. JFB Vessels – Dean Barge, Tug Debra Mary, JFB 7771 Channel 16 and 22a	Lat: 47° 11' 16" Lon: -088° 24' 23"
