Construction is intended to shore-up and replace approximately 2,400 linear feet of corrugated steel bulkhead located on the western (left descending) bank of the Cuyahoga River between the Detroit-Superior Bridge and the Columbus Road Bridge. The Captain of the Port Sector Eastern Great Lakes (COTP) has determined that potential hazards associated with the equipment used to complete this project would be a safety concern for any craft intending to navigate near the project area during construction hours. Furthermore, additional safety measures are necessary to keep workers on the construction barges safe while completing the construction project. Construction hours are from 7 a.m. each Tuesday through 7 a.m. each Thursday; during that time no vessel or craft is to be within 10 feet of the construction barges unless permitted by the COTP or a designated representative. This Regulated Navigation Area is in effect until the waterside portion of the work is complete.

No equipment will be placed in the water. Overhead work will have temporary steady burning yellow lights to mark new construction. A moving platform with quick flashing red lights and orange or red ball fenders on the bottom four corners with a safety net that hangs approximately 15-feet below low steel will be constructing the bridge. Mariners should avoid passing directly under the platform at any time. Snooper type vehicles will be utilized on the bridge throughout construction. Spotters will warn of approaching vessels and move the man lift to allow vessels to pass. When construction is completed and all equipment removed, the final vertical clearances for the bridge will be 152-feet for the center 100-feet of the navigation channel. No less than 137-feet of vertical clearance will be available at the channel limits. Vertical clearances are based on IGLD85.
