

**Local Notice to Mariners for Northwest District 01/21/2026****Aberdeen****Additional MSI Categories**

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Grays Harbor - Aberdeen/General/Bridges/Public Notice	Bridges	The U.S. Coast Guard has issued a Public Notice (PN-02-25) and is soliciting for comments exclusively related to navigation. Maritime transportation system stakeholders (vessels and facilities) are highly encouraged to carefully review this notice and provide comments regarding the proposed bridge's ability to meet the needs of navigation, including mariner requirements for horizontal navigation clearances and vertical navigation clearances. The Coast Guard is particularly interested in receiving comments from maritime stakeholders with current and or future vertical navigation clearance requirements of greater than 18.9 feet. The Public Notice can be found at the following link: <a href="https://www.navcen.uscg.gov/bridge-notices">https://www.navcen.uscg.gov/bridge-notices</a> . Comments will be received for the record at the office of Commander (dpw), Northwest Coast Guard District, 915 2nd Ave, Rm 3510, Seattle, WA, or via email at D13-SMB-D13BRIDGES@uscg.mil. Comments should be sent to arrive on or before 19 September 2025.	Lat: 46° 59' 05" Lon: -123° 48' 19"
Grays Harbor - Aberdeen/General/Bridges/Temp Deviation	Bridges	The U.S. Coast Guard intends to approve a temporary deviation for the operating schedule that governs the Heron Street Bridge (LLNR 16072.2), mile 0.2, across the Wishkah River, in Aberdeen, WA. The deviation will accommodate maintenance and restoration of the steel grid roadway. The Heron Street Bridge provides 8 feet of vertical clearance in the closed-to-navigation position above high water. To facilitate this event, the draw of the subject bridge will be maintained in the closed-to-navigation position from 0600 on 15 Aug 2026 to 1800 on 11 Feb 2027. Vessels that do not require bridge openings may continue to transit beneath these bridges during the closure periods. The draw will not be able to open for vessels engaged in emergency response operations during this closure period. Please submit comments or objections before 13 Feb 2026 at d13-smb-d13-bridges@uscg.mil. For more information contact Stefani Hardy at (360) 591-4269 or stefani.hardy@wsdot.wa.gov.	Lat: 46° 58' 34" Lon: -123° 48' 42"

General/Marine Construction (Excluding Bridges)/Facilities, Barriers, Manmade Reefs, Riprap, Jetties/Dikes	Marine Construction (Excluding Bridges)	Advanced American Construction will be constructing a new railroad bridge on the Washington side of the Columbia River near RM 168.2. at the confluence of the White Salmon River & Columbia River. Work includes heavy marine assets, critical lifts, and pile driving operations. The Derrick Barge AAC Millennium will be on station from 10 Nov 25 through 31 Dec 26. Working days are planned for Monday through Friday, 0700 to 1700. Onsite equipment will monitor VHF-FM channels 13 & 16 during working hours. Mariners are requested to reduce speed and avoid the work area. During non-working hours, the derrick barge will remain on station with steady white lights on all four corners. Please call Kristian Hellberg at (703) 409-1614 or email at kristianh@callaac.com for more information.	Lat: 45° 43' 42" Lon: -121° 31' 21"
Columbia River - Bonneville Pool/General/Miscellaneous	Miscellaneous	The USACE Portland District has scheduled the annual navigation lock maintenance closure for 2025. During this time, the Locks and Dams on the Columbia River in the Portland District have scheduled routine inspections and maintenance, as well as some non-routine work. For the three (3) navigation locks, the closure schedules are as follows: Bonneville (RM 146.1) – 0001 on 02 Mar 2026 to 2359 on 14 Mar 2026 The Dalles (RM 191.5) – 0001 on 01 Mar 2026 to 2359 on 21 Mar 2026 John Day (RM 215.6) – 0001 on 01 Mar 2026 to 2359 on 21 Mar 2026 For additional information regarding Bonneville, The Dalles and John Day lock maintenance closures, contact Portland District at (503) 808-4510. The Walla Walla District lock maintenance schedule is published separately – mariners can contact the Walla Walla District at (509) 527-7364.	Lat: 45° 36' 54" Lon: -121° 08' 21"

Columbia**Additional MSI Categories**

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Columbia River, Submerged Land Act (SLA) - Columbia/General/Bridges/Closure (Scheduled Or Emergency)	Bridges	The lift span of the Hood River Highway Bridge (BRDG UID 29951) (LLNR 11933) at Columbia River mile 169.8 is unable to open until further notice. The bridge lift span is experiencing mechanical failure. The Port of Hood River does not have an estimated time for repairs. The Hood River Highway Bridge provides 67 feet of vertical clearance with the lift span in the closed (down) position. Vessels able to safely pass under the bridge without a lift may do so at any time. For more information contact the Port of Hood River, Kevin M. Greenwood, at (541) 386-1138 or email kgreenwood@portofhoodriver.com.	Lat: 45° 43' 07" Lon: -121° 29' 41"
Sector Columbia River, Submerged Land Act (SLA) - Columbia/General/Bridges/Lighting and Other Signals	Bridges	The Kalan Railroad Bridge, LLNR 13027, has been reported with navigational lighting extinguished.	Lat: 46° 10' 44" Lon: -119° 01' 03"
Sector Columbia River, Submerged Land Act (SLA) - Columbia/General/Bridges/Lighting and Other Signals	Bridges	On the north channel span of the Astoria Megler Bridge, 6 of the 14 Red Pier Lights are extinguished. Mariners should use caution when transiting at night.	Lat: 46° 12' 55" Lon: -123° 51' 43"
General/Bridges/Construction	Bridges	Oregon Department of Transportation (ODOT) and Oregon State Bridge Construction, Inc. will conduct pedestal bearing repairs on the Astoria Highway Bridge (LLNR 10086), AKA the Astoria-Megler Bridge, across the Columbia River at RM 13.5 at Astoria, Oregon, from 10 Nov 2025 through 30 Jan 2026. Work will be conducted near the center of the bridge, from Bent 56 through Bent 84 and should not impact the Federal Navigation Channel. For additional information, contact the resident engineer at Anita.C.Eaton@odot.oregon.gov.	Lat: 46° 12' 55" Lon: -123° 51' 43"
General/Bridges/Temp Deviation	Bridges	The Coast Guard has approved a temporary deviation from the normal operating schedule that governs the Interstate-5 Highway Bridge (LLNR 11258) across the Columbia River, RM 106.5. The subject bridge need not open the draw to marine vessels during the following dates and times: - from 0600 on 21 January 2026 to 0600 on 22 January 2026. - from 0600 on 26 January 2026 to 0600 on 28 January 2026. - from 0600 on 9 February 2026 to 0600 on 11 February 2026. These draw closures support electrical equipment installation. The I-5 Highway Bridge draw operates in accordance with 33 CFR 117.869 (a). When the draw is in the closed-to-navigation position, the bridge provides 16 feet of vertical clearance above Columbia River Datum 0.0. An alternate fixed span provides 34 feet above Columbia River Datum 0.0. This part of the Columbia River does not have an immediate alternate route for vessels to pass. Vessels able to pass through the I-5 Bridge with the draw in the closed position may do so at any time. The I-5 Bridge will not be able to open for emergencies. For more information on the closure of the Interstate I-5 Bridge contact Chris Bush at chris.a.bush@odot.oregon.gov or (971) 673-5892.	Lat: 45° 37' 06" Lon: -122° 40' 30"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Sector Columbia River, Submerged Land Act (SLA) - Columbia River/General/Bridges/Repairs, Painting, Or Fender Replacement	Bridges	WSDOT and Garco Construction will be replacing the decking and repairing piers and crossbeams of the I-90 Highway Bridge across the Columbia River at RM 420 at Vantage WA. Work will start on 4 Mar 2024 and is anticipated to be complete in Nov of 2027. Typical work schedule will be Monday – Friday, 0700 – 1730 with occasional night work. A containment system will be installed on the east span reducing the vertical navigation clearance by 10ft. With all construction projects there is a hazard of falling debris, the containment system is designed to prevent any debris from falling into the water. However, mariners are advised to use caution while transiting the area. For the initial phase the main navigation channel will not have containment installed and provides 73.5 feet of vertical navigation clearance at High Pool Elevation of 571.5 feet. Subsequent phases will have containment installed over the main navigation channel, and updates will be posted in future editions of the LNM. For additional information, contact Justin Ludwig at (208) 704-0122 and email JustinL@garco.com.	Lat: 46° 56' 32" Lon: -119° 58' 23"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Bonneville Pool - Hood River/General/Bridges/Public Notice	Bridges	The Hood River-White Salmon Bridge Authority is updating the Navigation Impact Report (NIR) for the Hood River-White Salmon Bridge Replacement Project and conducting outreach to river users. First published in 2019, the NIR is developed in compliance with U.S. Coast Guard requirements to evaluate current and future needs of vessels that navigate the Columbia River beneath the Hood River-White Salmon Bridge. The river user survey can be completed by anyone who navigates on the Columbia River beneath the bridge. River users already known to the project will be contacted directly by the Authority. If you navigate the Columbia River beneath the Hood River-White Salmon Bridge and have not been contacted directly, please help us out by filling out this survey by November 7th, 2025: <a href="https://forms.gle/m4KxhL6t84QVyt27">https://forms.gle/m4KxhL6t84QVyt27</a> . For more information on the project, visit <a href="https://hoodriverbridge.org/">https://hoodriverbridge.org/</a> . If you have any questions about the survey or the project, please email us at <a href="mailto:info@hoodriverbridge.org">info@hoodriverbridge.org</a> .	Lat: 45° 43' 07" Lon: -121° 29' 41"
Bonneville Pool - Hood River/General/Bridges/Construction	Bridges	Mariners are advised that the Hood River-White Salmon Bridge Authority will be conducting geotechnical explorations in the Columbia River in the vicinity of the hood River Highway Bridge (LLNR 11933) in preparation for construction on a new bridge. Barges will be present on the river in the vicinity of RM 168.5 – 170 from 28 Jan – 30 Jun 2026, and work is expected from 0700 – 1900 daily. A variety of vessels will be operating or stationed in the vicinity of the proposed bridge location (RM 169.8) and near the existing bridge structure. The barges are not powered and will be marked with "restricted in ability to maneuver" day shapes / lights. All barges and service vessels will have solid white lights at all four corners visible at minimum one (1) NM. Vessels may safely transit through the existing bridge through the navigational channel. The Authority is requesting all mariners use extreme caution and transit the working areas at their slowest safe speed. The tug operators will also be monitoring Channel 13 for ship traffic during operations. Geotechnical Exploration Lead, Cody Sorensen may be contacted at (503) 403-9952 and Barge Operator, Captain Craig Mark at (360) 772-0916.	Lat: 45° 43' 07" Lon: -121° 29' 41"

General/Bridges/Maintenance	Bridges	King County will be replacing trolley power cable poles across the University Street Bridge (LLNR 18235), mile 4.3, across the Lake Washington Ship Canal in Seattle, WA. The work schedule will be from 01 Sep 2026 through 28 Mar 2027 and working hours from 0600 to 1800. A UBIT will be used to reach under the bridge. The UBIT requires up to ten feet below the bridge, and the UBIT will have an amber flashing light. The University Bridge draw will operate as normal but be prepared for a short delay if your vessel requires a draw opening. For more information contact TingTing Martin at <a href="mailto:tingting.martin@kingcounty.gov">tingting.martin@kingcounty.gov</a> , 206-477-3562 or Russell Darby at <a href="mailto:russell.darby@kingcounty.gov">russell.darby@kingcounty.gov</a> , 206-477-7688.	Lat: 47° 39' 11" Lon: -122° 19' 12"
Shilshole Bay - Lake Union/General/Bridges/Temp Deviation	Bridges	The U.S. Coast Guard intends to approve a temporary deviation for the operating schedule that governs the Fremont Bridge (LLNR 18182), crossing the Lake Washington Ship Canal in Seattle, WA. The deviation will accommodate the Tenacious Ten running event. The Fremont Bridge provides 29 feet (center 100 feet of draw, sides 14 feet) of vertical clearance in the closed-to-navigation position above high water. To facilitate this event, the Fremont Bridge need not open for vessel traffic from 0830 to 1030 on 5 Apr 2025. Vessels that do not require bridge openings may continue to transit beneath the bridge during the closure period. The draws will be required to open, if needed, for vessels engaged in emergency response operations during this closure period. Please submit comments or objections before 13 Feb 2026 at <a href="mailto:d13-smb-d13-bridges@uscg.mil">d13-smb-d13-bridges@uscg.mil</a> . For more information contact Kit Loo at (206) 684-3669 or <a href="mailto:kit.loo@seattle.org">kit.loo@seattle.org</a> .	Lat: 47° 38' 52" Lon: -122° 20' 59"

General/Bridges/Lighting and Other Signals	Bridges	Interstate 90 Highway Bridge (east channel) (LLNR 18398) the green center channel light is missing.	Lat: 47° 34' 44" Lon: -122° 11' 60"
General/Bridges/Removal	Bridges	Skanska Civil USA West will conduct demolition operations on the I-405 Northbound to SR 522 Eastbound and Westbound connector bridges, located over the Sammamish River in the vicinity of river mile 8.3 at coordinates 47°45'24.800" N, 122°11'03.200" W. Work will occur from 15 Dec 2025 through 1 May 2026 and involves the removal of approximately 500 linear feet of bridge structures in multiple phases. Work hours are Monday through Friday from 0700 to 1530, with possible Saturday and night shift work based on production needs and closures. A minimum vertical clearance of 20 feet will be maintained under the demolition platform. Hazards include falling concrete, overhead loads, and interaction with heavy machinery such as excavators, cranes, and hauling trucks. Waterway controls will include oil booms upriver and downriver, along with signage to alert vessel traffic. No in-water work is scheduled now. For more information, contact Cody Zarecor, Field Engineer, at (425) 219-2945 or Cody.Zarecor@skanska.com; Daniel Snyder, General Superintendent, at (206) 450-8820 or Daniel.Snyder@skanska.com; or Zachary Lucarelli, Project Manager, at (506) 450-9098 or Zachary.Lucarelli@skanska.com, or Travis Cox, Senior Project Engineer, at (951) 533-9405 or Travis.cox@skanska.com. Admiralty Inlet - Puget Sound/General/Bridges/Maintenance	Bridges	Burlington Northern Santa Fe Railway Company will be conducting construction on the Chambers Creek Bridge, AKA BNSF Bridge 14.2 (LLNR 17268) across Chambers Bay near Stellacoom, WA. Construction will occur 12 Dec 2025 through 01 Feb 2026. The working hours will be 0700 - 1600 daily. The draw will continue to operate per 33 CFR 117.1029 during the construction. Scaffolding will be installed below the draw and the vertical clearance in the closed position will be reduced from 10 feet to 5 feet above high tide; the draw in the open position will be reduced from 50 feet to 45 feet in the fully open position. The scaffolding will reduce the draw horizontal clearance from 80 feet to 40 feet. Scaffolding will be installed on the south side and progress towards the north and will occupy no more than half of the draw. Vessels should be aware of falling hazards while navigating under the subject bridge. Amber flashing warning lights will mark the scaffolding. Signs will be placed for warning mariners of the hazard. For additional information contact Zachary Balsuger at (262) 613-7961.	Lat: 47° 11' 14" Lon: -122° 35' 03"

The draw will continue to operate per 33 CFR 117.1059 during the construction efforts. Vessels are requested to transit the bridge area at lowest speed with no wake. Tug and barge vessels may be in the area as support vessels. Alternate routes are via Ebey Slough and Steamboat Slough. For additional information contact Matt Wells at (253) 405-6074.	Lat: 48° 01' 01" Lon: -122° 11' 21"

Possession Sound - Snohomish River/General/Bridges/Temp Deviation	Bridges	The Coast Guard has approved a temporary deviation for the SR-529 Bridge (LLNR 18591.2) and SR-529 Bridge (LLNR 18591.3) crossing the Snohomish River at mile 3.6, near Marysville, WA, and SR-529 Bridge (LLNR 18594.9) and SR-529 Bridge (LLNR 18594.11) crossing Steamboat Slough at mile 1.1 near Everett, WA. The deviation supports the Everett Marathon and will allow personnel to safely cross the four subject bridges. The draws are authorized to not open to marine vessels from 0830 to 1100 on 29 Mar 2026. Vessels which do not require a bridge opening may continue to transit beneath these bridges during the closure times. The bridges will be able to open for emergencies, and an alternate route for vessels to pass is via Ebey Slough or Union Slough. In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedule immediately at the end of the effective period of this temporary deviation. For more event information contact Colleen Kelly at Colleen.kelly@wsdot.wa.gov or 425-739-3700.	Lat: 48° 02' 11" Lon: -122° 10' 57"
Possession Sound - Snohomish River/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	Duwamish Services will be dredging in the Snohomish River from approximately 04 Nov 2025 – 15 Feb 2026. Dredging operations will occur 7 days per week, 24 hours per day, except federal holidays. Dredging locations include near the Port of Everett Marina, and upstream at near RM 3.2 – 3.5. The hydraulic dredge will be supported by a dredge tender vessel Miss Daisey and a 16 foot work skiff. A sunken pipeline for material placement will be marked IAW USCG requirements. If dredge equipment obstructs the channel, it will be moved upon approach of a vessel to allow for safe passage. Mariners should take care when transiting the area, travel at reasonable speeds, and be aware of marker buoys indicating the location of the submerged hydraulic dredge discharge pipe. The dredge crew will monitor VHF channels 15 and 69 throughout active dredging operations. For more information, contact Duwamish Services, Tyler Southworth, at (509) 856-7700 or Tylers@duwamishservices.com.	Lat: 48° 00' 07" Lon: -122° 13' 30"

General/Bridges/Removal	Bridges	On 22 Dec, Razz Construction, Inc. will begin mobilizing construction equipment and resources adjacent to the Springston Bridge in preparation for the removal of the structure. The Springston Bridge is located approximately 3 miles upstream of Harrison, Idaho on the Coeur d'Alene River, in approximate position 47-28-43.7 N, 116-43-59.8 W. A minimum 50' wide river access for commercial and recreational vessels will be provided through the construction zone throughout the duration of construction activities. Once construction equipment and resources have been mobilized, construction crews will work on removing the existing wooden portions of the bridge, then the steel middle section of the bridge, and finally the wood/concrete piers. During each of these phases, boat traffic will be directed through areas not under construction. All in-water work for the removal of the Springston Bridge is to be completed by 28 Feb 2026. For additional information, contact Don Rasmussen, (360) 752-0011, donr@razzconstruction.com.	Lat: 47° 28' 44" Lon: -116° 43' 60"

Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Miscellaneous	Miscellaneous	NOAA Fisheries has deployed a subsurface mooring with passive acoustic recorders to monitor marine mammal presence in approximate location: 48-29-30N, 124-47-00W, in 285 m of water. Vessels conducting in-water work are requested to avoid this location by at least 1000 yards to avoid entanglement of gear. For more information, contact Brad Hanson at 206-300-0282.	Lat: 48° 29' 30" Lon: -124° 46' 60"
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/Miscellaneous	Miscellaneous	NOAA Fisheries has deployed a subsurface mooring with passive acoustic recorders to monitor marine mammal presence in approximate location: 48-29-30 N, 124-53-58 W, in 97 m of water. Vessels conducting in-water work are requested to avoid this location by at least 1000 yards to avoid entanglement of gear. For more information, contact Brad Hanson at 206-300-0282.	Lat: 48° 29' 30" Lon: -124° 53' 58"
General/Miscellaneous	Miscellaneous	Olympic Coast National Marine Sanctuary has deployed one sub-surface mooring, titled OC-02, in position 48-29-04.0N, 125-00-00.0W. OC-02 is an acoustic mooring deployed at a depth of 94 meters. The sub-surface gear consists of four scientific instruments connected with a combination of chain and Amsteel line. There is no surface gear on this mooring and the top of the float measures 6.2 meters above the sea floor. This gear supports an effort to achieve continuous acoustic monitoring of the underwater environment at this site over a five-year period. For additional information, please contact the Vessel Operations Coordinator, LTJG Jack Gerrior, at (781) 217-1696.	Lat: 48° 29' 04" Lon: -125° 00' 00"
Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/MSIB	MSIB	MSI Bulletin 005-25: Advisory For Actions During Heavy Weather in the Puget Sound Captain of the Port Zone. Unexpected heavy weather or rapid changes in weather can significantly increase the likelihood of marine casualties. During times of severe weather, the Coast Guard reminds all maritime stakeholders to exercise increased vigilance and implement appropriate measures to ensure the safety of vessels and protect the environment. 1. Prepare for heavy weather events ahead of time. Ensure crewmembers are designated to check and report weather updates prior to getting underway. Organize training with crew and passengers, conduct heavy weather drills, and review response and potential storm evasion options. 2. Understand your vessel's operating limitations and key factors with respect to weather conditions. 3. All vessel owners and operators are highly encouraged to familiarize themselves with the Heavy Weather Standards of Care from Puget Sound Harbor Safety Committee's Safety Plan, which can be found at <a href="https://marexps.com/membership/puget-sound-harbor-safety-committee/#documents">https://marexps.com/membership/puget-sound-harbor-safety-committee/#documents</a> . 4. If weather conditions deteriorate, it is imperative that vessels coordinate with the Cooperative Vessel Traffic Service (CVTS) regarding recommendations for harbors of safe refuge, anchorage, or other arrangements as per the specific standards of care. To coordinate efforts, contact the CVTS via channel 5A or 14 depending on vessel location or the watch supervisor at (206) 217-6152.	Lat: 48° 13' 34" Lon: -122° 54' 03"

Sector Puget Sound, Submerged Land Act (SLA) - Strait of Juan De Fuca/General/MSIB	MSIB	MSI Bulletin 006-25: Advisory on Anchoring Standards of Care in the Puget Sound Captain of the Port Zone. This bulletin highlights Vessel Anchoring Standards of Care that identify best practices to mitigate potential hazards and/or risks posed to commercial vessels anchoring in the region. Maritime stakeholders are reminded to exercise increased vigilance and to implement appropriate measures to ensure the safety of vessels while anchored or conducting anchoring operations. The following are actions recommended in varying conditions as excerpted from the Anchoring Standards of Care from Puget Sound Harbor Safety Committee's Safety Plan, which can be found at <a href="https://marexps.com/membership/puget-sound-harbor-safety-committee/#documents">https://marexps.com/membership/puget-sound-harbor-safety-committee/#documents</a> . 1. All Weather/Visibility Measures • Maintain a 24-hour bridge watch by an English-speaking individual. • Confirm vessel position and under keel clearance at a minimum of once per hour. • Provide VTS notifications as required by the VTS User Manual. • Ensure a second anchor is made ready for letting go. • During the months of October through March, a VHF-FM radio weather channel shall be monitored. 2. Restricted Visibility Measures • The bridge watch must be maintained by a licensed deck officer. • Increased assessment of radar contacts. 3. Gale Warnings Measures • Maintain a listening watch on the VTS working frequency. • Put the propulsion plant on standby and be ready to provide immediate propulsion and maneuvering. 4. Storm Warnings Measures • Consider increasing scope of anchor chain as appropriate. • Determine the availability and location of potential standby tugs to assist the vessel in holding position. • Assess the need for a pilot and get one onboard if necessary. For more information, please contact Coast Guard Waterways Management at SectorPugetSoundWWM@uscg.mil.	Lat: 48° 12' 35" Lon: -122° 53' 29"

TITLE	SUBCATEGORY	DESCRIPTION	LOCATION
Columbia River - Willamette River/General/Bridges/Temp Deviation	Bridges	The Coast Guard has approved a temporary deviation to the operating schedule that governs the Broadway Bridge (LLNR 14955.2), river mile 11.7 across the Willamette River at Portland, OR. This deviation accommodates repairs and scheduled maintenance. This deviation authorizes the subject bridge to operate in single leaf mode from 0001 on 13 Oct 2025 until 1800 on 11 Apr 2026. During single leaf mode (one half opening), tug assists will be available to river users upon a four-hour advanced request, via the Hawthorne Bridge, to help them pass through the draw. The Broadway Bridge provides 69 feet of vertical clearance; however, seven feet of containment will be installed below the draw and the vertical clearance will be reduced to 62 feet in the closed-to-navigation position. The horizontal clearance of the Broadway Bridge is 250 feet; when in single leaf, the horizontal clearance will be 110 feet. The vertical clearance is referenced above Columbia River Datum 0.0. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure time. The bridge will not be able to open for emergencies, and there is no immediate alternate route for vessels to pass. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. For more information contact Mark Kniemiem at (971) 269-7997 or Mark@ott-sakai.com.	Lat: 45° 31' 55" Lon: -122° 40' 27"
General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	J.E. McAmis will conduct dredging operations alongside the JR Simplot dock on the Willamette River at River Mile 2.5 on 08 - 31 Jan 2026. The Derrick Barge 1250 will be on scene assisted by the Tug Lowren M, and will use working channel 72 and monitoring channel 13. VHF 13.. Operations will be conducted 24 hours a day until project completion. Mariners are requested to use extreme caution in work areas and are urged to transit at their slowest safe speed to minimize wake and proceed with caution after passing arrangements have been made. For additional information please call or email Darrell Jamieson at (360) 984-9178 or email djamieson@jemcamis.com.	Lat: 45° 37' 32" Lon: -122° 47' 18"
