UNITED STATES COAST GUARD NAVIGATION INFORMATION SERVICE (NIS)
The United States Coast Guard Navigation Information Service (NIS), operated by the USCG Navigation Center, is staffed 24 hours a day, 7 days a week. The NIS provides information on the current operational status, effective policies, and general information for GPS and DGPS. The NIS also disseminates Safety Broadcasts / Broadcast Notice to Mariners (BNM), Local Notice to Mariners (LNM), and the latest Notice Advisory to Navstar Users (NANU). LNMs and other navigation notices can be obtained via e-mail subscription through the USCG Navigation Center website: https://www.navcen.uscg.gov/?pageName=feeds

In addition, the NIS investigates all reports of degradation or loss of GPS service. Mariners are encouraged to report all degradation of radio navigation services to the NIS via any of the following: Phone: (703) 313-5900 or Email: webmaster@navcen.uscg.mil, or on the World Wide Web: https://www.navcen.uscg.gov/?pageName=gpsUserInput

BROADCAST NOTICE TO MARINERS
Urgent marine navigational and weather information is broadcast over VHF channel 22A (157.1 MHZ). Broadcasts are first announced over the distress, safety and calling channel 16 before they are made. All ships in U.S. waters over 20 meters in length are required to monitor VHF channel 16, and must have radios capable of tuning to the VHF simplex channel 22A. Additionally, District 13 BNM are now available online on a test basis. To view or download District 13 BNM visit https://www.navcen.uscg.gov/bnmmessages/DistrictSearchV1.php?d=13&i=3

This section contains a range of all the significant Broadcast Notice to Mariners (BNM's) on the date of this edition.

SIG - Signal
SND - Sound
SPM - Single Point Mooring Buoy
COLUMBIA RIVER – PACIFIC OCEAN TO HARRINGTON POINT – Anchor recovery operations
Advanced American Construction will be conducting an anchor recovery operation in the Columbia River on Harrington Point Range, from 15 – 19 Feb 2022. Mariners are advised that this operation is within the federal navigation channel, encompassing the in-bound lane (southern portion) of the channel in the vicinity of Harrington Point Light S2 (LLNR 10185) between Columbia RM 20.5 to 20.7.
The recovery operation is bounded by approximate positions:
Northwest corner 46-14-05 N, 123-43-08 W;
Northeast corner 46-14-10 N, 123-42-58 W;
Southwest corner 46-14-07 N, 123-43-05 W.
Operations will consist of a use of a clam shell dredge deployed from a derrick barge and surveying and diving operations. Vessels will include a tug and derrick barge, dive boat with Alpha flag displayed when divers are in the water, and the David Evans and Associates survey vessel Broughton. The Broughton is a 24-foot blue aluminum mono-hull vessel with “SURVEY” on the port and starboard side and has a Class B AIS. Survey operations will be conducted during daylight hours from approximately 0800 to 1900 and are expected to continue until February 19th, 2022, with a primary focus during the slack and flood tidal conditions. The derrick barge will spud down in the channel when required. The dive boat and survey vessel Broughton will be operating in the immediate area. The tug and survey vessel Broughton may be reached via VHF-FM channels 13 and 16. Mariners are requested to use caution and reduce wake when transiting the area. For more information, contact Kyle Izatt, Advanced American Construction, at (503) 445-9000 or (503) 849-3336 and Jon Dasler, David Evans and Associates, at (360) 314-3202 or (503) 799-0268.
Chart 18521 LNM: 06/22

COLUMBIA RIVER – CRIMS ISLAND TO ST. HELENS – Lewis and Clark Highway Bridge inspection
WSDOT will be inspecting the Lewis and Clark Highway Bridge (LLNR 10812.5) at Columbia River mile 66.0 between Rainier, OR, to Longview, WA. The inspection will take place between 0800 and 1600 daily from 28 Feb to 04 Mar 2022. The bridge will be inspected using three under bridge inspection trucks (UBITs) that occupy a portion of the roadway and extend booms under the bridge. Marine traffic will not be impacted, however, the vertical clearance will be reduced up to 10 feet. Mariners are advised to use caution while transiting the area, and be aware of fall hazards. UBIT buckets will have flashing amber lights. UBIT operators will watch for and give way to tall marine vessels. For more information on the bridge inspections, contact Jim Patton at (360) 628-4439 or pattonj@wsdot.wa.gov.
Chart 18524 LNM: 06/22

SNAKE RIVER – LAKE SACAJAWEA – Bridge notice
The Coast Guard has approved a request for a temporary deviation from the operating schedule that governs the East Pasco Railroad Bridge 3.08 (LLNR 13112) across the Snake River at mile 1.5, in Burbank, WA. The subject bridge provides 14 feet of vertical clearance above ordinary high water in the closed-to-navigation position. The deviation is necessary to accommodate electrical and mechanical upgrades. Bridge 3.08 is normally maintained in the open-to-navigation position. The requested closure is scheduled to align with the Columbia River and Snake River 2022 USACE navigation lock closure. The draw closure will be from 0800 on 21 Feb 2022 to 1800 on 07 Mar 2022. During this closure period, the draw will not be able to open to marine vessels and vessels engaged in emergency operations. Vessels able to pass through the bridge in the closed-to-navigation position may do so at any time. For more information contact Jeff Swanson at Jeff.Swanson@BNSF.com.
Chart 18545 LNM: 06/22

SNAKE RIVER – LOWER GRANITE LAKE – Lower Granite Navigation lock delays
Divers will perform work in the vicinity of the Lower Granite navigation lock upstream floating guide wall between the hours of 0700-1700, 22 – 28 Feb 2022. Work will include a hand-over-hand inspection of the guide wall cables, and replacement of the keyway bolts that attach the guide wall to the dam. During this timeframe vessels may experience up to a two-hour delay to their lockage.
Chart 18548 LNM: 06/22
OREGON – SNAKE RIVER – Bridge notice
ODOT will be repairing the bridge that spans the Snake River in Ontario OR at river mile 372. The operations will occur seven days a week, daylight hours only, from 01 Apr to 31 Oct 2022. The bridge will be repaired using an under-bridge inspection truck (UBIT) or snooper crane that occupies approximately 10 feet of the vertical span of the bridge, work containment platforms that occupies approximately 6 feet of vertical span of the bridges, and a barge that will occupy one of the nine existing bridge spans. Mariners are advised to use caution while transiting the area. For additional information contact ODOT District 14 Project Manager, Petr Lovasik at (541) 823-4021 or (541) 709-6889 (cellular) or Petr.Lovasik@odot.state.or.us.

WASHINGTON – HOOD CANAL – DABOB BAY – Submersible Vehicle testing
The US Navy will be conducting submersible vehicle testing in the Dabob Bay military operating area and in the waters of Hood Canal south to Triton Head from 23 Feb to 11 Mar 2022. Operations will be conducted 24 hours a day, 7 days a week. Operations will involve semisubmersible and submersibles vehicles possibly escorted by M/V Jack Robertson and small naval craft with a flashing red light. The small craft and Jack Robertson will monitor VHF-FM channels 12 and 16. The call sign for the small craft will be “Range security craft”. A small, lighted surface buoy will be left in place during the operations at position 47°38′20.24″N / 122°54′59.21″W. The buoy will have a white flashing light. All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles. Questions should be directed to the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.

OREGON - WASHINGTON – IDAHO – 2022 Light List now available
The 2022 edition of the Light List is now available on the USCG Navigation Center’s website at: http://www.navcen.uscg.gov/?pageName=lightLists. Coast Guard Light Lists are a means for communicating aids to navigation information to the maritime public. Local Notice to Mariners will continue to advise Light List corrections and NAVCEN will continue to publish a compilation of corrections. Complete versions of the 2022 Light Lists are updated weekly on the NAVCEN website and mariners should download applicable copies and updates as needed at: http://www.navcen.uscg.gov/?pageName=lightListWeeklyUpdates. A summary of weekly 2022 Light List corrections are available at: https://www.navcen.uscg.gov/?pageName=lightListCorrections.

WASHINGTON – PUGET SOUND – APPLE COVE TO POINT KEYPORT – Autonomous underwater research
NOAA’s Pacific Marine Environmental Laboratory deployed an autonomous underwater research glider in the waters approximately 1.5 nm north of Meadow Point near Golden Gardens. The glider will operate within one mile of 47°42′12″N, 122°24′36″W, and conduct dives down to 150 meters and surface every 45 minutes to transmit data. Operations are expected to run until 15 Mar 2022. Mariners are requested to not disturb or touch the glider during these operations. For more information, contact Nick Delich, PMEL, at (206) 552-6065 or call the number listed on the glider.

WASHINGTON – PUGET SOUND – SEATTLE TO BREMERTON – EAGLE HARBOR – Dive operations
The US Environmental Protection Agency (EPA) will conduct diving operations in Eagle Harbor on Wednesday, 02 Mar 2022. Divers will inspect the sediment containment cap near the four anchor buoys in locations:
Buoy 1: 47°37′24.999″N, 122°30′15.998″W
Buoy 2: 47°37′23.998″N, 122°30′01.998″W
Buoy 3: 47°37′02.999″N, 122°30′15.000″W
Buoy 4: 47°37′02.999″N, 122°30′25.998″W
Operations will occur from 0900 to 1600 on 02 Mar 22. The EPA R/V Monitor will be onscene and monitoring VHF-FM channels 13, 16 and 22A. Additionally, the vessel may be reached via cellular phone at (206) 947-8638. Monitor will display Alpha and Diver down flags when any diving is in progress. Mariners are requested to minimize wake and stand off at least 200 yards from diving operations. For additional information, contact Brent Richmond at Richmond.brent@epa.gov or 360-871-8711.

WASHINGTON – HOOD CANAL – DABOB BAY – Submersible Vehicle testing
The US Navy will be conducting submersible vehicle testing in the Dabob Bay military operating area and in the waters of Hood Canal south to Triton Head from 23 Feb to 11 Mar 2022. Operations will be conducted 24 hours a day, 7 days a week. Operations will involve semisubmersible and submersibles vehicles possibly escorted by M/V Jack Robertson and small naval craft with a flashing red light. The small craft and Jack Robertson will monitor VHF-FM channels 12 and 16. The call sign for the small craft will be “Range security craft”. A small, lighted surface buoy will be left in place during the operations at position 47°38′20.24″N / 122°54′59.21″W. The buoy will have a white flashing light. All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles. Questions should be directed to the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.

All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles. Questions should be directed to the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.
COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Bridge demolition activities
Advanced American Construction (AAC) will be conducting bridge pier demolition in the Columbia River at the mouth of Little White Salmon River / Drano Lake, at Columbia River mile 162, at the BNSF Little White Salmon River Railroad Bridge. Onsite work is expected to occur from 31 Jan – 15 Apr 2022. AAC’s Derrick Barge AAC Millennium and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 through 1700, Monday through Saturday. The floating equipment will remain on-station during non-working hours and will be illuminated at night by fixed white lights on all corners. A navigation channel will be maintained at all times, but mariners are asked to transit the area with caution and minimize wake. Please contact Scott Miller at (503) 568-4313 or ScottM@CallAAC.com with questions.

WASHINGTON – LAKE WASHINGTON SHIP CANAL – SHILSHOLE BAY – Salmon Bay Railroad Bridge notice
The Coast Guard has approved a temporary deviation from the operating schedule of the BNSF Salmon Bay Railroad Bridge (Bridge 6.3) (LLNR 18169), mile 0.1, across the Lake Washington Ship Canal in Seattle, Washington. This deviation authorizes the subject bridge to remain in the closed-to-navigation position to allow safe rail maintenance from 0900 to 1600 on 7 – 10 Feb 22. Bridge 6.3 will be open to traffic with a 30 minute notice by contacting the bridge at (206) 784-2976 or VHF Ch. 13, and there is no immediate alternate route for vessels to pass. Bridge 6.3 provides 43 feet above mean high water of vertical clearance in the closed-to-navigation position. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. For more information contact Jeff Swanson at (425) 304-6663.

WASHINGTON – GRAYS HARBOR – ABERDEEN – Bridge Notice
WSDOT will be inspecting the Chehalis River Bridge (US-101) (LLNR 15897) at Chehalis River mile 0.1, across the Lake Washington Ship Canal in Seattle, Washington. This deviation authorizes the subject bridge to remain in the closed-to-navigation position to allow safe rail maintenance from 0900 to 1600 on 7 – 10 Feb 22. Bridge 6.3 will be open to traffic with a 30 minute notice by contacting the bridge at (206) 784-2976 or VHF Ch. 13, and there is no immediate alternate route for vessels to pass. Bridge 6.3 provides 43 feet above mean high water of vertical clearance in the closed-to-navigation position. Vessels which do not require a bridge opening may continue to transit beneath the bridge during this closure period. In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. For more information contact Jeff Swanson at (425) 304-6663.

COLUMBIA RIVER – BLALOCK ISLAND TO MCNARY DAM – Scheduled lock closure at McNary Lock and Dam
The navigation lock at McNary Lock and Dam, located at Columbia River Mile 292, will be out of service from 0900 – 1630 on 10 Feb 2022. During this time, divers will clear debris and sediment from the downstream sill to facilitate placement of stop logs in preparation for the upcoming annual maintenance closure. For additional information contact the McNary Chief Operator at 541-922-2231, Call Sign: WUJ41 or NWW Operations Division at (509) 527-7364.

WASHINGTON – YAQUINA HEAD TO COLUMBIA RIVER – Undersea cable maintenance (Revised from LNM 02/22)
The vessel Tuna Time II, will be providing surface support for divers conducting undersea telecommunications cable work in approximate position 45-15-01 N, 123-58-39.2 W, approximately 1100 yards off the shore near Pacific City, Oregon. Operations were previously scheduled for the first week in November, but will be completed as soon as favorable weather conditions allow. The operation will take 2-3 days with dive operations running from 0700 – 1800 daily. Tuna Time II will have limited maneuverability (being anchored) while conducting operations. All vessels in the area are requested to maintain a minimum 1 NM CPA to ensure safety of divers and navigation. Tuna Time II will monitor VHF-FM channels 16 and 13. For more information, contact (904) 397-8996 or email operations@gaeaquatic.com

WASHINGTON – BONNEVILLE TO THE DALLES – Undersea cable maintenance (Revised from LNM 02/22)
The vessel Tuna Time II, will be providing surface support for divers conducting undersea telecommunications cable work in approximate position 43/21, 08/20, 47/20, 09 February 2022. Tuna Time II will monitor VHF-FM channel 16 during the working hours of 0700 – 1800 daily. Tuna Time II will have limited maneuverability (being anchored) while conducting operations. All vessels in the area are requested to maintain a minimum 1 NM CPA to ensure safety of divers and navigation. Tuna Time II will monitor VHF-FM channels 16 and 13. For more information, contact (904) 397-8996 or email operations@gaeaquatic.com

Washington – Grays Harbor – Aberdeen – Bridge Notice
WSDOT will be inspecting the Chehalis River Bridge (US-101) (LLNR 15897) at Chehalis River mile 0.1, at Aberdeen, WA. The inspection will take place between 0800 and 1500 on 07 – 10 Mar 2022. The bridge will be inspected using an under-bridge inspection truck (UBIT) that occupies a portion of the roadway and extends a boom under the bridge. No impact to the navigational clearance will occur. The vertical clearance will temporarily be reduced with the UBIT bucket, but the UBIT will give way to tall marine vessels. Mariners are advised to use caution while transiting the area. UBIT bucket will display a flashing amber light on the bottom and a safety lookout will be on the bridge. Bridge openings will occur as usual. For additional information contact Ryan Collins, P.E. at (564) 200-2085 or collinsr@wsdot.wa.gov

SECTION IV - CHART CORRECTIONS

This section contains corrections to federally and privately maintained Aids to Navigation, as well as NOS corrections. This section contains corrective actions affecting chart(s). Corrections appear numerically by chart number, and pertain to that chart only. It is up to the mariner to decide which chart(s) are to be corrected. The following example explains individual elements of a typical chart correction.

<table>
<thead>

Advance Notice(s)

OREGON – YAQUINA BAY AND ENTRANCE – Change to the characteristic of Yaquina Bay Entrance Range Front and Rear Lights and Yaquina Bay Channel Light 8

The U.S. Coast Guard will be changing the characteristic of Yaquina Bay Entrance Range Front and Rear Lights (LLNRs 9580 and 9585) from a night time only light to a 24 hours a day light. The flash characteristics and night time intensity will remain the same. Yaquina Bay Channel Light 8 (LLNR 9615) will change in characteristic from a red light flashing every 4 seconds to a quick flashing red light.

Mariners are encouraged to share comments on the performance and operation of these aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector North Bend.

Charts: 18561 18580 18581

LNM: 36/21

OREGON – YAQUINA BAY – Construction of fixed Aids to Navigation

The U.S. Coast Guard is rebuilding wooden and damaged aids to navigation in Yaquina Bay during the winter of 2021. The following aids to navigation are being rebuilt:

Yaquina Inner Range Front Light (LLNR 9620), being rebuilt at 44-37-44.145N 124-02-49.311W (WGS84)
Yaquina Inner Range Rear Light (LLNR 9625), being rebuilt at 44-37-47.998N 124-02-54.661W (WGS84)

A Broadcast Notice to Mariners will be issued for each structure upon rebuilding. Mariners are encouraged to share comments on this change and the performance and operation of these aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector North Bend.

Chart 18581

LNM: 48/21

OREGON – TILLAMOOK BAY – Testing of a self-contained LED lantern on Tillamook Bay Entrance Lighted Bell Buoy 2

Due to frequent failures of the current LED lantern on Tillamook Bay Entrance Lighted Bell Buoy 2 (LLNR 9817), the U.S. Coast Guard will be testing a different model lantern on the buoy to determine if improvements in performance and reliability may be obtained. This lantern will have the same characteristic as the previous one (Quick Flashing Red) but the intensity will be lowered from 4 NM to 3 NM during the evaluation period.

A Broadcast Notice to Mariners was issued to announce the change. Mariners are encouraged to share comments on this change and the performance and operation of this aid to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

Charts: 18520 18558

LNM: 42/21

WASHINGTON – WILLAPA BAY – Construction of fixed Aids to Navigation

The U.S. Coast Guard is rebuilding the wooden and damaged aids to navigation in Willapa Bay during the winter of 2021. The following aids to navigation are being rebuilt:

Willapa Bay Entrance Light 11 (LLNR 15205), being rebuilt at 46-43-07.216N 124-02-25.872W (WGS84)
South Willapa Bay Light 3 (LLNR 15400), being rebuilt at 46-41-21.901N 124-00-58.860W (WGS84) and changing to Willapa River Junction Light (LLNR 15210), showing a Red Light flashing twice then once every 6 seconds (Fl R (2+1) 6s) with a range of 4 NM and displaying red and green triangular dayboards.
Stanley Point Junction Daybeacon (LLNR 15485), rebuilt at 46-27-40.341N 123-56-14.743W (WGS84) will change to Stanley Point Junction Light (LLNR 15485) showing a Red Light flashing twice then once every 6 seconds (Fl R (2+1) 6s) with a range of 4 NM and displaying red and green triangular dayboards.

The following aids to navigation have been rebuilt:
WASHINGTON – STRAIT OF JUAN DE FUCA TO STRAIT OF GEORGIA AND PUGET SOUND – Removal of RACONs on aids to navigation

Willapa River Channel Light 59 (LLNR 15385) rebuilt at 46-40-45.530N 123-45-57.681W (WGS84)
South Willapa Bay Daybeacon 8 (LLNR 15415), rebuilt at 46-35-42.431N 123-58-53.484W (WGS84)
Nahcotta Channel Daybeacon 11 (LLNR 15425), rebuilt at 46-33-44.918N 123-57-39.321W (WGS84)
Nahcotta Channel Daybeacon 12 (LLNR 15430), rebuilt at 46-32-45.638N 123-59-09.751W (WGS84)
Long Island Junction Light (LLNR 15435), rebuilt at 46-32-09.564N 123-58-35.489W (WGS84)
Nahcotta Channel Daybeacon 13 (LLNR 15440), rebuilt at 46-30-39.899N 124-00-20.082W (WGS84)
Nahcotta Mooring Basin Light 2 (LLNR 15445), being rebuilt at 46-30-05.844N 124-01-25.796W (WGS84)
Stanley Channel Daybeacon 2 (LLNR 15475), rebuilt at 46-31-11.371N 123-58-34.646W (WGS84)
Stanley Channel Light 4 (LLNR 15480), rebuilt at 46-29-01.814N 123-57-55.284W (WGS84)
Stanley Point Junction Daybeacon (LLNR 15490), rebuilt at 46-34-44.738N 123-57-06.465W (WGS84)
Bay Center Channel Light 11 (LLNR 15515), rebuilt at 46-38-53.664N 123-57-05.526W (WGS84)
Palix River Channel Light 15 (LLNR 15525) rebuilt at 46-37-53.926N 123-56-36.602W (WGS84)

Mariners are encouraged to share comments on the performance and operation of these aids to navigation. All comments should be sent to the email address D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River.

The U.S. Coast Guard will be removing the RACONs from selected aids to navigation in the Strait of Juan de Fuca, Rosario Strait and Puget Sound due to the consistent failure of the signals and that they are no longer considered necessary for safe navigation of the waterways. While there is no specific timeline for the removal of this equipment, it will be coordinated with servicing and discrepancy responses. The removal of the RACONs will be announced by Broadcast Notice to Mariners and published in the Local Notice to Mariners as Chart and Light List corrections. These aids to navigation are:

- Hein Bank Lighted Buoy 1 (LLNR 16362)
- Rosario Strait Traffic Separation Lane Lighted Buoy "RA" (LLNR 16370)
- Puget Sound Traffic Separation Lane Lighted Buoy "SA" (LLNR 16405)
- Puget Sound Traffic Separation Lane Lighted Buoy "SG" (LLNR 16815)
- Rosario Strait Traffic Separation Lane Lighted Buoy "C" (LLNR 19520)
- Rosario Strait Traffic Separation Lane Lighted Buoy "CA" (LLNR 19535)

Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Puget Sound.

Charts: 18400 18421 18441 18465

SECTION VI - PROPOSED CHANGES

Periodically, the Coast Guard evaluates its system of aids to navigation to determine whether the conditions for which the aids to navigation were established have changed. When changes occur, the feasibility of improving, relocating, replacing, or discontinuing aids are considered. This section contains notice(s) of non-approved, proposed projects open for comment. SPECIAL NOTE: Mariners are requested to respond in writing to the District office unless otherwise noted (see banner page for address).

**COLUMBIA RIVER - WILLAPA BAY - GRAYS HARBOR – PUGET SOUND – Replacement of incandescent Lights with LED lanterns**

The U.S. Coast Guard is proposing to replace the following incandescent lantern with LED lanterns at sites on the Columbia River, Willapa Bay, Grays Harbor, Bellingham Channel and Eagle Harbor. These current incandescent lanterns have a single or dual beam of high intensity, with an all-around light of reduced intensity. The change to a LED lantern will remove the high intensity beams, but significantly increase the intensity of the all-around light. The proposed sites are:

Svensen Island Light 12 (LLNR 14775) the high intensity beam will be removed and the intensity of the light will be increased.
Willapa River Light 39 (LLNR 15340) the high intensity beams will be removed and the intensity of the light will be increased.
South Willapa Bay Light 7 (LLNR 15410) the high intensity beam will be removed and the intensity of the light will be increased.
Long Island Junction Light (LLNR 15435) the high intensity beam will be removed and the intensity of the light will be increased.
Aberdeen Harbor Light 3 (LLNR 15900) the high intensity beam will be removed and the intensity of the light will be increased.
Johns River Entrance Light 8 (LLNR 15955) the high intensity beams will be removed and the intensity of the light will be increased.
Eagle Harbor Light 4 (LLNR 18010) the high intensity beam will be removed and the intensity of the light will be increased.
Bellingham Channel Light 5 (LLNR 19175) the high intensity beams will be removed and the intensity of the light will be increased.
Mariners are encouraged to share comments on the performance and operation of these lights as aids to navigation. All comments should be sent to the email address D13-PF-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River and US Coast Guard Sector Puget Sound.

LNM: 06/22

SUMMARY OF DREDGING OPERATIONS
The summary of Dredging Operations is listed as Enclosure (2) of this Local Notice to Mariners.

LNM: 06/22

SUMMARY OF MARINE EVENTS
The summary of Marine Events is listed as Enclosure (3) of this Local Notice to Mariners.

LNM: 06/22

OREGON – CAPE BLANCO TO YAQUINA HEAD – Scientific equipment installation
Oregon State University (OSU) has installed four, 1-mile long, 10-inch diameter, steel conduits under the seafloor running out from Driftwood Beach State Recreation Site near Seal Rock, Oregon, as part of the construction of the PacWave South Wave Energy Test Site. In mid-2023, subsea cables will be installed in the conduits to carry power and data from the test site to shore. Until the cables are installed, the seaward end of the conduits may protrude up to 3 feet vertically and 10 feet horizontally from the seafloor depending on sand movement. Once the cables are installed, the final placement of the conduits will be below the seafloor. The conduit punch outs are located approximately 1500 yards offshore from Driftwood Beach, which is between Seal Rocks and Waldport.

Until the subsea cables are installed, mariners are requested to avoid anchoring or setting fishing gear in a 1,000 x 1,500-foot Conduit Punch Out Area around the conduit exit locations due to risk of snagging on any exposed conduit. The location of the Conduit Punch Out Area was shown in the graphic attached as Enclosure (4) to LNM 52/21. If crab pots, or other equipment, becomes snagged in this area, mariners are asked to contact OSU prior to attempting to recover the snagged items. For more information contact Brett Hembrough at (541) 737-9023 and brett.hembrough@oregonstate.edu, or Dan Hellin at (541) 745-8337 and dan.hellin@oregonstate.edu.

Chart 18580

LNM: 06/22

OREGON – APPROACHES TO YAQUINA AND DEPOE BAY – Bridge construction notice (Revised from LNM 04/21)
ODOT is conducting bridge concrete repairs to the Yaquina Bay Highway 101 Bridge (LLNR 9627) in Newport, OR, at Yaquina Bay mile 0.7. A low level access walkway system will be constructed across the 4 concrete arch spans from the south bank heading north. While erected, the vertical navigation clearance will be reduced to a minimum of 16 feet at MHHW. The low level walkway system will span from the south bank to the North approx. 880 feet. This system will be built in April 2021 and will be functional until approximately the summer of 2024. The main navigational channel will not be impeded by the project as that section is made of steel. Mariners are requested not to loiter under the construction area due to fall hazards. For more information, contact Dan Latze, the project superintendent, at (503) 519-5408.

Chart 18561

LNM: 06/22

COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Marine construction/demolition at Drano Lake
Advanced American Construction (AAC) will be conducting existing pier removal in the Columbia River at the mouth of Little White Salmon River / Drano Lake near RM 116. Operations include wire saw, concrete demolition and pile removal. Onsite work is expected to occur from 06 Jul 2021 to 28 Feb 2022. AAC’s Derrick Barge DB 4100 and tug Lindy Marie, and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 exit locations due to risk of snagging on any exposed conduit. The location of the Conduit Punch Out Area was shown in the graphic attached as Enclosure (4) to LNM 52/21. If crab pots, or other equipment, becomes snagged in this area, mariners are asked to contact OSU prior to attempting to recover the snagged items. For more information contact Brett Hembrough at (541) 737-9023 and brett.hembrough@oregonstate.edu, or Dan Hellin at (541) 745-8337 and dan.hellin@oregonstate.edu.

Chart 18532

LNM: 20/21

COLUMBIA RIVER – BONNEVILLE TO THE DALLES – Bridge notice
ODOT is conducting a bridge deck replacement project on the SR 197 Highway Bridge (LLNR 12133) at Columbia RM 191.6 near The Dalles, OR and Dallesport WA. A work access and containment platform will be suspended beneath the bridge starting in mid-August and will be in place continuously until 27 May 2022. While in place, the vertical navigation clearance will be reduced by approximately 3 feet to a minimum clearance of 97 feet Columbia River datum OHW. If a vessel needs the full 100 feet of vertical clearance for passage through the subject bridge, contact the ODOT Resident Engineer with no less than 12 hours of notice. For more information, or to make a request, contact ODOT Resident Engineer Brad DeHart at (541) 296-2800 or bradley.k.dehart@odot.state.or.us.

Chart 18532

LNM: 31/21

WASHINGTON – LAKE WASHINGTON – SAMMAMISH RIVER – West Sammamish River Bridge Notice (Revised from LNM 13/20)
Construction on the West Sammamish River Bridge at Sammamish River mile 0.5 near Kenmore, Washington is ongoing and will continue through October 2023. The western bridge will be removed and a new bridge constructed. Mariners may transit through the construction zone, but are advised that temporary work piers will be constructed on the west side of the bridge, and will reduce the horizontal span to 40 feet of clearance. Containment will be installed under the bridge reducing the vertical clearance from 11.5 feet to 10.5 feet measured at OHW. Working hours will normally be from 0600 to 1800 six days per week, however, during the in water work window of 01 Jul to 31 Aug, operations will be 24 hours per day. If construction falls behind schedule, the work hours may shift to 24 hours/seven days per week. For more information regarding construction,
COLUMBIA AND SNAKE RIVERS – Winter seasonal recreational vessel lockage

The USACE Portland and Walla Walla Districts will implement the winter seasonal lockage schedule, beginning in September until 15 May 2022, for the passage of recreational craft through the Columbia and Snake River navigation locks. The Portland District will begin the winter lockage schedule on 30 Sep, while the Walla Walla District will commence the winter schedule on 18 Sep. Winter lockage will be made during daylight hours only, on request at each lock – vessels should contact the lock operator via VHF-FM channel 14 or telephone, and should make their request at least 30 minutes in advance.

Lock Name | Location | Phone Number | Radio Call Sign
--- | --- | --- | ---
Bonneville Lock | Columbia River Mile 145.5 | (541) 374-8323 | WUJ 33
The Dalles Lock | Columbia River Mile 191.5 | (541) 506-8211 | WUJ 34
John Day Lock | Columbia River Mile 215.6 | (541) 298-9712 | WUJ 35

Columbia River – Snake River – 2022 Annual Lock closures for maintenance

commercial vessels continue to have lockage precedence over recreational vessels. At the discretion of the lock operator, recreational vessels may be allowed to lock through with commercial vessels. The Portland District requests that recreational vessels contact the lock at least 30 minutes prior to arrival using VHF-FM channel 14 or via telephone. All vessel owner/operators lock through at their own risk. All persons in the vessel must be wearing a personal flotation device (PFD) during lockage. Follow the directions of the lock operator when using locks or operating in the vicinity of the locks. The lock operator has final authority on the suitability of a craft for lockage. Please refer to USACE Safe Lockage Policy for Recreational Craft on the Columbia and Snake Rivers, published separately, for safety requirements. For safety and additional information on Portland District navigation lock operations and schedules visit http://www.nwp.usace.army.mil/Missions/Navigation.aspx and for Walla Walla District lock operations visit http://www.nww.usace.army.mil/Missions/Navigation.aspx or call the USACE Walla Walla Operations Division at (509) 527-7112.

COLUMBIA RIVER – SNAKE RIVER – 2022 Annual Lock closures for maintenance

The USACE Portland and Walla Walla Districts have scheduled the annual navigation lock maintenance closure for February and March 2022. During this time, the Locks and Dams on the Columbia and Snake Rivers have scheduled inspections, maintenance, and repair work. Non-routine work includes gate cleaning, structural inspections, and equipment/machinery repair and replacement. All eight (8) of the navigation locks will close beginning in February in accordance with the following schedule:

- Columbia River navigation lock maintenance closures are:
  - Bonneville (RM 146.1) – 0600 on 13 Feb to 2359 on 12 Mar 2022
  - The Dalles (RM 191.5) – 0600 on 13 Feb to 2359 on 19 Mar 2022
  - John Day (RM 215.6) – 0600 on 13 Feb to 2359 on 05 Mar 2022
  - McNary (RM 292) – 0600 on 13 Feb to 2359 on 13 Mar 2022

- Snake River navigation lock maintenance closures are:
  - Ice Harbor (RM 9.7) – 0600 on 13 Feb to 2359 on 12 Mar 2022
  - Lower Monumental (RM 41.6) – 0600 on 19 Feb to 2359 on 19 Mar 2022
  - Little Goose (RM 70.3) – 0600 on 14 Feb to 2359 on 12 Mar 2022
  - Lower Granite (RM 107.5) – 0600 on 25 Feb to 2359 on 19 Mar 2022

For additional information regarding Bonneville, The Dalles and John Day lock maintenance closures, contact Portland District, Operations Division at (503) 808-5419. For additional information regarding McNary, Ice Harbor, Lower Monumental, Little Goose and Lower Granite lock maintenance closures, contact Walla Walla District, Operations Division at (509) 527-7364.

SNAKE RIVER – LAKE SACAJAWEA AND LAKE HERBERT G. WEST – Upstream floating guidewall restrictions (Revised from LNM 10/21)

Reparis at the Ice Harbor Lock and Dam and the Little Goose Lock and Dam upstream floating guide wall are now completed, so all restrictions regarding the use of the floating guide wall are now lifted. However, restrictions still apply at the following project:

- Lower Monumental Lock and Dam, Snake River Mile 41.6, vessels may not tie up to or rub against the floating guidewall when approaching or leaving the lock, nor should they use the guidewall as a pivot point for entering the lock. These restrictions will remain in place until more substantial repairs can be made to the locks' floating guidewall cables. For additional information on this work, contact the NWW Operations Division at (509) 527-7364.

Charts: 18545 18546

COLUMBIA RIVER SYSTEM AND WASHINGTON - Testing of prototype plastic buoys

The U.S. Coast Guard is testing various prototype plastic buoys to observe their station keeping ability and visual and radar detection capabilities. Buoys are being placed at the following locations for evaluation:

On the Columbia, Snake and Willamette Rivers:
- Columbia River Entrance Lighted Buoy 3 (LLNR 9911), set on 1/13/2022
- Desdemona Sands Lighted Buoy 22 (LLNR 9990), set on 1/13/2022
- Hood River Lighted Buoy 36 (LLNR 11932), set on 12/14/2021
- Bonneville Pool Lighted Buoy 69 (LLNR 12130)
- Lake Celilo Lighted Buoy 22 (LLNR 9990), set on 1/13/2022
- Columbia River Entrance Lighted Buoy 3 (LLNR 9911), set on 9/30/2021
- Snake River Buoy 18 (LLNR 13210)
COLUMBIA RIVER SYSTEM AND WASHINGTON - Testing of prototype plastic buoys
Elk Rock Buoy 10 (LLNR 15005), reset on 1/06/2022
Elk Rock Buoy 12 (LLNR 15010)

In Grays Harbor and Admiralty Inlet Washington:
Point Chehalis Lighted Buoy 4 (LLNR 15990)
Point Wilson Lighted Buoy 6 (LLNR 16470), set on 12/16/2021

While the buoys performance is being studied, the US Coast Guard is soliciting comments from the maritime community transiting this waterway. Mariners are requested to respond in writing to the Coast Guard District office with any comments on this change at D13-SMB-D13-LNM@uscg.mil. Any discrepancy for these or other Aids to Navigation should continue to be reported to US Coast Guard Sector Columbia River and US Coast Guard Sector Puget Sound.

Charts: 18502  18533  18545 LNM: 03/22

COLUMBIA RIVER – SAINT HELENS TO VANCOUVER – WILLOW – Marine outfall pipe construction
Advanced American Construction (AAC) will be conducting installation of a new 48 inch outfall pipe in the Columbia River near mile 96. The pipe will extend from the Washington riverbank out into the Columbia River approximately 700 feet. Operations include dredging, pipe installation, pile driving, diving and demolition of the existing submerged outfall pipe. Onsite work is expected to occur from 01 Oct 2021 to 28 Feb 2022. AAC’s Derrick Barge DB 4100 and tug Lindy Marie, and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 through 1800, Monday through Saturday. The floating equipment will remain on-station during non-working hours and will be illuminated at night by fixed white lights on all corners. Mariners are asked to transit the area with extreme caution and minimize wake. For additional information, contact Shad Huber (360) 953-4833 Shadh@callAAC.com.

Chart 18525 LNM: 36/21

COLUMBIA RIVER – ST. HELENS TO VANCOUVER – WILLOW – Safety Zone for the Columbia River Outfall Project
A safety zone will be in effect from 0001 on 01 Oct 2021 through 2359 on 15 Mar 2022 for a marine construction project, that includes dredging operations, on the Columbia River near RM 95.8 – 96.1, on the Washington side of the navigable channel. The safety zone would cover all navigable waters of the Columbia River, surface to bottom, encompassed by a line connecting the following points:
- beginning at the shoreline at 45-43-57.0 N, 122-45-21.0 W,
- then west to 45-43-58.0 N, 122-45-33.0 W,
- then south to 45-43-39.0 N, 122-45-35.0 W,
- then east to 45-43-39.0 N, 122-45-21.0 W, and along the shoreline back to the beginning point.

No vessel or person will be allowed to enter the safety zone without obtaining permission from the Captain of the Port Sector Columbia River, or a designated representative, via VHF-FM Channel 16, or by calling (503) 209-2468.

Chart 18525 LNM: 37/21

COLUMBIA RIVER – VANCOUVER TO BONNEVILLE – Shoaling protruding into Reed Island Reach
Due to shoaling extending south into the Reed Island Reach Channel south of Reed Island, the US Coast Guard has relocated Reed Island Reach Lighted Buoy 61 (LLNR 11580) to approximate position 45-32-46.318N 122-18-02.052W. This position is near the center of the channel. Vessels transiting Reed Island Reach Channel should navigate on the southern edge of the channel between longitudes 122-17-30.0W and 122-18-25.0W.

Charts: 18531 LNM: 30/21

OREGON – WILAMETTE RIVER – WALNUT EDDY TO NEWBERG – Marine construction exposed piles
Harbor Offshore, Inc. has completed the first phase of a construction project which included pile driving operations in the vicinity of the Raw Water Pump Station on the Willamette River near Wilsonville, OR. There are a total of six 14x89 H-Piles installed in an East-West Row that extend from the Washington riverbank out into the Columbia River approximately 700 feet. Operations include dredging, pile driving and demolition of the existing submerged outfall pipe. Onsite work is expected to occur from 01 Oct 2021 to 28 Feb 2022. AAC’s Derrick Barge DB 4100 and tug Lindy Marie, and work barges will be on station and monitoring VHF-FM channel 16 during the working hours of 0700 through 1800, Monday through Saturday. The floating equipment will remain on-station during non-working hours and will be illuminated at night by fixed white lights on all corners. Mariners are asked to transit the area with extreme caution and minimize wake. For additional information, contact Lauren Collins at (707) 389-0678 or lcollins@harboroffshoreinc.com.

Chart 18528 LNM: 49/21

IDAHO – LAKE COEUR D’ALENE – LAKE PEND OREILLE – BNSF Railroad Bridge construction update
BNSF Railway Company (BNSF) is continuing construction on the new BNSF Railroad Bridge 3.9 (LLNR 20087) located over Lake Pend Oreille (LPO) Mile 2.7, located approximately at 48-16-20 N, 116-32-39 W, in Sandpoint, ID from the start of LPO winter draw-down levels as of 01 Oct 2021 through the start of LPO summer fill-up beginning 01 May 2022. This notice reflects updates to the next project phase work activities required due to the seasonal fluctuation of LPO water levels. Work barges will be staged along the work corridor with support from upland staging areas, primarily from the south shore of LPO, near East Algoma along the BNSF right-of-way (ROW). Hours of construction activities will generally be 0730 to 1600, Monday to Saturday. An Ames-owned tugboat, Audrey B, will position barges and provide other on-water support within the BNSF 200’ ROW west of the existing BNSF Bridge 3.9. The Audrey B can be hailed on VHF-FM channels 16 and 13.

One of the two published navigation channels at the existing BNSF Bridge 3.9 spans 67 and 68 and half of the existing spans 2 and 3; 14 through 17; 27 through 30; 40 through 43; 53 through 56; 84; and 95 through 97 will remain unobstructed during all of the work activities. Vertical clearance of the existing bridge will be unchanged. The temporary work trestles and work barges will have navigation lights and work zone buoys in accordance with the Navigation Rules (COLREGS-Inland). Enclosure (4) of LNM 02/22 displayed the project vicinity, locations of high and low-water work areas, for the phase of the work activities. Changes to the work locations and activities will be updated by a subsequent LNM in the Spring of 2022. During all phases and locations, the noted navigational buoy-safety lighting for the work areas will be in place. The point of contact for the bridge contractor, Ames Construction, Inc. is Mike Pamperin at (612) 741-6535; MikePamperin@amesco.com. For additional information contact the BNSF Project Manager, Ryan Koper at (913) 284-3467; Ryan.Koper@BNSF.com.
WASHINGTON – PUGET SOUND – APPLE COVE TO KEYPORT – Submersible Vehicle testing
The Naval Undersea Warfare Center (NUWC) at Keyport, WA will be continuing operations in the vicinity of NUWC between University Point, the Brownsville Marina and Keyport through 23 Dec 2022. Operations will normally be conducted Monday through Friday during daylight hours. Operations will involve semi-submersible and submersible vessels escorted by a small naval craft with a flashing red light. The small craft will monitor VHF-FM channels 12 and 16. The call sign for the small craft will be “Keyport Range Control”. All craft transiting the area are requested to exercise caution and maintain a sharp lookout for possible semi-submerged vehicles while the range is in operation. Questions can be directed to Keyport Range Control on VHF-FM channels 12 and 16 or by contacting the Pacific Northwest Range Management and Ops Division, Range Control Branch, at (360) 396-2313.

LNM: 02/22

WASHINGTON – PUGET SOUND – APPLE COVE TO KEYPORT – Acoustic research buoy
SMRU Consulting will be testing one acoustic buoy in a location just offshore of Spring Beach near Shoreline from 15 December 2021 until 20 March 2022. A Buoy 2 foot in diameter will be located in approximate position 47-44-18.524 N, 122-23-03.563 W. The buoy will be monitoring underwater acoustic noise and will be in operation (unmanned) 24 hours a day and marked with a FL Y 6s (flashing yellow six second) light. Mariners are requested to keep a safe distance from the buoy. For additional information, contact Jason Wood at (360) 298-0166 or jw@smruconsulting.com.
Chart 18446
LNM: 48/21

WASHINGTON – PUGET SOUND – ELLIOTT BAY - Colman Dock construction
Washington State Ferries is conducting demolition and construction operations at the Colman Docks, scheduled to be completed in the summer of 2022. Operations will be conducted from 0700 to 1700, Monday through Friday. Mariners should be aware of marine construction equipment moored around the Colman Dock and regular tows up and down the Duwamish River in support of the operation. Equipment may obstruct small sections of the waterway adjacent to Colman Dock. Water quality monitoring will be taking place during construction operations. Please direct any inquiries to WSF Communications at (206) 402-8070 or email wsfcomms@wsdot.wa.gov.
Chart 18450
LNM: 27/17

WASHINGTON – PUGET SOUND – ELLIOTT BAY – DUWAMISH WATERWAY – Dredging and marine construction
Orion Marine will be performing dredging and marine construction in the vicinity of vigor Shipyards on the Duwamish River west waterway from 01 Sep 2021 through 28 Feb 2022. Work will typically take place from 0600 to 1730, Monday thru Saturday. The DB Petaluma and DB Miller will be on site, with several material barges, and towing provided by Boyer Towing. Each floating plant will have all corners marked with steady white lights. Mariners transiting the west waterway are requested to minimize their wake and maintain at least 200 feet from operations. For additional information please contact Bradley Morlock at (253) 552-1154 or email at bmorlock@orionmarinegroup.com.
Chart 18450
LNM: 34/21

WASHINGTON – PUGET SOUND – ELLIOTT BAY – DUWAMISH WATERWAY – Terminal 5 pier construction
Orion Marine will be continuing the marine construction activities associated with the Terminal 5 Berth Modernization Project for the Port of Seattle on the Duwamish River west waterway. Phase 2 of the project includes pile installation and new pier construction for and will run through Aug 2023. Work will typically take place from 0700 to 1700, Monday thru Friday. The DB Rainer and DB St. Helens, will each have a material barge moored alongside and will always remain on site. Each floating plant will have all corners marked with steady burn white lights. The DbVs will run on anchors at times so mariners are requested to keep at least a 200-foot distance. The crane and tugs will monitor VHF-FM channel 13. For additional information please contact Jesse Galligan at (253) 552-1140 or email at jgalligan@orionmarinegroup.com.
Chart 18450
LNM: 02/22

WASHINGTON – PUGET SOUND – HOOD CANAL – Pier construction
Manson Construction will be conducting pier demolition and construction activities in Hood Canal on Navy Base Kitsap Bangor from 17 July 2020 through Jun 2022. The project will consist of demolition of existing pier, pile driving and construction of a 500’ pier extension. Operations will Monday through Friday 0600 – 1630. There will be a derrick on site and a pile driver barge with multiple barges and a work skiff. Bangor Control Tower will be using VHF-FM channel 88A. Mariners are requested to reduce speed and minimize wake in the area for the safety of the personnel and equipment. For more information contact the US Navy POC Dennis Wiechmann at (360) 315-4084 email dennis.e.wiechmann@navy.mil or the Manson Construction superintendent Brian Dornning at (206) 718-8626.

WASHINGTON – STRAIT OF JUAN DE FUCA TO STRAIT OF GEORGIA – POINT ROBERTS – Acoustic research buoy
SMRU Consulting will be testing an acoustic buoy in a location off the western side of Point Roberts, from 07 Dec 2021 until 18 Mar 2022. A buoy 2 foot in diameter will be located in approximate position 48-59-08.9 N, 123-06-07.8 W, which is approximately 1400 yards offshore and 1700 yards south of the US-Canada border. The buoy will be monitoring underwater acoustic noise, will be in operation (unmanned) 24 hours a day, and marked with a FL Y 6s (flashing yellow six second) light. No VHF-FM channels will be used. Mariners are requested to keep a safe distance from the buoy.
For additional information, contact Jason Wood at (360) 298-0166 or jw@smruconsulting.com.

OREGON – WASHINGTON – IDAHO – NOAA’s planned cancellation of Paper and Raster charts (Revised from LNM 09/21)
The National Oceanic and Atmospheric Administration (NOAA) is undertaking a multi-year program to end production and maintenance of its suite of over 1,000 traditional paper nautical charts and all associated raster chart products and services, including: Print-on-Demand (POD) paper nautical charts, Full-size chart PDF files, BookletChart™ PDF files, NOAA raster navigational charts (NOAA RNC®), the NOAA RNC tile service, and the online RNC viewer.

Six months prior to cancelation, a notice of the intent to cancel a specific chart will be provided via a “Last Edition” notice. The final cancelation of a chart will be made via a “Canceled” notice. Both types of notices will appear in LNM Section IV, “Chart Correction.” A comprehensive list of all cancelled NOAA charts is available at: http://www.charts.noaa.gov/MCD/Dole.shtml.

Traditional paper nautical chart production is ending to enable the creation and maintenance of larger scale, more up-to-date, higher quality coverage of NOAA’s electronic navigational chart (NOAA ENC®) product. This will significantly enhance the amount of charted detail available to
OREGON – WASHINGTON – IDAHO – NOAA’s planned cancellation of Paper and Raster charts (Revised from LNM 09/21)

More information about NOAA’s program to sunset traditional paper charts is on the NOAA Coast Survey website at: https://nauticalcharts.noaa.gov/charts/farewell-to-traditional-nautical-charts.html. An online NOAA Custom Chart application at: https://devgis.charttools.noaa.gov/pod is available to create chart images from ENC data, which may then be printed. Notices to Mariners will not be issued for NOAA Custom Charts.

Mariners are advised that the start and ending dates for dredging activities may vary due to unforeseen on-site conditions, such as gill net fishing, weather and other factors.

USACE dredges request mariners transit at their slowest safe speed to minimize wake when in the vicinity of a dredge and proceed with caution after making passing arrangements. Vessel(s) and/or equipment may encroach into the channel.
