This threat is located in Barry Arm and has the potential to create a tsunami if/when a landslide is generated that impacts the water in Barry Arm. If/when this occurs localized wave heights will be very hazardous in Barry Arm and Harriman Fjord. Port Wells and Passage Canal will also see inundation and strong, unusual currents for hours following an event. The geologic makeup of the area is similar to Alaskan locations where two previous landslide caused tsunamis occurred, in Lituya Bay (1958) and Icy Bay (2015), both causing extremely large but localized tsunamis. Mariners should maintain vigilance when in the vicinity of Barry Arm or nearby waters and be prepared to depart the area if any unusual geologic activity is observed. Studies are being conducted and the situation is being monitored to allow for a better understanding of the potential results of a slide. Additional information is available at https://dggs.alaska.gov/hazards/barry-arm-landslide.html .

This anomaly has not been positively identified and mariners are requested to transit the area with caution.	Lat: 54° 07' 43" Lon: -165° 46' 23"
General/Hazards To Navigation/Hazards	Hazards To Navigation	Cold temperatures are causing a significant buildup of ice in the Upper Cook Inlet that poses extreme danger to vessels. To assist mariners, the Coast Guard Sector Western Alaska COTP is implementing the Operating Guidelines for Ice Conditions for Upper Cook Inlet, effective December 09, 2025. All vessels scheduled to arrive in areas north of Homer, AK in the Cook Inlet must submit a voyage plan no less than 24 hours prior to arrival at the Kachemak Bay Pilot Station. The Pre-Arrival Checklist, enclosure (1), Exam Form, enclosure (2), and Voyage Plan, enclosure (3) should be used as necessary and are also attached to the Ice Guidelines as enclosures and can be accessed via the USCG Captain of the Port. While use of the voyage plan template is not mandatory, your voyage plan must include all information listed in the template. Voyage plans must be emailed to sectorwesternak@uscg.mil Based on information in your voyage plan, we will determine if the vessel needs an exam prior to entry into Cook Inlet and will notify the submitter if an exam is required. Vessel agents can coordinate with Marine Safety Detachment Homer at (907) 690-2098	
Sector Anchorage, Territorial Sea - Sector Anchorage, Submerged Land Act (SLA)/General/Marine Construction (Excluding Bridges)/Dredging	Marine Construction (Excluding Bridges)	General/Marine Construction (Excluding Bridges)/Dredging From: 2025-09-01 To: 2026-02-06 Alaska Marine Excavation, LLC. will be conducting dredging operations at the Cruise Ship Terminal Dock starting September 15th, 2025 thru January 31st 2026. Dredging operations will continue 24 hours a day. The dredge COMMANDER is a 58' cutter head suction dredge, red and yellow in color, with a partially submerged pipeline. The pipeline will extend approx. 3000ft South and terminate in open water. Dredge pipeline will be marked with yellow buoys and termination scow. The dredge COMMANDER and tug Growler will be working on VHF/FM channel 79 and monitoring VHF/FM channels 13 and 16. Questions/concerns can also be directed to Brok Shafer with Alaska Marine Excavation, LLC at (907) 399-4549 or by email to brok@akmx.com.
